There have been 15 Soviet underground nuclear weapons tests which United States intelligence sources believe to be over 150 Kilotons. These tests violate the Threshold Test Ban signed in 1974 and jointly put into effect in 1976.

In January of this year, the Soviets used naplam to murder scores of men, women and children trapped in a cave in Afghanistan. These innocent non-combatant civilians were burned to death. This is a blantant violation of the 1980 Convention on Unhumane Acts of War, an agreement signed by the Russians in 1980.

The Arms Control and Disarmament Agency has recently completed a study, by Charles Sorrells, compiling the evidence that the Soviets have deployed SS-16s at Plesetsk. This study strongly supports the judgment that the Soviets have done this in violation of SALT II.

A new SS-20 mobile intermediate-range ballistic missile complex containing nine SS-20 launchers has recently been discovered near Novosibirsk in the U.S.S.R. This newly discovered complex—not previously associated with any missile activity—has been operational for several years. What this means is that all SS-20 deployment numbers must now be revised upwards. And this new discovery suggests that the U.S. verification capability may be inadequate to verify any Soviet intermediate range nuclear force agreement such as the one presently being negotiated with the Russians.

And finally, on May 25, 1972, the United States and the Soviets signed the so-called incidents at sea treaty which is designed to reduce the risk of unintended serious confrontations between our two countries on and over the high seas. Despite this agreement, the Soviets have repeatedly precipitated such incidents.

Based on this sorry record of performance, the word "sham' would seem to be a rather understated characterization of the Soviet attitude regarding bilateral agreements with the United States. When Lawrence Eagleburger, undersecretary of state for political affairs, testifies tomorrow before the Senate Foreign Relations Committee, it should be interesting to see what word he uses to describe how the Soviets have behaved. One thing's for sure: He will definitely be asked.

[From the Washington Times, Feb. 22, 1983]

HEADS THEY WIN, TAILS WE LOSE

Wonder how many of the dewy-eyed disarmers in the West are aware of the asymmetry (that's a busy word in the arms-talk lexicon) between U.S. and Soviet observance of weapons limitation treaties? Not a great many, we suppose, and probably fewer still who think it important.

But the distinctions are interesting as the frenzy for some—for any—treaty with the Soviets gains political velocity here.

At the Puget Sound Naval Shipyard, for example, the U.S. is busily dismantling its third Polaris-missile submarine, per terms of the SALT-I treaty that expired in 1977. The three subs were denuded of their missiles as a quid pro quo for putting the first two of America's Trident subs in service.

Uncle Sugar, good citizen of the world community, is living up to the treaty, as well as abiding by the unratified SALT-II agreement—so long, President Reagan says, as the Kremlin is equally meticulous.

On the same day, however, that Washington Times columnist John Lofton recounted his inability to get Navy permission to photograph the Polaris strip-tease (a "bizarre" episode, said Lofton, who readers know is given to understatement), U.S. intelligence sources were reporting indications that the Soviets are playing the arms-control game by their rules.

The gunners in the Kremlin have test-fired a new intercontinental ballistic missile, a "light" version with four nuclear warheads, the Associated Press reported.

The ICBM reportedly fired on Feb. 8, though, may be the second new missile the Soviets are polishing up for their arsenal. Last December, the U.S. government confirmed reports that a medium-sized, solid fuel ICBM was being launched.

Hold on, gang. The SALT-II treaty provided that each nation could deploy one new ICBM, and that a light one. "If they begin to test another new type of ICBM," a State Department spokesman said, "this would conflict with the terms of SALT-II."

But intelligence sources also warned the AP not to jump to conclusions based on initial indications of a new Soviet missile test. Okay.

The fat young oysters did not jump to conclusions about what the Walrus and the Carpenter had in mind when they invited the tasty fellows for a little walk along the beach.

DONALD RUMSFELD,
Skokie, Ill., February 10, 1983.

Hon. JOHN P. EAST,
U.S. Senate,
Washington, D.C.

DEAR SENATOR EAST: As you know, Ambassador Kenneth Adelman has been nominated by the President to the post of Director of ACDA. Because I have known him so long and so well, I want you to know of my very high regard for his abilities.

Dr. Adelman has served in the United States government on and off for a dozen years. When I was in the Pentagon, he served as my assistant with great skill and dedication. After leaving government in 1977, he was a Senior Member of the Strategic Studies of Stanford Research Institute (SRI), where he researched and wrote on foreign policy and defense issues, including arms control.

As you know, for the last 18 months, he has served as Ambassador Jeane Kirkpatrick's principal Deputy at the United Nations. In that position, he has had broad management experience and has participated in many National Security Council decision sessions on arms control. He has represented the United States ably in the First Committee, dealing with multi-lateral arms control matters. He also coordinated the United States' delegation to the United Nation's Second Special Session on Disarmament.

Ken will bring to this post his dedication, a fine brain, tremendous energy and creativity, and the intellectual toughness necessary to deal with difficult problems and bureaucratic complexities. I am confident he will do a first-rate job for the country.

I hope that you will get to know Ken and give him a hand on his nomination.

Thanks so much. With my best personal regards.

Sincerely,

DONALD RUMSFELD.●

HERITAGE FOUNDATION REPORTS CONTINUED UNITED STATES RETREAT FROM TAIWAN

● Mr. GOLDWATER. Mr. President, a short but thorough paper has just reached my desk which proves beyond any question that the present administration is following the same mistaken policies of the last three administrations by making unnecessary, unilateral concessions to Communist China which damage Taiwan. The author of this paper is Mr. Jeffrey B. Gayner, who is a specialist on international affairs at the Heritage Foundation. His paper was circulated as one of the foundation's regular Backgrounder reports.

Among the major conclusions made by Mr. Gayner, and supported with factual evidence, are:

Major concessions made to Peking have led to neither a more conciliatory People's Republic of China attitude toward the United States nor a diminution in demands that the United States place additional pressure on Taiwan to succumb to the People's Republic of China

These unnecessary unilateral concessions only stimulated more exorbitant demands.

The August joint communique of the Reagan administration has substantially undermined the character of United States-China policy carefully crafted by Congress in the Taiwan Relations Act.

The principal provision in the Communique reduces, and presumbably will terminate, arms sales to Taiwan.

Peking's "peaceful resolution" for Taiwan consists only of a willingness to accept a surrender of Taiwan's sovereignty.

The August communique completely ignores the vital military needs of Taiwan.

Not only does the paper point out the obvious contradictions between the Taiwan Relations Act and the joint communique, but Mr. Gayner finds that present Chinese military developments threaten obsolescence for Taiwan's current inventory of U.S. supplied aircraft. The last thing Taiwan needs is a U.S. pledge to reduce arms sales. Instead, if our purpose is to help safeguard the security of Taiwan, the United States should provide Taiwan with an advanced fighter, such as the F-16/79 or the F/5G.

Mr. President, the Heritage Foundation paper is an important document. It is clearly and persuasively written, and I ask that it may appear at this point in the RECORD.

The document follows:

FEBRUARY 3, 1983.

THE UNITED STATES, CHINA, AND THE SECURITY OF TAIWAN

INTRODUCTION

During the first two years of the Reagan Administration, constructing a coherent China policy has posed a vexing problem. The United States regrettably has allowed demands by the People's Republic of China (PRC) concerning Taiwan to dominate U.S. China policy, and even U.S. relations with Asia in general. In particular, Washington felt compelled to react positively to Peking's demands that all arms sales to Taiwan be terminated. In the five months following a Joint Communiqué of last August, it has become increasingly obvious that the major concessions made to Peking have led to neither a more conciliatory PRC attitude toward the U.S., nor a diminution in demands that the U.S. place additional pressure on Taiwan (Republic of China) to succumb to the PRC. Rather than pacifying the PRC or protecting vital U.S. interests. These unnecessary unilateral concessions, as they had in the three previous administrations, only stimulated more exorbitant demands in subsequent negotiating periods.

Through the provisions of the August Joint Communiqué, the Reagan Administration has substantially undermined the character of U.S. China policy carefully crafted by Congress in the course of passing the Taiwan Relations Act (TRA) in 1979. That act provided a workable foundation for dealing with the fundamental reality of the two hostile Chinese authorities governing the Republic of China and the PRC. Moreover, the TRA protected the close ties established over nearly three decades between Taiwan and the U.S., as manifested in the Mutual Security Treaty and a wide range of economic, social, and cultural bonds as well.

The August Joint Communiqué, more than the actions of any previous administration, threatens the continued integrity and security of Taiwan. By asserting more carelessly than ever before that Taiwan is China's internal affairs and that the U.S. "has no intention of . . . interfering in China's internal affairs, the Reagan Administration has logically undermined Taiwan's already precarious legal position. This invariably leads to endless demands from Peking to further degrade the status of Taiwan, such as the recent assertion that Taipei should be expelled from the Asian Development Bank (ADB). Taiwan is a founding member of the ADB and has fulfilled all of its obligations there. Therefore the United States should not act on behalf of Peking's political aggression to expel Taiwan, particularly since such action would violate both Section 4(d) of the Taiwan Relations Act and Section 25 of the Foreign Assistance Authorization Act (P.L. 96-259) passed by Congress in 1980.

By stating that the U.S. "understands and appreciates" Peking's "peaceful overtures" to Taiwan, the Reagan Administration in effect ignored the PRC's political history for the past thirty-four years. The implication arises therefore that only recalcitrance in Taipei prevents an accommodation between the two Chinese political authorities. Clearly the terms of any currently possible agreement have been set in Peking and require nothing less than the obliteration of the de facto sovereignty of Taiwan. By thus bending toward Peking's rhetoric on Taiwan, the U.S. makes any mutual accommodation of interests far less likely.

The principal provision in the Communiqué reduces, and presumably will terminate, arms sales to Taiwan. By placing stringent military sanctions on Taiwan that adversely affect both its military and psychological strength, the U.S. gratuitously applies pressure on behalf of Peking that can ultimately be fatal to Taipei. If, as reported, Washington were considering providing the PRC with detailed information on the defensive equipment supplied to Taipei over thirty years, the U.S. would be committing an unprecedented action toward an ally—turning over information to a hostile communist regime. The PRC will likely press for the information during the upcoming Shultz visit to Peking.

In the face of the obviously escalating potential PRC military threat to Taiwan, the U.S. should have pursued exactly the opposite course of action and provided advanced fighters to Taipei along with other new military equipment. Only a military balance across the Taiwan Straits can preserve peace in the area. If the Reagan Administration fails to reverse the direction of its China policy, the possibility of open military conflict between an increasingly powerful and aggressive PRC and an increaseingly desperate and insecure Taiwan can only be enhanced. Further, such a betrayal of an ally will seriously erode U.S. credibility in Asia and ultimately diminish its security capabilities in East Asia generally. Finally, the futility of basing U.S. political and military policy on Peking's reliability is amply demonstrated by the current prospect of a modest rapprochement between the PRC and the Soviet Union.

THE U.S. POLITICAL RETREAT FROM TAIWAN

The August 17, 1982, Communiqué marked a possibly decisive political turnaround in the decade of discussions between Washington and Peking. President Ronald Reagan and Assistant Secretary of State John Holdridge both issued statements that downplayed the significance of the Communiqué, implying that it merely continued previous policies. Analysis of the text of the agreement and its obvious implications indicates that the agreement seriously tilts U.S. policy in favor of Peking's efforts to obliterate Taiwan as a viable independent political entity.

President Reagan stated on August 17 that "This document preserves principles on both sides and will promote the further development of friendly relations between the governments and peoples of the United States and China." Similarly, in testimony before the House Foreign Affairs Committee, Assistant Secretary of State John Holdridge asserted that "The present wording evolved from ten months of intense negotiations in which fundamental principles were at stake on both sides."

However, as in all previous negotiations with the PRC, U.S. objectives dissolved, and the process led to simply resolving the extent of additional U.S. concessions. The PRC sought several interrelated objectives: an immediate oversight role in sale of arms to Taiwan, termination of such sales by a date certain, U.S. pressure on Taipei to negotiate its "reintegration" into mainland China, alteration of the strict provisions of the Taiwan Relations Act, and an explicit U.S. affirmation of Peking's legal sovereignty over Taiwan. The U.S. entered the negotiations with the principal objective of modifying PRC demands sufficiently to quiet Peking's threat to downgrade relations with Washington, mounting since the Reagan inauguration. Consequently, on every point they sought, the PRC gained either explicit, implicit, or deferred concessions from Washington. On the other hand, U.S. negotiators claimed that Peking's retreat from some of its original bargaining positions constituted PRC "concessions."

A review of these issues reveals that, however adroitly the language of the eventual Communiqué was manipulated, Peking made major gains of which President Reagan himself was perhaps not sufficiently aware. This was evidenced by the President's peculiar telephone call to Dan Rather at CBS News denying that the agreement had seriously altered the status quo.

"There has been no retreat by me. We will continue to arm Taiwan. We have a moral obligation to Taiwan. I am concerned about what the reports will do to our international relations. The Taiwan question is a matter for the Chinese people, on both sides of the Taiwan Strait, to resolve, we will not interfere in this matter or prejudice the free choice of, or put pressure on, the people of Taiwan in this matter."

On numerous occasions in private conversations with conservatives, the President has continued to deny adamantly that the Communiqué constituted retreat from his previous position on Taiwan. Only by severely straining the meaning of the language and context of the agreement, however, can it be construed that the U.S. did not retreat significantly on some fundamental issues. Greater care must be exercised in future discussions with Peking.

PEKING'S MEDIATING ROLE IN ARMS SALES

The specific language of the Taiwan Relations Act makes no provision for the PRC's having a role in the determination of arms sales to Taiwan. The language of the act [Section 3(b)] reads as follows:

"The United States will make available to Taiwan such defense articles and defense services in such a quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability . . . . (and) the President and the Congress shall determine the nature and quantity of such defense articles and services based solely upon their judgement of the needs of Taiwan, in accordance with procedures established by law."

Moreover, throughout the legislative history of the passage of that act, Members of Congress made clear that consulting Peking about such matters would be totally inappropriate. Nonetheless, the record of the past two years clearly indicates that, rather than consulting Congress as provided by the law, the U.S. State Department in fact consulted Peking. No reasonable review of the record can overlook that, each time the U.S. appeared on the verge of selling arms long promised to Taipei, Peking raised protests, which led to additional delays in concluding the arms sales. Then two days after the Communiqué was issued, the U.S. formally announced the sale of 60 F-5E fighters (worth $240 million) to Taiwan. Nonetheless, Secretary Holdridge ironically testified that the Communiqué which promised to reduce arms sales "should not be read to imply that we have agreed to engage in prior consultations with Beijing on arms sales to Taiwan." Secretary Holdridge had just concluded ten months of negotiations with the PRC precisely on such arms sales. The U.S. should refuse to allow the subject to be placed on the agenda for discussions between PRC and U.S. authorities, as such an action in effect would include the PRC in the U.S.-Taiwan arms sales process.

TERMINATION OF ARMS SALES AND PEKING'S "PEACEFUL INTENTIONS"

From the beginning of the Reagan Administration, the PRC was determined to force the U.S. to abandon its military support for Taiwan. Even Secretary Haig's efforts in June 1981, when he offered military equipment to the PRC, failed to quell Peking's demands that arms sales to Taiwan end. In fact, U.S. arms sales to Taiwan fell from $800 million under Carter in 1979 to only $225 million under Reagan in 1981. But by its single-minded demand that all sales end, the PRC eventually succeeded in extracting point 6 of the Communiqué from the United States:

"Having in mind the foregoing statements of both sides, the United States Government states that it does not seek to carry out a long-term policy of arms sales to Taiwan, that it arms sales to Taiwan will not exceed, either in qualitative or in quantitative terms, the level of those supplied in recent years since the establishment of diplomatic relations between the United States and China, and that it intends to reduce gradually its sales of arms to Taiwan, leading over a period of time to a final resolution. In so stating, the United States acknowledges China's consistent position regarding the thorough settlement of this issue."

The heart of the Communiqué resides in this provision. To again quote Secretary Holdridge, the U.S. "did not agree to set a date certain for ending arms sales to Taiwan." At the same time Peking promised in the "foregoing statement," alluded to in point 6 above, that it is a "fundamental policy [of the PRC] to strive for a peaceful solution to the Taiwan question" (point 4 of the Communiqué).

In the first place, even if no agreement existed on a termination date, the PRC extracted a pledge from the U.S. to freeze Taiwan forces at existing levels, an unprecedented U.S. agreement. The New York Times editorialized on its obvious implication:

"The practical significance of the American pledge should not be minimized. The limit on qualitative improvement means the equipment Taiwan gets from the United States will be increasingly obsolete. Should Peking ever change its mind about a peaceful resolution, Taiwan's ability to defend itself directly, or even to negotiate liberal terms of autonomy directly within a unified China, would be impaired."

The second point to note is that the PRC has already interpreted "final resolution" of this issue to mean, in the words of their foreign ministry spokesman, that U.S. arms sales "must be completely terminated over a period of time." Thus, the U.S. agreed to ambiguous language that indubitably will limit its latitude of action in future arms sales to Taiwan. In order to verify American adherence to the language of this provision, the PRC has already demanded detailed confidential information on precisely the character and quantity of all arms previously supplied to Taiwan. Of some immediate military value, the information could then become a "benchmark" for judging future reductions in sales.

Finally, Peking denies making any substantive concessions to extract Washington's unilateral disarmament of Taipei and has insisted since that no linkage exists between arms sales to Taiwan and a peaceful method of resolving the Peking-Taipei conflict. On the day of the Communiqué, the official organ of the Central Committee of the Communist Party boldly stated in an editorial:

"The United States has no right to demand that China undertake any obligation as to the methods it chooses in solving the Taiwan problem, nor should the United States put forth as a prerequisite condition for the cessation of arms sales to Taiwan that China commit itself to not solving the Taiwan problem by any means other than a peaceful one. * * *"

Similarly three days later the official PRC news agency Xinhua stated: "Here, it should be pointed out once again that U.S. arms sales to Taiwan and China's efforts for peaceful resolution of the Taiwan issue are two separate questions of an entirely different nature. * * *"

"PEACEFUL RESOLUTION" FOR TAIWAN AND PEKING'S INTERNAL AFFAIRS

In his official report to the XIIth Communist Party Congress, Chairman Hu Yaobang reiterated that the Taiwan question is an internal Chinese affair and thus arms sales mean that the U.S. is "treating Taiwan as an independent political entity." The report reads in part, as follows:

"As the Chinese Government has repeatedly stated, these are acts of infringement on China's sovereignty and of interference in China's internal affairs. Not long ago, after nearly a year of talks, the Chinese and U.S. Governments issued a joint communique providing for a step-by-step solution of the question of U.S. arms sales to Taiwan, leading to a final thorough settlement.

"We hope that these provisions will be strictly observed. Sino-U.S. relations can continue to develop soundly only if the principles of mutual respect for sovereignty and territorial intergrity and non-interference in each other's internal affairs are truly adhered to."

Unfortunately the plain language in the Communiqúe provides American acquiescence to the Chinese interpretation of the issue as an internal affair. Every allusion in the Communiqúe to the term "peaceful resolution" derives form the PRC's position linking such a "peaceful" resolution of the PRC-Taiwan conflict to Peking's internal solution of the problem. Thus, in paragraphs 4 and 5, references appear three times to Peking's "fundamental policy" of a peaceful solution. But each of these references relates to "peaceful reunification" of the PRC and Taiwan under either the Message to Compatriots in Taiwan issued by the PRC on January 1, 1979, or the Nine Point Proposal made by the PRC on September 30, 1981.

This point was reinforced by the PRC Ambassador to Washington Chai Zemin in an interview on CBS News and later reprinted in Peking. He referred to the "peaceful settlement" under the 1979 and 1981 proposals and then said, "However, we are not to make any commitment to any country on the peaceful settlement to the Taiwan problem. We consider the Taiwan problem to be China's internal affair. It is up to us to decide how to solve this problem."

In other words, Peking's peaceful policy consists only of a willingness to accept "peacefully" a surrender of Taiwan's sovereignty. Thus, U.S. enthusiasm for a so-called fundamental policy of peace obviously will be interpreted in Peking as support from Washington for their demands concerning Taiwan. The Communiqué even explicitly states that "The U.S. Government understands and appreciates the Chinese policy of striving for a peaceful resolution of the Taiwan question as indicated in China's Message to Compatriots . . . and the Nine Point proposal."

Although construed as a "new situation," according to Holdridge, the breakthrough for the agreement consisted of nothing more than a reaffirmation of Peking's previous proposals. Moreover, while embracing Peking's proposals without qualification, the U.S. completely ignored Taipei's proposals. A speech by Premier Sun Yun-hsuan on June 28, 1982, proclaimed Taiwan's three conditions for reunification: "The goal of the Principle of Nationalism is a government of the people. The goal of the Principle of People's Rights is a government by the people, and the goal of the Principle of the People's Livelihood is a government for the people." In a separate statement, the Premier indicated that "if the political, economic, social, and cultural gap between the China mainland and Free China continues to narrow, the conditions for peaceful reunification can gradually mature."

President Reagan seemed in support when he stated on the day the Communiqué was issued "We will not interfere in this matter [the Taiwan question] or prejudice the free choice of, or put pressure on, the people of Taiwan in this matter." But the actions of his Administration speak louder. Beyond embracing Peking's reunification proposals, the U.S. has promised to end arms sales to Taiwan and may even initiate a military sales program to the PRC.

The Senate Judiciary Subcommittee on Separation of Powers has launched a formal

inquiry into the possibility that the Communiqué violated the authority of Congress. For again, as when President Carter broke relations with Taiwan without consulting Congress and during the 1978 Christmas recess, the Reagan Administration has contravened the clear intentions of the Congress.

THE GROWING PRC MILITARY THREAT TO TAIWAN

Peking's policies in the defense area cannot seriously challenge Soviet military forces in Asia. Nonetheless, the PRC has augmented significantly its military power, particularly in terms of new fighter aircraft. While this buildup can only have a modest deterrent effect on the Soviets, its strengthened air power can pose a substantial military threat to Taiwan.

The August 17th Communiqué completely ignores the vital military needs of Taiwan. Rather than relating future military sales to Taiwan to the potential military threats to the island, the Communiqué pledges to downgrade, and presumably end, military sales on the basis of Peking's peaceful rhetoric. Unfortunately, as so many other nations have discovered, rhetoric can change daily, but military capabilities cannot. Thus, the security of a country, such as Taiwan, can only be adequately maintained if it can be defended against the most likely adversaries. An examination of the current military capabilities of the People's Republic of China, coupled with prospective force improvements, indicates that the plan to downgrade the military capabilities of Taiwan will create a dangerously unstable situation. In fact, in order to maintain military balance in the region, and hence a stable environment for deterrence of war, the United States should supply Taiwan with a more advanced fighter, either the F5G (sometimes designated the F-20) or the F16/79.

Present Chinese military developments threaten obsolescence for the current Taiwanese inventory of U.S. supplied aircraft. While Taiwan's Air Force at the moment has a qualitative superiority over most of the PRC combat aircraft sufficient to guarantee its security, it is not clear that this will continue to be the case. The PRC is acquiring at least three new aircraft that are significantly more capable than its imitations of the Soviet MiG 15/17/19/21.

These three aircraft, the F-8/12, A-5, H-8, alone pose a significant threat to Taiwan's increasingly outdated planes, for they will close the qualitative gap between the two air forces and the PRC's greater number will tip the balance in their favor. Moreover, other more advanced aircraft are being developed at research institutes on the mainland or possibly being purchased abroad. Should they be deployed, without a parallel deployment by Taiwan, the PRC would have total air supremacy over the Straits.

Thus, there is an overriding need to rearm Taiwan now. It takes, on average, at least two to four years, from the time of ordering, for a new aircraft to be delivered in significant numbers; then it takes another couple of years for an air force to become accustomed to the new aircraft and develop the tactics best suited to it.

THE BASIS OF PRC AIR STRENGTH

Careful examination of the three new PRC aircraft reveals how large the advances of the Chinese Communists really are. The least advanced is the A-5, a totally redesigned MiG-19 with tactical strike as its primary mission. It has new wings with 30 percent increase in surface area as well as side air intakes, thus leaving the nose free for a new targeting radar randome. This aircraft is generally considered to be underpowered with its two copies of the Soviet Tumansky R-9BF/R-9B-811 engine (the Chinese designation is Wopen 6A). There are, however, reports that new engines might be provided by the Rolls Royce Spey, which would afford significantly more thrust for its weight and size. This, of course, would greatly increase the plane's capabilities by solving what were first thought to be serious design problems. The A-5 is now being produced in significant numbers, 500 having been built by mid-1981 at the main arsenal at Shenyang (see Table 1 for performance characteristics).

The F-8/F-12 is the principal fighter in production for the People's Liberation Army Air Force. The F-12 is a PRC designed plane powered by two souped-up 20,000+lb. thrust Rolls-Royce RB-168 Spey engines (the same engine that powers the Royal Air Force Buccaneer and the RAF F-4 Phantom aircraft). It is primarily a fighter and secondly a tactical strike aircraft. It is believed to have the same, or slightly more advanced, radar fire control system and navigational aids as the A-5. Consequently, it commends an advanced all weather day/night capability that has not previously been available to the PRC.

The F-12 was based on the design concept of the MiG-23 Flogger. The Chinese have examined an Eygptian Flogger and apparently have incorporated many of its advanced features, with the exception of the swing wings (the PRC plane has delta wings). The Spey engines give the F-12 a speed of Mach 2.4. New electronic systems also are being developed for this and other aircraft. New ECM pods have been sighted indicating other internal electronic improvements. The F-12 is believed to have been in full-scale production since 1981 at the PRC's largest aircraft facility in Chengtu, the capital of the southwestern province of Szechuan. There could be increasing numbers facing Taiwan in the very near future.

The twin-engined bomber, the H(Hong)-8, is supposedly similar to a Backfire in configuration. There is little information available about this aircraft at the moment, except that it is likely to be a multi-role, swing-wing bomber, with a prime role as an anti-shipping and precision, medium-range strike on military land targets.

SUPPORTING PRC MILITARY STRENGTH

The Chinese have not limited themselves to designing/producing new planes. They have also developed new weapons systems. William Perry, Under Secretary of Defense for Research and Engineering, visited China in late 1980 and said that he saw a complete disassembled IR (infrared) guided Sidewinder missile. A conventional or nuclear tipped, radar guided stand-off missile with an estimated range of 50km has apparently been developed for the H-8. An infrared homing air-to-surface bomb has also been developed for the F-12. These new systems give the PRC Air Force an accuracy and an all-weather capability they did not have five years ago—one that will eliminate the advantage Taiwan heretofore enjoyed.

As alarming as these developments are, there is no sign of their abating. The Spey engine plant at Xian, set up in 1976, is now, after some delay, producing 20 engines a month, enough for 240 planes a year. At that rate it would take only two years to exceed the entire inventory of Taiwan's Air Force. Furthermore, the Chinese are gaining full mastery of the new technology as 70 of their technicians and engineers went to England to be taught about the Spey. Rolls Royce also sent some of their experts to the PRC to train additional scientists. As an extension of this effort the Chinese Government has started to pump funds and additional expert personnel into the premier scientific research institution, the Institute of Aeronautical Design in Peking. The PRC has also obtained U.S. technology through 400 U.S. export licenses and advanced French aeronautical technology through the purchase of the Super Frelon and the SA-365N Dauphin 2 helicopters. A plant is being constructed to build the latter in Northeast China. In addition, Marconi Avionics is to upgrade the electronics in the F-6 and F-7 in a $90 million contract. Marconi is also competing for a $500 million contract for added avionics systems.

Thus it appears that, with the initial breakthrough of signing the Spey contract in December 1975, the stagnation of Chinese aircraft production and design ended. In view of the obvious Chinese needs in the field of new advanced aircraft these production and design efforts will continue to escalate.

Examples of this threat are the F-8A and the F-8B, both of which are currently being produced by the Chinese aircraft industry. The latter aircraft is swing-wing attack plane and the former is a delta-wing interceptor.

RELATIVE STRENGTH: PRC AND TAIWAN

The qualitative threat posed to Taiwan by the F-12, A-5, and H-8 is obvious. Along with the existing numerical advantages, it casts serious doubt on the future security of Taiwan. The PRC has over 6,000 combat aircraft to Taiwan's 484, a 12 to 1 ratio; and 528,000 air force personnel to 77,000, giving the PRC an advantage of 6.8:1 in this category.

The PRC's current inventory should not be underestimated. Though the old Mig-19/21s are of limited range and growth potential, they have impressive maneuverability and dogfight potential. The Mig-19 is reported by Jane's All the World's Aircraft to outmaneuver all aircraft in the Asian theater with the exception of the F-86. The Mig-19 (F-6) reportedly can outclimb the F-104, a plane renowned for its rate of climb. The U.S. Air Force uses the F-5E to simulate Mig-21 performance characteristics when it practices air-to-air combat. The additional F-5E aircraft being supplied to Taiwan will do nothing to redress the growing qualitative imbalance between the two Chinese Air Forces.

All of the advanced Chinese aircraft, the A-5, F-7 (Mig-21), and F-12 (Mig-23), possess capabilities equal or superior to those of the F-5E, the mainstay of the Taiwan Air Force. The PRC planes, in general, are faster, have a greater thrust-to-weight ratio and approximately equal or better radar fits and rates of climb.

Recent reports claim that the PRC has contacted France concerning the procurement and possible production in China of large numbers of Mirage 2000 jet fighters. This is the most modern plane currently produced by France and is considered to be on rough parity with the F-16A. The Mirage 2000 would be a quantum leap for the PRC in terms of airframe design, power-plant, and avionics. It would easily out perform any aircraft in the Taiwan inventory. The 2000 would provide the PRC with an all-weather, day/night fighter that is equipped

with advanced, radar guided, medium range air-to-air missiles. Since Taiwan lacks an equivalent system or the potential for developing one, its air force would thus be at the mercy of the PRC.

With the possible acquisition of Mirage 2000s and the other planes now being designed and produced in the PRC, Peking would have an overwhelming numerical and technological advantage over the Taiwan Air Force and its increasingly obsolescent F-5A/Es. It would no longer be prohibitively costly for the PRC to destroy the Taiwan Air Force and gain air superiority over the island itself and the surrounding seas.

Once the Taiwanese lose the ability to dominate their own airspace, especially the seas and the Straits, the PRC will gain an increased capability to either invade the island or to implement an effective naval blockade. An invasion might be too costly a manner to destroy Taiwan as an independent entity, but the PRC still refuses to rule it out. A blockade would cripple the economy and bring Taiwan to its knees. Then Taipei would be forced to eventually surrender, failing significant outside military assistance.

These actions are not so remote as they might seem. In recent years, PRC leadership has been chronically unstable. It is conceivable that the leadership could change again or that domestic political pressure could lead to vigorous pursuit of the repeatedly avowed goal of reintegration of the island with the mainland. The military would be eager to redeem itself after the recent humiliation in Vietnam and to try out new equipment. By 1984/85, it is estimated the PRC will have 700+ A-5 attack aircraft, several hundred F-12 fighter aircraft and perhaps some Mirage 2000s as well as the thousands of aircraft that they already possess. In addition, the PRC will have advanced air-to-air missiles (AAMs) and a superb all-weather capability, which Taiwan will lack. Given this, the Taiwan Air Force would probably last less than two weeks under an intensive attack by the PRC.

Only with the prospective acquisition of an advanced fighter such as the F-5G, F-16/79, or even the F-16A can Taiwan hope to maintain a military balance in the area. By 1984-1986, Taiwan will have a maximum of 250 to 260 F-5E aircraft; all other aircraft, such as the F-104, F-5A, and the F-100 will likely be obsolete. Taiwan would need the F-16A or possibly the F-16/79 to guarantee its security as both planes constitute advanced, all-weather fighter fitted with advanced AAMs. Even with the F-5G, Taiwan might be at a slight disadvantage vis-a-vis such a plane as the Mirage 2000. However, with the superior training of its pilots, Taiwan could probably discourage PRC attack. The F-16A/F-16/79 and the F-5G could be ready for Taiwan by late 1984 or early 1985; at least 160 to 200 would be needed. Even fewer would dramatically restore military balance and substantially boost the morale of Taiwan.

Objections to the sale of these planes have centered on their range as posing a threat to the PRC. According to Jane's All the World's Aircraft 1981-1982, when both planes are carrying two AAMS and at least two bombs, the present F-5E has an equal or greater range than the F-16/79. Thus no new threat would be posed to the PRC in terms of increased ability to strike further inland. The F-16/79 would offer more to Taiwan's security than the F-5G in its ability to patrol and interdict the sea lanes and the Straits, a prime U.S. concern. With it, Taiwan could use its superior piloting capabilities to better advantage, whereas the F-5G would be easier for Taiwan to maintain because of extensive experience with the F-5E. However, the F-16/79 would not in any way be beyond Taiwanese operational capability.

Because the F-16/79 is a better plane, some degree of additional threat to the PRC would exist, but certainly not enough to raise significantly Taiwan's offensive capability. If the objective is to eliminate any possible threat that Taiwan poses to the PRC, the answer is quite simple—disarm Taipei. Unfortunately, this is the policy implicit in the August 17 Communiqué.

But if the aim is to safeguard the security of Taiwan, the U.S. should provide Taipei with an advanced fighter. The F-16/79/A is the best plane. The F-5G cannot be adequately equipped as an all-weather intercepter and retain its combat maneuverability. The F-16/79 has this potential, and the F-16A is already so fitted. The F-5G will be outdated sooner than the F-16/79, as the latter is inherently more advanced and has more room for growth. The costs of the F-16/79 and the F-5G are comparable and both planes could be available at approximately the same time.

Even if the F-16/79 or the F-5G were construed as a threat to the PRC, Taiwan is threatened far more by the PRC. Taiwan cannot even consider an invasion of the PRC; not only would it be doomed to military defeat, but such an action would guarantee the end of its political support from other nations. Consequently, the only reason for denying Taiwan an advanced fighter aircraft is that the PRC opposes the sales for primarily political reasons.

CONCLUSION

As Ronald Reagan campaigned for president in 1980, he promised, to restore balance and integrity to U.S. relations with Taiwan. Specifically he pledged that, unlike the Carter Administration, he "would not impose restrictions which are not required by the Taiwan Relations Act and which contravene its spirit and purpose." Moreover, he stated that, among the provisions of that act, the "most important . . . spells out our policy of providing defensive weapons to Taiwan." Finally candidate Reagan criticized Carter for making "concessions that were not necessary and not in our national interests."

Unfortunately, President Reagan, like his three predecessors in the White House, has continued to pursue a policy of successive concessions to Peking at the expense of the future security and integrity of Taiwan. The August 17th Communiqué made more drastic concessions to the PRC than had any previous agreement. By conceding that Taiwan is an "internal problem" of China, the U.S. has undermined morale in Taiwan and compromised its future legal status. By specifically negotiating with the PRC concerning Taiwan, the U.S. has, in fact, conceded to the PRC oversight authority of this aspect of U.S.-Taiwan relations. By using the same argument (that arms sales violate Peking's sovereignty over internal affairs), future dealings with Taiwan in trade, tourism, investment, social and cultural relations can similarly be challenged by Peking.

Numerous U.S. concessions to Peking over the last decade have neither satisfied the PRC demands concerning Taiwan, nor significantly affected their conduct of foreign policy. The U.S. has misinterpreted a serious split between the PRC and the Soviet Union as only a minor dispute that could end abruptly without constant U.S. cultivation of Peking. The PRC has effectively played upon these American fears of a Sino-Soviet rapprochement and American hopes for a peaceful PRC-Taiwan rapprochement as well. But, Taiwan, like other noncommunist countries in Asia, distrusts the PRC on the basis of bitter historical experience. Before giving support to implicit PRC pledges to resolve disputes peacefully, the U.S. should make the same demand of Peking that the PRC made recently to Moscow. In his official report to the XIIth Party Congress, Hu Yaobang, said Soviet "deeds, rather than words, are important."

In the 1951 Agreement on Peaceful Liberation of Tibet, Peking promised that "The central authorities also will not alter the established status, function, and powers of the Dalai Lama." The Dalai Lama had to flee Tibet and has never returned. Most recently the PRC has not even been able to assuage the suspicions of the Chinese in Hong Kong that prospective Peking sovereignty would not lead to disaster.

It should be noted as well that even the PRC denies any explicit connection between pursuing a peaceful policy toward Taiwan and resolving its differences with Taipei. This is the fatal flaw of the August 17th Communiqué. Thus, the U.S. should cease its tacit support of any "peaceful" proposals from Peking until such time as the PRC actually demonstrates genuine tolerance for diversity within the domain it currently governs. If the PRC refuses to concede genuine regional autonomy to areas such as Tibet that they now control, should the U.S. give credence to its vague promises for Taiwan or Hong Kong?

Given the PRC's political hostility to Taiwan coupled with its military buildup, any reduction of arms sales to Taipei would be both inappropriate and dangerously destabilizing. Maintaining a reasonable military balance over the Taiwan Straits, on the other hand, has effectively deterred war between the two Chinas for the last three decades.

In view of the continued reliability of Taiwan as an authentic ally of the United States and the growing potential PRC military threat to Taiwan, the Reagan Administration should be upgrading, rather than downgrading, the sophistication of equipment being sold to Taiwan. Specifically, the United States should sell a more advanced all-weather fighter to Taiwan to counter the new generation of aircraft being deployed by Peking. Though the August Communiqué unfortunately complicates such an action, the United States should revert to sound military and political principles and provide the equipment necessary to ensure the continued survival of Taiwan. Failure to do so can only lead to the eventual destruction of one of America's oldest and closest allies in the postwar era.●

SINTE GLESKA COLLEGE

● Mr. ABDNOR. Mr. President, today I would like to join with countless other individuals in saluting the accreditation of Sinte Gleska College, located on the Rosebud Indian Reservation, by the North Central Association of Colleges and Schools.

This is perhaps the most important milestone in Indian education as Sinte

Gleska is the first Native American college in the country to receive this accreditation.

I know that his special moment is shared by many people who have worked so hard through the years to make this dream a reality. Many times in the past 12 years, I have met with students, educators, officers, and supporters of Sinte Gleska to discuss the progress of this goal. I am especially pleased that their efforts were rewarded on January 31 when Sinte Gleska College received the authority to award both associate and baccalaureate degress.

It is my hope that this designation will serve as a symbol to other Native American colleges throughout the Nation and that they will pursue their goals as strongly as the supporters of Sinte Gleska College have.

Mr. President, I ask that a resolution adopted and concurred to by the South Dakota State Legislature honoring Sinte Gleska College be printed in the CONGRESSIONAL RECORD.

The resolution follows:

SENATE CONCURRENT RESOLUTION NO. 9

Whereas, the Rosebud Tribe in 1971 incorporated the Sinte Gleska College with the mission to provide for college education for its students and to promote the self-determination of its people; and

Whereas, Sinte Gleska has provided for college degrees and credits through a cooperative agreement with the Board of Regents through Black Hills State College, University of South Dakota and University of South Dakota-Springfield for both associate and baccalaureate degrees; and

Whereas, among the many progressive accomplishments since its inception, Sinte Gleska has now been formally awarded on January 31, 1983, initial accreditation at the associate and baccalaureate degree granting level by the North Central Association of Colleges and Schools; and

Whereas, with this formal approval, Sinte Gleska becomes the first reservation based tribally chartered college to be accredited at the baccalaureate degree level, and the second tribal institution with associate degrees in the United States:

Now, therefore, be it resolved, by the Senate of the Fifty-eighth Legislature of the state of South Dakota, the House of Representatives concurring therein, that Sinte Gleska College of the Rosebud Sioux Reservation be heartily congratulated for its exemplary educational effort and accomplishment; and

Be it further resolved, that the South Dakota Legislature extend its support and encouragement toward a cooperative and productive relationship between the state of South Dakota and Indian people in all future education endeavors for the mutual benefits of its people.●

DETROIT SCIENCE CENTER MONTH

● Mr. LEVIN. Mr. President, March 1983, has been designated "Detroit Science Center Month." The month has been highlighted to underline the evergrowing importance of science and mathematics in all communities. The Detroit Science Center plays an important part in the study of science and mathematics in southeastern Michigan schools.

The many events scheduled to help celebrate Detroit Science Center Month are intended to focus the community's awareness on the Detroit Science Center and the vital role it plays. Among the activities planned for March is a PRISM award which is given to the outstanding science teacher in the area who has best encouraged his or her students in the pursuit of science. There will also be a contest for schoolchildren in which they must develop ideas for new power sources, transmission methods and coding. A fashion show with a space theme is planned to raise funds to aid the science center. There will be a science film festival and Black Press Day will be celebrated on March 16. These are just a few of the many activities planned for the month.

The Detroit Science Center is dedicated to meeting the vital needs of the public to better understand science and technology. It is a real pleasure to recognize the Detroit Science Center for its fine achievements and the valuable service it provides people—young and old—in the area. I am sure that Detroit Science Center Month will only enhance the reputation of this outstanding facility and I am confident that its importance will increase in the years ahead.●

COMMENDATION OF REPRESENTATIVES SHANNON AND CONTE

● Mr. TSONGAS. Mr. President, we have a long tradition of cooperation in the Massachusetts congressional and senatorial delegation, and sometimes we take that collegial spirit for granted.

Today, I should like to take a few moments to express my gratitude for the outstanding service which has been rendered to my home city of Lowell, Mass., by two of my distinguished colleagues in the House, Mr. SHANNON and Mr. CONTE. It is not overstating it to say that they have together made the difference for the most exciting urban renaissance in this country.

Back in 1978, Congress approved the establishment of the Lowell National Historical Park and the Lowell Historic Preservation Commission. The mission of these two bodies is to preserve and restore the historic structures which embody the birthplace of the American Industrial Revolution. The park and the commission have become the catalyst for an enormous surge of private investment in what was a failed industrial center, and is now returning to a position of preeminence.

So, because of the national park and Commission, over $90 million in private investment has been sparked in projects ranging from housing to high technology. We have the worldwide headquarters of one of the Nation's leading computer companies, and we soon hope to have a first-class hotel, and training center to serve our business and industrial core.

We had authorized the park and Commission, but we found ourselves immediately in a position where the Federal support was lagging far behind the private support for our city's rebirth. The Federal Government, in its shortsightedness, was not willing to fund the park and Commission to undertake the important restoration work which Congress had authorized it to do. Each year, when the Federal budget was released, Lowell received either zero funds, or funds which would permit only a snail's pace of development, rather than the intense, short term development effort that was required.

Faced with this, we turned to JIM SHANNON and SILVIO CONTE for help. Over the past 4 years, these two men have worked tirelessly to insure that funds were available in the budget for the Lowell projects. They have testified, spread the Lowell story throughout the Congress, and gained the strength needed to pass the funding bills for Lowell.

Last year, when I was unable to secure Senate support for the Lowell Park and Commission, Mr. SHANNON and Mr. CONTE had an especially difficult task, which was to convince the Senate to accept the House approved funding in conference on the legislation. Throughout this time, these two Congressmen and their staffs, Dan Adams and Mary Silviera, have not only provided the technical and substantive backup and research needed to get funds secured, they have lent the most important ingredient of all—a sincere commitment and enthusiasm for the work which is taking place in our city.

While I have thanked them both privately for the miracles they have worked, I want to let everyone here and in Lowell know that they owe a deep debt of gratitude to these two outstanding public officials.●

CONGRESSIONAL BUDGET OFFICE ANALYSES ON SENATE JOINT RESOLUTION 25, S. 459, S. 473, AND S. 577

● Mr. McCLURE. Mr. President, on February 23, the Committee on Energy and Natural Resources reported the bills Senate Joint Resolution 25, a bill to redesignate the St. Croix Island National Monument in the State of Maine as the "St. Croix Island International Historic Site"; S. 459, a bill to authorize and direct the Secretary of the Interior to convey, by

quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purpose of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir; S. 473, a bill to authorize the Secretary of the Interior to acquire certain lands by exchange for addition to Effigy Mounds National Monument in the State of Iowa; S. 577, a bill to provide for the conveyance of certain Federal lands adjacent to Orchard and Lake Shore Drives, Lake Lowell, Boise Project, Idaho, at that time the Congessional Budget Office analyses were not available.

I ask that the budget analyses for the bills prepared by the Congressional Budget Office be printed in the CONGRESSIONAL RECORD at this point.

The analyses follow:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C. February 23, 1983.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S.J. Res. 25, a bill to redesignate the Saint Croix Island National Monument in the State of Maine as the "Saint Croix Island International Historic Site", as ordered reported by the Senate Committee on Energy and Natural Resources, February 23, 1983.

Based on this review, it is expected that no significant additional cost to the federal government would be incurred as a result of enactment of this bill.

Enactment of this bill would not affect the budgets of state and local governments.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., February 23, 1983.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S. 459, a bill to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purpose of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir, as ordered reported by the Senate Committee on Energy and Natural Resources, February 23, 1983.

The bill directs the Secretary of the Interior to convey without cost to the city of American Falls, Idaho, approximately 82.09 acres. The United States reserves all right-of-way and oil and gas in the land, together with the right to prospect for, mine, and remove the same.

Based on information received from the Bureau of Reclamation, it is expected that enactment of this bill will result in no significant additional cost to federal, state or local governments.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., February 23, 1983.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S. 473, a bill to authorize the Secretary of the Interior to acquire certain lands by exchange for addition to Effigy Mounds National Monument in the State of Iowa, as ordered reported by the Senate Committee on Energy and Natural Resources, February 23, 1983.

This bill authorizes the Secretary of the Interior to exchange approximately three acres of land within the Effigy Mounds National Monument for approximately four acres of land adjacent to the monument in order to make use of an existing road to clearly delineate the boundary between the national monument and private landholdings. Based on information from the National Park Service, it is estimated that no significant additional cost to the federal government would be incurred as a result of enactment of this legislation.

Enactment of this bill would not significantly affect the budgets of state and local governments.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., February 23, 1983.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed a bill to provide for the conveyance of certain federal lands adjacent to Orchard and Lake Shore Drives, Lake Lowell, Boise Project, Idaho, as ordered reported by the Senate Committee on Energy and Natural Resources, February 23, 1983.

This bill authorizes the Secretary of the Interior to convey certain parcels of land to adjacent landowners for fair market value. Based on information from the Bureau of Reclamation, it is estimated that during fiscal years 1983–85 a total cost of approximately $50,000 will be incurred by the federal government for land surveys, appraisals, and preparation of legal descriptions associated with these conveyances, and a fair market value of approximately $350,000 will be received.

Enactment of this bill would not affect the budgets of state and local governments.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.●

AMBASSADOR JEANE KIRKPATRICK ON EL SALVADOR

● Mr. HELMS. Mr. President, just a few days ago, U.S. Ambassador to the United Nations Jeane Kirkpatrick returned from an extended trip to Latin America. Mrs. Kirkpatrick is one of America's best informed and astute observers of events in Latin America. We are especially fortunate to have her as a member of this administration, speaking on behalf of the devotion of the United States to the principles of freedom and human dignity throughout the world.

Others do not feel so blessed. Upon her return, she was invited to speak at the University of California at Berkeley, a place which first became prominent in the lexicon of U.S. activism during the early sixties with the so-called free speech movement. There are those at Berkeley who believe in free speech only when it comes from the mouth of leftist ideologues. I regret that Ambassador Kirkpatrick was refused an opportunity to speak by a shrill and unruly gang of bigots who were determined that the Ambassador would not be accorded the dignity to speak from the very platform to which she had been invited.

The very university selected by American scholars as the most prestigious in a number of fields thus became the scene of a crime against the basic rights of freedom of speech and expression, which form the very basis of our representative system of government. It was a dark day indeed in the history of free institutions when an unruly mob deprived the community of the opportunity to hear a dispassionate debate of issues of burning importance.

The people at Berkeley lost their opportunity to hear the gentle but firm voice of this great lady. Perhaps they are still there, shouting, "Out of El Salvador, out of El Salvador," drowning out other speakers, perhaps their own teachers, perhaps the voice of reason itself.

Mr. President, I know my colleagues would join me in expressing dismay at this incident. I hope that they would also share my delight in hearing the comments which Ambassador Kirkpatrick delivered just a few days later, on February 19, to the conservative political action conference here in Washington. Her remarks speak for themselves. I commend them to the Members of this body and to all those who are interested in Central America. I commend them especially to the students and teachers at Berkeley who refused the opportunity to consider Mrs. Kirkpatrick's remarks the first time around. I hope they have had time to reflect on the implications of their actions and will now be open to a voice to which, it seems, they have paid all too little attention in the past.

Mr. President, I ask that the text of Ambassador Kirkpatrick's address be printed in the RECORD.

The address follows:

ADDRESS BY AMBASSADOR JEANE J. KIRKPATRICK, U.S. PERMANENT REPRESENTATIVE TO THE UNITED NATIONS BEFORE THE CONSERVATIVE POLITICAL ACTION CONFERENCE

Thank you very much. I tell you this is a lot nicer than it was at Berkeley. I really, truly, very deeply, appreciate that very generous introduction. Your welcome was a great deal more pleasant than another one I had this week.

I have had the experience in the past week of being shouted and chanted at in one place and picketed in another, presumably for the offense of supporting United States' aid to the Government of El Salvador. I say presumably because there wasn't a formal statement of charges, but there was a chant in the background that said something like "forty-thousand dead, out of El Salvador." I thought to myself if those thirty-seven American advisors have produced forty thousand dead, that was pretty extraordinary. Needless to say, we know better.

The Government of El Salvador, as you know, continues to labor under the terrible burden of trying to oppose a well-armed, well-financed campaign brought against it by guerrillas, supported and sponsored by the Soviet Union, the Soviet Bloc and Cuba, and closer to home, Nicaragua. Probably most of the people who picketed or chanted or shouted, I thought to myself, consider themselves liberals. Almost everybody who takes that position these days considers themselves liberals, and a significant portion of persons who consider themselves liberals take that position. Probably they consider that the liberal position is to oppose the not very generous U.S. aid to the elected Government of El Salvador.

Probably, some of those who were shouting and chanting and picketing were simply students who were not very well informed about events in Central America; conceivably they had been misled by their teachers. But some of them presumably were teachers. I say that because I read an interview reported in the school newspaper afterward with some people who purported to be teachers, who were outside. And when one thinks about those teachers, one wonders who misled them into thinking that the defense of an elected democracy or the defense of the United States national interest so near our border against a well-armed, well-financed guerrilla attack, is an un-liberal thing to do. I found myself wondering whatever made them think the "U.S.-out-of-El Salvador" position was a liberal position. I find myself wondering about what they knew about Nicaragua. I wondered, for example, did they know that Nicaragua, with a population of 2.7 million, now has an active-duty armed force of approximately 25,000, at least, twice the size of the National Guard of Somoza, with another 50,000 reservists and militia; much larger than any other military force in the region. I wondered did they know that to accommodate and train this force, 36 new Cuban-designed military garrisons had been built in addition to the 13 inherited from the National Guard. I wondered did they know that there were several thousand—the exact number is disputed, at the minimum 2,000, at the maximum 7,000—Cuban military and internal security advisors in Nicaragua today: that several hundred Nicaraguans are training or have completed training in Cuba and other Eastern European countries. I wondered did they know that sophisticated weapons including Soviet-made T-55 tanks, amphibious ferries, helicopters and transport aircraft had been added to Nicaragua's arsenal, all presumably to protect it against the potential aggressions of—Costa Rica.

In the background there were chants suggesting that Nicaragua's democracy needed to be protected. And I wondered what they knew about Nicaragua's democracy. I wondered, for example, did they know that the independent press in Nicaragua had been virtually silenced. That of all of what had been a flourishing, independent press only La Prensa remains, and La Prensa, for many years the voice of opposition to the Somoza government, is today heavily censored, subject to prior censorship, forbidden to publish without permission in advance on each item and forbidden to print blank spaces. I wondered did they know about the systematic destruction of the way of life of the Miskito and Sumo and Rama Indians from Nicaragua's Atlantic Coast; about villages burned to the ground, Indians moved from their ancestral homes to detention camps, about the arrests, and indeed, murder of many indigenous Indians, some 15,000 of whom today are in exile as refugees in Honduras. I wondered did they know about the 3,500 to 7,000 political prisoners languishing today in Nicaragua's prisons. About the harassment and slow strangulation of Nicaragua's independent labor unions? About the beating and arrests of their leaders? About the tightly controlled labor and peasant organizations that have been established in lieu of the independent trade union and peasant movements of Nicaragua? I wondered, indeed, just what it was they know when they chanted "U.S. out of El Salvador" and shouted of preserving Nicaraguan democracy. I wondered even more what it was they knew when they talked about, as they did, and waved placards announcing "No more Vietnams." I, too, think it is very important that we have no more Vietnams. I wondered if they meant the same thing I did when they talked about that.

It is a fact, we all know it, that Vietnam developed into a moral symbol with powerful emotional overtones—a symbol that gives intensity to any discussion of the use of U.S. power. That same intense emotional resistance against the use of U.S. power anywhere in the world, for any purpose in the world, still lingers like smog. The offer to send a peace-keeping force of U.S. Marines to the Lebanon to help in the evacuation of the PLO evoked a fear of the Vietnam syndrome.

What was that syndrome that they feared that seems to apply to any sort of military entanglement anywhere in the world? What were the lessons of Vietnam that evoked such feeling? First among the lessons that Vietnam could teach us is that where American power withdraws, something very terrible happens under certain kinds of circumstances. The argument that was made about Vietnam, everyone remembers it, was that the Government of South Vietnam—we used to call it—was probably morally unworthy of support by the United States. It was said to be guilty of serious human rights violations, of regular abuses of personal and legal rights. It was said that the United States should not stand in the way of the resolution of an internal matter by a coalition government, which you may recall, it was claimed would represent the full panoply of opinion in Vietnam.

I think we all know something about what the Government of Vietnam has turned out to be. We seem not to have learned much, however, from the lessons of Vietnam human rights under national liberation governments, or about the control and manipulation of American public opinion. How little we hear about human rights abuses in Vietnam today. Just after the war, after we withdrew from our Vietnam war, there was a good deal of emphasis on the fact that the predicted bloodbath had not taken place. Since then, there has been very little discussion of the most extraordinarily oppressive re-education camp system in the contemporary world. That complex network of camps features forced labor and employs political indoctrination. The inmates include military, political, intelligence officers, former government officials, cadres of non-Communist political parties, common criminals, ordinary citizens attempting to flee the country, and, it appears, the entire membership of the elite units of the former South Vietnamese military forces. Most inmates of the re-education camp system have never been charged with a crime. Indeed, the process of arrests and detention in these re-education camps lacks even pretext of a legal basis. Most terms are indefinite. Food supplies in the camps are totally inadequate, even for a person undertaking very light work. By late 1978, the rice ration had dropped between 400 and 470 grams a day. Meat and fish are supplied only on national holidays. Medical supplies are virtually non-existent. Malnutrition and disease are now very slowly killing the inmates. Nobody knows quite how many people are still confined to these camps. The lowest figure which I have seen anywhere is that which was cited in the Human Rights Report of the State Department submitted last month, that is 60,000. The figure more commonly encountered in European, particularly French, sources who follow the Vietnamese situation very closely, is something over 200,000. It is generally conceded that conditions in these Communist prisons are far worse than under what used to be called the "Thieu regime." Torture is very wide-spread. For example, Nguyen Van Cai, a leader of the Hoa Hao sect, who recently was released, explained to a French journalist that he had had a high-voltage light shined into his eyes, that he was hung upside down and had fish sauce poured into his nose, that he was then beaten by his guards into a state of unconsciousness. Similar experiences of torture were reported by monks arrested by the Communists and many examples of such torture have been reported by former officers and soldiers in the armed forces of South Vietnam who had the misfortune to fall prisoner in those camps.

What can we say about this? We can say that we didn't know it would happen. We can say, I suppose, that we are sorry. We can recognize, I suppose, that we bear some sort of responsibility for what has happened to these people. Solzhenitsyn wrote: "Members of the United States anti-war movement became accomplices in the betrayal of Far Eastern nations, in the genocide and the suffering today imposed on 30 million people there." Solzhenitsyn pointed out that convinced pacifists do not seem to hear the moans coming from the re-education camps of Vietnam nor do they seem to understand their responsibility for what happens there. Oscar Handlin, commenting on this in Freedom at Issue, noted that Lyndon Johnson had once agonized each day over each day's bombing targets. "Who," said

Handlin, "mourns the victims today?" Reflecting after the fact about those events Handin wrote in 1978: "The United States no more confronted the choice of war or peace in 1968 than it did in 1941, nor a choice of coalition or anti-Communist governments, not even a choice of bombing or not bombing targets that would save lives and spare dikes. The actual choice, the only choice, was between war with all its horrible risks and consequences and surrender to totalitarian aggressors whose appetite grew with the feeding. The clatter heard in the past decade out of Angola, Ethiopia, Afghanistan and Iran was the sound of falling dominoes as awareness of Western paralysis eased restraints upon assualts from within and without." The clatter is also heard in El Salvador.

The political and social events that occur where Marxist-Leninist rule are matters of fact, facts which are, moreover, readily available and have been replicated in every country which has had the misfortune to experience a "liberating" Communist revolution. The list of such countries, you know it, is now long: The Soviet Union, itself, Latvia, Lithuania, Estonia, Poland, Czechoslovakia, Albania, East Germany, Cuba, Vietnam, Korea, Cambodia, Laos, Yemen, Ethiopia, Angola, Mozambique, Guinea-Bissau, Benin, Nicaragua, Grenada. In not one country where a Communist revolution has occurred have citizens been permitted free elections, a free press, trade unions, free speech, freedom to immigrate without official obstacles. In not one country, where Communists have come to power, have the objective conditions ever been judged such that the vanguard could safely permit the toiling masses to control their own lives.

Not all Communist governments feature slave labor, forced migration, engineered famine, forced separation of families of the sort that at one time or another have characterized the Soviet Union, Cambodia, Afghanistan, Vietnam. Not all have, after the fashion of Stalin or Castro, imprisoned tens of thousands of their own citizens. But none has produced either freedom or economic development. Not one has ever evolved into a democracy. Not one. Despite the various iron curtains—electronic, political, physical—with which Communist rulers try to keep information in and information out, knowledge of political repression in those countries, of social regimentation, of economic failure, is widely, easily available elsewhere. But the faith that Communism is somehow progressive, a good thing, and the hope that each new Marxist-Leninist triumph will turn out well, seems—incredibly enough—to persist. Many liberals who had great expectations for the soi-disant nationalists and agrarian reformers of this and that—Cuba, Vietnam, Cambodia—now pin their hopes on Salvador's guerrilla coalition. And already we have heard marvelous accounts of Guatemala's indigenous, agrarian reformers.

How can it be that persons so deeply committed to the liberation of South Vietnam and Cambodia from Generals Thieu and Lon Nol are so little affected by the enslavement that followed the "liberation" of those countries? Why was there so little anguish among the American accomplices who helped Pol Pot to power? Why is there so little anguish among the ardent proponents of Sandinista revolution now that that revolution has turned into a new and more complete tyranny? Since the evidence is overwhelming that Marxist-Leninists everywhere impose economic systems that cannot produce goods and political systems that cannot produce loyalty or liberty, why is it so difficult to accept, to believe, to understand?

I was very deeply impressed last summer by Saul Bellow's most recent novel, "The Dean's December"—I commend it to all of you. In the course of that novel Bellow wrote:

"Liberalism had never accepted the Leninist premise that this was an age of wars and revolutions. Where the Communists saw class war, civil war, pictures of catastrophy, we saw only temporary aberrations. Capitalistic democracies could never be at home with the catastrophic outlook. We are used to peace and plenty. We are for everything nice and against cruelty and wickedness and craftiness, monstrousness. Worshippers of progress, its dependents, we are unwilling to reckon with villainy, misanthropy. We reject the horrible, the same as saying we are anti-philosophical."

"Our outlook," Bellow continues, "requires the assumption that each of us is at heart trustworthy. Each of us is naturally decent and wills the good. The English-speaking world is tempermentally like this. You see it in the novels of Dickens, clearly. In his world there is suffering, there is evil, betrayal, corruption, savagery, sadism, but the ordeals end and the decent people arrange a comfortable existence. In themselves, they make themselves cozy. You may say that it is simply Victorian, but it isn't. Modern businessmen and politicians, if they are going to give a billion dollars in credit to the other side, do not want to think them monstrous."

My own reflections on recent history and the contemporary scene have led me to the conclusion that we Americans are specialists in the production and distribution of wealth and goods. We are very good at it. Despite our contemporary economic problems and temporary recessions, we remain the world's greatest experts in this field. The Soviet Union, to the contrary, contains the world's greatest experts in the use and the extension of political power. They have demonstrated in continuing expansion unparalleled skill in winning control over governments and populations and in using that control in turn to win control over more governments and more populations. They are not very good at the production of goods and wealth, and we sometimes seem not to be very good at the preservation and extension of political power. Each of these activities, producing wealth and producing power, has its own rules. The production and distribution of wealth is not a zero-sum game. Quite the contrary, you need to share it in order to increase it. That is the reason that internal markets always develop and living standards go up where economic development takes place. Power, on the other hand, is a zero-sum value. The more one person has, the less another has.

An unfortunate aspect of these two qualities is that each of us tends to project to the other our own motives and goals. We cannot resist imagining that they long, above all, to develop more efficient, productive economic systems and raise the standard of living of their deprived people. They cannot but imagine that we, whatever we may say, are just about to use our undoubted might to expand our control over some new area of the world.

Sometimes, it seems to me, that we are rather like a man who goes out for a walk, finds that he is being pursued by a mugger bent on attacking him. He begins to run and so does the mugger. Then the man who went out for a walk thinks to himself, I'm not a runner. I don't want to be in a race but if I stop, he'll beat me to death. The man runs a little longer. He gets tired. He thinks maybe I misunderstood this situation anyway, maybe he just came out for a walk too. So the man slows down and he hears footsteps coming just in back of him. Then he looks back. The mugger is almost upon him. The man starts to run again. That man is us. We don't want to be in a race. We didn't come out to run. We'd really like to live our own lives, enjoy our own liberty. That's all we want to do. How can we create a situation that will permit us to do that?

Last night I spoke in Tacoma, Washington. In the question period a man said, from the left side: "This administration, Ambassador Kirkpatrick, insits on seeing the events in Central America as an East-West conflict and not in terms of the question of basic, social injustice." I said to him I wasn't sure that was a correct formulation. It is true that in this Administration we see plenty of evidence of the presence of the East. We see in El Salvador, for example, Soviet Tanks, howitzers, Sam's, a great quantity of eastern bloc arms. We see an Eastern presence. But an East-West conflict? Not necessarily. This, after all is a democracy. The people decide. Congress decides. Maybe it won't be an East-West conflict. Maybe it will just be a steady, Soviet expansion near our Southern border without any Western response at all. That is for the people to decide.

Thank you. Good night.●

CLINCH RIVER—NOW INDUSTRY IS SAYING NO

● Mr. HUMPHREY. Mr. President, for the last 2 years I have argued against further Federal support of construction of the Clinch River breeder reactor project. Throughout this period I have emphasized just how economically foolish it is for the Department of Energy (DOE) to spend money to commercialize breeder reactor technology now. I have always believed that spending so much on such a premature effort was counterproductive—that it would serve to distract the nuclear industry from its real problems and opportunities, which lie with conventional reactors.

Now the nuclear industry is starting to agree. In its most recent issue, Nuclear Engineering International concluded that the current pace of breeder development was no longer justifiable. This journal is the most popular and respected of international nuclear trade publications and previously has been a staunch supporter of breeder reactor development. Yet, in its leading comment page, the journal concluded that national efforts to build large-scale breeder projects such as Clinch River are "premature and can damage the prospects for the acceptance of nuclear technology." The journal went on to explain that:

The United States has the least need for fast reactors (and is spending the most on them) and it is difficult to see any economic or technical justification now for proceeding

with Clinch River. . . . The utilities and the vendors in the United States, as elsewhere, are putting little or none of their own money into the fast reactor. The push is coming from the scientists in the national research establishment, the existence of which is at stake.

The U.S. nuclear industry apparently agrees. In the latest issue of Nucleonics Week, the lead article, "CRBR Supporter Says Utilities Won't Put More Money into Project," details the difficulty DOE faces in gaining additional financial support for Clinch River.

Both of these articles are important reading as the Congress faces the task of bringing the Federal budget back into balance. I ask that they be printed in the RECORD.

The articles follow:

[From Nucleonics Week, Feb. 24, 1983]

CRBR SUPPORTER SAYS UTILITIES WON'T PUT MORE MONEY INTO PROJECT

The issue of utilities putting more money into the Clinch River Breeder Reactor is dead, an official who is one of the project's main supporters tells Nucleonics Week. The possibility further complicates efforts to find ways to take CRBR off the federal budget cycle and put it on a private funding footing. A utility task force examining the alternatives is considering the possibility of selling the project's electricity production, after the plant's five-year demonstration period, to DOE to power its gaseous diffusion plants, although there are problems with that idea.

Most of the ideas the task force is looking at involve capitalizing on the plant's commercial value after its demonstration period. In particular, the task force is looking at indirect loan guarantees, a DOE official said, guaranteeing on-time completion, performance and operation of the project at a reasonable cost.

One problem involved with the sale of CRBR's electricity to DOE for its diffusion plants is the existence of take-or-pay contracts DOE had already signed with Tennessee Valley Authority for electricity to run those plants. Additionally, the enrichment plant most likely to be powered by the CRBR is the first one DOE has been expected to shut down once the gas centrifuge enrichment plant at Portsmouth, Ohio, goes into operation.

Another problem the task force may face is that in taking the project out of the federal budget, fuel costs will be significantly increased. DOE has always counted on obtaining fuel for the breeder from government stockpiles, with no charge levied against CRBR since it was all part of the government. But if the project is placed on a commercial basis, the entire fuel cycle cost would have to be charged against it, Shelby Brewer, DOE assistant secretary for nuclear energy, admitted to a congressional subcommittee this week. The General Accounting Office, Congress' financial arm, has estimated fuel costs for the 25-year CRBR life span after the five-year initial period would be about $5-billion.

DOE officials have made clear that while they would like to continue to fund CRBR, they don't expect to get any more money from Congress if private industry doesn't increase its support, possibly to as much as $1-billion. Industry was originally supposed to pay half the cost of CRBR when it was estimated at $700-million. Now it is estimated to cost $3.6-billion and utilities are contributing $338-million. Increased utility or vendor contributions and/or foreign government participation are being eyed as ways of raising funds to complete the project, as are federal loan guarantees, performance guarantees and tax incentives. The final DOE recommendation may include a mix of options.

The project faces tough sledding in Congress this year. Last year the House pulled funding for it from the continuing resolution that is financing DOE's fiscal 1983 operations. The Senate restored funding, but the compromise conference report set aside $1-million for DOE to come up with a report on funding alternatives by March 15. Whatever DOE comes up with, however, will probably be the beginning of the debate. An industry source says the existing task force primarily is being handled by the utilities, and vendors and general industry will probably have some ideas of their own to propose. The Edison Electric Institute testified before a Congressional subcommittee on behalf of the project this week but made no reference to increased funding by utilities.—*Frances Seghers, Washington, and James Branscome, Knoxville.*

[From Nuclear Engineering International, February 1983]

FACING FACTS ON FAST REACTORS

(By Richard Masters)

The large amounts of money being spent world-wide by the nuclear industry on the development of fast breeder reactors is becoming increasingly difficult to justify.

Is this continuing level of expenditure appropriate if one takes a rational view of future trends in energy demand and fuel supply? Will it ever be possible to recoup the vast sums that have been spent and the much greater sums that will need to be spent before the fast reactor can become a commercial option for electricity utilities?

The present nationalistic and quasicommercial approach to the development of the fast reactor in many countries is premature and can damage the prospects for the acceptance of nuclear technology. Serious reappraisal is needed of national expenditures on fast reactor R.&D. and measures are urgent to bring about effective savings and improved results through international cooperation.

It is not enough to compare the production costs of one kilowatthour from an FBR with those from an IWR. This ignores all the other factors, including the time scale, involved in bringing FBRS into commercial operation. There should in each country be a systematic quantification of the costs of introducing FBRS and comparison with expected benefits, all discounted to an appropriate date with due allowance for the risks. Similar studies are also needed on an international scale. An international project does not automatically justify what does not make sense nationally.

For the past 30 years the conventional wisdom in the nuclear industry has been that fast breeder reactors will eventually take over the base load generation of electricity, at least in industrialized countries.

More generally the fast reactor has been seen as offering energy independence and a more than transitory existence to the nuclear industry.

The need to press ahead with the development and application of FBRS has been seen as urgent. In 1967 the IAEA predicted that "if only the current types of nuclear reactor continue to be built, then by 1980 all known reserves of low cost uranium would be committed." And some 10 years later the UK Atomic Energy Authority was confidently predicting an installed capacity of 33 GWe of breeder capacity in Britain by 2000, with a huge expansion to follow.

Even at that time serious independent observers of the industry in Britian were questioning whether the FBR could ever be economic and there has been growing acceptance that Britain cannot justify going it alone. How many countries can?

TIMESCALE

Every year the timescale gets longer and the economics more uncertain. The British Central Electricity Generating Board in its evidence to the Sizewell inquiry says it might need to order fast reactors in 25 years from now, but adds: "There is considerable uncertainly about this date; it could be somewhat earlier or perhaps considerably later." The Board's new chairman, Sir Walter Marshall, who as chairman of the UKAEA was until recently in charge of Britain's fast reactor programme, has said that the first truly commercial fast reactor with its fuel cycle could not possibly be operating in Britain until 2013 and in practice it was more likely to be commissioned a decade later.

Sir Walter believes it would be "irresponsible" to abandon a fast reactor programme but accepts that "in view of the demand for electricity and the fall in the price of uranium there is a strong a priori reason for saying that the right economic decision is to slow up."

Similar caution is evident in all other western countries with fast reactor programmes including France, where the utility Electricité de France is showing no enthusiasm for a "commerical" programme of fast reactors to follow Superphenix.

The United States has the least "need" for fast reactors (and is spending the most on them) and it is difficult to see any economic or technical justification now for proceeding with Clinch River. Unfortunately here as elsewhere arguments based on national prestige are brought to bear on what should be economic decisions. The utilities and vendors in the United States, as elsewhere, are putting little or none of their own money into the fast reactor. The push is coming from the scientists in the national research establishments, the existence of which is at stake.

The recent statement on fast reactors by the British government has the merit of recognizing the real position. The UKAEA, under its new chairman Sir Peter Hirsch, has been asked to draw up a development programme that is geared to the longer timescale for the likely introduction of FBRS and which takes account of the potential for securing the maximum benefits from international collaboration.

The timing is good. The Authority has an opportunity for taking a lead in specifying what a realistic r and d programme for keeping the fast reactor option open should consist of in present circumstances and how effective international co-operation might be achieved. Britain could, for example, buy into Superphenix for operating experience and offer PFR at Dounreay as a test bed for components. It has unrivalled expertise on the FBR fuel cycle and also plutonium to contribute to an FBR club. In this way Britain's current r and d expenditure on fast reactors of £100 million a year could be reduced considerably. There is a precedent

here in the approach by the AEA to expenditure on fusion which lead to the setting up of Jet.

Uranium will not be suddenly exhausted or become excessively expensive in the early years of the next century. There will be plenty of time to identify the trend and decide when it is worth ordering FBRS instead of thermal reactors. In any case there is scope for stretching out supplies by improving uranium utilisation in light water reactors and the introduction of reactors with better neutron economies.

But perhaps of greater significance to fast reactor economics than the availability of uranium is the fact that with advances in techniques for the storage of irradiated fuel from light water reactors utilities can avoid reprocessing. The uncertain and growing costs of reprocessing are then properly loaded on the fast reactor and with limited reprocessing there will be doubts about the availability of plutonium to fuel a large programme of fast reactors. In these circumstances the fast reactor may never be economic.

There still remains the strategic argument but the benefits must still be properly quantified and balanced against the premium it is worth paying for an insurance policy of fast reactors. At present it seems excessive. If the nuclear industry is to win support and acceptance for the fast reactor it will have to provide effective answers nationally and internationally. Evangelical fervour is not a substitute for sound technical and economic argument.●

SALUTE TO PETER DeSIBIO

● Mr. D'AMATO. Mr. President, on February 28, 1983, a very dear friend of mine, Peter DeSibio, known to everyone in Nassau County as "Uncle Pete," will celebrate his 75th birthday.

Uncle Pete has been a Republican Party leader in Nassau County for over 40 years. He has been an inspiration to me personally and to all who have served with him in civic and charitable organizations.

Uncle Pete has been deeply involved in civic, cultural, and humanitarian activities and he continues to serve a broad range of community interests. Many institutions have benefited from his strong commitment to public service.

The list of his achievements is very long and impressive. I will list only a few to indicate to my colleagues the breadth of his interests. He has raised money for the Hebrew Academy of Nassau County for almost 30 years, and at the same time has headed drives for the Catholic Diocese of Rockville Centre, the Community Chest, the Salvation Army, the American Red Cross, the American Cancer Society, and Scholarship Awards for the Lawrence Public Schools.

Mr. DeSibio has served his community tirelessly. I am proud to say that he is a consitutent and a friend. I ask my fellow Senators to join me in wishing him a happy birthday.●

THE PRESIDENT SHOULD SEEK A SECOND TERM

● Mr. WILSON. Mr. President, I ask that my remarks made at the California State Republican Party Convention, urging the President to seek a second term, be printed in the RECORD.

The statement follows:

PRESIDENT REAGAN SHOULD SEEK REELECTION

(By Senator Pete Wilson)

("* * * President Reagan has * * * inspired in us a profound pride, gratitude, admiration and confidence * * * his enormous challenges in restoring America to prosperity, opportunity, and the strength required to keep the peace, will require not just the two years remaining in his present term but a second term. "—California Republican Party resolution by Sen. Wilson, Jan. 30, 1983.)

WASHINGTON.—He's called "The Great Communicator." And, President Reagan proved why once again recently when he delivered his masterful State of the Union address.

In a command performance, he proved wrong all those preachers of doom and gloom who would like to portray this presidency in disarray.

I happened to escort the President as he came before the joint session of Congress. Let me tell you: this is not the wounded stag that those partisan detractors hope for.

President Reagan demonstrated once again that he is a man who understands what the country needs. He will not perscribe the quick fix. He has the wisdom, the courage, the experience, the know-how, to do the job right.

His tradition is that of our party's founder, President Lincoln, who once said, "Let us have faith that right makes might, and in that faith, let us to the end dare to do our duty as we understand it."

Like Lincoln, our President told us truthfully that the nation faces difficult challenges. We are experiencing hard times. But we are coming out of the tailspin. We are on the road to recovery. We are getting America back to work.

The President focused rightfully on the economy. The deficit, he said, is like an anchor being tossed a drowning man and with it we would drown in a tide of red ink.

He recognizes the need to bring spending under control. Yet we find ourselves in a position of having to rebuild and strengthen our defense. We have little choice when during the 1970's defense spending nosedived while domestic spending increased in some categories as high as 97%.

Did you know that in 1962 about 50% of the budget went for national defense? Or that in 1982 that amount is only about 20%? Compare that to the Soviet Union which over the past decade has outspent us by $140 billion on strategic weaponry alone. Add that to the conventional superiority the Soviets are acknowledged to have.

Yet, this is a President committed to peace through strength. Strength and a clear resolve to protect American interests are the only credible deterrents to Soviet aggression.

In the face of this inevitable clash of priorities, this President recognizes we can't afford a near $200 billion deficit. He knows that we cannot be strong abroad unless we are strong at home. He knows that America cannot be strong and healthy until our economy is strong and healthy.

The President has offered to tough austerity program to bring that spending down and to get the job-generating ability of the economy going strong. Results are already clearly being shown.

One of the areas he is addressing has tremendous impact on California—high technology. Our state is #1 when it comes to this new vanguard of job development. He understands that in marketing and agricultural states like ours need to have legitimate access and the right of fair competition overseas.

The President appealed for bipartisan support, of the kind he gave leadership to in forging a compromise on Social Security. He has shown his willingness to work and to communicate together.

Now the time has come to work with and communicate something to The Great Communicator. We out to say enough to the gleeful pessimists.

We need to tell this President that he is not only a great human being for whom we have a deep personal affection, but that he is a superb President whose performance in office has inspired pride and confidence.

This is a President in the tradition of Lincoln. This is a President blessed with the vision, faith and stamina to do his duty as he so clearly understands.

That is why I offer this resolution to the California Party so that we will be united in purpose for 1984. We will under the banner of President Ronald Reagan and Vice President George Bush complete the task that they've begun and to lead us to peace and prosperity.●

SENATOR SIMPSON'S COMMENTARY

● Mr. DANFORTH. Mr. President, no Senator can make a point more clearly or more colorfully than the junior Senator from Wyoming. Not only are his points well made, they are worth making. ALAN SIMPSON is a person of principle and conviction. He has no reticence about honestly stating his views without regard to the trendiness of the moment.

Last Sunday a column written by Senator SIMPSON appeared in the Washington Post. It is a valuable piece because it provides at least a modicum of balance to the criticism incessantly directed at the EPA.

Senator SIMPSON's column deserves not only our reading but our reflection. It is an important commentary not just about the EPA but about the Congress, the media, and popular trends in public discourse.

I ask that Senator SIMPSON's column be reprinted in the RECORD.

The column follows:

[From the Washington Post, Feb. 20, 1983]

IN DEFENSE OF ANNE GORSUCH—EPA IS DOING THINGS BETTER

(By Senator Alan K. Simpson)

Lord, here we go again! With the scent of the kill filling the flared and twitching nostrils of "the observers" in Washington, and with good old "high emotion" vaporizing all desire to seek reason and balance, the "pack" is circling in on the Environmental Protection Agency and its administrator, Anne Gorsuch. It reminds me of that old

cartoon of the two buzzards in the tree, with one saying, "Patience, my ass. I'm going to kill something!"

I am not an apologist for Anne Gorsuch. She beautifully expresses her own thoughts in a very frank and candid manner—an interesting woman. Yes, I, too, have heard the same comments about her—that she is aloof, cold, tough as hell, arrogant, confrontational, sly—the full spectrum of adjectival abuse.

Have you ever seen a pack of coyotes? They are not the kind of warm and furry animals that you pat gently on the head and feed a dish of warm milk. They circle their prey—fired up and lathered by the chase—and then rip at the throat. They will polish off a lamb in pretty short order. Anne Gorsuch is not perceived as being a lamb—indeed not—and it may be that fact alone that has helped get the old juices flowing as the pack attempts to drag her agency to its knees.

What spurs this kind of attack? What fires and focuses all this energy? It may be that everything else is too dry or boring to bear. After all, legislating—often like administering—is just about the driest and sometimes dullest form of human endeavor. For it consists of research, reading, reviewing, meeting with fellow legislators, amending, searching, learning, growing, determining how to compromise an issue without compromising yourself, and in humility finding how to take a crumb when you can't get a loaf. It is not high drama.

But when all of that pent-up frustration born of boredom finds a chink in the boilerplate then hallelujah, the chase is on! At the first mention of the word "shredder" the old eyeballs bulge and fangs come out. With all the gleeful licking of the chops going on, and now even a new "in" title ("Sewergate"), it is sometimes difficult to inquire as to whether there is any reason or balance or fairness lurking in the organization being assaulted. Possibly we might consider taking a few moments for a presentation of "the other side."

The version of recent agency history that is currently fashionable is that the pre-Gorsuch EPA was a heady model of efficiency and fairness ("One of the most efficient and capable agencies of government," according to The New York Times). That is not the EPA I remember. I recall an EPA that was hopelessly behind schedule on the implementation of the major environmental laws, constantly mired in controversy and battles with the states and other branches of the federal government, and frequently accused of "anti-business bias" in the ideological interpretation of scientific evidence. It was an agency whose leadership was portrayed as being largely indifferent to the efficient management of the nation's resources.

Given our national fiscal situation, it was both necessary and inevitable that Anne Gorsuch would be asked to prune the EPA budget and subject agency activities to a more rigorous scrutiny than they had ever undergone before.

Perhaps some of the subsequent changes at EPA have been unwise. It is difficult to tell since there seems to be such a dearth of knowledgeable and disinterested analysis of what has really taken place. The hard-hitters in the Washington environmental community have been unremittingly hostile to Gorsuch since well before her confirmation and have always denounced in near hysterical tones virtually everything she has done. Most of Gorsuch's critics are simply so pinched and shriven with bias partisanship that they would flunk a saliva test.

The administrator of EPA has the task of trying to enforce some of the most convoluted and ambiguous statutes and regs ever enacted. Almost every significant regulatory action she takes is challenged in court—by someone. Not only is she subject to the constant cross fire from the environmentalists, the business community and Congress, but her actions are under a barrage of continuing judicial review. The fact that she is widely criticized does not succinctly mean that Anne Gorsuch is doing a miserable job.

An interesting example is the criticism that EPA is now getting—from the environmentalists, of all people—for taking seriously the statutory deadlines for attainment of clean air standards. We now hear the extraordinary argument that these attainment dates really don't have anything to do with actual air quality—that the deadlines Congress fussed, struggled and busted its fanny over a few years ago don't apply out there in the real world. I think Anne Gorsuch might be forgiven for having the impression that she just can't win regardless of what she does.

One of the delightful ways for a lawmaker to pick up a few headlines in the old hometown press is to subpoena Gorsuch before one of the many committees and subcommittees in this place, whose staff spend an inordinate amount of of hours sniffing out subject matter that can get "the boss" on the tube. Just run out a subpoena and have Anne Gorsuch haul up to the Hill, by pack mule train, about 750,000 documents having to do with, say, Superfund. It's a great and time-honored game. But is it always productive? I think not.

The theory here, when the fur begins to fly, is to get on the "right side." Which side is the right side? Quite naturally its the side that makes you a folk hero at home.

There is no question that the basic philosophy and style of this administrator is less pleasing and digestible to the environmental community than that of previous administrators. But I do labor under the longstanding illusion that a public official should be judged not on the basis of clamor or conflict but on the basis of certain results—in this case, environmental quality. The truth is that the health of the American people and the quality of their environment are getting better, not worse. The air and water may not be as clean as we wish, but they are eminently cleaner than they were, and show continuing improvement. Hazardous waste dumps are being cleaned up. No previous EPA administrator can boast of that fact.

It is not my purpose to defend all actions that Anne Gorsuch has taken as administrator of EPA. I've surely resisted some. I know I would have handled some matters quite differently had I been in her shoes—but who of us can object to fair and informed criticism of the record of any public official?

What I do not have much stomach for is the mindless antipathy, the raging harassment and assertions, the blatant lust for the "kill" that has been so evident recently.

Much has been made of the reduced budgets at EPA. This is seen by some thoughtful people as a lessening of the commitment to clean up our nation. Is it? What happened may be something that makes sense. Lawyers were fired and scientists were hired. Anne Gorsuch stated, "I don't need all that money for lawyers and litigants and bright stars and fancy writers and paper peddlers and white paper specialists. Just give me some 'grinders' who can sit down with the deputy, John Hernandez, and other scientists and crank out a list of the chemicals that cause difficulties for human beings. I want to know what they are, how they can be controlled, what we should be up to. Let's toss out the lawyers and hire the scientists and get some rationalization about scientific effect of chemicals." Makes sense.

I believe many of us have finally plugged our ears to the old siren song of Washington. The words and music went, "If we only had a good chunk more money and some more good people, we could do you a tremendous job." There aren't too many people left around here pumping out that guff any more or buying it. Many see clearly that we no longer need lengthy litigation, marvelous memorandums, ponderous tomes, distinction piled upon distinction, and paralysis by analysis. Start walking the walk instead of talking the talk.

But others still don't agree. Seems every time we take a crack at a responsible amending or reauthorization of the Clean Air Act we get letters from constituent groups who have been wired up in a miasma of misrepresentation: "Lay off the Clean Air Act, Simpson, or we'll tear your shorts off!"

Recent public opinion polls clearly show that the American people want clean air and clean water and are willing to pay for it. I go for that. This does not mean that the public's willingness to pay should be translated into a willingness of the federal government to spend itself goofy on environmental programs. We can have a clean environment and reduced budgets if appropriations are expended wisely. That is what Anne Gorsuch's administrative efforts are about—the wise and thoughtful use of limited resources.

All federal agencies and departments are finding the going tough in these times of tremendous deficits. Should EPA be exempt from all economic constraints while our right to sensible environmental protection is already being maintained under current funding levels? None of EPA's harshest critics has shown that EPA has not continued to follow the law just as set out by Congress, nor can the critics show that the environment has been degraded, because just the opposite is true.

"Superfund" is a case in point. Under the stewardship of Anne Gorsuch, EPA has taken significant and effective actions to establish priorities to clean up some of the worst dump sites in the nation. Some will argue that litigation is preferable to any out-of-court settlements. But let us not forget that each case litigated costs the taxpayers hundreds of thousands of dollars while always delaying the actual cleanup. Out-of-court settlements are not intrinsically evil.

So: what the hell *have* they been doing over there? Well, EPA has been active in reducing the backlog of state implementation plans (plans required of the states before environmental protection strategies can be approved by EPA). This backlog has been reduced by 98 percent under Anne Gorsuch.

Through management streamlining, the requested budget reduction of 50 percent in 1982 has not prevented the EPA from proposing 14 effluent guidelines and promulgating 12 of those—when before this administration came on the scene only one was birthed after an investment of more than $100 million. For the very first time, EPA is on track with court-ordered deadlines. Is this not responsible action? One would think so.

The backlog of overdue decisions on chemical testing has been reduced by 25 percent. Backlogged applications for pesti-

cide registrations have been reduced by 97 percent and use permit delays reduced by 83 percent. The backlog on grants and other resistance agreements has been reduced by 95 percent. The clogging of unresolved audits has dropped from 653 to 5 during the past 18 months. And if one examines the actual record, acid rain research levels have increased—contrary to the comments of the critics.

As chairman of the subcommittee on nuclear regulation, I observe EPA's Office of Radiation Programs. That office has accomplished much since Anne Gorsuch and John Hernandez took charge. It has really zeroed in on its mission of establishing environmental standards for a variety of activities in the nuclear field, many of which were hopelessly behind schedule and had, prior to Gorsuch's arrival, been but "pacing items" for the regulatory progrmas of other federal and state departments and agencies. This re-emphasis of ORP's mission might well be one of the most important achievements of EPA in the nuclear field.

EPA has also proposed standards for high-level waste repositories, an issue that the agency had been grappling with for an extraordinary period of time. These standards, once adopted, will be incorporated into the Department of Energy and the Nuclear Regulatory Commission high-level waste repository programs.

Final standards for inactive uranium mining and milling activities, which were recently promulgatd by EPA, will allow DOE to move forward in its cleanup program for these inactive sites. Standards in numerous other areas related to the nuclear field have shown great progress since Gorsuch took over the shop, including standards for active uranium mill tailings sites that EPA in the past had failed to promulgate, even in the face of a statutory congressional mandate.

Because enforcement and implementation of clean air programs are two of the EPA's most important responsibilities, virtually no funding reductions have been proposed in those areas. Research support for national hazardous air emission standards has increased by $1.3 million to ensure their timely completion. The enforcement effort continues at the same funding levels as fiscal 1983, and EPA is maintaining its focus on the most significant violators, which include those tampering with auto pollution equipment and the large industrial polluters. The 17 percent reduction in state grants in this area is based on EPA's belief that improvements in federal and state operations will enable states to operate effectively with a reduction in the federal share of the total resource support.

Acid rain research will increase by $1.5 million to a total of $14 million. Total government-wide funding for acid rain will be $27.6 million, an increase of $4.3 million over the past fiscal year. Quality assurance efforts will get a $1.3 million injection.

There was an increase of nearly $1 million for improving toxic risk assessments. Total health effects studies will be funded at an increased level of $51 million, an increase felt necessary to continue to protect the health of American people.

The most diligently ignored factor in EPA's budget is the increase in funding for Superfund by 48 percent—and increases in resources for site cleanup by nearly 55 percent. If numbers alone are the game, then know that in 1982 EPA obligated 81 percent of all the funds appropriated in this program—including obligation of 90 percent of all waste-site cleanup funds. In 1984, EPA will be expanding the number of sites where response actions will be conducted.

The EPA budget proposals for 1984 deserve sensible analysis and not ridicule. The proposals for both 1982 and 1983 have resulted in environmental progress. Programs that were dormant are now productive. Savings of nearly $200 million over the 1981 appropriations are to be achieved while the EPA continues environmental progress through a series of actions: addressing a growing number of the most dangerous hazardous waste sites; improving management of our basic regulatory process in the EPA such as in the toxic new source performance standards, effluent guidelines and pesticides programs, and basic and essential regulatory reform efforts that have enabled the agency to implement statutory responsibilities in a much more sensible and effective manner.

We hear much about the acid rain issue—and should. We hear that EPA may be "stalling," prolonging research efforts as a means of reducing any chances for successful acid rain legislation. Yet there are (believe it or not!) professional scientists at EPA—career people—who survive all of the changes in administration throughout the years. The criticism leveled at EPA is a whack in the chops to these dedicated scientists and their objective work, as well as to many of the politically appointed administrators. The real truth is that Congress *does* need more information on acid rain—regardless of the lack of House action or the recent action taken by the Senate. EPA has been responding to this need for more information and will certainly continue to do so. Congress does need some more information on things like: the buffering capacity of different soils; the effects of oxidant catalysis; the role of long-range transport; the efficacy of different control strategies; and the effects of windblown alkaline dust on acid rain formation. EPA is not stalling on the acid rain issue. Instead, Congress is severely reined in by a lack of finite knowledge about the cause-and-effect relationships of different industrial control strategies. Congress should take the rap on inaction and stalling on acid rain, not EPA.

Notice, too, that when persons have expressed to Anne Gorsuch that something might be awry, or that sly trickery is afoot, or that the sneak thieves are in full flight or that the shredder has shorted out-or when they say Rita Lavelle shouldn't be working here, or that she should, or that Hugh Kaufman shouldn't be here, or that he should—all of those mumblings, memos and meanderings get turned over to the Department of Justice. It seems like a good place to report charges of wrongdoing. If things are really out of whack, it will come out in the wash.

And finally—isn't it interesting how "the observers" seem to foster preconceived notions about this administration and the environment? I would hope we might dispel one notion—that the proection of the environment and the public health and safety is solely in the domain of those of the other political faith. Check out the record of the Republican Senate and a Democratic House and review the number of environmentally responsible bills that have been passed by those bodies and praised by the president as he signed them into law—endangered species, barrier islands and nuclear waste legislation to mention but three.

Perhaps it would be well for us all—congress-persons, "the observers" and the public we serve to consider again the words of Edmond Burke: "Those who would carry the great public schemes must be proof against the most fatiguing delays, the most mortifying disappointments, the most shocking insults and worst of all—the presumptious judgment of the ignorant beyond their design."●

PREVENTING HUNGER AT HOME

● Mr. SASSER. Mr. President, I am pleased to be a cosponsor of Senate Concurrent Resolution 6, "Preventing Hunger at Home." The resolution expresses Congress commitment to insure that federally funded nutrition programs are protected from budget cuts which would prevent them from responding effectively to the nutritional needs of children and adults in these times of economic hardship and high unemployment.

During recent Budget Committee hearings, I had the opportunity to ask Secretary of Agriculture Block about proposed cuts in the child nutrition programs and the special supplemental food program for women, infants, and children (WIC). His response was disturbing for the administration's budget proposals amount to reneging on the Federal Government's commitment to and responsibility for nutrition programs.

The administration is proposing, once again, to put the summer food program, child care food program, and the school breakfast program into a general nutrition block grant. If this proposal is enacted, there would be a 15 percent reduction in the funding for these programs and the child care food programs for family and group day-care homes would be eliminated. Under the block grant, States would be permitted to use their grant money to finance child nutrition and related activities, however, there is no assurance that the States would replace the money lost by these programs.

Mr. President, child nutrition programs are significant to the future of our Nation, and to reduce them to the proposed levels would be a calamity. Let me illustrate the effects of block granting the breakfast, child care, and summer feeding programs.

In Tennessee, a 15-percent reduction in funding would eliminate 11,131 schoolchildren from the school breakfast program. Nationally, the number of children forced out of the program could be as many as 500,000. Since the onset of this administration's budget-cutting tactics, 900,000 fewer children participate in this program.

The child care food program (CCFP) provides assistance to family and group day care operations in low-income areas so that they can provide nutritious meals and snacks to preschoolers without raising day care costs for their families. The proposed budget removes all funding for CCFP for family and group day care homes and consequently cuts out one-third to

one-half of the daily nutritional requirements for 165,000 low-income children. The outcome of this action can only be to raise fees charged to already financially strapped working parents or reduce the quality of care provided these children.

As for the summer feeding program, 500,000 low-income children who had been served in previous summers have already been eliminated from the program because of budget cuts and new operating restrictions. Further budget cuts will only mean that more children will be subjected to the health problems associated with inadequate diets.

The school lunch program currently serves 23,000,00 children in over 90,000 schools of which half are from low-income families. There are over 3,000,000 fewer children and 2,000 fewer schools—a 12-percent decrease—participating in the school lunch program than before the administration's initial budget cuts, and a third of these children had been receiving free and reduced price lunches.

The administration is proposing a couple of disturbing technical changes to the school lunch program in their 1984 budget. First, they are proposing to delay the inflation adjustment reimbursement rate until January 1984. This translates into schools losing money operating the program since they would be paying current prices for food supplies and would be reimbursed based on prices from 6 to 20 months in the past. Schools with a high number of low-income students are reimbursed more, therefore, their losses due to the delay would be greater. A second administration proposal would require certification from the food stamp office before children would be allowed to get free or reduced price lunches. Families who refuse to apply for food stamps because they view it as humiliating are often willing to get free or reduced price lunches because the rules of the program protect their children from being treated differently from paying children. These families will probably drop out of the program should this proposal be enacted. Moreover, certification by the food stamp office would require parents to appear at the food stamp office and thus would mean losing time from work, which they cannot afford, and, in most cases in my State, traveling to the county seat which is miles away from home, school, and work. Food stamp workers are already overburdened and this added change will not only jeopardize the efficiency of the school lunch program and the food stamp program, but also result in the loss of more children from the school lunch program.

Mr. President, as has been widely publicized, the special supplemental food program for women, infants, and children (WIC) clearly leads to a decrease in the number of premature births and low-birthweight babies, and for every $1 spent on the program there is a saving of at least $3 in future medical care expenses. This program is designed to provide supplemental nutritious food to pregnant, postpartum, and breastfeeding women, infants, and young children from low-income families who are determined by professionals to be at nutritional risk. The administration is proposing $1.06 billion for the program in 1984, the current level of funding. Yet food prices are expected to rise 5 percent in fiscal year 1984 and as a result about 5 percent of the WIC participants will be dropped from the program. This translates into approximately 115,000 low income, nutritionally at risk women, infants, and children being terminated from the rolls of one of the most successful and effective nutrition programs we have on the books.

Mr. President, we are presently experiencing a WIC caseload reduction of approximately 150,000 from the number served in fiscal 1982. The current reductions and proposed reductions are coming at a time when our Nation is reeling from an anemic economy and historically high unemployment. Infant mortality is on the rise in cities with severe unemployment; if anything, we should be increasing support for WIC. I am deeply concerned, too, for the thousands who are not being served by this program who have historical health problems and are eligible for WIC and for those who have inadequate diets and desperately need it.

I would like to complement the Senator from Minnesota (Mr. BOSCHWITZ) for introducing this resolution which reaffirms Federal commitment to reducing hunger and malnutrition and provides reassurance to those who need and depend upon these nutrition programs to help them through the current difficult economic circumstances. I would also like to thank Ms. Janet L. Wolf and the Tennessee Hunger Coalition for their time and cooperation in providing my staff with information on the status of the Federal food programs in Tennessee.

In conclusion, I feel it is imperative that we take a long, hard look at ways to enhance these programs and seriously consider the long-term consequences—social, psychological, and financial—of domestic policies which address only immediate costs and benefits. I urge my colleagues to support Senate Concurrent Resolution 6 and the principles it embodies.

Mr. President, I ask that the letter from the Porter-Leath Children's Center, which illustrates the effects of the 1984 budget proposals on child nutrition programs, be printed at this point in my remarks.

The letter follows:

PORTER-LEATH CHILDREN'S CENTER,
Memphis, Tenn., February 7, 1983.

Hon. JAMES SASSER,
405 Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR SASSER: I am writing today about the administration's proposals for the Child Care Food Program (CCFP). I understand that the administration is proposing a block grant for food with a reduction of about 28 percent in funding. I further understand that they propose to eliminate from CCFP all funding for family day care.

Because our agency is the sponsoring organization for a network of day care homes, these proposed cuts are of serious concern to me. The 35 day care homes in our network serve about 110 children, all of them children from poverty families. We are totally dependent upon funding from CCFP for food for these children. This year we anticipate receiving about $55,000 from USDA for food service in this program. The other costs in the program come from Title XX and United Way, neither of which can make up any reductions for food service. In a nutshell, if we lost the money for food service, there is no way we could continue the program at all.

This would mean that the 110 children now in day care could no longer participate. Each of these children is in day care because a parent is working or in training for work. Remember these are low income families working at marginal jobs at best. They do not have resources to pay this cost of food for their children. These parents would undoubtedly have to drop out of training or quit work if their children were denied day care.

Senator Sasser, enough is enough. Our agency has cut services and cut services. We lost $70,000 in foster care and day care from Title XX in October, 1980. We cut back the number of children who were getting day care and foster care at that time. We lost $300,000 in health services in December, 1981. We dropped our program for pregnant adolescents, and further reduced our health services to children in North Memphis. Just last month we lost $50,000 in our emergency shelter program, reducing our capacity to serve abused and neglected children. Last year we took a cut in our food service, when the administration reduced the number of meals or snacks that are allowed to be served to children. Currently, we are permitted to serve only two meals and one snack each day. In all, we have lost more than $420,000 in actual reductions in this small agency. We cannot afford to take any more cuts at all. Reductions in food service will mean the end of our day care program.

This $420,000 cut in the last year and a half is more than a 30 percent reduction of our total budget and over 60 percent of our federal funds from Title XX, USDA, and Children & Youth Administration. It does not seem fair or right to me that we should be asked to take more cuts, especially when those cuts will simply put out of business entirely one of our programs.

Please help us to keep the program alive, and to keep the kids in the program eating properly. Don't let the administration take any more cuts out of programs such as this one. I count on you for your support.

Very truly yours,

JAMES R. BENNETT,
ACSW Executive Director.●

ACID RAIN

● Mr. LUGAR. Mr. President, my colleague the senior Senator from Illinois recently addressed the Illinois Mine Workers Legislative Conference on the problems of the high sulfur coal industry and the need to assure the future of midwestern coal. Senator PERCY finds that the impact of proposed acid rain legislation is as severe for Illinois as it is for Indiana and other midwestern coal-producing States. Senator PERCY points out that the acid rain legislation proposed last year by the Senate Committee on Environment and Public Works may have no impact on acid rain problems in the most sensitive areas while a liming program would provide immediate relief, relief which is needed until scientific knowledge advances far enough to suggest a reasonable solution to the acid rain problem. The Subcommittee on Energy, Nuclear Proliferation and Government Processes has also released two valuable studies of the impact of this proposed legislation.

I ask unanimous consent that the text of Senator PERCY's speech and the studies by the Department of Energy and the Congressional Research Service be printed in the RECORD for the benefit of my colleagues.

The material follows:

ADDRESS OF SENATOR CHARLES H. PERCY

Rich Trumka, John Banovic, Leroy Bauer, Joe Angleton, Jerry Hawkins, and my mine workers friends. I deeply appreciate your inviting me here today to address this Annual Legislative Conference of the United Mine Workers of America.

Since the topic of your conference is legislation, let me begin by just mentioning one piece of legislation which I feel will adversely affect not just mine workers, but all Americans who work and strive to save and invest for their financial futures.

Last summer, the Congress decided it would be a good thing to begin withholding Federal income taxes on both interest and dividend income. In the Senate, that particular provision passed on a close vote of 50 to 48. I am proud of the fact that I was one of the 48 Senators who opposed this provision. It runs counter to all of the things we have been trying to do in order to stimulate more personal savings.

I wanted to tell all of you who have taken the time to write your elected representatives in Washington about this matter that your message is being heard loud and clear. In the last four weeks, my office alone has received over 200,000 cards and letters on this issue—more mail than on any other single issue in the entire time I have been in the Senate. More mail on withholding than on Watergate, Vietnam, the Panama Canal, and even labor law reform. I have already introduced legislation to repeal this law. Keep those cards and letters coming in until it's taken off the books!

I certainly do not need to tell you about the troubles faced by Illinois miners. Thirty percent of our miners are out of work—5,000 miners out of a work force of 16,000. Domestic and international markets for our coal are sluggish, despite a good price and our best efforts to promote exports. Non-unionized Western coal continues to make inroads into the traditional markets for our coal. And acid rain legislation in Washington poses a significant threat to the Illinois coal industry.

I am not pleased with the present conditions for Illinois mine workers, and I know you aren't. Your challenge and mine is to see what we can do about it. There are some important and meaningful things that we can do. There are some things we should not do.

Illinois is the "Saudi Arabia" of coal. There are an estimated 162 billion tons of identifiable and recoverable coal reserves in Illinois—enough coal to provide centuries of power to American and foreign consumers. We must not permit Illinois coal to be lost as a national energy asset.

We are not going to let the Federal Government turn its back on important funding for fossil fuel research and development. I will vigorously fight the Office of Management and Budget's proposal to slash by 58 percent the funding for these crucial R&D projects. We need more of the kind of research being carried out at Argonne National Laboratory in Illinois—like the dry-scrubber that I dedicated one year ago—not less. I will also continue to fight with Congressman PAUL SIMON to turn the Carbondale Mining Technology Center into a national center for research into overcoming the problems of the high-sulfur coal industry.

We must not allow the current glut in the oil market to lull us into excessive dependence on a single energy source. The full utilization of high-sulfur coal as a liquid fuel—methanol—can and will be important to future generations.

In fact, while we in the United States have been slow to develop a real interest in the use of methanol, the Japanese have already expressed their eagerness to use methanol as a clean burning boiler fuel. As Chairman of the Foreign Relations Committee, I have been working on a project with the Japanese government which, over a 30-year period, could use as much as 186 million tons of number six Illinois coal.

In a nutshell, the project calls for the construction of a methanol plant in Panama that would be supplied with Illinois coal shipped through New Orleans. The methanol would be piped across Panama to supertankers for the trip across the Pacific to Japan. I am happy to report that progress to date on this project has been good—we already have $2.5 million in federal support for the project and we fully expect the private sector in the U.S. and the Japanese government to lend additional support.

I know that the issue of highest priority at your Legislative Conference this year is the acid rain legislation that has been introduced in the 98th Congress. Despite the lack of firm scientific evidence, this legislation calls for a ten-million ton annual reduction of sulfur dioxide emissions into the atmosphere. It places the entire burden of reducing emissions on the Midwest—on the utilities that burn high sulfur coal and, ultimately, on the miners who extract that coal. It callously disregards the human misery that will be felt from Illinois to West Virginia.

Up until now, the debate on this legislation has unfortunately been couched in the rhetoric of "environmentalists" versus "labor and industrial concerns." I do not see it that way. In my sixteen years in the U.S. Senate, I have worked closely with both industry and labor and I have enjoyed your support. And no one can question my record as an environmentalist or my support for providing a clean and healthful environment for all Americans. The real question at hand on this legislation is whether this can be achieved without sufficient evidence as to whether the benefits will outweigh the costs which would be borne by thousands of American workers and consumers.

Let's look at those costs. Six months ago, I asked the U.S. Department of Energy to prepare an impact statement on how this acid rain legislation would affect the high sulfur coal industry. I was so startled by their findings that I asked another agency, the Congressional Research Service of the U.S. Library of Congress, to conduct its own study. I am releasing both of these studies to you today. This is what they had to say:

Over 21,000 Illinois miners and allied workers will permanently lose their jobs if this legislation becomes law;

Most utilities now burning Illinois coal will switch to low-sulfur Western coal as the least costly way to comply with the stringent S-O-2 reductions called for in the legislation;

By 1995, Illinois coal production will drop by at least 40 percent, or 25.6 million tons, if this legislation becomes law;

The brunt of this decline in coal production will be felt in Randolph, Perry, Jackson, Williamson, Saline, and Gallatin Counties. Dr. Larry Parker of the Congressional Research Service calls the impact "very harsh." Unemployment in these counties, already at 18.2 percent last December, will be driven up to an unbelievable 29 percent. Personal income in those counties will drop by $200 million or 20 percent.

These casualties will be created despite the lack of evidence on the "benefits" side. despite the fact that we already have an acid rain strategy in place that requires up to a 90 percent reduction in S-O-2 emissions for new emissions sources. Despite the belief by some scientists that the 10-million-ton S-O-2 reduction called for by the legislation may not save a single fish or tree.

Let me tell you about my approach to this problem. It calls for evidence, hard facts on the benefits and the costs. I have cosponsored legislation with Senator Byrd of West Virginia that will accelerate the study of this problem, and get us clear answers to this problem no later than 1987. Our approach says let's not wait until 1995, as the acid rain legislation says, to bring relief to the sports fishing industry of the Northeast. Let us bring relief in 1984 through a federal program to fund the liming of acidified lakes, regardless of the cause.

Let's follow the lead of Sweden, which has successfully brought back to life up to 1,500 lakes where fish had previously been dying—at a cost of only five million dollars, no lost jobs, and no increased costs to utilities and consumers. Sweden plans to expand this program to 20,000 lakes by 1986.

The Byrd bill, which I fully support, provides for up to 75 percent federal support for state liming programs similar to those which have been so successful in Sweden. The most important aspect of this bill is that we are preserving jobs while we are searching for a viable solution to the acid rain problem—one which is based on hard facts and clear evidence.

We have learned from the U.S. Department of Energy and the Congressional Research Service that the acid rain legislation currently pending in Congress would cause an economic catastrophe in America's heartland. It will retard conversions to coal from overpriced Canadian natural gas and im-

ported oil. It will drive up the price of low sulfur coal, causing consumers to pay higher electricity bills and making low sulfur coal less competitive in world markets, which should be good news to the governments of South Africa and Poland.

Let's face it. It is an environmental problem when the elderly, the disabled, and the poor are forced to struggle to afford higher utility rates caused by this approach.

It is an environmental problem when a family is left with the breadwinner out of work without just cause.

It is a grave environmental problem when a whole region is economically destroyed because of the indifference of Washington.

I promise you this morning: as your senator, I will continue to fight on your side, every step of the way. The voice of Illinois coal—the strong voice of Illinois coal—will be heard in Washington.

Thank you.

DEPARTMENT OF ENERGY,
Washington, D.C., September 24, 1982.

Hon. CHARLES H. PERCY,
Chairman, Subcommittee on Energy, Nuclear Proliferation and Government Processes, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR PERCY: I very much appreciate your concerns with the energy impacts of the "Acid Rain Proposal" approved by the Senate Committee on Environment and Public Works on July 22, 1982. The Department has also extensively reviewed the proposed legislation, especially the potential impacts to energy supply and demand, and has concluded that this legislation does not serve the best interests of the Nation.

Our analysis of the legislation pending before the Senate indicates that massive costs will be imposed on two key components of our Nation's energy infrastructure: the coal industry and electric utilities. Moreover, the costs incurred by these two sectors will eventually be borne by consumers and industries dependent upon coal and/or electricity for their energy needs. The Department is also concerned that the stress placed upon these sectors could lead to unnecessary increases in oil and gas use, harm our ability to participate in the growing coal export trade, impede the ability of the Midwestern and Appalachian coal industries to respond to long term energy needs, and seriously disrupt the economies and stability of major Eastern coal producing regions.

Portions of the proposed legislation addressing nitrogen oxide emissions would seriously impede the ability of electric utilities to convert existing oil or gas units to coal. Specifically, the bill would prohibit increases in nitrogen oxide emissions from January 1981 levels on a plant-by-plant basis. Since coal combustion inherently results in more nitrogen oxide emissions than does the combustion of natural gas or oil, savings estimated at between 350,000 and 400,000 barrels of oil per day from coal conversions will not take place. In addition, ten powerplants which have already converted to coal, representing a displacement of 60,000 barrels of oil per day, may have to be reconverted back to oil because these conversions resulted in nitrogen oxide emission increases beyond the January 1981 levels.

The Department is even more concerned with the provisions of the proposed bill that would mandate a reduction in annual sulfur dioxide emissions in 31 Eastern states by 8 million tons below 1980 levels. The Department's findings regarding these sulfur dioxide limitations are as follows:

There are only three methods available to achieve these levels of reduction: coal switching, flue gas desulfurization (scrubbers), or coal cleaning. On an annualized accounting basis, the costs of these three methods are comparable. The method of economic choice will depend upon site-specific characteristics of each powerplant.

Although the costs of each control method appear comparable, there will be a substantial bias towards coal switching. Almost all of the powerplants affected by the bill will already have been in service for at least twenty-five years. The capital investment needed to install flue gas scrubbers doesn't make economic sense if the powerplant has only a limited service life prior to retirement. The technologies for coal cleaning available today are limited in the degree to which sulfur compounds can be removed. Overall, the Department anticipates that between 50 and 75 percent of the sulfur dioxide reduction mandated by the bill would be achieved by switching from high to low sulfur coals.

Moreover, the sulfur emissions problem is largely a problem of older plants. Modern plants have installed extensive clean-up systems. Thus, the problem is self-correcting over time as the older plants move into retirement.

The direct dollar costs of the sulfur dioxide reduction mandated by the bill have been calculated by the Department to be at least $3.5 to $4.6 billion annually in 1982 dollars. Because of a number of simplified assumptions, these calculated costs should be considered as a lower bound or minimum estimate. Actual direct costs are likely to be in the range of $5 to $7 billion annually in 1982 dollars.

These annual costs eventually taper off as the affected powerplants are retired. Taking such retirements into consideration, the Department anticipates that the total direct costs incurred over the effective lifetime of this legislation will be between $110 and $150 billion in uninflated dollars. The annual and total costs estimates are relatively insensitive to the control technique used (because direct costs of each method are roughly comparable).

These direct costs translate into higher bills for residential, commercial and industrial consumers of electricity. For 1982, the Department estimates total annual electricity revenues in the 31 Eastern states at about $70 billion. Thus, the $5 to $7 billion anticipated cost increase represents a seven to ten percent increase over current average electricity payments. Averages, however, can be deceptive since some states will bear very little of these extra costs while others, especially those highly dependent upon coal for electricity generation, would see substantial rate increases. It appears that five states (Ohio, Indiana, Missouri, Pennsylvania and Illinois) would be required to achieve about 60 percent of the initial 8 million ton sulfur dioxide reduction, 16 states would be responsible for attaining about 35 percent of the reduction, and 10 states for about 5 percent. Those states required to achieve the greatest levels of emission reduction will also bear the greatest portion of the overall costs.

The proposed legislation will cause a major disruption to the Nation's coal mining industry by eliminating the market for an estimated 140 to 175 million tons per year of medium and high sulfur coals and placing almost an equivalent amount of demand on low sulfur coal supplies. While nationwide coal mine employment is unlikely to be significantly affected, between 36,000 and 45,000 miners employed in medium and high sulfur coal mines are likely to lose their current jobs. Unfortunately, low sulfur coals are generally not found in the same geographical areas as the medium and high sulfur coals mines that would be forced to shut down. For example, net coal production in Illinois is estimated to drop from its 1981 level of 51 million tons to 26 million tons by 1995. This represents a decline of about 70 million tons from 1995 coal production forecasts, and would result in a loss of employment opportunities for about 18,000 miners.

These production and employment decreases will lead to significant adverse regional impacts. Because the average miner's family consists of 3.6 persons, the proposed legislation will adversely affect between 130,000 and 160,000 citizens. On top of this, local businesses and the communities in which these miners and their families live are likely to experience substantial economic disruption and social dislocations. These adverse impacts will occur in an industry and in regions already experiencing significant unemployment. For example, the United Mine Workers reports 18.7 percent (or 32,400 miners) of its membership as currently unemployed. Illinois coal miner unemployment is currently running at about 16 percent or 2,700 miners. Almost all of this unemployment is associated with our medium and high sulfur coal fields.

The proposed legislation will also cause the demand for low sulfur coal to increase sharply. The greatest demand stresses resulting from this legislation are likely to be on our premium low sulfur Eastern coals. Our major concern is that a sharp increase in the demand for these coals will result in significant increases in prices. Higher prices for low sulfur coals will adversely affect more than the large number of electrical utility and industrial powerplants that would be forced to switch from high sulfur coals. Throughout the Eastern United States, current users of low sulfur coals would also see higher coal prices. In addition, coal conversion, especially by industrial boilers, will be significantly reduced resulting in continued high oil and natural gas use. Unfortunately, we are unable to provide reliable quantitative estimates of the anticipated rise in low sulfur coal prices, the impacts on industrial coal users and regional industrial development, and the potential increase of oil imports. This is because the shift in coal demand is so significant as to call into question the usefulness of our analytical prediction tools which model fuel-choice behavior under stable market and economic conditions.

The Department of Energy is also concerned with the potential impact of this legislation on coal exports. The coal export trade consists almost entirely of low sulfur coals. Higher prices for U.S. coals will alter the competitive position of U.S. producers, could reduce the incentive for foreign energy users to substitute coal for petroleum and natural gas, and may be interpreted by our allies as an example of U.S. Government interference in coal markets that is insensitive to their energy needs.

Our Nation's ability to support its energy requirements is strongly dependent upon the use we make of our vast coal reserves. Close to 50 percent of these reserves are found in the Midwest and Appalachian states; yet only 15 percent of these Eastern reserves are known to consist of low sulfur coals. Therefore, we must be able to rely

upon our Midwestern and Appalachian medium and high sulfur coal reserves. The Midwest and Appalachian states, traditionally strong coal producing regions, have the infrastructure and workers needed to respond to our Nation's short and long-term energy needs. However, the impacts of the proposed legislation literally portend the crippling of these essential medium and high sulfur coal industries.

In summary, the Department of Energy finds the acid rain proposal now pending before the Senate as a premature move toward legislation. The costs of this proposed acid rain legislation are massive. These costs alone would not deter our support if we had evidence that would indicate that commensurate benefits would be achieved. That evidence is simply not available. In essence, we are being asked to set aside billions of our Nation's wealth to obtain benefits that have yet to be demonstrated.

Sincerely,

J. HUNTER CHILES III,
Director, Policy, Planning, and Analysis.

IMPACT OF PROPOSED ACID RAIN LEGISLATION ON THE ILLINOIS COAL INDUSTRY

(Prepared for Senate Subcommittee on Energy, Nuclear Proliferation, and Government Processes, Senate Governmental Affairs Committee, by Larry B. Parker, Analyst in Energy Policy, Environment and Natural Resources Policy Division, Congressional Research Service, February 21, 1983)

[Graphs and charts mentioned in article not reproduced in the RECORD.]

INTRODUCTION

In an effort to begin mitigating the acid rain problem, several bills were introduced in the 97th Congress to reduce sulfur oxide (SO_2) and nitrogen oxides (NO_x) emissions from utility and industrial plants. In August 1982, the Senate Environment and Public Works Committee passed a proposed program to reduce SO_2 emissions by 8 million tons over the next twelve years and to freeze NO_x emission rates at their current level. The bill does not dictate the manner in which the reduction would be achieved, providing affected States with flexibility in meeting the mandated reduction.[1]

A primary focus of the discussion on this bill has been the cost of compliance in terms of higher utility bills. Utilities have generally argued that political constraints will force them to place flue gas desulfurization (FGD) units on their plants, inceasing electricity rates. The coal companies and United Mine Workers Union have argued that utilities will switch from burning high-sulfur coal to lower-sulfur coal because switching is cheaper then FGD units. Finally, analyses done for various government agencies and interest groups have suggested that a "least-cost" mixture of FGD units and fuel switching may occur which would minimize electricity rate increases.[2] This final scenario tends to favor fuel switching over FGD units because of cost, but includes some FGD because of various technical, contractual, and site-specific constraints to fuel switching.

A "cost" issue which has not been addressed adequately is the impacts of such a bill on the coal industry in major coal-producing States.[3] If a State attempts to minimize the electricity rate increases from acid rain legislation, it will tend to maximize the impact on high-sulfur coal-producing States by favoring fuel switching over FGD units. If a State attempts to protect its local high-sulfur coal industry by insisting on FGD units, it will maximize the electricity rate impact of the legislation. However, these two issues have generally been discussed separately, preventing the tradeoff identified above from being discussed fully.[4]

This paper examines tradeoffs between electricity rates and the high-sulfur coal industry by analyzing the effects of a "least-cost" reduction scenario for the coal producing areas of Illinois. The discussion is divided into four parts: (1) background on coal producing areas in Illinois; (2) analysis of the effect acid rain legislation would have on those areas, focusing on particular counties; (3) discussion of potential mitigating factors to the impacts identified; and, (4) a conclusion.

BACKGROUND

Illinois has the third largest coal reserves in the nation behind North Dakota and Montana. As shown in Figure 1, most of the State has some reserves with particular concentrations in the southern half of the State. As shown in Figure 2, most of the State's 50 to 60 mines are located in the southern region. The smaller mines tend to be surface mines with the larger operations being deep mines. The State's coal production is divided between the two modes with deep-mining having a slightly larger percentage of the production.

Illinois coal is burned primarily in two regions, as shown in Table 1. The first is the midwest, the traditional area for consumption of Illinois coal. The primary consumers in this region include Illinois, Indiana, Iowa, Missouri, and Wisconsin. Generally, the coal is transported by rail or barge with some intra-state shipments by truck. Shipment by barge generally involves some shipment by rail or truck to the river at the production end or from the river at the receiving end. In 1977, the largest railroad haulers of Illinois coal were: (1) Missouri Pacific (11.8 million tons); (2) Illinois Central Gulf (10.9 million tons); (3) Burlington Northern (6.2 million tons); (4) Chicago and Northwestern (3.1 million tons); and, (5) Conrail (2.8 million tons).[5] The second region is the southeast, particularly Florida, Georgia, and Mississippi. This region represents a growing market for Illinois coal. Generally coal shipped to the southeast entails a combined barge and railroad transportation mode.

Table 1.—Shipments of Illinois coal to large (over 25MW) powerplants in 1979

State:	*Tonnage*
Florida	1,420,000
Georgia	2,962,900
Illinois	18,341,700
Indiana	9,317,900
Iowa	1,666,000
Kentucky	539,800

The coal being mined is bituminous with a fairly high energy content—11,000 to 13,000 Btus per ton. However, it is considered high-sulfur coal having an average sulfur content above two percent. Ash content averages about 10 percent.[6]

It is the sulfur content of Illinois coal which makes it less desirable than some other coals, particularly western coals.[7] The imposition of air quality standards in the early 1970's placed a premium on low-sulfur (under 1 percent) coal. This bias toward lower-sulfur coal has changed the pattern of coal consumption in Illinois. In 1966, before passage of the Clean Air Act, Illinois utilities burned Illinois coal almost exclusively. However, as shown in Figures 3 and 4, by 1975 low-sulfur western coal accounted for about 30 percent of the market. This trend has continued. By 1981, Illinois coal accounted for only 47 percent of the coal burned by State utilities.[8]

Partly because of declining production in high-sulfur coal areas during the early and mid-1970's, (Figure 5) the Congress changed the sulfur dioxide requirements in 1977 to mandate a percentage reduction in SO_2 emissions regardless of the sulfur content of the coal. This sliding scale replaced the New Source Performance Standard (1.2 lbs. per million Btus) for coal-fired power plants established in response to the 1970 Clean Air Act. This change has eliminated the clear cost advantage low-sulfur coal had previously with respect to future power plants. However, the trend of the early and mid-70's of converting existing power plants to low-sulfur coal to meet emissions standards continues, although at a significantly slower pace as the compliance process is virtually complete. (See Table 2)[9]

TABLE 2. FUEL CHANGES IN COAL-FIRED POWER GENERATION CAPACITY IN ILLINOIS

[Megawatts]

Total coal-fired power generation capacity in 1972		16,424

The proposed acid rain legislation requires sulfur dioxide reductions from existing plants. If the experience of the early to mid-1970's is a guide to future utility action, much of this reduction would probably come from fuel switching, unless political factors constrain that option. Such a scenario would minimize the electricity rate increases, but maximize the impact on high-sulfur coal areas.

IMPACT OF "LEAST COST" SCENARIO ON ILLINOIS

As noted earlier, the primary parties directly affected by the proposed acid rain reduction program have generally taken opposite and extreme positions regarding implementation strategies. The utilities have suggested that they will use FGD units, driving up the initial cost of compliance to consumers. The coal companies have suggested that the utilities will fuel switch, lessening the cost to their consumers but maximizing the cost to the high-sulfur coal industry.

For this analysis, a least cost scenario is used because neither of the extreme alternatives discussed above is likely to occur. Assuming economic forces are allowed to work unhindered (as in a least cost scenario), the

---

Footnotes at end of article.

result would be a mixture of FGD units and fuel switching.[10] A least cost scenario would tend to favor fuel switching because of its cost advantage. However, as shown in Table 3, the cost differential between most alternatives is insufficient to conclude that one alternative will be consistently chosen over others. The inclusion of other market conditions, such as boiler compatibility, contractual arrangements, transportation costs, and low-sulfur coal demand, will dictate FGD units in some circumstances. It is the inclusion of these other considerations which makes an all fuel switching scenario impossible.

As suggested by utilities, political forces may be used to alter the least cost solution. However, such a result would come as a response to perceived inequities in the least cost solution. Hence, to determine whether sufficiently serious inequities will occur to warrant political action, one must first examine the market solution. From that analysis, one can determine what, if any, kind of mitigating action is necessary. As suggested later, there are several alternatives and degrees of alternatives available to policymakers, depending on the perceived seriousness of the problem. To assume a worst-case scenario as fact is to prejudge the result of the political process, and ignore other possible, and less costly, solutions.

Table 3. Representative Annualized Costs of SO_2 Reduction Alternatives [1]

Control strategy:	*$/ton SO_2 removed (mid-1982 dollars)*
Shift from high- to low-sulfur coal [2]	250–300
Shift from high- to medium-sulfur coal [2]	350–400
Shift from medium- to low-sulfur coal [2]	400–450
Shift from high- to low-sulfur residual oil	450–600
Shift from unscrubbed to scrubbed high-sulfur coal [3]	400–500
Shift from unscrubbed to scrubbed medium-sulfur coal [3]	600–1,100
Shift from unscrubbed to scrubbed low-sulfur coal [3]	1,500–2,000

[1] Cost will vary considerably depending on region and plant size. Costs per ton presented in this table are intended to be representative of average control costs only.

Costs include costs of upgrading particulate removal equipment.

Based on retrofit scrubbing costs for a 500-megawatt powerplant.

Methodology

The specific least-cost scenario chosen for this analysis is an 8.1 million ton reduction as modeled by ICF Incorporated.[11] The 8.1 million ton scenario was chosen for analysis due to its similarity to the proposed bill. However, it should be noted that the specific reduction requirement does not have a significant influence on Midwest coal production shifts. Because fuel switching is usually the easiest and cheapest method to achieve a quick reduction in SO2 emissions, fuel switching is generally employed first. As the reduction requirement rises, more reliance is placed on FGD. Table 4 lists the production impact of various reduction targets assuming a least-cost implementation strategy. As shown, the effect of SO2 reductions on the Midwest does not change significantly until 13.1 million tons.

To determine the reduction for Illinois, the Midwest production number (which includes Illinois, Indiana, and western Kentucky) was broken out according to the individual state's 1980 production (the base year of the projections). For Illinois, this resulted in an 25.6 million ton reduction in coal production.[12]

Impact—A six county example

A reduction of 25.6 million tons could have a dramatic effect on parts of Illinois. Twenty-five million tons of coal is about 40 percent of Illinois' 1980 production. If one restricts coal production to that consumed by electric utilities, the percentage is closer to 50. Unless Illinois could at least partially mitigate this production loss by acquiring new markets for Illinois coal by 1995 (when the reduction would be in full effect) or by some other means, significant economic disruption could occur.

[2] ( ) represents a decline in production.

Source: ICF, Inc.

To examine more closely the effect of such a production decline on Illinois, the analysis will focus on six counties in southern Illinois which produce over 50 percent of Illinois' steam coal. These counties are: Randolph, Perry, Jackson, Williamson, Saline and Gallatin. As shown in the Figure 6, they form a belt across southern Illinois and are dependent on the coal industry to a significant degree. These and surrounding counties will received the brunt of any steam coal reduction because of an acid rain program.

Description

During the 1950's, southern Illinois was a declining area, both in terms of coal production and population. From 1950 to 1960, the area's population declined 20 to 30 percent in contrast with significant gains in the northern part of the State. During the 1970's coal production stabilized in Illinois at a higher level than during the 1950's (see Figure 5) and the population trend reversed (see Table 5).

During the early 1980's, southern Illinois is an economically depressed area. Table 6 shows the high unemployment rate in southern Illinois. As indicated, the current recession has taken its toll with the area's unemployment considerably over the national average in some southern counties.

TABLE 5.—POPULATION TRENDS IN SOUTHERN ILLINOIS—1970–81

Besides high unemployment, the effective buying income (EBI) of southern counties is generally less than the State average. As shown in Table 7, the disparity between southern Illinois and the State average is wide: southern Illinois' EBI is from 20 to 40 percent lower than the State average across the three measures listed. The coal industry plays an important part in preventing this disparity from widening. As shown in Table 8, employment in the six county area falls into six categories: mining, manufacturing, transportation and public utilities, retail sales, services, and government (mostly State and local employees such as school teachers). These sources also account for the major share of personal income in the six counties. However, as shown in Table 9, the mining industry accounts for more wealth in the community relative to other sources than the employment figure would suggest. While the industry is fifth in wage and salary employment, it is second in total income. This is due primarily to the higher wages the coal industry pays its wokers relative to most other employment sectors in the six county area.

Impact of acid rain legislation on six county area

As stated earlier, a least-cost implementation strategy for an 8.1 million ton reduction in SO2 emissions would translate into a 25.6 million ton reduction in Illinois coal production. The six county area being focused on here produces 55 percent of Illinois coal destined for electric utilities. In 1980, this production was 29.2 million tons. Assuming a proportional reduction between the six county area and other coal-producing counties, the study area's reduction would be 14.1 million tons or 48 percent.

In 1980, about 6,000 of Illinois' 16,000 coal industry employees worked in the six county area.[13] If the projected 48 percent reduction is spread evenly across the counties' coal industry, 2,880 jobs in the coal industry would be lost.[14] This would be out of a total loss of 6,560 jobs statewide. A similar reduction in the personal income statistic would result in a loss addition of the 9,360 job loss calculated here, the unemployment rate would rise to 21.4 percent, assuming a constant labor force and no re-employment. Loss of personal income to the area would be on the order of $200 million or between 15 and 20 percent of the area's income.[15]

Unless the coal industry could be revived through new markets or the manufacturing sector be expanded rapidly, the area's recovery from such an event would probably be slow. The area lacks the diversity of economic activities to absorb the significant reduction of the mining industry in a quick or

timely manner. Hence, pressure to provide some social assistance would probably arise. However, this call for support would come at a time when the area's own tax base would be reduced due to lessened economic activity and employment. The State or Federal Government would probably be requested to provide assistance to the area. How much assistance the State or Federal Government could afford to provide is unknown.

This result suggests that a "least cost" strategy for electricity consumers would not be a "least-cost" situation for southern Illinois, unless new markets could be created for Illinois coal. That possibility and other potential mitigating factors are discussed below.

POTENTIAL MITIGATING FACTORS

There are several factors which might mitigate the impact of an acid rain program. These include: (1) developing new markets for Illinois coal, (2) requiring use of FGD where practical, (3) reducing the SO2 reduction requirement, and (4) retraining or relocating coal workers. These options are discussed below.

Developing new markets for Illinois coal

Under the proposed reduction program, Illinois would have 12 years to develop new markets for its coal to replace those lost due to fuel switching. To examine market conditions in 1995 is difficult. However, current assessments suggest such markets would probably be in one of three areas: (1) new power plants, (2) synthetic oil or natural gas processes, and, (3) overseas sales. However, as indicated in Table 11, there is little agreement on these areas' ability to significantly mitigate the production lost from a least-cost reduction strategy.

Because all new powerplants constructed after 1977 are required to effect a percentage reduction in SO2 emissions, Illinois coal is in a competitive situation with low-sulfur coals for use in those new boilers. However, as shown in Table 11, there is little agreement on the potential future demand for electricity. Currently, due primarily to the recession, electricity use for 1982 is expected to be less than for 1981.[16] Even with economic recovery, it is not clear that many planned power plants will be needed in the near future.[17] Given the uncertainty regarding future demand and the high cost of overbuilding, utilities are exploring alternatives to increasing capacity to meet their customers' need for electricity.[18] To the extent these efforts are successful, the need for some future coal-fired power plants will be at least delayed. If the delay extends beyond 1995, the affected power plants will not present as timely an influence on coal production as could be hoped.

TABLE 11.—PROJECTED 1990 ILLINOIS COAL PRODUCTION

Projection	Millions of tons		U.S. electricity growth rate assumption		1990 nuclear capacity (GW)

A second possible market for Illinois coal is as feedstock for future synthetic fuel plants. With the passage of the Energy Security Act, there was great hope that a new synthetic fuels industry would take root in the U.S. and that commercial quantities of synthetic fuels would be produced by 1995.[19] However, with the decline in world oil prices and the Reagan Administration's attitude toward both coal research and development and the Synthetic Fuels Corporation, it seems unlikely that the ambitious goals of the Energy Security Act will be realized or that synthetic fuels will represent a significant market for Illinois coal in the near to mid-term.

A final possible market for Illinois coal is overseas. Currently, Illinois exports very little coal to other countries. The major difficulty in increasing exports is the sulfur content of the coal: the same problem facing Illinois coal under an acid rain reduction program. The Europeans have been reluctant to install FGD units to meet air quantity standards, placing Illinois coal at a disadvantage there.[20] Indeed, some governments have imposed upper limits on the sulfur content of imported coal. Finally, significantly increased coal exports would require a commitment toward increased port capacity, a commitment the current Administration has yet to make.

Requiring use of FGD where practical

In 1977, the Congress required a percentage reduction in new power plant emissions, regardless of the coal being burned. This requirement has helped to reduce the cost advantage low-sulfur coal had over high-sulfur coal under the previous performance standard. To protect the high-sulfur coal industry again, Congress could mandate continued use of local coals and require use of FGD where practical in meeting an acid rain reduction goal. For example, the program could require FGD units on all baseload power plants over 100MW which began operation after 1960 (except under extreme circumstances). Such a requirement would reduce the production impact on Illinois from 25.6 million tons to between 5 to 6 million tons.[21] Such a reduction would represent about 10 percent of Illinois' coal production and would be more manageable than the 40 percent reduction under the "least cost" scenario.

A scrubbing alternative would also create jobs in Illinois' emerging air pollution control industry. Illinois is estimated to be in the top ten States in terms of air pollution control industry employment.[22] An FGD scenario would increase demand for FGD designers and constructors along with operations and maintainance jobs to operate the installed equipment.

An FGD requirement would increase the cost of compliance to electricity consumers, particularly in the first few years of the program. However, as was shown in Table 3, scrubbing of high-sulfur coal (such as Illinois' coal) would not be prohibitively more expensive. However, the cost would increase significantly if utilities had to scrub lower sulfur coals.

If such a requirement could not be enacted on a national level, the State of Illinois could require such action intra-state. Using the same FGD scenario suggested earlier, Illinois would have about five plants in FGD conversion category.[23] These plants consume about 11 million tons of primarily Illinois coal per year. To the extent the utilities would have fuel switched these plants in lieu of the proposed FGD requirement, this production would be "saved". However, as with a national restriction, such a local requirement would entail higher costs to electricity consumers.

Reducing the SO2 reduction requirement

The impact of a reduction program on Illinois coal production could be reduced by reducing the SO2 reduction requirement. Such a move would have precedent as the committee bill has already cut the proposed 10 million ton reduction to eight million tons. However, for reasons discussed earlier, the level does not decline in proportion to the SO2 requirement. As shown in Table 12, assuming a 'least cost' scenario, the portion of coal production reduction would be less than the 25.6 million tons estimated for the 8.1 million ton scenario, but not dramatically. This situation would make justifying a reduced SO2 requirement more difficult.

Retraining or relocating coal workers

The final alternative discussed here is to "manage" the economic distruption by retraining or relocating coal workers. The extent of retraining needed would vary significantly from worker to worker. For example, operators of heavy equipment at strip mines would presumably need little retraining to work similar jobs in construction, whereas underground coal miners may need considerable training to obtain a job. Also,

retraining does not mean that a job would be available. In the case of the six county area, the loss of a substantial part of their basic industry, coal mining, might deprive the area of the vitality necessary to attract new industry to the area. Finally, retraining would be expensive to either the State or Federal Government. Given current financial difficulties on both the State and Federal levels, it is not clear from where such assistance would come.

Relocation of workers would be an option if an appropriate job could be located. However, jobs created by an acid rain bill would probably be located in West Virginia, Kentucky or the West—the low-sulfur coal production areas. In the eastern States of West Virginia and Kentucky, each State would have its own displaced high-sulfur coal workers to care for. Also, displaced coal workers in other affected States such as Pennsylvania and Ohio are geographically closer to the eastern low sulfur coal areas than Illinois and would therefore have an advantage in obtaining jobs there.

TABLE 12.—COAL PRODUCTION IMPACTS OF VARIOUS REDUCTION SCENARIOS

[In millions of tons]

Region	Reduction scenario	
	5.1	2.7
Midwest	[1](24)	(18)
Illinois	(17)	(14)

[1] ( ) equals reduction in production.
Source: ICF, Inc.

Relocation to western coal areas would have two problems. First, the distance and change in lifestyle would discourage some Illinois coal workers from seeking jobs there. Second, because of the geology and strip mining technique used in the West, worker productivity is five to six times that of Illinois workers.[24] Hence, fewer jobs will be created and virtually none for underground miners. Also, because of the high-paying nature of the mining jobs created, competition from local residents could be expected.

CONCLUSION

Assuming economic forces were allowed to work unhindered, enactment of an 8 million ton SO2 reduction program could have a dramatic effect on the Illinois coal industry. Employing a least-cost scenario for electricity consumers would entail a 25.6 million ton loss in production, approximately 40 percent of Illinois' 1980 production. For the southern Illinois counties examined here, such a loss would almost double that area's 1980 unemployment rate from 11 to 21 percent and involve loss of about $200 million in personal income (about 17 percent of the counties' total).

Of the mitigating factors investigated, only two provide any potentially significant relief for Illinois' industry: (1) finding new markets for Illinois coal, and (2) requiring FGD units on power plants where practical. Current uncertainty about future electricity demand, synthetic fuels, and export potential makes evaluation of the first alternative difficult. However, current circumstances suggest that new markets sufficient to overcome the deficit caused by the proposed program will not be forthcoming, at least through 1995.

Requiring FGD units on power plants where practical would be effective in reducing the production loss in Illinois from 25.6 to between 5 and 6 million tons, and creating jobs in the air pollution control industry. However, such a provision would require a consensus that the high-sulfur coal industry is sufficiently important for consuming States to pay higher electricity bills to maintain it. Such a debate could be similar to that over the 1977 amendments to the Clean Air Act regarding percentage reduction.

In sum, a "least cost" scenario would not be least cost to the coal industry in Illinois. Indeed, for coal-producing counties in southern Illinois, the cost could be very high. The Congress may wish to consider this tradeoff between electricity rates and coal employment in determining any implementation plan for reducing SO2 and NOx emissions.

[2] See: Parker, Larry B. "Summary and Analysis of Technical Hearings on Costs of Acid Rain Bills". Prepared for the Senate Committee on Environment and Public Works, July 26, 1982. CRS unnumbered report.

[3] The major studies on the effect of acid rain bills on the coal industry have been done by Peabody Coal Company and the United Mine Workers Union. These studies project massive unemployment in most eastern coal producing States. However, there are two major problems with the studies which limit their usefulness. First, the studies are based on a 10 million ton requirement which is achieved entirely by fuel switching. Besides being a technical impossibility due to factors such as boiler design, the "least cost" studies show that in some cases, due to contractual or site specific circumstances, fuel switching is not an economical alternative to FGD. Hence, the unemployment projections are overstated. Second, the studies do not attempt to address the issue of job creation in low sulfur coal areas as a possible mitigating factor.

[4] Indeed, there have been attempts by some opponents of acid rain legislation to combine both the high unemployment figures of the coal companies' projections and the high electricity rate increases of the utility companies' projections into one "disaster" scenario. As indicated above, such an extreme scenario would not happen. If the utilities use FGD on a plant, they would not also fuel switch that plant to low-sulfur coal. If the utilities switch to low-sulfur coal, they would not also install FGD.

[6] "1981 Keystone Coal Industry Manual." New York: Mining Informational Services, Keystone Coal Industry Manual, 1981.

[7] As noted by Thompson, because of the organic sulfur content of Illinois coal, Illinois coal must be scrubbed after burning to meet current emissions standards, both in the U.S. and abroad. See footnote 20.

[9] Boyce, David E., et al. "Implication of Expanding Coal Production for Illinois' Transportation Systems." University of Illinois at Urbana-Champaign: Department of Civil Engineering, March 1981.

[10] See Parker, Larry B. op. cit. for a discussion of the different "least cost" analyses done on the acid rain issue.

[11] ICF, Inc. Summary of Acid Rain Analyses Undertaken by ICF for the Edison Electric Institute, National Wildlife Federation and Environmental Protection Agency. "Prepared by ICF Inc." for the Edison Electric Institute, May 1982.

[12] 1980 was chosen as the base year for projecting coal production because it is the most recent year of "normal" Illinois production for which data are available. (1981 was a strike year.) The reduction presented is in the range presented by other studies using a least cost methodology but assuming a higher reduction requirement. For example, ICF's analysis for the Environmental Protection Agency put the Illinois production loss at 24 million tons while the ICF analysis for the National Wildlife Federation put the loss at 27 million tons at the beginning of an acid rain reduction program. Since SO_2 reduction scenarios between eight and twelve million tons have little effect on midwest production losses, the figure of 25.6 million tons seems a reasonable estimate of the production impact on Illinois of an eight million ton reduction.

[13] Based on data from the Illinois Department of Mines and Minerals on people working in Illinois mines as reported by mine operators. This number includes all people working and therefore is greater than the wage and salary employment presented in table 8.

[14] This methodology was chosen over a "miner productivity" factor because the difference between the Illinois coal industry as a whole and the coal industry in the six county area. While the State's coal production is 56 percent deep-mined, the six county's coal production is about 75 percent strip-mined. Hence, any employment number based on "average productivity" would be artificially high. The actual number of jobs lost could be higher or lower than projected here depending on specific circumstances and on whether surface or deep mines would be disproportionately affected by the production decline. Such a determination would require a site specific study which is beyond the scope of this study.

[15] Assuming indirect job salary of about $15,000 a year in 1980. This compares with a direct job salary of over $20,000 a year.

RACIAL AND RELIGIOUS BIGOTRY

● Mr. INOUYE. Mr. President, the recent anniversary of Abraham Lincoln's birth has brought to mind a matter which has been troubling me for some time—a matter which I am certain has not gone unnoticed by my colleagues in the Senate and other fellow Americans. This is the increased incidence of racially and religiously inspired violence in the United States. Ladies and gentlemen, this problem is not going away, and it will require constant vigilance on all of our parts to insure that gross errors of the past are not repeated.

According to a report issued last month by the Commission on Civil Rights, violence and harassment still exist, and such incidents are "a serious threat to the maintenance of a peaceful, democratic, and pluralistic society."

The fundamental cause of racially and religiously inspired violence, ac-

cording to the Commission, is the "continuing presence and tenacious survival of deep-seated racism and anti-Semitism" in the United States. As the report notes, however, this is only part of the problem. Add the suffering and misery caused by high unemployment, the human tendency to find scapegoats, and the perception that enforcement of civil rights laws is diminishing. What results is a potentially vicious breeding ground for violence.

It is unfortunate, yet all too human, that in times of stress and misfortune many cannot resist the impulse to lay the burden of blame on the "other guy"—be it the black man on the street, the Japanese autoworker, or the newly arrived Southeast Asian immigrant. Acting on such impulses only adds new poison to the bitter fruit spawned by what many have aptly characterized as the "politics of frustration."

Striking out at those who are less fortunate, who are of a different race, or who are perceived to be benefiting unreasonably from "handouts" is not the answer. It is also no secret that bigotry-bred violence is difficult to pinpoint, and even more difficult to quantify. But as the report mentions, many cities and States are making the effort, with quite positive results. For example, attempts are being made to monitor religious and racial violence and the groups that foster such incidents. Maryland has passed a unique law requiring police to keep statistics on crimes of religious or racial prejudice. Several private groups have been keeping a watchful eye on the Ku Klux Klan, and often file lawsuits against KKK activity.

Many schools have launched programs specifically designed to teach children about the effects of anti-Semitism and racism. The National Education Association in conjunction with other groups distributes a teacher's list on the KKK, and in Detroit the study of racial and religious bigotry is being built into the public school curriculum. Over half the battle is fostering an awareness of the problem, and it behooves us, as leaders of this Nation, to do all that we can to stop this subtle, yet very real, problem from escalating any further.●

OPERATION HOMECOMING

● Mr. TSONGAS. Mr. President, February 12 marked the 10th anniversary of the beginning of "Operation Homecoming." After years of war, turmoil, and captivity, 40 U.S. prisoners of war embarked on their long-awaited journey home. In the 6-week period that followed, a total of 587 POW's made that journey.

These very special men withstood torture, humiliation, and untold abuse in the prison camps of North Vietnam. Whatever our feelings were about the Vietnam war, this Nation shared in the joy of those who returned and we mourned those who never made it. We paused 10 years ago to pay homage to their bravery and valor and it is fitting that we pause once more.

The February issue of the American Legion magazine featured an article by Philip C. Clarke, entitled "Return From Hell—the POW's Remember." I ask that this article be printed in the RECORD.

The article follows:

RETURN FROM HELL—THE POW'S REMEMBER

Former POW Richard Keirn remembers well that day of freedom 10 years ago. "It was like a fairy tale, a dream," says the retired Air Force colonel. "After more then seven and one-half years in prison in North Vietnam, I was coming home along with all the others. Waiting at the Hanoi airport was the big, beautiful American plane. A U.S. airman was supposed to escort one of my fellow POWs, Kyle Berg, and me to the aircraft, but I don't think the airman's feet ever touched the ground till he got there because we were carrying him by both arms. 'Aw, come on fellas,' he said. 'I'm supposed to be escorting you.'

"And that airplane . . . It was the cleanest thing I had seen in nearly eight years. We got aboard, all 40 of us, very quietly. They started the engines and taxied out for takeoff and every one of us remained very quiet. The plane started down the runway and the pilot poured on the coal. As pilots ourselves, we knew when the gear left the ground. At that precise moment, as skinny and beat up as we were, we let out a mighty whoop and damned near tore that airplane apart. The shrink, who was over in the corner making notes, just ripped them up and tossed the pieces in the air. It was the wildest, most wonderful celebration I've ever known!"

And so it was, not only for the 587 POWs who had resisted and survived throughout the years of bestial torture and privation in North Vietnam, but also for their families, other loved ones and the entire country. Over a period of six weeks, from February 12 to March 29, 1973, a grateful America welcomed home with cheers, tears and overwhelming pride and affection some of the bravest and most dedicated men ever to wear the nation's uniform.

Frank A. Sieverts, then-special assistant to the deputy secretary of state for prisoner of war/missing in action matters, was at Hanoi's Gia Lam airport when the first group of POWs arrived for their flight to freedom. "The guards ordered the men off the bus. Suddenly, the senior American officer of the group took command away from the guards and gave the orders for the men to march in formation to the release point. The guards tried to intervene but fell back. It was clear then that, despite the grim experience of captivity, our men had endured and prevailed."

On this 10th anniversary of "Operation Homecoming," the American Legion Magazine sought out and interviewed more than a score of representative ex-POWs from across the country, including three who received the Medal of Honor, the nation's highest award. Their responses reflect a deep and lasting bond, forged amid the hatred and savagery of wartime Hanoi. Few humans have suffered such extreme physical and mental abuse, yet have emerged with spirits unbroken. There is even now no precise count of the Americans who died on the blood-spattered floors of the Communist torture chambers. But of the more than 1,800 Americans shot down over North Vietnam, fewer than one-third returned home. And throughout the war theater, 114 American POWs are known to have died in captivity.

A majority of those who survived the gulags of the North give full credit to their military training and discipline. Despite solitary confinement and the risk of severe punishment for anyone caught communicating, the POWs somehow managed to establish and maintain a clandestine keep-in-touch network, tapping out Morse code messages through the prison walls. Amazingly, they also set up a secret chain of command headed by the senior ranking prisoner and known as the "4th Allied POW Wing." One of its chief organizers, and first C.O., was Col. John P. Flynn, a courageous and intrepid flier who had been downed over North Vietnam in October 1967, and who was promoted to brigadier general while still in prison.

The former prisoners also attribute their survival to faith—faith in God, their country, their fellow Americans and in themselves. "The ability to hang on to that faith helped see us through some of the toughest times," says Air Force Col. Wayne Waddell, current president of "NAM-POW's, Inc," the close knit fraternal group that still links some 430 onetime residents of the infamous hellhole nicknamed, with macabre humor, the "Hanoi Hilton," and other North Vietnamese prison camps. "It was a matter of knowing that there were a couple of hundred million people back home who were not going to forget about you. It sure helped every morning to wake up thinking, 'one of these days . . .'"

To a man, the former POWs believe that Vietnam was "a noble cause," however badly misunderstood and often misrepresented at the time in the news media and elsewhere. There remain, inevitably, remnants of regret and even some bitterness that the nation failed to unite behind its fighting men so that the war could have been won, quickly and at less cost in lives and treasure.

"I'm convinced we were in Vietnam for the right reasons—and just as convinced we fought the war in the wrong way," says retired Col. Leo K. Thorsness, USAF, a Medal of Honor recipient who spent nearly six years in captivity. "As it turned out, it was the politicians who decided we should go to war, which was the correct thing, but then they continued trying to run the war, which was the wrong thing. They never gave us an opportunity to win."

Although there are still some skeptics, most of the ex-POWs sense that the country's attitude toward Vietnam and the military in general is changing for the better. Their advice: continue to strengthen America's will and determination to defend peace and freedom, whatever the price.

That the POWs paid the price, none can deny, And though most of the scars have healed, the memories remain.

Retired Vice Adm. James Stockdale, whose heroic resistance to the Communists is now legendary, says the most critical time in his capitivity came in 1969. "I have been senior officer at two prison camps that had been 'purged.' In each instance, our underground communications network had been uncovered and there had been much interrogation and torture of those involved to try to pry forth more names and details. Some

of our people had been badly hurt and at least one of the Americans had died under torture.

"After these two disastrous episodes, I was placed in total isolation and heavily guarded at all times. By then, however, I and several other POWs were in the process of setting up a third communications link by means of a note-drop system. To my dismay, I learned that the guards had found one of the notes on my person.

"I became deeply despondent, not because of the torture I knew would be inflicted on me, but because once more the cycle of terror was to be repeated. I felt I had to stop it. So the night before the interrogations, I broke a window and lacerated my wrist. I was discovered in a pool of blood and revived and, so help me, the North Vietnamese dropped the investigation and none of the other POWs were compromised or tortured."

Stockdale, who received the Medal of Honor for his acts of valor, recalls a more heartening experience, when human compassion contrived to pierce the prison's inhumane barriers of silence and despair. "For two years," says Stockdale, "11 of us were isolated in a section of the prison we called Alcatraz. We were the so-called 'bad cases,' those who had been identified as POW ringleaders or who had tried to escape. All of us were in leg irons 15 hours a day and confined in solitary cells 10 by 4 feet. But because our cells were crammed together, we could communicate.

"After dumping our slop buckets every morning, we would wash them out with a bamboo broom, using the wooden handle to rap out a few words of code. As a kind of ritual, we decided to honor one another on the anniversary of each of our shootdowns. Mine was September 9, and as I listened intently on the third anniversary of my shootdown, I heard my fellow prisoners tap out this message: 'Here's to CAG—my tag as a former carrier wing commander—for three great years. We love you. We are with you to the end.' I don't think I've ever received a medal, an award or citation that meant as much to me as did that message from my fellow POWs."

Retired Navy Capt. John S. McCain, III, remembers the agonizing decision he made in 1968 when the North Vietnamese offered him an opportunity to return home along with the six other POWs who were released to anti-war activists from the United States. "Even though I was in very poor physical condition at the time, thank God I had the strength to reject the offer and remain with the others." McCain, then a lieutenant commander, had been badly injured after parachuting from his crippled plane over the North and had been severely tortured. As the son of the then-Commander in Chief, Pacific, the late Adm. John S. McCain, Jr., the young flier was under intense pressure by the Communists to denounce the U.S. war effort.

Retired Air Force Col. Larry Guarino doesn't conceal his disgust for leading war critics who traveled to Hanoi and he believes, "weakened our country's resolve and caused us all a great deal of harm." Shot down June 14, 1965, Guarino, then a major, spent seven years and eight months in captivity, or, as he recalls, 2,801 days and 400 "beer calls." During that seemingly endless nightmare he underwent, by his own accounting, 390 days of hard torture. It's a record he'd just as soon forget, but one that marks him forever as a towering hero among his peers.

How did he manage to endure his long ordeal?

"You stand up to them whenever you can," says Guarino. "But then, if you want to save your life and your sanity, there are times when it's best to hunker down and sweat it out. It's a survival program: You do as little as they demand of you and still come out alive. And I can say that most of our guys tried their best to live up to the Code of Conduct."

They were difficult rules to observe, given the inhumane nature of the Communist cadres that rode herd at the Hanoi Hilton. But somehow, almost miraculously, the Americans managed for the most part to retain a sense of organization and self-discipline. And at times, they outwitted their captors. In a classic example, former Navy pilot Jeremiah Denton, now a senator from Alabama who spent seven years and seven months as a POW after his Navy fighter was shot down, blinked his eyes during a Japanese television interview from Hanoi to spell out in Morse code the word "t-o-r-t-u-r-e." It confirmed what many Americans had feared was happening behind the confines of Hanoi's prison walls.

Retired Col. John W. Finlay III, USAF, who endured nearly five years of captivity, says he still marvels at the resilience of the POWs. "The Viets never really understood us as well as we understood them," he remembers, "and I didn't understand them at all! They could break one of their own people under pressure, but break an American and he'd bounce right back the next day. The Communists just couldn't figure it out.

"On occasions," says Finlay, "the questioners would ask, 'Why don't you agree with what Jane Fonda says about the war?' And I would reply that as an American she was free to say what she pleased, and that I had just as much right to disagree. The Communists couldn't understand this either."

Except for the Communist propaganda broadcasts, which none of the Americans believed, the POWs were kept mostly in the dark about happenings on the outside. A newly arrived POW often could fill in some of the blank spaces, but normal conversations were impossible.

In late 1970, however, the prison regimen eased slightly and the Americans sensed something important had taken place. Later, it was learned that a U.S. commando team had raided the Son Tay prison camp west of Hanoi. Unfortunately, the camp had been evacuated earlier and the would-be rescuers had to return empty-handed. But the audacious action surprised and frightened the North Vietnamese. They hurriedly moved American POWs from other outlying prisons and trucked them to the more heavily defended Hanoi Hilton. And, for the first time, the POWs were placed in large, open bay rooms holding from 20 to 50 men each. Although senior officers were still held in isolation, there was now an opportunity for most of the Americans to talk with one another.

Taking advantage of the ease-up, the POWs in early February 1971 conducted their first do-it-yourself church service inside the prison compound, despite the ranting and raving of the camp commandant, a sadistic torturer nicknamed "Bug." That evening, the singing of hymns was followed by a spontaneous outburst of patriotic songs, including "The Star-Spangled Banner." Nearly every American joined in and the "Bug" was apoplectic. Troop reinforcements were called in, apparently in expectation of a prison riot or breakout. But for the POWs, it was a turning point. Morale soared, and so did hopes of freedom.

But setbacks were yet to come. On an April night in 1972, the prison "goon squad" administered a terrible beating to Air Force Lieut. Mike Christian, apparently after a small handmade American flag was discovered inside his shirt. The flag, pieced together from scraps by the lieutenant and another POW, Air Force Capt. Jim Hivner, had been secretly displayed while the Americans quietly recited the "Pledge of Allegiance." It was confiscated by the guards, but soon replaced with another improvised "Old Glory," and the pledges continued.

The so-called "Christmas bombing," ordered by President Richard M. Nixon in December 1972 to hammer a recalcitrant Hanoi back to the peace conference table, marked the beginning of the end of the long ordeal. The POWs erupted in a surge of unrestrained joy and relief, greeting each wave of B-52s and F-101s with resounding cheers. The Communist captors were struck by fear.

Retired Air Force Col. Richard D. Vogel was in a group of 180 POWs, that had been moved to a camp near the Chinese border. "We were trucked back to the Hanoi Hilton right after the Christmas bombing," he says, "and we could almost taste freedom."

As Leo Thorsness remembers: "Happiness was those B-52s that kept coming and coming, night and day. We knew then it was nearly over. Even if a bomb or two had hit the prison, we couldn't have cared less. We had been there so long. And on the faces of the guards, we could tell that Uncle Sam had finally got their attention. The one thing they understood was force."

The ex-POWs remember homecoming as a star spangled blur of joy, excitement and pride. Jim Stockdale says that after the years of death-like silence in isolation, the outside world seemed "awfully noisy, like being inside a bass drum. It was, to me, a yakety-yak world of noise, but a happy noise!"

Thorsness says, "One returning American was taken off a homeward bound plane in Hawaii because he was running a fever. It was I. They kept me there until they got my temperature down, and then I came home in an airliner all to myself, with the best-looking nurses in the world. When we sighted the lights of California, I got an OK to come up front and as the crew played some background music on tape, I reported our position and told the tower we had presidential clearance all the way to St. Louis. Not bad for a farm boy from the Middle West!"

Thorsness, now living in Santa Monica, Calif., and active in politics, is among those who believe the nation's sacrifices in Vietnam were not in vain. "Most Americans may still feel it was a mistake to get involved . . . but what's important, I believe, is that for 10 years we tied the Communists down in Indochina and gave other countries in the region—Thailand, Malaysia, Singapore, Indonesia, the Philippines—a chance to strengthen themselves. Their people, some 250 million strong, are still free and doing pretty well, which may not have been the case had we not gone to Vietnam. To my way of thinking, this is a living tribute to the Americans who died over there."

As for the future, Thorsness believes that "so long as we're the leader of the free world, like it or not, there are obligations. This doesn't mean we should send our men to fight for every nation trying to remain

free. But if we shrink back from our responsibilities, we could some day lose our own freedom."

Jim Stockdale, now with the Hoover Institution, a defense-oriented "think tank" at Stanford University, takes a different view of the Vietnam experience. "I see it as a national tragedy," says Stockdale. "We squandered so much public goodwill and credibility by trying to conduct a very worthwhile effort 'on the cheap,' so to speak. The nation's leaders never did explain to the people what we were fighting for, nor did they do the things that would have signified a national commitment, such as formally declaring war and mobilizing the reserves.

"Our leaders early on in the war were so afraid of public disapproval that they thrust the country headlong into a disastrous situation. In years to come, I believe it will be perceived as the nadir of the American political experience.

"But don't sell America short," says the retired admiral. "We are people of great resilience. And when inspired by comradeship, as in the case of our POWs, we are capable of superhuman feats. Our biggest enemies today are timidity, fear and selfishness in facing up to trying circumstances. This should not be. Our people can cope with wars, floods and other disasters much better than Americans themselves realize . . ."

Ex-POW John Finlay, now with the Planning Research Corporation in Florida, believes the United States "had every right in the world" to defend Vietnam. He wishes that those Americans who "bum rap" their country could have "an opportunity to live in, say, Vietnam or any Communist country for awhile and see how the other side lives. They'd certainly end up with a better appreciation of our way of life!"

Lt. Col. Melvin Pollack, who serves with the Forward Air Control program and systems command at Patrick Air Force Base, Fla., is one of the relatively few ex-POWs still on active military duty.

On returning from Vietnam, Pollack decided to catch up on the lost years (he spent five years and eight months as a POW). "While attending the University of Southern California in the fall of 1974, I read every issue of Newsweek going back six years. What amazed me was that with all the trouble in this country and what seemed almost like anarchy, we still held together. So, despite all the dissent, I realized that this country was great enough to go through what it went through and yet survive intact. That, I feel, is the beauty of our country."

Pollack remembers running into antiwar critics, including many old friends, after returning from Vietnam. "Some called me a liar for trying to answer their questions about how it really was. And they had never been to 'Nam! It was my first taste of the militant mindset of the antiwar people.

"Now," he adds, "I see the mood changing. ROTC on campus has picked up. It's in vogue to be in the military, and short haircuts are coming back—even in California. The pendulum is swinging again."

As for the public's perception of the military, Pollack says: "More than just respect, it's important that people appreciate that we're ready to defend the country if the time ever comes. And what's important for every citizen is to ask of himself: 'Am I or am I not willing to support my country in adversity?' That's the bottom line."

Larry Guarino, whose unyielding resistance to his Communist captors was an inspiration to other POWs, is now retired and living in Satellite Beach, Fla. On returning home from his long ordeal, Guarino was disillusioned by what he felt was the don't-give-a-damn attitude of the average American. "I just couldn't see how anyone could sit back after it was all over and not care—care about those poor people who got themselves killed, or fed themselves to the sharks or to the pirates of the South China Sea in their attempt to get away from Communism. All those poor people . . . they must be in the hundreds of thousands, even millions! How could anyone say we did not try to fight for a 'noble cause?' No matter how bad it looked, the cause was just!"

Retired Air Force Capt. Howard Rutledge of Norman, Okla., now active in politics and veterans affairs, says his experiences as a POW in Hanoi convinced him that Gen. Douglas MacArthur was absolutely right when he admonished that in war "there is no substitute for victory." Observes Rutledge: "What came out of the Vietnam War is that our people probably never again will accept the idea of committing our armed forces to battle without an equal commitment to win. I believe that Americans will say, 'yes, there are some things worth fighting for and our way of life is one of them.' But they'll also insist that once committed, we must go to win or not go at all . . ."

Dick Vogel, who retired from the Air Force in 1976, now works for Collins Avionics "helping make some of the stuff I used to fly with." The former POW believes there are some situations where the United States should get involved. "I don't think we need to be caretakers of the entire free world. But where our national interests are at stake, as I believe they were in Vietnam, we should take effective action. And if that happens, we need to explain why we're doing what we're doing so the public will back our military . . ."

Richard Keirn—"Pop" to his many friends—was knocked down in July 1965 by what he believes was the first Soviet-made SAM fired by the North Vietnamese. After military service going back to World War II—during which he also was shot down and spent 11 months as a POW in Germany—the colonel is now retired in Indian Harbour, Fla. Like other POWs, Keirn believes fervently in a strong America. "It's the best country on earth and we must protect it. I know. I've lived under Communism for nearly eight years and I experienced just how insidious it is. Just to get back to this country where I could say 'nuts to you,' or anything else I wanted to say without being tortured for it was the greatest feeling. It's been said a man doesn't appreciate freedom until he loses it. To which I would add, if a man's not willing to fight for the freedom of his country and his kids, he's not worth a damn!"

Ex-POW John McCain, who hung up his uniform to serve in Congress from Arizona, sees America emerging from its Vietnam trauma as, overall, "a far better nation. Maybe some of the activists of the '60s and '70s still haven't 'found themselves.' But certainly the young people I have met in recent years are dedicated Americans, truly super people."

On the basis of his Vietnam experiences, McCain, who comes from a long line of distinguished naval officers, offers this advice: "The right to disagree, to demonstrate and show one's ideological preferences is a precious heritage that we must guard, even if at times it seems to erode our national will, as I believe it did during the Vietnam War. Nevertheless, it is a right we should cherish, never forgetting that we still are the greatest nation, founded on the noblest principles conceived by the mind of man. It is our duty to preserve it."

What manner of men, we might ask, are these POWs, these indomitable Americans who prevailed for so many hellish years in Hanoi, and then faced the divisiveness of their countrymen back home, and yet remain so steadfast in their patriotism?

In contrast to earlier wars, our POWs in Vietnam were mostly mature men, career officers acquainted with the art of survival and with the Code of Conduct. Since retirement, many have distinguished themselves in business, the professions, academic life and public service. As POW wife Doris Day says, "They are a pretty special group."

That they are, and more.

Explained former POW Howard Rutledge: "I don't know what it was that pulled us so tightly together. There was no specific event. But I believe we were on the leading edge of a change in attitude, or philosophy, of the country as a whole. We came back 10 years ago with ideas that only recently have begun to be accepted, nationwide. I think we were ahead of where people are coming to right now."

Whatever changes develop in our society as a whole, the POWs of the Vietnam War most assuredly brought out the best in our nation and set examples of courage that will inspire Americans for generations to come.●

RECESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 1:45 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Thereupon, at 12:37 p.m., the Senate recessed until 1:45 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mrs. HAWKINS).

The PRESIDING OFFICER. The Chair, in her capacity as the Senator from Florida, suggests the absence of a quorum.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. What is the business before the Senate, Madam President?

The PRESIDING OFFICER. The motion to proceed to the consideration of S. 47.

Mr. BYRD. I thank the Chair.

Madam President, notwithstanding the Pastore rule, I ask unanimous consent that I may speak out of order.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUS DEREGULATION BACKFIRES IN WEST VIRGINIA

Mr. BYRD. Madam President, I hate to say "I told you so," but precisely what I predicted would happen with

the passage of the Bus Regulatory Reform Act of 1982 is beginning to happen in West Virginia.

Shortly after the law became effective on November 20 of last year, Trailways and Greyhound—the two companies that provide 99 percent of the intrastate bus service in West Virginia—filed to abandon or curtail most of the bus routes in my State.

It is cold comfort to me that I was correct in predicting the adverse impact of this law, as I think of the many elderly people and people with modest incomes who will be without means of transportation if these applications for abandonment or curtailment are approved.

There have been 10 public hearings held in my State on the proposed Greyhound abandonments, and 4 hearings held on the proposed Trailways abandonments. Public opposition to the abandonments or curtailments was expressed in a loud and clear fashion at each of these hearings. The West Virginia Public Service Commission obtained a "temporary restraining order" through the Federal district court in the Trailways case, and is seeking injunctive relief from the court to require Trailways to continue two-way service while the proposals are under consideration by the commission.

According to the Commission, the temporary restraining order expired on Sunday, February 20. The Commission expects to learn shortly whether the court will issue a permanent injunction against the abandonments. There are indications that the bus companies may have gone beyond the limits of the law governing service reductions and have cut service in certain areas of West Virginia to one trip per day in only one direction. The Commission is pressing the court to consider that curtailment of service will leave many West Virginians without transportation.

I am assured by the Public Service Commission that the companies intend to appeal any adverse decisions at the State level to the Interstate Commerce Commission here, in Washington. This is precisely the problem that I brought to the attention of the Senate when the bus deregulation bill was being debated on June 30, and when the conference report on the bill came before the Senate on August 20 of last year.

I quote a letter sent to me by the chairman of the West Virginia Public Service Commission, Mr. E. Dandridge McDonald, concerning the bus deregulation bill:

> Consumers in West Virginia who might wish to be heard in cases appeared to the ICC * * * would be, in effect, precluded from effectively protesting since it would be virtually impossible to muster the resources necessary to retain specialized legal talent to represent them before the ICC in Washington.

That quote is a portion of a letter dated May 25, 1982, from Chairman McDONALD. I inserted the test of the entire letter in the RECORD on June 30 last year when the Senate voted on this bill. In retrospect, the concern expressed by Chairman McDONALD to me, and by me to the Senate—that abandonments would be almost impossible to stop—is now unfortunately becoming a reality.

Madam President, it is my hope that the ICC, in considering abandonment or curtailment proposals, will pay heed to the policy statement included in the law directing the Interstate Commerce Commission to consider the needs of small communities. There are few large cities in West Virginia, and even they do not have populations of more than 100,000 persons. The majority of the people in my State live in much smaller towns, and it is these communities that will suffer immediately from curtailments. And I fear that the abandonments will not stop at the small communities, but will affect practically every town in my State.

I feel so strongly about this subject that I wrote the President after the Senate had passed the bill and urged him to veto the measure. Unfortunately, he did not do so. When the Senate considered the conference report on the bill in August, I inserted an article from the Wall Street Journal into the RECORD. The article described the effects of a Florida State bus deregulation statute on small communities in that State. Small communities were suffering under the Florida law.

Despite all of these efforts, the bus deregulation legislation was passed overwhelmingly in the Senate by a vote of 85 to 10. The Senate adopted the conference report by a vote of 84 to 8. Yet these massive majorities do not alter the fact that this law works to the detriment of my State. I would presume that other States are going to likewise feel the pinch if they are not already feeling it.

Through smooth and persuasive arguments, the Congress was convinced that the public interest would best be served by deregulation of the bus industry. I was not persuaded, and I was 1 of the 10 Senators who voted against passage of the bill. I was also one of the eight lonely votes against the conference report. I stated that I was voting against the measure because of my fear that bus transportation service to communities in West Virginia would be reduced or eliminated. My worst fears are in the process of being realized.

To top it off, the communities that Trailways proposes to abandon constitute one of the most economically depressed regions in the United States. McDowell County, W. Va., where the town of Welch is located, had an astronomical 36 percent unemployment rate in December. People in the area are desperate for work. Many move about by bus, going from town to town looking for work. And now the bus may not run anymore.

Madam President, I ask unanimous consent that an article from the February 16 edition of the Huntington Herald-Dispatch, entitled, "West Virginia Unemployment Rate Highest Ever," be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BYRD. This situation reminds me of the trials of Job. How much pain and misery can be inflicted on these people? The elderly, who often cannot drive themselves, and people of modest means, who simply cannot afford an automobile, are being threatened with total isolation.

For these reasons, I have contacted the Chairman of the Interstate Commerce Commission, Reese H. Taylor, Jr., to make him aware of the serious effects that abandonment or curtailment of bus service would have on the people of West Virginia. I urged him to bring to the attention of the Commission the plight of small communities in my State, whose citizens could be effectively stranded if bus service is diminished. I also urged him to pay heed to the policy statement included in the Bus Regulatory Reform Act, which states that it is our national transportation policy to "* * * provide and maintain service to small communities and small shippers and intrastate bus services."

I hope that the ICC and the bus companies will examine the likely effects of proposed abandonments with the greatest care, and act to prevent further damage to the transportation system in West Virginia.

EXHIBIT 1

[From the Huntington Herald-Dispatch, Feb. 16, 1983]

WEST VIRGINIA UNEMPLOYMENT RATE "HIGHEST EVER"

CHARLESTON.—West Virginia's unemployment rate shot to 17.8 percent in December, the nation's highest figure during the recession, the federal government reported yesterday.

"West Virginia broke through the stratosphere this month," said Mike Cimini, director of the United States Bureau of Labor's state and local unemployment statistics project. "It would appear, just from eyeballing it, that this is the highest rate we've ever had."

The national unemployment average for December was 10.5 percent, the Bureau of Labor Statistics said.

In November, West Virginia and Michigan tied for the nation's worst unemployment rate—16.4 percent—but Michigan's rate dropped to 15.9 percent in December. Cimini noted that Hawaii had the lowest unemployment, at 6.3 percent.

Coal miners make up most of the unemployed, especially in the southern part of the state where many mines are idled by low

demand. The southern county of McDowell has 36 percent unemployment.

The Bureau of Labor statistics estimated that 138,000 West Virginians were out of work during December, nearly doubling the jobless rate recorded in December 1981, when 77,600 were without jobs.

It also noted that unemployment had worsened noticeably in all of West Virginia's metropolitan areas.

According to its figures, 14,500 people, or 11.9 percent of the work force, in the greater Charleston area were jobless during December. In the Parkersburg-Marietta area, 11,400, or 15.5 percent of the work force, were unemployed, while in the Wheeling area 14,000 people were jobless in December for a 17.8 percent unemployment rate.

The House of Delegates yesterday approved a resolution calling for creation of a special committee to study the unemployment problem.

"The alternative is to do nothing. To do nothing is unacceptable," said House Speaker Clyde See of Hardy County.

Also in the West Virginia House yesterday, a bill was introduced to raise $30 million by taxing liquor and using the money for public works projects and job training programs in counties with unemployment rates of 7 percent or more.

Applicable only to establishments holding private liquor club or beer licenses, the bill would put a tax of 10 cents an ounce on liquor and five cents on a 16-ounce container of beer or soft drinks. Soft drink sales would not be taxed in establishments holding neither private club nor beer licenses.

Mr. BAKER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—S. 47

Mr. BAKER. An hour late perhaps but nonetheless welcome, I am pleased to announce, Mr. President, that an agreement appears to have been reached on this subject, and I would like to state it now. Before I do so, may I say that the staff for the minority leader and, indeed, the minority leader himself, have been made aware of the exact contents of the request I am about to put, which has been reduced to writing. He has indicated to me that it is agreeable to him and that he does not have a requirement to be on the floor at the time the request is put.

Mr. President, I ask unanimous consent that the bill, S. 47, be made the pending business; provided that no cloture motion in respect to that bill will be in order prior to the hour of 3:15 p.m. today; and provided that the committee substitute proposed by the Committee on Commerce, Science, and Transportation, as well as the 17 amendments to be offered by Senator THURMOND on behalf of the Committee on the Judiciary and one amendment to be offered by Senator LONG be considered germane under the provisions of rule XXII, and that the vote on the cloture motion occur without the requirement for a mandatory quorum at 4 p.m. on March 1; provided that Senator STEVENS will be recognized to offer an amendment to the Judiciary Committee amendments pertaining to past filing and enforcement; and provided further, Mr. President, that the Senate, when it completes its business today, stand in recess until Monday, February 28, at 10 a.m.; that on Monday, after the Senate completes its business, it stand in recess until Tuesday, March 1, at 11:30 a.m.; that at 12 noon on Tuesday, March 1, the Senate stand in recess until 2 p.m., and that at 2 p.m., until the vote on cloture occurs at 4 p.m., the time be equally divided and controlled by the majority and minority leaders or their designees.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to object, it is my understanding—and I address this inquiry more to the manager of the bill, Senator GORTON—that the 17 committee amendments that are referred to are otherwise known as the Judiciary Committee amendments?

Mr. GORTON. The Senator is correct.

Mr. METZENBAUM. Is the Senator from Ohio correct as well that there is an understanding that the Judiciary Committee amendments are not going to be offered today?

Mr. GORTON. The Judiciary Committee amendments will not be offered this afternoon because of the absence of the chairman of the committee.

Mr. METZENBAUM. I have no objection. I thank the Senator.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. Mr. President, reserving the right to object, just so we are clear, the Senator is aware that there are 17 amendments? There is one that is in disagreement, which is the one that I intend to offer my amendment to; there are 16 amendments that are in semi-agreement and one is in disagreement?

Mr. METZENBAUM. I understand full well, and I think that is contemplated by the unanimous-consent agreement, that the Senator from Alaska does have an amendment to one of the Judiciary Committee amendments.

The PRESIDING OFFICER. Is there objection to the majority leader's request? Without objection——

Mr. METZENBAUM. Reserving the right further to object, and I still do not intend to object, am I clear that when the Stevens amendment is offered, there is nothing about this unanimous-consent request that would deny any Member of the Senate any right to move to amend, to lay on the table, or to take any such other action to which that Senator would normally be entitled in connection with the handling of an amendment?

Mr. STEVENS. Mr. President, may I respond and make sure we are not getting confused. That is not a parliamentary inquiry, as I understand it.

It is my understanding that this agreement does not bar motions to table or other amendments and that there are other amendments that are contemplated to be offered under this agreement. This does not preclude other amendments, nor does it preclude other motions.

The PRESIDING OFFICER. The Senator is correct.

Is there objection to the majority leader's request? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Chair. I thank the distinguished Senator from Ohio for his cooperation and consideration. I thank the Senator from Alaska for his help and assistance. I thank the Senator from Washington for his help and assistance as well. The Senator from South Carolina, the President pro tempore, has been most helpful in trying to work this out, as has the chairman of the Commerce Committee, the Senator from Oregon (Mr. PACKWOOD).

I neglected to say earlier that I talked on the telephone with the chairman of the Commerce Committee and indicated to him that I wished to make this request. He cleared it as well and indicated that it was not necessary for him to be on the floor at the time, or at least that was my understanding.

Mr. President, I think we are on the track now. I believe the Senator from Ohio may wish to offer an amendment this afternoon.

ORDER TO TEMPORARILY LAY ASIDE METZENBAUM AMENDMENT

May I ask the Senator from Ohio if he is agreeable to a further unanimous-consent request respecting that amendment; that is, if an amendment is offered by the Senator from Ohio today and it is not disposed of today, that on Monday next, it might be temporarily laid aside so we can proceed to the consideration of the several Judiciary Committee amendments?

Mr. METZENBAUM. I have no objection to that.

Mr. BAKER. I make that request, Mr. President.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

CLOTURE MOTION—SHIPPING ACT OF 1983

Mr. BAKER. Mr. President, in keeping with the order previously entered, it is in order, I believe—and under the rules of the Senate—to file a motion of cloture on this measure. I now send to the desk a cloture motion under rule XXII.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on S. 47, a bill to improve the international ocean commerce transportation system of the United States.

Howard Baker, Strom Thurmond, Nancy Landon Kassebaum, Slade Gorton, Charles H. Percy, Gordon Humphrey, Jake Garn, Ted Stevens, Dan Quayle, Charles McC. Mathias, Frank H. Murkowski, Thad Cochran, Bob Packwood, Roger W. Jepsen, Paul Trible, Mark Andrews, John Danforth, Malcolm Wallop, Paula Hawkins, and Pete Wilson.

Mr. BAKER. Mr. President, this is the cloture motion which was referred to in the unanimous-consent agreement entered into a few moments ago, on which a vote will occur at 4 p.m. on Tuesday next, without the necessity of the mandatory quorum call as contemplated by rule XXII.

SENATE SCHEDULE

Mr. BAKER. Mr. President, the Senate will not be in session tomorrow. We will be in session today as long as it is productive to do so. I do not anticipate a late day today, however.

Under the order previously entered, the Senate will convene at 10 a.m., on Monday next.

I urge Senators to consider that on Monday there is a high likelihood of votes, perhaps even several votes. There are a number of amendments to be offered by the Senator from Ohio, I believe, as well as by the Judiciary Committee and perhaps by other Senators.

So, once again, I urge Senators to consider that Monday is likely to be a busy day. We will begin at 10 a.m., and votes should be expected throughout that day.

Mr. METZENBAUM. Mr. President, if the Senator will yield, I should like to indicate publicly at this point that quite often when there are a number of amendments, a request is made to stack up those amendments. The Members of the Senate have been given notice adequately in advance that there will be votes on Monday. Therefore, I want to add that I would not be inclined to stack up amendments for a later vote. I would have no difficulty in accommodating for an hour or something of that kind, but I would not be agreeable to holding them over until Tuesday. I hope the Members of the Senate will be present, because there may be more than one rollcall vote on Monday.

Mr. BAKER. I thank the Senator.

Senators should be on notice that votes should be expected on Monday and I believe will occur on Monday. With the announcement of the Senator from Ohio that he will object to a unanimous-consent request for an extensive stacking of votes, they should take account of that.

Mr. President, I do not anticipate a vote this afternoon. I believe I am correct in saying that the Senator from Ohio does not wish to do that.

I expect that we will continue for a little while this afternoon, perhaps at least with the opening statements of the managers. I do not anticipate a late day today.

SHIPPING ACT OF 1983

Mr. BAKER. Mr. President, I now ask the Chair to lay before the Senate S. 47.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 47) to improve the international ocean commerce transportation system of the United States.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment, as follows: Strike out all after the enacting clause, and insert the following:

S. 47

That this Act may be cited as the "Shipping Act of 1983".

Sec. 22. Effective date.

SEC. 2. DECLARATION OF POLICY.

The objectives of United States regulation of international liner shipping are—

(1) to develop and maintain an efficient ocean transportation system through commercial means, with minimum government involvement, in order to serve the needs of United States foreign commerce;

(2) to foster reliable and responsible service by marine terminal operators, ocean common carriers, and conferences;

(3) to encourage ocean transportation rates and practices for United States exporters and importers that are internationally competitive, and which are not unjustly discriminatory;

(4) to harmonize United States shipping practices with those of its major trading partners;

(5) to permit cooperation among carriers and rationalization of services; and

(6) to facilitate efficient and timely regulation by a single Federal agency of the various aspects of international liner shipping, responsive to the growth of ocean commerce and international developments affecting that commerce.

SEC. 3. DEFINITIONS.

As used in this Act—

(1) "agreement" means an understanding, arrangement, or association, written or oral, and any modification or cancellation thereof; but the term does not include a maritime labor agreement;

(2) "antitrust laws" means the Act of July 2, 1890 (ch. 647, 26 Stat. 209), as amended; the Act of October 15, 1914 (ch. 323, 38 Stat. 730), as amended; the Federal Trade Commission Act (38 Stat. 717), as amended; sections 73 and 74 of the Act of August 27, 1894 (28 Stat. 570), as amended; the Act of June 19, 1936 (ch. 592, 49 Stat. 1526), as amended; the Antitrust Civil Process Act (76 Stat. 548), as amended; and amendments and Acts supplementary thereto;

(3) "assessment agreement" means an agreement, whether part of a collective-bargaining agreement or negotiated separately, only to the extent that it provides for the funding of collectively bargained fringe benefit obligations on other than a uniform man-hour basis, regardless of the cargo handled or type of vessel or equipment utilized;

(4) "bulk cargo" means cargo that is loaded and carried in bulk without mark or count;

(5) "Commission" means the Federal Maritime Commission;

(6) "common carrier" means a person holding itself out to the general public to provide transportation of passengers or property between the United States and a foreign country for compensation that—

(A) assumes responsibility for the transportation from the port or point of receipt to the port or point of destination; and

(B) utilizes, for all or part of that transportation, a vessel operating on the high seas or the Great Lakes between ports in the United States and ports in foreign countries.

(7) "conference" means an association of ocean common carriers permitted, pursuant to an approved or effective agreement, to engage in concerted activity and to utilize a common tariff; but the term does not include a joint service, consortium, pooling, sailing or transshipment arrangement;

(8) "controlled carrier" means an ocean common carrier that is, or whose operating assets are, directly or indirectly, owned or controlled by the government under whose registry the vessels of the carrier operate;

ownership or control by a government shall be deemed to exist with respect to any carrier if—

(A) a majority portion of the interest in the carrier is owned or controlled in any manner by that government, by any agency thereof, or by any public or private person controlled by that government; or

(B) that government has the right to appoint or disapprove the appointment of a majority of the directors, the chief operating officer, or the chief executive officer of the carrier;

(9) "deferred rebate" means a return by a common carrier of any portion of the freight money to a shipper as a consideration for that shipper giving all, or any portion, of its shipments to that or any other common carrier, or for any other purpose, the payment of which is deferred beyond the completion of the service for which it is paid, and is made only if, during both the period for which computed and the period of deferment, the shipper has complied with the terms of the rebate agreement or arrangement;

(10) "fighting ship" means a vessel used in a particular trade by an ocean common carrier or group of such carriers for the purpose of excluding, preventing, or reducing competition by driving another ocean common carrier out of that trade;

(11) "forest products in an unfinished or semifinished state" means forest products that require special handling moving in lot sizes that range from being too large for containers up to and including shipload lot sizes, including, but not limited to lumber in bundles, rough timber, ties, poles, piling, laminated beams, bundled siding, bundled plywood, bundled core stock or veneers, bundled particle or fiber boards, bundled hardwood, wood pulp in rolls, wood pulp in unitized bales, paper board in rolls, and paper in rolls;

(12) "inland division" means the amount paid by an ocean common carrier to any inland carrier for the inland portion of through transportation offered to the public by the ocean common carrier;

(13) "inland portion" means the charge to the public by an ocean common carrier with respect to the nonocean portion of through transportation;

(14) "loyalty contract" means a contract with an ocean common carrier or conference, other than a service contract or a contract based on time-volume rates, by which a contract shipper obtains lower rates by committing all or a fixed portion of its cargo to that carrier or conference;

(15) "marine terminal operator" means a person engaged in the United States in the business of furnishing wharfage, dock, warehouse, or other terminal facilities in connection with a common carrier;

(16) "maritime labor agreement" means a collective-bargaining agreement between an employer or group of employers, subject to this Act and a labor organization representing employees in the maritime or stevedoring industry, or an agreement preparatory to such a collective-bargaining agreement among members of a multiemployer bargaining group, or an agreement specifically implementing provisions of such a collective-bargaining agreement or providing for the formation, financing, or administration of a multiemployer bargaining group; but the term does not include an assessment agreement;

(17) "non-vessel-operating common carrier" means a common carrier that does not operate the vessels by which the ocean transportation service is provided, and is a shipper in its relationship with an ocean common carrier;

(18) "ocean common carrier" means a vessel operating common carrier; but the term does not include one engaged in ocean transportation by ferry boat or ocean tramp;

(19) "ocean freight forwarder" means a person in the United States who—

(A) dispatches shipments via common carriers and books or otherwise arranges space for such cargo on behalf of shippers, and

(B) processes the documentation or performs related activities incident to such shipments;

(20) "person" includes individuals, corporations, partnerships, and associations existing under or authorized by the laws of the United States or of a foreign country;

(21) "service contract" means a contract between a shipper and an ocean common carrier or conference in which the shipper makes a commitment to provide a certain minimum quantity of cargo over a fixed time period, and the ocean common carrier or conference commits to a certain rate or rate schedule as well as a defined service level—such as, assured space, transit time, port rotation, or similar service features; the contract may also specify provisions in the event of nonperformance on the part of either party;

(22) "shipment" means all of the cargo carried under the terms of a single bill of lading;

(23) "shipper" means an owner or person for whose account the ocean transportation of cargo is provided or the person to whom delivery is to be made;

(24) "shipper's council" means an association of shippers or their agents, other than ocean freight forwarders and non-vessel-operating common carriers;

(25) "tariff" means any schedule of rates, charges, classifications, rules, and practices, including any supplement, amendment or reissue pertaining to services or accommodations subject to this Act;

(26) "through rate" means the single amount charged by a common carrier in connection with through transportation;

(27) "through transportation" means continuous transportation between origin and destination for which a single amounts is assessed and which is offered or performed by one or more carriers, at least one of which is a common carrier, between a United States point or port and a foreign point or port; and

(28) "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Marianas, and all other United States territories and possessions.

SEC. 4. AGREEMENTS WITHIN SCOPE OF ACT.

(a) OCEAN COMMON CARRIERS.—This Act applies to agreements by or among ocean common carriers to—

(1) discuss, fix, and regulate rates, accommodations, and other conditions of service including through rates and through transportation,

(2) pool or apportion earnings, losses or traffic;

(3) allot ports or restrict or otherwise regulate the number and character of sailings between ports;

(4) limit or regulate the volume or character of cargo or passenger traffic to be carried;

(5) engage in exclusive, preferential, or cooperative working arrangements among themselves or with one or more marine terminal operators or non-vessel-operating common carriers

(6) control, regulate, or prevent competition in international ocean transportation and,

(7) consult and confer with shippers and shippers' councils regarding general rate levels, charges, classifications, rules, practices, or services.

(b) MARINE TERMINAL OPERATORS.—This Act applies to agreements among marine terminal operators, and to agreements among one or more marine terminal operators and one or more ocean common carriers to—

(1) discuss, fix, and regulate rates and other conditions of services;

(2) pool or apportion earnings, losses, or traffic; and

(3) engage in exclusive, preferential, or cooperative working arrangements.

(c) SHIPPERS' COUNCILS.—Shippers may establish shippers' councils in order to—

(1) mutually consult and exchange information or views regarding rates, charges, classifications, rules, practices, or services;

(2) agree upon common positions;

(3) consult and confer with any ocean common carrier or conference regarding general rate levels, charges, classifications, rules, practices, or services; and

(4) in the case of a small shipper, combine cargo with another small shipper for the purpose of obtaining time-volume rates and service contracts with ocean common carriers. For the purposes of this paragraph, a small shipper shall be considered to be any shipper who in the normal course of its business (including any business conducted by a parent corporation or subsidiary that, in whole or in part, either controls or is controlled by such shipper) ships in ocean transportation an average of no more than 30 containers a month.

(d) ACQUISITIONS.—This Act does not apply to an acquisition by any person, directly or indirectly, of any voting security or assets of any other person.

SEC. 5. AGREEMENTS.

(a) FILING REQUIREMENTS.—A true copy of every agreement entered into with respect to an activity described in section 4 shall be filed with the Commission, except agreements related to transportation to be performed within or between foreign countries. In the case of an oral agreement, complete memorandum specifying in detail the substance of the agreement shall be filed. The Commission may by regulation prescribe the general form and manner in which agreements shall be filed.

(b) NOTICE AND REJECTION.—Within 10 working days after an agreement is filed, the Commission shall transmit a notice of its filing to the Federal Register for publication. The Commission shall within 30 days after filing reject any agreement that on its face fails to comply with this section. In rejecting an agreement, the Commission shall state, in writing, the deficiency or deficiencies that caused the Commision to reject the agreement.

(c) CONFERENCE AGREEMENTS.—Each conference agreement must—

(1) state its purpose and the manner in which it will be implemented;

(2) provide reasonable and equal terms and conditions for admission and readmission to conference membership of any ocean common carrier willing to serve the particular trade or route;

(3) permit any member to withdraw from conference membership upon reasonable notice without penalty;

(4) require an independent neutral body to police fully the obligations of the conference and its members;

(5) provide for a consultation process designed to promote—

(A) commercial resolution of disputes; and

(B) cooperation in preventing and eliminating malpractices; and

(6) establish procedures for promptly and fairly considering shippers' requests and complaints.

(d) CONFERENCES UTILIZING LOYALTY CONTRACTS.—

(1) Each conference agreement must provide that, if the conference has in effect a loyalty contract with one or more shippers, any member of the conference may take independent action on any rate or service item required to be filed in a tariff under section 9 whenever—

(A) a member requests the conference to amend a rate or service item and announces its intention to take independent action if the conference does not agree to the amendment;

(B) the conference fails to adopt the proposed amendment within 30 days after the first consideration of the amendment in a conference meeting; and

(C) the member seeking the amendment requests the conference to include in the conference tariff a separate entry for its account as proposed in the amendment.

(2) Each conference agreement must further provide that, if the requirements of paragraph (1) are met, the conference shall include the proposed amendment in its tariff as the rate or service item of the proponent and any other members of the conference wishing to adopt the new rate or service item and that the new rate or service item shall become effective on publication and filing but no later than 45 days after the initial request.

(e) INTERCONFERENCE AGREEMENTS.—Each agreement between carriers not members of the same conference must provide the right of independent action for each carrier. Each agreement between conferences serving the same or different trades that would otherwise be naturally competitive must provide the right of independent action for each conference.

(f) SHIPPERS' COUNCIL AGREEMENTS.—Each shippers' council agreement must—

(1) limit membership to those shippers that have a direct financial interest in the export or import of the cargo covered by the agreement;

(2) provide that membership is voluntary;

(3) provide that the members have the right to act independently with any carrier or conference;

(4) provide for a consultation process designed to promote—

(A) commercial resolution of disputes; and

(B) cooperation in preventing malpractice; and

(5) provide for regular and orderly communication and exchange of information with conferences in their trade.

(g) ASSESSMENT AGREEMENTS.—

(1) Assessment agreements shall be filed with the Commission and shall be deemed approved upon filing. The Commission shall thereafter, upon complaint filed within 2 years of the date of filing of the agreement, disapprove, cancel, or modify any such agreement, or charge or assessment pursuant thereto, that it finds, after notice and hearing, to be unjustly discriminatory or unfair as between carriers, shippers, or ports. The Commission shall issue its final decision in each proceeding within 1 year of the date of filing of the complaint. If an assessment or charge is found to be unjustly discriminatory or unfair as between carriers, shippers, or ports, the Commission shall remedy the unjust discrimination or unfairness for the period of time between the filing of the complaint and the final decision by means of assessment adjustments. These adjustments shall be implemented by prospective credits or debits to future assessments or charges, except in the case of a complainant who has ceased activities subject to the assessment or charge, in which case reparation may be awarded. To the extent that any provision of this paragraph conflicts with the language of any other section of this Act, the Shipping Act, 1916, or the Intercoastal Shipping Act, 1933, the provisions of this paragraph shall control.

(2) This Act, the Shipping Act, 1916, and the Intercoastal Shipping Act, 1933, do not apply to maritime labor agreements. This section does not exempt from the provisions of this Act, the Shipping Act, 1916, or the Intercoastal Shipping Act, 1933, any rates, charges, regulations, or practices of a common carrier or marine terminal operator that are required to be set forth in a tariff, whether or not such rates, charges, regulations, or practices arise out of, or are otherwise related to, a maritime labor agreement.

SEC. 6. ACTION ON AGREEMENTS.

(a) EFFECTIVE DATE.—Except with respect to assessment agreements, each agreement filed under section 5(a) shall become effective 45 days after filing, unless rejected under section 5(b) or suspended pursuant to subsection (b) but in no case may an agreement become effective in less than 30 days from its publication in the Federal Register.

(b) SUSPENSION.—At any time prior to the expiration of the forty-five day period referred to in subsection (a), the Commission, upon complaint of a person, may suspend the effective date of an agreement pending the outcome of any proceeding pursuant to subsection (c), if the Commission, after preliminary hearing, finds that—

(1) the complainant has shown a reasonable probability that the agreement will operate in violation of section 5 or 12; and

(2) the complainant will be substantially injured in the interim if the agreement is allowed to go into effect before a final decision on the merits.

No suspension period may exceed 180 days.

(c) CANCELLATION OR MODIFICATION.—The Commission may, at any time, upon complaint or upon its own motion, institute and conduct a hearing to determine if any agreement filed under section 5(a) operates in violation of section 5 or 12, and if so, shall by order, cancel or modify that agreement. Each agreement that is in effect at the time it is the subject of an investigation and hearing shall remain in effect during the investigation and hearing.

(d) HEARING.—Hearings pursuant to this section shall be limited to the submission of affidavits of fact and memorandums of law unless, in the opinion of the Commission, there is a genuine issue of fact that requires an oral evidentiary hearing. Oral argument may be ordered at the discretion of the Commission.

(e) BURDEN OF PROOF.—The burden of proof in any proceeding under this section, or under section 5(g)(1) or under any other section of this Act where an agreement is concerned, is at all times on any party, including the Commission, opposing the agreement.

(f) COMPLIANCE WITH SUBPENA OR DISCOVERY.—In any proceeding under this section, the Commission may disapprove or cancel an agreement for failure of a proponent of the agreement to comply with a subpena or discovery order lawfully issued by the Commission.

(g) FINAL DECISION TIME.—The Commission shall issue a final decision in each hearing under this section within 180 days of ordering the hearing. If, within this time period, the Commission determines that it is unable to issue a final order because of undue delays, the Commission may make a decision in the proceeding adverse to the delaying party on the basis of the delay, or in the case of undue delay caused by a proponent of an agreement, alternatively, toll the 180-day period for the period of delay.

(h) DURATION OF EFFECTIVENESS.—Each agreement, once in effect, shall remain in effect until withdrawn or until canceled or modified by the Commission. The Commission may not limit the effectiveness of an agreement.

SEC. 7. LOYALTY CONTRACTS.

(a) CONTRACT REQUIREMENTS.—Any ocean common carrier or conference engaged in foreign commerce may utilize loyalty contracts, including contracts for through transportation, if—

(1) the contract is available to all shippers on equal terms and conditions and, where the contract covers service under through rates via a United States port or ports, it also offers the shipper an option of port-to-port contract service, and provides that use of either service shall satisfy the shipper's loyalty obligation;

(2) the contract shipper is permitted prompt release from the contract with respect to any shipment or shipments for which the contracting carrier or conference cannot provide space as requested on reasonable notice by the shipper;

(3) the contract provides that whenever a rate for the carriage of goods under the contract becomes effective, insofar as it is under the control of the carrier or conference, the rate—

(A) may not be increased on less than 90 days' notice, except upon agreement of the applicable shippers; and

(B) may be increased on not less than 30 days' notice if the increase is to a level no higher than that from which the particular rate was reduced within 180 days immediately preceding the filing of the increase;

(4) the contract covers only those goods of the contract shipper as to the shipment of which it has the legal right at the time of shipment to select the carrier. It shall be deemed a breach of the contract if, before the time of shipment and with the sole intent to avoid its obligation under the contract, the contract shipper divests itself, or with the same intent permits itself to be divested, of the legal right to select the carrier and the shipment is carried by a carrier that is not a party to the contract. In any dispute under this paragraph, the contract shipper will prevail upon producing evidence which establishes the truth of its claim not to be in breach of the contract. No contract shall require the shipper to refuse to purchase, sell, or transfer any goods on terms that vest the right to select the carrier in any other person;

(5) the contract shipper is not denied the right to utilize competing services that involve loading to or from a vessel at a port or

points located beyond a carrier's or conference's geographic scope as defined in the contract;

(6) the damages recoverable for breach by either party are limited to actual damages to be determined after breach in accordance with the principles of contract law. The contract may specify, however, that in the case of a breach by a contract shipper the damages may be an amount not exceeding the freight charges computed at the contract rate on the particular shipment, less the cost of handling;

(7) the shipper, carrier, or conference is permitted on ninety days' notice to terminate the contract rate system in whole or with respect to any commodity without penalty;

(8) the contract provides for a spread or series of spreads between non-contract rates and rates charged contract shippers that shall not exceed an aggregate of 15 per centum; and

(9) the contract excludes bulk cargo (except liquid bulk cargoes, other than chemicals, in less than full shipload lots) and forest products in an unfinished or semifinished state.

(b) TREATMENT OF CONTRACT NOT IN CONFORMITY.—Utilization of a loyalty contract that does not conform with each of the requirements of this section is a violation exclusively of this Act.

SEC. 8. EXEMPTION FROM ANTITRUST LAWS.

(a) The antitrust laws do not apply to—

(1) any agreement that has been filed under section 5 and has become effective under section 5(f) or section 6, or is exempt under section 18 from any requirement of this Act;

(2) any activity or agreement within the scope of this Act, whether permitted under or prohibited by this Act, undertaken or entered into in the reasonable belief that (A) it is pursuant to an agreement on file with the Commission and in effect when the activity took place, or (B) it is exempt under section 18 from any filing requirement of this Act;

(3) any loyalty contract or any activity pursuant to a loyalty contract;

(4) any agreement or activity that relates solely, to ocean or through transportation services within or between foreign countries, whether or not via the United States;

(5) any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade;

(6) any agreement or activity with a shipper's council organized under the laws of a foreign country and operating exclusively outside the United States, even when that agreement or activity affects cargo transported in a United States import or export trade;

(7) any agreement or activity to provide or furnish wharfage, dock, warehouse, or other terminal facilities exclusively outside the United States; and

(8) subject to section 21(e)(2), any agreement, modification, or cancellation approved by the Commission before the effective date of this Act under section 15 of the Shipping Act, 1916, or permitted under section 14(b) thereof, and any properly filed and published tariff rate, charge, classification, rule, or practice implementing that agreement, modification, or cancellation.

(b) This Act does not extend antitrust immunity—

(1) to any agreement with or among air carriers, rail carriers, motor carriers, or common carriers by water not subject to this Act with respect to transportation within the United States; or

(2) to any discussion or agreement among common carriers that are subject to this Act fixing the inland divisions (as opposed to the inland portions) of through rates within the United States.

(c)(1) Any determination by any agency or court that results in the denial or removal of the immunity to the antitrust laws set forth in subsection (a) shall not remove or alter the antitrust immunity for the period before the determination.

(2) No person may recover damages under section 4 of the Clayton Act, or obtain injunctive relief under section 16 of the Clayton Act, for conduct that is prohibited by this Act.

SEC. 9. TARIFFS.

(a) IN GENERAL.—

(1) Except with regard to bulk cargo and forest products in an unfinished or semifinished state, each common carrier and conference shall file with the Commission, and keep open to public inspection, tariffs showing all its rates, charges, classifications, rules, and practices between all points or ports or its own route and on any through transportation route that has been established. However, common carriers shall not be required to state separately or otherwise reveal in tariff filings the inland divisions of a through rate. Tariffs shall—

(A) plainly indicate the places between which cargo will be carried;

(B) list each classification of cargo in use;

(C) set forth the level of freight forwarder compensation, if any, by a carrier or conference;

(D) state separately each terminal or other charge, privilege, or facility under the control of the carrier or conference and any rules or regulations that in any way change, affect, or determine any part or the aggregate of the rates or charges; and

(E) and include sample copies of any loyalty contract, bill of lading, contract of affreightment, or other document evidencing the transportation agreement.

(2) Copies of tariffs shall be made available to any person and a reasonable charge may be assessed for them.

(b) TIME-VOLUME RATES.—Rates quoted in tariffs may vary with the volume of cargo offered over a specified period of time.

(c) SERVICE CONTRACTS.—An ocean common carrier or conference may enter into a service contract with a shipper or shippers council to provide specified services under specified rates and conditions, subject to the requirements of this Act. Each contract entered into under this subsection shall be filed confidentially with the Commission, and at the same time, a concise statement of its essential terms shall be filed with the Commission and made available to the general public in tariff format, and such essential terms shall be available to all shippers similarly situated. The essential terms shall include—

(1) the origin and destination port ranges in the case of port-to-port movements, and the origin and destination geographic areas in the case of through intermodal movements;

(2) the commodity or commodities involved;

(3) the minimum volume;

(4) the line-haul rate;

(5) the duration;

(6) service commitments; and

(7) the liquidated damages for nonperformance, if any.

The exclusive remedy for a breach of a contract entered into under this subsection is an action in an appropriate court, unless the parties otherwise agree. This subsection does not affect service contracts relating to bulk cargo or forest products in an unfinished or semifinished state.

(d) RATES.—No new or initial rate or change in existing rate that results in an increased cost to the shipper may become effective earlier than 30 days after filing with the Commission. The Commission, for good cause, may allow such a new or initial rate or change to become effective in less than thirty days. Any change in an existing rate that results in a decreased cost to the shipper may become effective upon publication and filing with the Commission.

(e) REFUNDS.—The Commission may, upon application of a carrier or shipper, permit a common carrier or conference to refund a portion of freight charges collected from a shipper or to waive the collection of a portion of the charges from a shipper if—

(1) there is an error in a tariff of a clerical or administrative nature or an error due to inadvertence in failing to file a new tariff and the refund will not result in discrimination among shippers, ports, or carriers;

(2) the common carrier or conference has, prior to filing an application for authority to make a refund, filed a new tariff with the Commission that sets forth the rate on which the refund or waiver would be based;

(3) the common carrier or conference agrees that if permission is granted by the Commission, an appropriate notice will be published in the tariff, or such other steps taken as the Commission may require, which gives notice of the rate on which the refund or waiver would be based, and additional refunds or waivers as appropriate shall be made with respect to other shipments in the manner prescribed by the Commission in its order approving the application; and

(4) the application for refund or waiver is filed with the Commission within 180 days from the date of shipment.

(f) FORM.—The Commission may by regulation prescribe the form and manner in which the tariffs required by this section shall be published and filed. The Commission may reject any tariff that is not in conformity with this section and its regulations. Upon rejection by the Commission, the tariff is void and its use is unlawful.

SEC. 10. CONTROLLED CARRIERS.

(a) CONTROLLED CARRIER RATES.—No controlled carrier subject to this section shall maintain rates or charges in its tariffs filed with the Commission that are below a level that is just and reasonable, nor shall any such carrier establish or maintain unjust or unreasonable classifications, rules, or regulations in such tariffs. An unjust or unreasonable classification, rule, or regulation means one which results or is likely to result in the carriage or handling of cargo at rates or charges which are below a level which is just and reasonable. The Commission may, at any time after notice and hearing, disapprove any rates, charges, classifications, rules, or regulations which the controlled carrier has failed to demonstrate to be just and reasonable. In any proceeding under this subsection, the burden of proof shall be on the controlled carrier to demonstrate that its rates, charges, classifications, rules, or regulations are just and reasonable. Rates, charges, classifications, rules, or regulations filed by a controlled carrier that have been rejected, suspended, or disap-

proved by the Commission are void, and their use is unlawful.

(b) RATE STANDARDS.—For the purpose of this section, in determining whether rates, charges, classifications, rules, or regulations by a controlled carrier are just and reasonable, the Commission may take into account appropriate factors including, but not limited to, whether—

(1) the rates or charges which have been filed or which would result from the pertinent classifications, rules, or regulations are below a level which is fully compensatory to the controlled carrier based upon that carrier's actual costs or upon its constructive costs, which are hereby defined as the costs of another carrier, other than a controlled carrier, operating similar vessels and equipment in the same or a similar trade;

(2) the rates, charges, classifications, rules, or regulations are the same as or similar to those filed or assessed by other carriers in the same trade;

(3) the rates, charges, classifications, rules, or regulations are required to assure movement of particular cargo in the trade; or

(4) the rates, charges, classifications, rules, or regulations are required to maintain acceptable continuity, level, or quality of common carrier service to or from affected ports.

(c) EFFECTIVE DATE OF RATES.—Notwithstanding the provisions of section 9(d), the rates, charges, classifications, rules, or regulations of controlled carriers shall not, without special permission of the Commission, become effective sooner than the 30th day after the date of filing with the Commission. Each controlled carrier shall, upon the request of the Commission, file, within 20 days of request (with respect to its existing or proposed rates, charges, classifications, rules, or regulations), a statement of justification that sufficiently details the controlled carrier's need and purpose for such rates, charges, classifications, rules, or regulations upon which the Commission may reasonably base its determination of the lawfulness thereof.

(d) DISAPPROVAL OF RATES.—Whenever the Commission is of the opinion that the rates, charges, classifications, rules, or regulations filed by a controlled carrier may be unjust and unreasonable, the Commission may issue an order to the controlled carrier to show cause why such rates, charges, classifications, rules, or regulations should not be disapproved. Pending a determination as to their lawfulness in such a proceeding, the Commission may suspend such rates, charges, classifications, rules, or regulations at any time before their effective date. In the case of rates, charges, classifications, rules, or regulations that have already become effective, the Commission may, upon the issuance of an order to show cause, suspend such rates, charges, classifications, rules, or regulations on not less than 60 days' notice to the controlled carrier. No period of suspension under this subsection may be greater than 180 days. Whenever the Commission has suspended any rates, charges, classifications, rules, or regulations under this subsection, the affected carrier may file new rates, charges, classifications, rules, or regulations to take effect immediately during the suspension period in lieu of the suspended rates, charges, classifications, rules, or regulations—except that the Commission may reject such new rates, charges, classifications, rules, or regulations if it is of the opinion that they are unjust and unreasonable.

(e) PRESIDENTIAL REVIEW.—Concurrently with the publication thereof, the Commission shall transmit to the President any order of suspension or final order of disapproval of rates, charges, classifications, rules, or regulations of a controlled carrier subject to this section. Within 10 days after the receipt or the effective date of such Commission order, the President may request the Commission in writing to stay the effect of the Commission's order if he finds that such stay is required for reasons of national defense or foreign policy which reasons shall be specified in the report. Notwithstanding any other provisions of law, the Commission shall immediately grant such request by the issuance of an order in which the President's request shall be described. During any such stay, the President shall, whenever practicable, attempt to resolve the matter in controversy by negotiation with representatives of the applicable foreign governments.

(f) EXCEPTIONS.—The provisions of this section shall not apply to—

(1) any controlled carrier of a state whose vessels are entitled by a treaty of the United States to receive national or most-favored-nation treatment;

(2) any controlled carrier of a state which, on the effective date of this section, has subscribed to the statement of shipping policy contained in note 1 to annex A of the Code of Liberalization of Current Invisible Operations, adopted by the Council of the Organization for Economic Cooperation and Development;

(3) rates, charges, classifications, rules, or regulations of any controlled carrier in any particular trade which are covered by an agreement effective under section 6, other than an agreement in which all of the members are controlled carriers not otherwise excluded from the provisions of this subsection;

(4) rates, charges, classifications, rules, or regulations governing the transportation of cargo by a controlled carrier between the country by whose government it is owned or controlled, as defined herein and the United States; or

(5) a trade served exclusively by controlled carriers.

SEC. 11. OCEAN FREIGHT FORWARDERS.

(a) LICENSE.—No person may act as an ocean freight forwarder unless that person holds a license issued by the Commission. The Commission shall issue a forwarder's license to any person who—

(1) the Commission determines to be qualified by experience and character to render forwarding services; and

(2) furnishes a bond in a form and amount determined by the Commission to insure financial responsibility that is issued by a surety company found acceptable by the United States Department of the Treasury.

(b) SUSPENSION OR REVOCATION.—The Commission shall, after notice and hearing, suspend or revoke any license if it finds that the ocean freight forwarder is not qualified to render forwarding services or that it willfully failed to comply with any provision of this Act or with any lawful order, rule, or regulation of the Commission. The Commission may also revoke a forwarder's license for failure to maintain a bond in accordance with subsection (a)(2).

(c) EXCEPTION.—A person whose primary business is the sale of merchandise may forward shipments of that merchandise for its own account without a license.

(d) COMPENSATION OF FORWARDERS BY CARRIERS.—

(1) A common carrier may compensate an ocean freight forwarder in connection with any cargo shipment dispatched on behalf of others only when the ocean freight forwarder has certified in writing that it holds a valid license and has performed the following services:

(A) engaged, booked, secured, reserved, or contracted directly with the carrier or its agent for space aboard a vessel or confirmed the availability of that space; and

(B) prepared and processed the ocean bill of lading, dock receipt, or other similar document with respect to the cargo.

(2) No common carrier may pay compensation for services described in paragraph (1) more than once on the same cargo shipment.

(3) No compensation may be paid to an ocean freight forwarder except in accordance with a tariff filed under section 9(a).

(4) No ocean freight forwarder may receive compensation from a common carrier with respect to any shipment in which the forwarder has a direct or indirect beneficial interest nor shall a common carrier knowingly pay compensation on any such shipment.

SEC. 12. PROHIBITED ACTS.

(a) IN GENERAL.—No person may—

(1) operate under an agreement described in section 4 that has not become effective under section 6, or that has been suspended, disapproved, or canceled;

(2) operate under an agreement described in section 4 except in accordance with its terms and any modifications to the agreement made by the Commission; or

(3) knowingly and willfully, directly or indirectly, by means of false billing, false classification, false weighing, false measurement, false report of weight or measures, or by any other unjust or unfair device or means obtain or attempt to obtain ocean transportation for property at less than the rates or charges that would otherwise be applicable;

(b) COMMON CARRIERS.—No common carrier, including a joint venture, either alone or in conjunction with any other person, directly or indirectly, may—

(1) charge, demand, collect, or receive greater, less, or different compensation for the transportation of property or for any service in connection therewith than the rates and charges that are specified in its tariffs;

(2) rebate, refund, or remit in any manner, or by any device, any portion of its rates except in accordance with its tariffs;

(3) extend or deny to any person any privilege, concession, equipment, or facility except in accordance with its tariffs;

(4) allow any person to obtain transportation for property at less than the rates or charges established by the carrier in its tariff by means of false billing, false classification, false weighing, false measurement, or by any other unjust or unfair device or means;

(5) retaliate against any shipper by refusing, or threatening to refuse, cargo space accommodations when available, or resort to other unfair or unjustly discriminatory methods because the shipper has patronized another carrier, or has filed a complaint, or for any other reason;

(6) make any unfair or unjustly discriminatory contract with any shipper or engage in any unfair or unjustly discriminatory practice against any shipper or port, in the matter of—

(A) rates or charges;

(B) cargo classifications;
(C) cargo space accommodations or other facilities, due regard being had for the proper loading of the vessel and the available tonnage;
(D) the loading and landing of freight in proper condition; or
(E) the adjustment and settlement of claims;
(7) employ any fighting ship; or
(8) offer or pay any deferred rebates.

(c) CONCERTED ACTION.—No conference or group of two or more common carriers, other than a joint venture operating by itself, may collectively—
(1) boycott or take any other concerted action resulting in an unreasonable refusal to deal;
(2) utilize a device or means that unreasonably sets conditions or otherwise unreasonably restricts the ability of a shipper to select an ocean common carrier in a competing trade, or an ocean tramp, or a bulk carrier;
(3) unreasonably restrict the employment of intermodalism or other technological innovations by member common carriers;
(4) engage in any predatory practice designed to eliminate the participation, or deny the entry, in a particular trade of an ocean common carrier not a member of the conference, a group of common carriers, an ocean tramp, or a bulk carrier;
(5) negotiate with any nonocean carrier or group of nonocean carriers (for example, truck, rail, or air operators) on any matter relating to rates or services provided to ocean common carriers within the United States by such nonocean carriers: *Provided,* That this prohibition shall not prohibit the setting and publishing of a joint through rate by a conference, joint venture, or an association of ocean common carriers authorized to file tariffs;
(6) deny in the export foreign commerce of the United States compensation to an ocean freight forwarder or limit the amount thereof to less than 1¼ percent of the freight charges; or
(7) allocate shippers among specific carriers that are parties to an agreement or prohibit any carrier that is a party to the agreement from soliciting cargo from any particular shipper, except as otherwise required by the law of the United States or the importing or exporting country, or as agreed to by a shipper in a service contract.

(d) COMMON CARRIERS, OCEAN FREIGHT FORWARDERS, AND MARINE TERMINAL OPERATORS.—No common carrier, ocean freight forwarder, or marine terminal operator may—
(1) fail to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property;
(2) make or give any undue or unreasonable preference or advantage to any particular person, locality, or description of traffic in any respect whatsoever, or subject any particular person, locality, or description of traffic to an unreasonable refusal to deal or any undue or unreasonable prejudice or disadvantage in any respect whatsoever; or
(3) knowingly disclose, offer, solicit, or receive any information concerning the nature, kind, quantity, destination, consignee, or routing of any property tendered or delivered to a common carrier, ocean freight forwarder, or marine terminal operator consent of the shipper or consignee if that information—
(A) may be used to the detriment or prejudice of the shipper or consignee:
(B) may improperly disclose its business transactions to a competitor; or
(C) may be used to the detriment or prejudice of any common carrier.

Nothing in this paragraph shall be construed to prevent providing such information in response to any legal process, to the United States, or to any independent neutral body operating within the scope of its authority to fulfill the policing obligations of the parties to an agreement effective under this Act. Nor shall it be prohibited for any ocean common carrier that is a party to a conference agreement approved under this Act, or any receiver, trustee, lessee, agent, or employee of such carrier or person, or any other person authorized by such carrier to receive information, to give information to the conference or any person, firm, corporation, or agency designated by the conference, or to prevent the conference or its designee from soliciting or receiving information for the purpose of determining whether a shipper or consignee has breached an agreement with the conference or its member lines or for the purpose of determining whether a member of the conference has breached the conference agreement, or for the purpose of compiling statistics of cargo movement, but the use of such information for any other purpose prohibited by this Act or any other Act shall be prohibited.

(e) If, after notice and hearing, the Commission finds that the actions of carriers or foreign governments have unduly impaired access of any ship documented under United States flag to ocean trades between foreign ports, the Commission shall suspend the tariffs of such carriers or the national lines of such foreign governments, or both, in trades to and from United States ports, pursuant to the provisions of section 15(b)(1).

SEC. 13. COMPLAINTS, INVESTIGATIONS, REPORTS, AND REPARATIONS.

(a) FILING OF COMPLAINTS.—Any person may file with the Commission a sworn complaint alleging a violation of this Act and may seek reparation for any injury caused to the complainant by that violation.

(b) SATISFACTION OR INVESTIGATION OF COMPLAINTS.—The Commission shall furnish a copy of a complaint filed pursuant to subsection (a) to the person named therein who shall, within a reasonable time specified by the Commission, satisfy the complaint or answer it in writing. If the complaint is not satisfied, the Commission shall investigate it in an appropriate manner and make an appropriate order.

(c) COMMISSION INVESTIGATIONS.—The Commission upon its own motion may, in like manner and with the same powers, investigate any conduct that it believes may be in violation of this Act.

(d) SPECIAL INVESTIGATIONS OF CONDUCT PURSUANT TO POOLING AGREEMENTS.—(1) The Commission, upon complaint of a person, may initiate an investigation of conduct pursuant to an agreement to pool or apportion traffic or revenues, or establish a joint venture, with other common carriers operating in the same trade if it believes that conduct pursuant to the agreement substantially reduces competition in the trade.

(2) The Commission shall cancel or modify, any agreement subject to investigation pursuant to paragraph (1) if it determines that conduct pursuant to the agreement substantially reduces competition in the trade as a whole unless the agreement—
(A) results in gains in efficiency or services that outweigh any substantial reduction in competition; or
(B) is authorized by an express provision of a government-to-government agreement or undertaken pursuant to a government-to-government agreement in effect at the date of enactment of this Act, or an extension thereof; or
(C) is in furtherance of foreign policy interests of the United States that outweigh the interests of the United States in preventing the substantial reduction in competition.

(3) The sole remedy under this Act for conduct found to violate paragraph (2) is cancellation or modification of the agreement.

(e) REPORTS.—The Commission shall make a written report of every investigation made under this Act in which a hearing was held stating its conclusions, decisions, findings of fact, and order. A copy of this report shall be furnished to all parties. The Commission shall publish each report for public information and the published report shall be competent evidence in all courts of the United States.

(f) REPARATIONS.—For any complaint filed pursuant to subsection (a) within 2 years after the cause of action accrued, the Commission may, after notice and hearing and when appropriate, direct the payment of reparations to the complainant for actual injury caused by a violation of this Act.

SEC. 14. SUBPENAS AND DISCOVERY.

(a) IN GENERAL.—In investigations and adjudicatory proceedings under this Act—
(1) depositions, written interrogatories, and discovery procedures may be utilized by any party under rules and regulations issued by the Commission which rules and regulations, to the extent practicable, shall be in conformity with the rules applicable in civil proceedings in the district courts of the United States; and
(2) the Commission may by subpena compel the attendance of witnesses and the production of books, papers, documents, and other evidence.

(b) WITNESS FEES.—Witnesses shall, unless otherwise prohibited by law, be entitled to the same fees and mileage as in the courts of the United States.

SEC. 15. PENALTIES.

(a) ASSESSMENT OF PENALTY.—Whoever violates any provision of this Act, any regulation issued thereunder, or any Commission order is liable to the United States for a civil penalty. The amount of the civil penalty, unless otherwise provided in this Act, may not exceed $5,000 for each violation unless the violation was willfully and knowingly committed, in which case the amount of the civil penalty may not exceed $25,000 for each violation. Each day of a continuing violation shall constitute a separate offense.

(b) TARIFF SUSPENSION.—
(1) For any violation of section 12(b) (1), (2), (3), (4), or (8), or section 12(e), the Commission may suspend any or all tariffs of any common carrier, or that common carrier's right to use any or all tariffs of conferences of which it is a member, for a period not to exceed 12 months.
(2) For failure to supply information ordered to be produced or compelled by subpena under section 14, the Commission may suspend any or all tariffs of any common carrier, or that common carrier's right to use any or all tariffs of conferences of which it is a member.
(3) Any common carrier who accepts or handles cargo for carriage under a tariff that has been suspended or after its right to utilize that tariff has been suspended shall

be subject to a civil penalty of not more than $50,000 for each shipment.

(4) If, in defense of its failure to comply with a subpena or discovery order, a common carrier alleges that documents or information located in a foreign country cannot be produced because of the laws of that country, the Commission shall immediately notify the Secretary of State of the failure to comply and of the allegation relating to foreign laws. Upon receiving the notification, the Secretary of State shall promptly consult with the government of the nation within which the documents or information are alleged to be located for the purpose of assisting the Commission in obtaining the documents or information sought.

(5) Before any tariff suspension ordered under this subsection becomes effective, it shall be immediately submitted to the President who may, within 10 days after receiving it, disapprove the order if he finds that disapproval is required for reasons of the national defense or the foreign policy of the United States.

(c) ASSESSMENT PROCEDURE.—The Commission may, after notice and an opportunity for hearing, assess each civil penalty provided for in this Act. In determining the amount of the penalty, the Commission shall take into account the nature, circumstances, extent, and gravity of the violation committed and, with respect to the violator, the degree of culpability, history of prior offenses, ability to pay, and such other matters as justice may require. The Commission may compromise, modify, or remit, with or without conditions, any civil penalty.

(d) REVIEW OF CIVIL PENALTY.—Any person against whom a civil penalty is assessed under this section may obtain review under chapter 158 of title 28, United States Code.

(e) FAILURE TO PAY ASSESSMENT.—If any person fails to pay a civil penalty that has been assessed after it has become final or after the appropriate court has entered final judgment in favor of the Commission, the Commission shall seek to recover the amount assessed in any appropriate district court of the United States. In such an action, the court shall enforce the Commission's order unless it finds that the order was not regularly made or duly issued.

(f) LIMITATIONS.—

(1) No fine or other punishment may be imposed for criminal conspiracy to violate any provision of this Act, or to defraud the Commission by concealment of any such violation.

(2) Any enforcement action under this Act and any formal proceeding to assess any penalty under this section shall be commenced within 5 years from the date the violation occurred.

SEC. 16. COMMISSION ORDERS.

(a) IN GENERAL.—Orders of the Commission relating to any violation of this Act or any regulation issued thereunder shall be made, upon sworn complaint or on its own motion only after an opportunity for hearing. Each order of the Commission shall continue in force for the period of time specified in the order or until suspended, modified, or set aside by the Commission or a court of competent jurisdiction.

(b) REVERSAL OR SUSPENSION OF ORDERS.—The Commission may reverse, suspend, or modify any order made by it, and upon application of any party to a proceeding may grant a rehearing of the same or any matter determined therein. No rehearing shall, except by special order of the Commission, operate as a stay of such order.

(c) ENFORCEMENT OF NONREPARATION ORDERS.—In case of violation of any order of the Commission, or for failure to comply with a Commission subpena, the Commission, or any party injured by such violation, or the Attorney General may seek enforcement by any United States district court having jurisdiction over the parties. If, after hearing, the court determines that the order was properly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

(d) ENFORCEMENT OF REPARATION ORDER.—(1) In case of violation of any order of the Commission for the payment of reparation, the person to whom the award was made may seek enforcement of the order in any United States district court having jurisdiction of the parties.

(2) In any United States district court the findings and order of the Commission shall be prima facie evidence of the facts therein stated, and the petitioner shall not be liable for costs, nor for the costs of any subsequent stage of the proceedings, unless they accrue upon his appeal. A petitioner in a United States district court who prevails shall be allowed a reasonable attorney's fee to be assessed and collected as part of the costs of the suit.

(3) All parties in whose favor the Commission has made an award of reparation by a single order may be joined as plaintiffs, and all other parties in the order may be joined as defendants, in a single suit in any district in which any one plaintiff could maintain a suit against any one defendant. Service of process against any defendant not found in that district may be made in any district in which is located any office of, or point of call on a regular route operated by, that defendant. Judgment may be entered in favor of any plaintiff against the defendant liable to that plaintiff.

(e) STATUTE OF LIMITATIONS.—Any action seeking enforcement of a Commission order shall be filed within 1 year after the date of the violation of the order.

(f) REPRESENTATION IN COURT.—Attorneys employed by the Commission may, if the Attorney General, after appropriate notice, does not object, appear for and represent the Commission in any case before a court of the United States or a State of the United States.

(g) IMPACT REPORTS.—The Commission shall be exempt from the requirements for the preparation of impact reports pursuant to 42 U.S.C. 6362(b).

SEC. 17. REPORTS AND CERTIFICATES.

(a) REPORTS.—The Commission may require any common carrier, marine terminal operator, or ocean freight forwarder, or any officer, receiver, trustee, lessee, agent, or employee thereof, to file with it any periodical or special report or any account, record, rate, or charge, or memorandum of any facts and transactions appertaining to the business of that common carrier, marine terminal operator, or ocean freight forwarder. The report, account, record, rate, charge, or memorandum shall be made under oath whenever the Commission so requires and shall be furnished in the form and within the time prescribed by the Commission. Conference minutes and self-policing reports required to be filed with the Commission shall not be released to third parties or published by the Commission.

(b) CERTIFICATION.—The Commission shall require the chief executive officer of every ocean common carrier and, to the extent it deems feasible, may require any shipper, consignor, consignee, non-vessel-operating common carrier, marine terminal operator, ocean freight forwarder, or broker to file a periodic written certification made under oath with the Commission attesting to—

(1) a policy prohibiting the payment, solicitation, or receipt of any rebate that is unlawful under this Act;

(2) the fact that this policy has been promulgated recently to each owner, officer, employee, and agent thereof;

(3) the details of the efforts made within the company or otherwise to prevent or correct illegal rebating; and

(4) full cooperation with the Commission in its investigation of illegal rebating or refunds in United States foreign trades and in its efforts to end those illegal practices.

Failure to file a certification shall result in a civil penalty of not more than $5,000 for each day the violation continues.

SEC. 18. EXEMPTIONS.

The Commission, upon application or on its own motion, may by order or rule exempt for the future any specified activity or class of agreements subject to this Act from any requirement of this Act, if it finds that the exemption will not substantially impair effective regulation by the Commission. The Commission may attach conditions to any exemption and may, by order, revoke any exemption. No order or rule of exemption or revocation of exemption may be issued unless opportunity for hearing has been afforded interested persons (who, for purposes of this section, include the departments and agencies of the United States).

SEC. 19. REGULATIONS.

The Commission may promulgate rules and regulations as necessary to carry out the provisions of this Act.

SEC. 20. REPORT TO CONGRESS.—No later than 2 years after the effective day of this Act, the Comptroller General shall submit to the Congress a comprehensive study of, and make recommendations concerning, the regulation of international ocean shipping by common carriers. Such comprehensive study shall specifically address—

(1) various options of deregulation of the international ocean shipping industry, with reference to their ability to promote an efficient, stable, and competitive United States common carrier fleet;

(2) the opportunities for harmonizing United States policy toward international ocean shipping with the policies of our major trading partners;

(3) the system for determining tariffs based on the classification of goods and its role in a deregulated international ocean shipping industry; including the most effective method for eliminating unnecessary cargo classifications as a basis for establishing tariffs and the feasibility of establishing a single tariff by each conference or common carrier for all cargoes shipped in units of comparable size, weight, and handling characteristics;

(4) the role of the antitrust laws in the international shipping industry and their impact upon our relations with foreign nations;

(5) the impact of the "rules of competition" being considered by our trading partners and their relationship to the trend in the developing world toward structured cartelization;

(6) the impact deregulation may have on the growth of State-owned or State-controlled merchant fleets;

(7) the size of the United States liner fleet, by number and cargo capacity, which each option may produce; and

(8) the future structure and role of the Federal Maritime Commission in a deregulated international ocean shipping industry.

SEC. 21. REPEALS AND CONFORMING AMENDMENTS.

(a) REPEALS.—The laws specified in the following table are repealed:

Shipping Act, 1916:	
Sec. 13	36 Stat. 117
Sec. 14a	46 U.S.C. 813
Sec. 14b	46 U.S.C. 813a
Sec. 18(b)	46 U.S.C. 817(b)
Sec. 18(c)	46 U.S.C. 817(c)
Sec. 26	46 U.S.C. 825
Sec. 44	46 U.S.C. 841b
Merchant Marine Act, 1920:	
Sec. 20	41 Stat. 996
Merchant Marine Act, 1936:	
Sec. 212(e)	46 U.S.C. 1122(e)
Sec. 214	46 U.S.C. 1124
Omnibus Budget Reconciliation Act of 1981:	
Sec. 1608	95 Stat. 752

(b) CONFORMING AMENDMENTS.—The Shipping Act, 1916 (39 Stat. 728), as amended (46 U.S.C. 801 et seq.), is amended as follows:

(1) in section 1 by striking the definition "controlled carrier";

(2) in sections 14, 15, 16, 20, 21(a), 22, and 45 by striking "common carrier by water" wherever it appears in those sections and substituting "common carrier by water in interstate commerce";

(3) in section 14, first paragraph, by striking "or a port of a foreign country";

(4) in section 14, last paragraph, by striking all after the words "for each offense" and substituting a period;

(5) in section 15, fourth paragraph, by striking "(including changes in special rates and charges covered by section 14b of this Act which do not involve a change in the spread between such rates and charges and the rates and charges applicable to noncontract shippers)" and also "with the publication and filing requirements of section 18(b) hereof and";

(6) in section 15, sixth paragraph, by striking ", or permitted under section 14b," and in the seventh paragraph, by striking "or of section 14b";

(7) in section 16, in the paragraph designated "First", by striking all after "disadvantage in any respect" and substituting "whatsoever.";

(8) in section 17 by striking the first paragraph, and in the second paragraph, by striking "such carrier and every";

(9) in section 21(b) by striking "The Commission shall require the chief executive officer of every vessel operating common carrier by water in foreign commerce and to the extent it deems feasible, may require any shipper, consignor, consignee, forwarder, broker, other carrier or other person subject to this Act," and substituting "The Commission may, to the extent it deems feasible, require any shipper, consignor, consignee, forwarder, broker, or other person subject to this Act,";

(10) in section 22 by striking subsection (c);

(11) in section 25, at the end of the first sentence, by adding "under this Act";

(12) in sections 29, 30, and 31, after the words "any order of the board", by adding "under this Act,";

(13) in section 32(a), by striking "and section 44"; and

(14) in section 32(c), after the words "or functions,", by adding "under this Act,".

(c) TECHNICAL AMENDMENTS.—Section 212 of the Merchant Marine Act, 1936 (46 U.S.C. 1122) is amended by—

(1) striking after subsection (d) the following undesignated paragraph:

"The Federal Maritime Commission is authorized and directed—";

and

(2) striking after subsection (e) the following undesignated paragraph:

"The Secretary of Transportation is authorized and directed—".

(d) EFFECTS ON CERTAIN AGREEMENTS AND CONTRACTS.—All agreements, contracts, modifications, and exemptions previously approved or licenses previously issued by the Commission shall continue in force and effect as if approved or issued under the provisions of this Act; and all new agreements, contracts, and modifications to existing, pending, or new contracts or agreements shall be considered under the provisions of this Act.

(e) SAVINGS PROVISIONS.—

(1) Notwithstanding section 9(c), each service contract entered into by a shipper and an ocean common carrier or conference before the date of enactment of this Act, may remain in full force and effect and need not comply with the requirements of that subsection until 15 months after the date of enactment of this bill.

(2) This Act and the amendments made by it shall not affect any suit filed before the date of enactment of this Act.

SEC. 22. EFFECTIVE DATE.

This Act shall become effective 180 days after the date of its enactment, except that section 19 shall become effective upon enactment.

Mr. GORTON. Mr. President, I am proud to bring before you today a bill that, if enacted, will be the most significant maritime legislation in decades. The Ocean Shipping Act of 1983 provides long overdue regulatory reform for international ocean liner shipping which will benefit both ocean liner carriers and the users of their services, our exporters and importers. S. 47 is supported by all segments of the maritime community: carriers; freight forwarders; labor; both small and large ports; and shippers, who are the consumers of carrier services.

THE NEED FOR REFORM

For the past 100 years, carriers have formed conferences to establish collectively rates and services. This is the accepted practice worldwide. Before World War I, Congress studied the ocean conference system to decide whether the then new antitrust laws should apply to this aspect of foreign commerce. Its findings are as relevant now as they were in 1913:

A shipping conference is a voluntary association of ocean carriers operating on a particular trade route between two or more countries.

The conference system could not operate legally in U.S. trades without express immunity from the application of the antitrust laws of the United States. The U.S. trades, however, were served by many foreign-owned companies, as well as U.S. operators, and U.S. imports and exports were also the imports and exports of many foreign nations with fully equal interest in our commerce. In the face of the unusual characteristics of international economic competition, it is concluded that some degree of immunity from the antitrust laws should be granted to liner operators in our foreign commerce.

The United States enacted the Shipping Act of 1916 to place some control over, but not prevent, conferences. The United States has been the only Nation to regulate strictly its ocean shipping industry. The Federal Maritime Commission regulates conferences by requiring tariff filing and by approving conference agreements on a case-by-case basis. As a result of a number of judicial decisions, the original antitrust immunity for international liner shipping has been eroded until, at this point, it is largely illusory. Antitrust principles are now part of FMC oversight and the Department of Justice also regulates—through antitrust litigation—international liner shipping serving the United States.

There are at least four problems with the current regulatory scheme. First, the system is unpredictable. A carrier is never sure whether the FMC will approve its agreements. The standards by which both the FMC and the Department of Justice scrutinize carrier agreements are so vague that they are almost wholly discretionary and are a constant source of dispute and litigation. Even if the FMC approves an agreement, carriers must "look over their shoulders" for Department of Justice enforcement, the aggressiveness and substance of which has also changed over time.

Second, lengthy delays in the FMC decisionmaking process result from the uncertainty discussed above. Delays in approving an agreement can, and often do stretch on for years. Even routine matters take an inordinate amount of time to complete.

Third, U.S. carriers complain of unequal enforcement of antitrust laws. They claim that the Department of Justice scrutinizes and challenges their activities far more than their foreign competition. Foreign carriers operate in the U.S. trade with highly efficient joint ventures, consortia, revenue pools, and space sharing arrangements that reduce overcapacity and therefore reduce the cost of transportation. U.S.-flag carriers, however, are unable to operate on an equal footing with their foreign competition.

Fourth, the regulatory system strains our international relations. Our trading partners claim the extension of our antitrust laws constitutes an outrageous meddling in international commerce, which subjects foreign carriers and shippers to laws and general competitive concepts that are completely foreign to them. In fact, some Europeans nations, such as Great Britain have passed blocking statutes which prevent their companies from responding to and cooperat-

ing with the Department of Justice when it seeks to exercise its antitrust authority. It is clear that, when price-fixing and collective activity are the worldwide practice, when subsidies and government ownership are common, and when cargo reservation is the trend, our traditional concepts do not apply.

LEGISLATIVE HISTORY

Since 1977, there have been several legislative initiatives to reform the regulation of international ocean liner shipping. These initiatives have been the subject of literally months of hearings in the Senate and the House. S. 47 is similar to a House bill in the 97th Congress that passed 350 to 33 and to a Senate bill in the 97th Congress that the Commerce Committee reported out unanimously. In the 96th Congress the Senate unanimously passed legislation with similar maritime goals.

S. 47

S. 47 retains the two fundamental features of the 1916 Shipping Act: First, antitrust immunity for liner conference agreements—agreements by an organization of liner operators establishing rates and joint services—and second, common carrier requirements that liner operators publish tariffs establishing rates and services available to all shippers without discrimination.

The purpose of S. 47 is to allow international liner shipping serving the United States to operate in a manner more similar to shipping elsewhere in the world. It accomplishes this by:

First. Reinstating the antitrust immunity originally provided by the Shipping Act of 1916.

Second. Providing shippers with the ability to negotiate flexible terms of carriage while retaining the common carrier system of liner ocean transportation.

Third. Streamlining FMC's regulatory role by providing a swift and predictable review process.

The bill's premise is that liner conferences are healthy because they reduce overcapacity and stabilize rates, which result in more efficient and predictable service for shippers. Shippers, the consumers of ocean liner services, endorse S. 47 because lower carrier costs and more predictable service will mean lower shipping costs. The bill protects against conference abuses and insures that these lower costs are passed on to shippers and ultimately to consumers in the form of lower prices for imported and exported goods. Conferences must maintain open memberships and in certain circumstances must permit members to set independent rates. Shippers are permitted to form shippers' councils and may negotiate contracts based on their special market needs. The bill prohibits predatory practices and rebating. International ocean liner shipping is a robustly competitive business and S. 47 is designed to keep it that way.

Mr. President, I now intend to outline the highlights of S. 47.

HIGHLIGHTS OF S. 47

First, it provides antitrust immunity for agreements between carriers, shippers, and ports. All enforcment is consolidated in one agency, the Federal Maritime Commission, under one law, the Shipping Act.

Second, it eliminates vague standards of Federal Maritime Commission review, such as "detrimental to the commerce of the United States" and "public interest" tests. Instead, S. 47 lists specific prohibited acts, such as rebating, and specific unfair, discriminatory, or predatory practices.

Third, the bill requires tariff filing at, and enforcement by, the Federal Maritime Commission.

Fourth, the bill allows shippers and carriers to negotiate time/volume rates and service contracts.

Fifth, the act requires prompt Federal Maritime Commission review of agreements and places the burden of proof on opposition to those agreements.

Sixth, the bill provides swift and predictable penalties for violations.

Seventh, S. 47 provides limited antitrust immunity for shippers to organize and confer on shipper-carrier practices, but not to negotiate specific rates.

Eighth, the bill requests a GAO study of deregulation of liner shipping for 1 year.

REBUTTAL TO OPPONENTS' ARGUMENTS

During the last Congress some newspapers pubished editorials opposing shipping bills in the House of Representatives and Senate. The editorials generally said that the bills were special interest legislation granting the carriers a new, sweeping exemption to the antitrust laws. This would occur at the expense of the shippers and the consumers, the editorials went on, who would pay higher shipping rates as a result. I believe that the writers of those editorials failed to consider why all of the groups affected by the legislation as well as all of the Senators on the Commerce Committee supported it.

As I have said, the Ocean Shipping Act is simply not a gross new inroad into the antitrust laws. The United States has exempted ocean common carriers' price setting functions since 1916. S. 47 would clarify the scope of antitrust immunity and would speed up the regulatory process, which has become a procedural morass.

Ocean shipping is a highly competitive industry. Nonconference carriers, tramps, neobulk operators, and gateway competition insure that no carrier or conference can extract monopoly rents for their services. S. 47 contains its own prohibitions and sanctions to keep ocean shipping competitive. These include prohibitions against predatory practices, limits on loyalty contracts, and mandatory rights of independent action in trades with loyalty contracts.

I wish simply to depart from this formal text to emphasize the fact that this is and has been for many years a highly competitive industry. Unlike transportation by rail or even to a certain extent by road, the oceans, of course, are open at all times, There is no investment in a trade route. It is extremely easy to move a ship from one trade route to another, all across the entire world. Wherever traffic exists, ships will search it out. Wherever one can make a profit, there will be a high degree of competition.

Opponents of the Ocean Shipping Act, including Dr. Allen Ferguson of the National Institute of Economics and Law, claim that S. 47 will harm shippers, consumers, and the economy in general because it will raise shipping rates by 20 percent, for a total cost of approximately $3 billion per year, a figure frequently used in the course of the last 2 days by the Senator from Ohio.

At the Merchant Marine Subcommittee hearing on February 2 of this year Dr. Ferguson was unable to present any evidence to support his supposition. He offered no theoretical or factual basis for his 20-percent figure which has been widely quoted in the press. The 20-percent figure appears to be a guess based on an event in the Canadian-European trade during the last session of Congress. There the chief nonconference carrier in the trade announced that it intended to join the conference. At approximately the same time the conference announced a 20-percent rate increase. Apparently Dr. Freguson deduced that the same thing would happen if the United States passed the Shipping Act. In fact, almost as soon as the rate increase was announced, executives of a major Canadian conference carrier resigned to form a new nonconference carrier to compete in the trade. The conference rate increases were immediately withdrawn.

I emphasize that this took place in a trade which did not then and has never enforced any laws remotely comparable to the antitrust laws of the United States. That incidentally is also the case throughout the rest of the world.

Almost all of those who Dr. Ferguson claims will be hurt by S. 47 support this bill. The shippers, the importers and exporters who pay for carrier services, support S. 47 because they will benefit from reduced carrier costs. Ports, both large and small, support S. 47. In the last Congress the American Association of Port Authorities rebutted Dr. Ferguson's position

paper, which asserted that small ports would be hurt by the Shipping Act. Small ports have a strong voice in the AAPA, as those familiar with disputes over waterway user charges can easily verify. The opponents' arguments came down to an assertion that these groups do not know their own interests; that, despite 66 years of experience with the conference system, they are wrong in believing that the system reduces the cost of ocean transportation.

So we have the paradox of a handful of outsiders saying that people who have made their lives in this business over the years do not know what their own interests are, do not know what the effect of changes in practices will be, but that they, the outsiders, do.

Conference systems operate everywhere in the world and are almost entirely unregulated outside the United States. Under Dr. Ferguson's theories shipping rates outside the U.S. trades should be higher because of the ease of forming conferences and the absence of antitrust laws.

Incidentally, in many of those other areas of the world, those conferences are closed, that is to say, outsiders may not join them. Under this bill conferences will be open to joining by any carrier who wishes to do so.

Dr. Ferguson in his testimony declined to compare shipping rates in the U.S. trades with those in other comparable trades, but Mr. Clifford Sayre, who manages shipping for DuPont, said that it was his company's experience that other trades offer lower rates, in part because they have developed true intermodal systems.

S. 47 would foster intermodalism. It resolves a long-standing dispute over where conference activities include intermodal transportation, which has developed because of containerships. At the same time S. 47 contains procompetitive safeguards, such as limits on the geographic scope of conference agreements.

The Ocean Shipping Act is not special interest legislation to bail out the U.S. merchant marine. It does not affect issues such as Government subsidies for U.S. shipbuilding or use of foreign ships in U.S. domestic trades. U.S.-flag carriers will benefit because they will no longer be the target of discriminatory enforcement of our antitrust laws.

I am a strong advocate of the antitrust laws and have worked to strengthen these laws and their enforcement in domestic industries. But in the international arena, we must recognize that we cannot work our will unilaterally over international markets. Conferences have existed for a century in international ocean shipping. American experience since 1916 has shown that they are an effective device to lower carrier costs and that shippers benefit from less costly and more reliable service.

The Ocean Shipping Act of 1983 is necessary to streamline the regulatory role of the Federal Maritime Commission, to reaffirm carrier participation in conferences, and to improve our strained international relations. The bill is supported by a broad range of people who participate, directly or indirectly, in international shipping.

I am grateful to the Senator from Ohio for permitting us now to move to the debate on this bill.

During the remainder of the day we will hear from a number of other Senators in opening statements and I understand there will be presented the first amendment proposed by the Senator from Ohio.

It is important at this point, however, to indicate that this bill went from the Commerce Committee to the Judiciary Committee, and that as a result of the hearings of the Judiciary Committee the chairman of that committee will have some 17 amendments to introduce on Monday. They have been the subject of long and intensive negotiation between members of the Judiciary Committee and members of the Commerce Committee, myself, and the chairman of the Merchant Marine Subcommittee included.

When Monday arrives either 15 or 16 of those amendments will be accepted on our part.

Many of them significantly improve the bill, in my view. Others, while they do not, I believe, necessarily improve the bill, nonetheless allow it to retain its deregulatory and procompetitive charcter.

One of those amendments—perhaps the most important—addresses the fundamental question of whether or not tariffs are to be filed with and enforced by the Federal Maritime Commission. That proposal will be opposed by the Committee and by this Senator, but will be thoroughly debated, and I trust will be voted on Monday.

This is controversial legislation. It is also very, very complex legislation. I began working in this field 2 years ago as the then chairman of the Merchant Marine Subcommittee without the slightest knowledge of the field and with no bias toward any of the many interests which are included in it.

I feel very deeply that the subcommittee has, particularly with the great help of the senior Senator from Hawaii, who has worked in this field during his entire career, come up with a bill which is relatively unique in that it will benefit not only the professional carriers who originally proposed changes in the law 6 years or so ago, but their consumers, and all of the other professions which are concerned with ocean transportation of goods, such as the ports, the labor unions, freight forwarders, and the like, as well. We have probably come closer to causing both the suppliers of services and the consumers of those services to agree on changes, which are quite significant, than has been the case in any of the other business deregulatory legislation to appear on the floor of this body for the last half dozen years or so.

While the bill remains highly controversial, I believe that it deserves the support of all Senators. I believe it will improve the competitive position of the United States in international trade, and I commend the passage of the bill, without amendments to which the Commerce Committee does not agree, to my colleagues.

The Senator from Hawaii (Mr. INOUYE) does wish to come over and deliver an opening statement. I would be happy to yield the floor to the Senator from Ohio, but we hope that the Senator from Hawaii's statement would be included in the RECORD prior thereto.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I thank the Chair.

Seven years ago the Senate Commerce Committee began the long and difficult task of maritime regulatory reform in an effort to revitalize the international segment of our merchant marine, when we first looked into the problem of illegal rebating. I am certain most of my colleagues are aware of what illegal rebating is all about. It is a secret form of rate war in which carriers surreptitiously, clandestinely, depart from the terms of their published tariffs on file with the FMC, and offer inducements and incentives that attract cargo to the detriment of their competitors.

In other parts of the world, illegal rebating may be called Kumshaw, or under-the-table payments, and this is what I am talking about, Mr. President.

Our liner trades operate on a come one, come all basis, inviting participation of foreign-flag carriers as cross-traders (that is, carriers of a nation(s) other than those of our trading partner in a given trade).

Since we are the largest trading nation in the world, our policy of freedom of access to our liner trades has attracted cross traders from all over the world. The result is our liner trades are overtonnaged and a climate conducive to rebating prevails.

Rebating can take many forms other than outright cash rebates. A carrier is, in effect, granting a rebate when it absorbs or pays for the cost of services which, under its tariff, would be paid by the shipper. Some examples are: Payment of the cost of inland transportation charges from the shipper's facility to the ocean carrier's terminal at the port; payment of the cost of inland transportation charges from

the ocean carrier's port terminal to the point of delivery to the consignee; free warehousing; or permitting unreasonable use of carrier equipment, for example, failure to collect container demurrage. Another form is payment of terminal charges that are the responsibility of the shipper or consignee, such as truck load-loading or unloading charges.

Obviously, rebate schemes in the U.S. liner trades are not designed to preserve a complete documentary record for posterity. They are designed to conceal the payment. In addition, deals can be consummated overseas where the chance of detection is slim at best. Accordingly, to eliminate rebating in our liner trades is a difficult task.

At the time we began our investigation into rebating in 1977, the FMC testified that it had evidence indicating a pervasive pattern of rebating in virtually all significant U.S. liner trades, and that it amounted to at least $100 million annually. Others estimated the amount to be at least five times that, a half a billion dollars. And that was in 1977.

There are those who say rebating is all right because it is the result of healthy competition. In fact, that is what the antitrust theorists are maintaining at this moment in this Chamber.

Let me repeat what an expert witness with 30 years experience in the real world of international shipping had to say about rebating (Manuel Diaz, president of Adherence Group, Inc.);

It results in unreasonable preference and advantage or prejudice and disadvantage, to shippers, ports, and other concerned interests.

It never benefits the consumer, and ultimately, must result in predatory competition leading to unbridled rate wars which will ultimately make it impossible for privately owned companies to continue to operate much less to replace their fleets.

In a nutshell, the result of illegal rebating, whatever its degree, is the enrichment of a few at the expense of the public interest and commerce between nations.

In addition to effects described by Mr. Diaz, illegal rebating posed additional problems for U.S. carriers vis-a-vis foreign-flag competition because there was an enforcement bias against the U.S. carriers.

In the case of foreign-flag carriers, their records, which were necessary to establish their illegal rebating, even when the FMC sought to obtain the records of a foreign-flag carrier, the agency was often confronted with a "blocking statute", which prohibited that carrier from turning over its records.

At the time of our investigation in 1977, according to the FMC, the United Kingdom, Belgium, Sweden, France, Finland, the Netherlands, the Federal Republic of Germany, Australia, and Norway had enacted such secrecy laws.

Mr. Diaz concluded by telling our committee that he did not think that the U.S. liner fleet had any future if our trades continued to be rife with rebating. He said he did not know "how any man in his right mind would invest one single cent in the building of U.S. vessels for the liner trade."

About 6 years later, it appears our liner industry's prospects for attracting investment have not improved, according to the statistics of the Council of American-Flag Ship Operators:

The consistent inability of the industry to earn a return on equity commensurate with other industries has weakened its ability to attract much needed capital investment. In comparison to other industry groups, the ocean liner industry is one of the poorest and most inconsistent in terms of return on equity:

Between 1976 and 1980, the industry has only generated a return on assets of between 0.9 percent and 6.1 percent.

During the same period, long-term debt increased from 0.76 of equity to 3.83 times equity. The ratio of current assets to current liabilities fell from 1.7 to 1.3.

The liner industry's return on equity in 1979 was less than one-fifth the all-industry average, in 1981 it was less than half and over the last 5 years has never been greater than two-thirds of the all industry average.

In any event, when the committee began its investigation in 1977, rebating was one of the major afflictions in our liner trades. The following year we strengthened our laws dealing with the problem, and provided, among other things, tariff suspension if a carrier failed to comply with an FMC request for records in an investigation into rebating.

Then, 2 years after we enacted that law, the FMC testified that the problem had greatly improved.

In the same year—1977—the committee began looking into the problem of rebating, it renewed earlier efforts to deal with the rate-cutting practices of State-controlled carriers—chiefly the Soviets—who were operating as cross-traders in our trades. These rate-cutting practices not only threatened to destroy legitimate competition in our foreign commerce, they put the survival of our merchant fleet in jeopardy.

By 1977, Soviet penetration of U.S. liner freight routes had grown substantially since 1971. From a relatively insignificant penetration level of 0.3 percent in 1971, the Soviet merchant marine had increased its share of the U.S. commercial liner cargo market to 3.4 percent as of the first 9 months of 1977. This represented a tenfold increase in the Soviet's market share during the 6-year period.

The Maritime Administration projected that by 1986 Soviet-flag ships would be hauling some 6.6 percent of our liner cargoes.

Our committee felt there was ample reason to infer that Soviet carriers cross trading in our liner trades were doing so at rates below the cost of commercially motivated carriers for noncommercial purposes such as an accumulation of hard currency, military, and political objectives. To put it in simple language, the Soviet fleet has no chief executive officer, board of directors, chairman of the board, and, most importantly, no stockholders.

The Soviet merchant fleet is part of their naval fleet. It is run by admirals, not by civilians, as you will find in the United States. Profit is not their motive. Their motives and objectives are military and political, so they are able to cut rates below cost to attract cargo.

Some of the more striking examples of rate cutting cited at our hearings in 1977 included: First, imported shoes from North Europe with a 44-percent rate variance; second, commercial household goods from the United States to Europe with a 33-percent rate variance; third, textile machinery from the United States to Europe at a 42-percent rate variance; and fourth, rattan furniture from the Philippines to the United States at a 31-percent rate variance.

Another instance concerned Lykes Bros. Steamship Co., and involved the shipment of buses—purchased by the Urban Mass Transit Administration—moving from Germany to Houston which was carried by the Soviet carrier Baltic Shipping Co. at rates well below those quoted by Lykes for the same shipment. Lykes had quoted a lash barge load rate of $20,000, which equals approximately $6,500 per bus. Baltic Shipping Co., however, quoted a rate approximately 55 percent lower, about $3,500 per bus.

As a result of investigation into the rate-cutting practices of the Soviets and other state-controlled carriers, Congress enacted legislation strengthening the provisions of the Shipping Act 1916, by giving the FMC power to regulate those practices. Among other things, that law prohibits these carriers from maintaining rates or changes in their tariffs which are below a level that is just and reasonable; and gives the FMC power to suspend their tariffs.

Again, as in the case of our laws against illegal rebating, the problems caused by the practices of these state-controlled carriers are substantially less.

Around the time our committee began looking into maritime regulatory reform, the Antitrust Division of the Department of Justice conducted its own study of the regulated ocean shipping industry. That study proposed repeal of the Shipping Act, which included abolition of tariff enforcement by the FMC, as a way to increase competition in ocean shipping.

Dr. Diaz, whom I have mentioned, testified before our committee that:

The test tube "free market" philosophy espoused by the Department of Justice in

their recently completed "study of the regulated ocean shipping industry" is singularly dangerous. By advocating repeal of the Shipping Act, so that steamship carriers in the foreign commerce would be regulated under U.S. domestic common law of common carriers and U.S. antitrust laws, the Department of Justice gives clear evidence of a thorough lack of sensitivity and, indeed, of understanding of the world outside its judicial laboratory. Our major trading partners have shown that their philosophy with respect to world liner shipping works infinitely better than ours. If this committee does no more, it should repudiate the proposals of the Department of Justice, however well intentioned those proposals may actually be, especially if you wish to save U.S.-flag liner shipping. If you don't believe me, take a look at what the "free market" philosophy has done for the U.S.-flag bulk carrier fleet.

I have been talking about the type of competition that the Department of Justice would like to have.

There have been times when I looked upon the activities of our agencies with disbelief, Mr. President.

I remember once the FMC subpenaed a Soviet shipping company, because it believed that the Soviets were not complying with some of our shipping laws.

Well, Mr. President, one agency filed an amicus curiae, not on behalf of the FMC, but in support of the Soviet position, saying that the Soviets are sovereign, and we have no business touching them.

Guess who that agency was. The very agency that says; "Wipe out the FMC." The Justice Department.

We have asked the Justice Department. "How often have you investigated consortia or combinations of foreign shipping companies for antitrist activities?" The Department had to tell us, "Never." They have only investigated consortia where U.S. flags were involved.

Well, Mr. President, I could go on and on. I am surprised at the GAO report that says we are in great shape. If great shape means carrying less than 4 percent of our foreign cargo, then I do not know what bad business is all about.

Before I close, Mr. President, I would like to just cite one experience.

Events proved that with enactment of the Controlled Carrier Act and the legislation strengthening our laws against illegal rebating, Congress has made a start toward correcting the abuses that threatened our foreign commerce and the viability of the U.S. merchant marine. Essential to that success were retention of the requirement for tariff filing and the strengthened enforcement powers given the FMC. Tariff filing and enforcement were necessary tools to stabilize our trades because our open trade policy attracted so many cross traders, overtonnaging was the inevitable result. In the words of a distinguished former Chairman of the FMC, Karl E. Bakke,

Political freedom begat freedom of seas; freedom of the seas begat freedom of access; freedom of access begat overtonnaging; and overtonnaging begat rebating.

Similarly, the lucrative nature of our trades, and the free access to them without virtually any protection against predatory practices, invited the Soviets to come in as cross traders for their national political purposes.

It may interest Members to know that even now, according to statistics I have seen, foreign flags carry over 30 percent of U.S. mail. These foreign-flag carriers include state-controlled lines such as Polish-Ocean Lines. Most other countries reserve their postal cargos for their own flagships as a matter of commercial practice.

Mr. President, during the past few days the Senate has heard a good deal of untested economic theory to the effect that more and freer competition will benefit our foreign commerce. The principal means for achieving these goals would be the abolition of tariff enforcement. The very tool which has helped correct the anticompetitive abuses which were rampant in our trades. But the arguments are based on just that—untested theory.

Our recommendations, however, are the result of 7 years of comprehensive investigation, supported by extensive testimony of those who have spent their lives in the real and practical world of international liner shipping.

The threat to our merchant marine is grave and it is immediate. Should its deterioration continue, the day may soon come when we will have to rely on the Soviets and other foreign flags to carry our exports and imports. In that sad event, it will be an easy matter for Mr. Andropov to say:

We don't agree with your policy in the Middle East, and we have therefore directed our vessels not to call at your ports.

Should anyone think this is an exaggeration, he need only recall the instructions the Liberian Government gave its flag vessels during the Yom Kippur war. They were prohibited from carrying oil to Israel for fear of offending the Arab countries.

But the U.S. merchant marine is also our fourth arm of defense. It was vital in World War II, the Korean war, and Vietnam. The Senate may recall that many of our allies refused to carry our cargo to Vietnam because they did not agree with our policy.

What will happen in the event of war or a national emergency if we have no merchant marine to call upon?

During the Falkland Islands crisis when ocean transport for troops and material was essential, the British had the *QE II* and other passenger vessels available. And according to statistics I have seen, the Soviets have over 70 troop transports available.

What is our situation at the moment? The military Sealift Command has had to charter foreign-flag vessels which have been reflagged United States, to supply our Rapid Deployment Force with arms and equipment.

Whereas, according to MarAd, we had 54 vessels capable of carrying troops in 1950, and 40 in 1960, today we have only 2. And those two are in the Pacific Ocean cruising around my State of Hawaii.

Mr. President, I ask the question, even if we were willing to risk the present and future welfare of our foreign commerce on untested economic theory, are we also willing to subject our national security to the same risk?

Our passenger fleet and our dry-bulk fleet are virtually nonexistent. The following statistics of the Council of American-Flag Ship Operators gives further evidence of the decline of the U.S. fleet:

The number of U.S. general cargo vessels declined from 523 in 1970 to 256 in 1980.

Relative size of the U.S. fleet declined from first in the world in 1950 to eighth in 1979.

Between 1971 and 1976 the U.S. general cargo fleet declined in GRT's by over 35 percent, from 8,462,000 to 5,490,000. During the same period, the Soviet fleet increased by over 25 percent, from 6,202,000 to 7,796,000.

The number of U.S. companies declined from 19 in 1970 to 9 in 1981. Of the nine, three are currently in serious financial difficulty.

In 1956–60, the U.S.-flag fleet carried 35.8 percent by value and 33.1 percent by weight of U.S. liner cargoes. The data utilized by GAO showed that by 1978, this had declined to 30.1 percent and 29.9 percent, respectively. GAO believed this indicates stability of U.S.-flag market share. However, more recent information shows this trend has continued, with data for 1981 showing a decrease to 27.6 percent by weight and 28 percent by value.

Mr. President, 2 days ago my distinguished colleague, the senior Senator from Louisiana, explained at some length why there was nothing hurried, secret, or sinister about the legislative process leading up to the Senate's consideration of S. 47.

He also explained quite convincingly, in my judgment, that international liner shipping is different than other modes of transportation, and must therefore have a limited exemption from our antitrust laws if the shipping public is to receive efficient, reliable service at fair prices. For these reasons, enactment of S. 47 would not, as some of its critics have alleged, "allow our free enterprise system to be picked to pieces by industry-by-industry efforts to escape competition."

The senior Senator from Louisiana also said that as we debate S. 47, it will become evident that much of the criticism is without substance.

At this point, Mr. President, I would like to address myself to some of the specifics of that criticism, and explain why I feel it is unwarranted.

Allegation. The proposed bill would expand the limited antitrust immunity now enjoyed by the ocean common-carrier industry into complete immunity from antitrust laws.

Fact. As reported by the Senate Commerce Committee, S. 47 would extend antitrust immunity only to concerted activity that is:

Pursuant to an agreement that has been filed with the Federal Maritime Commission (FMC) and is actually in effect subject to stringent standards of fairness set forth in the act;

Pursuant to an agreement concerning activity that has been expressly exempted by the FMC, after notice and hearing, from the filing requirement of the act as having de minimis anticompetitive consequences;

Believed in good faith to be pursuant to an effective or exempt agreement. Participation in "secret" anticompetitive agreements would continue, as now, to be subject to criminal sanctions under the antitrust laws. It should also be pointed out that under S. 47, the civil penalties for violation of the Shipping Act could amount to as much as 10 times the fine for the same conduct if subject to the antitrust laws.

Allegation. S. 47 would eliminate the FMC's authority to disapprove conference agreements that are not in the public interest or are detrimental to U.S. commerce.

Fact. S. 47 carefully catalogs, in a section entitled "Prohibited Acts," the kinds of agreements or activities that experience has demonstrated to be contrary to the public interest or detrimental to the foreign commerce of the United States.

If, upon complaint of a private party and after a preliminary hearing, the FMC determines that a filed agreement is likely to lead to one or more prohibited acts, there is provision in the bill for suspension of the agreement pending the outcome of a formal investigation that may lead to disapproval. If disapproved, parties to the proposed agreement have full exposure to the criminal sanctions of the antitrust laws should they nevertheless implement the agreement. Moreover, the bill expressly empowers the FMC to maintain continuing surveillance of implemented agreements and to modify or cancel any that are found to be operating in violation of the stringent and objective standards of fairness expressly required of such agreements.

Allegation. S. 47 would preclude parties injured by agreements and who successfully prove antitrust violations from recovering treble damages, as would be permitted by existing antitrust laws.

Fact. Parties to "secret" agreements or activity not reasonably believed to be within the scope of an agreement that is in effect pursuant to the act would continue to have criminal liability under the antitrust laws. While S. 47 would allow parties injured by violations of the Shipping Act to recover only the amount of actual damages suffered, rather than treble damages, that is fair to all concerned.

Treble damages under the antitrust laws are not intended to be compensatory; rather, the "treble damage" provision of the antitrust laws is a deterrent feature, which is mild by comparison with the liability exposure of one who violates the Shipping Act prohibitions—action that could lead to 10 times the criminal fine under the antitrust laws. The difference is that under S. 47, the injured party would be made whole, and the U.S. Treasury would benefit from the penalty assessment, whereas under the antitrust laws the consumer who may have suffered some injury reaps a windfall and the U.S. Treasury is usually a net loser in cost/return ratio in litigation.

The attached hypothetical illustrates that penalties for violations of S. 47 are potentially 10 times greater than Sherman Act criminal fines and 1916 act civil penalties combined.

HYPOTHETICAL

Assume facts which clearly violate both the current Shipping Act, 1916, and the Sherman Act and assume that the same facts violate S. 47:

A and B are competitors in the liner trade. They serve the same multiple ports. They agree to an allocation of ports, to an allocation of customers and to maintaining prices at artificially high levels.

A and B implement their agreement without filing it with the FMC and operate under the unfiled unapproved agreement for 2 years before it is discovered.

Under a one-count Sherman Act indictment, each would face a maximum fine of $1,000,000.

Under S. 47, the penalty for an unaggravated violation of the statute would be up to $5,000 per day. In this hypothetical, the violation would probably be found to have been willful and knowing—bringing the maximum civil penalty to $25,000 per day for each carrier: a total of $18,200,000 each versus the $1,728,000 under the Sherman and 1916 acts combined.

Allegation. S. 47 would permit the formation of shippers' councils—federations of shippers authorized to bargain with the conferences over rates, services, and so forth.

Fact. S. 47 allows conferences only to consult and confer—not "bargain"—with shippers' councils concerning general rate matters and services. This authority is consistent with the long-established and mutually beneficial consultation procedure between shipper groups and conferences in all other major maritime nations and trades, and merely brings the United States into legal conformity with the "real world" of commercial relationships in liner shipping matters. In fact, section 15 of the present Shipping Act requires conferences to "adopt and maintain reasonable procedures for promptly and fairly hearing and considering shippers' requests and complaints," but giving full effect to that requirement has not been possible because of antitrust concerns shared by shippers and carriers alike. S. 47 would make effective consultations of this sort possible, but at the same time imposes specific restrictions and requirements on shippers' councils to insure that antitrust immunity is limited to concerned activity relating only to transportation in the import or export trade. There is full exposure to liability under the antitrust laws for shipper activity that violates antitrust constraints applicable to domestic commerce, or activity other than what invoives transportation-related matters in the foreign trade.

Allegation. S. 47 would virtually free the industry entirely from Government oversight and regulations.

Fact. Government oversight and regulation is the pervasive theme of S. 47; streamlining and simplifying those processes are its principal objectives. The ocean common-carrier industry would still be subject to substantially more restrictive Federal oversight and regulation than its counterpart modes in domestic inland rail, motor, air, and water transportation.

[Note: It should be recognized that under S. 47, the role of the Department of Justice is substantially reduced, and that the FMC will be doing the "oversight and regulation." Critics say such reliance on the FMC is not justified by its record. On the other hand, those who stand to be injured (shippers, ports, etc.) support S. 47, and are therefore satisfied with its regulatory regime.]

Allegation. S. 47 would lead to higher rates for shippers, and therefore consumers. Recent experience shows that rates could rise as much as 20 percent a year, leading to $3 billion per year annual cost increases to consumers.

Fact. This argument was advanced in the committee hearings by an economist (Dr. Ferguson) as a guess (see responses to questioning in the hearing before the Senate Commerce Committee on February 2). The fact is, objective studies by a major carrier in the U.S. North Atlantic-Europe trade (Hapag-Lloyd) and independent research organizations familiar with economics of the industry have demonstrated with solid statistical data that rationalization of services could reduce ocean transportation costs by as much as 30 percent. The dictates of the marketplace would mandate that a significant portion of this saving be passed on to the shipper—and consumer—in the form of: Lower rates on individual commodities, less frequent escalation of particular rates, greater intervals

between general rate increases, or all of these. This result would be particularly to be anticipated if shippers' councils are permitted to engage in the consultations with conferences contemplated in S. 47.

Allegation. S. 47 would primarily benefit foreign carriers since 72 percent of conference membership is made up of foreign carriers.

Fact. This bill would benefit the U.S. merchant marine more than the foreign carriers in our trade because it would allow our carriers to do what their competitors now do without constraint of U.S. domestic law. For example, the formation of joint ventures and consortia to rationalize utilization of vessels, shoreside facilities, personnel, cargo solicitation, and ancillary services. The very fact that the U.S. liner fleet now carries only about one-fourth of our own foreign trade is reason enough, both as a matter of national pride and of critical national interest, to take steps calculated to give our flag fleet a fighting chance to compete fairly in the marketplace on a commercial basis. S. 47 is intended to provide that opportunity.

Allegation. S. 47 will lead to increased unemployment in the industry.

Fact. Any measure that strengthens the competitive position of the U.S.-flag merchant marine, as this bill would, can only ameliorate the present plight of U.S. seamen and licensed officers. Graduates of our Merchant Marine Academy at Kings Point and its sister State institutions now are having to seek foreign employment, both initially and even after U.S. service, to gain experience necessary to upgrade their tickets. This has profound negative implications for both the quality and dedication of those responsible for our supply lifeline in time of national emergency, whether at home or abroad. S. 47 would be a positive step toward bringing our U.S. merchant marine resources back under domestic control.

Allegation. S. 47 will reduce the numbers of ports served by shippers.

Fact. Shippers are cost conscious, and there is nothing in S. 47 that would induce shippers to make any decision regarding port of entry or exit of shipments that they could not already make under present law. Indeed, S. 47 is supported by U.S. ports themselves.

Allegation. Shippers' councils will likely benefit large shippers at the expense of small shippers.

Fact. That is not the view of the National Industrial Transportation League concerning S. 47, or of testimony on prior legislation by representatives of the Secretariat of the European National Shippers' Councils. Concern about abuse of the "cartel versus cartel" consultation process is based on lack of comprehension of how that process works in the real world. The parties are not concerned about particular commodity rates—that is a matter customarily resolved between the conference and an individual shipper—but rather about general rate increases, adjustment surcharges—currency, bunker, congestion (demurrage), war risk, et cetera—and integrity of tariff rates. Those issues affect all shippers, regardless of size.

Allegation. According to the GAO report, the industry does not need legislation such as S. 47.

Fact. The GAO report in question—PAD-82-11; July 2, 1982—came nowhere near that unqualified conclusion. The full text of the GAO statement reads:

> Thus, it appears that the U.S. flag liner fleet is not in a state of general distress significant enough to justify a major revision of the Shipping Act.

Moreover, a fair reading of the entire report reveals that GAO carefully straddled the issue of revisions in the Shipping Act, concluding that there were merits both pro and con and inviting the Congress to sort them out. Indeed, on the issue of weakening versus strengthening the present limited degree of antitrust immunity available to conferences under the Shipping Act, GAO stated:

> Thus, while the first alternative may be preferable on economic grounds, certain diplomatic costs are associated with it that are not present in the second alternative. Since it was not possible for us to weigh these economic and diplomatic costs against one another, *we could not reach a conclusion as to which alternative was preferable.*

Allegation. The GAO report found that the average annual U.S.-flag share of U.S. liner cargo actually increased from 1966-70 to 1976-78.

Fact. Apart from the distortion introduced by carriage of military cargo during the Vietnam involvement in the comparison made by GAO, the fact is that the U.S.-flag share of this Nation's liner trade since 1976 has been declining steadily—from 31 percent in 1976 to 26 percent for the first 9 months of 1982, and heading further downward.

Allegation. According to the GAO report, the U.S.-flag liner fleet is in no chronic distress attributable to the Shipping Act.

Fact. Testimony by carriers, shippers, and consumers during consideration of several measures in the 95th Congress; consideration of S. 2585 and the omnibus shipping bill in the 96th Congress; the Shipping Act of 1982 in the 97th Congress—H.R. 4374; S. 1593—and the Shipping Act of 1983 in this Congress—S. 47—clearly establishes the contrary.

Moreover, it is instructive to read the full text of the GAO statement from which this single sentence allegation was extracted:

> Our review certainly did not indicate that the U.S. flag fleet is in any general chronic distress attributable to the Shipping Act. Of the eight defunct companies considered, a majority offered service on only one trade route at the time they were either acquired by other liner companies or ceased operation. This suggests that, in the future, successful liner companies may be those that are larger, multi-route operations. *As advances in containership technology produce even larger, more costly vessels, the continued successful operation of the fleet may require that U.S. flag companies form consortia similar to those formed by Japanese companies. These arrangements, in which capital resources are pooled, would enable U.S. operators to acquire the equipment needed to compete effectively against foreign flag consortia while still retaining the possibility of interline competition.*

Facilitation of such developments is precisely what S. 47 seeks to accomplish.

Allegation. FMC authority over tariff filing and enforcement should be repealed because it is unnecessary; introduces substantial inefficiencies in conference rate setting; and requires the U.S. Government to police and therefore support conference agreements. Moreover, the carriers can police themselves through neutral bodies.

Fact. Tariff filing and enforcement is an essential tool if we are to insure that all carriers in our trades compete equitably and fairly; and that all shippers are treated on a nondiscriminatory basis. Given the fact that we are the largest trading nation in the world, and that our trades are badly overtonnaged, there is the ever present temptation to illegally rebate to attract cargo.

Statutory tariff enforcement authority is important because the act prohibits secret rebating. By its very nature, rebating can and does involve sophisticated techniques using dummy bank accounts, corporate shells, and other devices that can be investigated effectively only with government-to-government cooperation.

Statutory tariff enforcement authority is important because the act prohibits shippers from obtaining or seeking to obtain ocean transportation at less than published tariff rates. If statutory sanctions against shipper violations are eliminated, this prohibition is meaningless. And if shippers are to remain subject to statutory fines and penalties, it is inequitable that the other party to an illegal transaction—the carrier involved—should not be subject to the same sanctions.

Statutory tariff enforcement authority is important because the act presently requires an effective tariff to be on file in order for a carrier to operate in the U.S. trades. If there is no requirement that carrier adhere to its tariff, the sanction of tariff suspension for egregious violations of the act becomes meaningless because even if the

right to use a tariff may be suspended—as proposed by the Judiciary Committee—there is noting to prevent an independent carrier merely from continuing to do business by ignoring its tariff or to prevent a conference member denied the right to use the conference tariff from resigning and filing a pro forma tariff that it then proceeds to ignore.

Although the "antidiscrimination" provisions of S. 47 may well protect shippers from prejudice arising from carrier departures from a published tariff, the same cannot be said for conference carriers that are prejudiced by failure of an independent carrier to observe its published tariff, or vise versa.

Without a mandate of tariff adherence, the "antidiscrimination" provision of S. 44 becomes a nightmare to enforce, because departure from the published tariff in a given case could no longer be viewed as a prima facie case of discrimination. The burden of proof would be shifted to the party alleging discrimination to show damage.

With respect to conferences, neutral body policing is a useful supplement to statutory tariff enforcement authority because it reduces the degree of government involvement in commercial matters and the administrative burden on the Federal regulatory agency. However, it is not a satisfactory alternative to Federal regulation, because the neutral body does not have access to compulsory process for access to investigatory information nor does it have recourse to diplomatic intervention where essential information located abroad is protected by "blocking statutes."

With respect to independent carriers, neutral body policing is not required. Absent statutory tariff enforcement authority, there would be no check at all on their tariff adherence.

With statutory tariff enforcement authority, the penalties for violations of tariff adherence requirements can be set by statute at a punitative level for all carriers. There is no assurance that as a contractual matter, under neutral body policing alone, a conference would be as stringent, given the commercial reality that in overtonnaged trades—which are prevalent in U.S. foreign commerce—rebating and other malpractices may be viewed as a competitive necessity—and even a matter of survival—for some carriers, given no comparable statutory constraints on independents. On the other hand, whatever the level of neutral body sanctions for tariff violations by conference members, independents would be undeterred from violations because of total lack of required supervision by any body.

Finally, I would say, Mr. President, that the attempts being made by some of our colleagues to weaken the Federal Maritime Commission, to take away part of the tariff regulations, will not only weaken our fleet; they will wipe it out.

So, Mr. President, with those words of sadness, I yield the floor.

(Mr. ABDNOR assumed the chair).

Mr. GORTON. Mr. President, I thank my distinguished colleague, the Senator from Hawaii (Mr. INOUYE) for his eloquent opening statement.

Mr. President, the Senate has before it now the first in a series of amendments which will be offered by the Senator from Ohio (Mr. METZENBAUM). This one is very simple in its phraseology. It strikes only the words, "through rates" and "through transportation," from the section of the bill dealing with intermodal rates. It is an ill-conceived amendment which would hurt not only the ocean common carriers of the United States and their trading partners but, most particularly, people who are in the business of both importing and exporting goods to and from the United States.

Obviously, Mr. President, the entire business of ocean transportation of goods has changed significantly since 1916. One of the most important of those changes has been the advent of intermodalism—that is the use of the same containers but on various modes of transportation such as ship and road. The advent of intermodalism has caused a serious problem which threatens the efficiency of our liner services to the detriment not only of conferences but of shippers.

In the late 1960's, the technical innovation of containerization made possible new economies of scale and thus promised the potential for substantial reductions in real costs to vessel operators and shippers. As a consequence, containerization became rapidly established on the most important U.S. trade routes. The full benefits of containerization can only be realized, however, when a container moves between shipper and consignee or between inland consolidation centers without breaking bulk. Under these circumstances, additional economies are derived from the speed with which intermodal transfer takes place, from savings in the labor and "storage" costs associated with this process, and from cost reductions in packaging and insurance as well as substantial reduction in damage and pilferage claims. The Federal Maritime Commission has approved conference agreements which authorize intermodal rates.

The Department of Justice, however, has taken a position contrary to the Federal Maritime Commission, claiming that the Commission has no authority to approve conference agreements providing for the fixing of through intermodal rates and that such agreements therefore violate the antitrust laws. This uncertainty regarding antitrust immunity inhibits conferences in U.S. trades from agreeing among themselves on the charge to quote shippers who choose to use conference facilities for the inland leg of a foreign door-to-door movement and it clearly frustrates the growth of an innovative, efficient, and economical transportation service.

It is to make certain that the Federal Maritime Commission can approve just such agreements that the section which the Senator from Ohio seeks to strike is included in S. 47.

Right at the outset of this debate, Mr. President, this amendment illustrates a lack of knowledge of the real world of the transportation of goods. Simply speaking, no one would be benefited by the passage of this amendment of the Senator from Ohio. He would continue a system in which there is great confusion in American foreign trade. He would continue a system in which only lawyers are enriched. He would continue a system which is very much to the detriment of both major and minor importers and exporters of the United States.

We need to encourage and not to discourage intermodal transfers of goods to and from the United States of America.

The Senator from Ohio claims that this could somehow be used to allow railroads, or perhaps common carriers such as trucks, to avoid antitrust actions and to gain antitrust immunity and to raise prices on what are essentially domestic trades. He raises the specter of using an ocean common carrier for a very short portion of what is essentially domestic trade and, somehow or other, greatly raising the rates for that trade.

Besides the logical inconsistency of that position, I must point out the fact that this act only applies to international trade. Somehow or other, the Senator from Ohio must believe that a domestic carrier by land would somehow find it economical to take his goods to an American seaport or to a foreign seaport, I would suppose, put them on a ship, take them off a ship a short distance later in an American seaport, repack them, send them by land to their ultimate destination. Somehow or other, the Senator from Ohio believes it would be economical for a carrier to do this because he would be able to fix prices on the ocean transportation of those goods, he would hurt consumers, and he would create a monopoly or an antitrust violation where one could now successfully be prosecuted by the Department of Justice.

Simply to describe the complexity of this kind of system and its overwhelming expense indicates that it, of course, will never happen. Anyone who tried it would immediately find himself in ruinous competition with a

normal carrier of goods in our domestic trades.

In addition to that, it is even in error, conceptually, and in illustrating that point I wish to read from the bill:

> This act applies to agreements by or among ocean common carriers to * * * work on various matters including through rates and through transportation.

In other words, this does not increase or create in any respect whatsoever antitrust immunities on the part of railroads or trucking firms in the United States. What it does allow is a conference made up of ocean carriers to get together and to create intermodal rates or through rates for the entire carriage of goods from, say, Europe to an internal point in the United States. This is something which they can do in almost every other part of the world, something which will save money not only for them but for their customers, the shippers of various goods. It does not add to the independent authority of land carriers whatsoever. It is in every respect an important part of the bill. It is important not only for American-flag carriers but also for all of the shippers in the United States. It should be rejected as ill conceived and detrimental to the commerce of the United States.

Mr. STEVENS. Mr. President, I support S. 47, the Ocean Shipping Act of 1983, a bill to revise regulation of international liner shipping operating in the U.S. foreign commerce.

After years of hearings and debate, this long-awaited legislation will bring U.S. regulation of international ocean-borne commerce into the 1980's—this change is sorely needed.

The Shipping Act of 1916 cannot accommodate the radical changes that have taken place in both international and domestic economic and political environments. First, the Ocean Shipping Act of 1983 responds to the need to achieve comity with our trading partners in regulating ocean commerce. This is accomplished by clarifying the antitrust immunity that is extended to international ocean liner conferences. Essentially, the rules of the game are better definded and more consistent with international practices.

Second, in clarifying the scope of the antitrust immunity, the legislation serves to better balance the burden of fear of prosecution under U.S. antitrust laws. Existing law weighs heavily on American interests while foreign liner operators, under the protection of their governments, have little or nothing to fear from enforcement of U.S. antitrust laws. It is high time that we act to correct the unfairness of this situation by making the rules the same for everyone in the liner shipping business.

Third, this bill deregulates sensibly. By eliminating the costly and time-consuming preapproval review of commercial agreements by the Federal Maritime Commission, private enterprise can more quickly respond to a changing international marketplace. Elimination of unnecessary intervention by the Federal Government in commercial activities is a primary objective of S. 1593, and is consistent with the Commerce Committee's desire and the Senate's wish to improve the performance and productivity of Government agencies. Ths bill also reduced the wasteful, needless, and confusing dual jurisdiction between the Federal Maritime Commission and the Department of Justice. Predictability in the enforcement of our maritime statutes has been wanting of late. Unfortunately, this has caused increasing friction among our trading partners and uncertainty in the industry, the tremendous costs of which are not easily measured.

Finally, the passage of S. 47 will begin an era of prosperity for U.S. exports. No one here can argue the importance of increasing the export of U.S. goods and products to foreign markets. The health and welfare of the American economy depends on sustaining growth in this area. The key to growth is in creating an environment conducive to shipping U.S. goods abroad. This important legislation is a critical step in that process. As the bill took shape, compromises reached between the export shippers and the ocean carriers assured that commercial flexibility is at the heart of this legislation. In providing for service contracts, including time/volume rates, and independent action, this legislation allows U.S. shippers to exercise considerable flexibility in arranging favorable terms for the carriage of U.S. products to foreign markets. This means that U.S. goods will be more competitive in foreign markets. Export growth will follow.

Furthermore, American interests will be better able to capitalize on the efficiencies of intermodalism by clarifying regulatory jurisdiction of such cargo movements. Dual intermodal jurisdiction between the ICC and FMC is harmful to U.S. foreign commerce and needs to be eliminated. This Nation can no longer afford to not take full advantage of advances in intermodal technology and the commercial opportunities that follow.

Even beyond the strong support of the many and diverse elements of the maritime industry, this legislation has widespread support from other areas as well. Our Nation's ports have endorsed this bill. Shippers, both large and small, believe this bill would result in lower freight rates and more flexible service. The overwhelmingly favorable vote on a similar bill last year in the House of Representatives—350 in favor to only 33 opposed—is further evidence of the worth of this legislation. The issue clearly enjoys bipartisan support.

This legislation is sorely misunderstood. The bill is fundamentally a long step toward deregulation. It provides U.S. enterprise with greater freedom and flexibility to better compete in a dynamic international marketplace. It clarifies the scope of antitrust immunity clouded by years of piecemeal court decisions and regulatory zeal.

The need to change the way we regulate international maritime trade is long overdue. S. 47 is a good start and I urge my colleagues to vote in favor of this measure.

● Mr. PACKWOOD. Mr. President, as chairman of the committee that has oversight over a number of transportation modes, I am pleased with the product now being brought before the Senate and urge its passage.

The Shipping Act of 1983 is unusual in that it represents for the most part a consensus of carriers and shippers—those who provide ocean shipping services and are seeking to maximize income, and those who are consumers of that service seeking the lowest cost ocean transportation. For this reason, I feel comfortable that the Senate Commerce Committee has reported out an excellent piece of legislation.

At the end of World War II, U.S. ships carried the most of U.S. goods moving in foreign commerce. Today, roughly 25 percent of these goods move on U.S. ships. In other words, U.S. carriers receive only $4.5 billion of the $15 billion freight bill paid by U.S. producers to move $200 billion of U.S. goods on liner ships.

A major reason for U.S. carriers' diminishing role in ocean commerce is our outmoded and complicated system of Federal regulation, which has been more heavily enforced against U.S. carriers than their foreign competition and imposed operating restrictions inhibiting their ability to respond to changing market conditions and to best serve shippers' needs.

S. 47 is a long-overdue update and recodification of these laws. Its intent is to clarify this antiquated and highly technical statute (the Shipping Act, 1916) to reflect today's commercial needs and requirements.

By streamlining the regulatory review process and by increasing opportunities for marketplace competition, many federally imposed barriers, which helped to inflate transportation costs, will be removed. Once these barriers are removed, the marketplace's competitive forces should aid U.S. producers and carriers in their efforts to contain and reduce ocean transportation costs.

A recent General Accounting Office study on the need for maritime regulatory reform also recommends eliminating these Federal regulatory barriers. It offered two options for doing so.

The first would require uniform enforcement of our antitrust laws. This proposal is unworkable because many of our trading partners have passed laws prohibiting antitrust actions against their citizens. The second called for complete deregulation. While S. 47 does not provide for total deregulation of the maritime liner industry, it goes a long way toward achieving many of the reforms recommended in this study.

In short, S. 47 is a regulatory reform bill which streamlines Federal regulation and which assists U.S. carriers and U.S. producers in their efforts to compete effectively in world trade. It changes Federal law to recognize more than 60 years of technological progress and innovation.

I. LEGISLATIVE HISTORY

S. 47 has its genesis in legislation studied and debated in both the Senate and House of Representatives in each of the past 5 years. As of today a total of 68 days of hearings have been held in the two Houses of Congress since 1977 on the issues addressed by this bill. Over that period testimony has been received from hundreds of witnesses, and compiled in many volumes of records. The ample record has established the need for maritime regulatory reform

In the 96th Congress, the Senate unanimously passed a bill which was quite similar to S. 47. Last year, the House passed a similar bill by a vote of 350 to 33. Senate consideration was prevented by a filibuster threat during the closing days of last session.

A hearing concerning S. 47 was held on February 2, 1983. Even though the vast majority of parties which would be affected by reform of ocean liner shipping regulation have voiced strong support for legislation, such as S. 47, the committee sought out opponents of the bill to testify at the hearing, so that they might have equal time to present their position.

Opponents of the bill had claimed that its enactment would raise shipping rates by as much as 20 percent. This figure was never substantiated. On the contrary, the committee received testimony from shippers who will actually have to pay the tariffs, that enactment of S. 47 could well reduce ocean shipping rates.

Despite testimony that the effect of the bill would be to harm small shippers, small shippers themselves testified that S. 47 would help them obtain better ocean transportation service at favorable rates.

A position paper of the representative Association of American Ports countered claims by one witness that the bill was inimical to ports' interests.

The committee heard suggestions that penalties under the Shipping Act were insufficient to discourage prohibited activities, and were substantially less than antitrust treble damage penalties. This was rebutted by presentation of a comparison of potential penalties as calculated under the antitrust laws as opposed to the significantly higher penalties that can be assessed by the Federal Maritime Commission under S. 47.

Substantial written comment was received from various shipper organizations. These focus on the need for oversight over pooling arrangements and joint ventures, the restriction of antitrust immunity to these agreements approved by the Federal Maritime Commission, prohibiting the allocation of shippers among conference carriers, the need for new authority provided in S. 47 for shippers and carriers to develop time-volume rates and service contracts, and the burden of proof regarding exceptions from loyalty contracts.

In addition, the committee adopted a revision of existing law in order to more effectively prevent exclusion of U.S.-flag carriers—and consequential increased cargo rates—by foreign nations or carriers.

Confident that with these changes the bill would benefit both carriers and shippers, the committee unanimously ordered S. 47 reported on February 15, 1983. In order to allow Judiciary Committee consideration, the committee also ordered that an original bill, identical to the S. 47 as reported by the committee, also be reported to the Senate. This original bill, S. 504, was reported on February 17, 1983 and referred to the Judiciary Committee.

II. ANTITRUST IN INTERNATIONAL OCEAN SHIPPING

I would like to say a few words about our antitrust laws and fair trade in world commerce. I and other sponsors of this legislation are strong proponents of antitrust as means of maintaining competition in our free enterprise system. Thus, it might appear to the most casual observer that there is inconsistency in the unanimous support of the Senate Commerce Committee for S. 47. There is not.

Domestic rules of competition may work at home and fully justify recent deregulatory approaches to trucking, rail, and domestic aviation, but they have been proven, not to work in international liner shipping.

These are international trades. The U.S. companies are only a few of many participants in these trades. To compete successfully, the U.S. participants must be able to play by similar rules. Since the United States does not have jurisdiction over the entire industry as we do in trucking, railroads, bottle manufacturing, steel, and so forth, we cannot make all the rules. If we try, we cannot enforce them. Our antitrust laws are not recognized abroad. England, for example, has passed blocking statutes to protect their companies from extraterritorial application of U.S. law.

Most of the regulatory problems and many of the competitive problems facing our industry are due to the intrusion of U.S. antitrust laws in an arena for which they are not designed—international commerce. Thus, it is the primary thrust of Congress this year to more closely conform domestic law with that of our foreign trading partners.

Unequal enforcement has hurt American carriers. The Department of Justice has generally not opposed consortia and joint service arrangements where all the parties were foreign-flag carriers. But it has opposed such agreements where one or more of the parties were U.S.-flag carriers.

The Justice Department has also adopted a double standard in seeking penalties for conduct already penalized by the Federal Maritime Commission. It has sought additional penalties under conspiracy statutes against U.S.-flag lines, but less often against foreign-flag lines.

In effect, the Justice Department's selective enforcement activities have imposed stricter and more burdensome standards on our own merchant marine. In those few cases where the Department of Justice has investigated rebating and other practices, it has created a major source of irritation to our foreign trading partners who operate in an unregulated marketplace, free of antitrust restraints.

III. RESTRAINTS ON CARRIERS

No one should think that carriers will be freely allowed to engage in anticompetitive practices. That is neither the intent nor the effect of this bill.

First, the grant of antitrust immunity is limited and specified. Generally speaking, activities or agreements by or among ocean common carriers, and by or among marine terminal operators as described in section 4 of this amendment, are only exempted from antitrust laws if they have been filed with the Federal Maritime Commission (FMC) under procedures set forth in section 5, and have become effective under section 6, or are reasonably believed to be filed and in effect.

Thus, carriers are not now, and will not in the future, be allowed to enter into secret agreements. Should they do so, they will not qualify for the antitrust exemption and will come under the full force of our antitrust laws.

Further, the antitrust exemption is not vague. Rather only those certain agreements or activities described in section 8 qualify.

Second, once under the Shipping Act jurisdiction, carriers face significant restrictions, specifically detailed in section 12. These are not vague, generalized rules, but rather prohibitions of

specific activities. All parties have a right to be able to ascertain beforehand the legality of any contemplated action. The replacement of vague "public interest" and "detrimental to commerce" standards in the 1916 act, with the specific prohibitions in this legislation will be one of the primary achievements of Congress in this area.

IV. SHIPPER-CARRIER COMPROMISE

As I mentioned at the outset, this bill reflects an agreement reached between shippers and carriers on how to assist carriers, while providing shippers the flexibility and protection they need.

There are some who will admit that shippers—importers and exporters—are the consumers in the transportation industry, and do seek the lowest tariffs, but claim that the final purchaser of the product is not well-served by this bill. That is simply not true. A U.S. exporter of chemicals will be better able to compete abroad if the ocean transportation costs are low and service is responsive. This, in turn, means jobs in U.S. manufacturing plants to supply the exports. If the shipper is a U.S. importer, he must also constantly seek the lowest ocean tariffs. If his imports are too expensive, the ultimate consumer will turn to less expensive domestic alternatives. In other words, to compete abroad or at home, U.S. shippers must always seek the lowest tariff, and the ultimate beneficiary of a lower tariff will be the U.S. consumer or worker. Thus, the endorsement of this legislation by shippers is particularly meaningful.

To provide an equal competitive stance for U.S. shippers, we must start from a base which balances the legal regimes of United States and foreign carriers. That is the goal of this bill.

Specifically, this bill would make lawful certain activities designed to enhance the negotiating power of shippers vis-a-vis the carrier conferences. Under section 9, tariffs, shippers may negotiate time-volume rates which vary with the volume of cargo offered over a period of time. They may also enter into a service contract with a carrier or conference to provide specific services, rates, and conditions to accommodate the shippers' individual needs. Under section 5, agreements, any conference utilizing a loyalty contract—by which lower rates are provided to shippers who commit their cargo to a particular carrier or conference—must provide the right of independent action. Thus, should a shipper seek a rate or service item which the conference is unwilling to agree to, that shipper need only convince one carrier to provide the service requested. The carrier will, under this bill, be able to offer that service without fear of expulsion from the conference.

Under section 4, shippers could create shippers' councils to discuss general rate levels. For smaller shippers this will provide the opportunity to combine shipments in order to gain the negotiating leverage necessary to obtain discount volume rates.

Finally, shippers will be beneficiaries of the expedited review processed and increased certainty provided in section 6 and elsewhere in this bill. New export opportunities will arise. An excellent example of such a scenario was described to me by an Oregon timber and wood products company executive. He noted that in bidding for a contract to export certain wood products to the Far East, he has faced lengthy delays in obtaining necessary ocean tranportation arrangements and their costs, so that he might calculate his expenses and submit a bid. As a result of these delays, the Far East purchaser looked elsewhere, and the contract went to a Norwegian firm. Such a situation is not good for U.S. carriers which might have carried his timber, and it is certainly not good for U.S. industry which lost an export market and jobs.

V. CONCLUSION

The Shipping Act of 1982 revises the Shipping Act, 1916, to provide an updated, simplified, more efficient regulatory scheme for international liner shipping. The paramount objective is to develop and maintain an efficient ocean transportation system through commercial means with minimum government involvement.

The legislation certainly considers:

The ocean common carrier who desires stability in enforcement;

The independent nonconference carrier who desires to remain in business as a competitive alternative to conferences;

The large shipper who desires broad loyalty arrangements and flexibility;

The small shipper who fears market dominance by his larger competitors and desires to see his goods compete with those similarly produced in foreign countries;

The freight forwarder who wants to be assured that the existing system of licensing and bonding will be retained and that he will continue to receive compensation; and

Ports and marine terminal operators who seek an increased volume of trade.

This bill truly represents a consensus by the affected parties. It is bipartisan. It is long overdue. I urge its passage.●

● Mr. LONG. Mr. President, the savings provisions found in the Shipping Act legislation now before the Senate state, at section 21(e)(2):

This Act and the amendments made by it shall not affect any suit at law filed before the date of enactment of this Act.

This provision was originally proposed by me last year when the Shipping Act of 1982 was before the Senate Committee on Commerce, Science, and Transportation. It was adopted by the Commerce Committee at that time in roughly the same form, and subsequently it was included in the version of the Shipping Act of 1983 approved consecutively by the House Merchant Marine Committee, the House Judiciary Committee, and the House of Representatives itself. It is fitting and proper, therefore, that this provision is still included in the Shipping Act of 1983 presently before the Senate for consideration.

The purpose and intent of this provision, of course, is to make it clear that, if this new Shipping Act legislation is ultimately enacted into law, courts and administrative agencies shall not retroactively apply it, or any changes it might make in existing law, to any antitrust suit or Shipping Act proceeding commenced prior to the date of enactment of the new law. Thus, under this provision, pending antitrust actions, whether in a district court, or in the appeal, or certiorari process—as well as pending administrative proceedings under the Shipping Act—shall continue to be decided by courts and the Federal Maritime Commission on the basis of statutory and case law in effect prior to the date of enactment of the Shipping Act of 1983.

Consequently, even if it might be contended that the Shipping Act of 1983, if enacted, will operate legislatively to overrule, from that date forward, landmark antitrust decisions such as *Federal Maritime Commission* v. *Svenska Amerika Linien*, 390 U.S. 238, *Carnation Co.* v. *Pacific Westbound Conference*, 383 U.S. 213, and *Sabre Shipping Corp.* v. *American President Lines*, 285 F. Supp. 949, cert. denied, sub nom. *Japan Line, Ltd.* v. *Sabre Shipping Corp.*, 395 U.S. 922—these longstanding decisions will continue to be applicable to and decisive in cases pending before the date of enactment of the Shipping Act of 1983. Similarly, sections of the Shipping Act of 1916 and/or the Clayton Act, repealed or modified by the Shipping Act of 1983, shall continue to have the same effect and force of law they now have in pending cases prior to enactment of the Shipping Act of 1983. In other words, as the Senate Commerce Committee has stated in its reports in support of this new Shipping Act legislation: "[T]his bill shall not affect preexisting suits at law in any manner. * * *" [1]

The fairness of this provision is self-evident. It assures that justice will continue to be done in pending cases under existing law, while cases commenced after the date on which the Shipping Act of 1983 might become law in the future will alone be subject to the new, drastically different rules

[1] See S. Rept. 97-414, 97th Congress, 2d session, pg. 44.

of antitrust and maritime law it establishes.●

UP AMENDMENT NO. 2

(Subsequently numbered amendment No. 5.)

Purpose: To eliminate antitrust immunity for intermodal rate

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 2:

On page 62, lines 5 and 6 strike: "through rates and through transportation" and insert in lieu thereof "of ocean transportation".

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the amendment which I have just called up be set aside at such time as the Senator from South Carolina, the chairman of the Judiciary Committee, reaches the floor and is prepared to call up his Judiciary Committee amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, the amendment I have sent to the floor has to do with the question of intermodal rates.

As currently drafted, S. 47 would allow conferences to fix rates for through transportation, including truck or rail transportation, from inland points to the ocean ports.

Understand what that means. That means we are providing an exemption not alone for the shipping industry but for that portion of the transportation that goes from the inland points to the ocean ports. For example, let us assume there is a shipment that comes in from England or any other place, and it could be from an island 100 miles from our shores, and the carrier would then be in a position to combine and to set rates not alone for the ocean shipping part of the voyage or the trip but for the land transportation as well.

We do not do that; we do not provide that the antitrust laws are not applicable to the trucking industry; we do not provide that the antitrust laws are not applicable to the railroad industry.

Why are we suddenly broadening out the expanse of exemption to include not only the ocean shipping but to include the land transportation part as well?

Frankly speaking, you do not have to be a genius to figure out that if you really want to have a combination to evade—and I am not saying avoid, I am saying evade—the antitrust laws of this country with respect to land transportation, then you can use this law to provide for that means. You can figure out a way to provide a very short hop by ocean carrier touching two ports and then provide for an exemption across the entire breadth of the United States. That is what this amendment is all about.

This amendment would deny that antitrust exemption. It is bad enough to provide this exemption for the shipping industry, but they have the audacity to come to the Congress of the United States and say:

"We not only want exemption for our segment of the industry, the ocean-carrying aspect, we want to broaden it all the way across the United States."

That is an insult to our intelligence; that is going far beyond the purview of what anybody really in good sense and common judgment ought to agree on.

Any need to offer through rates beause of shippers' desire for a single transportation price can be done with the law as is there proposed simply by allowing an individual carrier rather than a conference to offer a through rate. That could be done without the law. This would provide something special—an exemption.

What I just mentioned is already legal under the antitrust laws. Certainly one carrier can do that. One carrier could provide for transportation across the breadth of the United States in addition to the ocean-shipping portion, but a group of carriers ought not to be permitted to get together to evade the antitrust laws of this country with respect to ground transportation whether or not we pass this legislation giving the shippers an antitrust exemption for the ocean-shipping portion.

Mr. President, I will address myself further to this subject on Monday, but I hope that at the conclusion of the vote on the Judiciary Committee amendments to be offered by Senator THURMOND, that the Senate will see fit to adopt this, which will be one of a number of amendments that I will offer prior to the cloture vote on Tuesday.

HISTORY OF THE SENATE

(The following occurred during Mr. BYRD's presentation today of the "History of the Senate," which is printed later in today's RECORD:)

Mr. BYRD. Mr. President, I now yield to the distinguished majority leader, with the understanding that my speech in the RECORD not show an interruption, and with the understanding that I do not care whether it is counted as a second speech or not. [Laughter.]

Mr. BAKER. I thank the Senator. The minority leader is very generous.

To begin with, I commend him for another presentation on the history of the Senate. I look forward to the day when we can publish the first volume of those speeches. I will take that up with him in private.

I expect that this series of speeches on the history of the Senate, which will perhaps run two to three volumes when it is finished and bound, may be the definitive work on the history of the Senate of the United States. That is a major accomplishment, and we owe the minority leader a debt of gratitude for his perseverance in this scholarly effort.

Mr. BYRD. I thank the majority leader.

THE CALENDAR

Mr. BAKER. Mr. President, I have a number of items that appear to be cleared on this side for action by unanimous consent. I inquire of the minority leader whether he is prepared to consider those matters at this time.

Mr. BYRD. Yes.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that we may proceed as in morning business for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, first, there are a number of calendar items that appear to be cleared. I speak of Senate Joint Resolution 15, Senate Joint Resolution 21, Senate Joint Resolution 27, S. 143, S. 304, and S. 419.

I inquire of the minority leader if he is prepared to consider all or any of those measures.

Mr. BYRD. Yes; Mr. President, all the measures enumerated by the majority leader have been cleared on this side.

Mr. BAKER. I thank the Senator.

NATIONAL EYE DONOR MONTH

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Joint Resolution 15.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 15) designating the month of March 1983 as National Eye Donor Month.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. RANDOLPH. Mr. President, it is gratifying to be a cosponsor of Senate Joint Resolution 15, to designate the month of March 1983 as National Eye Donor Month. By this designation, we will bring to the attention of the American public an important humanitarian organization—the Eye Bank Association, whose goal is bringing light to those whose world is dark. We hope to also encourage more people to

participate in this noble goal—by donating, at death, their corneas, so that sight can be restored to many individuals who suffer corneal disease or injury.

My involvement with corrective eye surgery dates back to 1930-31 when it was my privilege and responsibility to serve as governor of the Lions Clubs of West Virginia. Our statewide project was the securing of funds to provide medical services for children at the West Virginia State schools for the deaf and blind. Through our efforts and the surgical skill of the late Dr. J. E. Blaydes, we succeeded in restoring full or partial vision to more than two dozen young men and women.

The work performed by this gifted surgeon was enormous—more than 100 operations. His reward was enormous, too. Although he performed the surgery without charge, he later told the Lions Clubs of West Virginia:

The joy of seeing the faces of these little children brighten, and hearing their expressions of happiness and gratitude, has repaid me a thousandfold.

I shall always be grateful for the privilege I had of being a part of this great undertaking.

Since that time, we have seen remarkable advances in eye surgery, particularly the development of the corneal transplant operation to the point where it is practically a surgical commonplace. However, because the supply of this precious tissue has never quite kept up with the need, all of the visually impaired individuals who could benefit from this operation have not been served. By designating March 1983 as "National Eye Donor Month" we will increase public awareness of the benefits provided through cornea donation. I urge my colleagues to join in supporting this legislation.

The preamble was agreed to.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

This joint resolution (S.J. Res. 15), with its preamble, reads as follows:

S.J. RES. 15

Whereas eye banks in the United States have grown from a single institution in 1944 to eighty in 1982;

Whereas over fifteen thousand children and adults in the United States have benefited as a direct result of efforts made by eye banks;

Whereas eye banks have sought to encourage research into the prevention and treatment of eye disease and injury in the United States; and

Whereas increased national awareness of benefits rendered through eye donation may add impetus to efforts to expand research activities, and benefit those persons affected by blinding diseases: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of March 1983 is designated as "National Eye Donor Month", and the President is authorized and requested to issue a proclamation calling on all citizens to join in recognizing this humanitarian cause with appropriate activity.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CHILD ABUSE PREVENTION MONTH

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Joint Resolution 21.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 21) to designate April 1983 as "National Child Abuse Prevention Month."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S.J. RES. 21

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of April 1983 is designated as "National Child Abuse Prevention Month" and the President is authorized and requested to issue a proclamation calling upon all Government agencies and the people of the United States to observe such month with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL EMPLOY THE OLDER WORKER WEEK

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Joint Resolution 27.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 27) authorizing and requesting the President to designate the week of March 13 through 19, 1983, as "National Employ the Older Worker Week."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 27), with its preamble, reads as follows:

S.J. RES. 27

Whereas individuals aged fifty-five and over are a major national resource, constitute 22 per centum of the population of the United States at the present time, and are likely to constitute a larger precentage of the population in future decades;

Whereas a growing number of such individuals, being willing and able to work, are looking for employment opportunities, want to remain in the work force, or would like to serve their communities and their Nation in voluntary roles;

Whereas such individuals, who have made continuing contributions to the national welfare, should be encouraged to remain in, or resume, career and voluntary roles that utilize their strengths, wisdom, and skills;

Whereas career opportunities reaffirm the dignity, self-worth, and independence of older individuals by encouraging them to make decisions and to act upon those decisions, by tapping their resources, experience, and knowledge, and by enabling them to contribute to society;

Whereas the operation of title V of the Older Americans Act of 1965 has demonstrated that older workers are extremely capable in a wide variety of job roles;

Whereas recent studies conducted by the United States Department of Labor and the Work in America Institute indicate that, in many cases, employers prefer to retain older workers or rehire former older employees due to the high quality of their job performance and their low rate of absenteeism; and

Whereas the American Legion has sponsored a "National Employ the Older Worker Week" during the second full week of March in every year since 1959, focusing public attention on the advantages of employing older individuals: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate the week of March 13 through 19, 1983, as "National Employ the Older Worker Week", and to issue a proclamation calling upon—

(1) the employers and labor unions of the United States to give special consideration to older workers, with a view toward expanding career and employment opportunities for older workers who are willing and able to work and who desire to remain employed or to reenter the work force;

(2) voluntary organizations to reexamine the many fine service programs which they sponsor with a view toward expanding both the number of older volunteers and the types of service roles open to older workers;

(3) the United States Department of Labor to give special assistance to older workers by means of job training programs under the Jobs Training and Partnership Act, job counseling through the United States Employment Service, and additonal support through its older worker program, as authorized by title V of the Older Americans Act; and

(4) the citizens of the United States to observe this day with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I say to the distinguished majority leader, for the Record, that I have no objection to the immediate consideration of the next four items, provided there are no amendments thereto, other than the technical amendment by Mr. ANDREWS.

Mr. BAKER. Mr. President, I ask unanimous consent that no amendment be in order to the next four items except the technical amendment to Calendar No. 21.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEASE OF CERTAIN LANDS BY THE TWENTY-NINE PALMS BAND OF LUISENO MISSION INDIANS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 143.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 143) to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for ninety-nine years certain lands held in trust for such band.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ANDREWS. Mr. President, I rise on behalf of S. 143, the Twenty-Nine Palms Band Leasing Act. This act would authorize the leasing of trust lands held by the United States for the benefit of the Twenty-Nine Palms Band of California. This act will enable the band to enter into a 99-year lease of their property to the sanitary district of Indio, Calif. The arrangement will permit the bank to derive income from its trust lands and yet will provide a sufficient duration to the lease to protect the capital investment of the sanitary district.

I point out that S. 143 is the successor to S. 2418, of the 97th Congress. Extensive hearings were held on S. 2418 and the Indian Affairs Committee filed a report on that bill. For the legislative history on this legislation, therefore, reference should be made to the committee's hearing record and our report, Senate Report 97-656.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 143

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1 of the Act of August 9, 1955 (69 Stat. 539), as amended (25 U.S.C. 415), is further amended by inserting ", and lands held in trust for the Twenty-nine Palms Band of Luiseno Mission Indians," immediately after "Chelan County, Washington", in the second sentence.

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RESERVING CERTAIN LANDS FOR BURNS PAIUTE TRIBE

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 304.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill to hold a parcel of land in trust for the Burns Paiute Tribe.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ANDREWS. Mr. President, I rise on behalf of S. 304, the Burns Paiute Inheritance Act. This act will accomplish several things. First, it will authorize the taking in trust of the public domain allotment of Jesse L. James, a Burns Paiute Indian, for the benefit of the Burns Paiute Tribe. Second, it will provide that, in the future, the public domain allotments of all Indians in Harney County, Oreg.; who die intestate and without heirs shall be taken in trust for the benefit of the Burns Paiute Tribe. Third and last, it will raise the value of lands that are subject to the discretion of the Secretary of the Interior under 25 U.S.C. 373b from $2,000 to $50,000.

I should note that S. 304 is the successor to S. 1468 of the 97th Congress. The Indian Affairs Committee held a thorough hearing on that bill and filed a report on it. For the legislative history on this act, therefore, the hearing record of the Indian Affairs Committee on S. 1468 and Senate Report 97-508 should be consulted.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 304

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, pursuant to section 2 of the Act of November 24, 1942 (56 Stat. 1021, 1022; 25 U.S.C. 373b), the estate of Jesse Joseph James, Burns 144-N1116, consisting of a public domain allotment numbered 144-111, northwest quarter, section 32, township 23 south, range 32½ east, Willamette meridian, Harney County, Oregon, is hereby declared to be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and part of the Burns Paiute Indian Reservation.

SEC. 2. Section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b), is amended by inserting the following immediately before the period at the end thereof: *"Provided further,* That interests in all Burns public domain allotments located in Harney County, Oregon, belonging to Indians who die intestate without heirs shall be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and shall be part of the Burns Paiute Indian Reservation." However no non-Indian lands in Harney County, Oregon, shall be considered Indian country as defined in section 1151 of title 18, United States Code.

SEC. 3, Section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b), is amended by deleting "$2,000" and inserting in lieu thereof "$50,000".

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PER CAPITA PAYMENTS TO INDIANS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 419.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 419) to provide that per capita payments to Indians may be made by tribal governments, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ANDREWS. Mr. President, I rise today to speak on behalf of S. 419, the Per Capita Distribution Act. This act would authorize Indian tribes to make distributions among their members of the proceeds from the sale or lease of trust assets. This act is in keeping with the policy of self-determination which has been endorsed by this administration. The act illustrates the progress that has been made to date in Indian affairs. Many tribes have developed the capacity to make these distributions more promptly and efficiently than the Bureau of Indian Affairs. It is, moreover, appropriate that the tribes make these distributions because they concern the allocation of the proceeds of assets that belong to the tribes.

Mr. President, I point out that S. 419 is the successor of H.R. 4365 of the 97th Congress. There was no Senate companion to that bill. The Indian Affairs Committee held a hearing on H.R. 4365 and filed a report on it. For the legislative history on this act, one should refer to the Senate hearing on H.R. 4365 and Senate Report 97-659.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 419

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That funds which are held in trust by the Secretary of the Interior (hereinafter referred to as the "Secretary") for an Indian tribe and which are to be distributed per capita to members of that tribe may be so distributed by either the Secretary or, at the request of the governing body of the tribe and subject to the approval of the Secretary, the tribe. Any funds so distributed shall be paid by the Secretary of the tribe directly to the members involved or, if such members are minors or have been legally determined not competent to handle their own affairs, to a parent or guardian of such members or to a trust fund for such minors or legal incompetents as determined by the governing body of the tribe.

SEC. 2. (a) Funds distributed under this Act shall not be liable for the payment of previously contracted obligations except as may be provided by the governing body of the tribe and distributions of such funds shall be subject to the provisions of section 7 of the Act of October 19, 1973 (87 Stat. 466), as amended.

(b) Nothing in this Act shall affect the requirements of the Act of October 19, 1973 (87 Stat. 466), as amended, or of any plan approved thereunder, with respect to the use or distribution of funds subject to that Act: *Provided,* That per capita payments made pursuant to a plan approved under that Act may be made by an Indian tribe as provided in section 1 of this Act if all other provisions of the 1973 Act are met, including but not limited to, the protection of the interests of minors and incompetents in such funds.

(c) Nothing in this Act, except the provisions of subsection (a) of this section, shall apply to the Shoshone Tribe and the Arapahoe Tribe of the Wind River Reservation, Wyoming.

SEC. 3. (a) The Secretary shall, by regulation, establish reasonable standards for the approval of tribal payments pursuant to section 1 of this Act and, where approval is given under such regulations, the United States shall not be liable with respect to any distribution of funds by a tribe under this Act.

(b) Nothing in this Act shall otherwise absolve the United States from any other responsibility to the Indians, including those which derive from the trust relationship and from any treaties, Executive orders, or agreements between the United States and any Indian tribe.

SEC. 4. (a) The following provision of section 1 of the Act of June 10, 1896 (29 Stat. 3360), is repealed: "That any sums of money hereafter to be paid per capita to individual Indians shall be paid to said Indians by an officer of the Government designated by the Secretary of the Interior.".

(b) Section 19 of the Act of June 28, 1898 (30 Stat. 502), is repealed.

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MASHANTUCKET PEQUOT INDIANS

Mr. BAKER. Mr. President, I have another item that is cleared on this side, and I speak now of Calendar Order No. 21, S. 366, to which there is an amendment which qualifies, I believe, under the unanimous-consent order previously entered. If the minority leader has no objection I will ask the Chair to proceed to consideration of that item.

Mr. BYRD. Mr. President, we are ready to proceed on that measure.

Mr. BAKER. I thank the Senator.

Mr. President, I ask the Chair to lay before the Senate S. 366, Calendar Order No. 21.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 366) to settle certain claims of the Mashantucket Pequot Indians.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 3

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from North Dakota and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. ANDREWS, proposes an unprinted amendment numbered 3.

On page 11, line 13, in between "$900,000" and "to" insert the following: "for the fiscal year beginning October 1, 1983".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 3) was agreed to.

Mr. ANDREWS. Mr. President, I today speak on behalf of S. 366, the Mashantucket Pequot Indian Claims Settlement Act. This act will settle claims to land in Ledyard, Conn., that have been raised by the Mashantucket, or Western, Pequot Tribe of Connecticut. These claims are based on the tribe's assertion that certain transfers of its lands were made with Federal approval that was allegedly required by the Nonintercourse Act of 1790 and succeeding versions of that act.

These suits are extremely complex and four earlier claims, in the States of Maine, Florida, Virginia, and Rhode Island, have already been addressed by settlement acts approved by Congress.

I note that S. 366 is the successor to S. 2719 of the 97th Congress. That bill was the subject of an extensive hearing by this committee. It was ordered reported and a report was filed. Therefore, for the legislative history on this act, one should consult the Senate hearings on S. 2719 and Senate Report 97-596.

With respect to the report on S. 2719, I would like to point out that the committee report on this bill contains a garbled description of the effect of the jurisdiction section of the bill, section 6. This portion of the report should read as follows:

Sec. 6 provides that the reservation of the Mashantucket Pequot Tribe is Indian Country and that the reservation of the Tribe shall be subject to the full extent of state jurisdiction as provided in title IV of the Act of April 11, 1968, the Indian Civil Rights Act. The Tribe's reservation has this status notwithstanding section 406 of the Indian Civil Rights Act which requires a majority of the enrolled members of an Indian tribe before a state may assume jurisdiction over that tribe.

Mr. President, the Indian Affairs Committee has been alerted to the fact that S. 366, as reported, would require a waiver under section 402 of the Budget Act because it authorizes appropriations in the current fiscal year and, of course, was not reported out of committee on May 15 of last year. I would note that this was the case with S. 2719 as well because it was not introduced until after the May 15 deadline. Last fall, the Budget Committee granted a waiver for the bill but, as this is a new Congress, still another waiver is in order. Rather than seek that waiver, however, I would like to offer an amendment to cure the problem altogether. The amendment I am offering would change the fiscal year authorizing the appropriation from 1983 to 1984.

I urge the adoption of this amendment and the passage of S. 366 as amended.

● Mr. DODD. Mr. President, I rise today in support of S. 366, the Mashantucket Pequot Indians Claims Settlement Act of 1983, which I first introduced with my colleague, Senator WEICKER, on June 30, 1982. While this measure passed both bodies in the previous session, it was not enacted prior to sine die adjournment. I want to commend the Select Committee on Indian Affairs for its prompt and favorable consideration of this measure in the 98th Congress. This bill settles the first outstanding Indian land claim in the State of Connecticut and serves as a reaffirmation of Connecticut's policy which upholds the constitutional rights of our State's native Americans. Representative GEJDENSON has been the principal sponsor of identical legislation on the House side that together with this legislation carries the support of the entire Connecticut delegation.

I would also like this opportunity to express my appreciation to Chairman COHEN, Senator MELCHER, and the Select Committee on Indian Affairs for holding hearings and for their

careful consideration of this legislation.

This bill is the culmination of years of negotiations between the Mashantucket Pequot Tribal Council and the private landowners in Ledyard, Conn. Specifically, the Ledyard property owners have agreed to transfer 800 acres of undeveloped land to the tribe. Let me make it clear that this legislation would not displace a single homeowner and that all the property owners have agreed to this settlement and still reserve the right to not sell their property if they so choose.

In addition, the bill establishes a Federal trust of $900,000 for the purpose of land acquisition by the tribe as agreed to in the negotiated settlement and makes the Pequots a federally recognized tribe, giving the tribe all the rights and privileges which accompany such recognition. The bill also extinguishes all aboriginal title to land and subjects the tribe to the laws of the United States.

It must be made clear that in order for this well-thought-out agreement, which is the product of several years of negotiations, to be legal and valid, Congress will have to ratify the settlement.

I would also like to point out that this legislation reverses a trend in Indian land claim settlements by increasing the State's involvement. Connecticut has provided monetary and special in kind assistance to the tribe totaling $250,000. Recently, the State contributed 20 acres of land to the Pequots as part of the negotiated settlement. This land was their ancient burial ground. Again, the State legislation granting this land is contingent upon the passage of this bill in Congress.

Lastly, let me say that this legislation circumvents the need for uncertain and time-consuming litigation. The only viable alternative to litigation is to negotiate, and that is exactly what I am asking the Senate to affirm by passing this bill.●

● Mr. WEICKER. Mr. President, the Senate has before it S. 366, which would provide settlement of certain claims of the Mashantucket Pequot Tribe of Connecticut, and which would establish Federal recognition of the tribe.

It is great pleasure that I rise in support of this legislation. Essentially, the bill guarantees that the rights of minorities in the case of the Mashantucket Pequot Tribe are equally protected under our laws. This bill is motivated by the wish to provide a fair settlement to all involved parties and I believe that it accomplishes that aim. S. 366 has the support of the Connecticut congressional delegation, the Connecticut State government, the Mashantucket Pequot Tribe, and affected property owners.

Connecticut is proud of this bill which represents the "state of the art" in Indian land claims settlement legislation. We believe that it could set a precedent for Connecticut in future cases of this nature. I urge my colleagues to support S. 366.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 366

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mashantucket Pequot Indian Claims Settlement Act".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(a) there is pending before the United States District Court for the District of Connecticut a civil action entitled Western Pequot Tribe of Indians against Holdridge Enterprises Incorporated, et al., Civil Action Numbered H76-193 (D. Conn.), which involves Indian claims to certain public and private lands within the town of Ledyard, Connecticut;

(b) the pendency of this lawsuit has placed a cloud on the titles to much of the land in the town of Ledyard, including lands not involved in the lawsuit, which has resulted in severe economic hardships for the residents of the town;

(c) the Congress shares with the State of Connecticut and the parties to the lawsuit a desire to remove all clouds on titles resulting from such Indian land claims;

(d) the parties to the lawsuit and others interested in the settlement of Indian land claims within the State of Connecticut have reached an agreement which requires implementing legislation by the Congress of the United States and the Legislature of the State of Connecticut;

(e) the Western Pequot Tribe, as represented as of the time of the passage of this Act by the Mashantucket Pequot Tribal Council, is the sole successor in interest to the aboriginal entity generally known as the Western Pequot Tribe which years ago claimed aboriginal title to certain lands in the State of Connecticut; and

(f) The State of Connecticut is contributing twenty acres of land owned by the State of Connecticut to fulfill this Act. The State of Connecticut has provided special services to the members of the Western Pequot Tribe residing within its borders. The United States has provided few, if any, special services to the Western Pequot Tribe and has denied that it had jurisdiction over or responsibility for said Tribe. In view of the provision of land by the State of Connecticut and the provision of special services by the State of Connecticut without being required to do so by Federal law, it is the intent of Congress that the State of Connecticut not be required to further contribute directly to this claims settlement.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "Tribe" means the Mashantucket Pequot Tribe (also known as the Western Pequot Tribe) as identified by chapter 832 of the Connecticut General Statutes and all its predecessors and successors in interest. The Mashantucket Pequot Tribe is represented, as of the date of the enactment of this Act, by the Mashantucket Pequot Tribal Council.

(2) The term "land or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resources, including without limitation minerals and mineral rights, timber and timber rights, water and water rights, and hunting and fishing rights.

(3) The term "private settlement lands" means—

(A) the eight hundred acres, more or less, of privately held land which are identified by a red outline on a map filed with the Secretary of the State of Connecticut in accordance with the agreement referred to in section 2(d) of this Act, and

(B) the lands known as the Cedar Swamp which are adjacent to the Mashantucket Pequot Reservation as it exists on the date of the enactment of this Act. Within thirty days of the enactment of this Act, the Secretary of the State of Connecticut shall transmit to the Secretary a certified copy of said map.

(4) The term "settlement lands" means—

(A) the lands described in sections 2(a) and 3 of the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claims as enacted by the State of Connecticut and approved on June 9, 1982, and

(B) the private settlement lands.

(5) The term "Secretary" means the Secretary of the Interior.

(6) The term "transfer" means any transaction involving, or any transaction the purpose of which was to effect, a change in title to or control of any land or natural resources, and any act, event, or circumstance that resulted in a change in title to, possession of, dominion over, or control of land or natural resources, including any sale, grant, lease, allotment, partition, or conveyance, whether pursuant to a treaty, compact or statute of a State or otherwise.

(7) The term "reservation" means the existing reservation of the Tribe as defined by chapter 824 of the Connecticut General Statutes and any settlement lands taken in trust by the United States for the Tribe.

APPROVAL OF PRIOR TRANSFERS; EXTINGUISHMENT OF ABORIGINAL TITLES AND INDIAN CLAIMS

SEC. 4. (a) Any transfer before the date of enactment of this Act from, by, or on behalf of the Tribe or any of its members of land or natural resources located anywhere within the United States, and any transfer before the date of enactment of this Act from, by, or on behalf of any Indian, Indian nation, or tribe or band of Indians of land or natural resources located anywhere within the town of Ledyard, Connecticut, shall be deemed to have been made in accordance with the Constitution and all laws of the United States, including without limitation the Trade and Intercourse Act of 1790, Act of July 22, 1790 (ch. 33, Sec. 4, 1 Stat. 137, 138), and all amendments thereto and all subsequent reenactments and versions thereof, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer.

(b) By virtue of the approval and ratification of a transfer of land or natural resources effected by subsection (a), any aboriginal title held by the Tribe or any member of the Tribe, or any other Indian, Indian nation, or tribe or band of Indians,

to any land or natural resources the transfer of which was approved and ratified by subsection (a) shall be regarded as extinguished as of the date of such transfer.

(c) By virtue of the approval and ratification of a transfer of land or natural resources effected by this section, or the extinguishment of aboriginal title effected thereby, any claim (including any claim for damages for trespass or for use and occupancy) by, or on behalf of, the Tribe or any member of the Tribe or by any other Indian, Indian nation, or tribe or band of Indians, against the United States, any State or subdivision thereof or any other person which is based on—

(1) any interest in or right involving any land or natural resources the transfer of which was approved and ratified by subsection (a), or

(2) any aboriginal title to land or natural resources the extinguishment of which was effected by subsection (b),

shall be regarded as extinguished as of the date of any such transfer.

(d) Nothing in this section shall be construed to affect or eliminate the personal claim of any individual Indian (except for Federal common law fraud claim) which is pursued under any law of general applicability that protects non-Indians as well as Indians.

(e)(1) This section shall take effect upon the appropriation of $900,000 as authorized under section 5(e) of this Act.

(2) The Secretary shall publish notice of such appropriation in the Federal Register when the funds are deposited in the fund established under section 5(a) of this Act.

MASHANTUCKET PEQUOT SETTLEMENT FUND

SEC. 5. (a) There is hereby established in the United States Treasury an account to be known as the Mashantucket Pequot Settlement Fund (hereinafter referred to in this section as the "Fund"). The Fund shall be held in trust by the Secretary for the benefit of the Tribe and administered in accordance with this Act.

(b)(1) The Secretary is authorized and directed to expend, at the request of the Tribe, the Fund together with any and all income accruing to such Fund in accordance with this subsection.

(2) Not less than $600,000 of the Fund shall be available until January 1, 1985, for the acquisition by the Secretary of private settlement lands. Subsequent to January 1, 1985, the Secretary shall determine whether and to what extent an amount less than $600,000 has been expended to acquire private settlement lands and shall make that amount available to the Tribe to be used in accordance with the economic development plan approved pursuant to paragraph (3).

(3)(A) The Secretary shall disburse all or part of the Fund together with any and all income accruing to such Fund (excepting the amount reserved in paragraph (2)) according to a plan to promote the economic development of the Tribe.

(B) The Tribe shall submit an economic development plan to the Secretary and the Secretary shall approve such plan within sixty days of its submission if he finds that it is reasonably related to the economic development of the Tribe. If the Secretary does not approve such plan, he shall, at the time of his decision, set forth in writing and with particularity, the reasons for his disapproval.

(C) The Secretary may not agree to terms which provide for the investment of the Fund in a manner inconsistent with the first section of the Act of June 24, 1938 (52 Stat. 1037), unless the Tribe first submits a specific waiver of liability on the part of the United States for any loss which may result from such an investment.

(D) The Tribe may, with the approval of the Secretary, alter the economic development plan subject to the conditions set forth in subparagraph (B).

(4) Under no circumstances shall any part of the Fund be distributed to any member of the Tribe unless pursuant to the economic development plan approved by the Secretary under paragraph (3).

(5) As the Fund or any portion thereof is disbursed by the Secretary in accordance with this section, the United States shall have no further trust responsibility to the Tribe or its members with respect to the sums paid, any subsequent expenditures of these sums, or any property other than private settlement lands or services purchased with these sums.

(6) Until the Tribe has submitted and the Secretary has approved the terms of the use of the Fund, the Secretary shall fix the terms for the administration of the portion of the Fund as to which there is no agreement.

(7) Lands or natural resources acquired under this subsection which are located within the settlement lands shall be held in trust by the United States for the benefit of the Tribe.

(8) Land or natural resources acquired under this subsection which are located outside of the settlement lands shall be held in fee by the Mashantucket Pequot Tribe, and the United States shall have no further trust responsibility with respect to such land and natural resources. Such land and natural resources shall not be subject to any restriction against alienation under the laws of the United States.

(9) Notwithstanding the provisions of the first section of the Act of August 1, 1888 (25 Stat. 357, chapter 728), as amended, and the first section of the Act of February 26, 1931 (46 Stat. 1421, chapter 307), the Secretary may acquire land or natural resources under this section from the ostensible owner of the land or natural resources only if the Secretary and the ostensible owner of the land or natural resources have agreed upon the identity of the land or natural resources to be sold and upon the purchase price and other terms of sale. Subject to the agreement required by the preceding sentence, the Secretary may institute condemnation proceedings in order to perfect title, satisfactory to the Attorney General, in the United States and condemn interests adverse to the ostensible owner.

(c) For the purpose of subtitle A of the Internal Revenue Code of 1954, any transfer of private settlement lands to which subsection (b) applies shall be deemed to be an involuntary conversion within the meaning of section 1033 of such Code.

(d) The Secretary may not expend on behalf of the Tribe any sums deposited in the Fund established pursuant to subsection (a) of this section unless and until he finds that authorized officials of the Tribe have executed appropriate documents relinquishing all claims to the extent provided by sections 4 and 10 of this Act, including stipulations to the final judicial dismissal with prejudice of its claims.

(e) There is authorized to be appropriated $900,000 for the fiscal year beginning October 1, 1983, to be deposited in the Fund.

JURISDICTION OVER RESERVATION

SEC. 6. Notwithstanding the provision relating to a special election in section 406 of the Act of April 11, 1968 (82 Stat. 80; 25 U.S.C. 1326), the reservation of the Tribe is declared to be Indian country subject to State jurisdiction to the maximum extent provided in title IV of such Act.

LIMITATION OF ACTIONS: FEDERAL COURT JURISDICTION

SEC. 7. (a) Notwithstanding any other provision of law, the constitutionality of this Act may not be drawn into question in any action unless such question has been raised in—

(1) a pleading contained in a complaint filed before the end of the one-hundred-and-eighty-day period beginning on the date of the enactment of this Act, or

(2) an answer contained in a reply to a complaint before the end of such period.

(b) Notwithstanding any other provision of law, exclusive jurisdiction of any action in which the constitutionality of this Act is drawn into question is vested in the United States District Court for the District of Connecticut.

(c) Any action to which subsection (a) applies and which is brought in the court of any State may be removed by the defendant to the United States District Court for the District of Connecticut.

(d) Except as provided in this Act, no provision of this Act shall be construed to constitute a jurisdictional act, to confer jurisdiction to sue, or to grant implied consent to any Indian, Indian nation, or tribe or band of Indians to sue the United States or any of its officers with respect to the claims extinguished by the operation of this Act.

RESTRICTION AGAINST ALIENATION

SEC. 8. (a) Subject to subsection (b), lands within the reservation which are held in trust by the Secretary for the benefit of the Tribe or which are subject to a Federal restraint against alienation at any time after the date of the enactment of this Act shall be subject to the laws of the United States relating to Indian lands, including section 2116 of the Revised Statutes (25 U.S.C. 177).

(b) Notwithstanding subsection (a), the Tribe may lease lands for any term of years to the Mashantucket Pequot Housing Authority, or any successor in interest to such Authority.

EXTENSION OF FEDERAL RECOGNITION AND PRIVILEGES

SEC. 9. (a) Notwithstanding any other provision of law, Federal recognition is extended to the Tribe. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or Indian nations, tribes or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the Tribe.

(b) The Tribe shall file with the Secretary a copy of its organic governing document and any amendments thereto. Such instrument must be consistent with the terms of this Act and the Act To Implement the Settlement of the Mashantucket Pequot Indian Land Claim as enacted by the State of Connecticut and approved June 9, 1982.

(c) Notwithstanding any other provision of law, the Tribe and members of the Tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indian tribes as of the date of enactment of this Act.

OTHER CLAIMS DISCHARGED BY THIS ACT

SEC. 10. Except as expressly provided herein, this Act shall constitute a general discharge and release of all obligations of the State of Connecticut and all of its politi-

cal subdivisions, agencies, departments, and all of the officers or employees thereof arising from any treaty or agreement with, or on behalf of the Tribe or the United States as trustee therefor.

INSEPARABILITY

SEC. 11. In the event that any provision of section 4 of this Act is held invalid, it is the intent of Congress that the entire Act be invalidated. In the event that any other section or provision of this Act is held invalid, it is the intent of Congress that the remaining sections of this Act shall continue in full force and effect.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR REFERRAL OF S. 460

Mr. BAKER. Mr. President, next I have a request for a referral which I shall state for the benefit of the minority leader and other Senators.

Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of S. 460, the flood insurance bill, and it be referred to the Committee on Banking, Housing, and Urban Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there are a number of items on the Executive Calendar on this side that are cleared for action by unanimous consent.

I inquire of the minority leader if he is prepared for the Senate to go into executive session briefly to consider all or any part of that calendar beginning with nominations on page 1 and continuing through nominations placed on the Secretary's desk in the Air Force, Army, and Navy.

Mr. BYRD. Mr. President, on this side of the aisle we are prepared to proceed with all nominations on the calendar.

Mr. BAKER. I thank the Senator.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nomination on today's Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

U.S. POSTAL SERVICE

The assistant legislative clerk read the nomination of John R. McKean, of California, to be a Governor of the U.S. Postal Service.

Mr. STEVENS. Mr. President, John R. McKean has been serving as a Governor of the Postal Service since last March, for the balance of a term which expires on December 8, 1986. He was appointed to this term to fill a vacancy which was created when a previous Governor resigned after serving only 15 months of a 9-year term.

The President recently nominated Governor McKean for a different term on the same Board with a full 9 years to run.

It is a pleasure to see that Mr. McKean is making the kind of long-term commitment which is essential to providing the leadership that is needed in this important position. The U.S. Postal Service, in particular, needs the mature, experienced guidance which can be obtained only when the members of its Board of Governors are sufficiently interested in and dedicated to their jobs to serve for the extended period which the Congress intended when it provided for 9-year terms.

The Postal Service has a highly complex, increasingly technological job to do. Its effective performance of that job is vital to the Nation's economy and to the daily lives of every citizen. We need, as Governors of the Postal Service, leaders who are prepared to stay with the job over a long enough period to get to know the complexities of the system and to provide an effective contribution. I am pleased that we have such an individual in Governor McKean.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF DEFENSE

The assistant legislative clerk read the nomination of Vincent Puritano, of Virginia, to be an Assistant Secretary of Defense.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

AIR FORCE—ARMY—NAVY—MARINE CORPS

The assistant legislative clerk read nominations in the Air Force, Army, Navy, and Marine Corps, as follows:

IN THE AIR FORCE

The following officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapter 837, title 10, United States Code:

To be major general

Brig. Gen. William L. Copeland, [redacted] FV, Air Force Reserve.
Brig. Gen. Gerald E. Marsh, [redacted] FV, Air Force Reserve.
Brig. Gen. Edward L. McFarland, [redacted] FV, Air Force Reserve.
Brig. Gen. John D. Moore, [redacted] FV, Air Force Reserve.
Brig. Gen. Joseph L. Shosid, [redacted] FV, Air Force Reserve.
Brig. Gen. James L. Tucker, Jr., [redacted] FV, Air Force Reserve.
Brig. Gen. Jerome N. Waldor, [redacted] FV, Air Force Reserve.

To be brigadier general

Col. Clyde F. Autio, [redacted] FV, Air Force Reserve.
Col. Norman J. Deback, Jr., [redacted] FV, Air Force Reserve.
Col. Ira De Ment III, [redacted] FV, Air Force Reserve.
Col. Ralph D. Erwin, [redacted] FV, Air Force Reserve.
Col. Walter Jajko, [redacted] FV, Air Force Reserve.
Col. Simeon Kobrinetz, [redacted] FV, Air Force Reserve.
Col. Frances I. Mossman, [redacted] FV, Air Force Reserve.
Col. Thomas R. Pochari, [redacted] FV, Air Force Reserve.
Col. William C. Roxby, Jr., [redacted] FV, Air Force Reserve.
Col. Rocco R. Sgarro, [redacted] FV, Air Force Reserve.
Col. John G. Sullivan, [redacted] FV, Air Force Reserve.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard C. Henry, [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Robert L. Bergquist, [redacted], U.S. Army.

The U.S. Army Reserve officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, sections 593(a), 3371, and 3384:

To be major general

Brig. Gen. Jimmy F. Bates, [redacted].
Brig. Gen. Robert S. Holmes, [redacted].
Brig. Gen. Robert E. Louque, Jr., [redacted].
Brig. Gen. Norman W. Martell, [redacted].
Brig. Gen. James R. Montgomery, [redacted].
Brig. Gen. Donald A. Pearson, [redacted].

To be brigadier general

Col. Joseph G. Gray, [redacted].
Col. James F. Robb, [redacted].
Col. Guilford J. Wilson, Jr., [redacted].
Col. Edward Y. Hirata, [redacted].
Col. Dennis R. Jones, [redacted].
Col. George V. Bauer, [redacted].

The Army National Guard of the United States officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, section 593(a), 3385, and 3392:

To be major general

Brig. Gen. John G. Castles, [redacted].

To be brigadier general

Col. Charles F. Battner, [redacted].
Col. Ralph H. Brown, [redacted].

Col. Samuel E. Fleming, Jr., [redacted].
Col. Alvin D. McArthur, Jr., [redacted].
Col. Harry L. Moore, [redacted].
Col. Kenneth R. Newbold, [redacted].
Col. David L. Nudo, [redacted].
Col. Ervin T. Osborn, [redacted].
Col. Joseph J. Saladino, [redacted].
Col. James E. Threlfall, [redacted].
Col. Mucio Yslas, Jr., [redacted].

The following-named officer, under the provisions of title 10, United States Code, section 3019, for a period of 4 years beginning 1 June 1983, to be reappointed as chief, Army Reserve:

To be chief

Maj. Gen. William R. Berkman, [redacted], U.S. Army Reserve.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be general

Gen. Edward C. Meyer, [redacted], age 54, U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be admiral

Adm. Robert L. J. Long, [redacted], U.S. Navy.

The following-named captains of the various staff corps of the Navy for promotion to the permanent grade of commodore, pursuant to title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

MEDICAL CORPS

To be commodore

Louis Henry Eske
James Joseph Quinn

SUPPLY CORPS

Robert Burke Abele
Daniel Wayne McKinnon, Jr.
Phillip Freeman McNall

CHAPLAIN CORPS

John Richard McNamara

CIVIL ENGINEER CORPS

Arthur William Fort

DENTAL CORPS

Henry John Sazima

NURSE CORPS

Mary Joan Nielubowicz

The following-named captains of the Line of the Navy for promotion to the permanent grade of commodore, pursuant to title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

UNRESTRICTED LINE OFFICER

To be commodore

Edwin Knowles Anderson
Clarence Ervin Armstrong, Jr.
Roger Francis Bacon
Bruce Raymond Boland
Jerry Creighton Breast
Charles H. Brickell, Jr.
Paul Donald Butcher
Richard Franklin Butts
Denny Bruce Cargill
David Fessenden Chandler
Guy Haldane Curtis III
Thomas R. M. Emery
Gerard Joseph Flannery, Jr.
Dale Norman Hagen
John Joseph Higginson
Chauncey Frazier Hoffman
Raymond Paul Ilg
Jerome Lamarr Johnson
Wendell Norman Johnson
Robert Joseph Kelly
Robert Kalani Uichi Kihune
Willis Ivan Lewis, Jr.
Henry Herrward Mauz, Jr.
Alvin Simmerman Newman
William Joseph M. O'Connor
William Tyler Pendley
Leonard Gordon Perry
James Guy Reynolds
Dean Reynolds Sackett, Jr.
John Frederick Shaw
Vernon Charles Smith
Robert Jay Steele

ENGINEERING DUTY OFFICER

Malcolm Mackinnon III
Kenneth Cornelius Malley
Thomas Uhlian Seigenthaler

SPECIAL DUTY OFFICER (CRYPTOLOGY)

Charles Francis Clark

IN THE MARINE CORPS

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard E. Carey, [redacted], U.S. Marine Corps.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed.

DEPARTMENT OF TRANSPORTATION

The assistant legislative clerk read the nomination of L. Steven Reimers, of North Dakota, to be a member of the Advisory Board of the St. Lawrence Seaway Development Corporation.

Mr. ANDREWS. Mr. President, as the one who recommended Steve Reimers for this appointment, I feel particularly appreciative that the administration has recognized the talents and qualifications of a man I have known since we were both farm kids back in North Dakota.

As you know, the St. Lawrence Seaway is one of the major transportation arteries for the export of grain from the upper Midwest, and who better than a farmer with the leadership credentials of Mr. Reimers to bring an unusual depth of skill and experience to the Corporation's Advisory Board.

Mr. Reimers and his family farm in central North Dakota near Carrington. Amongst his many activities which attest to his widely recognized ability, Steve has served on the USDA Advisory Committee on Grains, and has served on and chaired the North Dakota State Wheat Commission.

As a fellow farmer, I am pleased and proud of the recognition the President has given our noble profession through this nomination, and I strongly urge my colleagues to approve it.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF THE INTERIOR

The assistant legislative clerk read the nomination of J. J. Simmons III, of Oklahoma, to be Under Secretary of the Interior.

● Mr. McCLURE. Mr. President, I strongly support the nomination of Mr. J. J. Simmons to be Under Secretary of the Department of the Interior. Mr. Simmons has a solid background in both the public and private sectors. Upon receiving his graduate degree in geological engineering from the University of St. Louis in 1949, he joined a family oil and gas business, where he worked for 13 years. He spent the next decade working in various positions within the Department of the Interior. In his last public capacity he served as the Administrator of the Oil Import Administration. Mr. Simmons then served for 12 years as vice president of government relations for Amerada Hess before being confirmed by the Senate as a Commissioner of the Interstate Commerce Commission in 1982.

Mr. Simmons' distinguished career, particularly his experience within the Interior Department make him eminently qualified for the position of Under Secretary.

The Committee on Energy and Natural Resources held hearings on Mr. Simmons' nomination on Monday, February 14, 1983, and reported him favorable for consideration by the Senate on a vote of 19 to 0. I know of no opposition to Mr. Simmons and strongly urge my colleagues to vote in favor of his nomination.●

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Air Force, in the Army, and in the Navy placed on the Secretary's desk.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

(The nominations confirmed above are printed at the conclusion of today's Senate proceedings.)

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE SECRETARY OF THE SENATE TO TAKE CERTAIN ACTION DURING THE RECESS OF THE SENATE

Mr. BAKER. Mr. President, I have one housekeeping request I wish to make if it is agreeable to the minority leader. Let me state it now for his consideration.

I ask unanimous consent that during the recess of the Senate over until Monday at 10 a.m. next the Secretary of the Senate be authorized to receive and refer messages from the President of the United States and the House of Representatives.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CHAIR TO RECESS SENATE TODAY

Mr. BAKER. Mr. President, I wish, if there is no other Senator who has indicated he has further business to transact today, to enter an order providing that the Chair will recess the Senate in accordance with the order previously entered at the conclusion of the remarks by the minority leader if he is agreeable with that.

Mr. BYRD. Yes. Mr. President, I will do as I did the last day that I made a similar speech. That is, when I get to the last paragraph I shall make sure that there is no other Senator wishing to speak before I read that paragraph because I know the Chair will then recess the Senate.

Mr. BAKER. That is very thoughtful of the minority leader and very accommodating indeed and I thank him for it.

Mr. President, I now ask unanimous consent that at the conclusion of the remarks made by the distinguished minority leader the Chair automatically place the Senate in recess over according to the order previously entered until the hour of 10 a.m. on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I express my gratitude to the minority leader for his cooperation, and I will now leave the floor to his tender mercies.

Mr. BYRD. I thank the distinguished majority leader and wish him a good weekend and look forward to seeing him on Monday next.

THE UNITED STATES SENATE

THE SENATE IN THE TURBULENT 1850's

Mr. BYRD. Mr. President, it is one of the ironies of American history that in the decade preceding the Civil War the states and sections were growing more interdependent. Southern and western agriculture supplied northern industry, which in turn provided those regions with consumers goods. The Mississippi River carried an increasingly heavy north-south trade. And Senator Stephen A. Douglas, the manager of the Compromise of 1850, was fighting hard for a transcontinental railroad to link the Atlantic and Pacific. In fact, it may well have been his fight in the Senate to build that railroad that unleashed the full fury of sectionalism which the Compromise had attempted to contain. The paradoxes of the Kansas-Nebraska Act of 1854, and the turbulent years that followed, will be the subject of my remarks today, in my continuing series of addresses on the history of the United States Senate.

As Senator from Illinois, and Chairman of the Senate Committee on Territories, Stephen Douglas was most interested in settling the western territorial issues so that a transcontinental railroad could be built from Chicago to California. Of most immediate concern to him was the "Nebraska Territory," an area covering present-day Kansas, Nebraska, North and South Dakota, and Montana. Any railroad out of Chicago would necessarily pass westward through this territory. But the Nebraska Territory lay north of the Missouri Compromise line, and was therefore closed to slavery. Southern senators opposed such a route and threatened to filibuster against it. They instead favored a southern route through Texas. If Senator Douglas was to succeed, he would have to find some means of organizing the Nebraska territory that would be acceptable to both North and South.

On January 4, 1854, Douglas introduced a bill to organize the territory "with or without slavery, as their constitutions may prescribe at the time of admission." While this provision clearly contradicted the Missouri Compromise of 1980, which prohibited slavery north of the 36th degree of latitude, it was not strong enough to please proponents of slavery. Led by Senator David Atchison of Missouri, they pressed for an explicit repeal of the Missouri Compromise. It was Senator Archibald Dixon, a Kentucky Whig, who took Stephen Douglas, an Illinois Democrat, aside to convince him that only the repeal of the prohibition on slavery in the territories would save his bill. "By God, sir, you are right," Douglas responded at last. "I will incorporate it in my bill, though I know it will raise a hell of a storm." [1] He was correct in anticipating the ferocity of opposition to his measure.

On January 24, Douglas introduced his revised bill, which now divided the territory into Nebraska to the north and Kansas to the south. Contained in the Kansas-Nebraska bill was the explicit repeal of the Missouri Compromise which Southerners had demanded. Douglas explained that he introduced his bill early in the first session of the Thirty-Third Congress, because: "I find it generally to be the case with my territorial bills, that if I do not get them acted on early in the session they are crowded over by other business at the end of the session, and are always postponed for want of time." Senator Salmon P. Chase of Ohio then rose to request a postponement in the debate over the bill since few senators had had the opportunity to read the new version. Douglas graciously acceded to this request, not knowing that Chase and Massachusetts Senator Charles Sumner, both Abolitionists, had already prepared a stinging denunciation of his bill for publication as "The Appeal of the Independent Democrats." They wanted the debate held up until their charges could appear in the newspapers. Their broadside denounced Douglas for betraying the nation to "slavery despotism" by permitting slavery into the territories. After publication of this appeal, as Professor David Potter has noted, the Nebraska bill ceased to be primarily a railroad question and became instead a slavery question.[2]

When debate on the Kansas-Nebraska Act resumed on January 30, 1854, Senator Douglas was clearly a very angry man. "Sir," he said on the Senate floor, "little did I suppose at the time that I granted that act of courtesy to the two senators, that they had drafted and published to the world a document, over their own signatures, in which they had arraigned me as having been guilty of a criminal betrayal of my trust, as having been guilty of an act of bad faith against the cause of free government." Douglas had good reason for anger. The opponents of his measure had personified the issue by identifying it with him, and had stirred public sentiment against the senator throughout the north. Public opinion so turned against him that Douglas later remarked that he could ride all the way from Washington to Chicago by the light of his burning effigy. The anti-slavery senators, however, denied that they intended to make Douglas himself the object of their attack. "Sir, our offense is that we deny the nationality of slavery," Senator Chase responded. "All that we have ever insisted upon is that the territories of this Union shall be preserved from slavery." [3]

These speeches set the tone for the three and a half months of debate that followed. On February 6, 1854, for instance, the new Senator from Ohio, the vituperative Ben Wade, jumped into the fray with a fiery speech against Douglas. He had been but a young man when Congress

passed the Missouri Compromise in 1820 to save the Union, Wade recalled, and was also not a member of the Senate when the Compromise of 1850 was passed to soothe sectional anxieties. Now he professed to have been shocked when the chairman of the Committee on Territories announced that the 1850 compromise had superceded that of 1820 and wiped out the Missouri line between slavery and freedom. What was at stake, Wade insisted, was a vast territory, "large as an empire. It is pure as nature; it is beautiful as the Garden of Eden," and it should not be sullied by slavery. Free farmers of the north should not be degraded by working on the same level as slaves. "I am a believer in the Declaration of Independence," said Ben Wade. "I believe that it was a declaration from Almighty God that, all men are created free and equal, and have the same inherent rights."

Senator Dixon of Kentucky was immediately upon his feet. "Does the senator mean that the slave is equal to those free laborers that he speaks of in the North?" Dixon asked.

"Certainly. Certainly," replied Wade. "The slave, in my judgment is equal to everybody else, but is degraded by the nefarious acts and selfishness of the master, who compels him, by open force and without right, to serve him alone."

"Does the senator," Dixon persisted, "consider the free negroes in his state as equal to the free white people."

"Yes," said Wade. "Why not equal? Do they not all have their life by Almighty God?"

Anti-slavery senators like Wade were willing to accept that the Constitution of the United States was itself a compromise between the free and slave states. Although the Constitution had prohibited the importation of slaves after 1808, it had established a system whereby three-fifths of the slaves would be counted for purposes of apportioning representation, thereby increasing Southern power in the House of Representatives. In effect, the Constitution recognized and permitted slavery, at least where it already existed. The North had helped enforce the law, had accepted the institution of slavery in the South, although Northern states had themselves abolished slavery long before. But, said Ben Wade, "what will be said when you have thrown down the gauntlet on the other side, and told us that compromises for our benefit mean nothing at all?" [4]

Southerners, by contrast, argued that they had inherited the institution of slavery. Senator James C. Jones of Tennessee complained that Wade's speech had been "a tirade of abuse and denunciation of an institution which had descended to us from the fathers of the Republic." The very men who had fought the battles for liberty and independence, George Washington, Thomas Jefferson, James Madison, and so many others, had been owners of slaves. From these "fathers of the Republic" Southerners had inherited slavery as an economic and social system, and they could not conceive of life and orderly society without it. Abolition of slavery, as they saw it, would mean the collapse of their economy and ultimate economic domination by the industrial North.

Slavery also provided a system of absolute racial superiority, and they feared its unraveling. For Southerners the question was the legitimacy of their peculiar institution. If slavery was not an evil, but a necessity, then it should not be forever boxed into a limited area. Southerners, like those from other states, should be permitted to expand westward—or even southward into the Caribbean.

For Northerners, whether they morally accepted or rejected the institution of slavery—and there was no unanimity in the North over the question—the *extension* of slavery would undermine the ideals of the nation. The very existence of slavery made a mockery of the phrase "all men are created equal." Its extension meant a degradation of labor. Individual farmers would be placed in unfair competition with slaveowners and slave labor in the fields. The future of America, the "Garden of Eden," that they wanted, would be corrupted with the spread of slavery.

The lines were being drawn sharply, so sharply that they divided members of the same party. As Senator Jones, a Southern Whig, responded to Senator Wade, a Northern Whig: "If he [Wade] considered the association which has bound us together as members of the great Whig party to imply that I had any affinities with the doctrines which he proclaims here today, I now and forever eschew any such understanding, intention, or purpose . . . I utterly deny that it ever was, or ever can be, a principle of the Whig party, to inveigh against the institutions of the country which have descended to us from our fathers." The anti-slavery advocates, however, remained decidedly in the minority in both parties, and the efforts of Chase, Sumner, Wade, and others to strike from the Kansas-Nebraska bill the language which nullified the Missouri Compromise, lost by a vote of 13 to 30.[5]

An air of tension filled the Old Senate Chamber during the debate over the Kansas-Nebraska bill. Senators huddled together in frequent and sometimes frantic caucuses preparing amendments and other strategy. Senator Douglas, as floor manager for the bill, stayed largely in the background and allowed others to indulge in oratory. Senator Chase of Ohio—a formidable opponent who later became Chief Justice of the United States—led the anti-slavery forces. Although decidely in the minority, Chase exploited all the weaknesses and ambiguities in the bill, forcing Douglas to take more clear-cut stands than he had hoped would be necessary. How, for instance, should the popular sovereignty aspects of the bill be interpreted? Chase maintained that it would give the people of the territories, through their territorial legislatures, the power to ban slavery. This was indeed true, although Douglas had been arguing a policy of noninterference with slavery in the territories. That the territories should have the power to allow slavery, was a considerable change in emphasis. Chase's pressure on this point helped raise Southern doubts and fears about the results of the Kansas-Nebraska Act.[6]

Senator Douglas, and other Northern advocates of the bill simply did not believe that slavery would be economically feasible on the frontier. The climate and geography of the Plains territories would be inhospitable to the large-scale plantation farming that existed in the South. The majority of the settlers in these territories would be subsistance farmers, relying more on family labor than slave labor; and when these territories reached the stage of applying for statehood, their citizens would most likely adopt anti-slavery constitutions. But while Douglas believed this, he could not openly argue it without losing Southern support.

Public opinion weighed on everyone's mind, and the Kansas-Nebraska bill was stirring up hostile reactions in both the North and the South. Senator Lewis Cass, a supporter of the bill, quoted some of the more flamboyant charges made against it:

"This bill is a silent, halting, creeping, limping, aquinting motion, conceived in the dark, and mid-wifed in a committee room. It is a farrango, an olla-podrida /which was a highly seasoned Spanish stew, also known as a 'rotten pot'/. It is a juggle worthy of the trick of one egg under three hats. It is buttered on both sides. It is untrue, contradictory, suicidal, and preposterous. It is a shilly-shally, willy-won't, don'ty, can'ty style of legislation." [7]

As the debate wore on, as Professor Robert Johannsen has written in his stirring biography of Stephen Douglas,

"the exhaustion of the senators took its toll as they became increasingly impatient and irascible, quick to take affront and magnifying small details into major issues. Insults were hurled and denied, and quarrels broke out even among friends of the bill." All of this climaxed on the afternoon and evening of March 3, 1854. The debate lasted all night. Douglas did not gain the floor until nearly midnight. "Will the senators give way to a motion to adjourn?" he asked. "Oh, no! Oh, no!" came the reply. Douglas then offered to waive his final speech, but again the crowd responded: "Oh, no; go on." [8]

One of those who witnessed Douglas' speech that night was the Senate Doorkeeper, Isaac Bassett. Bassett recorded in his diary that this speech was one of Douglas' greatest and most memorable efforts. The galleries were filled with a brilliant array of ladies and gentlemen. Ladies who could not find seats in the galleries were invited onto the Senate floor. The appearance of Senator Douglas provoked applause from the assembled crowd, which sat through his entire three-hour address, late into the night. Isaac Bassett gives us a vivid description of the "Little Giant," Stephen Douglas, whom he called "one of the foremost debaters in the Senate. He had a rich voice, fluent in speech . . . He was short in stature, broad-shouldered, deep-chested /with/ a large developed head . . . somewhat like Daniel Webster's . . . In person he was considerably below the common height of men. Thick set, large expanding chest, remarkable large head, dark hair and eyes. Wide of mouth, he had a loud, full voice. As a speaker he was forcible, strong, clear, rapid. As he progresses he throws his whole soul into a subject." As Bassett recalled, "the multitude hung upon his words."[9]

Senator Douglas concluded debate on the Kansas-Nebraska bill with a lucid, well-reasoned speech. He held back no scorn for the arguments of his four leading opponents, Seward, Chase, Wade, and Sumner. Popular sovereignty, he insisted, would solve the sectional problems of the country and provide for the peaceful settlement of the great western territories. "You cannot fix bounds to the onward march of the great and growing country," Douglas told the Senate. "You cannot fetter the limbs of the young giant. He will burst all your chains. He will expand, grow, and increase, and extend civilization, Christianity and liberal principles." At last, at five in the morning, after seventeen hours of continuous debate, the Senate was ready to vote. Earlier, in a private letter, Douglas had predicted that if the full Senate voted, he would win by a margin of 45 to 17. As it transpired, the Senate vote was 37 to 14, showing that the "Little Giant" was a shrewd head-counter.[10]

Debate then shifted to the House of Representatives, and Senator Douglas was present at almost every session in which the House took up the Kansas-Nebraska bill, rallying its supporters. The House passed the bill on May 22, and President Franklin Pierce signed it into law on May 30. No one, especially not its sponsor, could imagine what a fury this bill would unleash.

Mr. President, it is outside the intended scope of my speeches to describe in detail the events that followed the passage of the Kansas-Nebraska Act. We may remember how Northern Abolitionists sponsored anti-slavery settlers to move into Kansas, and how pro-slavery Missourians crossed the border into Kansas to outvote Northern settlers. Douglas' bill, and his dream of popular sovereignty, had not led to peaceful settlement, but to open warfare between partisans of both sides, with Kansas as the stage and the Nation as the audience. The anti-slavery settlers located in and around the town of Lawrence. The pro-slavery forces concentrated at Leavenworth. After an election marked by thinly disguised election frauds, the pro-slavery settlers elected a territorial government, which immediately passed laws to permit slavery in Kansas and to make it illegal even to question the right to hold slaves. Meanwhile, the anti-slavery forces elected their own governor and legislature. Two "Kansases" existed, and each petitioned the federal government for recognition as a state.[11]

Senator Douglas was appalled by this course of events. By all accounts, Douglas was an ambitious man who had hoped for the Democratic nomination for president in 1852 and 1856; but on both occasions the nod went to lesser men, Franklin Pierce and James Buchanan, both "Northern men with Southern principles." The intense reaction against the Kansas-Nebraska Act throughout the North clearly threatened Douglas' presidential chances. He became the personification of the bill and the subject to countless petitions from clergy and other Northern groups denouncing him for his role in its passage. Douglas also became the target of a new political party that sprang from the opposition to his bill.

The "Appeal to the Independent Democrats" had galvanized anti-slavery forces. Many members of the Free Soul Party, and those who identified themselves as Free Democrats, began to rally together with anti-slavery Whigs. On March 20, 1854, in Ripon, Wisconsin, a meeting of those opposed to the Kansas-Nebraska Act proposed the creation of a new party, to be called the Republican Party. New York Tribune editor Horace Greeley gave this idea national publicity, and the new party with surprising speed and force. Anti-slavery Whig senators like Ben Wade abandoned their party to join the Republicans, as did Free Democrats like Senator Charles Sumner. Republicans ran a strong race in the elections of 1854, and Douglas' home state of Illinois elected a Republican senator, Lyman Trumbull (who defeated former Congressman Abraham Lincoln among others). The Democrats retained their majority in the Senate but lost control of the House to the new party.[12]

When the Thirty-Fourth Congress opened on December 3, 1855, opponents of the Kansas-Nebraska Act immediately seized the initiative. New Hampshire Senator John Hale introduced the following resolution on December 6:

> Resolved, That the President of the United States be requested to inform the Senate whether he has received any evidence of such resistance to the execution of the laws in Kansas as to require the interposition of military force for the restoration or preservation of law and order in that Territory; and if he has received such evidence, that he will lay the same before the Senate, and also copies of any order which may have been issued by his authority for the employment of military force in said Territory, if any such order has been issued.[13]

The Senate, however, carried on no substantive business throughout December and into January 1856 because the House was locked in a protracted battle over the election of a speaker. Meanwhile, the situation in Kansas worsened. The Territorial Governor appealed to President Pierce for Federal troops to maintain order. On January 24, Pierce notified Congress that he had decided "it is not the duty of the President of the United States to volunteer interposition by force to preserve the purity of elections either in a State or Territory." Pierce recommended instead that Kansas be permitted to organize into a state government, to "dispose of the question itself/slavery/which constitutes the inducement of occasions of internal agitation and of external interference." Thus the House was disorganized, the Senate paralyzed, the president timid, and the situation grave.[14]

During this period, Senator Stephen Douglas was absent from Washington, suffering from a severe case of bronchitis. He returned still weak and fatigued in early February 1856, but once again tried to seize the leadership on the controversial territorial issue. As chairman of the Committee on Territories, Douglas immediately went to work on a committee report to make Kansas a state. On March 12, he submitted the 40-page report to the Senate, and read it aloud for some two hours. This report, as Douglas' biographer has noted, was "a significant step in the development of Douglas' view of popular sovereignty. No longer satisfied merely to defend it as an expedient, or even as a moral right, he now sought a legal and constitutional basis for his position. Congress' power to create territories derived from the power to admit new states; in organizing a territory, Congress must not impose any limitation that would destroy or impair the equality of the proposed state with the original states." While Douglas and the committee's majority wanted the issue decided by the Kansas settlers, Senator Jacob Collamer of Vermont presented the minority report, which proposed that Kansas be admitted as a free state."[15]

Douglas' report brought oratorical rebuttal from Senators Charles Sumner and William Seward, but it was the Senate's newest member, the junior senator from Douglas' home state—Lyman Trumbull—who drew the greatest attention. All eyes fixed on Trumbull when he rose in the Senate to speak on March 14, 1856. Trumbull dismissed Douglas' theory of popular sovereignty for its "vagueness and uncertainty." He quoted from the Territorial committee's report that Northern settlers had moved west to "abolutionalize" Kansas. "What! *abolutionize* Kansas!" cried Trumbull. "It was said on all sides of the Senate chamber that it was never meant to have slavery go into Kansas. What is meant, then, by abolutionizing Kansas? Is it abolutionizing a territory already free, and which was never meant to be anything but free, for free-State men to settle it? I cannot understand the force of such language." [16] During Trumbull's speech, Senator Douglas entered the chamber and sought recognition. Furious that Trumbull had not notified him in advance of the speech, Douglas explained that he had been absent due to ill health. "I never dreamed that any man in this body would so far forget the courtesies of life, and the well known usages of the Senate, to make an assault in my absence in violation of the distinct understanding of the body when the subject was postponed." Since Trumbull's speech would not be published in the *Congressional Globe* until the following Monday, Douglas announced that he would give his own rebuttal the next week, after he had had the opportunity to read Trumbull's charges.[17]

Thursday, March 20, was the appointed day for Douglas' remarks. As was so often the case during those great nineteenth century debates, it seemed as if the whole populace of Washington sought admittance to the Senate galleries. The doorkeeper, Isaac Bassett, recorded in his diary that "the Ladies from a very early hour filled the Galleries, occupying even that assigned to the Reporters." Douglas had a great reputation as an orator, and on that occasion he did not disappoint his listeners. Dressed in a black suit, with his frock coat buttoned to his chin to protect his ailing throat, Douglas addressed the Senate for some two and a half hours. Douglas began by berating his Illinois colleague, Lyman Trumbull, for having deserted the Democratic Party and allied himself with "Black Republicanism." He defended his report, and his theory of popular sovereignty, and taunted his opponents by noting that the free-State settlers in Kansas wanted to ban the immigration not only of slaves but of free blacks into their territory, at the same time they claimed to be "especial friends of the negro." Popular sovereignty would work, he insisted, but it was being subverted by "two rival and hostile systems of emigration" being organized by extremists in the North and South to capture Kansas. Douglas' remarks, Professor Johannsen concluded, "aroused admiration and praise, if not always agreement." But for all Douglas' efforts, he could not bring the Kansas statehood bill to a quick vote, and the debate went on for months.[18]

The year 1856 was a presidential election year and Douglas was a leading candidate for the Democratic nomination. But he had come to epitomize the Kansas controversy, and had become the target of abuse from both Northern and Southern partisans. "Douglas has brains," wrote a reporter for the *New York Times*, "but so has the Devil, so had Judas and Benedict Arnold." Another detractor was Massachusetts' patrician Senator Charles Sumner. To the tall and haughty Sumner, the short and stocky Douglas was "a brutal vulgar man without delicacy or scholarship/who/looks as if he needed clean linen and should be put under a shower bath." It is hard to imagine two more dissimilar men than Douglas and Sumner, violently opposite in politics, style, and demeanor. But in that year of 1856, both men became national symbols—Douglas of the popular sovereignty approach to the territorial issue, and Sumner of the unyielding free soil approach. Senator Sumner also became a symbol of the violent current bubbling just below the surface of this political controversy.[19]

For two months, Sumner prepared an elaborate speech in defense of the free-State government of Kansas. Moreover, he intended the speech to defend his home state for its support of the free soil movement, and to attack Douglas and the leaders of the South. Senator Sumner was not considered a man of moderation, tact, and conciliation. But even for him his "Crime Against Kansas" speech was extreme in its bitterness and reckless in its denunciations. Again the galleries were packed on May 19, when Sumner addressed the chamber. Sumner denounced the Kansas-Nebraska Act as a "swindle," and claimed that Douglas' popular sovereignty had resulted in "popular slavery." During this speech, Sumner described Douglas as the "Sancho Panza" of slavery, and ascribed the role of "Don Quixote" to South Carolina's Senator Andrew Butler.

Sumner was particularly severe in dealing with the sixty-year-old State Rights Democrat, Butler, who was not present in the chamber during the attack. Here is a portion of his remarks:

> The Senator from South Carolina has read many books of chivalry, and believes himself a chivalrous knight, with sentiments of honor and courage. Of course he has chosen a mistress to whom he has made his vows, and who, though ugly to others, is always lovely to him; though polluted in the sight of the world, is chaste in his sight—I mean the harlot, Slavery. For her, his tongue is always profuse in words. Let her be impeached in character, or any proposition made to shut her out from the extension of her wantonness, and no extravagance of manner or hardihood of assertion is then too great for this Senator. The frenzy of Don Quixote, in behalf of his wench, Dulcinea del Toboso, is all surpassed.[20]

Strong words! Today such remarks would be ruled out of order as a violation of Senate Rule 19, prohibiting senators from imputing the conduct of other senators. In 1856, however, the Senate had no such rule, although *Jefferson's Manual* prohibited speakers from "reviling, nipping, or unmannerly words against a particular member." Charles Sumner had clearly stretched the bounds of decorum to their utmost limit. One of Sumner's admirers, the Senate's principal clerk, Lewis Machen, wrote to his son that Sumner's rhetoric had not been exhibited "since the palmy days of Webster," but that he regretted that the senator had indulged in personal expressions whose only effect would be to "irritate and wound."[21]

Irritate they certainly did. Sumner's words irritated, wounded, and inflamed many in Washington, most notably Senator Butler's nephew, Representative Preston Brooks of South Carolina. Brooks had been among the crowd in the Senate chamber that had heard Sumner's allusions to Butler as Don Quixote. "I felt it to be my duty to relieve Butler and avenge the insult to my State," Brooks wrote to his brother. He chose as his weapon a gutta-percha walking stick with a gold handle. At first, Brooks planned to assault Sumner on the Capitol grounds, but when the senator failed to pass by, the congressman sought him in the Senate chamber.

It was 12:45 p.m. on Thursday, May 22, 1856, when the Senate adjourned, in memory of a recently deceased member of the House. Sumner was seated at his desk in the rear row of the Senate chamber, franking copies of his "Crime Against Kansas" speech to send to his constituents. Brooks approached him from the front aisle and called his name. As Sumner looked up, Brooks said (according to Doorkeeper Isaac Bassett, who witnessed the scene): "I have come over from the House to chastize you for the remarks that you made against my relation, Senator Butler. I have read your speech and it is a libel on South Carolina." As Brooks spoke those words, he raised his cane and brought it down upon Sumner's head, and then again, and again, and again in fury. Sumner, dazed from the blows and blinded by blood, lurched up from his desk, which

was bolted to the floor, ripping it loose as he struggled to stand. Sumner lifted his arms to protect himself, but the blows fell about his head, and neck, and shoulders until the cane has smashed itself to pieces against his body. Witnesses described Sumner "reeling around the seats, backwards and forwards." All this took place within a minute's time, before any of the other senators or staff could come to Sumner's aid.[22]

Senator Cass and Doorkeeper Bassett rushed to assist the injured Sumner, lifting him up and helping him into the reception room. There Bassett got towels and a basin of water and washed his head, which bled profusely. A physician was called for, and at first it was feared that the blows had fractured his skull. Soon it was determined that the wounds were serious but not fatal, and the senator was able to walk down the Capitol steps and take a carriage back to his lodgings.[23]

We can imagine the commotion in the Senate chamber at this time. Brooks had appeared in the chamber with two House members for protection, Representatives Lawrence Keitt of South Carolina and Henry Edmundson of Virginia. Few senators had been present in the chamber, since the Senate had adjourned for the day, and even fewer wished to come to the unpopular Sumner's rescue. Indeed, it was another House member, Ambrose Murray of New York, who grabbed Brooks' arm to prevent him from further striking Sumner. During the melee, Whig Senator John J. Crittenden of Kentucky approached Brooks to denounce the use of force in the Senate chamber. When Congressman Keitt lifted his cane against Crittenden, Georgia Senator Robert Toombs came to the elderly Kentuckian's defense.[24]

During the assault, Senator Douglas had been talking with colleagues in the reception room. When a messenger burst in with the news that Sumner was being attacked, Douglas jumped to his feet, but then thought the better of it. Considering his poor relations with Sumner, he decided against becoming involved. Indeed, Senator Sumner later stated that he thought Douglas had accompanied Congressman Brooks—a mistake he made perhaps because the nearsighted Sumner was not wearing his glasses during the attack. But later, when Sumner had left the Capitol and staff members were picking up the papers that had been scattered throughout the chamber, Douglas approached the staff member who had found the gold handle (all that was left intact of Brooks' cane) and asked to keep it as a momento of the occasion.[25]

Mr. President, it is appalling even to this day to think of such an unprecedented—and fortunately never repeated—attack on a member of the Senate as he sat at his desk in the chamber. The caning of Senator Sumner became a symbol of the rising tide of violence between the North and the South, and of the tensions under which the political leaders of the nation had to deal. Sumner became a hero to the North, just as Brooks became a hero to many in the South. Brooks and his companions walked out of the Senate chamber unhindered that day. The House debated expelling him for his actions, but failed to do so on a straight party-line vote. Brooks then resigned his seat and was immediately reelected by voters in his district. Death, however, cut short this mercurial and hot-tempered young man. Preston Brooks died six months later at the age of thirty-eight. His companions, Keitt and Edmundson, were also brought before the House on charges. The House voted to censure Lawrence Keitt, who then resigned and was reelected. A similar censure vote against Henry Edmundson was unsuccessful. It is amazing that their behavior was so lightly punished. Sumner, in the meantime, began a long and painful recuperation, which kept him absent from the Senate for the next three years. Some of his critics charged that he was afraid to return, and his biographer, Professor David Donald, has suggested there were psychosomatic reasons for this long absence, but the fact is that Sumner's empty chair in the chamber was a powerful reminder to those who felt the day for compromise over slavery had ended.[26]

The Senate appointed a committee of five to investigate the caning of Charles Sumner, and debate over the issue was often heated and furious. Out in Kansas, events turned even more ominous. Word reached Washington that pro-slavery forces had sacked the anti-slavery capital of Lawrence. Thus "Bleeding Kansas" and "Bleeding Sumner" became rallying cries for the North. Nor were acts of atrocity limited to pro-slavery factions. In response to the sack of Lawrence, in which the newspaper presses, hotel, and a few houses were burned, a fanatic named John Brown raised a small posse to wreak vengeance, killing five pro-slavery settlers at Pottawatomie Creek. Civil war had broken out in Kansas. These events worked against the presidential candidacy of Stephen A. Douglas, who had hoped to win recognition for his political compromises to settle the territorial issue. Instead, Douglas was again passed over for the Democratic nomination, which this time went to James Buchanan. Former Senator and Secretary of State Buchanan had the advantage of being absent from the country during the past trying years, as Ambassador to the Court of St. James. Another "Northern man with Southern principles," Buchanan was popular among Southern Democrats.

The new Republican party nominated its first candidate for the presidency, the flamboyant explorer, military man, and former senator from California (as well as the son-in-law of Thomas Hart Benton), John C. Fremont. Although Buchanan defeated Fremont, Fremont's very candidacy as an anti-slavery Republican struck fear in many Southern hearts and talk of secession spread through such states as South Carolina and Virginia. Fremont's strong showing in many Northern states seemed to portend a Republican victory in the not-to-distant future, which Southerners saw as the end of the Union.

As the distinguished historian Roy Nichols has written: "The Democratic victory of 1856 settled nothing." It merely established a four-year truce. President Buchanan began his administration with a vain hope that the territorial issue could be solved not by the Congress or by his administration, but by the Supreme Court. Chief Justice Roger Taney had let the president know that the court would soon hand down a landmark decision on slavery in the territories. On the day that the Senate considered Buchanan's cabinet nominees, one flight below in the Old Supreme Court Chamber, Chief Justice Taney read the majority opinion in the now famous Dred Scott case. No matter what the fuss had been over the Kansas-Nebraska Act, the court ruled that the Missouri Compromise had been unconstitutional to start with, on the grounds that Congress could not deny rights in the territories that were enjoyed in the states. The Republican Party's platform was thus declared unconstitutional. It was folly for the court to believe they could settle such an emotional issue so simply.[27]

In the election of 1856 the Democratic Party regained control of the House of Representatives, and retained its majority in the Senate. But the party had lost an important internal balance. Whereas before the controversy over the Kansas-Nebraska Act the Democrats had been divided roughly equally between North and South, now the Southern Democrats had a commanding lead in both houses: 75 to 53 in the House, and 25 to 12 in the Senate. This erosion of the Northern Democratic bloc weakened the role of Stephen Douglas and correspondingly strengthened the hand of the new president.[28]

Although Douglas was the leader of the Northern Democrats in Congress, we would be mistaken to think he was anti-Southern. Douglas approved of the Dred Scott decision, which held that black people were not citizens of the United States and did not share in its civil rights; he accepted racial inferiority; and through his wife's inheritance he owned slaves in Louisiana.

Douglas spent his years in Congress trying to unite the sections of his party, not divide them. He never ceased appealing to the Southern Democratic constituency. But events kept pressing the sections farther apart, and inflaming issues beyond Douglas' ability to control them.

It was Douglas who had first sponsored Kansas statehood, and it was Douglas who paid the greatest price when Kansas eventually did apply to enter the Union. In 1857, pro-slavery settlers met in Lecompton, Kansas, in a constitutional convention. There they drafted a predictably pro-slavery constitution. But whereas Douglas expected they would submit the constitution to the population of the territory for ratification—the "popular sovereignty" he had long espoused—the convention instead sent the Lecompton Constitution directly to Congress for approval. Douglas considered this act a sham and a violation of popular sovereignty. He commented privately that he could not support the Lecompton Constitution without "repudiating all the acts of my life, and doing a political act that I did not believe was moral and just."[29]

If Stephen Douglas had been solely an ambitious man with his sights set on the White House, he would have endorsed the Lecompton Constitution, demonstrating his loyalty to the Buchanan administration and winning the support of Southern radicals. It is a measure of the man that he did not choose to abandon his principles to satisfy his ambitions. When President Buchanan's first State of the Union message was read to the Senate on December 8, 1857, Senator Douglas was the first to rise in response, saying: "I totally dissent from all that portion of the message which may fairly be construed as approving of the proceedings of the Lecompton convention." The next day, Douglas delivered a major address against the Lecompton Constitution, stating that it did not reflect the will of the people of the territory because it had not been submitted to the inhabitants in a referendum. "I do hold that the people of Kansas have the right to be consulted and decide it," he insisted. "If this constitution is to be forced down our throats, in violation of the principle of free government, under a mode of submission that is a mockery and insult, I will resist it to the last." The *Congressional Globe* records that "at the conclusion of the honorable gentleman's speech loud applause and clapping of hands resounded through the crowded galleries."[30]

On February 2, 1858, the president submitted the Lecompton Constitution to the Senate. By this time, not one but two referendums on the constitution had been held in Kansas. One by pro-slavery forces produced a vote of 6,000 votes in favor and 500 opposed; the other vote, taken by anti-slavery settlers, produced 10,000 opposed to the Lecompton Constitution, with 100 supporting it. If a fair vote had been taken of all settlers throughout the territories, it appears that the pro-slavery constitution would have lost by a wide margin. Still, the Buchanan administration defended it as the will of the people of Kansas. Among those who wholeheartedly supported Buchanan, the Lecompton Constitution, and the extension of slavery into all the territories, was the stately senator from Mississippi, Jefferson Davis. One visitor to the galleries, Miss Mary Jane Windle, who wrote occasional articles on Washington life for the South Carolina papers, described the "profound silence and the fixing of every eye" on Senator Davis when he rose to speak. "Since the days of Mr. Clay, we have never heard any one so powerfully rivet the attention of the spectators as this gentleman (Mr. Jefferson Davis). It is scarcely an exaggeration to say that his keen eye literally blazed as he poured forth a torrent of withering sarcasm and cursching invective."[31]

It soon became clear that while Stephen Douglas commanded great public attention and could fill the galleries for his speeches, he no longer led the Senate Democratic forces. Even on his own committee the pro-Lecompton majority took control of writing the committee report on Kansas away from the chairman, and forced Douglas to file a minority report. During the debate on Lecompton during March, Douglas was too ill to participate, but he rallied his strength to give the concluding speech, speaking to a "prodigious multitude" in the chamber "beyone all precedent." On March 23, the Senate voted 33 to 25 to uphold the Lecompton Constitution. Only three other Democrats and two Whigs joined Douglas in voting with the Republican minority against the measure. The House, however, adopted a different measure, recommending that the Lecompton Constitution be returned to Kansas for a popular vote. This proposal was unacceptable to the majority in the Senate, and finally a conference committee met to reach a compromise. The Lecompton Constitution would be resubmitted to the Kansas voters, but they would vote only on a land grant issue, not on slavery. This compromise was adopted by the Senate and House at the end of April, and the Lecompton Constitution went back to Kansas, where the settlers overwhelmingly rejected it, as Douglas believed they would.[32]

Stephen Douglas' split with the Buchanan administration had clearly jeopardized his position as a national Democratic leader, and there were many who suspected he might switch his allegiance to the new Republican Party, or to work some form of coalition between Northern Democrats and Republicans based on anti-Lecomption sentiments—a strange twist for the man whose Kansas-Nebraska Act had led to the birth of the Republican Party in the first place. But Douglas was not destined to become a Republican, and indeed, in 1858 he faced a challenge for reelection to the Senate from the Republicans of Illinois, who nominated a Springfield lawyer and former congressman by the name of Abraham Lincoln. The Lincoln-Douglas debates of that famous senatorial election are so much a part of our popular history that we may forget that it was Douglas, not Lincoln, who won the election, albeit by a slim margin. But, while the Illinois state legislature returned Stephen Douglas for another term in the Senate, Lincoln's crafty debating had forced Douglas to take stands that would separate him both from Northern Republicans and Southern Democrats. Douglas returned to the Senate for the second session of the Thirty-Fifth Congress in a considerably weakend position.

Symbolic of Douglas' shaky position was his loss of the chairmanship of the Committee on Territories, his power base in the Senate. The Democratic caucus met on December 9, 1858, to assign members to committees and immediately became bogged down in debate over Douglas. Senators Jefferson Davis of Mississippi, John Slidell of Louisiana, and Jesse Bright of Indiana led the fight to remove Douglas, and President Buchanan added his endorsement by passing the word that Douglas was no Democrat and did not deserve a chairmanship. The caucus action in stripping Douglas of his chairmanship reflected a hardening of sentiment among pro-slavery senators. They now rejected popular sovereignty as a half-way measure, and insisted on nothing less than complete equality for the South in expansion into the Western territories.[33]

This was the first time in history that a senator had been removed as a committee chairman. In subsequent years, only one other senator lost his chairmanship: Charles Sumner, who was removed as Foreign Relations chairman in 1871. (In 1913, the Democratic caucus prevented Senator Benjamin Tillman from becoming chairman of the Appropriations Committee because he had suffered a stroke. And in 1924 the Republican conference removed Senator Albert Cummins as chairman of the Interstate Commerce Committee because he was also president pro tempore; the conference also rejected the ranking Republican, Robert La Follette, because of his independent politics—thus although the Republicans held a majority in the Senate, the committee chairmanship went to a Democrat by default.)[34]

Although rejected, Stephen Douglas did not storm out of the Democratic Party; he remained to fight within its ranks. In 1860 Douglas was again a candidate for its presidential nomination. But by then the split in the party was irreparable. At the Charleston convention, the Democratic party divided into two hostile camps. Southern Democrats nominated Vice President John Breckinridge for president; Northern Democrats removed to Baltimore where they nominated Stephen Douglas as their candidate. In that presidential election, Douglas once again faced Abraham Lincoln as his Republican challenger, but with the Democratic Party divided there was no hope for Douglas' election. It is a tribute to Douglas' statesmanship that he devoted his remaining months to supporting President Lincoln and opposing the secessionist movement. He placed the Union over all political considerations. Stephen Douglas died in June 1861, at the age of forty-eight.

Mr. President, I have been speaking today about the Senate in the turbulent 1850s. Without a doubt, this must have been the most difficult of all decades in the Senate's history. When we look back at the deepening divisions between North and South, we marvel that the Senate was able to conduct any business at all during those trying times. It is instructive to note that despite the fiery rhetoric, despite the sectional passions, the Senate's precedents, traditions, and folkways—what political scientists call its "norms"—continued in place and enabled the Senate to function as a body. Professor Dean Yarwood of the University of Missouri has done a content analysis of the *Congressional Globe* for the Thirty-First and Thirty-Sixth Congresses, which frame the 1850s, to study the use of order, decorum, courtesy, and "gentlemanly deportment" in the Senate and found a strikingly high percentage of observance of Senate rules and norms. Legislative norms, he noted, "provided one standard of fair play by which the behavior of unionists and secessionists alike could be judged by people in the border states." Both sides were appealing to this neutral faction, and felt compelled to play within the rules and to present a dignified case. "During the processes leading to disintegration," Professor Yarwood wrote, "Senate norms allowed the articulation of sharp conflict and at the same time limited its scope so as to minimize the chances that physical conflict would break out and bring about the unintentional rupture of the Senate." [35]

Perhaps the weight of history also bore on these men, as they dealt with the nation's affairs on the eve of a terrible civil war. The Senate at that moment made a great change, which drew the attention of its members back for a moment from the issues of the day to its illustrious past. On Tuesday, January 4, 1859, the Senate held its last session in its old chamber, and prepared to move to its new accommodations. The issue of the territories, which had caused the disturbances of the 1850s, was also responsible for this move. For so many new states had been added to the Union in the 1830s, '40s, and '50s that both the Senate and House had outgrown their chambers. In 1851, the cornerstone for the new Senate wing had been laid, and by 1859, the new chamber, in which I stand today, and new committee rooms were ready for occupancy. The *New York Times* described the new chamber—this very chamber—as "an immense oblong apartment with sloping galleries on its four sides, capable of holding about seventeen hundred spectators, and with gilded partitions dropping down from the floor of the galleries aforesaid to the floor. The light comes in from above, through windows richly colored with armorial bearings of the various States; while the remainder of the ceiling is a mass of fresco and gilding, carved cornices and marble ornaments, of a style some little more gaudy and less artistic than could be wished." (It is clear that this chamber has undergone some renovation since the time this description was written.) "On the floor beneath us—which somewhat resembles a richly carpeted cock-pit—"continued the *Times*' account, "there are as many leathern arm-chairs as there are Senators, and opposite to each chair a little rosewood desk supported on their legs. These seats are arranged in semicircular rows, four deep, facing the elevated platform on which the Vice-President sits as presiding officer." [36]

But before the senators marched off to this splendid new chamber, they said a formal farewell to the old chamber which had housed them since 1810. The Old Senate Chamber was always hard to heat in the winter and to cool in the summer. Members complained about the lack of ventilation. The lack of adequate gallery space had crowded up the chamber with visitors on many occasions. But it was, and still is, a beautiful room with splendid acoustics, the perfect setting for the great debates of Webster, Clay, Calhoun, Benton, Douglas, Davis, and many more. "This chamber has been the scene of great events," said Senator John J. Crittenden, that day in 1859. "Here questions of American constitutions and laws have been decided; questions of war and peace have been debated and decided; questions of empire have occupied the attention of this assemblage in times past; this was the great theater upon which these things have been enacted. They give a sort of consecrated character to this Hall." Vice President John Breckinridge echoed Crittenden's sentiments. "The Senate is assembled for the last time in this chamber," he said. "Hereafter, the American and the stranger, as they wander through the Capitol, will turn with instinctive reverence to view the spot on which so many and great materials have accumulated for history. They will recall the image of the great and the good, whose renown is the common property of the Union; and chiefly, perhaps, they will linger around the seats once occupied by the mighty three, whose names and fame, associated in life, death has not been able to sever; illustrious men, who in their generation sometimes divided, sometimes led, and sometimes resisted public opinion—for they were of that higher class of statesmen who seek the right and follow their convictions." [37]

At the conclusion of Breckinridge's remarks he invited the members to accompany him to the new chamber. They formed in procession, with the vice president at the head, followed by the secretary and sergeant-at-arms, the senators, staff, and spectators from out of that grand old chamber and down the corridor to their new home—this chamber. Mr. President, here I shall leave this procession in transit between the old and the new, as I conclude my remarks on the history of the United States Senate during the turbulent 1850s. In my next address I shall discuss the fateful events that awaited these senators when they reached their destination.

RECESS UNTIL MONDAY, FEBRUARY 28, 1983

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 10 a.m. Monday.

Thereupon, at 5:21 p.m., the Senate recessed until Monday, February 28, 1983, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate February 24, 1983:

Environmental Protection Agency

Courtney Riordan, of Virginia, to be an Assistant Administrator of the Environmental Protection Agency, vice Stephen John Gage.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 24, 1983:

Department of Transportation

L. Steven Reimers, of North Dakota, to be a Member of the Advisory Board of the Saint Lawrence Seaway Development Corporation.

Department of the Interior

J. J. Simmons III, of Oklahoma, to be Under Secretary of the Interior.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

U.S. Postal Service

John R. McKean, of California, to be a Governor of the U.S. Postal Service for the term expiring December 8, 1991.

Department of Defense

Vincent Puritano, of Virginia, to be an Assistant Secretary of Defense.

In the Air Force

The following officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapter 837, title 10, United States Code:

To be major general

Brig. Gen. William L. Copeland, xxx-xx-x... xxx-...FV, Air Force Reserve.
Brig. Gen. Gerald E. Marsh, xxx-xx-xxxx xxx-...FV, Air Force Reserve.
Brig. Gen. Edward L. McFarland, xxx-xx-x... FV, Air Force Reserve.
Brig. Gen. John D. Moore, xxx-xx-xxxx FV, Air Force Reserve.
Brig. Gen. Joseph L. Shosid, xxx-xx-xxxx xxx-...FV, Air Force Reserve.
Brig. Gen. James L. Tucker, Jr., xxx-xx-x... xxx-...FV, Air Force Reserve.
Brig. Gen. Jerome N. Waldor, xxx-xx-xxxx xxx-...FV, Air Force Reserve.

To be brigadier general

Col. Clyde F. Autio, xxx-xx-xxxx FV, Air Force Reserve.
Col. Norman J. Deback, Jr., xxx-xx-xxxx xxx-...FV, Air Force Reserve.
Col. Ira De Ment, III xxx-xx-xxxx FV, Air Force Reserve.
Col. Ralph D. Erwin, xxx-xx-xxxx FV, Air Force Reserve.
Col. Walter Jajko, xxx-xx-xxxx FV, Air Force Reserve.
Col. Simeon Kobrinetz, xxx-xx-xxxx FV, Air Force Reserve.
Col. Frances I. Mossman, xxx-xx-xxxx FV, Air Force Reserve.
Col. Thomas R. Pochari xxx-xx-xxxx FV, Air Force Reserve.
Col. William C. Roxby, Jr., xxx-xx-xxxx xxx-...FV, Air Force Reserve.
Col. Rocco R. Sgarro, xxx-xx-xxxx FV, Air Force Reserve.
Col. John G. Sullivan, xxx-xx-xxxx FV, Air Force Reserve.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard C. Henry, xxx-xx-xxxx xxx-...FR, U.S. Air Force.

In the Army

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Robert L. Bergquist, xxx-xx-xx... xxx-... U.S. Army.

The U.S. Army Reserve officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, sections 593(a), 3371 and 3384:

To be major general

Brig. Gen. Jimmy F. Bates, xxx-xx-xxxx.
Brig. Gen. Robert S. Holmes, xxx-xx-xxxx.
Brig. Gen. Robert E. Louque, Jr., xxx-xx-x... xxx-...
Brig. Gen. Norman W. Martell, xxx-xx-xx... xxx-...
Brig. Gen. James R. Montgomery, xxx-xx-x... xxx-...
Brig. Gen. Donald A. Pearson, xxx-xx-xxxx xxx-...

To be brigadier general

Col. Joseph G. Gray, xxx-xx-xxxx.
Col. James F. Robb, xxx-xx-xxxx.
Col. Guilford J. Wilson, Jr., xxx-xx-xxxx.
Col. Edward Y. Hirata, xxx-xx-xxxx.
Col. Dennis R. Jones, xxx-xx-xxxx.
Col. George V. Bauer, xxx-xx-xxxx.

The Army National Guard of the U.S. officers named herein for appointment as Reserve Commissioned Officers of the Army, under the provisions of title 10, United States Code, section 593(a), 3385, and 3392:

To be major general

Brig. Gen. John G. Castles, xxx-xx-xxxx.

To be brigadier general

Col. Charles F. Blattner, xxx-xx-xxxx.
Col. Ralph H. Brown, xxx-xx-xxxx.
Col. Samuel E. Fleming, Jr., xxx-xx-xxxx.
Col. Alvin D. McArthur, Jr., xxx-xx-xxxx.
Col. Harry L. Moore, xxx-xx-xxxx.
Col. Kenneth R. Newbold, xxx-xx-xxxx.
Col. David L. Nudo, xxx-xx-xxxx.
Col. Ervin T. Osbourn, xxx-xx-xxxx.
Col. Joseph J. Saladino, xxx-xx-xxxx.
Col. James E. Threlfall, xxx-xx-xxxx.
Col. Mucio Yslas, Jr., xxx-xx-xxxx.

The following-named officer, under the provisions of title 10, United States Code, secton 3019, for a period of 4 years beginning 1 June 1983, to be reappointed as chief, Army Reserve:

Maj. Gen. William R. Berkman, xxx-xx-x... xxx-... U.S. Army Reserve.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be general

Gen. Edward C. Meyer, xxx-xx-xxxx (age 54) U.S. Army.

In the Navy

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be admiral

Adm. Robert L. J. Long, xxx-xx-xxxx /1120, U.S. Navy.

The following-named captains of the various staff corps of the Navy for promotion to the permanent grade of commodore, pursuant to title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

MEDICAL CORPS

To be commodore

Louis Henry Eske
James Joseph Quinn

SUPPLY CORPS

Robert Burke Abele
Daniel Wayne McKinnon, Jr.
Phillip Freeman McNall

CHAPLAIN CORPS

John Richard McNamara

CIVIL ENGINEER CORPS

Arthur William Fort

DENTAL CORPS

Henry John Sazima

NURSE CORPS

Mary Joan Nielubowicz

The following-named captains of the line of the Navy for promotion to the permanent grade of commodore, pursuant to title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

UNRESTRICTED LINE OFFICER

To be commodore

Edwin Knowles Anderson
Clarence Ervin Armstrong, Jr.
Roger Francis Bacon
Bruce Raymond Boland
Jerry Creighton Breast
Charles H. Brickell, Jr.
Paul Donald Butcher
Richard Franklin Butts
Denny Bruce Cargill
David Fessenden Chandler

Guy Haldane Curtis III
Thomas R. M. Emery
Gerard Joseph Flannery, Jr.
Dale Norman Hagen
John Joseph Higginson
Chauncey Frazier Hoffman
Raymond Paul Ilg
Jerome Lamarr Johnson
Wendell Norman Johnson
Robert Joseph Kelly
Robert Kalani Uichi Kihune
Willis Ivan Lewis, Jr.
Henry Herrward Mauz, Jr.
Alvin Simmerman Newman
William Joseph M. O'Connor
William Tyler Pendley
Leonard Gordon Perry
James Guy Reynolds
Dean Reynolds Sackett, Jr.
John Frederick Shaw
Vernon Charles Smith
Robert Jay Steele

ENGINEERING DUTY OFFICER

Malcolm Mackinnon III
Kenneth Cornelius Malley
Thomas Uhlian Seigenthaler

SPECIAL DUTY OFFICER (CRYPTOLOGY)

Charles Francis Clark

IN THE MARINE CORPS

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard E. Carey [redacted], U.S. Marine Corps.

IN THE AIR FORCE

Air Force nominations beginning Carl P Arant, Jr., and ending Charles R. Dorn, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1982.

Air Force nominations beginning Milton B. Baxter, and ending Maritta L. Loo, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Air Force nominations beginning Richard M. Anders, and ending Joseph K. Criqui, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Air Force nominations beginning James A. Kee, and ending Vernon L. James, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Air Force nominations beginning Philip G. Bail, Jr., and ending Susan L. Mehargue, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 26, 1983.

IN THE ARMY

Army nominations beginning Richard A. Buckner, and ending Arthur L. Cole, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Army nominations beginning Donald J. Evans, and ending John T. Digilio, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 31, 1983.

Army nominations beginning Lois M. Aasland, and ending Karen M. Wesson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 31, 1983.

Army nominations beginning Robert D. Abell, and ending Garland T. Walker, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 31, 1983.

Army nominations beginning Ronald P. Abreu, and ending Lawrence A. Smith, which nominations were received by the Senate on February 8, 1983, and appeared in the CONGRESSIONAL RECORD of February 14, 1983.

IN THE NAVY

Navy nominations beginning Ronald Jay Lentz, and ending David Haskell Trump, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Navy nominations beginning Herb I. Arnold, and ending Randolph M. Stevens, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Navy nominations beginning Cornelius K. Aaron, and ending Michael H. Zupke, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 25, 1983.

Navy nominations beginning Joseph A. Felchko, and ending Robert H. Klenke, which nominations were received by the Senate on February 8, 1983, and appeared in the CONGRESSIONAL RECORD of February 14, 1983.

Navy nominations beginning Lisa C. Barfield, and ending William A. Herndon, which nominations were received by the Senate on February 8, 1983, and appeared in the CONGRESSIONAL RECORD of February 14, 1983.

EXTENSIONS OF REMARKS

PERSONAL JUSTICE DENIED

HON. ROBERT T. MATSUI
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. MATSUI. Mr. Speaker, today, the Commission on Wartime Relocation and Internment of Civilians will deliver to Congress and release to the public its report setting forth the facts and circumstances surrounding Executive Order 9066 and the impact of the order on Japanese American citizens and resident aliens.

The report, entitled "Personal Justice Denied," sets forth the circumstances surrounding the initiation and implementation of orders from the highest authorities of our land to evacuate and intern American citizens and resident aliens of Japanese ancestry.

The commission, after 1½ years of study and after hearing from over 750 witnesses, has concluded that there was no military or security justification for the mass exclusion and detention. The commission identified the causes of these decisions as race prejudice, war hysteria, and a failure of political leadership.

Mr. speaker, I commend the members of the Commission on Wartime Relocation and Internment of Civilians for their outstanding report. It is a report that for the first time sets forth the tragic and shameful chapter of our history that is unknown to millions of Americans. It is a chapter in which over 120,000 American citizens and resident aliens were denied their freedom without consideration for their constitutional rights.

The grave injustice forced upon these Japanese Americans is truly a case of personal justice denied. I encourage all of my colleagues to read this report.

Mr. Speaker, at this time I would like to include for the RECORD a statement by Joan Z. Bernstein, chairperson of the Commission on Wartime Relocation and Internment of Civilians.

Today the Commission on Wartime Relocation and Internment of Civilians is delivering to Congress and releasing to the public its findings with regard to the promulgation of Executive Order 9066 and the wartime events which followed from it.

On February 19, 1942, President Franklin D. Roosevelt signed Executive Order 9066. Under that Order 120,000 people—American citizens of Japanese ancestry and resident aliens of the immigrant generation from Japan, who were barred by law from becoming American citizens—were prohibited from living and working on the West Coast. Almost all were later sent to "relocation centers"—bleak barrack camps ringed by barbed wire and military guards in isolated areas of the West. Most remained in the camps until the mass exclusion was ended in December 1944, more than two and a half years after the policy of exclusion and detention began. These events are unique in our history.

No program of mass exclusion or detention was imposed on German and Italian aliens nor upon American citizens of German or Italian descent.

The government justified the exclusion from the West Coast of all American citizens of Japanese descent and Japanese resident aliens on the basis of military necessity. The first task of the Commission has been to look at the facts and consider whether military necessity justified this course of action.

The Commission has found that the record does not permit the conclusion that there was any military justification for the mass exclusion and detention of American citizens of Japanese ancestry and their resident alien parents.

There were no documented cases of sabotage, espionage or fifth column activity by Japanese Americans on the West Coast. There was a widespread—but false—belief that the attack on Pearl Harbor had been aided by sabotage and fifth column activities. The President and his cabinet officers did not forcefully dispel these stories and rumors. On the West Coast, where there had been a long history of prejudice and discrimination against the ethnic Japanese, there were sustained and even louder demands for the exclusion of Japanese Americans. These demands were made by organized anti-Japanese interest groups, the press and the West Coast members of Congress—they came from every segment of the political spectrum.

The civilian clamour for exclusion was reflected in the actions of the War Department. Lieutenant General John L. DeWitt, in command of Army forces on the West Coast, recommended to Henry L. Stimson, the Secretary of War, that authority be sought to remove the Japanese Americans from the West Coast. DeWitt made his recommendation on the ground that loyalty was determined by ethnicity, "In the war in which we are now engaged," DeWitt wrote Secretary Stimson, "racial affinities are not severed by migration. The Japanese race is an enemy race and while many second and third generation Japanese born on United States soil possessed of Unites States citizenship, have become 'Americanized,' the racial strains are undiluted." The record shows that DeWitt's views were substantially influenced by the governors and public officials of the West Coast states whose views he sought out before taking his own position.

Secretary Stimson and President Roosevelt did not subject this program to sufficiently close and critical scrutiny. The Attorney General, Francis Biddle, did not believe the program necessary, but acceded to it when proposed by the War Department.

Few Americans were familiar with American citizens of Japanese descent. The opinions of those with intelligence responsibility, such as the FBI, who believed that there was no sound basis for mass exclusion, were ignored or drowned out in the frightened uproar of the time.

The Commission has carefully reviewed the extensive record of events which led to Executive Order 9066. It has found no evidence of a military or security threat from the Japanese Americans. As General DeWitt conceded at the time, no sabotage had taken place. The later justifications offered by DeWitt in his Final Report on the exclusion and by the Justice Department which defended the exclusion in court also fail to demonstrate any military or security threat. In fact the realistic estimates of the time suggested that there was as much or more danger from other segments of the population.

DeWitt's contention that ethnicity determined loyalty was answered as early as May 1942, by a Congressional Committee which examined the impact of the Executive Order in extensive hearings on the West Coast:

"This testimony has impressed upon us in convincing fashion the fundamental fact that place of birth and technical noncitizenship alone provide no decisive criteria for assessing the alinement of loyalties in this world-wide conflict."

True of aliens, that statement can only be more powerful with regard to Amercian citizens. Our legal system is founded on determining guilt or fault on an individual basis, and citizens must be given the presumption of loyalty. Moreover, the conclusion that ethnicity determined loyalty was not a military judgment deserving of any deference. Generals are not experts on race; their views on the political loyalties of civilians are only as good as the facts they can marshal in their support. The lack of any evidence of disloyalty on the part of Americans of Japanese ancestry in 1942 speaks for itself.

The Commission has concluded that the broad historical causes of the Executive Order were race prejudice, war hysteria, and a failure of political leadership. Widespread ignorance about Japanese Americans contributed to a policy conceived in haste and executed in an atmosphere of fear and anger at Japan.

Ending the exclusion was bitterly and forcefully opposed on the West Coast, just as the decision to exclude and detain had effectively been promoted. The Commission's report provides substantial new information on those events.

Secretary Stimson and John J. McCloy, who served as Assistant Secretary of War, approved the original order of exclusion, but they were men who were open to an understanding of the facts and they did not accept General DeWitt's views on race or believe that the Japanese Americans should be excluded from the West Coast for the duration of the war.

McCloy and Stimson opposed professional military opinion in deciding that the Army would seek volunteers among the Japanese

Americans, thus opening the door to persuading even the most prejudiced of the loyalty of Japanese Americans who returned from European battlefields loaded with honors won in the service of the United States.

Most importantly, by the spring of 1943, the civilians at the head of the War Department had reached the position that no justification existed any longer for excluding loyal Japanese American citizens from the West Coast. In April 1943, McCloy laid out the basic points very forcefully to General DeWitt, who was on the West Coast. I quote the letter at length because it states succinctly the situation in the spring of 1943 and lays bare the differences of opinion with General DeWitt and those who supported exclusion:

"The threat of Japanese attack is far from what it was. We are better organized to meet such an attack if it occurred. And we know a great deal more about our Japanese population. Furthermore, the War Department has established a combat team for volunteer American citizens of Japanese ancestry . . . [T]he War Department has initiated a process for loyalty investigations of all Japanese Americans to determine their eligibility for work in plants and facilities vital to the war effort. In other words, . . . the policy of the national Government, as well as that of the War Department, is presently looking toward the restoration to all loyal persons of Japanese ancestry of all their normal rights and privileges, to the end that they may be able to make their maximum contribution to the war effort. The very 'entering wedge' which you appear to dread is precisely what must be accomplished.

• • •

"That there is serious animosity of the West Coast against all evacuated Japanese I do not doubt, but that does not necessarily mean that we should trim our sails accordingly. The longer California luxuriates in the total absence of the Japanese the more difficult it will be to restore them to the economy of California. They have a place in California as well as in any other state as long as military considerations do not intervene. I cannot help but feel that social considerations rather than military ones determine the total exclusion policy. The Army, as I see it, is not responsible for the general public peace of the Western Defense Command. That responsibility still rests with the civil authorities. There may, as you suggest, be incidents, but these can be effectively discouraged by prompt action by law enforcement agencies, with the cooperation of the military if they even assume really threatening proportions."

McCloy was entirely correct in his view that the military situation no longer justified exclusion (if indeed it ever could). A program for returning the Japanese Americans to the West Coast needed to be started and McCloy urged the gradual return of Japanese Americans beginning at once.

Unfortunately it did not happen as McCloy told General DeWitt it should. The exclusion was not ended for another eighteen months. General DeWitt continued to support the exclusion with every tactic available until he left the Western Defense Command in the fall of 1943. Anti-Nisei feeling was whipped up by the Dies Committee in the early summer of 1943 when the West Coast newspapers carried hearsay reports of the rift between McCloy and General DeWitt. Throughout 1943 and 1944 there continued to be virulent and widespread opposition in the West Coast press, among West Coast politicians and interest groups to the return of Japanese Americans to the West Coast. These views prevailed. For at least the last six months of that period, immediately before the Presidential election of 1944, the decision to continue the exclusion was that of President Roosevelt.

By any analysis with the least sensitivity to American constitutional values there was no justification for holding loyal American citizens of Japanese descent in detention or prohibiting them from traveling, living and working where they chose.

In his memoirs, Secretary Stimson cogently called the evacuation of "personal injustice" to loyal Japanese Americans. It was a personal injustice precisely because the country failed to apply justice in a personal or individual manner. Men, women and children were uprooted from their homes and their lives shattered because the United States failed to provide personal justice in time of war. It is important to emphasize that we are dealing here with American behavior. It is not a question of how the Japanese or the Nazis treated Americans or other prisoners which is one of the darkest chapters of modern history. What the Commission has examined and taken testimony about is how the United States dealt with American citizens and residents.

The damage done by this country to its own citizens and residents is a mosaic made up of thousands of lives and thousands of personal histories. The Commission's hearing record is replete with searing and painful testimony. There is the economic loss of farms and homes sold in distress circumstances, of elderly people having to start from scratch a second time after the war, of families detained in camps without employment and unable to meet tax and mortgage and insurance payments; of education and careers disrupted.

Over time and with perseverance material losses may be repaired, but the hidden scares of lives damaged by this experience remain. Each individual excluded from the West Coast and sent only with the baggage he could carry to spend two and a half years behind barbed wire carries his own marks from that time. For people who knew their innocence and the injustice of their treatment the burden was not light. They bore the stigma of having been branded potentially disloyal, the deprivation of liberty and the loss of the common decencies of daily life. An essential foundation of our government—the citizens trust that the government will deal with him individually and fairly—was deeply damaged. The injuries inflicted by the country on these citizens were different in kind from the suffering and loss which the Second World War brought to all Americans.

In Hawaii, we did things differently. Despite the Pearl Harbor attack, there was no exclusion or detention of any significant number of Japanese Americans. Calmer minds with a better sense of justice prevailed and today neither the material nor the intangible injuries of the Japanese Americans on the mainland remain to haunt us in Hawaii.

No recommendation which this Commission will make can undo this history. No redress to Japanese Americans can assure that we will not repeat the errors of 1942. What happened after Pearl Harbor is particularly sobering because men of the greatest stature with careers of the most distinguished public service—Democrat and Republican, conservative and liberal, judges, legislators and cabinet members, the President himself—were personally involved in a course of action which today we can only find gravely unjust and deeply injurious. The bulwark of our Constitution did not withstand it. Ignorance was a major contributing factor in these events; knowledge is the surest guardian against their repetition. We can only hope to abide by our better judgement in the future if we have made our past our own and are determined to learn by its lessons.

Ronald Reagan, speaking in 1970 as Governor of California, pointedly and accurately underscored what each American should take from this history:

"A lesson was learned in California during World War II, which should be made a part of the record and the heritage of Americans everywhere who cherish liberty, freedom, and constitutional guarantees."

The Commission's second important task was to review the evacuation of the Aleuts from the Aleutian and Pribilof Islands and their treatment in camps in Southeastern Alaska.

The situation in Alaska was very unlike that on the West Coast. The Japanese attacked the two most western islands in the Aleutian chain in the summer of 1942 and took 42 Aleut prisoners. As part of the reaction to that attack, the military evacuated the Aleuts from the Pribilof islands and from a large part of the Aleutian chain. The evidence shows that the evacuation was a rational response to the danger presented. Both whites and Aleuts, apart from those necessary to defense work, were removed. The protection of an exposed population was the motivating force for the evacuation.

The camps to which the Aleuts were taken are an entirely different matter. Approximately 850 Aleuts were housed in abandoned buildings, typically at gold mines and fish canneries. The conditions and the care were deplorable. In some camps there were inadequate sleeping quarters and sanitation. Health conditions were particularly bad. Epidemics raged throughout the Aleuts' stay in southeastern Alaska; they suffered from influenza, measles and pneumonia along with tuberculosis. Twenty-five died at Funter Bay in 1943 alone, and it is estimated that probably ten percent of the evacuated Aleuts died during their two or three year stay in southeastern Alaska. The standard of care which the government owes to those under its protection was clearly violated by this treatment.

The Aleuts were only returned to their islands in 1944 and 1945. On arriving home, they found that their communities had been vandalized and looted by the military forces. Many homes were uninhabitable and many heirlooms of great spiritual as well as material value, particularly religious icons, had been destroyed. Other possessions, such as furniture, boats and fishing gear, were also gone. The Aleuts rebuilt their homes themselves, being "paid" with free groceries, and military surplus goods. The Aleuts' ancestral treasures can never be replaced. The Aleuts have never received full or fair compensation for their war time losses.

The World War II history of the Aleuts is largely unknown or forgotten. The Commission's report is an important step to provide knowledge and recognition of the treatment of this people under the pressures of war.

In sum, despite the fact that the Aleutians were a theatre of war from which evacuation was sound policy, there was no justification for the manner in which the Aleuts were treated in the camps in south-

eastern Alaska, nor for failing to compensate them fully for their material losses.

As to the Japanese Americans on the West Coast, the promulgation of Executive Order 9066 was not justified by military necessity and the decisions which followed from it—detention, ending detention and ending exclusion—were not driven by analysis of military conditions. The broad historical causes which shaped these decisions were race prejudice, war hysteria and a failure of political leadership. A grave injustice was done to those American citizens and resident aliens of Japanese ancestry, who without individual review or any probative evidence against them, were excluded, removed and detained by the United States during World War II.●

MODIFIED DAIRY PRICE SUPPORT PROGRAM

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. DOWDY. Mr. Speaker, yesterday I was pleased to introduce a bill, along with Mr. FOWLER of Georgia, Mr. SPRATT of South Carolina, and Mr. MOORE of Louisiana, which will give needed relief to dairy farmers and benefit American consumers as well. We have called our proposal the modified dairy price support program.

Enacted in 1949, the dairy price support program was designed to provide an equitable return to dairy farmers while insuring a stable supply of milk to the consumer. The program has come under fire in recent years because of the large surplus of dairy products which has developed and which has been of grave concern to all of us.

In seeking a solution to the problem of overproduction, I do not think it is fair to punish dairy farmers from the southeastern region of the United States, who have not been responsible for the surplus. That is why I voted against the Omnibus Budget Reconciliation Act last year which contained a provision allowing the Secretary of Agriculture to deduct 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially and remit the proceeds to the Commodity Credit Corporation.

Although the provision has been enjoined by the Federal District Court for the State of South Carolina, the Secretary of Agriculture recently announced his intention to try to collect both the original 50 cents and an additional 50 cents, for a total of $1 on all milk marketed as of April 1 of this year.

The bill we have introduced would repeal the dairy tax enacted in the Omnibus Reconciliation Act and substitute a decrease in the price support for milk. The price support will be lowered $1 from $13.10 per hundredweight to $12.10 per hundredweight for the period beginning April 1, 1983, and ending September 30, 1984. If during that time the Secretary determines that the CCC will purchase less than expected quantities of dairy products, he would have the authority to raise the support price up to a maximum of $1.

Effective October 1, 1984, we would revert to a price support based on the concept of parity. The exact price support level would depend upon the quantity of dairy products that the Secretary expects the CCC to purchase during the forthcoming fiscal year.

The current situation requires prompt and decisive action, for the benefit of both dairy farmers and American consumers. The current tax on dairy production has been rendered unenforceable by the court, and would most likely prove an ineffective solution, since it would only encourage more production to compensate for the loss of the 50-cent tax.

Along with the other cosponsors of this bill, I strongly urge the members of the Committee on Agriculture to give immediate consideration to the modified dairy price support program.●

A STUDY ON IDEAS FROM EUROPE THAT COULD IMPROVE U.S. FIRE SAFETY

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. WALGREN. Mr. Speaker, as the chairman of the House Subcommittee on Science, Research and Technology of the Committee on Science and Technology, which has jurisdiction over the Federal Fire Prevention and Control Act, I am concerned about the future of the Nation's fire effort. Last year the Reagan administration proposed to eliminate the U.S. Fire Administration. However, Congress restored $4.1 million to the Federal Emergency Management's fiscal year 1983 budget to keep the U.S. Fire Administration alive. Unfortunately, Congress is faced with the proposed elimination of the Center for Fire Research at the National Bureau of Standards. The Center for Fire Research performs and supports research in all aspects of fire and develops scientific knowledge applicable to the prevention and control of fires. This proposed elimination comes at a time when approximately 8,000 people die annually in fires in this country. The majority of these deaths occur in homes. Well over $5 billion worth of property goes up in smoke each year.

In contrast, Europe has only half the fire death rate of the United States. Death rates in European countries are already below the level set as the goal for the U.S. Fire Administration at its creation, when the long-term objectives was to cut the U.S. fire death rate in half in a generation. Several countries, such as Switzerland and West Germany, have death rates less than a quarter of ours. They achieve this in spite of having smaller fire departments.

Some of the key factors that explain Europe's good track record are described in a recently released study by Philip Schaenman. The study was started in 1980 while he was Associate Administrator of the U.S. Fire Administration, Federal Emergency Management Agency, and has been completed under a grant from the Tobacco Institute to TriData Corp.

Successful fire protection in Europe was found to be less a matter of novel solutions or high technology than persistent, widespread application of basic fire prevention principles. Perhaps the key difference is that the public is aware of the fire problem and provides political support for a wide range of fire prevention efforts.

Most European practices are transferable to the United States, and some are already being used. Others can be adapted. We should consider European practices as a stimulus to our own thinking. The U.S. Fire Administration and the National Fire Academy seem particularly well suited to identify practical ideas that can be disseminated here.

Among the European fire protection practices that contribute to their success are:

PUBLIC AWARENESS AND PUBLIC FIRE EDUCATION

The European public is more aware of the need for fire safety as a result of its history of cities which have burned down and their desire to protect their family and civic heritage. The public knows more about fire safety, teaches it at home, and practices it. They seem to exercise more care with hot objects such as portable heaters, woodburning stoves, cigarettes, and matches.

CODE ENFORCEMENT

Plans for new buildings or alterations to old buildings are more rigorously reviewed by the fire service, insurance agencies, or building departments. A greater percentage of such construction is reviewed by more highly trained personnel than in the United States. Building in rural areas receive almost as much screening as in cities. The fire service has more discretion and is more likely to be backed by the courts both for the initial plans review and subsequent inspections.

CONSUMER PRODUCT SAFETY

All electrical products, heating appliances and systems, and gas-powered appliances and systems must be government tested and approved in some countries. Different countries share

their testing results and abide by them.

INSURANCE AND ARSON

Insurance philosophy is that someone who has a fire should not profit from it and that the purpose of insurance is not only to prevent large losses to individuals but also to preserve the appearance of the community. Thus, insurance is paid in full only when a building that has burned is restored on the same site. This policy provides a disincentive for arson. The ability to obtain insurance is often tied to whether a building is up to code.

CHIMNEY SWEEPS

Chimney sweep visits are mandatory in several countries and strongly encouraged in most others. Most homes are visited from one to four times a year by sweeps. The sweeps often provide advice on woodburning stoves and heating systems, and help test and maintain them. Sometimes the chimney sweeps also perform fire safety inspections. The sweeps often are trained at national fire academies, plus serve an apprenticeship. The result is that there are proportionately far fewer heating-related fires in Europe; in the United States heating is the leading cause of residential fires.

FIRE PREVENTION BUREAUS

Most European fire departments emphasize fire prevention—especially plans review and code enforcement—more so than in the United States. European senior fire officers spend the majority of their time on prevention.

FIREFIGHTER TRAINING

The average European fire officer receives far more training than his U.S. counterpart and also greater technical education. The training is more uniform within a country, and senior officers usually have experience in several cities before assuming command of a large fire department. Firefighters have higher entrance requirements—they often must have a trade, such as mechanics or carpentry—and receive more training, too.

FIREFIGHTER HEALTH AND SAFETY

The European firefighter is generally not better equipped than his American counterpart. However, European firefighters are more uniformly equipped, more likely to use their safety equipment, and receive more safety training. They also are not expected to take high risks to save property. These factors, coupled with a lower fire rate, result in dramatically lower death and injury rates.

These and other issues are described more fully in "International Concepts in Fire Protection: Ideas From Europe Which the U.S. Might Adopt," by Philip S. Schaenman, 1983, available from TriData Corp., 1500 Wilson Boulevard, Arlington, Va. 22209, telephone (703) 841-2975.●

THE CONTINUING PLIGHT OF IDA NUDEL

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. LENT. Mr. Speaker, I am deeply honored to once again speak before the House of Representatives on behalf of Ida Nudel, my "Prisoner of Conscience," a truly remarkable, heroic, and courageous woman. As we begin the 1983 Congressional Call to Conscience Vigil for Soviet Jewry under the able chairmanship of our colleague, TIM WIRTH, of Colorado, I believe special attention should be paid to the plight of Soviet Jews, for at this time, emigration is at its lowest point since 1970. As chairman of the 1982 Vigil, I urge my colleagues, especially our new colleagues, to actively participate in this year's Vigil.

For over 11 years, Ida Nudel has been one of the leaders of the Soviet Jewry movement in the Soviet Union. Ida, affectionately known as the "Guardian Angel" for her activities on behalf of Soviet Jewish Prisoners of Conscience, was charged and convicted in June 1978 of "malicious hooliganism" and sentenced to 4 years of internal exile.

Although Ida Nudel has returned from her 4-year exile in Siberia, the Soviet Union continues to harass and intimidate her in hopes that she will surrender her tireless campaign for the rights of Soviet Jews. The Soviet authorities have denied her legal residence in Moscow and Riga, and she remains homeless, but still committed to securing a visa to Israel.

Today, Ida Nudel needs our help. Although she has been released from internal exile, her dream to emigrate to Israel is unfortunately, still a dream. Our efforts in the past have accomplished a great deal, as Ida Nudel's release points out. But we must not stop short of our goal of freedom for this brave woman. Soviet officials must know that we are very aware of the difference between appeasement and justice. Ida Nudel's struggle continues as long as she is denied the right to emigrate to Israel and is at the mercy of Soviet officials.

We, as Members of Congress, must continue to actively fight for her freedom. The Soviet Union's oppressive tactics should never be tolerated by free-thinking people around the world. I therefore urge the Soviet Union to grant this true champion of liberty an exit visa.

Ida, we are with you all the way. You have continued the fight. We will, too.●

ESTONIAN INDEPENDENCE DAY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. MICHEL. Mr. Speaker, February 24, 1983, marks the 65th anniversary of Estonian Independence.

As you know Estonia is one of those Baltic nations that became a victim of the Hitler-Stalin, Nazi-Communist alliance of 1939-1941. The principles of both totalitarian systems are, of course, the same, so it is no wonder that the people of Estonia are now the victims of a Soviet campaign to deprive them of their very national identity through directives against the Estonian language and culture.

I have learned that Yuri Andropov, the Soviet KGB master who is now the head man in the Kremlin, is the only Russian Communist leader ever to have personally visited Estonia. He came there in 1980 to oversee the suppression of expressions of Estonian nationalism.

People say: Be realistic. Estonia has for over 40 years been enslaved by communism. What can be done? Let us just forget it and go on with business as usual.

Granted, not much can be done directly to regain Estonian lost freedom. But we can at least point out the fact thus freedom has been lost and stop pretending that the people of Estonia are simply "citizens" of the Soviet Union. They are not. They are its victims.●

BARBARA M. WATSON

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. RODINO. Mr. Speaker, on February 22, 1983, Ambassadors, Members of Congress, high U.S. Government officials, prominent city and community leaders, and friends attended "A Tribute and Thanksgiving for Barbara M. Watson" at the Washington Cathedral.

Barbara Watson, whose last official Government post in 1981 was as Ambassador to Malaysia, died February 17 at George Washington Hospital at the age of 64.

Although her contacts on the Hill were legion, we of the Committee on the Judiciary considered her as a very special person and an especially close friend. She served with the Department of State under Presidents Johnson, Nixon, Ford, and Carter from 1968 to 1980, as Administrator and later Assistant Secretary of State for Consular Affairs. It was in this posi-

tion that we came to know her, through her appearances on numerous occasions as a witness on behalf of the Consular Service, her attendance at international conferences, and, above all, in the informal meetings with the Members and staff concerned with matters of mutual interest.

Barbara was the first woman and first black to achieve the rank of Assistant Secretary of State. She frequently jokingly referred to herself as a "two-fer" minority person. She had tremendous diplomatic talents, a vibrant personality, and a commitment to excellence.

Barbara Watson was born in New York City, the eldest daughter of Judge James S. and Violet Lopez Watson. She graduated from Barnard College and New York Law School. Her desire to render public service was immediately evident when she worked as assistant corporation counsel for the city of New York and later as executive director of the New York City Commission to the United Nations where she represented the mayor and maintained close liaison with various missions in the U.N.

In 1980, President Carter appointed Barbara Watson as U.S. Ambassador to Malaysia where she became an influential and distinguished member of the Diplomatic Corps.

Barbara was largely responsible for enhancing the status of the Consular Service in the Foreign Service, an achievement which has served as a solid foundation for its continued advancement.

Although Barbara had left public life several years ago, she continued to exercise her considerable talents in many humanitarian fields. We shall miss her.

On behalf of her many friends on the Committee on the Judiciary, I express our profound sympathy to her distinguished family, her two brothers, Douglas C. Watson and Judge Samuel Watson of New York, and her sister, Grace Elizabeth Watson, of Washington.●

LET'S GET AMERICA'S ECONOMY GOING AGAIN

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. HUBBARD. Mr. Speaker, Ben Hall, city editor of one of the newspapers in my district, the Madisonville Messenger, Madisonville, Ky., has written an excellent editorial which I would like to share with my colleagues. My constituent's comments about America's economy which President Reagan inherited and his efforts to work the country out of a "monumental morass" are timely and worthy of consideration. Mr. Hall's January 19, 1983, editorial follows:

[From the Madisonville (Ky.) Messenger, Jan. 19, 1983]

PRESIDENT REAGAN DOING THE BEST HE CAN

(By Ben Hall)

At any given time, there are certain things that it is fashionable to be in favor of and another list that it is fashionable to be against, if you are in the writing business.

A man who drives a nine-year-old car is not particularly worried about being fashionable and my car came out of Detroit in 1974.

The President is an example of something, or someone, against whom, to be fashionable, one must write.

I supported Ronald Reagan when he ran for office and I still think that he is doing about as well as anybody could considering the unbelievable mess he inherited when he took office two years ago.

There is nothing party-political about the mess; both Republican and Democratic presidents and congresses had a hand in creating the monumental morass we are trying now to work our way out of.

The remarkable aspect of all this is the widespread feeling expressed by a local woman recently when she said "Reagan could change all this tomorrow if he wanted to."

Nobody could "change all this tomorrow" and everybody does want to. Probably Ronald Reagan more than most.

The hard fact is that the country had been going the way of all flesh for a considerable amount of time and rather than continue to ride the rocket, Reagan is trying to bring the whole thing down to earth.

It is not easy and it is not painless and nobody who thought about it at all ever expected it to be.

But the simple fact is that neither a government nor an individual can consistently spend more than he makes and stay out of trouble indefinitely.

Our trouble finally caught up with us and, as difficult as it is now and is going to be for a while, there shouldn't be anything shocking about it.

Perhaps the shock, if there is any due, should be becasue the recession (or depression if you prefer) is now worse than it is.

Since the days of Franklin D. Roosevelt, we have been building the psychology that "the government" owes everybody something.

Any politicians who could see perfectly well as far as the next election but not much farther, have not only fed this fantasy but made it come true.

The sad fact is that government produces no money (just confusion, someone has said) but must take its funds from those who do produce income.

The upshot is that there has been a great shell game going on for nearly five decades. It is a kind of bureaucratic Robin Hood act with government using various Merry Men to take from those who had and giving to those who have not.

After a while, those had "had not" had as much or more than those who had "had." And they got it a lot easier.

In effect, those who had the git-up-and-go to get up and go to work to make a living found that they were supporting a segment of the population that chose to get up around noon and go out when they felt like it.

The people who got weary supporting the "poor" whose only contribution to the society was to feed and breed, elected Reagan partly to clean up the abuses of the programs that began with the best intentions in the world and wound up as the biggest monument to greed in the world.

Now the President is getting flak from all quarters because he is doing what we elected him to do.

It is unfashionable to be critical of "the poor," of course.

I doubt if there is anyone who is critical of the truly poor who are needy because of cricumstances beyond their control.

But many of us find reason to be critical of the professional poor who live off the fruits of our labor after those rewards are filtered through the hands of the federal and state Merry Men.

I have no objection to giving my mite to feed and clothe some hungry folks in Alabama, or Detroit, or Houston; but I get less than ecstatic over supporting people half my age who simply choose not to support themselves because it is more fun to drink beer and sleep around.

It is not fashionable either to be in favor of a strong defense and against "peace" as if the two were opposite.

In my short but dull life, I have seen enough of wars to have some appreciation of peace.

But neither my limited experience nor a study of history shows examples of nations plunged into war because they were over prepared to defend themselves and make the starting of a war a profitless proposition for an adversary.

Are those who still march the streets of the nation crying "Peace" so naive as to think that the entire western world should throw itself on the mercy of the Soviet Union and say, in effect, "Look, we have disarmed and are helpless. Now, play fair, and destroy your weapons"?

Perhaps they are.

Although it is not fashionable to say so, if I am given a choice, I'll put my faith in the Pentagon with all its boondoggles and empire building, rather than leave myself to the tender mercies of the Kremlin.

Jimmy Carter tried, and apparently succeeded, in impressing the world with the country's weakness and the purity of his motives, until a maniac with a handful of rabble behind him could hold an entire American embassy staff hostage until the captors were good-and-dammed-ready to turn them loose.

That, too, was something we elected Ronald Reagan to correct. But it seems that it had to be done without inconveniencing anybody.

The irony in the present situation is that the President is doing about as well as anybody could to carry out the tasks we set for him when we elected him to office.

If it is more painful than some segments of the society thought that it would be, that is their lack of foresight, not his lack of performance.

After all, Ronald Reagan was elected to the highest executive office in the land, not to the position of chief magician.●

LITHUANIAN INDEPENDENCE

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1983

● Mr. MORRISON of Connecticut. Mr. Speaker, I am proud to join my colleagues and Lithuanian people everywhere in commerating the 65th anniversary of "Lithuanian Independence Day." It was 65 years ago that Lithuania, after centuries of domination, issued a declaration of independence in the city of Vilnius to form an independent and united nation.

Today, the small country of Lithuania is again forced to fight for its freedom and independence. In June of 1940, using the Nazi-Soviet alliance of Hitler and Stalin, the Soviet Union demanded a Soviet-installed government in Lithuania and held single-party elections. One month later, Lithuania was annexed by the Soviet Union, occupied by German troops until the end of World War II, and then reoccupied by Soviet forces. Our Nation has never recognized this illegal annexation by the Soviet Union and continues to maintain diplomatic relations with representatives of the former independent government.

The history of Soviet occupation has been one of oppression of hundreds of thousands of Lithuanians forced to flee their native land for the strength of their beliefs and their fierce desire for a free Lithuania. Unknown thousands more were imprisoned in Siberia: Those who fought for a sovereign state, for their religious freedom, and for the rich culture and heritage of their homeland dating back more than 700 years to the founding of the Lithuanian state.

This day of commemoration, February 16, 1983, serves as a symbol of our support of the Lithuanians and their heroic struggle for human rights, and I am honored to have the opportunity to show them that we are with them in their quest for a free and independent Lithuania.●

ESTONIAN INDEPENDENCE DAY

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. DONNELLY. Mr. Speaker, I would like to take a few moments to share my thoughts on the importance of Estonian Independence Day. Today marks the 65th anniversary of the declaration of Estonian independence. As we know, the celebration of freedom in Estonia was short-lived as Soviet troops moved with brutal force to occupy and subjugate that nation, and her neighboring Baltic States of Lithuania and Latvia.

We are greatly alarmed by continuing Soviet efforts to remove Estonia's unique national character by a campaign of russification. Estonians are being publicly harassed for speaking their native language, and for observing national customs and culture which predate the illegal Soviet occupation of their land.

I hope it is some relief and support to the embattled people of Estonia that we in Congress join them in commemorating today's anniversary. Our interest, and that of the people we represent, in the rightful cause of renewed independence for Estonia will continue unabated until the dream becomes reality. When that day comes, we will truly celebrate.●

THE 65TH ANNIVERSARY OF ESTONIAN INDEPENDENCE

HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. SENSENBRENNER. Mr. Speaker, I am honored to join my colleagues today in commemorating the 65th anniversary of the Declaration of Independence by the Estonian people. On February 24, 1918, the proud people of Estonia proclaimed their just right to self-determination. As we know, however, the Soviet Union invaded Estonia before the year was out, and thus denied the Estonians of their freedom.

Despite the signing of a treaty in 1920 in which the Soviets explicitly renounced "voluntarily and forever all rights of sovereignity over the Estonian people and territory," they again violated the sovereignity of Estonia in 1939 when the Soviets signed a pact with Nazi Germany. They forcefully invaded Estonia again, and have continued to occupy this tiny Baltic nation ever since. The Soviets' actions in 1918, 1939, and up to the present day constitute a flagrant violation of the bilateral pact with Estonia, international law which recognizes the rights to self-determination, and the Helsinki accords on human rights, to which the Soviet Union is a signatory.

The plight of the Estonian people, and all other peoples annexed by the Soviet Union, continues to be one of repression and Russification. The effects of Moscow's policies on Estonia are clear. The Estonian culture—a colorful language, and creative literature and rich heritage—is being systematically destroyed. Demographic statistics provide irrefutable evidence that the Russians are succeeding in several aspects of their policies. The percentage of Estonians in Estonia decreases each year while the percentage of great Russians increases.

The availability of periodicals, journals, and school books in the Estonian language continues to decline. Religious persecution is carried on, and the routine violation of basic civil rights is well-known. Still, in spite of these hardships, the Estonian people have not lost their love for basic freedoms and their desire to live as a sovereign nation. The demonstrations which took place in 1980 throughout Estonia are strong witness to this.

As Americans, we must continue to identify with the Estonian people. They carry the flame of freedom in their hearts—the very flame our forefathers carried in founding our Nation, and that for which our Nation stands today. Earlier this year, the European Parliament passed a resolution reiterating the right of all the Baltic nations to self-determination. The resolution also called for their case to be brought up at followup meetings for the Helsinki accords. The U.S. Government has endorsed this resolution, and I am proud to state my support for it here today.

We must continue to recognize the courage of the Estonian people in their fight for freedom and maintain our refusal to legitimize the Soviet annexation. They are a proud people and truly deserve this recognition.●

WORTHLESS AT 65

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. LANTOS. Mr. Speaker, I would like to draw my colleagues attention to an article written by Mr. Sheldon Weinig entitled, "Worthless at 65." The article appeared in INC magazine's January 1983 issue.

Mr. Weinig is a close personal friend and his article alerts us to the opportunity before this Congress to "rethink" our attitudes toward mandatory retirement. I think Mr. Weinig's perspective on this issue is innovative and deserving of our serious consideration:

[From INC magazine, January 1983]

SPEAKING OUT WORTHLESS AT 65

(Retirement marks the point at which we cease being overpaid and start being underemployed. What a silly system!)

(By Sheldon Weinig)

Government policymakers—in Congress and the White House—tend to view the Social Security crisis as a choice between two equally unpalatable alternatives: higher taxes and lower benefits.

But the crisis really presents an opportunity, even if politicians aren't imaginative enough to see it that way. It is an opportunity not only to bring government spending on Social Security into line with revenues, but also to solve a lot of problems created, for businesses and for people, by the way we

now go about rewarding and retiring people in this country.

Our reward and retirement policies proceed form the mistaken notion that the U.S. worker operates on a curve of increasing talent and productivity until age 65, when he or she suddenly becomes completely useless, leaves the company, and begins drawing Social Security.

Just about everything is wrong with this system.

First, it is going to bankrupt the government. People are retiring faster than they are entering the work force. In 1950, there were 16 taxpaying workers to support each retiree. Today there are only 3.2. By the early part of the next century, there will be only 2 workers paying taxes fo finance the benefits paid to each Social Security recipient.

Second, and maybe more important, the system is nor fair to employees, and it is terrible for business. I am suggesting that we scrap it. Not immediately. We are used to our current system, even if we don't like it. But over time, we could get used to a new system that better serves companies and employees.

The current system is unfair to employers because it institutionalizes the Peter Principle. When you go to a retirement party, you never see the honored guest smiling. It is always his boss who is smiling, happy to jettison—under honorable circumstances—an employee who has been earning increasingly more than he is worth.

It is true that most people perform better as they spend more time in their careers; they acquire both knowledge and experience. We reward them with more responsibility, more prestige, and more money.

But it is also true that most people reach the peak of their performance well before they reach their 65th birthday. They don't suddenly become useless but their effectiveness and contribution to the company gradually trail off. By the time they actually retire, they are overbearing, overtitled, and overpaid, and we are anxious to see them leave.

Among other things, the practice is cruel. Every year we traumatize millions of retirees with a sense of worthlessness that is tragic and generally unjustified. While most people at age 65 are no longer at their peak, most are certainly able—and usually eager—to continue making a contribution. I would like to open my next plant in some location like Miami or San Diego, where hundreds of thousands of retirees are desperate for the chance to work a couple of hours a day. They would probably pay me for the privilege of enhancing their own self-esteem.

The notion of mandatory retirement at age 65 has thrown millions of Americans into geriatric depression. It has also cost U.S. industry the talents of many experienced workers, contributed to the imbalance between employees entering and leaving the work force, and overwhelmed the Social Security system.

There must be a better way, a system that abandons the expensive myths of the past and compensates employees in accordance with reality. We need a system—call it Potential Lifetime Employment—that reinforces the employee as he travels up the curve to his performance peak but also recognizes when he begins to slide down the other side. Responsibilities, titles, and wages could all begin a slow deceleration, one that involved no loss of face.

The question of who decides when a worker—either in the executive suite or on the production line—has reached his or her peak is obviously troublesome. It would be less so if each of us were not culturally indoctrinated to believe that someone is less of a man (or woman) at 64 than he or she was at 34. There is no reason, other than cultural conditioning, to label a failure the person who, at 55 or 59 or 63, decides he no longer wants to carry the responsibilities of vice-president or shift foreman.

An easy system to design and put into place? Of course not. It flies in the face of much of what we have been taught to expect throughout our lives. It demands new criteria of success, security, and accomplishment.

But I would bet that millions of Americans would jump at the opportunity to remain useful, contributing members of society well into their seventies and beyond. They would love to trade their Social Security checks for a paycheck and a chance to remain involved.

Can we design—and market—a system that recognizes that people, even after peaking, can still contribute? Can we find a way to bring them down slowly, in a culturally acceptance deceleration of working hours, responsibilities, pay, and prestige? Can we do it all without causing loss of self-respect?

We could try. The results couldn't be much more damaging than the effects of our current retirement system.●

THE PLIGHT OF LITHUANIAN CATHOLICS

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. FEIGHAN. Mr. Speaker, I rise today to draw congressional attention to the intensification of antichurch activities in the Soviet Union.

Any Soviet official will tell you that individuals can worship as they please in the U.S.S.R. The Soviet Constitution, he says, guarantees freedom of religion and freedom from religion. A clever phrase, but what does it mean? It means religious sites are razed, religious processions are disrupted, and religious officials are prevented—sometimes violently—from carrying out their functions.

In the wake of the Polish unrest—and the strong role of the Catholic Church in that protest—religious repression has become more widespread and more brutal, particularly in Poland's small but strategic neighbor Lithuania. Since October 1980, three priests have been murdered under suspicious circumstances in Lithuania. Eyewitnesses saw one of the victims, Father Bronius Laurinavicius, thrown beneath the wheels of a speeding truck. The KGB has been implicated in all three deaths and numerous other physical assaults on priests. The young Father Ricardas Cerniauskas was warned by Soviet security police to silence his criticism of the system or face an extraordinary death. And now, for the first time in 10 years, a priest faces imprisonment in Lithuania for religious activity. On January 26, the Soviet news agency Tass reported that Father Alfonsas Svarinskas had been charged with anti-Soviet activity for giving sermons that systematically instigated believers, to wage, an open struggle against Soviet power.

The opening of criminal proceedings against Father Svarinskas coupled with heightened harassment of Catholics in general is a clear sign from Moscow to the Lithuanian Church: It will not enjoy the latitude allowed the Polish Church. At the same time, the unusual announcement of a human rights arrest by Tass may be regarded as an ominous test of Western opinion before a renewed crackdown on human rights activity in Lithuania.

The Soviet Union adheres to a clear double standard on human rights issues. It is fine for the government to profess its commitment to liberty and freedom, but any individual who requests that these promises be kept is subject to intimidation, imprisonment, or even death. We cannot allow this brutal disregard for human dignity to go unnoticed. The people of Lithuania—a nation that has always received steadfast U.S. support—deserve our attention and concern. I urge all of my colleagues to join me in public protest against religious repression in Lithuania.●

LEGISLATION TO DESIGNATE JANUARY 4, 1984 AS ALASKA STATEHOOD DAY

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. YOUNG of Alaska. Mr. Speaker, 25 years ago this June, Congress approved the Alaska Statehood Act, paving the way for Alaska's entry into the Union as the 49th State. I am proud to introduce today in the House of Representatives a resolution commemorating the silver anniversary of Alaska statehood.

Alaska's entry into the Union was not easily accomplished. World War II had pointed to the necessity of statehood for Alaska. The Japanese invasion of the Aleutians, lend lease flights across Alaska to the Soviet Union, and later the cold war and its resulting early warning radar stations convinced the Nation that Alaska was vital to the national defense. Even so, the Alaska statehood issue was a hotly contested subject during the 1950's with the chief arguments against statehood being Alaska's alleged inability to pay its own way and the fact that Alaska was not contiguous to the continental United States. In June 1958, after numerous proposals and counterproposals, Congress approved statehood for Alaska. On July 7, 1958,

President Dwight D. Eisenhower signed into law the Alaska Statehood Act. Alaska formally entered the Union as the 49th State 6 months later on January 3, 1959.

Alaskans reacted with unrestrained joy to the news of the signing of the Statehood Act. Bold, half-page headlines declared, "WE'RE IN," residents danced in the streets, and church bells and factory whistles spread the news.

Most citizens of the lower 48 knew very little about the new State of Alaska. Despite the infrastructure buildup resulting from World War II, vast areas of the State were underdeveloped. Basic services, such as roads and schools were in poor condition. When I arrived in Fort Yukon, Alaska, to begin my work as a school teacher, my teaching facilities were located in a one-room log cabin, built around the turn of the century. Even in Anchorage, Alaska's largest city, very few streets were paved.

I can proudly report, however, that Alaska has made impressive progress in all areas over the past 25 years, and for an initial investment of just over $7 million, the Nation has reaped a bonanza in return. Anchorage is now a modern city of 220,000 people, and the State has established a fine system of State universities, and communication and transportation facilities. Alaska produces one-eighth of the Nation's gold; one-fifth of the Nation's oil; and two-fifths of its harvested fish; 74 percent of the Nation's Outer Continental Shelf, containing vast amounts of resources, lies off the coast of Alaska. In sum, Alaskans are proud and productive Americans.

Clearly, the United states has benefited from the inclusion of Alaska as its most northern and western State, just as Alaska has prospered as the 49th State. The Alaska Statehood commission has recently released its findings after a reexamination of Alaska statehood, and has determined that statehood is in the best interest of Alaskans, and to the interest of all the people of the United States.

I therefore respectfully submit this resolution designating January 3, 1984, as Alaska Statehood Day in honor of the 25th anniversary of Alaska's entry into the United States of America.●

PASSENGERS' FLIGHTS INCREASE AT DULLES AIRPORT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. WOLF. Mr. Speaker, I would like to bring to the attention of my colleagues an editorial in the Northern Virginia Sun edition of February 11, 1983, which comments on an encouraging upward trend in passenger and flight levels at the federally owned Dulles International Airport.

UP, UP, AND . . .

The moral battle over Washington's airports is finally taking on material proportions. Ever since Dulles International Airport was unveiled in 1964, this newspaper and hundreds of thousands of Northern Virginians have known it was better than National Airport for most of the things the area needs from airports. Now, finally, there are signs that common sense is beginning to take hold on people's travel habits.

The Washington Dulles Task Force announced Tuesday that in 1982 the number of flights out of Dulles increased steadily. So did the number of passengers using the airport. The gains are strong and from a large enough base that one can say it is a sustainable trend. That sense is even stronger when one takes into consideration that 1982 was the roughest year for air travel in ages. The recession has taken a real chunk out of people's travel dollar, and the result is they are flying less. Yet, somehow, Dulles enjoyed 2.6 million travelers—12.3 percent more than in 1981.

The reasons are many. Community leaders have pounded home the airport's superior qualities for nearly 20 years. The Air Florida crash last January revealed the tenuous safety of National Airport. The air controllers strike forced a limitation of flights at National. And the completion of a Washington to Dulles roadway devoid of traffic lights came very close to reality. All these factors combined in people's minds to say, "Hey, why not fly out of Dulles this time?"

At 2.6 million passengers a year Dulles remains a distant third in Washington area airport use. National drew about 14 million, and Baltimore Washington International drew about half that. The fact remains that Dulles is fighting an uphill battle. National enjoys the benefits of being located on a Metro line and at a central location. BWI boasts the aggressive support of the State of Maryland, complete with a huge advertising budget and its own Amtrak rail stop. Dulles, by contrast, has struggled ahead with the minimal support of the Commonwealth of Virginia and an ugly duckling attitude from the Federal Aviation Authority, which owns both National and Dulles.

In the absence of powerful help from government, private citizens like those in the Washington Dulles Task Force have taken the responsibility to lobby airlines for more and better flights out of Dulles. They are providing an invaluable service. We thank them for their efforts and hope that someday the federal government can be persuaded to listen to common sense—just like 2.6 million people did last year.●

ESTONIAN INDEPENDENCE DAY

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. HUGHES. Mr. Speaker, February 24, 1983 marks the 65th anniversary of the formation of the free and independent Republic of Estonia. On this occasion, let us call attention to the proud history of the Estonian nation.

The struggle for independence that has characterized Estonia's history began in 1918. The Estonian people, aided by England, Finland, Sweden, and Denmark, threw off the yoke of Communist rule. In 1920, the Soviet Union renounced all claim over Estonia. For the next 20 years, the independent Republic of Estonia flourished, developing a rich national culture and a prosperous economy.

But the liberty was not to last. In flagrant violation of the peace treaty of 1920, the Soviets signed the Molotov-Ribbentrop Pact, condemning Estonia and its Baltic neighbors, Latvia and Lithuania, to the harsh burden of Soviet rule. The Soviet forcibly annexed the territory of Estonia in 1940 and subjugated a free people.

Today, the culture of Estonia is in peril. Russification is rampant, and the Estonian language and culture are threatened with extinction. Fundamental freedoms have been virtually abolished: human rights violations are commonplace, and dissidence is punished swiftly by arrest, deportation, or even execution.

The Estonian people, however, refuse to this day to succumb to Soviet tyrrany and oppression. In the struggle for independence, Estonian youth continue to resist subjugation through their demonstrations and appeals to the free world. In support of this quest for freedom, the United States refuses to recognize the annexation of the Republic of Estonia by the Soviet Union. We who live free urge the government of the Soviet Union to comply with the provisions of the Helsinki accords, and grant the citizens of Estonia their basic individual liberties and human rights.

The brave people of Estonia deserve international recognition today for their never-ending struggle for liberty and emancipation from Soviet control. I join Estonians and Estonian-Americans in their hope that their quest for independence will end in victory, and the Independent Republic of Estonia will again take its deserved place among the free nations of the world.●

ESTONIAN INDEPENDENCE

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. ANDERSON. Mr. Speaker, today I would like to honor a people who, in the face of great danger, are struggling to keep their identity as a nation intact. I am speaking of the people of Estonia, long a proud and accomplished nation, but now a Russian colony under the shadow of Soviet oppression. Today is their independence day, which cannot be celebrated in Es-

tonia, but serves to remind Estonians worldwide of their identity.

The Estonians have lived on the same land for over 2,000 years, developing a rich Estonian tradition from a culture that is neither Slavic nor Germanic. Although, since the 13th century, the Estonians have often been ruled by others, an independent Estonian state was declared on February 24, 1918, and freely ruled until 1940, when it was invaded and annexed by the Soviet Union. Currently, Estonians are facing the greatest threat ever to their language, culture, and their very existence as a nation.

Ever since Estonia unwillingly became part of the Soviet empire, Estonian culture and identity have been repressed. Although nominally an independent state in the Union of Soviet Socialist Republics, Estonia is, in reality, totally controlled by Moscow, which does not tolerate any autonomy in its subject states. The Soviet Union is now attempting to destroy the Estonian, and replace him with the "new Soviet man", who, schooled to believe in the tenants of Soviet communism, would reject the culture of his ancestors, and embrace that of the Soviet Union. In reality, this is a policy aimed at crushing any culture other than the precribed Russian Communist model.

In Estonia, this policy has already had many serious consequences, including the suppression of the Estonian mother tongue. Russian language is granted preferential status at all official, educational, and even cultural levels, whereas the status of Estonian has diminished.

The Soviet Union is also attempting to destroy Estonian culture by flooding the area with Russian workers. This has upset the demographics of the region, as well as the Estonian national identity. Russians now make up almost half of the population of the capital city of Tallinn, and may outnumber native Estonians after the completion of the new harbor there. Currently only about two-thirds of the country's population is Estonian, and that ratio is falling as increasing numbers of Russian workers are brought in.

There are signs of hope, such as the student anti-Russian protests in 1980. On January 13 of this year, the European Parliament passed a resolution reiterating the right of the Baltic States of Estonia, Latvia, and Lithuania, to self-determination, and called for their case to be brought up at the followup meetings for the Helsinki accords, and to be submitted to the U.N. Subcommittee on Decolonization, inasmuch as these countries are, in effect, Soviet colonies. Every sign of encouragement that the West did not abandon the Baltic States at Helsinki will help keep hope alive for Estonians, both in this land, and in Estonia itself. Let us hope that some day soon, Estonian Independence Day can have real meaning again.●

STATE COLLEGES AND UNIVERSITIES TAKE NATIONAL STAND

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. FORD of Michigan. Mr. Speaker, the board of directors of the American Association of State Colleges and Universities (AASCU) has taken a position of leadership within the higher education community by viewing the problems of higher education in the broad context of national policy. The AASCU board of directors called for a delay in the 10-percent tax reduction scheduled for this July and for no further reductions in Federal aid to States. AASCU represents 354 State colleges and universities which enroll more than 2 million students. The text of the resolutions follows, and I call it to the attention of my colleagues:

RESOLUTION ADOPTED BY THE BOARD OF DIRECTORS OF THE AMERICAN ASSOCIATION OF STATE COLLEGES AND UNIVERSITIES

Whereas the growth rate in funding for domestic programs, including higher education, has been slowed and, in some cases, has been cut; and

Whereas defense spending has increased dramatically; and

Whereas tax cuts have reduced available revenues; and

Whereas the federal deficit is projected to be $185 billion in FY 83, over $200 billion in FY 84, and in excess of $288 billion in FY 88; and

Whereas further cuts in domestic spending cannot offset the revenue losses resulting from the tax cuts, provide the revenue necessary for planned increases in defense spending, and therefore will not have a significant impact on the size of the deficit; therefore be it

Resolved, That the Board of Directors of the American Association of State Colleges and Universities, representing 354 public colleges and universities in the United States, urges the delay of the 10 percent tax cut scheduled for implementation in July of 1983.

RESOLUTION ADOPTED BY THE BOARD OF DIRECTORS OF THE AMERICAN ASSOCIATION OF STATE COLLEGES AND UNIVERSITIES

Whereas the recession has resulted in substantial losses of state revenues, including more than $8 billion lost since revenue estimates were made last spring; and

Whereas the federal government will have cut over $57 billion in aid to the states by the end of fiscal year 1983; and

Whereas State expenditures already have been cut substantially in the last two years and are estimated to have fallen by $5 billion since last spring; and

Whereas cuts in expenditures by state governments have had a significant and damaging impact on public higher education institutions; therefore be it

Resolved, That the Board of Directors of the American Association of State Colleges and Universities, representing 354 public colleges and universities, urges that no further cuts be made in aid to state governments; and be it further

Resolved, That the Board of Directors of AASCU urges that programs which are currently the responsibility of the federal government not become the responsibility of the states, unless the federal government provides the necessary funding.●

PLIGHT OF THE SPERM WHALE

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. RATCHFORD. Mr. Speaker, in 1975, the sperm whale was designated as the State animal of Connecticut, not only for its special contribution to the State's history, but in recognition of its current plight as an endangered species. It is estimated that even if all hunting of sperm whales was to cease immediately, some populations would continue to decline for another 20 years. Commercial catch limits imposed on the remaining whaling industry are more a reflection of the dwindling numbers of whales in existence than of serious conservation efforts. For these reasons, I applaud the recent passage of a ban on all commercial whaling by the International Whaling Commission (IWC) effective in 1985. I address you here today, however, because this spectacular victory is gravely threatened.

Japan, Norway, the Soviet Union, and Peru, all member nations of the IWC, have filed objections to the IWC ban. Since the IWC is without the power to enforce its own rulings, these nations will ultimately become exempt from the ban if their objections are not withdrawn. The tragedy and the irony is that it is these nations that harbor the last vestiges of the archaic whaling industry.

Many conservation and environmentalist groups were urging Congress to put pressure on these nations by denying the approval of their U.S. fishing rights. Under the Fishery Conservation and Management Act, countries wishing to fish within our 200-mile fishery conservation zone must have a Governing International Fishing Agreement, or GIFA. Japan, who depends heavily on the fish they obtain from U.S. waters, was seeking reauthorization of their GIFA last year. Japan's GIFA was, in fact, approved during the lameduck session as a part of a larger package of fisheries matters. Their agreement is effective for 5 years.

While the GIFA was passed, it is only the first step. Subsequent determination must be made regarding how many and what types of fish may be taken under the GIFA. The U.S. Department of State conducts a quarterly review of these allocations during

each year the GIFA is in effect. The first review of Japan's GIFA will be conducted next month. It is here that the United States can still bring pressure to bear on nations to withdraw their objections to the whaling ban.

To this end, I am introducing a concurrent resolution expressing the sense of Congress that the U.S. Department of State should give consideration to whether or not a nation has filed an objection to the IWC ban when determining the level of allocations a nation is to receive under a GIFA. While the Fishery Conservation and Management Act contains two amendments—the Packwood-Magnuson and the Pelly amendments—through which unilateral sanctions can be leveled against countries who violate IWC rulings, these provisions will not be triggered into effect until the ban, which takes effect in 1985, is actually violated. My resolution is intended to affect the quarterly reviews of allocation levels being set under the GIFA beginning next month and continuing for the duration of the agreement.

This resolution gives Congress an opportunity to reaffirm the U.S. policy of preventing the continuing decline in the world's whale populations through the conservation and protection of whale species. It sends a strong message to the nations who have filed an objection to the IWC ban that the United States finds the cruel and unnecessary slaughter of whales unacceptable.

I must point out that the continuation of whaling by these nations is hardly justifiable from an economic standpoint. Japan, which has the largest of the remaining industries, is the only market for whale meat in the world. Most important, the market for this meat accounts for a mere 0.3 percent of the total annual Japanese protein consumption. It is clearly not a staple of the diet. We are looking at the potential annihilation of the greatest and most intriguing of nature's marine marvels for the production of such items as pet food, fertilizer, and industrial lubricants. Adequate substitutes for these products are readily available at reasonable cost. Not one need that is being met through the extermination of whales cannot be met in a less drastic way. The products derived from whales are either disposable or replaceable. The whales themselves are not.

These purely economic considerations, which alone are a compelling argument in favor of the ban, do not even touch on the scientific and humanitarian concerns at stake. The administration has endorsed the imposition of the legislative sanctions against the nations refusing to withdraw their objections to the IWC ban in 1985. It is my hope that these objections will be withdrawn before more vigorous actions contained in the Fisheries Conservation and Management Act are triggered, and I urge my colleagues to join with me in conveying this message.●

LEGISLATION TO AVERT UTILITY SHUTOFFS IN WINTER MONTHS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. CONYERS. Mr. Speaker, today, I have introduced the "Home Heating Protection and Utility Regulation Act of 1983" (H.R. 1594). This bill would amend the Public Utility Regulatory Policies Act of 1978 to provide for uniform, mandatory Federal standards governing terminations of natural gas and electric home heating service by the utilities.

The legislation seeks to prevent the involuntary termination of utility service in households that are unable to pay their bills on time and in cases that would endanger the health of individuals. The bill establishes standards and procedures for State regulatory authorities to avert shutoffs during the winter period and requires arrangements between affected households and the utilities for the scheduling of deferred payment and repayment of past bills. The legislation builds on the voluntary standards set in the 1978 law, which in many instances have proved inadequate, and incorporates key features of the best State regulations currently in force.

The record number of utility shutoffs this winter, along with the steep increase in gas prices and the insufficient funding of the low-income energy assistance program, have produced a crisis for tens of thousands of low-income households. Across the Nation, the Citizen Labor Energy Coalition estimates, more than 300,000 households have experienced gas shutoffs this winter. Preliminary data collected by the National Consumer Law Center indicate that the number of shutoffs this winter far exceeded the average in the past few years, and low-income families are disproportionately affected. Since there are no Federal or State reporting requirements on terminations, the data collected is likely to understate the dimensions of the problem. Associated with utility shutoffs is the dramatic increase in the number of households that have fallen into arrears. The increase in unpaid utility bills has reached critical levels in several States.

Under the pressure of the situation, some progress has been made to establish reasonable standards and procedures to assist households to avert shutoffs. Often these standards rest upon voluntary compliance. In too few cases have State regulatory authorities protected individuals whose health can be affected by terminations. For example, only 17 States permit utility customers to request a formal hearing before a regulatory body. Only 10 States have procedures to protect young children and elderly persons. Only a handful of States compel utilities to enter into repayment or deferred payment agreements. The disparities in State regulations and indifferent enforcement of existing standards present sufficient reasons to propose uniform, mandatory Federal standards. The alarming increase in illness and death attributable to loss of body heat points to the inadequacy of existing standards.

The legislation I have introduced provides for: First, the adoption and enforcement by State regulatory authorities of standards to protect against termination of service of households who lack financial resources and can demonstrate a danger to health; second, standards and procedures to require the reinstatement of service to households that meet certain criteria; third, standards and procedures permitting customers to have hearings before a State regulatory authority; fourth, procedures to encourage agreements on deferred payment or repayment of past bills, and to compel such arrangements if voluntary efforts fail; fifth, standards and procedures to protect tenants in buildings whose landlords are in arrears, and to permit direct payment by tenants through the use of escrow accounts; sixth, collection of comprehensive data on utility service shutoffs by each State regulatory authority, and the filing of such reports with the Secretary of Energy for public use; and seventh, an authorization of funds to cover the additional costs and responsibilities imposed on State regulatory authorities under this legislation.

Sooner or later—if not this winter, then next—uniform, mandatory Federal standards have to be adopted to protect citizens against heating shutoffs during the winter months. Access to heating, like access to food, should not be treated as a privilege. Too many households already confront life-threatening choices between paying for food and paying fuel bills.

This legislation provides safeguards to insure that the utility companies are paid for the services they provide. It also calls upon the utilities to act responsibly in emergency situations, and strengthens the role of State regulatory authorities in fulfilling their public obligations.●

ONE BILLION DOLLARS SPENT IN STEEL CREATES 52,000 JOBS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. GAYDOS. Mr. Speaker, in my recent special orders on the Buy American amendment to the Surface Transportation Act I said that an estimated $918 million will be spent on manufactured goods a year under the bill; the correct estimate is that $918 million will be spent on manufactured goods over the life of the plan.

Nevertheless, it still would be a significant blow to the intent of Congress and the plan to exempt nearly $1 billion in manufactured goods from the Buy American provisions, which the Federal Highway Administration is considering.

This $1 billion would lead to substantial activity.

Information recently developed by the Congressional Research Service indicates that every $1 billion spent on steel generates 52,000 jobs; and that every $1 spent on steel leads to $2.20 in economic activity.

This means the Federal Highway Administration—by exempting manufactured goods from Buy American—would waive almost 52,000 jobs and $2.2 billion in economic activity.

These jobs and this activity should remain in the United States, and I say again that creating jobs in the United States was what Congress intended in passing the bill and in passing the Buy American amendment.●

FINDING A CURE FOR NEUROFIBROMATOSIS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. WALGREN. Mr. Speaker, today I am introducing a bill to establish a National Commission on Neurofibromatosis (NF). This disorder received national attention several years ago by the Broadway play, "The Elephant Man," a remarkable saga of a man struggling with this disorder.

Neurofibromatosis is a genetic disorder of the central nervous system occurring in 1 out of every 3,000 births.

It afflicts approximately 100,000 people in the United States and occurs in both sexes and in all ethnic and racial groups. Each child of an affected parent has a 50-percent chance of inheriting the gene and developing NF. Dr. Frederick von Recklinghausen first published medical literature on the disorder in 1882.

Manifestations of the disorder usually appear in childhood or adolescence, though they can appear later in life. Children with NF can frequently be identified shortly after birth by the appearance of a number of light brown spots. NF patients may develop a number of problems, including many small tumors under or on the skin, large tumors just under the skin, curvature of the spine, enlargement and deformation of bones, and tumors of the auditory, and optic nerves. These problems can lead to other problems like deafness and blindness which then create severe educational, economic, and social problems.

Presently there is no cure for NF and medical opinions on treatment vary tremendously. In my view, we need to bring into focus what we are doing as a Nation to find a cure for NF and identify what more we need to do. I am hopeful that my bill will lead us in that direction.

The bill I am introducing today will establish a national commission that will have 2 years to assess the nature and extent of public and private research into neurofibromatosis and to develop a plan to identify the research needed to develop a cure for NF. The Commission would be composed of 12 members, including representatives of the National Institute of Neurological and Communicative Disorders and Stroke, the Director of the National Cancer Institute, the National Institute of General Medical Sciences, the National Institute of Child Health and Development, and the Department of Education. These representatives would be joined by three scientists or health professionals, and three individuals who have experience with the disorder. This approach is modeled after the National Commission established by the Congress for Huntington's disease in 1977.

In the last Congress, we took a big step by enacting the Orphan Drug Act which offers hope to many people afflicted with rare diseases. I hope that my colleagues will join me in pressing the Nation to combine its resources to eradicate the many diseases for which we have not found a cure.

The text of my bill follows:

A bill to establish a National Commission on Neurofibromatosis

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Commission on Neurofibromatosis Act".

FINDINGS

SEC. 2. The Congress makes the following findings:

(1) Neurofibromatosis (also known as Von Recklinghausen's Disease) is a genetic disorder of the nervous system. Fifty percent of all cases of neurofibromatosis are inherited from one of the victims' parents. The other 50 percent are a result of a spontaneous change or mutation of a gene. The cause of this mutation is unknown.

(2) While the exact incidence of neurofibromatosis in unknown, it is estimated that the disorder affects one in every three thousand persons.

(3) Neurofibromatosis occurs equally in both sexes and in all racial and ethnic groups. It often imposes severe economic, social, and emotional hardships on individuals and on the families of individuals affected by the disorder.

(4) Neurofibromatosis is one of the world's most serious genetic disorders.

(5) Characteristic signs of neurofibromatosis may be present at birth. Manifestations usually appear in early childhood or adolescence, but can occur later, particularly at times of increased hormonal activity.

(6) There is a critical shortage of specialized programs and properly trained professionals in the United States for neurofibromatosis research, treatment, care, education, and rehabilitation.

(7) The training of health and educational professionals in the treatment of neurofibromatosis deserves the highest national priority.

(8) The people of the United States have an inadequate understanding of the nature of the personal, medical, social, and economic impact of neurofibromatosis.

(9) There is a great potential for making advances in the treatment of neurofibromatosis and other genetic disorders through the National Institutes of Health and other research centers.

ESTABLISHMENT

SEC. 3. The Secretary of Health and Human Services (hereinafter in this Act referred to as the "Secretary"), in consultation with the Director of the National Institutes for Health, shall within sixty days after the date of the enactment of this Act establish a National Commission on Neurofibromatosis (hereinafter in this Act referred to as the "Commission").

DUTIES OF COMMISSION

SEC. 4. (a) The Commission shall assess the nature and extent of public and private research into neurofibromatosis and shall develop a plan to identify the research needed to develop an effective treatment and a cure for neurofibromatosis. In formulating such plan the Commission shall consider the incidence of neurofibromatosis, its epidemiology, its economic and social consequences, and the most effective application of scientific and health care resources.

(b) The plan developed under subsection (a) shall provide for—

(1) research into the epidemiology, etiology, prevention, and control of neurofibromatosis which shall include studies involving the disorder's social, environment, nutritional, biological, and genetic determinants and influences;

(2) research into the development, evaluation, and application of techniques and drugs used in, and approaches to, the treatment and prevention of neurofibromatosis and its consequences;

(3) the education and training of scientists, clinicians, educators, and allied health personnel in the fields and specialties requisite to the conduct of programs concerning neurofibromatosis; and

(4) development of a system for collection analysis, and dissemination of all data useful in the prevention, diagnosis, and treatment of neurofibromatosis.

MEMBERSHIP

SEC. 5. (a) Commission shall be composed of twelve members as follows:

(1) The Secretary of Health and Human Services (or his delegate).

(2) The Director of the National Institute of Neurological and Communicative Disorders and Stroke (or his delegate).

(3) The Director of the National Cancer Institute (or his delegate).

(4) Director of the National Institute of General Medical Sciences.

(5) Director of the National Institute Child Health and Human Development.

(6) The Secretary of Education (or his delegate).

(7) Three individuals appointed by the Secretary of Health and Human Services who are not officers or employees of the Federal Government, who are scientists or health professionals representing the various behavioral, biomedical, and educational specialties concerned with the research, treatment, and remediation of neurofibromatosis.

(8) Three individuals appointed by the Secretary of Health and Human Services from the general public with personal experience with neurofibromatosis.

A vacancy in the Commission shall be filled in the same manner as the original appointments was made.

(b) If any member of the Commission who was appointed to the Commission by virtue of such individual's office leaves that office, or if any member of the Commission who was appointed from individuals who are not officers or employees of the Federal Government becomes an officer or employee of the Federal Government, such individual may continue as a member of the Commission for not longer than the thirty-day period beginning on the date such individual leaves that office or becomes such an officer or employee, as the case may be.

(c) Members shall be appointed for the life of the Commission.

(d)(1) Except as provided in paragraph (2), members of the Commission shall each be entitled to receive the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Commission.

(2) Members of the Commission who are full-time officers or employees of the Federal Government shall receive no additional pay, allowances, or benefits by reason of their service on the Commission.

(e) The Chairman of the Commission shall be elected by the members of the Commission.

(f) The Commission shall first meet on a date specified by the Secretary, not later than thirty days after the Commission is established, and thereafter shall meet at the call of the Chairman or a majority of its members, but on at least three occasions during the life of the Commission.

DIRECTOR AND STAFF OF COMMISSION

SEC. 6. (a) The Commission shall have an Executive Director who shall be appointed by the Commission and paid at a rate not to exceed the rate of basic pay payable for level 5 of the Executive Schedule.

(b) With the approval of the Commission, the Executive Director may appoint and fix the pay of such additional personnel as the Executive Director considers appropriate.

(c) The Executive Director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(d) Subject to such rules as may be prescribed by the Commission, the Executive Director may procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed $200 per day.

(e) Upon request of the Commission, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this Act.

(f) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

POWERS OF COMMISSION

SEC. 7. (a) The Commission may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it.

(b) Any member or agent of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this Act. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

REPORT

SEC. 8. The Commission may transmit to the President and to each House of the Congress such interim reports as it considers appropriate and shall transmit a final report to the President and to each House of the Congress not later than twenty-four months after the date the Commission is duly organized. The final report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative actions as it considers appropriate.

TERMINATION

SEC. 9. The Commission shall cease to exist three months after the submission of the final report under section 8.●

PUT AMERICA BACK TO WORK AND SAVE ENERGY

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. EDGAR. Mr. Speaker, I am deeply concerned about the large-scale unemployment across the United States. In 1982, I orchestrated a discussion on the floor of the House of Representatives on the positive impacts of renewable energy development on our Nation's employment. I believe we must put the American people back to work in occupations with high future growth potential. The employment title of the Solar Energy National Security and Employment Act (SENSE) is a rational step in this direction. I would like to submit the article by the Christian Science Monitor published February 7, 1983, titled "A Way to Help Put America Back to Work—and Save Energy."

[From the Christian Science Monitor, Feb. 7, 1983]

A WAY TO HELP PUT AMERICA BACK TO WORK—AND SAVE ENERGY

(By Leon Lindsay)

One of the best job-producing moves government could make, according to energy-conservation advocates, would be an investment in weatherization and solar-energy devices for homes and businesses across the United States.

People involved in such conservation activities say their potential for producing new jobs, business expansion, and energy savings has been demonstrated. A much larger commitment than has been proposed either by the Reagan administration or congressional Democrats is justified, the conservationists argue.

A $5.4 billion Democratic jobs bill, passed by the U.S. House late last year but not acted upon by the Senate, would have provided $250 million for weatherproofing homes and apartments occupied by low-income residents.

Although Department of Energy funding for conservation projects is cut almost in half in President Reagan's proposed fiscal 1984 budget—from $670 million in fiscal '83 to $383 million in the budget year beginning next July 1—statistics gathered over the past several years by agencies involved in weatherization and solar energy projects indicate these activities are very efficient employment stimulators.

The Solar Lobby in Washington, D.C., will announce later this month a "Solar Energy, National Security, and Employment Act." The measure would provide major impetus to the energy conservation effort. It will not require any new funding in fiscal 1984, according to Scott Sklar, the lobby's political director.

The bill has four parts, explains Mr. Sklar, dealing with small business, national security, employment, and consumer information. "Basically they either protect or broaden certain programs to help renewable energy or extend programs that are due to be cut off in the future," he says. Energy tax credits for small businesses and homeowners, due to expire in 1985, would be extended to 1990. Under the bill, skill training for workers in renewable energy and conservation activities, such as solar and weatherization, would be allowable in all federal jobs programs.

A bipartisan group of 20 U.S. senators and representatives, several of them chairmen of key committees, are sponsoring the legislation.

Ted Rauh, chief of the Division of Conservation of the California Energy Commission, points out that conservation activities are a close second to highway construction in providing jobs and stimulating business activity—with the added benefit of cutting energy consumption and costs. Energy efficiency programs and businesses in California provided $750 million worth of jobs and investments in 1982, Mr. Rauh reports.

Representatives for the AFL-CIO's Industrial Union Department project that energy conservation activities could create 600,000 jobs by 1990.

Michael Gordon, program director of The Institute for the Human Environment in San Francisco, says: "An expanded effort to 'button up our homes' would provide many thousands of jobs in both the public and private sectors—through production of home weatherization materials; retail sales of insulation, weatherstripping, caulk, water-heater blankets, low-flow shower heads, and other products; and the organization, administration, and implementation of coordinated local weatherization programs throughout the United States."

He cites Santa Clara County, Calif., as an example. It is estimated, Mr. Gordon says, that "if even 25 percent of homes in the county needing weatherization were made energy-efficient, almost $30 million in local sales of material could be realized."

Portland, Ore., which began an ambitious weatherization and energy-conservation program in 1979, provides impressive evidence of what it can mean to a local economy.

According to Jeanne McCormick, director of the Portland [Ore.] Energy Office, that city's weatherization and energy-conservation program has produced many benefits in terms of residential and business savings—and jobs saved as well as created. "We have found," she says, "that, generally, investment of $15 million by local businesses in such projects such as insulating buildings, or changing to more energy-efficient ways of making their products, create—directly—525 jobs.

"There's not only the contractor who comes in to do the job, there are engineers who perform energy audits and architects who design changes. They there's what we call the "leveraging effect," where you have the secretary who works for the contractor, and so forth.

"We have done energy audits for 146 small businesses, which have been able to cut energy consumption (an average of) 19½ percent as a result. Even though energy costs in Portland are lower than in many other areas of the country, those firms collectively are saving $525,000 a year. They can reinvest that money in expansion.

"So it's not just the number of jobs created by the weatherization itself, but how much money that business saves that can be used to diversify or expand or spend on training or use it to keep people on the job."

Mrs. McCormick and others point out that little retraining of workers is involved in these energy-conservation activities. Most come from the existing pool of unemployed skilled workers—carpenters, pipefitters, boilermakers, and plumbers, and other in light construction and light manufacturing. Other direct and indirect positions are created in marketing, retail sales, business management, lending, and the appraisal and real estate fields.●

INTRODUCING THE NEIGHBORHOOD DEVELOPMENT DEMONSTRATION ACT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. GARCIA. Mr. Speaker, today I am introducing, along with Congressman BILL COYNE and 26 cosponsors, the Neighborhood Development Demonstration Act of 1983. We drafted this legislation because of the urgency of augmenting existing housing and community development programs. With proposed budget cuts in economic development, assisted housing, and community development block grants, we must turn to new avenues to promote business, jobs, and adequate housing for the needy.

The act would authorize the Secretary of Housing and Urban Development to establish a 3-year demonstration program to provide Federal matching funds to private nonprofit neighborhood organizations. For each participating organization, the Secretary would establish a ratio by which voluntary charitable contributions made by individuals and businesses would be matched by Federal funds. Depending on the economic conditions and the number of households and businesses in the neighborhoods involved, this ratio would be set no lower than 3 Federal dollars for every dollar of voluntary contribution, nor higher than 10 Federal dollars for every dollar of voluntary contribution. Perhaps the most significant objective of this legislation is to encourage a stronger financial base, for neighborhood groups through increased private sector donations.

Neighborhood organizations often provide the most successful programs in depressed urban areas, such as my congressional district, the Bronx. Neighborhood groups can serve as a unifying force around which concerned citizens can work for the betterment of their communities. During a time marked by decreases in social spending and aid to urban regions, it is vital to augment the neighborhood development organizations that strive for the revitalization of our cities. I urge your support of the Neighborhood Development Demonstration Act of 1983 so that we can assist community groups in their effort to revive urban America.●

MAUMEE BAY STATE PARK

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Ms. KAPTUR. Mr. Speaker, I am introducing legislation to authorize a shoreline erosion protection project at Maumee Bay State Park in northwest Ohio.

Maumee Bay State Park is a multiuse facility located in Lucas County, Ohio, on the south shore of Lake Erie near Toledo. The park covers 1,700 acres and adjoins the federally owned Cedar Point National Wildlife Refuge. The shoreline protection project is critical to the future of this parkland. Shoreline erosion is occurring at the rate of 12 feet each year. Without the shoreline protection project, the beach will continue to erode. Until the shoreline is stabilized, the State of Ohio cannot go forward with its major development plans for the park. The State is committed to significant capital improvements for the park. To date, the State has already contributed $440,000 for purchase of the property and $1,500,000 for campground development. A recent $60,000 study has been funded to design a lodge complex. The State of Ohio's investment in the Maumee Bay State Park is already in excess of $2 million.

The estimated current cost of the shoreline project is $10,396,000, with the State of Ohio providing approximately a third of that amount. In addition to its contribution to the shoreline project, the State has expressed its intent to complete the overall development of Maumee Bay State Park currently estimated at $36 million.

The revitalization of the Maumee Bay State Park would provide much needed short- and long-term employment opportunities in a region suffering from high unemployment. During the span of the park's construction, 2,000 new jobs are expected to be generated. In addition, permanent jobs will be created in the park and in related industries. The permanent jobs that will result can be filled by area residents lacking specific job skills. The overall park investment is expected to generate $3 per visitor. With an estimated 1 million visitors per year, this would yield $3 million in new annual revenues for the Toledo area. The park will also serve to attract industry and provide for new Toledo convention trade. The park, the only major State park in northwest Ohio and the only one in close proximity to a major metropolitan area, will directly serve five congressional districts. It will capture local tourism and recreation dollars which are being spent out of the State.

Given the tremendous national development potential of Lake Erie, a fresh water lake, and the need for a major State park to serve northwest Ohioans, I believe that the jobs and dollars that would be generated by the Maumee Bay State Park warrant its immediate development. An indispensable first step is to halt the shoreline erosion. Ohioans have already made a significant investment in the park. It is time they receive a return on their investment.●

TRIBUTE TO COUNCILMAN NORMAN REEVES

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. MITCHELL. Mr. Speaker, my entire city of Baltimore still mourns

the death of Norman V. A. Reeves who was serving on the Baltimore City Council at the time of his passing. He was such a remarkable human being that as much of his life history as possible must be shared with as many as possible.

I urge my colleagues to read the story of this man, a victim of muscular dystrophy, who lived a life much more full than many of us.

NORMAN V. A. REEVES

(By Langston Hughes)

Norman V. A. Reeves' life is a statement that is both profound and simple. His role as a father, husband, freedom fighter, city councilman, businessman, educator are all variations on a single theme—the burning desire to succeed. His family life, his reaction to his physical handicap, and his successful pursuit of public office are elements that provide a study in the positive expression of the black experience.

He was born on April 27, 1935. His mother, Lucy Mason Reeves Jones, is one of Baltimore's first black women podiatrists. His father, Norman V. A. Reeves, Sr., died when Norm was five-years-old. When Norm was three-years-old, it was determined that he had musclular dystrophy. His doctor predicted that he would be in a wheelchair or dead by the time he was 13, and advised Norman's mother to restrict his physical activities. Norm's reaction was to become even more active and he was able to participate in sports as a fierce competitor up until age 13. His old doctors marveled at his general good health as the disease slowly took its toll. Not until several years before his death was he confined to a wheelchair, from which he continued to pursue an active public life.

He attended Douglass High School, graduating in 1953. Later, at Lincoln University, Norm majored in psychology and minored in economics and philosophy, graduating with honors in 1957. His active involvement in college life is chronicled in the 1957 edition of "Who's Who in American Colleges and Universities". Upon graduating from Lincoln, he joined the Baltimore City Department of Social Services as a caseworker. Here he met Walter P. Carter, a local leader in the Congress of Racial Equality (CORE), who was later to become known as Baltimore's "Mr. Civil Rights". The two started Howard University together in 1961 to pursue a Masters degree in Social Work. This was during a period when Walter was heavily involved in the Route 40 demonstrations and other CORE campaigns. Walter and Norm discussed strategy and tactics on the daily trip between Baltimore and Washington, D.C. Newspaper headlines during the height of the Maryland fight against segregated public accommodations was an indirect result of some of these discussions and Norman's commitment to an ongoing involvement in efforts to effect change deepened. At Howard, Norm met Iris Gant of North Carolina who was also studying for an MSW. The couple exchanged vows in August of 1962. "Little Norm" was born in 1963, and daughter Traci in 1969.

Norm was the first black supervisor serving the Baltimore County Department of Welfare in the late 1960's. During this time, black militancy was generating fear and confusion among whites. Norm conducted race relations seminars and pointed up numerous areas of racism within the County department, providing many whites with their first real glimpse into the black ethos. It was also during this period that Norm headed up the William L. Moore Foundation and its Center for Afro-American Studies. The Foundation headquarters was established in the former home of the late William Moore, the Baltimore postman gunned down while on a freedom walk through Alabama. During the hectic 1960's, the Foundation was a frequent and important meeting place of community organizations and activist groups. The Center maintained an extensive library on black history and sponsored annual symposiums during Black History Week focussing on the historical and cultural aspects of the Black Movement. It was the first local group to demand that the City of Baltimore and the State of Maryland declare a Black History Week.

Norman worked as a counselor at the University of Maryland Baltimore County Campus in 1969, where he founded the Black Caucus of Faculty and staff. Within a year the Caucus became the basis for a larger organization, the Black Coalition of University of Maryland Campuses. Norm served as co-chairman of the coalition, along with Howard "Pete" Rawlings, a UMBC instructor who is now a delegate from the 40th district. The coalition's efforts resulted in an increase of black faculty and students on the undergraduate and graduate level, and integration of the Board of Regents.

In 1971, Norm accepted the position of principal of the Ralph Young School for Boys, a Catholic school. It was during this period that he decided to run for political office. His first try in 1971 produced a spirited grassroots effort, but no victory. A second try in 1975 brought together an even greater community based organization and victory seemed within reach. However, the opposition also recognized the threat, and the use of the same name ploy—an unemployed truck driver named "Reeves"—cost the Fifth District their first Black city councilman.

There was never any question in Norm's mind as to whether he should run again for the prize that had twice eluded him. He had proven that he could build a political organization and that his community involvement could translate into political action. He had also answered the often unspoken question in the minds of many—whether he could withstand the rigors of the campaign trail. The stage was set for a history-making victory and Norm did just that, leading the Fifth District field of candidates by a wide margin.

One of the remarkable aspects of Norm's election was the diversity of his vote, which included a sizable percentage of Jewish and white liberal voters. His appeal as a candidate experienced in the problems of race relations and urban blight was seen by many as a bridge across the gap of race and class that often inhibits community progress. Norm promised to represent the needs of all his constituents and considered the diversity of his vote a mandate to promote a new era of political cooperation in the Fifth District. And because the district was itself a microcosm of Baltimore—ranging from lower Park Heights to Roland Park—Norm saw it as a basis for a citywide attack on urban problems.

The range of issues Norm became involved in during his brief tenure on the City Council reflected his broad interests and concerns. He passed consumer protection legislation setting safety standards for the installation of woodburning stoves. He passed housing legislation designed to keep out-of-state property owners from evading their responsibility for housing conditions by requiring that they appoint a local residential agent to respond to notices. He passed a bill requiring for the first time the registration of single family and duplex rental units. The bill will raise $600,000 to a million dollars a year and should bolster the housing inspection services for the City of Baltimore.

He passed other resolutions calling for a study of the feasibility of using City pension funds for home mortgages (before a similar State program was announced) and a study of the City Civil Defense program. His work on the Budget and Finance Committee and Urban Affairs Committee has resulted in commitments of several thousand jobs for blacks and assistance to a number of black businesses. He also passed a resolution calling for a task force to study the problem of black economic development and black unemployment in the City of Baltimore, which he chaired.

As a community activist, Norm had been a strong advocate for peace and asserted that a world view is necessary to combat the forces impacting on people at the local level. He successfully sponsored resolutions for the condemnation of South Africa and the role of the United States in El Salvador, and co-sponsored a resolution urging a nuclear weapons freeze.

Councilman Reeves was in full stride at the time of his death. He had become recognized as a hard-working, effective legislator who did his homework and attempted to represent his district with integrity and compassion. At a salute held for him on April 25, 1982, it was clear that a future in the City Council was assured. No one knew better than he how short that future was to be. He is quoted in one news account shortly after his 1979 election as saying: "I want to see that my agenda is finished before I am finished." There is no question that Norm's agenda, viewed as a statement which speaks eloquently of the aspirations of a man and his people, is complete.

Norman V. A. Reeves died in Provident Hospital on February 13, 1983. He was 47 years old. He is survived by wife, Iris; son, Norman III, 19; daughter, Traci, 13, and mother, Dr. Lucy Mason Reeves Jones.●

HARRIS COUNTY PHYSICIANS PROVIDE SHINING EXAMPLE OF VOLUNTARISM

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. PAUL. Mr. Speaker, in these hard economic times, millions of American workers are facing unemployment and, as a consequence, loss of their health care benefits. Some would have us believe that the best way to deal with this kind of personal hardship is for the Federal Government to step in with various welfare programs.

But there is another kind of solution—a solution that is a proud tradition in America. This solution comes through the private, voluntary efforts of individual Americans.

This course of action—voluntary help on an individual basis—has been chosen by over 1,000 physicians in the Houston area. These doctors, members of the Harris County Medical Society, are providing free medical care to those in the Houston area who are temporarily unemployed, or lack medical insurance.

I believe this effort on the part of Harris County physicians and the Harris County Medical Society is an inspiring example of the spirit of generosity and community that characterizes our great Nation and our people.

We are often told that it is necessary for the Federal Government to provide help to the needy and the unfortunate, because people will not choose to help others voluntarily. This recent action by Harris County doctors proves just how wrong that attitude is. I salute these fine physicians for their willingness to help those in need.

[From the Houston Chronicle, Feb. 14, 1983]

MORE THAN 1,000 PHYSICIANS OFFERING FREE CARE TO UNEMPLOYED

(By Ruth Sorelle)

More than 1,000 of the Harris County Medical Society's 4,500 members began offering free care today to area residents temporarily out of work or without health insurance.

"We have long maintained that no person in Harris County should ever go without care because of an inability to pay," Dr. Joel Reed, society president, said. "This voluntary effort is designed to provide physician care to that segment which finds itself temporarily out of work and in many cases out of health care coverage.

"We are aware that some individuals and families have fallen through the cracks of the system and we are ready, willing and able to augment the existing city, county and state assistance programs by addressing the recession-distressed segment of our population."

This month Reed asked all physicians in Harris County to consider volunteering their time in their private offices or at one of the many free clinics through the area.

Many physicians were already volunteering their services to patients unable to pay, he said, but many still volunteered to help others.

The volunteer physicians' names have been entered into a special computer at the medicial society by physician specialty and zip code so patients and their families will not have to travel far to obtain care.

"While we believe we will be able to handle almost any professional need, we do not have the ability to cover the hospital, drug or lab costs," Reed added.

However, he said, the physician group is working with drug companies and the Greater Houston Hospital Council to obtain their support in these areas.

Reed said Mayor Kathy Whitmire has authorized the city Health Department to provide some lab tests.

A medical society spokesman said the effort is not designed to cover indigents who have traditionally obtained their health care through city, county or federal programs.

"We are attempting to address those who because of the economic climate need temporary help," Reed said.

Referral to a doctor participating in this program can be obtained by calling 790-1838 Monday through Friday from 9 a.m. to 5 p.m.

The medical society spokesman said patients should first call their personal physicians to determine if they are participating in the program.●

ESTONIAN INDEPENDENCE DAY

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. PORTER. Mr. Speaker, today is the 65th anniversary of Estonian Independence day. In honoring this day it is important to remember that Estonia was once a free and independent sovereign democracy. It was forcefully absorbed into the U.S.S.R. in 1940 along with its sister states in the Baltic.

The Soviets have tried to create a "new Soviet man." They have done this by systematically attempting to suppress the culture, religion, and existence of these former states. This program of Russification has been resisted vigorously by the people of Estonia. Its purpose is clear: to crush the individuality of the many nationalities within the Soviet Union, and to subjugate them to the dominance of the Russian majority.

The proud people of Estonia have fought to be independent, and will surely continue their fight until they have achieved their goal of rejoining the free and independent nations of this world.

There are hopeful signs on the horizon in the future. The European Parliament on January 13 passed a resolution reiterating the right of the Baltic states of Latvia, Lithuania, and Estonia to self-determination. This resolution called for their case to be brought up at followup sessions of the Helsinki accords, and to be submitted to the U.N. Subcommittee on Decolonization, because these countries are Soviet colonies. The United States has endorsed this in a Voice of America editorial. The 1983 Defense appropriations bill insisted that all maps of the U.S.S.R. clearly print the names of each Baltic state, as if they were sovereign nations.

The United States has refused to legitimize the Soviet seizure of the Baltic states. I am hopeful that this policy has given strength to dissidents in Estonia to continue their brave struggle against the tyranny of their Soviet masters. Estonian Independence Day gives Americans who cherish their freedom an opportunity to remind the Russians that we have not forgotten Estonia. We will never forget the cause of Estonian independence and will continue to fight for its restoration along with all the other subjugated nations of the U.S.S.R.●

EFFECTIVENESS OF CHAIRMAN CHUCK MANATT

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. COELHO. Mr. Speaker, I would like to draw attention to two recent articles that were published in the Washington Post.

I hope that all the Members will take a minute to look them over, because they provide an excellent overview of the great strides taken by our party under the able leadership of Chuck Manatt.

During his 2 years as chairman of the Democratic National Committee, Chuck Manatt has worked closely with the Democratic House and Senate leadership to rebuild our party from the ground up.

While the GOP got lazy, Chairman Manatt took the DNC back to basics after 1980. There has been renewed emphasis on fundraising and grassroots party building. And there are many other accomplishments as well, most notably our tremendous success in the 1982 elections.

Perhaps the strongest testimony to Chairman Manatt's effectiveness is a recent statement made by the new Republican National Committee chairman, who said that his goal is to catch up to Chairman Manatt.

Mr. Speaker, thanks in large part to the fine stewardship of Chuck Manatt, our party has experienced a revival at all levels.

As we prepare for 1984 and beyond, we can be confident that the DNC and Chuck Manatt will continue to take a leading role in the effort to rebuild our party.

I ask unanimous consent that the Post articles be printed in the CONGRESSIONAL RECORD.

[From the Washington Post, Feb. 5, 1983]

MANATT REBUILDING DEMOCRATS, STEP BY STEP, FOR 1984 BATTLES

(By David S. Broder, Washington Post Staff Writer)

He came to town two years ago, a bespectacled, largely unknown Los Angeles lawyer-banker. If people wondered anything about Charles T. (Chuck) Manatt, it was why a successful, self-made millionaire would have worked as hard as Manatt did after the 1980 election to outdistance four rivals for the dubious honor of taking over the debt-ridden Democratic Party in the wake of its worst defeat in a generation.

Today, with the Democratic National Committee in the midst of its annual winter meeting here this weekend, its chairman remains largely anonymous in the capital, but he is no longer inconsequential.

Manatt, 46, has consolidated his grip on the Democratic headquarters and has put himself in a position to play a major role in what happens to his party and its candidates at least through convention time in the summer of 1984.

From the "down-draft" he says he felt when he took over in February, 1981, "a time when we had no idea who we were or what we were up against," until today, Manatt has witnessed a revival of his party's political prospects, which many party activists attribute in part at least to his stewardship.

Among the accomplishments for which he receives a share of the credit from Democratic governors, members of Congress and state party officials:

A midterm election rebound, including a strikingly successful demonstration project in state party-building that will serve as a model for the 1984 contest.

A healthy start on a direct-mail fund-raising mechanism that could, in time, cut down the Republicans' still-growing financial advantage.

Negotiation of the formal return of organized labor as a participating and contributing part of the Democratic Party and partial repair of the Carter-era breach with business and the Jewish community.

The peaceful acceptance by the party's women, minority and liberal caucuses of a substantial revision in the delegate-selection system, which will set aside one-seventh of the seats at the 1984 convention for members of Congress and other elected and party officials, whose voices may dilute the influence of the grass-roots activists.

A thin but reasonably noncontroversial outline of a Democratic policy alternative, given public exposure in a harmonious midterm conference, campaign ads and the coordinated responses to President Reagan's television and radio speeches.

To cap off this effort to reassemble the elements of the Democratic coalition that fell to quarreling in the 1970's, Manatt expects to announce within a month firm plans for financing and constructing a long-sought Democratic headquarters building on Capitol Hill, the first permanent home in the long history of the nation's oldest party.

"Little by little," said one Democratic congressional leadership aide, "Chuck has accomplished quite a lot, maybe more than he gets credit for."

One reason for the lack of credit may be Manatt's stiffness as a spokesman for the party. His speeches, though earnest, rarely soar, and his style interviews and news conferences is pallid when compared with that of his two Texas predecessors in the chairmanship, John C. White and Robert S. Strauss.

Strauss' continued high-profile presence on the Washington scene is a particular problem for Manatt, who contested the flamboyant Texan for the party chairmanship a decade ago and lost.

Paradoxically, Manatt's public statements over the last two years rank among the most consistent and strongly worded indictments of the record and intentions of the Reagan administration.

On Jan. 23, 1981, three days after Reagan was inaugurated and while Manatt was still campaigning for his job, he told the Democratic state chairmen that "there can be no honeymoon era for Ronald Reagan Republicanism," which he characterized as "people who dress their wives in minks and $10,000 dresses cutting programs for the aged and the children."

He never relented, nor he did he mince words when many other Democrats were granting Reagan that honeymoon.

At the National Press Club, less than a week after the assassination attempt on Reagan, Manatt moved in seven paragraphs from expressing his wishes for a "speedy recovery" to voicing his conviction that "Republicans have a hidden agenda. In the name of fighting inflation and stimulating the economy, they are attempting to roll back 50 years of progressive tax and social policy. They want more for the rich and less for the average American family.

"I knew these people," Manatt says now of the Reaganites, "and I knew where they were coming from, even if other people didn't back then. I had seen them operate in California, and their view is that 'we got ours,' and everyone else ought to shift for themselves. They think if you go to the government for help, you're not as strong and not as virtuous as they were."

This kind of populism came naturally to the Iowa farm boy who worked his way through George Washington Law School with a job at the Democratic National Committee as executive secretary of the Young Democrats and once was fired from its staff in an economy move.

But it sounds strange to many people coming from a Century City bank president and senior partner in an aggressively expanding law firm with lots of high-powered clients.

Manatt insists there is no paradox.

"I never got the GI bill or a VA loan for myself," he says, "but I believe in government as a way in which we help each other cooperate in this country. In my mind, I'm an Iowa farmer, and when the American Banking Association voted in 1981 on endorsing the Reagan tax bill, I was outvoted 400 to 6.'"

Despite opposition by Senate Minority Leader Robert C. Byrd (D-W.Va.) to formation of a DNC policy arm, Manatt has been able to work cooperatively with Hill Democrats in orchestrating an effective Democratic propaganda attack on such issues as Social Security and the recession, using some paid advertising but relying mainly on the free response time the networks have granted Democrats to answer Reagan speeches. The line, "It isn't fair—it's Republican," came out of one of the Manatt-financed ads.

Every couple of months, he presides at a meeting of the House and Senate Democratic leadership. Participants say that Manatt sets the agenda and moves the discussion along, usually on what one called "safe topics," like the plans for the mini-convention or the next big fund-raiser.

"He comes in with his flip-charts, just like a Harvard MBA," said one participant, "and that's unusual enough up here, so they all listen."

Manatt has had some failures outside the policy area. His effort to shorten the presidential campaign season was overwhelmed by the ambitions of contenders to get a head start and of individual states to get to the head of the line in staging primaries, caucuses and straw votes.

The strength of his chairmanship, almost all those who have watched him agree, has been in the basics: fund-raising and grass-roots party-building. And he has been helped mightily in both areas by the alarm traditional Democratic constituencies have felt at some Reagan policies.

Organized labor ended an eight-year estrangement even as he took over, gaining 15 seats on the Democratic National Committee and contributing about 20 percent of its budget. Manatt pushed the party into vocal opposition to Reagan's sale of Airborne Warning and Control System (AWACS) planes to Saudi Arabia, reaping a reward from revived Jewish support.

His biggest potential fund-raising success is in direct mail, where aides say the DNC has gone from 25,000 contributors to 230,000. The startup costs of that drive mean that Republicans have continued during the last two years to increase their lead in both receipts and expenditures. But as time goes on, aides say, the expanded contributor base will put the Democrats back into a more competitive position.

Similarly, in organizing efforts: Manatt took one small state, New Mexico, and used it as a laboratory for a coordinated voter registration, targeting and turnout effort, using national funds to pay consultant Matt Reese to pull together the efforts of individual campaigns.

The payoff was spectacular: Democrats held the governorship against a serious challenge, captured a Senate seat and a newly created House district, and other offices. Next year, Manatt says, the program will be expanded to as many as 10 states.

Probably the biggest compliment to Manatt's work came this week from the new Republican national chairman, Frank J. Fahrenkopf Jr. Manatt had come to office in 1981 saying publicly that he wanted to emulate what Bill Brock did at the RNC in the period from 1977 though 1980. Fahrenkopf said Thursday that his goal was to catch up to Manatt. "We made a mistake in reading our press reviews," he said, "and thinking that we were so technologically advanced over the Democrats they'd never catch up * * *. We have to get back to the basics * * *."

Manatt is moving into a position where he has goodies to hand out. He will have the controlling voice in the decision where the Democrats meet and in the arrangements for the convention, giving him leverage with the aspirants.

He told the state chairmen Thursday night, "The next two years will be more fun." For Manatt, they probably will be.

[From the Washington Post, Feb. 9, 1983]

THE INVALIDS ARE SITTING UP

(By David S. Broder)

The Republican and Democratic national committees have met in Washington during the past two weeks, and the news is that both parties are in pretty good shape.

The Republicans control two-thirds of the national government—the presidency and the Senate. The Democrats control two-thirds of the state and local governments. Each is prepared to defend what it has and raid the other's territory, in the kind of healthy competition that makes for good government and lively politics.

There would be no news in this, except that we are accustomed to thinking that every institution in America is either going to hell or is already there. Having written at considerable length on the weakness of the parties myself, at various times past, I am personally delighted to see that the invalids are sitting up and taking nourishment.

Just how this came about is not entirely clear, but, it is certain that for both Republicans and Democrats, catastrophe was one mother of recovery.

For the GOP, that calamity came in the form of Richard Nixon, who drove his party deeper than ever into minority status with his Watergate crimes and then cost it the presidency via the pardon he obtained from Jerry Ford.

The revival of the GOP organization, under the 1977-80 chairmanship of Bill Brock, began only after everyone in the

party had a vivid demonstration of the danger of letting it become a wholly owned subsidiary of a particular president. When he wrecked, the party had no lifeboats of its own.

Though his failings were political, not criminal, Jimmy Carter provided the same lesson to the Democrats, costing them the White House, the Senate and a slew of House seats in 1980.

In both cases, the effect was to revive interest in the party machinery from officeholders, constituencies and interest groups that had deluded themselves into thinking they could make it on their own in Washington—or with just a friend in the White House to lend them a hand.

Since 1980, the Democrats, under their chairman, Charles T. Manatt, have been doing what the Republicans did under Brock; raising money and pumping it back into party-building projects at the state and local level, while cementing relationships with mayors, governors, state legislators and members of Congress.

The Democrats' progress has been less dramatic so far, than the GOP's under Brock, but it is sufficient to make the Republicans nervous about their financial-organizational edge. After two years in which the Republican National Committee was afraid even to burp without a signal from the Reagan White House, it has a new chairman, Frank J. Fahrenkopf Jr., of Nevada, who at least says he is going back to Brock-style basics, without waiting for Ronald Reagan to decide his own 1984 plans.

The result is a healthy aura of competition, centering around not just the presidency but control of the Senate in 1984 and a multitude of state and local contests—and the constituencies that decide them.

Manatt was down in Florida last week, pitching for money to the biggest bunch of businessmen the Democrats have been able to corral in years. Fahrenkopf is going to Florida in a couple of weeks to tell the AFL-CIO leadership why it would be a mistake for them to sign up early with the Democrats for 1984.

Democrats are finally building an effective direct-mail fund-raising program for themselves, moving into an area where the Republicans have had a virtual monopoly. Republicans, in turn, are finally getting serious about listening to the gripes working women have with the Reagan administration, ending an ostrich policy that was costing the party dearly.

All this comes under the heading of good news, because healthy, competitive parties make for better government. As a case in point, look how the Republicans in Congress, who showed extraordinary cohesion in support of the Reagan program in 1981, have been exerting steady, strong and effective pressure on Reagan for the past year to modify his policies to meet the changed economic and political realities.

That is what should happen in a healthy part. One reason those Republican legislators can do what they are doing is that they know the party will support them strongly—with money and organization—whatever Reagan thinks or does in 1984.

The Democrats are not at that point yet, but they are moving toward it. And that promises that if and when they come back to power, they will not have to suffer the vagaries of another Jimmy Carter—or the dire consequences of his kind of insulated presidency.

It's good news—just what the White House has been begging us reporters to give you. So even if you don't buy a new car or house this week to celebrate the Reagan Recovery, at least send a few bucks to the party of your choice.●

DOMESTIC CONTENT AND HIGH TECHNOLOGY

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. DINGELL. Mr. Speaker, for some years workers in the auto, steel, rubber, electrical, and other basic industries have been suffering widening layoffs and unemployment as jobs and investment in these industries have moved abroad. A number of people have viewed this as perfectly natural and, indeed, desirable, arguing that the American economy should shift away from these "old smokestack industries" and into new "high tech industries." The problem is that the same forces which are undermining our heavy industries also affect the new technologies. Unless we understand our role in the evolving world economy and develop pragmatic policies to deal with the new realities, we may lose both old and new industries.

I invite the attention of my colleagues to an article which appeared in the Washington Post business section yesterday. It should be noted that in moving to East Asia, Atari is joining one of its principal competitors, Apple, which already does much of its manufacturing in Hong Kong.

The article follows:

ATARI TO FIRE 1,700, SHIFT PLANTS TO ASIA

(By Martha M. Hamilton)

Atari Inc., the video game and home computer manufacturer that has sometimes been used to symbolize America's employment future in high-technology jobs, said yesterday it will fire nearly a quarter of its U.S. work force in a shift of Atari's manufacturing operating overseas.

Atari said that 1,700 workers in California will lose their jobs as a result of the company's decision to shift production from Sunnyvale, Calif., to Hong Kong and Taiwan. The layoffs will be phased in from now to June or July with 600 workers out of a job yesterday.

The production move comes only weeks after Atari's parent, Warner Communications, reported lower-than-expected earnings for 1982 for its consumer electronics division.

Analysts said the production shift, which follows the pattern of consumer electronics items such as watches and television, results from economic pressures in the highly competive home computer and video games industries. Atari said yesterday it is designed "to reduce escalating manufacturing costs"—such as labor, the value of the dollar and regulatory costs.

The announcement of the move and the large layoff is bound to raise questions about projections that jobs lost in the foundaries and auto plants can be replaced easily by jobs in high technology industries and that high-tech industries can preserve the U.S. position in international trade.

"It clearly indicated that the high-tech firms are also moving abroad and that they are no guarantee for absorbing the nation's jobless," said Rudy Oswald, director of research for the AFL-CIO.

The value of high technology in America's future has been espoused by a group that has been dubbed the "Atari Democrats," who advocate shifting resources away from declining industries, such as steel and automobile manufacturing, into the high technology and service industries where growth is expected to occur.

President Reagan, too, echoed some of those sentiments in his State of the Union speech, earning for himself the label "Atari Republican"—a label likely to be revised as a result of yesterday's announcement.

Atari has said that financial considerations dictate that some of its production be moved abroad. "Our computer production costs will go down dramatically in 1983," John Cavalier, president of Atari's Home Computer division, is quoted in Electronic News, a trade publication.

Atari already manufactures some video games in Taiwan and in Limerick, Ireland.

Interviewed by that magazine at the Consumer Electronics Show, Cavalier noted that "there were no [Atari] computers manufacturered offshore in 1982. There will be a significant percentage manufactured offshore in 1983." In fact, an Atari spokesman said yesterday, virtually all its home computers will be manufactured abroad.●

ESTONIAN INDEPENDENCE DAY

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. DAUB. Mr. Speaker, today marks the 65th anniversary of the Declaration of Estonian Independence. While Estonian-Americans today observe this anniversary, Estonians in their homeland continue to face serious threats to their language, their culture, and their very existence as a nation.

The United States, to this day, refuses to recognize the Soviet seizure of the Baltic States which took place nearly 40 years ago. Concern for human rights plays a major role in the foreign policy of the United States, and we should take this opportunity to assure the people of Estoniz, as well as the people of Latvia and Lithuania, that their struggle for self-determination is not forgotten.

I encourage my colleagues to continue their support for the cause of freedom on this anniversary of Estonian Independence.●

NEEDLES HIGH SCHOOL AWARDS RECEPTION

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. LEWIS of California. Mr. Speaker, on March 2, 1983, the San Bernardino County schools and the Constitutional Rights Foundation will be sponsoring an awards reception and dinner honoring the finalists in the California State mock trial competition. I would like to take this opportunity to recognize and commend the team from Needles High School who will be representing the county of San Bernardino.

Over 2,500 students from 14 counties statewide participated in the mock trial program this year. The competition involved 15-member teams working with a teacher, Mr. Sonny DeMarto and attorneys John and Louise Closs, to prepare a criminal case which was presented in courtrooms before municipal and superior court judges. Through the mock trial program, students of varied ability levels increased their proficiency in communication skills, developed self confidence and furthered their knowledge of the content and process of the legal system. Approximately 200 students will compete for the State championship and participate in activities which will familiarize them with the workings of State government from March 1 to 3, 1983.

Mr. Speaker, I take great pride in commending to my colleagues not only the team of Needles High School, but also the attorneys, judges, and teachers for their countless hours of work and preparation that were volunteered to make this mock trial competition such a success.●

ESTONIAN INDEPENDENCE DAY

HON. SAMUEL S. STRATTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. STRATTON. Mr. Speaker, today marks the 65th anniversary of the Estonian Declaration of Independence. I am pleased to join my colleagues in Congress and the members of the Estonian-American community in showing my support for their fight for freedom from Soviet domination and to state that we in the United States shall support their cause until they are once again free.

Independent Estonia emerged from the turmoil of World War I and the Russian revolution, when the small country proclaimed its independence on February 24, 1918. Although Estonia was soon invaded by Soviet armies, the small country was able to repulse them in 1920 and win freedom for 20 years. Estonia enjoyed a generation of independence and economic and cultural growth, until 1940 when the Soviet Union annexed Estonia, Latvia, and Lithuania in the wake of the infamous Hitler-Stalin pact.

During the last 40 years of foreign rule, the Estonian people have bravely and stoutly resisted Soviet efforts at Russification, or the subjugation of their language, culture, and religion to Russian practices. The importation of foreign workers and the often brutal industrialization of their country have made this a tough fight.

The plight of Estonia and the other captive nations becomes more urgent every year, as the Soviets continue to pursue a massive military buildup to tighten their hold on the countries under their rule, and to discourage other free nations from challenging their empire. As a longtime advocate of a strong defense for the United States to meet the Soviet threat, I hope that this will serve to undermine their hold on other, smaller nations.

With admiration and respect, I salute the people of Estonia and their friends and families in the United States and throughout the world in their struggle to regain their independence from the Soviets. I reaffirm my support for their fight and renew my conviction that Estonia will soon be free again.●

DILLONITES RAISE SCHOLARSHIP FUNDS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. RODINO. Mr. Speaker, this Saturday night, February 26, a very special event will be held in Newark—the third annual dinner dance held by an organization known as the Dillonites.

These dedicated individuals are originally from Dillon, S.C., and the proceeds from the event will be donated to a scholarship fund for high school students in that town.

The distinguished guests will include Mayor Kenneth Gibson and members of the city council and the featured speaker will be Dr. Fred Means from Jersey State College. Among those being honored by the Dillonites are Joseph Benucci, Newark's postmaster; Dorothy Gould, the assistant executive superintendent of the Newark schools; Carl Jones, president of the Bridge Club; Verdell Roundtree, the New Jersey director of the United Negro College Fund; Miles Berger, president of the Berger Hotel Corp.; Eutha Grier, historian for the Garden State Chapter of the Dillonites; and Louise Epperson, director of patient relations of the University of Medicine and Dentistry, who will receive the 1983 Health Education Award.

I am extremely proud of this chapter of the Dillonites, and president Thomas Carmichael, for their generous spirit and hard work assisting these young people of Dillon in obtaining an education.●

SOCIAL SECURITY CARDS SOLD TO ILLEGAL ALIENS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. WHITEHURST. Mr. Speaker, earlier this month I introduced H.R. 1272, the Social Security Alien and Foreign Resident Limitations Act. The intent of this measure is to reform certain aspects of the social security system's overseas program, as well as prohibiting people who have worked unlawfully in this country from collecting benefits.

The introduction of my legislation coincided with the release of a General Accounting Office study I requested on this subject nearly 2 years ago, the findings of which are highlighted in the CONGRESSIONAL RECORD of February 3, 1983, on E306.

Mr. Speaker, I testified a few weeks ago before the Subcommittee on Social Security, which is conducting hearings on the long-term financing problems facing the social security system. Observing that "we need to correct this," Chairman J. J. PICKLE announced that his subcommittee will conduct hearings on this issue as soon as possible.

In the few weeks since I introduced H.R. 1272, I have received letters in support of this measure from citizens throughout the country.

One of the major problem areas associated with this issue is the relative ease in which individuals can obtain social security cards.

A few days ago, WLS-TV in Chicago ran a series of stories compiled by its team of investigators on the illegal alien issue. One segment was particularly enlightening in showing what lengths people will go to in obtaining and providing social security cards. The following transcript of that segment details how a Federal employee engaged in selling social security cards at $75 apiece to illegal aliens. The employee has since been arrested and charged with in connection the sale of the cards. The transcript follows:

ILLEGAL ALIENS: ABUSE ON BOTH SIDES

ROSA CHAVEZ (illegal alien). When you go to apply for a job, they ask you for a social security card.

ROBERTA BASKIN. Rosa Chavez is an illegal alien. But she now has a real, American

social security card. She needed it last April so she could work . . . so she could support her seven children.

This is Eduardo Medina. Inside the Social Security Administration, he makes it possible for people in Rosa's situation to get a card.

ROSA CHAVEZ. The man came with the applications. He filled them out. And all I did was sign them. After about six weeks, the cards arrived.

ROBERTA BASKIN. This social security card cost Rosa $175. The card is supposed to be free. Social Security officials are supposed to ask for certain documents.

Did you show any documents at all to get the social security card?

ROSA CHAVEZ. No. Nada.

ROBERTA BASKIN. And social security also requires an interview . . . in person . . . in the social security office. But Rosa never had to show up.

ROBERTA BASKIN. This is the alley behind the social security office on North California. At the end of the alley is a Chicago police station. This is the spot that Eduardo Medina chooses to sell social security cards . . . out the back door.

Target 7 sent in Tony Prince. He told Medina he needed three social security cards for friends.

TONY PRINCE (target 7 researcher). He looks kind of nervous, you know. And he goes to me, the price will be $75 each, which equal $225. Can you make sure you bring the money tomorrow, and I give you the receipts.

ROBERTA BASKIN. We paid the money, and filled out applications in the names of three illegal aliens, people Medina never met. He did check this box to say that he interviewed them, and he falsified our applications, claiming he'd seen some documents that don't even exist.

He got away with it because of a flaw in the social security system.

JIM STOKES (Office of Inspector General). The current social security enumeration system did not have a sufficient safeguard. This lack of safeguard allowed the employee to process numerous social security card applications without bringing an alert to the social security management.

ROBERTA BASKIN. We gave Tony more money to make one last buy from Eduardo Medina. They met near the social security office and went inside a doorway to do business. Tony counted out the money to buy the social security cards. As soon as he got the receipts, we caught up with Medina to introduce him to those illegal aliens he'd gotten cards for.

Have you ever seen these people before?

EDUARDO MEDINA (Federal employee). No ma'am.

ROBERTA BASKIN. Did you ever see him?

EDUARDO MEDINA. No ma'am.

ROBERTA BASKIN. And did you ever see her?

EDUARDO MEDINA. No ma'am.

ROBERTA BASKIN. Well, you sold two social security cards in their name last week, and you put down—here it is—on the application for her, you put down that you did an, that you did an in-person interview again.

EDUARDO MEDINA. Right.

ROBERTA BASKIN. Yeah, and what about this health card, the green card, and the library card? She doesn't have those things.

EDUARDO MEDINA. Okay, so that I put down.

ROBERTA BASKIN. So why'd you put that down?

EDUARDO MEDINA. That's a, that's just Tony told me to help him out.

ROBERTA BASKIN. And how much money did you make?

EDUARDO MEDINA. That's only $75 I pay there, that's all.

ROBERTA BASKIN. $75 for each social security card you sell.

EDUARDO MEDINA. That's the only one.

ROBERTA BASKIN. This person, Rosa Chavez is in the country illegally. You sold a social security card to somebody on her behalf.

EDUARDO MEDINA. No. I didn't make no.

ROBERTA BASKIN. So that she could work.

EDUARDO MEDINA. I didn't make no arrangement for that. The only think I say was with Mr. Tony.

ROBERTA BASKIN. Do you know want a serious crime it is to put down that you did an in-person interview with somebody when you didn't?

EDUARDO MEDINA. Yes.

ROBERTA BASKIN. Tell me, because I don't know if you do.

EDUARDO MEDINA. Yes, I understand it's jail sentence, that you can get.

ROBERTA BASKIN. Then why'd you do it? For money?

EDUARDO MEDINA. Well, I just did that for money. That's all I did. But not any more.●

A FAIR ADJUSTMENT TO IMPROVE SELECTIVE SERVICE REGISTRATION

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. GUNDERSON. Mr. Speaker, the recent debate and controversy concerning the implementation of the Solomon amendment, which prevents distribution of Federal student aid to any individual who has failed to register with the Selective Service, has once again opened the entire debate surrounding registration. The failure of some 6 percent of those required to register to do so causes one to examine the opposition to such a simple procedure. However, what is relatively simple in practical implementation may cause severe emotional stress for some Americans. While approximately half of the nonregistered population is attributed to administrative difficulties, the remaining young American men have failed to do so intentionally for personal reasons.

Today, I am introducing legislation which will both facilitate complete registration while also giving young men the opportunity to indicate their intent to apply for conscientious objector status. This legislation is based upon the presumption that a high percentage of those who intentionally fail to register do so on the basis of conscientious objector principles.

Under current law, an individual may apply for such status only at the time the draft is actually implemented. The application may be made to his local Selective Service board which will determine the acceptability of his case. In order to qualify for classification as a conscientious objector, a person must be conscientiously opposed to participation in any war. Beliefs must be religious, moral, or ethical in nature, as opposed to those based solely on politics, expediency, or self-interest.

In addition, a conscientious objector is not relieved of the obligation to serve. Two types of service may be performed, depending upon the individual's specific beliefs: First, the person who is opposed to any form of military service (Class 1-0) performs a period of civilian service in a job which contributes to the national health, safety, or interest; or, second, the person whose beliefs will allow him to serve in the Armed Forces in a noncombatant capacity (Class 1-A-0) becomes a member of the Armed Forces but does not receive any training in the use of weapons. Many of these serve in the medical corps.

This legislation would simply add two questions to the Selective Service registration form which would allow the registrant to indicate his preference to be considered for classification as a conscientious objector serving in either noncombatant military service or available for alternate service. Notice shall also be provided on the forms that this indication is not binding on the United States and that the marking of such an indication does not assure that the registrant will be so classified.

It should be emphasized that this is not an attempt to circumvent registration, but to facilitate it. These changes in the registration form will not harm the intent of draft registration—early preparation and organization in case conscription should be required—but, in fact, will improve and economize the entire system by indicating to the Selective Service System those individuals who are likely to apply for conscientious objector status in either a noncombat or alternate service role.

At the same time, these changes will also facilitate the complete registration of the eligible population by removing the stigma that registration leads to immediate participation in a draft, without an opportunity to indicate ones desire to apply for conscientious objector status.●

ESTONIAN INDEPENDENCE

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. HOWARD. Mr. Speaker, 65 years after the official declaration of Estonian independence, this proud Baltic nation is fighting for its very existence under the cruel jackboot of Soviet tyranny. The drive for Russification of this ethnically distinct people is characteristic of the Soviet

terror mechanism in one of its many contemporary forms.

In the individual human dimension, the death of Prof. Juri Kukk 2 years ago in a Volga labor camp represents both the perseverance and the tragedy so typical of the Estonian struggle. Even as Juri Kukk rests in peace, his codefendant, Mart Niklus, struggles on, serving a 5-year sentence in a Soviet labor camp. These two men are symbols of a much larger atrocity. The relative proportion of Baltic nationals to other ethnic groups in Soviet labor camps demonstrates the magnitude of this injustice.

It has been four decades since the Soviet empire swallowed Estonian and the other Baltic nations in perhaps the most repugnant act of blatant hegemony in our century. The hopes of these nations, the hopes of an Estonian people so capable of fulfilling their potential as a country, have been subverted to the wishes of a Soviet elite which differs little in essence from its progenitors. It is up to us in the free world to keep the light of publicity on the Estonian struggle—their hopes are our hopes, their dreams our dreams—the fate of the human community rests with the solidarity of its defenders.●

SERIOUS RISK OF RAPID DEFENSE BUILDUP

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Ms. KAPTUR. Mr. Speaker, the administration's proposed rapid defense buildup poses serious risks both to our national security and to the health of our economy. Congress, in considering the President's massive rearmament program, must weight its costs to the American people.

In his budget for fiscal year 1984, President Reagan proposed the continuation of the 5-year military buildup that he initiated 2 years ago at a cost of $1.8 trillion, roughly a cost of $20,000 in taxes per household over the next 5 years. This constitutes the largest peacetime defense spending program in the history of our Nation, at a real rate of increase after inflation of 7 percent. Yet, despite estimates of wasteful Pentagon spending ranging from $30 to $100 billion, the President's budget provides for no savings based on elimination of wasteful spending.

The President's military budget gives top priority to the development of new strategic nuclear weapons, a 37-percent increase in nuclear force funding in this year's budget. I fear that adding to our nuclear arsenal will only trigger another dangerous escalation in the balance of terror between the United States and the Soviet Union. The administration's arms control policy, based as it is on arms increases, is a bankrupt policy. We need a President who will assume the leadership role in arms control negotiations with the Soviets. Congress must take its own lead on arms control by passing the resolution calling for a bilateral, verifiable freeze on nuclear weapons production, development, testing, and delivery systems.

The greater share of our defense budget should be spent on conventional systems, although streamlined, to insure readiness and sustainability, and to educate our service personnel. We now have complex weapons systems with personnel lacking the expertise to use them. In addition, I believe it is time for our allies to assume their fair share of their own defense, rather than relying solely on the American people to finance their defense-related expenditures. The President's budget includes no initiative for cost sharing with our allies.

At the same time that the military budget is being increased, spending on human needs program is being drastically reduced. In my estimation, our natural resources should be invested in activities which would put Americans back to work and put the United States on the road to prosperity. Our economic recovery must not be jeopardized by excessive defense spending.

Studies have documented that every dollar spent on military programs creates far fewer jobs than the same dollar spent in any other sector of the economy. Jobs in the defense industry are more highly skilled than in other sectors and thus open to fewer American workers. Furthermore, some influential economists have voiced concern that the planned rate of increase for military spending is too fast and might strain some sectors of the economy, thereby contributing to another inflationary spiral similar to those which occurred when the United States expanded its arsenals as rapidly in the past.

Excessive military spending also contributes to declining productivity. Concentrating scientific work on military projects reduces the share available for productivity that increases innovation in other sectors. With so much money and skilled labor diverted to military programs and away from civilian production, America's competitive advantage over Japan and other industrialized nations is bound to suffer.

Defense spending is one of the most regionally unbalanced categories of Federal spending. More than any other other Federal program, defense spending drains resources and jobs out of the industrial Midwest and transfers them to economically healthier areas of the country. According to Department of Defense figures, $93.4 billion of the fiscal 1983 defense budget—excluding procurement—will go to States in the South and West, while only $28.6 billion will be spent in the Northeast-Midwest region.

This amounts to $278 per capita in the Northeast and Midwest compared to $739 in the South and West. Ohio receives $3 billion less in Pentagon spending than it contributes in tax moneys which are channeled to the defense budget. Current military spending is contributing to idle capacity and unemployment in our area.

The costs of the proposed weapons systems, once approved, will grow dramatically in succeeding years and contribute to even greater deficits. Now is the time to rein in the administration's military spending proposals. A strong national defense cannot be minimized, but scarce Federal funds must be spent wisely. If we cannot create jobs for the unemployed, revitalize our basic industries, educate the next generation or care for the members of our society who depend on the Government for their basic needs, we will not be contributing to our Nation's security.●

ESTONIAN INDEPENDENCE DAY

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. FORD of Michigan. Mr. Speaker, it is with great pride and admiration that I join in the commemoration of the 65th anniversary of Estonian Independence Day. The remarkable strength and proud heritage of the Estonian people in the Soviet Union, who face a never-ending quest to regain their freedom, has established a model for the world.

Today we mark the proclamation of independence for the Republic of Estonia. The Estonians made significant economic, educational, and cultural progress until their freedom and independence came to an end in 1940 when they were forcibly annexed by the Soviet Union. On a day-to-day basis in the Soviet Union, the Estonians are facing serious attacks to rid them of their strong sense of heritage. They face serious threats to their language and culture. This is yet another example of the Soviet attempt to Russianize these people out of existence.

Free nations of the world must continue to speak out against this Soviet aggression. We will never recognize their seizure of Estonia. As a signatory of the Helsinki accords, the Soviet Union continues to deny these individuals their basic human rights—the free exercise of political, cultural, and religious freedoms.

Mr. Speaker, I am very moved by the strength and conviction of these brave people. I am thankful for this oppor-

tunity to pay tribute to these courageous people and their overwhelming commitment to human rights and freedom that free nations of the world cherish so deeply.●

FTC OVERSIGHT OF PROFESSIONS BACKED BY PUBLIC ACCOUNTANTS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. DINGELL. Mr. Speaker, since renewed attempts will be made in the 98th Congress to restrict the authority of the Federal Trade Commission over professions, my colleagues should be aware that professional associations continue to line up in opposition to efforts by the American Medical Association to exempt the professions from regulation by the FTC. The 33 national organizations and their 800 affiliated organizations representing 17 million individuals formed a coalition to save the jurisdiction of the FTC over professions in the last Congress. I have been recently notified by the National Society of Public Accountants that their Board of Governors had unanimously adopted a resolution stating the National Society's opposition to any legislation which would exempt professionals from FTC jurisdiction and resolving support and assistance for continued FTC regulation and investigation of the activities of professionals. A copy of their correspondence follows along with a list of the member organizations of the Coalition to Save the Jurisdiction of the Federal Trade Commission Over Professions.

NATIONAL SOCIETY OF
PUBLIC ACCOUNTANTS,
January 14, 1983.

Hon. JOHN D. DINGELL,
Chairman, Energy and Commerce Committee, Rayburn House Office Building, Washington, D.C.

DEAR MR. DINGELL: At its regular meeting in November, the Board of Governors of the National Society of Public Accountants unanimously adopted a resolution stating the National Society's opposition to any legislation which would exempt professionals from Federal Trade Commission jurisdiction, and resolving support for FTC to continue to regulate and investigate the activities of state-regulated professionals.

The National Society of Public Accountants is an individual membership professional association consisting of 17,000 members throughout the United States, who are vitally concerned with the issues and problems facing small accounting firms and the more than four million small businesses which they serve.

The members of the National Society firmly believe that the antitrust laws should be applied to state regulated professionals in order to ensure competition and fully competitive markets, regardless of the product, occupation or service provided.

The members of the National Society appreciate your efforts in behalf of a free-market system, and the position which you took and maintained as Chairman of the Energy and Commerce Committee.

Should renewed attempts be made in the 98th Congress to restrict the authority of the FTC over professions, I hope that you or the members of the Committee's staff will call upon the National Society for whatever assistance we can provide.

Sincerely,

LOUIS MIRMAN,
President.

DISC REVISION ACT OF 1983

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. VANDER JAGT. Mr. Speaker, I am today introducing H.R. 1673, the DISC Revision Act of 1983. Briefly stated, the purpose of the bill is to revise the existing Domestic International Sales Corporation (DISC) provisions of the Internal Revenue Code so as to make them consistent with the General Agreements on Tariffs and Trade (GATT) while at the same time preserving significant export incentives similar to those contained in the existing DISC provisions.

The United States is currently faced with a significant international trade problem because the General Agreements on Tariffs and Trade have concluded that the existing DISC provisions violate GATT. In addition, the U.S. Trade Representative has assured representatives to the GATT that the United States will soon modify the existing DISC provisions to bring them into compliance with GATT. In the meantime, DISC has been a continuing thorn in our side as we attempt to further other important trade-related matters before the GATT, including many of those that were discussed at the GATT Ministerial in November 1982. The progress on these important initiatives will be stymied until a GATT legal DISC alternative has been presented. Although it is necessary to modify the existing DISC provisions, at the same time it is very important that the modified version continue to provide export incentives to our various domestic manufacturers, especially for those small manufacturers who may have only recently become exporters or who are in the process of considering to become exporters. The importance of encouraging export of products domestically in the United States cannot be underscored, because the alternative is to encourage manufacturers to locate manufacturing plants outside the United States, thus removing valuable jobs from our shores. The DISC solution also should not attempt to use gimmicks which will only temporarily avoid a GATT challenge. Rather, it should attempt to arrive at a solution which will be GATT defensible for the long term, thus avoiding another disruptive period in our trade policy similar to that which has accompanied the DISC dispute. Many proposals have been floated in the last year which would generally only modify the existing DISC provisions to require the use of a foreign corporation rather than a domestic corporation. This alternative presents many problems including the prospect of not being able to sustain a GATT challenge. From a tax policy standpoint, the use of a foreign alternative is also questionable because it is inconsistent with the administration's tax treaty negotiating policy which attempts to discourage the use of foreign tax havens by U.S. taxpayers. The modification of DISC so as to require incorporation in a foreign jurisdiction will only provide a sufficient economic benefit to the exporter if the foreign corporation is located in a jurisdiction which imposes little or no tax, in other words, a foreign tax haven.

The bill which I have introduced today attempts to address the problems identified above with the existing

DISC and with respect to the various foreign solutions which have been proposed in the last couple of months. As such, it attempts to achieve three important policy goals. First, the bill sufficiently modifies the existing DISC provisions so as to make them GATT defensible. Second, the proposal avoids the use of a foreign corporation as the solution to the existing DISC problem. By doing so, it avoids a significant inconsistency with our tax treaty negotiating policy. More importantly, it insures that small businesses will be able to continue to benefit from the DISC provisions. Modifying DISC to require the use of a foreign corporation would make it very unlikely that small exporters would be able to utilize the provisions due to the complexities of doing business in a foreign jurisdiction, especially if a substantial foreign presence is required. Third, the proposal insures that trade incentives provided for exporters, especially small exporters, will continue.

DESCRIPTION OF THE PROPOSAL

The DISC Revision Act makes several significant changes in the existing DISC provisions. First, it provides for the imposition of an interest charge on the accumulated DISC income which has been subject to deferral. The interest charged for small exporters—those with less than $250,000 of DISC taxable income—is 4 percent while the interest charge for larger exporters is the average Federal funds rate, that is, the rate at which banks in the Federal Reserve System borrow money from other banks in the system. Second, rules controlling the amount of income which is subject to deferral are significantly simplified. The complicated incremental rule is eliminated. The amount of deferral which is permitted annually is increased to 100 percent for DISC taxable income up to $250,000. The amount of deferral permitted for DISC taxable in excess of $250,000 is 45 percent. Third, all accumulated DISC income existing for taxable years beginning on or before December 31, 1983, will be permanently deferred. This provision is clearly sensible because many companies by following the rules of DISC under existing law could effectively achieve this result by simply avoiding a distribution of the accumulated income and investing in qualified assets. By statutorily providing that the income is permanently deferred it eliminates significant financial accounting problems while at the same time preserving the likely tax result which would occur under existing law. An added benefit of this change is that it effectively results in a liberalization of the DISC asset test because the substantial pool of capital consisting of accumulated deferred DISC income which must be invested in specified assets will have been reduced. Many companies both large and small have indicated a concern with meeting the qualified assets test under the existing law because of the large pool of deferred income which must be invested in a limited range of assets in order to satisfy the existing qualified asset test. By reducing the size of that pool of capital which must be so invested, the problems of meeting the qualified assets test will also be substantially eliminated. Fourth, the bill permits the use of excess investment tax credits to be used to pay the interest charge which is imposed on accumulated DISC income. In addition, excess net operating losses may be used to reduce the amount of accumulated DISC income which is subject to the interest charged. Finally, the bill provides that accumulated DISC income which has been subject to the interest charge will qualify for a permanent deferral at the end of 10 years and cease to be subject to the interest charge. It should be noted, however, that this provision would not have any effect if the parent of the DISC had made the election to utilize its excess net operating losses to reduce the accumulated DISC income subject to the interest charge prior to the expiration of 10 years.

The bill does not modify the gross receipts test to expand the use of DISC for the service sector of our economy. Because this is a matter of growing concern in view of the increasing portion of our economy which consists of service-type industries, it is my hope that the enacted legislation will direct the Treasury to study the advisability of extending DISC-type treatment to the service sector.

On balance, I believe that the bill provides the most workable solution to a complex problem facing us both with respect to U.S. tax policy and U.S. trade policy in a way that will continue important export incentives which are necessary for the United States to compete in the world trading markets.●

HOUSE OF REPRESENTATIVES—*Friday, February 25, 1983*

The House met at 11 a.m. and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
February 24, 1983.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Friday, February 25, 1983.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Rev. Charles Mallon, permanent deacon, Holy Family Church, Mitchellville, Md., offered the following prayer:

Make me to know Thy ways, O Lord; teach me Thy paths. Lead me in Thy truth, and teach me, for Thou art the God of my salvation for Thee I wait all the day long.—Psalm 25, 4–5.

Father, during this time of Lent, give us the wisdom and grace of self-denial that we might discipline ourselves against attitudes that bring self-deception. Protect us from the pitfalls that await individuals of special circumstance and make us ever conscious of the great Commandment to love God and to love our neighbor as ourselves.

Father, grant that we may remain forever, in Your plan of salvation, we ask this through Christ our Lord. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations to provide emergency expenditures to meet national needs for the fiscal year 1983, and for other purposes.

Mr. CONTE reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

WHAT IS DEMOCRACY ALL ABOUT?

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Mr. Speaker, the Justice Department has apparently decided that three films, all produced by the Canadian Government, not exactly a hostile Government, including a documentary on nuclear war that has been nominated for an Academy Award, are to be looked at as political propaganda and may not be shown in the United States without a disclaimer stating that the U.S. Government does not approve of these films.

Mr. Speaker, what is the first amendment supposed to include? What is democracy all about?

This is an administration that apparently believes in a free market for big business, but a regulated market for free speech.

Mr. Speaker, I am very concerned that when the Justice Department is involved in censorship of these movies that they may have some concerns about whether people view such movies as "Missing," "Apocalypse Now," and "The Deer Hunter." Perhaps when we see the sequel to "The Winds of War," "War and Remembrance," the Justice Department may have the same concerns about some of the positive allusions that it may have to our former ally, the Soviet Union.

Mr. Speaker, this type of Justice Department determination is reprehensible. My colleague from Iowa (Mr. LEACH) and my colleague from Michigan (Mr. WOLPE) and I will be sending a letter to the Justice Department urging that this policy be immediately rescinded. I felt that it should immediately be brought to the attention of our colleagues so that they, too, could join in repudiating this type of improper activity in a democratic society.

ADMINISTRATION HAS NOT GONE FAR ENOUGH ON EPA

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, on Wednesday of this week, we learned of the resignation of two more high-ranking officials at the Environmental Protection Agency, and yesterday, the Reagan administration moved to bring the Environmental Protection Agency under tighter control by appointing four veteran governmental managers to run the Agency. But today, the New York Times reports that the White House Counsel has been ordered to examine contacts between senior aides of the President and the Environmental Protection Agency for any evidence of political manipulation.

While I commend the actions of the White House in their efforts to clean up the Environmental Protection Agency. I do not think that the administration has gone far enough. The credibility and the efficiency of the Environmental Protection Agency has been severely damaged by this affair. This can only be remedied by the following three measures:

First, the administration should cooperate with the ongoing congressional investigations;

Second, the President should appoint a special prosecutor to investigate the changes of conflict of interest, political manipulation of the Superfund by senior administration officials, and conducting private business on public time by employees of the Environmental Protection Agency;

Third, finally, the President should demand the resignations of the two officials that are charged with the protection of the environment, Mrs. Anne Gorsuch Burford and Mr. James Watt.

Only if these three remedies are followed can the Environmental Protection Agency return to its congressionally mandated objective, the protection of the environment.

IS "1984" JUST FOOD FOR THOUGHT?

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, in his novel, "1984," George Orwell describes in chilling detail a world in which public opinion is carefully controlled by Government bureaucrats. Nothing is said, heard, or thought without Government approval. But Orwell wrote fiction, and "1984" is just "food for thought." Or, is it?

A story in today's edition of the Washington Post serves as a frightening reminder that fiction is sometimes prophecy.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The U.S. Department of Justice has labeled three Canadian films "propaganda," and has ruled that they cannot be shown within the United States without a disclaimer stating that the U.S. Government does not approve of them. The films, Mr. Speaker, include an academy-nominated documentary featuring a lecture by antinuclear activist Dr. Helen Caldicott, as well as two films on the environmental hazards of acid rain. And what is more, the Justice Department is seeking a list of all organizations or individuals that have seen or have requested to see the films. I wonder what Justice intends to do with that list?

Mr. Speaker, big brother appears to be watching us, and I—for one—am uncomfortable under his sobering stare.

I suspect that my discomfort is shared by Americans throughout our land.

JUSTICE DEPARTMENT RESTRICTIONS ON CANADIAN FILMS DEPLORED

(Mr. LEACH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH of Iowa. Mr. Speaker, I join with Congressmen WOLPE and LEVIN in expressing shock and dismay at the action of the Justice Department in labeling three Canadian-produced films as "political propaganda." These films, which deal with nuclear arms cnntrol and environmental protection, apparently suffer from the sole defect of reflecting views different from those of the administration, a right, Mr. Speaker, which when last checked was still enshrined in the first amendment to the Constitution.

This Justice Department decision is an egregious insult not only to our friends and allies in Canada, but also to the fundamental right of Americans to view, read, or think what they wish without governmental interference or governmental disclaimers. If the administration carries its twisted reasoning to its logical extreme, will ABC, CBS and NBC, which daily carry views in opposition to administration policy, be forced to run disclaimers too?

I call upon Attorney General Smith to reverse this childish decision without delay. The Justice Department is charged with protecting the constitutional rights of American citizens, not with infringing upon them. It may be too extreme to label this minor league act of censorship a harbinger of McCarthyism, but it sends a chilling message to those Americans deeply concerned about environmental issues in general and about the ultimate environmental issue of our time, the survival of the planet.

The administration would be better served if it spent more time negotiating arms restraint agreements with the Soviets and repairing the corrosive effects of acid rain on our environment, rather than wasting the time of all Americans on its clumsy efforts to erode the freedoms of choice and thought of our citizens.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, I take this time for the purpose of receiving the schedule for next week and I am happy to yield to the distinguished majority leader.

Mr. WRIGHT. If the distinguished gentleman from Mississippi, the acting minority leader, yields, we have a full schedule next week. It will be our busiest schedule thus far in the session.

We will have a pro forma session on Monday, meeting at noon, and it will be my purpose to ask that when we adjourn today, we adjourn to meet at noon Monday.

On Tuesday, we will have one bill on suspension, the American Conservation Corps authorization.

We meet at 3 o'clock on Wednesday, and we expect to take up the emergency supplemental appropriations bill for fiscal year 1983. That is the jobs bill that is being marked up at this moment in the Committee on Appropriations.

On Thursday, we meet at 11 o'clock. There are two bills. Subject to the granting of a rule, we expect to consider the Emergency Math and Science Education Act, and also a resolution providing for a permanent staff for the Intelligence Committee.

The House would not be in session on Friday, March 4. Of course, any further program would be announced later.

Mr. LOTT. Mr. Speaker, I would like to just inquire, on Tuesday the gentleman has the American Conservation Corps authorization. Does the gentleman anticipate a vote being taken on Tuesday, or would you defer that vote?

Mr. WRIGHT. I would anticipate that we probably would have a vote on that bill on Tuesday. If the gentleman requests, on behalf of any number of Members whom he knows to be unavoidably engaged, we conceivably could postpone the vote.

□ 1130

But it is Tuesday rather than a Monday, and it seems to me that most Members would probably expect to be in town.

Mr. LOTT. Mr. Speaker, I just made the inquiry to see if we do expect a recorded vote. It is obviously possible that a recorded vote might not be called or asked for, but if it is, may we anticipate that we will have a recorded vote on Tuesday?

Mr. WRIGHT. Mr. Speaker, it is our expectation that if a recorded vote is demanded, we would go ahead and have a recorded vote unless there is a reason to do otherwise of which I am not aware.

Mr. LOTT. Mr. Speaker, I thank the gentleman from Texas (Mr. WRIGHT).

ADJOURNMENT TO MONDAY, FEBRUARY 28, 1983

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore (Mr. LEVINE of California). Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
February 25, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Clause 5, Rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope from the White House, received in the Clerk's Office at 6:18 p.m. on Thursday, February 24, 1983 and said to contain a message from the President wherein he transmits the following four pieces of draft legislation: the State Fiscal Assistance Block Grant Act; the Local Fiscal Assistance Block Grant Act of 1983; the Federalism Block Grant Highway Act of 1983; and the Rural Housing Block Grant Act.

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

STATE FISCAL ASSISTANCE BLOCK GRANT ACT; LOCAL FISCAL ASSISTANCE BLOCK GRANT ACT OF 1983; FEDERALISM BLOCK GRANT HIGHWAY ACT OF 1983; AND RURAL HOUSING BLOCK GRANT ACT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-22)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Agriculture, the Committee on Banking, Finance and Urban Affairs, the Committee on Education and Labor, the Committee on Energy and Commerce, the Committee on Government Operations, the Committee on the Judiciary, the Committee on Public Works and Transportation, the Committee on Rules, and the Committee on Ways and Means, and ordered to be printed:

To the Congress of the United States:

I am transmitting to the Congress today four pieces of legislation: the State Fiscal Assistance Block Grant Act; the Local Fiscal Assistance Block Grant Act of 1983; the Federalism Block Grant Highway Act of 1983; and the Rural Housing Block Grant Act.

These four proposals represent a continuation and expansion of the efforts of my Administration to return authority, responsibility and revenue resources to State and local governments.

In my January 25, 1983 State of the Union message, I indicated that I would be sending to the Congress shortly a comprehensive federalism proposal that will continue our efforts to restore to State and local governments their roles as dynamic laboratories of change in a creative society. We have now completed our work on this effort and it is embodied in these four proposed bills.

Therefore, I am requesting today that these bills be referred to the appropriate committees and I urge their early enactment.

THE NEED FOR CHANGE

In a 1957 speech to the National Governors' Conference, President Eisenhower sounded the first words of caution about the trend toward increased central government control. He said:

"Our governmental system, so carefully checked, so delicately balanced, with power fettered and people free, has survived longer than any other attempt to conduct group affairs by the authority of the group itself. Yet, a distinguished American scholar has only recently counseled us that in the measurable future, if present trends continue, the states are sure to degenerate into powerless satellites of the national government in Washington.

"That this forecast does not suffer from lack of supporting evidence, all of us know full well. The irony of the whole thing is accentuated as we recall that the national government was itself not the parent, but the creature of the states acting together. Yet today it is often made to appear that the creature, Frankenstein-like, is determined to destroy the creator."

Had he known how prophetic his statement was, his rhetoric undoubtedly would have been far stronger. During the two decades following the Eisenhower Administration, the Federal government increasingly encroached on state and local prerogatives. Narrow and restrictive Federal grant-in-aid programs grew from under 50 to over 500, pervading such obviously local concerns as rat control and sewer extensions. The dollar amount usurped from State and local treasuries to finance these programs ballooned from $7 billion in 1960 to $95 billion in 1981, with increased Federal dollars came suffocating Federal control. Lost was the efficiency and accountability of local spending priorities.

A generation of governors, state legislators, mayors and county officials began to echo President Eisenhower's sentiments throughout the 1960's and 1970's. They came to realize that the mushrooming Federal programs reflected the fact that Presidents and Congresses failed to trust State and local officials as their partners in our Federal system.

The Federal government had too much control, many felt. Programs lacked flexibility. Regulations were restrictive. Federal mandates were depleting State and local treasuries. Expenditures were being made for programs that were not really needed in particular localities. In short, State and local officials believed that they were more capable of making more prudent decisions to run their own jurisdictions than Federal bureaucrats. They started calling for a reordering of priorities and a sorting out of responsibilities among the various levels of goverment.

INITIATIVES IN 1981-82

During the past two years, hundreds of decisions and proposals have been made by my Administration in an effort to restore balance to our Federal system.

For example, throughout the economic recovery program, which I proposed in 1981, there was the underlying theme of federalism. The spending reductions were a reordering of priorities so that the national budget would address truly national needs. The tax cuts addressed the problem created by the Federal government usurping revenue sources which otherwise would have been available to State and local governments and to individuals. And the regulatory relief effort was directed in large part to removing the regulatory manacles which bind State and local governments.

In a more direct assault on Federal usurpation, we proposed the consolidation of scores of narrow and restrictive categorical grant-in-aid programs into seven broad block grants. The package which was ultimately passed by the Congress, and which I signed, consolidated 57 programs into nine block grants. It is estimated that these block grants resulted in a reduction of 5.4 million manhours (83%) in FY '82 for State and local officials and 5.9 million manhours (91%) in subsequent years from the level required to administer the predecessor categorical programs.

This block grant effort continued in 1982, with enactment of the Job Training Partnership Act and the Urban Mass Transportation Block Grant.

Many other initiatives were taken on the federalism front.

—Of the 119 regulatory reviews targeted by the Task Force on Regulatory Relief, 35 were directed to State and local governments.

—For the first time in many years, the Executive branch actively participated in the Advisory Commission on Intergovernmental Relations (ACIR).

—I created a Federalism Advisory Committee chaired by Senator Paul Laxalt (R-Nevada). The work of that committee has now been completed and its suggestions have been incorporated into the package which I am today sending to the Congress.

—At the White House, we have pursued an active outreach effort with State and local officials. Personally, I have met with more than 1,000 such officials in the White House during 1981 and 1982.

Finally, early in 1982, I proposed the outline of a major Federalism Initiative. I stated at the time that my package was just a conceptual framework and that I wanted to work out the details following extensive consultation with State and local officials. The process which followed was unprecedented, and I want to thank the many State and local officials who assisted me in the development of the legislation. The package which I am sending to the Congress today reflects the input which we received from State and local officials throughout 1982 and early 1983.

THE 1983 FEDERALISM INITIATIVE

These legislative proposals would consolidate 34 programs into four mega-block grants. The Administration's budget request for these programs for FY '84 is approximately $21 billion.

The following programs would be consolidated into the four mega-block grants.

STATE BLOCK GRANT

Rehabilitation Services
Vocational Education
Adult Education
State Education Block Grant (ECIA, Chapter 2)
WIN
Low-Income Home Energy Assistance
Social Services Block Grant
Community Services Block Grant
ADAMHA Block Grant
MCH Services Block Grant
Rural Water and Waste Disposal Grants (FmHA)
Water and Sewer Facility Loans (FmHA)
Community Facility Loans (FmHA)
CDBG—Non-Entitlement Portion
Grants for the Construction of Municipal Waste Water Treatment Works (EPA)
Child Welfare Services
Child Welfare Training
Adoption Assistance
Foster Care
Prevention Health and Health Services Block Grant
Child Abuse State Grants
Runaway Youth

FEDERAL-LOCAL BLOCK GRANT

General Revenue Sharing
CDBG—Entitlement Portion

TRANSPORTATION BLOCK GRANT

Urban System
Secondary System
Non-Primary Bridges
Highway Safety (FHWA 402 Grants)
Hazard Elimination
Rail-Highway Crossing

RURAL HOUSING BLOCK GRANT

Rural Housing Insurance Fund
Very Low-Income Repair Grants
Mutual and Self-Help Grants
Rental Assistance Program

This is a five-year program. It would guarantee funding for the programs turned back at the level enacted for FY '84. This funding level would remain in effect through FY '88.

This will provide a stable and certain funding source for State and local governments. It is *not* a vehicle for budgetary savings.

During this five-year period we will carefully monitor the block grants and determine whether it would be feasible to return revenue sources, such as Federal excise taxes or a percentage of the Federal income tax, to State and local governments along with the programs in the block grants. I will appoint a presidential commission to review this issue and to provide recommendations to me.

The proposals have been drafted to avoid dislocations on State and local governments. For example:

—For the Federal-State and Federal-Local block grants, beginning on October 1, 1983, a recipient could take 20 percent of the money from the program and spend it anywhere else within the block. This percentage would increase to 40 percent, 60 percent, 80 percent, and finally 100 percent in each of the succeeding four fiscal years. Thus, in fiscal year 1988, a recipient would be able to spend 100 percent of the dollars in each block for any of the purposes within the block.

—In the Federal-State block grant, for programs where Federal dollars go to the States but are passed through to some degree by the State to local units of government, each State would be required to pass through the percentage that was available to localities in fiscal years 1981, 1982 and 1983 in that program.

—States would be required to have meaningful consultations with local officials prior to final decisions on the distribution of these pass-through funds.

—For three Farmer's Home Administration (FmHA) programs—rural water and sewer grants, water and sewer loans, and community facility loans—100% of these FmHA program funds will be passed through State governments directly to rural communities of less than 10,000 in population. In Addition, at least 70% of the "small cities" funds of the Community Development Block Grant program will be apportioned to communities of less than 20,000 in population.

Implicit in the Federal-local block grant is the assumption that revenue sharing would be reauthorized for 5 years at the current funding level of $4.6 billion annually.

Allocations to States for each program included in the State block grant, would be based on the historical program shares (FY '81-'83), or on the basis of formula allocations.

Funding for the Federal-State block grant would come from three Federal excise taxes on alcohol, tobacco, and telephones. The transportation block grant would be funded by part of the Federal gasoline tax.

The swap of federalization of Medicaid for State assumption of AFDC and Food Stamps, which was included in my January, 1982 framework has been dropped from the package. Reform of these three programs will be considered on a separate track.

Many of the more controversial programs in the original package (such as child nutrition, handicapped education, urban development action grants and others) have been dropped from the initiative.

The block grants include vastly reduced Federal strings and regulations. I strongly urge Congress to provide the flexibility in the programs that State and local officials need and deserve.

I request that Congress give these legislative proposals its immediate attention. With the help of the Congress, we can make government work more effectively for all Americans.

RONALD REAGAN.

THE WHITE HOUSE, *February 24, 1983.*

WELCOMING SALVADORAN PEACE COMMISSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LEACH) is recognized for 30 minutes.

Mr. LEACH of Iowa. Mr. Speaker, all Americans, regardless of their views on the current situation in El Salvador, should join in welcoming Salvadoran President Magana's creation of a special commission to foster, as he described it, "the conditions for social and political justice and a program for peace."

I think it is especially auspicious that President Magana himself will head the commission and that it includes members from the major political parties represented in the Salvadoran constituent assembly. This bold and constructive initiative offers a real hope for the beginning of a dialog among the various political groupings in El Salvador leading, we all pray, to an end to the fighting that has plagued that country for far too long.

The guerrillas and their political spokesmen in the FDR/FMLN should scrutinize President Magana's action carefully. They have insisted that they are prepared to engage in discussions with the Salvadoran Government without preconditions. The new commission may well be the opening that will allow those discussions to move from the realm of rhetoric into the realm of reality. The shape of a political settlement in El Salvador is as yet far from clear, but what is certain is that a military settlement is out of the question and runs the risk of involving all of Central America in a wider conflict from which no one will profit.

Mr. Speaker, I have urged before and I urge today that the administration not let slip the opportunity for a negotiated settlement in El Salvador. We must aid the process, rather than inhibit it. I submit again that the best way for the United States to pay a positive role in Central America is to name immediately a special envoy to the region. The appointment of a prestigious special envoy in and of itself would signal a new willingness by the

United States to open channels of communication, to work for peace rather than posture for political or propaganda gain. The creation of a Peace Commission by the Government of El Salvador and the impending visit of the Pope require that the United States demonstrate a willingness to take definitive steps toward peace.

Maintaining status quo policies means maintaining a military stalemate. The killings will not stop until policies are changed.

TAX ON TIPS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LEWIS) is recognized for 5 minutes.

● Mr. LEWIS of California. Mr. Speaker, in southern California there is a group of women and men who are demonstrating their objection to a very burdensome and unnecessary law. They are waitresses and waiters who cannot live with a portion of the Tax Equity and Fiscal Responsibility Act of 1982 which requires extra reporting to the Internal Revenue Service with respect to tips. Last year, because of this provision and other portions of TEFRA which create undue hardship on American taxpayers, I cast my vote against this legislation. The additional reporting requirements, as they appear in regulation, turn waitresses and waiters into bookkeepers and turn employers of these people into agents of the IRS. For these hard-working citizens, it is now necessary for waitresses and waiters to keep daily books on their tips, and for their employers to make new and confusing calculations of gross receipt percentages and tip allocations. Because of the lack of information on this new rule, there have been instances of mistaken actions taken by employers, who are anxious to comply with the law. Unfortunately, some of these actions have hurt diligent employees. It is my further understanding that over 80 percentage of the workers affected by this law are women.

It is my intention to place my full support behind the elimination of this onerous law. On behalf of all those affected in the 35th Congressional District of California and nationwide, I am introducing legislation to repeal the section of Public Law 97-248 which contains the tip reporting provisions.●

INTRODUCTION OF THE PUBLIC HEALTH EMERGENCY RESEARCH ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. WAXMAN) is recognized for 5 minutes.

● Mr. WAXMAN. Mr. Speaker, I am today introducing the Public Health Emergency Research Act. This bill provides for an emergency response fund at the National Institutes of Health. This fund will allow the Secretary of the Department of Health and Human Services to respond quickly to public health emergencies with basic biomedical research.

The Centers for Disease Control are clearly the day-by-day acting agency for public health. CDC moves quickly to identify outbreaks of disease, to do epidemiological work, and to perform initial biomedical research. CDC's work is exemplary and the standard for the world.

But in many ways, the National Institutes of Health are the Nation's best hope for breakthroughs in major problems of public health. As the Public Health Service's premier basic research agency, NIH has been involved—and is still involved—in such crises as Legionnaire's disease and acquired immune deficiency syndrome.

However, in other ways, NIH Is unable to be as responsive to emergencies as it should be. Peer review, advisory councils, and competitive bidding slow NIH grants and contracts. Those restrictions and limitations on research grants that make good, unbiased basic research over years also make the award of "expedited grants" take over 10 months.

I want to be the first to say that we should continue our support for the NIH grants process. The advice and counsel of experts in each of the fields of research is invaluable in buhlding a portfolio of creative and useful long-term research.

But as public health has become more and more complex, requiring not just the traditional county nurse but also multiyear lab work, it has become clear that NIH must also have the ability to respond to emergencies quickly. The bill that I am introducing will set aside 1 percent of the 1984 appropriation for NIH to be put in an emergency response fund. In subsequent years only enough money to keep the fund equal to 1 percent is set aside. The bill also empowers the Secretary—if, after consultation with the Director of NIH, the Commissioner of FDA, or the Director of CDC, he determines a disease or disorder to present a public health emergency—to conduct or support research on the disease or disorder. When using these emergency funds, the Secretary is authorized to waive the usual requirements for the making of awards.

I believe that this legislation will create an expedited means to provide research on epidemics and emergency disease control. I urge Members to support the bill.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LOTT) to revise and extend their remarks and include extraneous material:)

Mr. LEACH of Iowa, for 30 minutes, today.

Mr. LEWIS of California, for 5 minutes, today.

(The following Members (at the request of Mr. BATES) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BATES, for 5 minutes, today.

Mr. WAXMAN, for 5 minutes, today.

Mr. ALEXANDER, for 60 minutes, February 28.

Mr. ALEXANDER, for 60 minutes, March 1.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LOTT) and to include extraneous matter:)

Mr. BROOMFIELD.

Mr. KEMP.

Mr. LEACH of Iowa.

Mr. RITTER.

Mr. GEKAS.

Mr. FIELDS.

Mr. LENT.

Mr. WINN.

(The following Members (at the request of Mr. BATES) and to include extraneous matter:)

Mr. DINGELL in two instances.

Mr. UDALL.

Mr. HERTEL of Michigan.

Mr. HOYER.

Mr. BROWN of California.

Mr. OTTINGER.

Mr. LELAND.

Mr. ROE.

Mr. WAXMAN.

Mr. RAHALL.

Mr. LEVITAS.

Mr. BONKER.

Mr. DE LUGO in two instances.

Mr. LOWRY of Washington.

Mr. PATTERSON.

ADJOURNMENT

Mr. BATES. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 25 minutes a.m.), under its previous order, the House adjourned until Monday, February 28, 1983, at 12 o'clock noon.

OATH OF OFFICE, MEMBERS, RESIDENT COMMISSIONER, AND DELEGATES

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1884 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

> "I, A B, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

has been subscribed to in person and filed in duplicate with the Clerk of the House of Representatives by the following Member of the 98th Congress, pursuant to the provisions of 2 U.S.C. 25:

PHIL GRAMM, Sixth District, Texas.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

421. A letter from the General Counsel, Department of Defense, transmitting a draft of proposed legislation to amend title 10, United States Code, to repeal the requirement to solicit suggestions from certain military and civilian retirees for methods to improve procurement procedures; to the Committee on Armed Services.

422. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the status of loans and contracts of guaranty or insurance for the Department of Defense, pursuant to section 25(a)(11) of the Arms Export Control Act; to the Committee on Foreign Affairs.

423. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Ambassador-designate Lewis A. Tambs, and by members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

424. A letter from the Assistant Secretary of State for Congressional Relations, transmitting the annual report on the Panama Canal Treaties of 1977 for the period October 1, 1981, through September 30, 1982, pursuant to section 3301 of Public Law 96-70; jointly, to the Committees on Merchant Marine and Fisheries, Foreign Affairs, the Judiciary, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FUQUA: Committee on Science and Technology. H.R. 1310. A bill to provide assistance to improve elementary, secondary, and postsecondary education in mathematics and science; to provide a national policy for engineering, technical, and scientific personnel; to provide for cost-sharing by the private sector in training such personnel; and for other purposes; with amendments (Rept. No. 98-6, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BONKER (for himself, Mr. FOLEY, Mr. PRITCHARD, Mr. DICKS, Mr. LOWRY of Washington, Mr. MORRISON of Washington, Mr. SWIFT, and Mr. WYDEN):

H.R. 1682. A bill to modify the navigation project on the Cowlitz River, Wash., to authorize the Secretary of the Army to implement interim measures to control floods in the lower Cowlitz River area and improve navigation on the Columbia River; to the Committee on Public Works and Transportation.

By Mr. DE LUGO:

H.R. 1683. A bill to amend the Agricultural Act of 1949 to limit the authority of the Secretary of Agriculture to make deductions from the proceeds of milk marketed commercially by producers in the United States; to the Committee on Agriculture.

By Mr. DE LUGO (for himself and Mrs. HOLT):

H.R. 1684. A bill to exempt certain charterboats in the U.S. Virgin Islands from the entry requirements of the customs laws; to the Committee on Ways and Means.

By Mr. HERTEL of Michigan:

H.R. 1685. A bill to amend the Natural Gas Policy Act of 1978 to prohibit take-or-pay clauses or similar minimum purchase requirements under natural gas supply contract, prohibit indefinite price escalator clauses, and to allow the Federal Energy Regulatory Commission to prohibit pass-through of natural gas prices, or take other corrective action, if the prices paid by natural gas companies are excessive due to waste or imprudence; to the Committee on Energy and Commerce.

H.R. 1686. A bill to amend the Natural Gas Policy Act of 1978 to freeze the price under any natural gas contract at the price applicable as of January 1, 1983, to exempt from such freeze any contract having a market-out clause if the contract was entered into after the effective date of this act and any contract entered into on or before such date which is renegotiated as to price after such date and which has a market-out clause; to the Committee on Energy and Commerce.

By Mr. HOWARD (for himself and Mr. SNYDER) (by request):

H.R. 1687. A bill to amend the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; to the Committee on Public Works and Transportation.

By Mr. HOYER:

H.R. 1688. A bill to restrict the disposal by the Administrator of General Services of certain real property located at the Beltsville Agricultural Research Center; to the Committee on Government Operations.

By Mr. LELAND:

H.R. 1689. A bill to amend the act commonly known as the Second Morrill Act to repeal statutory language purporting to permit racial segregation in colleges financed under such act, and for other purposes; to the Committee on Agriculture.

H.R. 1690. A bill to amend title 5, United States Code, to revise the pay structure for Federal employees whose duties primarily relate to firefighting; to the Committee on Post Office and Civil Service.

By Mr. LEWIS of California:

H.R. 1691. A bill to repeal the provisions of the Tax Equity and Fiscal Responsibility Act of 1982 which require employer reporting with respect to tips; to the Committee on Ways and Means.

By Mr. PRICE (for himself and Mr. DICKINSON)(by request):

H.R. 1692. A bill to amend section 171 of title 10, United States Code, to provide that the Commandant of the Marine Corps shall be a member of the Armed Forces Policy Council; to the Committee on Armed Services.

By Mr. SOLARZ (for himself, Mr. DIXON, Mr. DOWNEY of New York, Mr. DYMALLY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FOGLIETTA, Mr. GRAY, Mr. MARKEY, Ms. MIKULSKI, Mr. MITCHELL, Mr. OBERSTAR, Mr. OTTINGER, Mr. STOKES, and Mr. CROCKETT:

H.R. 1693. A bill requiring U.S. persons who conduct business or control enterprises in South Africa to comply with certain fair employment principles, prohibiting any new loans by U.S. financial or lending institutions to the South African Government or to South African corporations or other entities owned or controlled by the South African Government, and prohibiting the importation of South African krugerrands or other South African gold coins; jointly, to the Committees on Foreign Affairs and Banking, Finance and Urban Affairs.

By Mr. VENTO:

H.R. 1694. A bill to prohibit the drugging or numbing of racehorses and related practices, and to amend title 18, United States Code, to prohibit certain activities conducted in interstate or foreign commerce relating to such practices; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. WAXMAN:

H.R. 1695. A bill to establish the National Commission on Orphan Diseases; to the Committee on Energy and Commerce.

By Mr. WAXMAN (for himself and Mr. MADIGAN):

H.R. 1696. A bill to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes; to the Committee on Energy and Commerce.

By Mr. WAXMAN (for himself, Mr. BERMAN, Mrs. BOXER, Mr. BURTON of California, Mr. DIXON, Mr. LEVINE of California, and Mr. WEISS):

H.R. 1697. A bill to amend the Public Health Service Act to enable the Secretary of Health and Human Services to expedite the initiation of research to be conducted or

supported by the National Institutes of Health into the prevention, diagnosis, and treatment of diseases or disorders which constitute a public health emergency; to the Committee on Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII,

15. The SPEAKER presented a memorial of the Legislature of the State of West Virgina, relative to a mutual and verifiable nuclear weapons moratorium; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. MCCLOSKEY introduced a bill (H.R. 1698) for the relief of Dr. Honesto K. Fenol, Rosabella Montes-Fenol, and Lawrence Mark Fenol; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 174: Mr. JONES of Oklahoma, Mr. WYDEN, Mr. DE LA GARZA, Mr. ENGLISH, Mr. PANETTA, Mr. YATRON, Mr. WYLIE, Mr. GOODLING, Ms. OAKAR, Mr. FISH, Mr. HUCKABY, Mr. FORD of Michigan, Mr. LELAND, Mr. FLORIO, Mr. GILMAN, Mr. STRATTON, Mr. BIAGGI, Mr. MINISH, and Mr. MCDADE.

H.R. 616: Mr. VANDER JAGT, Mr. CLINGER, Mrs. SNOWE, Mr. MCGRATH, Ms. MIKULSKI, Mr. MOLLOHAN, Mr. O'BRIEN, Mr. YOUNG of Alaska, Mr. DEWINE, Mr. WHITEHURST, Mr. PRICE, Mr. BARNES, Mr. BROYHILL, Mr. WALGREN, Mr. MCKINNEY, Mr. FORSYTHE, Mr. LENT, Mr. EDGAR, Mr. CONABLE, Mr. MAVROULES, Mr. DUNCAN, Mr. RAHALL, Mr. PASHAYAN, Mr. BIAGGI, Mr. NOWAK, Mr. WISE, Mr. MADIGAN, Mr. FOGLIETTA, Mr. TALLON, Mr. BLILEY, Mr. RITTER, Mr. MOAKLEY, Mr. LAGOMARSINO, Mr. BEVILL, Mr. YOUNG of Missouri, Mr. GEKAS, Mr. SENSENBRENNER, Mr. WORTLEY, Mr. BEREUTER, Mr. COLEMAN of Missouri,

Mr. CORCORAN, Mr. TRAXLER, Mr. COATS, Mr. DURBIN, Mr. HUBBARD, Mr. ROGERS, Mr. ROE, Mr. HOPKINS, Mr. OXLEY, Mr. BONIOR of Michigan, Mr. MCKERNAN, Mr. GREGG, Mr. DAVIS, Mr. SIMON, Mr. LELAND, Mr. MITCHELL, Mr. DIXON, Mr. THOMAS of Georgia, Mr. TAUKE, and Mr. MCCANDLESS.

H.R. 822: Mr. GEJDENSON, Mr. GREEN, Mr. LEACH of Iowa, Mr. AUCOIN, and Mr. BONIOR of Michigan.

H.R. 873: Mr. MCNULTY, Mr. GRAY, and Mr. BROWN of California.

H.R. 944: Ms. FIEDLER.

H.R. 1039: Mr. CONTE and Mr. MAVROULES.

H.R. 1092: Mr. BARNARD, Mr. LEWIS of Florida, and Mr. MCCOLLUM.

H.R. 1245: Mr. LELAND, Mr. CROCKETT, Mr. COUGHLIN, Mr. EDGAR, Mr. MITCHELL, and Mr. MCCOLLUM.

H.R. 1379: Mr. SUNIA.

H.R. 1444: Mr. MITCHELL and Mr. HUCKABY.

H.J. Res. 22: Mr. PETRI and Mr. NOWAK.

H.J. Res. 59: Mr. TAUZIN.

H.J. Res. 120: Mr. FRENZEL.

H. Con. Res. 20: Mr. BATES, Mr. WALGREN, Mr. YATES, Mr. FAUNTROY, Mr. FOGLIETTA, Mr. EDWARDS of California, Mr. LEHMAN of Florida, Mr. DYMALLY, Ms. KAPTUR, Mr. LOWRY of Washington, Mr. DELLUMS, and Mr. COYNE.

EXTENSIONS OF REMARKS

VOTING RECORD

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. UDALL. Mr. Speaker, it has become my practice from time to time to list my votes in the House of Representatives here in the CONGRESSIONAL RECORD. I strongly believe that the people of Arizona have a right to know where I stand on the issues decided by the House, and I have found that printing my record here is the best way to provide that information.

This is not an all-inclusive list. I have omitted noncontroversial votes such as quorum calls, motions to resolve into the Committee of the Whole House, and motions to approve the Journal of the previous day.

The descriptions are necessarily somewhat short, and I am sure that some of my constituents will have additional questions about the issues described here. So I invite them to write me for specifics, or to visit my district office at 300 North Main in Tucson or 1419 North Third Street, Suite 103, in Phoenix.

The list is arranged as follows:

KEY

1. Official rollcall number;
2. Number of the bill or resolution;
3. Title of the bill or resolution;
4. A description of issue being voted on;
5. The date of the action;
6. My vote, in the form Y=yes, N=no, and NV=not voting;
7. The vote of the entire Arizona delegation, in the form (Yes-No-Not voting);
8. An indication whether the motion or amendment was passed or rejected; and
9. The total vote.

86. H.R. 6267. Net Worth Guarantee Act. Passage of the bill to revitalize the housing industry by setting up a Treasury fund to guarantee the net worth of qualified mortgage lending institutions. Passed 272-91: Y(1-3-0), May 20.

88. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Motion that the House resolve itself into the Committee of the Whole for consideration of the concurrent resolution to set budget targets for the fiscal year ending Sept. 30, 1983. Motion agreed to 342-0: Y(4-0-0), May 21.

90. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Substitute, known as the "pay as you go" budget, to require that any increases in spending above fiscal 1982 levels be matched by offsetting revenue increases or spending cuts in other programs. The substitute would result in a $27.5 billion surplus in fiscal 1985, according to Congressional Budget Office estimates. Rejected 181-225: Y(1-3-0), May 24.

91. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Substitute to provide funding for emergency jobs programs while maintaining other domestic programs at real fiscal 1982 levels and increasing nonpay defense programs by 7 percent, and to scale back the tax cuts enacted in 1981. The substitute would result in a $1.3 billion deficit in fiscal 1985, according to Congressional Budget office estimates. Rejected 152-268: Y(1-3-0), May 24.

92. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Substitute, proposed by the Congressional Black Caucus, to make substantial increases above current policy levels in spending for non-defense programs, hold defense spending at fiscal 1982 levels, and increase revenues through extensive tax reforms. The substitute would result in an $18.7 billion surplus in fiscal 1985, according to Congressional Budget Office estimates. Rejected 86-322: Y(1-2-1), May 24.

94. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Substitute to balance the budget in fiscal 1983-85 by making large cuts in non-defense programs while maintaining the three-year tax cut enacted in 1981. The substitute assumed higher revenues under current tax policy than projected by the Congressional Budget Office. Rejected 182-242: N(3-1-0), May 25.

95. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Latta, R-OH, substitute, to express the sense of the House that Congress should close tax loopholes to the maximum extent possible as a way of raising revenues over the next three years. Rejected 68-342: N(0-3-1), May 25.

96. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Aspin, D-Wis., substitute, to set a level for total tax expenditures of $273.1 billion. Rejected 164-246: NV(0-2-2), May 25.

97. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-OH, substitute, to increase fiscal 1983 revenues by $7.5 billion and redistribute those funds to entitlement and domestic discretionary programs. Rejected 175-237: Y(1-2-1), May 25.

98. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Jones, D-Okla., substitute, to reduce revenue levels by $10.8 billion. Rejected 178-237: N(2-1-1), May 25.

100. S. Con. Res. 60. Disapproval of Federal Trade Commission Use-Car Rule. Motion to limit debate to two hours on the Federal Trade Commission use-car rule. Motion agreed to 317-92: Y(3-0-1), May 26.

101. S. Con. Res. 60. Disapproval of Federal Trade Commission Used-Car Rule. Adoption of the concurrent resolution to disapprove the Federal Trade Commission rule to require used-car dealers to inform customers of major known defects in used automobiles. Adopted 286-133: N(2-1-1), May 26.

102. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Jones, D-Okla., substitute, to increase budget authority by $10.5 billion and outlays by $7.6 billion in fiscal 1983-85 and to reduce discretionary programs and entitlements by the same amounts. Rejected 83-339: N(0-4-0), May 26.

103. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Jones, D-Okla., substitute, to reduce fiscal 1983 defense budget authority by $16 billion and outlays by $4 billion annually in fiscal 1983-85 and to reduce revenues by $4 billion in each of those years. Rejected 125-295: NV(0-2-2) May 26.

104. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Jones, D-Okla., substitute, to reduce budget authority by $20.4 billion and outlays by $8 billion in fiscal 1983, reflecting a freeze on nuclear weapons testing, production and deployment. Rejected 28-383: NV(0-2-2) May 26.

105. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-OH, substitute, to reduce fiscal 1983 defense outlays by $7.5 billion and increase revenues by $15 billion through enactment of luxury and excise taxes. Rejected 128-285: N(0-3-1), May 26.

106. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-OH, Jones, D-Okla, and Aspin, D-Wis., substitutes, to increase budget authority by $1.85 billion in fiscal 1982-85 and outlays by $450 million in fiscal 1984-85 to accommodate additional funding for the Export-Import Bank direct loan program. Rejected 186-232: Y(1-2-1), May 26.

107. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment, to the Jones, D-Okla., substitute, to increase budget authority by $668 million and outlays by $87 million for education programs in fiscal 1983, and to make corresponding reductions in the allowances function. Adopted 323-99: Y(1-2-1), May 26.

108. H. Con. Res. 345. First Budget Resolution, Fiscal 1983, Amendment to the Latta, R-Ohio, substitute, to increase budget authority by $1.7 billion and outlays by $837 million for education programs in fiscal 1983, and to make corresponding reductions in the allowances function. Adopted 343-72: Y(1-2-1), May 26.

110. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, substitute, to increase budget authority by $400 million and outlays by $4.85 billion for health programs in fiscal 1983 to accommodate Medicare funding at current services levels, and to make corresponding reductions in defense programs. Adopted 228-196: Y(1-2-1), May 27.

111. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Aspin, D-Wis, substitute to increase budget authority by $200 million and outlays by $2.35 billion for health programs in fiscal 1983 to accommodate Medicare funding at current services levels and to make corresponding reductions in defense programs. Adopted 328-94: Y(3-0-1), May 27.

112. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, Aspin, D-Wis, Jones, D-Okla, substitutes to increase fiscal 1983 budget authority and outlays by $1.15 billion to accommodate a 7 percent pay raise for federal employees, rather than 4 percent as assumed in the substitutes. Rejected 143-281: N(0-3-1), May 27.

113. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Latta, R-Ohio, Aspin, D-Wis, Jones, D-Okla, substitutes to increase fiscal 1983 budget authority by $396 million and outlays by $398 million to accommodate a 5 percent pay raise for federal employees rather than 4 percent as assumed in the substitutes. Adopted 259-159: Y(1-2-1), May 27.

114. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, Jones, D-Okla, substitutes to increase fiscal 1983 budget authority by $200 million and outlays by $500 million to accommodate removals of the 4 percent ceiling on cost-of-living adjustments (COLAs) for federal civilian and military retirees. Adopted 327-94: Y(2-1-1), May 27.

115. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, Aspin, D-Wis, Jones, D-Okla, substitutes to increase fiscal 1983 budget authority by $451 million and outlays by $501 million (above the Latta substitute) to accommodate funding at authorized levels for law enforcement activities. Rejected 152-264: N(0-3-1), May 27.

116. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, Aspin, D-Wis, Jones, D-Okla, substitutes to increase fiscal 1983 budget authority by $1.15 billion and outlays by $100 million (above the Latta substitute) to accommodate funding at the levels recommended by House authorizing committees for drug law enforcement agencies. Rejected 182-237: N(0-3-1), May 27.

117. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Aspin, D-Wis, Jones, D-Okla, substitutes to strike reconciliation instructions directing the House Education and Labor Committee to reduce fiscal 1983 budget authority and outlays by $73 million through savings in the worker compensation program for federal civilian employees. Rejected 193-225: Y(1-2-1), May 27.

118. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, substitute to delete all reconciliation instructions requiring committees to report legislation making changes in programs within their jurisdictions to achieve specified savings targets. Rejected 60-357: NV(0-2-2), May 27.

119. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Jones, D-Okla., substitute to delete provisions calling for deferred enrollment, until adoption of the second budget resolution, of any spending bill that exceeds the allocations provided under the first resolution. Adopted 212-202: Y(2-1-1), May 27.

120. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Amendment to the Latta, R-Ohio, substitute to delete provisions calling for deferred enrollment, until adoption of the second budget resolution of any spending bill that exceeds the allocations provided under the first resolution. Adopted 212-206: Y(2-1-1-) May 27.

121. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Substitute, as amended, to set budget targets for the fiscal year ending Sept. 30, 1983, as follows: budget authority, $805.8 billion; outlays $769.4 billion; revenues, $665.9 billion; and deficit, $103.5 billion. Rejected 192-235: N(3-1-0), May 27.

122. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Substitute, as amended, to set budget targets for the fiscal year ending Sept. 30, 1983, as follows: budget authority, $825.5 billion; outlays, $772.9 billion; revenues, $675.7 billion; and deficit, $97.2 billion. Rejected 137-289: N(0-4-0), May 27.

123. H. Con. Res. 345. First budget Resolution, Fiscal 1983. Substitute as amended, to set budget targets for the fiscal year ending Sept. 30, 1983, as follows: budget authority, $781.7 billion; revenues, $676.7 billion; and deficit, $105.0 billion. Rejected 171-253: Y(1-3-0), May 27.

124. H. Con. Res. 345. First Budget Resolution, Fiscal 1983. Adoption of the concurrent resolution, as reported by the House Budget Committee, to set budget targets for the fiscal year ending Sept. 30, 1983, as follows: budget authority, $828 billion; outlays, $780.5 billion; revenues, $676.7 billion; and deficit $103.85 billion. Rejected 159-265: Y(1-3-0), May 27.

125. H.R. 4. Intelligence Identities Protection Act. Adoption of the conference report on the bill to make it a felony to publicly expose the identities of U.S. covert intelligence officers, agents, informants and sources. Adopted 315p32: Y(3-0-1), June 3.

127. H.R. 4861. American Conservation Corps. Motion to suspend the rules and pass the bill to establish an American Conservation Corps to employ youths aged 16-25 for conservation, rehabilitation and improvement projects on federal, state or Indian lands. Motion agreed to 291-102: Y(2-2-0), June 9.

128. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Motion to order the previous question (thus ending debate and the possibility of amendment) on the Myers motion to instruct the House conferees on the fiscal 1982 urgent supplemental appropriations bill to accept Senate amendments to delete the House-passed amendment repealing a provision of existing law to require a balanced federal budget by fiscal year 1981 and to restore a $3,000 annual limit on business-related tax deductions, even in excess of $3,000, provided they were substantiated. Motion rejected 176-218: Y(2-1-1), June 9.

129. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Amendment to the Myers, R-Ind, motion to instruct conferees on the fiscal 1982 urgent supplemental appropriations bill to accept the Senate amendments relating to the balanced budget, and restoring the $3,000 limit on business-related tax deductions claimed by Members of Congress. Adopted 356-43: Y (3-0-1), June 9.

130. H.R. 5922. Urgent Supplemental Appropriations, Fiscal 1982. Myers, R-Ind, motion, as amended by the Schroeder, D-Colo, amendment to instruct the conferees on the fiscal 1982 urgent supplemental appropriations bill to accept Senate amendments. Motion agreed to 378-7: Y (4-0-0), June 9.

132. H. Con. Res. 352. First Budget Resolution, Fiscal 1983. Adoption of the rule (H Res 496) providing for House floor consideration of the first concurrent budget resolution to set budget targets for the fiscal year ending Sept. 30, 1983. Adopted 339-72: Y (4-0-0), June 10.

133. H. Con. Res. 352. First Budget Resolution, Fiscal 1983. Substitute to the Latta, R-Ohio, substitute to set budget targets for the fiscal year ending Sept. 30, 1983, as follows: budget authority, $836.2 billion; and deficit, $107.45 billion. Rejected 202-225: Y (1-3-0), June 10.

134. H. Con. Res. 352. First Budget Resolution, Fiscal 1983. Substitute for the President's fiscal 1983 budget submission, to set budget targets for fiscal year ending Sept. 30, 1983 as follows: budget authority, $800.38 billion; outlays, $765.17 billion; revenues, $665.9 billion; and deficit, $99.27 billion. Adopted 220-207: N (3-1-0), June 10.

135. H. Con. Res. 352. First Budget Resolution, Fiscal 1983. Adoption of the first concurrent budget resolution to set budget targets for the fiscal year ending Sept. 30, 1983, as follows: budget authority, $800.38 billion; outlays, $765.17 billion; revenues, $665.9 billion, and deficit, $99.27 billion. The resolution also set preliminary goals for fiscal 1984-85, revised budget levels for fiscal 1982 and included reconciliation instructions requiring House and Senate committees to recommend legislative savings to meet the budget targets. Adopted 219-206: N (2-1-1), June 10.

136. H.R. 6198. Copyright Manufacturing Clause Protection Act. Motion to suspend the rules and pass the bill to extend until 1986 a provision in copyright law providing copyright protection for books and periodicals written in English only if they are printed in the United States. Motion agreed to 339-47: Y(3-1-0), June 15.

137. H.R. 6350. Veterans Administration Health Care. Motion to suspend the rules and pass the bill to permit Veterans Administration nurses who work two 12-hour regularly scheduled shifts over a weekend to be considered as having worked a full work week; to extend until Sept. 30, 1983, the authority of the VA adminsitrator to contract out medical services and hosptial for veterans in Puerto Rico and the Virgin Islands; and to extend through Sept. 30, 1985 a program of grants to states for the construction and alteration of state veterans' homes. Motion agreed to 390-0: Y(4-0-0), June 15.

138. H.R. 6254. Protection of Foreign Missions. Passage of the bill to increase to $7 million, from $3.5 million, the amount to be reimbursed to local governments in fiscal 1983 for their expenses in protecting foreign diplomatic missions. The bill also authorized reimbursements to state and local governments for protection of motorcades and visits by foreign dignitaries and authorized $17.7 million in reimbursements for expenses incurred prior to Oct. 1, 1982. Passed 218-177: Y(2-2-0), June 15.●

BURDENSOME REGULATIONS SWAMP VIRGIN ISLANDS' CHARTERBOAT INDUSTRY

HON. RON de LUGO

OF VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. DE LUGO. Mr. Speaker, I would like to call our colleagues' attention to a bill I am introducing today, which would exempt certain charterboats in the U.S. Virgin Islands from the entry requirements of Customs laws. This bill attempts to alleviate the expense and burden placed on owners of charterboats on either day sail or term charter who are obliged to make entry at the customhouse after excursions to the British Virgin Island.

I must point out that the British Virgin Islands lie literally a stone's throw away from the U.S. Virgin Islands, yet our charterboats, which carry an average of only 4 to 5 people, must fill out the same copious paperwork for a 1 hour trip over the international boundary as a supertanker or a commercial cargo vessel after a trip

halfway around the world. This unnecessary paperwork, which certainly must be a problem to store, or more likely dispose of, creates burdensome delays and inconveniences for the charterboat captains and their guests, and, I must emphasize here the importance of the charterboat industry to our tourism economy.

In place of the current reporting requirements, that are costly and burdensome to the U.S. Customs Service as well as the charterboats, I propose that charterboats be granted the same consideration as yachts and pleasure vessels, whose masters are only required to make a report within 24 hours after arrival to the appropriate customs officer of any article on board for which entry is required by law. Comments from the International Trade Commission and other administrative agencies have been supportive, and helpful technical changes in the language have been incorporated in this bill.

I urge my colleagues to carefully consider this measure and ask that the text of my bill be printed here for their review.

The text of the bill follows:

H.R. 1684

A bill to exempt certain charterboats in the United States Virgin Islands from the entry requirements of the customs laws

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 441(3) of the Tariff Act of 1930 (19 U.S.C. 1441(3)) is amended by inserting immediately before "*: Provided:*" the following: ", and charterboats, whether on day sail or term charter, carrying passengers for hire, on excursion from the United States Virgin Islands to the British Virgin Islands, or the waters thereof, and return, and not having visited any hovering vessel".

SEC. 2. The amendment made by the first section of this Act shall apply with respect to charterboats returning from the British Virgin Islands on or after the date of the enactment of this Act.●

COMPETITION FROM DEVELOPING NATIONS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. RAHALL. Mr. Speaker, the recent announcement by the Atari Corp., the electronic games and computer manufacturer, that it is going to eliminate approximately 1,700 jobs in California and transfer them to Hong Kong came as a great surprise to me. During the last several years all that we have been hearing is that this so-called high-tech industry is the wave of the future and could replace the jobs which have been lost in many of our heavier industries.

I represent a district that includes many of these heavy industries—steel, chemical, coal plants, et cetera. During the past several years those of us who represent areas with these older industries have been calling for our Government to look at the problem we face. Now it appears that even this country's new industries are subject to the same problems.

With this recent decision by Atari it is clear, we, as a country, must seriously discuss how we are going to meet the competition we face from developing nations. This will require cooperation from government, management, and labor whose goal must be to find a solution that will keep our products competitive both at home and abroad. We can no longer afford to offer only passive resistance to the threat our Nation faces from nations such as Japan, which have trade policies designed to protect their domestic industries and destroy those in other nations. The time is now, Mr. Speaker.●

JAPANESE-AMERICAN HUMAN RIGHTS VIOLATION REDRESS ACT

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. LOWRY of Washington. Mr. Speaker, 41 years ago last Saturday, on February 19, 1942, Executive Order 9066 authorized the incarceration of 120,000 Japanese-American citizens and legal aliens. Without ever being accused of any crime, these individuals were deprived of liberty, property, and a chance for a day in court. Triggered by wartime hysteria, our Government sanctioned that internment through Congress and the courts. The American Civil Liberties Union has accurately characterized that Government action as "one of the worst single wholesale violations of civil rights in our history."

Although we can never fully rectify this grievous injustice, we can provide meaningful compensation to the survivors. I believe that reparations for these violations are long overdue. Responsible citizens and legislators from my home State of Washington are working to persuade Government to accept responsibility for its actions. A measure was recently introduced in the Washington State Legislature by Senator George Fleming to provide $5,000 compensation to each Washington State employee who was terminated as a result of Executive Order 9066. Legislation for similarly affected city of Seattle employees will soon be introduced by Seattle City Council Member Dolores Sibonga.

The Japanese-American Citizens League and the Washington Coalition on Redress continue their tireless efforts to advance this long overdue remedy. I am deeply impressed by the courage of Japanese-Americans as well as their confidence in the U.S. governmental process despite having suffered such a great injustice. The response of the Japanese-American community demonstrates an unmatched spirit of loyalty and patriotism.

The courts now have an opportunity to clear their record and provide assurances that constitutional guarantees still stand for all citizens, regardless, of race, creed or national origin. Forty-one years ago, Gordon Hirabayashi, then a student at the University of Washington, was convicted of violating the wartime curfew imposed on persons of Japanese ancestry and of refusing to report to a civil control station for evacuation. Charging that U.S. Government officials suppressed evidence which could have led the Supreme Court to prohibit the internment of Japanese Americans, Dr. Hirabayashi filed a petition in U.S. district court in Seattle to seek a reversal of the verdict.

During the 96th Congress I introduced a reparations bill, "the World War II Japanese-American Human Rights Violation Redress Act." The 97th Congress established a Commission on Wartime Relocation which studied the wartime treatment of Japanese Americans and held hearings throughout the Nation to document its findings. The widespread publicity from the Commission hearings made millions of Americans aware of the wrongs done to west coast Japanese Americans during World War II. The Commission on Wartime Relocation will soon issue its findings. I will soon reintroduce an updated version of the World War II Japanese-American Human Rights Violation Redress Act in the 98th Congress.

I am convinced that justice requires an offical apology and monetary compensation. I urge my colleagues to join me in support of this goal.●

LITHUANIAN INDEPENDENCE DAY

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1983

● Mr. GEKAS. Mr. Speaker, we are commemorating today in the House of Representatives the 65th anniversary of Lithuanian Independence Day. Sixty-five years ago yesterday the brave people of Lithuania declared their independence from Russia and embarked upon an all too brief period of freedom until 1940. In the years of World War II, the Lithuanians were overtaken by Soviet armies, then by Nazi armies, and finally by Soviet soldiers once again. The Soviets maintained control over Lithuania at the

completion of World War II, ignoring the rightful independent status of the Baltic state.

The United States has never acknowledged the Soviet controlled Lithuania, and to this day maintains a Lithuanian legation here in Washington to represent the Lithuanian people. We are gathered here today in Congress to further drive home the point to the Soviets that our Nation will never accept the Soviet Union's practice of denying basic human rights to all Lithuanians. I am confident that one day soon we will be celebrating this independence day with our Lithuanian friends in a Lithuania that is once more free and independent. These are my thoughts because it is impossible for the Soviets to control the Lithuanian spirit, and it is the spirit that will outlast all the guns and tanks of the Soviet Army.

Here in the United States, there are many noble Lithuanian-Americans who help keep the fires of the Lithuanian spirit burning. I am quite fortunate to count as one of my friends Florence Surace, who is an excellent example of the positive contribution Lithuanian-Americans have made to our country. I am sure she joins with me today in celebrating this anniversary, and she too feels that Lithuanians will be free to commemorate this day once again in their native land.●

THE RESTING PLACE OF THE COMB: SOVIET BRUTALITY IN ACTION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. BROOMFIELD. Mr. Speaker, I want to call the attention of my colleagues to a recent tragedy in Afghanistan. I believe that this incident reconfirms that the Soviets will do anything to maintain their viselike grip over that once free and peaceful nation.

As all of you know, the brutal Soviet occupation of Afghanistan began in 1980. Since that time, Afghani resistance fighters have engaged in a lonely, and difficult guerrilla campaign against superior Russian air and ground forces. Although the heavy fighting will continue, the Kremlin has already basically fulfilled its primary objectives in Afghanistan. It has set up the puppet Karmal regime in Kabul and has occupied the country with 105,000 well-armed troops.

According to the article which appeared in the Washington Post this month, over 105 Afghani men, women, and children were brutally burned to death in an underground well by Soviet soldiers. The "Resting Place of the Comb" is a small village some 30 miles south of Kabul.

As Soviet soldiers and tanks approached the small village, many of its frightened inhabitants fled and hid in an underground water tunnel that serves as the town's water supply. Following the commanding officer's orders, Soviet soldiers pumped hundreds of gallons of gasoline into the tunnel when the Afghani villagers refused to come out of their hiding place. A few minutes later, after incendiary chemicals were dropped into the tunnel, the gasoline was ignited and 105 innocent people were burned to death. It took 7 days for the villagers to drag all of the bodies out of the tunnel.

The World Press has carried equally horrible stories of Soviet forces poisoning village wells, using poison gas, and strafing innocent Afghanis with the intimidating firepower of their helicopters. While all of this violence goes on, the Kremlin insists that it is a peace-loving nation which respects human rights and has no expansionist tendencies.

In spite of more than 12,000 Soviet dead and wounded and an estimated $1.5 billion in direct aid merely to prop up the Afghan army, I believe that the Russians intend to stay.

With this in mind, our Government should do everything in its power to call this bloody occupation of a small and peaceful nation to the attention of the world. Let us also bring pressure to bear on the Soviets to convince them that they must withdraw. I am sure that many of my colleagues can recall the many clever techniques which the Kremlin used against our Government when we were so heavily involved in Vietnam a number of years ago. Let all of us in the Congress commit ourselves to getting the illegal occupiers out of Afghanistan.●

CONGRESSIONAL COMMEMORATIVE SALUTE TO THE ESTONIAN PEOPLE ON THE 65TH ANNIVERSARY OF ESTONIAN INDEPENDENCE DAY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. ROE. Mr. Speaker, I rise today to join my colleagues in commemorating the 65th anniversary of the Republic of Estonia's Declaration of Independence. It is a day for all of us to remember that there are millions of people living in Estonia and other nations around the world who do not enjoy the basic rights of freedom of thought, movement, and expression that we all take for granted.

The situation taking place in Poland has special significance for the people of Estonia. Both nations emerged as independent states following the end of World War I. But the great potential they both expressed as free states came to a tragic end as a result of the heinous Molotov-Ribbentrop Pact of 1939. As a result of that agreement, Poland was divided between Germany and the Soviet Union, while Estonia, Latvia, and Lithuania were condemned to the Soviet rule that controls them to this day.

The Soviet ruling elite should take note that while it maintains political control over Estonia, it will never be able to obliterate the strong national traditions held by the people who live there. In spite of Soviet domination, the Estonian people continue to hold onto their cultural heritage. They have never given up the hope that someday they will once again be able to raise the Estonian national flag in a declaration of freedom from Russian rule.

The stirrings of that new independence are being expressed in Estonia today. The Polish Solidarity movement has had a strong influence on Estonian workers. In September 1980, Estonian dissidents sent a message of support to Solidarity leader Lech Walesa, and 1 month later, a strike took place at an Estonian tractor plant.

It has recently been reported in the press that Estonian workers are attempting to organize a countrywide half-hour strike every month in support of Solidarity. It has also been reported that Soviet authorities have detained 150 Estonians for attempting to organize that work stoppage.

All Americans should give their strongest support to this stirring of human rights activism in Estonia. The events in Poland have set off a chain of events that hopefully will culminate in a new burst of freedom for the Soviet-occupied Baltic republics.

Mr. Speaker, as a member of House Ad Hoc Committee on the Baltic States, I urge my colleagues to support the efforts of the Estonian human rights movement.●

SOVIET WATCH

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. FIELDS. Mr. Speaker, in 1935 the noted historian, Will Durant, wrote.

> For barbarism is always around civilization, amid it and beneath it, ready to engulf it . . . Barbarism is like the jungle; it never admits its defeat; it waits patiently for centuries to recover the territory it has lost.

In all the history chronicled in Durant's monumental, 11-volume work, "The Story of Civilization," in no place or time has this statement been

more true than in the history of the Soviet Union and its client states.

As E. J. Dillion observed in 1930:

Sovietism is no mere philosophy content to assert itself or even endoctrinate others by convincing, persuading, or cajoling them . . . (it is) first of all a relentless destroyer of the roots of past culture, religious, social, pedagogical, and also of those champions of that culture who remain true to it, refusing to be converted and live.

So it is that the leadership of the Soviet Union, from Lenin to Andropov, have been men of unrestrained brutality who have progressively, patiently, driven back the boundaries of civilization, both Western and Eastern, with a relentless sword of blood and horror, allowing the jungle of barbarism to reclaim the earth, masked by mendacity, propaganda, and the kindly face of socialism.

The following material is presented as another evidence.

YELLOW RAIN AND RED WARS

(By Charles Martin)

Have the Soviet Union and its allies been waging chemical and biological warfare against civilians in Indochina, Afghanistan, and Ethiopia? Convinced by eyewitness reports and a growing volume of circumstantial evidence, American officials have long believed—and occasionally have charged—that the answer is yes. Late in November, the United States presented the strongest documentation yet to support its case. The State Department disclosed that it had obtained two gas masks used by Soviet forces in Afghanistan that were contaminated with potent fungal poisons—the active ingredients of a weapon that has come to be known as yellow rain.

The clear implication, the State Department said, is that Soviet troops were wearing the masks while directing poison spray against Afghan victims. The report cited the testimony of Soviet, Laotian, and Vietnamese defectors, accounts by refugees arriving in Thailand and Pakistan, blood and urine samples from apparent victims, and other evidence.

Pressing its attack, the U.S. charged in December that Soviet-backed government forces in Ethiopia appeared to be employing deadly nerve gas in their campaign against Eritrean insurgents. In fact, the State Department says, the Soviet bloc is also using cyanide, phosgine oxine, chlorpierin, and "unidentified agents" in military operations around the world.

The Soviets have indignantly denied any involvement in chemical or biological warfare, which is forbidden by international law. The 1925 Geneva Protocol bans first use of chemical weapons, and the 1972 United Nations Convention prohibits even the possession of biological weapons; the U.S. and the U.S.S.R., Afghanistan, and most other countries have signed both agreements. But the Soviets are quick to point out that it was the United States that used Agent Orange, a toxic defoliant, during war in Vietnam. Not only does the Reagan administration hope to even the propaganda score, say the Soviets, but it is also trying to gain support for a proposal to resume production of chemical and biological weapons after a ten-year halt.

The U.S. is not alone in its accusations. The Canadian government, conducting its own investigation, concluded in August that "chemical and biological agents are being used in Southeast Asia." A group of United Nations experts although they came to no conclusion, acknowledged in November that it "could not disregard the circumstantial evidence suggestive of possible use of some sort of toxic chemical substance in some instances." France was impressed enough by that evidence to urge the creation of a permanent United Nations panel of experts to investigate charges of biological or chemical of biological or chemical attacks as they occur.

Proving Soviet guilt has been difficult, partly because the exotic and poorly understood poisons involved are often present in small quantities in nature. The quest for proof began in 1976, after reports of chemical attacks in Laos against the Hmong, a hill tribe supported by the CIA during the war in Indochina. The Hmong have continued to oppose the communist forces that sized power in Laos in 1975, and the Vientiane government has apparently used chemical warfare in an effort to crush them. Journalist, refugee workers, and diplomats heard tales from Hmong refugees describing a variety of horrors. These usually involved the release of colored gases—white, blue, green, red, or yellow—from low-flying helicopters and airplanes. Sometimes the material dropped was sticky, and smelled like comphor or rotten meat; at other times it was dry, and had the odor of "rubbed bamboo sticks" or burning peppers. The Hmong called the vapors "medicine that fell from the sky" or "yellow rain."

The symptoms described by victims covered the gamut of medical complaints, and defied diagnosis. What, doctors asked, could cause bloody diarrhea, nausea, shortness of breath, a drop in the white blood cell count, dizziness, convulsions, and skin disease, all at the same time?

At first, the strange stories of the sick Hmong were largely discounted as just another form of anti-communist propaganda. But the Hmong kept straggling into refugee camps in neighboring Thailand, repeating their tales: yellow rain dropped on villages by aircraft had infected people, domestic animals, and vegetation. Seeking to document cases, two men attached to the U.S. embassy in Bangkok, Ed McWilliams and Lieutenant Colonel Charles Dennision Lane, began persuading the Hmong to bring samples of the mysterious yellow rain out of Laos.

Toward the end of 1980 the two men approached Dr. Amos Townsend, the International Rescue Committee's medical coordinator, who was working with Laotian refugees in northeastern Thailand, and asked him to help document chemical warfare cases. (The IRC is a privately financed relief organization.) Townsend agreed to cooperate. He prowled the border areas, collecting samples of dust-covered leaves from the local Thai police, camp leaders, and the refuges themselves. "Usually the refugees gave whatever samples they brought out to the Thai border police," Townsend told DISCOVER's Victoria Butler, "and the border policemen tended to put the samples in their desk drawers and forget about them. If it sounds like a highly amateurish affair, it was."

In 1981, while Townsend continued to gather samples of leaves from Laos, the first concrete evidence of chemical attacks elsewhere on the Indochina peninsula turned up. Khmer Rouge guerrillas, who was Thailand as a sanctuary from attacks by the Vietnamese forces occupying Cambodia, gave U.S. government officials a contaminated leaf and a contaminated twig collected after what was apparently a gas attack. The material was promptly forwarded to the Chemical Systems Laboratories at Edgewood Arsenal in Maryland.

Around the same time, the Army Surgeon General's Office assigned Sharon Watson, a toxicologist with the Army Medical Intelligence and Information Agency, to oversee the analysis of all yellow rain samples. Watson was an expert in mycotoxins—fungal poisons sometimes found in nature, which are dangerous to both human beings and livestock. She began to wonder whether yellow rain might have something to do with these little-known poisons.

After reviewing the scientific literature, reading transcripts of interviews with witnesses and victims in Southeast Asia, and studying new reports from Afghanistan, Watson decided she was on the right track. The medical symptoms matched those known to result from eating grain infected with a fungus belonging to the genus Fusarium. This fungus grows and feeds on a number of edible plants, and it produces mycotoxins as by-products. One of the most dangerous groups of mycotoxins is known as trichothecenes, which have been identified as the cause of epidemic poisonings around the time of World War I in regions of the Soviet Union where poor rural families had eaten infected grain products. As a result of these outbreaks, Soviet scientists were the first to begin organized research into the effects of trichothecenes on human beings.

Watson enlisted the assistance of Chester Mirocha, a plant pathologist at the University of Minnesota, to study the yellow rain theory. Mirocha, a specialist in mycotoxins, had examined a crude mixture of Fusarium toxins from the Soviet Union during the early 1970's, and had found high concentrations of a particularly deadly trichothecene called T-2 toxin. At Watson's request, Mirocha analyzed the samples from Cambodia, unaware of their origin or nature. Using a computerized gas chromatograph and mass spectrometer, he found three trichothecene mycotoxins in the samples: T-2 toxin, deoxynivalenol, and diacetoxyscirpenol. In the spring of 1981, when Army scientists at Edgewood Arsenal tested three additional samples—one from Cambodia and two from Laos—they detected two of the three toxins that Mirocha had found in his samples. These results led to an announcement by Secretary of State Alexander Haig in September 1981 that the United States had obtained physical evidence that lethal mycotoxins were being used as weapons in Southeast Asia.

As Mirocha analyzed urine, blood, and tissue samples collected by Townsend from victims of yellow rain attacks in Thailand, evidence (mycotoxins in greater amounts than occur in nature) continued to accumulate. Tests also revealed an abnormally low level of white blood cells in some of the victims, a condition that seemed to persist for several weeks after exposure to the toxins. On the strength of this and other evidence, the State Department issued a report last March formally charging the Soviet bloc with waging biological and chemical warfare.

Many scientists, both in the United States and abroad, are withholding judgment on the American charges until all phases of the investigation have been reviewed by other researchers. Skeptics among them have been particularly concerned about the authenticity of samples. They charge that one sample cited by the State Department as

evidence, for example, was supplied by a correspondent representing Soldier of Fortune magazine, known for its strong anti-communist stance.

One critic of the State Department study was Matthew Meselson, a biochemist at Harvard and an authority on biological weapons. "My point is not that trichothecenes can't be in use," he said after the March report, "but that there are some very serious questions about the adequacy of the evidence." Among the concerns raised by Meselson: lack of reliable sampling and control methods; uncertainty as to what constitutes a lethal dose of the toxin; and the government's use of what he considered inconclusive evidence to support sweeping conclusions.

Even in light of the evidence in the State Department's November report, Meselson remains unconvinced. He does not challenge the honesty of the scientists who have analyzed and evaluated samples, but insists that too many questions remain unanswered about the authenticity of the samples.

To counter such skepticism, American authorities have refined the methods by which samples are collected, preserved, and analyzed, and now have answers for some of the objections raised by critics. For instance, Meselson and others had found discrepancies between the accounts of survivors of yellow rain attacks and the effects of trichothecene poisons observed in animal experiments. Refugees claimed that exposure to yellow rain sometimes caused hemorrhaging and death within minutes, although no such rapid effects had been observed in laboratory animals.

State Department experts now believe that they have discovered a synergistic effect between trichothecene poisons and another class of fungal poisons, called aflatoxins. Used together, they bring on much more rapid symptoms of poisoning than when used separately, and just such a combination was detected in some samples collected recently. In Southeast Asia, Soviet-backed forces are supposed to be using a lethal mixture of trichothecenes, aflatoxins, pollen and binding agents, and other materials that permit use of the poison as either a wet spray or a dry powder.

Important questions about fungal poisons remain unanswered. American scientists say they are uncertain about the mechanisms by which these poisons attack the body, and know little of their long-term effects. Still, the State Department appears to have gone a long way toward making its case with disinterested scientists.

Says Eugene Smalley, a plant pathologist at the University of Wisconsin and a member of the National Academy of Sciences committee evaluating the Army's technological defenses against mycotoxins, "There is an impressive amount of documentation, and although much of it is circumstantial. I don't have grave doubts that something like this [chemical and biological warfare by Soviet-backed forces] is going on."

There will probably be no quick settlement of the yellow rain controversy, but the charges against Moscow and its allies have become vastly harder to refute.●

H.R. 1690, THE FEDERAL FIREFIGHTERS' SALARY ACT OF 1983

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. LELAND. Mr. Speaker, today, I am introducing legislation which addresses and seeks to remedy the inequitable and inconsistent treatment Federal firefighters receive under current pay practices.

The present compensation scheme for Federal firefighters includes three basic elements—base pay, premium pay, and overtime pay. Base pay is compensation under the General Schedule; premium pay, of up to a maximum of 25 percent of base pay for a 72-hour workweek, is paid for the long and irregular hours Federal firefighters work; and overtime pay is provided for all hours worked in excess of 54 per week.

This complicated formula has resulted in a number of inequities and inconsistencies, demonstrating the inappropriateness of the General Schedule for compensating Federal firefighters. The General Schedule was designed to cover the wide range of employees and occupations making up the majority of the Federal work force. While premium and overtime pay provisions seek to recognize the unique nature of firefighting as compared to other occupations falling under the General Schedule, the current pay scheme does not allow for an appropriate classification of Federal firefighters which reflects the actual level of duties, responsibilities, and skills involved in the performance of duty. In fact, it has ignored the increasing difficulty, responsibility, and hazards with which the Federal firefighter is continually being confronted, as the state-of-the-art advances in aircraft, weapons, and building construction, in rescue procedures, and as hazardous materials have become more and more abundant and their handling more technical.

In spite of current premium and overtime pay provisions, the average Federal firefighter works a 72-hour workweek, for which he receives approximately the same pay as most municipal firefighters receive for an average 54-hour week. The glaring inequity of these long hours and relatively low wages as compared to municipal firefighters threaten morale and has led to difficulties in retaining high quality personnel, with many firefighters leaving the Federal service to work for municipal fire departments.

The computation of overtime pay under the current pay scheme has also been a source of serious discontent. While the Fair Labor Standards Act extended special overtime provisions to all fire and police personnel, mandating the payment of overtime for all hours in excess of 54 hours per week, Federal firefighters working 72 hours per week receive only one-half time, not time and one-half, for each of the 18 hours of overtime they are required to work.

In addition, the current pay scheme has had a severe negative impact on the career development of Federal firefighters. The problem arises due to a reluctance on the part of qualified personnel to move into positions involving promotion and increased responsibilities but, because of a shorter workweek and parallel reductions in the rate of premium pay and in overtime pay, offers less take-home pay as a result.

For example, an assistant chief, who is ruled to be "exempt" under the FLSA, gets paid at a lower rate than a crew chief, who is two grades lower and subordinate to him. Similarly, the fire chief, who is a program manager and administrator and, therefore, must work a tour of duty more nearly coinciding with the work hours of other managers at a particular facility, makes considerably less than the assistant chief. As a result of these pay practices, it is becoming more and more difficult to get employees to accept "promotions" to more responsible jobs, since they must take substantial cuts in pay to do so.

For the above reasons, I am introducing legislation today that removes Federal firefighers from the General Schedule classification and pay system and establishes a separate pay system which is designed to deal with, and eliminate, the inequities and inconsistencies of current compensation schemes. This separate pay schedule brings Federal firefighter salaries in line with the vast majority of the profession and provides a realistic classification system that accurately reflects the nature and level of duties performed at every level of the Federal fire service.

In addition, by providing compensation levels that include payment for their long and irregular hours and the hazardous nature of firefighting, this bill disposes of the need for premium and overtime pay calculations and eliminates the problems and inequities that have resulted from these pay practices.

I believe that this discussion of the issues involved supports the argument that Federal firefighters are treated unfairly by the Federal Government in terms of pay and classification. I ask that Congress lend its support to this legislation, so that the current inequities might finally be remedied.●

ALLOW MARTA CONSTRUCTION TO GO FORWARD

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1983

● Mr. LEVITAS. Mr. Speaker, my colleague, Mr. GINGRICH and I introduced the bill, H.R. 1572, to repeal section 311 of the Surface Transportation Act because there is no longer a need for that provision in the Federal law.

Section 311 of the Surface Transportation Act requires that if the Metropolitan Atlanta Rapid Transit Authoriaty (MARTA) is to receive Federal assistance for the construction of its north-south lines, certain construction priorities must stay in place. These priorities were set to assure that construction of the line in one direction would not take precedence over construction in the other direction, and the amendment to the Surface Transportation Act sought to maintain these priorities. We know that due to budget constraints, any progress on construction of the MARTA system under these priorities would have been difficult to achieve. I was also concerned that under the existing priority requirements, as interpreted by the MARTA board chairman, the next phase of construction could go south rather than north thereby further delaying the benefits to the patient taxpayers in DeKalb County in the Chamblee and Doraville areas. Accordingly, I felt it was important the leaders in the Georgia General Assembly and the local community leaders of the metropolitan area get together and seek a solution to this dilemma. Such a meeting took place on February 11, 1983.

In an admirable display of statesmanship and cooperation, the officials at all levels of government, in the counties, cities, and congressional districts directly involved in this matter, sat down and worked out a compromise which will allow construction of the MARTA lines to go forward. Parochial considerations were put aside as the representatives of the areas served by the north-south lines came together and worked out an agreement which serves the needs of each community adequately and fairly. The diplomatic spirit which guided this group of officials produced an agreement which serves the interests of the entire metopolitan area, and incidentally will assure that the MARTA line will be deeper into DeKalb County at an earlier time than might otherwise have occurred. These leaders truly had the best interests of their constituents and the greater community at heart in reaching this compromise.

DeKalb County, which is in my district, will fare well under this compromise. Under the old north-south formula for constructing the lines in equal priorities, construction of the line to Chamblee would have actually been delayed. The chairman of the MARTA board of directors had said that the Brookhaven line would be completed first and then the East Point line would be built. After that, they would have had to make a decision as to whether or not to go to College Park or to Chamblee next as there was not enough money to do design and construction on both. Under the compromise reached, the Brookhaven and East Point legs would be completed next, with the Chamblee station thereafter, followed by the airport leg and then the Doraville station. The compromise will serve DeKalb well. The plan also will serve the airport and the community of airport users well.

At this point, I would like to place in the RECORD an article from the Atlanta Journal of February 16, 1983, which discusses the benefits of this compromise.

MARTA'S CART BEFORE HORSE

Rep. Elliott Levitas is to be commended for trying to resolve MARTA's construction impasse—a legal mandate that it build the North-South line in equal parts.

Levitas knows well the plain truth that in a simultaneous construction plan the money would run out before the rapid rail reached Doraville on the north or Hartsfield International Airport on the south.

To bring some sense to that, the construction schedule must be changed by an act of the General Assembly. Atlanta and Fulton and DeKalb County leaders must decide whether north or south will come first.

But the discussion is academic.

MARTA now has the money to build to its Brookhaven and Lakewood stations by next year. The transit agency anticipates having the money from its share of the federal gasoline tax increase to build to East Point on the south by 1986.

Stations and service for Chamblee and Doraville and College Park and the airport remain only plans without funds.

We have recommended just the segmented construction approach that Levitas is espousing. Rapid rail service would be extended north to Chamblee first, then to the airport and finally to Doraville.

It makes sense because Chamblee will serve the northern reaches of DeKalb County, an area slighted by MARTA's timetable. It will also relieve the pressure on the station in residential Brookhaven as a terminal.

Then can come the important airport link and eventually Doraville, which will also serve Gwinnett County. Residents there aren't paying the MARTA sales tax.

But even if every MARTA rider and supporter agreed to the construction schedule, the money isn't there. We hope Levitas continues his efforts for federal funds and presses state legislators to extend the MARTA sales tax and search for new construction funds.

Blueprints won't get riders from the airport, Chamblee or Doraville.

All of the local officials, State senators and House members, and Members of Congress involved in this matter endorsed the compromise plan. It is a good plan which will allow the lines to stretch into the northern portions of DeKalb County at an earlier date as well as allowing the lines to reach the airport at an earlier date. In order to let the Georgia General Assembly implement the compromise, section 311 needs be repealed because its purpose has been served.

I would like to thank and commend all of those who took part in this effort and who worked with us to reach this compromise.●

SOCIAL SECURITY ACT AMENDMENTS OF 1983

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. ROSTENKOWSKI. Mr. Speaker, on Tuesday, March 1, the Committee on Ways and Means will begin consideration of the Social Security Act Amendments of 1983. Because of the importance of this major legislation, it is anticipated that when this bill is reported by the committee, we will be asking the leadership to schedule it for floor consideration at the earliest opportunity. As a result, in accordance with the rules of the Democratic Caucus, I take this time to inform my colleagues that it will be the intention of the committee to request less than an open rule on this matter.●

BLACK HISTORY MONTH—RECOUNTING THE TRUE HISTORY OF AMERICA

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. PATTERSON. Mr. Speaker, February is Black History Month. We have so designated this month in order that all Americans might take the time to learn more about the history of a group of Americans who much too often have been forgotten in the recounting of American history.

Black Americans, enslaved and free, were among the very first American citizens. Although their history is full of tragic accounts of injustice suffered by persons oppressed by slavery and institutionalized racism, it is also the history of a people who have relentlessly struggled to make this Nation live up to its creed "* * * with liberty and justice for all." Their stories are those of heroism, courage, and perseverance.

During Black History Month in my home district, several commemorative events are scheduled. Organizations such as the Orange Black Historical Commission, the Inter-Cultural Com-

mittee for the Performing Arts, the Interested Citizens of Santa Ana, The Orange County Links, the Alpha Kappa Alpha Sorority, and the Park and Recreation Department of the city of Santa Ana are sponsoring black history programs in an effort to educate the public and recognize the many contributions made by outstanding black members of the community.

Among the activities scheduled is a fund-raising event designed to gather funds necessary to establish a scholarship in memory of one of Orange County's most outstanding black women and a personal friend of mine, Mrs. Lilly King. We lost Lilly this past fall to a fatal bout with cancer, but she will be remembered as an exceptional human being who gave unselfishly of her time and talents so that others in the community might enjoy a more enriching human experience. As coordinator of the Santa Ana Corbin Community Center for several years, Lilly King's work touched the lives of many. She was an active member of several boards, councils, and interested groups, including my own minority advisory council. She was also particularly concerned about the future of young people, especially black youngsters, and she was a most devoted and loving wife and mother.

While I cannot begin to note the long list of achievements and contributions Lilly made during her lifetime, let it suffice to say that she was truly an extraordinary individual who set an example not only for those of us who knew her, but also those who will undoubtedly learn about her in the future; and I am so thankful to have had her counsel and friendship.

As the month of February unfolds I urge my colleagues to join me in recognition of our black forefathers and mothers. By acknowledging the history of black Americans, we embrace the true breadth of American history.●

BLIND TRUST FOR PAC'S

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. COURTER. Mr. Speaker, we are all aware of the growing cries for campaign financing reform, resulting from the fact that the 1982 midterm elections were the costliest in history. While the mounting price of running for office can be attributed to a number of factors—inflation, more sophisticated campaign techniques, the increase in individual contributions, and so forth—it is widely asserted that the proliferation of PAC's is the primary force behind rising campaign expenditures. This popular notion, reinforced through the media, has caused our constitutents to assume that PAC's enjoy an inordinate level of influence in the House and Senate.

It has become evident to me that the average American believes that PAC money is dramatically transforming the Federal legislature. I personally believe this is a gross misperception. PAC's are not necessarily evil. PAC's, in and of themselves, can be an effective way for individuals to amplify their participation in the democratic process. Furthermore, I am confident that the tremendous majority of contributions donated by these special interest organizations come with no strings attached. Nevertheless, there is an overwhelming apprehension that the political quid pro quo is the norm; and, consequently, the public believes PAC's control the actions of Congress and influence the votes of its Members.

The problem with PAC money is not simply that there is too much of it, or that it is unrepresentative of the general will. Instead, the problem is people perceive that PAC money is buying our votes. The seriousness of this charge cannot be overstated.

We must eliminate that single factor which permits the perception that Members of Congress can be influenced $10 worth or $10,000 worth. We must eliminate the opportunity for a quid pro quo. Therefore, I have introduced legislation which would create a blind trust instrument for distributing PAC contributions to candidates for Congress. According to this proposal, the FEC would be the funnel agent for all PAC contributions and would set up individual accounts for each candidate for the House and Senate. PAC's would be instructed to send their contributions to the FEC, which, in turn, would distribute these funds to the designated candidates in a timely manner. This mechanism would preserve the important right of PAC's to support a candidate with whom they are in general philosophical agreement. However, my bill would prohibit PAC's, the FEC, or any individual from disclosing the dollar amount of PAC contributions, thereby eliminating the grounds for concern that PAC's can unduly influence the decisions of elected officials.

Although my legislation would not permit specific dollar amounts of contributions to be made public, the right of PAC's to express their support for a candidate and the need for the candidate to be cognizant of those groups which are endorsing his platform should be upheld. For this reason, a provision has been included which mandates public disclosure of the specific PAC's which have given financial support to each candidate for Congress. This public disclosures would also include the aggregate amount of PAC contributions to a given candidate and the aggregate amount of money each PAC has given to all congressional candidates.

As penalties for abuses of the Federal election campaign laws are traditionally determined by the FEC, this legislation contains no specific fines for illegal disclosures of PAC contributions. However, it is intended that disclosures of dollar amounts of contributions would be considered criminal action. While some may charge that it would be impossible to stop a PAC representative from subtly indicating to a candidate that he or she can expect a large "donation" in return for certain action, I submit that, in the wake of Abscam and the general paranoia surrounding this scandal, candidates would be loath to take part in such a blatant disregard for the law. Furthermore, in view of the fact that candidates would be prohibited from viewing the financial records of PAC's, the candidate would inevitably doubt the veracity of any hint that he or she was receiving a substantial contribution from a given PAC.

To date, most efforts to address the need for campaign financing reform have missed the real issue: the perceived pressure applied to Federal legislators on each and every vote. Public disclosure of political contributions, the most widely accepted means of deterring corruption, has indirectly served to heighten public skepticism, while suggestions to limit the percentage or aggregate amount of PAC contributions to candidates further limit the scope of participation in congressional elections, and do nothing to eliminate the candidate's ability to connect specific PAC contributions with their sources. And finally, although the public financing initiative has been endorsed by well-meaning groups and individuals, this effort to "sanitize" the entire campaign process would present numerous difficulties. In particular, it would stifle free expression.

We must erase the opportunity for suspicion that every vote comes with its own price tag, and I am confident that a "blind trust" for PAC contributions would do just that. I submit my proposal as a good faith effort to maintain the intergrity of our political system, and I sincerely hope my colleagues in the House and Senate will join with me in support of its passage.●

A LOOK AT THE REAGAN BUDGET

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. HOYER. Mr. Speaker, the budget delivered to the Congress by the administration exposes the contra-

diction and cruel irony of the President's campaign last year to enact a constitutional amendment to balance the budget.

The 1984 Reagan budget projects next year's deficit at a level eight times the size of Richard Nixon's largest deficit. It anticipates a 1984 deficit almost three times the size of Gerald Ford's largest deficit. And it projects a deficit in 1984 that is almost 3½ times the size of Jimmy Carter's largest deficit. In short, Ronald Reagan is the only President—Democrat or Republican—who has had the courage to sponsor the drive for a constitutionally mandated balanced budget at the same time he was sponsoring the largest deficits in the history of the Republic. It is almost as if the administration were asking Congress and the American people for protection from itself.

The administration has no one to blame for these deficits but itself. It has no one to blame for the Government's debt frustrating private investment but itself. It has no one to blame for the debilitating rate of unemployment but itself. The administration has chosen a set of priorities that have robbed the middle class of education benefits, targeted tax breaks to the wealthy, and funded a defense program at levels that are unreasonable in light of our fiscal condition.

The administration's budget, like all budgets, reveals something about its crafters. This budget is not a thrifty budget—it is the most expensive in history. This budget does not result in a balanced budget as we were promised during the 1980 Presidential campaign; instead, it offers us unprecedented deficits. This budget does not deal with unemployment; instead, it places highly accelerated defense spending over the needs of the jobless.

The administration has characterized Democrats as the party that taxes and taxes and spends and spends. I would counter, Mr. Speaker, that this administration has given us the largest tax increase in history, the largest budget in history, the largest deficits in history, and the highest interest rates, and the highest unemployment rate in five decades.

If budgets tell you something about an administration and its priorities, this document, Mr. Speaker, says it all.●

YOUR GIFT COULD SAVE A LIFE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. OTTINGER. Mr. Speaker, I am pleased to bring to the attention of my colleagues a most important and worthwhile event.

Tuesday, March 1, the National Kidney Foundation will kick off the "National Organ Donor Awareness Week," designed to increase the public's awareness of the importance of organ donation.

Members of Congress and their staffs are invited to participate in this campaign, on March 1, by joining in the scheduled signing ceremony from noon to 3 p.m. in room H-128 of the Capitol.

This session provides Members and their staffs with the opportunity to publically sign an organ donor card. Art Buchwald and Pat Paulsen will be on hand to act as the necessary witnesses.

The organ donor card has been legally recognized in all States since the passage of the Uniform Anatomical Gift Act of 1968. Signing this card gives one a chance to provide the gift of life to another by donating one's organs after death.

Dramatic improvements in surgical techniques and vastly improved immunosuppressive drug therapy have radically altered the potential for successful transplantation and survival of many human organs from unrelated donors. Among these are procedures for transplant of kidney, cornea, liver, heart, and combined heart/lung.

While there are 4,500 kidney transplants annually, another 10,000 Americans cannot receive one because of a lack of suitable organs.

In addition, these recent medical advances have uncovered profound deficiencies in our present system of organ procurement.

An immediate opportunity for congressional action to remedy this lack of organs is to complete the uniform donor card provided by the National Kidney Foundation.

Further problems and solutions will be examined in hearings held April 13 and 14 by the Subcommittee on Investigations and Oversight, chaired by Representative ALBERT GORE, JR.

In the meantime, we look forward to seeing you on March 1.●

THE 65TH ANNIVERSARY OF THE DECLARATION OF INDEPENDENCE OF THE REPUBLIC OF ESTONIA

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. LENT. Mr. Speaker, I would like to take this opportunity to call to the attention of my colleagues the 65th anniversary of the Declaration of Independence for the Republic of Estonia. This most important event in world history climaxed years of struggle for freedom on the part of the Estonian people. For only two brief decades, between 1920 and 1940, the Republic of Estonia grew and flourished, enjoying the fruits of independence and freedom we all take so much for granted.

However, in 1940, this peace was shattered with brutal and unrelenting force when, as it has done so often, Communist Russia violated its own peace treaties and conquered Estonia and its Baltic neighbors, Latvia and Lithuania. For nearly 43 years, the Estonian people have been severely persecuted and oppressed by the Soviet Union. They have been denied the basic human rights stipulated in the Helsinki Final Act, signed by the hypocritical leadership of the Soviet Union nearly 8 years ago. Despite these violations, the courageous and proud Estonians have contained their heroic struggle against the dark and fearsome powers of the Kremlin.

My colleagues, we must not forget the cries of millions of tortured, oppressed peoples and must continue to press for that day when the Estonians will again breathe the fresh air of freedom, liberated from the depths of the dank dungeons of the Soviet geopolitical machine.

Mr. Speaker, as we observe this 65th anniversary of Estonia's independence, let us remember that the United States stands as a beacon of hope to not only Estonians, but to millions of people across the globe who are oppressed by the cruel leaders in the Kremlin. As a bulwark of democracy, the United States has the honor and responsibility to champion the cause of freedom worldwide so that freedom and self-determination may once again come to the courageous people of Estonia and the other captive nations on this Earth.●

TRIBUTE TO MS. MILLIE DANIELS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. SKELTON. Mr. Speaker, I take this time to recognize and honor Ms. Millie Daniels, who, for the past 33 years, has worked for the Department of the Army. Ms. Daniels, who is originally from Missouri, has made a significant contribution to the morale and welfare of countless soldiers and airmen since before the Korean war, to the present, in her duties in the Recreation Services of the Army. In the past few years Ms. Daniels has been working in Korea and has been an extraordinary good will ambassador from the American people to the Korean people. Through her work, she has made American service men and women feel more at ease while stationed so far from home. Ms. Daniels'

long years of dedicated service provide us with a model that all people can look to and attempt to emulate in their own lives.●

THE PEOPLE'S PARADISE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every continent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human suffering and tragedy than any idea or practice in history, there are those who stubbornly cling to its high-minded idealism. They religiously close up their eyes to the reality that the socialist promise of instant utopia brings only the tyranny of a real dystopia.

It is for them that the following glimpse of reality is provided.

[From Human Events, Nov. 20, 1982]

FOR THE AVERAGE RUSSIAN CITIZEN: LONG LINES, FEW GOODS, AND AN INCREASINGLY BLEAK LIFE

(By Allan Brownfeld)

Moscow.—Visiting the Soviet Union is a sobering experience. It is one thing to review statistics about declining Soviet grain production and to read reports about the shortage of even the most basic necessities of life, and quite another to walk the streets of Moscow and other Russian cities and observe the life of average citizens of the USSR.

For those Russians who are not part of the Communist elite, life is increasingly bleak. This writer visited department stores, food and clothing shops in Moscow, Leningrad and Kiev. In all of them, lines were long and goods were few.

In a meat shop on Gorky Street, Moscow's equivalent of Fifth Avenue, I observed what almost developed into a brawl, as customers fought over the one remaining chicken. The line was 20 deep, and many who had waited for at least an hour or more arrived at the counter only to find that nothing was left to purchase. In a vegetable shop in Kiev on a sunny Sunday afternoon, 12 people waited in line with shopping bags. The only things available were potatoes, cabbages and cucumbers.

At the famous GUM department store, across from the Kremlin and Red Square, long lines were to be found on weekday evenings at 9 p.m. for such basic items as socks, underwear and toothpaste. Shopping for the basic necessities of life occupies much of the non-working time of Russians.

Hedrick Smith, former New York Times correspondent in Moscow, notes, "The accepted norm is that the Soviet woman daily spends two hours in line, seven days a week, going through double the gauntlet that the American housewife undergoes at her supermarket once, maybe twice a week.

"I noted in the Soviet press that Russians spend 30 billion man-hours in line annually just to make purchases. That does not count several billion more man-hours expended waiting in tailor shops, barbershops, post offices, savings banks, dry cleaners and various receiving points, for turning in empty bottles and so on. But 30 billion man-hours alone is enough to keep 15 million workers busy year-round on a 40-hour week.

"Personally, I have known of people who stood in line 90 minutes to buy four pineapples, three hours for a two-minute roller-coaster ride, three and a half hours to buy three large heads of cabbage, only to find the cabbages were gone as they approached the front of the line, 18 hours to sign up to purchase a rug at some later date. . . . Lines can run from a few yards to half a block to nearly a mile. . . . The instinctive reaction of a Russian woman when she sees a queue forming is to get in line immediately—even before she knows what is being sold."

The group of journalists with whom I was traveling stayed in new, modern hotels which were constructed for the Russians by Swedes and Finns for the 1980 Olympics. We were provided with the best available food, although, even for foreign visitors, the Russians were unable to provide fruit of any kind—much less orange or grapefruit juice.

The bars appeared to be well stocked, yet we were told on at least three occasions that as early as 10 p.m., "we are out of beer for tonight." Anyone who wanted a second cup of coffee with dinner was charged an additional fee. We were told that coffee was a scarce and valuable commodity in the Soviet Union. Our privileged life was meant to be as separated as possible from average Soviet citizens. Guards stood at the doors of the hotel to keep Russians out.

While the Soviet Union has devoted its funds and energy to building the world's most powerful military machine, its domestic economy is in a state of growing disarray. No place is this more apparent than in the agricultural sector.

Almost a quarter of Soviet workers are in agriculture, yet they still cannot feed the country. By contrast, only 3 per cent of the American labor force is engaged in farming and produces vast surpluses. Each U.S. farm worker feeds 60 Americans; each Soviet farmer feeds only eight Russians. In fact, no country has ever dominated world grain trade as the United States does today. Its 55 per cent share of world grain exports in 1981 easily overshadows Saudi Arabia's 32 per cent share of world oil exports.

This year, because of its own failed system of collective farms, the Soviet Union will attempt to import 46 million tons of grain—more than any other country in history. As a result, one-fourth of all the grain for Soviet human and livestock consumption will come from abroad, according to a study by the Worldwatch Institute. Over one-half of this imported grain will come from North America, most of it from the United States. In this sense, we continue to bail out Moscow's failed agricultural system and permit its massive expenditures for defense.

While communism may have made the Soviet Union a military success, it remains clearly an economic failure. The average Russian has one of the lowest standards of living in the industrial world. As Nicholas Daniloff, the Moscow correspondent of U.S. News & World Report, points out, "The fact that the Soviet economy is an economy of scarcity is underlined by long lines at stores, black marketeering, bribe-giving and bribe-taking—and the government's harsh new campaign to stamp out speculation and corruption."

The only bright spot in Soviet agriculture is the small island of free enterprise represented by the tiny private plots that workers on collective and state farms are allowed to cultivate—occupying less than 2 per cent of the farmland, but producing one-third of the total meat and vegetable output.

Westerners resident in Moscow report that the people seem to have lost whatever incentive they had to work—not only in agriculture, but throughout the Soviet economy. The incentive of private gain has been banned and the ideological exhortations to avoid waste and work harder no longer have much effect.

Soviet officials are now admitting their concern. Radio Moscow, for example, recently compared the Tolyatti plant, built by Fiat on the Volga River, and the Daimler-Benz plant in West Germany. The broadcast complained that Soviet output lags far behind in quality and quantity because of chronic absenteeism and tea breaks.

It is the Soviet elite, however, which pursues the profit motive to ever greater heights. While Communist ideology speaks of a "classless" society—and a state designed to serve the "worker," it is the governing elite which is largely served. They do not wait in long lines for meager goods. Instead, the elite groups shop in separate stores, deliberately unmarked to avoid attention and accessible only with a special pass.

"These stores," Hedrick Smith points out, "insulate the Soviet aristocracy from chronic shortages, endless waiting in line, rude service and other daily harassments that plague ordinary citizens. Here, the politically anointed can obtain rare Russian delicacies like caviar, smoked salmon, the best canned sturgeon, export brands of vodka or unusual vintages of Georgian or Moldavian wines, choice meat, fresh fruit and vegetables in winter that are rarely available elsewhere. . . . Certain stores also provide the elite with foreign goods the proletariat never lays eyes on. . . .

"Supreme leaders of the Communist party get the kremlevsky payok, the Kremlin ration—enough food to feed their families luxuriously every month—free. By contrast, an ordinary urban family of four might spend 180-200 rubles a month, easily half its income on food."

Western Marxists who view the U.S.S.R. as a model for their own societies should come here for a visit. They would be quickly disabused of their romantic notions and would discover that the myth and the reality are radically different.

A SALUTE TO U.S. ENGINEERS

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. BROWN of California. Mr. Speaker, the national progress and economic health of the United States are directly linked to technological and industrial innovations. Engineers foster the innovation process by taking scientific knowledge and converting it into the design of products and processes. All of us share in the economic, environmental, and social benefits. Therefore, I would like to take this opportunity to remind my

colleagues to honor engineers this week, February 20-26, 1983, National Engineers Week.

Engineers make an important contribution to our society, because our economic leadership has resulted in large part from our lead in technological and industrial innovations. New technologies will help to revitalize our economy by making basic industries competitive and by expanding opportunities in high-technology growth industries. One of the keys to our future success will be the dedication and creativity of engineers.

The following articles salute U.S. ingenuity by naming the outstanding engineering achievements of 1982 and by honoring the 1983 inductees into the National Inventors Hall of Fame.

[From the Engineering Times, February 1983; National Society of Professional Engineers (NSPE)]

WINNERS INCLUDE BRIDGES, AIRCRAFT—NSPE SALUTES U.S. INGENUITY, NAMES OUTSTANDING ENGINEERING ACHIEVEMENTS FOR 1982

An offshore oil platform, a 4.2-mile-long bridge, a lightweight airplane, and a three-dimensional photographic system are among the 10 winners in NSPE's annual salute to American engineering ingenuity—the Outstanding Engineering Achievement awards program.

Chosen from among many entries in a national competition, the winners for 1982 exemplify the very best in U.S. engineering technology. Each winner was nominated by one or more NSPE chapters, as part of NSPE's ongoing effort to promote public recognition of the widespread contributions of engineering to all aspects of American life.

The Outstanding Engineering Achievements of 1982 are:

The Seven Mile Bridge, Florida Keys. The longest (35,000 ft.) bridge of its kind in the world, it is made of precast, prestressed concrete segments which saved more than $7 million over conventional design. The bridge, completed six months ahead of schedule, was nominated by the Big Bend Chapter of the Florida Engineering Society.

1982 World's Fair, Knoxville, Tenn. Engineering feats at the fair, where a total of more than $250 million in construction was accomplished in just 30 months, include the trademark "Sunsphere," a 74-foot-diameter sphere sitting atop a 192-ft. hexagaonal steel tower. The Fair was nominated by the Knoxville Chapter of the Tennessee Society of Professional Engineers.

Bacardi Waste Treatment and Energy Recovery System, San Juan, Puerto Rico. This facility converts rum distilling waste to methane gas for use in distillery boilers, supplying one-half the energy requirements of the distillery. The system, which saves the distillery $3500 daily, was nominated by the Western Chapter of the Missouri Society of Professional Engineers.

Cerveza Ligera Platform, Union Oil Co. Located in the Gulf of Mexico, 100 miles from the Texas shore, this platform features a very light oil rig jacket (the steel frame that supports the platform). This type of jacket makes possible the development of oil and gas fields in waters as deep as 1400 ft. The platform was nominated by the New Orleans Chapter of the Louisiana Engineering Society.

Lear Fan aircraft. Developed by Lear Fan Ltd. of Reno, Navada, this revolutionary business aircraft features fuselage-mounted engines and a rear-mounted propeller. Built almost completely of graphite/epoxy composites, the plan is half the weight of aluminum and uses only one-half to one-third the fuel of a comparable conventional aircraft. The plane was nominated by the Reno Chapter of the Nevada Society of Professional Engineers.

Jesse H. Jones Memorial Bridge, Houston Ship Channel, Texas. Including its ramps, the bridge project runs 4.2 miles, and includes the longest main span (750 ft.) for a segmentally constructed concrete bridge in the Americas. Engineers working on the project developed a superstrong concrete mix to combat humid weather. The bridge was nominated by the Western Chapter of the Missouri Society of Professional Engineers, and by the Texas Society's San Jacinto Chapter. Solar energy system, Illinois Department of Agriculture, Springfield. A showplace of solar technology and energy-efficient design, the facility includes more than 10,000 feet of solar collectors, which are designed to supply 22% of air-conditioning, 43% of heating, and 70% of hot water needs. The Capital Chapter of the Ilinois Society of Professional Engineers nominated the project for an award.

EPCOT Center, Orlando, Florida. An acronym for Experimental Prototype Community of Tomorrow, EPCOT Center is the largest private building project in the U.S., costing more than $800 million and covering 260 acres of the 28,000-acre site of Disney World near Orlando. Exhibits are both entertaining and educational, dealing with such subjects as communications and energy technologies, the history of transportation, and state-of-the-art agricultural engineering. The center was nominated by the Central Florida Chapter of the Florida Engineering Society.

Nimslo Three-Dimensional Photographic System Engineers at the Nimslo Corp. near Atlanta have developed a fuly automatic three-dimensional photographic print system for consumer use. The system produces 3-D photos which can be viewed without aids. The camera weighs only 12 oz.; the price for prints is comparable to other instant cameras. The system was nominated by the Sandy Springs Chapter of the Georgia Society of Professional Engineers.

Fast Flux Test Facility, Hanford, Washington. The largest experimental fast flux nuclear reactor in the U.S., this 400 megawatt facility is designed for irradiation testing of fuels, alloys, and components for breeder reactor systems of the future. Many of its designs, components, and operating systems are "firsts" that, it is hoped, will pave the way for future breeder reactor technologies. The facility, owned by the U.S. DOE, was nominated for an award by the Tri-Cities Chapter of the Washington Society of Professional Engineers.

[From the National Inventors Hall of Fame, U.S. Department of Commerce, Patent and Trademark Office]

THE NATIONAL INVENTORS HALL OF FAME

The National Inventors Hall of Fame is dedicated to the individuals who conceived the great technological advances which this nation fosters through its patent system. The purpose of The Hall is to honor these inventors and bring public recognition to them and to their contributions to the nation's welfare.

Inventors are selected for The Hall of Fame by the Selection Committee of the National Inventors Hall of Fame Foundation. The Selection Committee is composed of representatives from national scientific and technical organizations. Each year the members of this Committee vote to select the most qualified inventors from those who are nominated for induction.

In its voting, the Selection Committee considers whether the invention of the nominee is covered by a United States Patent, the contribution of the invention to the nation's welfare, and the extent to which it promotes the progress of science and useful arts.

ALEXANDERSON (PATENT NO. 1,088,557) HIGH-FREQUENCY ALTERNATOR

Ernst Alexanderson, Swedish-born American inventor, who died on May 14, 1975, at the age of 97, was the General Electric Company engineer whose high frequency alternator gave America its start in the field of radio communication.

During his 46-year career with GE, he became the company's most prolific inventor, receiving a total of 322 patents. He produced numerous inventions in such fields as railway electrification, motors and power transmissions, telephone relays and electric ship propulsion, in addition to his pioneer work in radio and television.

In 1904, Dr. Alexanderson was assigned to build a high frequency machine that would operate at high speeds and produce a continuous wave transmission. Before the invention of his alternator, radio was an affair only of dots and dashes transmitted by inefficent crashing spark machines. After two years of experimentation, Dr. Alexanderson finally constructed a two-kilowatt, 100,000-cycle machine. It was installed in the Fessenden station at Brant Rock, Massachusetts, and on Christmas Eve, 1906, it enabled that station to transmit a radio broadcast which included a voice and a violin solo.

Alexanderson's name also will be recorded in history for his pioneer efforts in television and the transmission of pictures by radio. On June 5, 1924, he transmitted the first facsimile message across the Atlantic. In 1927 he staged the first home reception of television at his own home in Schenectady, New York using high frequency neon lamps and a perforated scanning disc. He gave the first public demonstration of television on January 13, 1928.

He held patents on such devices as the inverter, by which direct current can be changed into alternating current through the mercury vapor arc, and single-phase motors for railway electrification. He also made important contributions to radiant-energy guiding systems for aircraft and the automatic steering of both air and water craft, and developed countless applications of vacuum tubes in power transmission.

He also was associated with the amplidyne—an extremely sensitive and powerful system of amplification and automatic control adapted to the firing of antiaircraft guns in World War II.

He received many honors and several honorary degrees. He was awarded, among others, the Gold Medal of the Institute of Radio Engineers in 1919 and the Edison Medal from the American Institute of Electrical Engineers in 1944.

ALFORD (PATENT NO. 2,682,050) LOCALIZER ANTENNA SYSTEM

Andrew Alford, president and founder of the Alford Mfg. Co., was born August 5, 1904 in Samara, Russia.

He was graduated from the University of California in 1924 with an A.B. degree and received the honorary title of D.S. from Ohio University in 1975.

He was employed with the Harvard University Radio Research Lab from 1943 to 1945; was division head, Direction Finder and Antenna Division, ITT, from 1943 to 1945; was head, Air Navigation Lab, International Telegraph Development Corp., 1938-41; was with Mackay Radio and Telegraph Co., 1934-41; did engineering work for Fox Film Corp., 1929-31; and was on the sound lab staff at California Institute of Technology, 1927-28.

He is a member of IEEE, Past Chairman Antenna Committee; and Radio Technical Commission for Aeronautics.

He received the Pioneer Award, IEEE, in 1965; the Certificate of Merit in 1948; and a graduate fellowship in physics and astronomy at the University of California in 1924.

He invented and developed antennas for radio navigation systems, including VOR and instrument landing systems, and the "Alford Loop" antenna.

DOW (PATENT NO. 11,232) PROCESS OF EXTRACTING BROMINE

Herbert Henry Dow, founder of the Dow Chemical Company and one of the creators of the modern American chemical industry, was born in Belleville, Ontario, in 1866.

His native genius and foresight enabled him to build a fortune from the very salts of the earth. He received his formal training from Case School of Applied Science and was graduated in 1888 with a B.S. degree.

As a young man he entered the rudimentary chemical industry of the 1890's by inventing an entirely new method of extracting bromine from the prehistoric brine trapped underground at Midland, Michigan. His first patent was issued in 1889 and by 1933 he had over 90 patents. While his inventions include such diverse items as electric light carbons, steam and internal combustion engines, automatic furnace controls and water seals, most of his inventions were chemical in nature.

He is best known for his work in halogen chemistry, particularly the production of bromine and chlorine. Most of his chemical patents were for truly "pioneer" inventions, and the remainder were practical improvements which took halogen science from theory to reality, creating employment and an environment which encouraged a healthy combination of basic and applied research. The combined effect of his inventions was to improve the quality of life for millions of people around the world.

He was a public-spirited citizen, serving on boards of public works and education for many years. He was a trustee of the Case School of Applied Science and a member of the American Chemical Society, American Association for the Advancement of Science and many other technical societies. During the First World War he was a member of the advisory committee of the Council of National Defense. In 1930 he was awarded the Perkin medal by the Society of the Chemical Industry.

His favorite saying was, "If we can't do it better than the others, why do it?" That philosophy became the cornerstone of the Dow Chemical Company.

Herbert Henry Dow died in 1930 following an operation in Rochester, Minnesota.

NOYCE (PATENT NO. 2,981,877) SEMICONDUCTOR DEVICE-AND-LEAD STRUCTURE

Robert N. Noyce was born in Iowa in 1927. He received a B.A. degree from Grinell College (Iowa) in 1949, and a Ph.D. in physical electronics from the Massachusetts Institute of Technology in 1953. He did research at Philco Corp. until 1956 when he joined Shockley Semiconductor Laboratory, Palo Alto, California, to work on transistor technology.

In 1957 he co-founded the Fairchild Semiconductor Corp. in Mountain View, California. He was research director until early 1959 when he became vice-president and general manager.

As research director of Fairchild Semiconductor, he was responsible for initial development of the firm's silicon mesa and planar transistor product lines.

In July 1968 he co-founded Intel Corp. with Gordon E. Moore, who had also been a co-founder of Fairchild Semiconductor and a member of the Shockley laboratory staff.

He is vice-chairman of the board of directors of Intel Corp. in Santa Clara, California. He served as president of Intel until 1975 and chairman of the board from 1975 to 1979.

Dr. Noyce received the Ballantine Medal of the Franklin Institute and the Cledo Brunetti Award of the IEEE for work on the integrated circuit. He and Gordon Moore received the AFIPS Harry Goode award for leadership in computer science. He was awarded the National Medal of Science and the IEEE Faraday Medal in 1979, and the IEEE Medal of Honor in 1978. He is a member of the National Academy of Sciences, the National Academy of Engineering, the American Academy of Arts and Sciences, and is a Fellow of the IEEE.

He holds 16 patents for semiconductor devices, methods and structures.

STIBITZ (PATENT NO. 2,668,661) COMPLEX COMPUTER

George R. Stibitz was born on April 30, 1904, in York, Pennsylvania. He attended Moraine Park, an experimental school in Dayton, Ohio, and was graduated from Denison University in 1926 with a Ph.B. in Applied Mathematics. He received an M.S. from Union College in 1927 and a Ph.D. from Cornell in 1930 in the field of physics.

Stibitz joined Bell Telephone Laboratories in 1930 where he served as a mathematical consultant. From 1940 to 1945 he was on loan to the Office of Scientific Research and Development. Following World War II, he was an independent consultant in applied mathematics for various government and industrial agencies. In 1964 he joined the Department of Physiology at Dartmouth Medical School as a research associate. Since that time he has been working primarily on applications of physics, mathematics and computers to biophysical systems. He became a professor in 1966 and professor emeritus in 1970.

His interest in computers arose from an assignment in 1937 to study magneto-mechanics of telephone relays; he turned his attention to the binary circuits controlled by the relays, to the arithmetic operations expressible in binary form, and in November 1937 to the construction of a two-digit binary adder. The next year, with the help of S. B. Williams of Bell Labs, he developed a full scale calculator for complex arithmetic. This computer was operational late in 1939 and was demonstrated in 1940 by remote control between Hanover, New Hampshire, and New York. Several binary computers of greater sophistication followed. In these computers were introduced the excess 3 code, floating decimal arithmetic, self-checking circuits, jump program instructions, taped programs and "table-hunting" subcomputers. He has 34 patents and is internationally recognized as the father of the modern digital computer.

Dr. Stibitz received the Harry Goode Award of the American Federation of Information Processing Societies in 1965, and an Honorary Doctrate of Science from Denison University in 1966. He was the first recipient of the IEEE Emanuel R. Piore Award for "outstanding achievement in the field of information processing" in 1977.●

NICARAGUAN LOAN ENDANGERS IDB

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. KEMP. Mr. Speaker, I was troubled greatly to learn that the Inter-American Development Bank is considering once more a $30 million loan to Marxist Nicaragua. This loan has been brought forward twice before only to be withdrawn under pressure from the United States. Now it appears that IDB managers are prepared to bring the loan to a vote, despite our objections.

Over the past two years, our Subcommittee on Foreign Operations has worked very closely with the Treasury to change the direction of the multilateral development banks, including the IDB. One of our goals has been to assure that the policies of these institutions reflect the ideals and philosophy of the democratic capitalist nations which provide their funding. My personal view had been that substantial progress was being made in terms of the types of loans being made and in the management of the funds provided by U.S. taxpayers. The actions of IDB management in renewing attempts to channel these funds to Nicaragua are causing me to reconsider this view.

Nicaragua is an avowedly Marxist state. It shares none of our democratic ideals nor does it share our philosophy of free enterprise. Since the Sandinista regime assumed power in 1979, it has moved steadily to destroy the private sector and has achieved a record for oppression of the Nicaraguan people at least equal to the Somoza regime it replaced. There is no justification for making U.S. taxpayer dollars, indeed the tax dollars of any freedom-loving people, available to support the corrupt practices and bankrupt policies of Marxist-Communist regimes.

Quite aside from the economic policies of the Sandinista regime, Mr. Speaker, is its support and instigation of terrorist activities across the borders of its neighbors. Combined with Castro's Cuba and Grenada, Nicaragua forms a dangerous triangle for Soviet adventures in Latin America, a triangle which provides communications

coverage—and a very real military threat—over all gulf coast shipping lanes.

In the near future, the Treasury will complete negotiations for a replenishment of funds for the IDB. The Congress will be asked to review the IDB's activities over the past 4 years and determine if its activities are carrying out the mandate under which we serve. Given the attitude of IDB management as reflected in the pending loan to Nicaragua, I urge my colleagues to turn special attention to this review. As we are joining in a bipartisan spirit to provide additional assistance to our friends and allies in Latin America, we can ill afford to negate these efforts by supporting loans which enable terror and oppression to be spread to those we would help.●

TERRITORIES' DAIRY PRODUCTION THREATENED BY COLLECTION PLAN

HON. RON de LUGO

OF VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. DE LUGO. Mr. Speaker, when Congress approved the collection of a 50-cent-per-hundredweight fee on the production of milk, backers of the proposal argued that it was reasonable to impose what was in effect a user fee for those milk producers benefiting from the dairy price support system. Unfortunately, like the rain that falls on the just and the unjust alike, this collection plan included our Nation's territories, whose fledgling dairy farmers are now threatened with extinction due to this added burden.

I would like to establish for the record the many distinctions between the dairy market in our insular areas and those of the mainland which will justify my colleagues' approval of my proposal to exempt them from this onerous fee:

One. The U.S. Virgin Islands and the other territories are not part of the mainland market. Milk produced in the territories is not marketed on the mainland and does not contribute to the existing surplus there.

Two. There is an acute shortage of fresh milk in the territories. In my community, the U.S. Virgin Islands, 90 percent of our dairy products are imported. That figure is even higher in Guam, American Samoa, and the Northern Mariana Islands.

Three. Due to the unique geographic location and size of the dairy industry in the territories, we have never nor will we ever participate in the dairy price support system.

Four. Milk produced in the territories must compete with imported dairy products and reconstituted milk made from components imported from outside of the United States. The price of these other dairy products is significantly lower than that for fresh milk produced locally. For example, reconstituted milk made from foreign components costs $11.34 per hundredweight, while production costs for natural milk from local farms run over $20 per hundredweight. The imposition of this additional fee serves as a further disadvantage for our local producers.

Mr. Speaker, I urge my colleagues to relieve the dairy farmer and consumer of the Nation's insular areas from this terrible burden. I ask that the text of my bill to accomplish this objective be printed here for their review.

H.R. 683

A bill to amend the Agricultural Act of 1949 to limit the authority of the Secretary of Agriculture to make deductions from the proceeds of milk marketed commercially by producers in the United States

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)) is amended—

(1) in paragraph (2) by inserting "in the several States, the District of Columbia, and the Commonwealth of Puerto Rico" after "marketed commercially by producers", and

(2) in paragraph (3)(A) by inserting "in the several States, the District of Columbia, and the Commonwealth of Puerto Rico" after "marketed commercially by producers".

SEC. 2. The amendments made by the first section of this Act shall take effect on October 1, 1982.●

THE WEST GERMAN ELECTIONS

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. WINN. Mr. Speaker, on March 6, 1983, the Federal Republic of Germany will go to the polls to elect the West German Parliament. The results of this election will decide who will serve as the German Federal Chancellor. The incumbent Chancellor is Helmut Kohl who has held this position since October 1, 1982, succeeding Helmut Schmidt. Chancellor Kohl, who is the head of the Christian Democratic Union Party, governs in coalition with the Christian Social Union Party and the Free Democratic Party. Kohl is being challenged by the leader of the opposition, Hans-Jochen Vogel of the Social Democratic Party.

Because of the importance of West Germany to the United States and NATO, there has been avid interest in this country in the German elections. However, the West German electoral process is complex, different from our own, and possibly not readily understood by Americans. Therefore, as the ranking Republican of the Europe and Middle East Subcommittee of the House Foreign Affairs Committee, I thought it would be useful for my colleagues to have access to an explanation of this process published by the German Information Center. This excellent summary follows:

WHY ARE ELECTIONS NOW BEING HELD IN WEST GERMANY?

The Bundestag, the West German parliament, was last elected on October 5, 1980. As in the United States, elections are held in Germany every four years. Following the last election, the Social Democrats (SPD) and the Free Democrats (FDP) decided to continue for another four years their governing coalition that had been in effect since 1969. The combined parliamentary votes of these two parties resulted in the election of Helmut Schmidt as Federal Chancellor.

For political reasons, this coalition broke up in the course of the year 1982. Under the leadership of the Chairman of the FDP, Foreign Minister Hans-Dietrich Genscher, the majority of the FDP deputies decided to form a new coalition with the Christian Democratic Union (CDU) and Christian Social Union (CSU), which had been in opposition since 1969.

In a "constructive vote of no-confidence" based in Article 67 of the Basic Law (constitution), on October 1 the Bundestag elected Helmut Kohl (CDU) to be the new Chancellor. After more than eight years, Helmut Schmidt's term of office as Chancellor was over, and since October the SPD has been the opposition party.

The new government has a secure majority in the parliament, and in compliance with the constitution could have governed until the end of the present legislative period in the fall of 1984. However, the government decided against doing so. Like the opposition, it desired the vote of the electorate on this abrupt and unprecedented change of government.

THE ELECTORAL SYSTEM

The Federal Electoral Law provides for elections on the basis of both proportional representation and personal election of candidates, a mixed system in which—

Half of the members are elected by direct vote in 248 constituencies (i.e., on a first-past-the-post basis) and

The other 248 members are elected from lists of candidates (proportional representation) put up by the parties in the Laender (states).

Under this system, each eligible voter has two separate votes. The first vote is cast for one of the candidates within the voter's constituency. The second vote is cast for one of the party lists within the particular federal state in which the voter resides.

The candidate who polls the greatest number of votes in a constituency is the winner there.

The second vote is cast for one of the lists put up by the parties within each federal state with the exception of West Berlin. The sequence of candidates on the lists is predetermined by the parties and cannot be changed by the voter.

The Federal Electoral Committee establishes the number of seats each party is to receive on the basis of the second votes. The second votes are therefore decisive for the outcome of the election.

The Bundestag seats are distributed among the parties in proportion to the total number of second votes polled by them in

the entire electoral area. Only those parties can be considered that have polled at least five percent of the second votes nationwide or that have won at least three constituency seats.

This "five percent clause" was designed to prevent a recurrence of the splintering of the parliament into numerous parties, a situation that drastically weakened the Weimar Republic. Along with the mood of the electorate, this clause has undoubtedly contributed to the predominance of merely four major parties in the Federal Republic of Germany.

In addition to the elected members of parliament, 22 representatives from West Berlin are delegated by the city's parliament. Because of the reservation rights of the Allies, these members cannot vote on legislative issues or in the election of the Federal Chancellor.

FORMING THE NEW GOVERNMENT

After election results have determined the number of Bundestag seats won by each party, the Federal President consults with the party leaders and proposes a candidate for Federal Chancellor to be elected by the Bundestag. In making his proposal, the Federal President takes into account the voting strength in the Bundestag.

To win, the candidate for Chancellor must poll more than half of the Bundestag's votes. If he does not, the Bundestag must, within fourteen days, on its second ballot choose a majority candidate nominated by its own members. The winner is automatically appointed to office by the President.

If the Bundestag does not agree on a majority candidate, it must at once elect a candidate by plurality.

In the event that this candidate obtains the votes of the majority of the members of the Bundestag, the Federal President must appoint him within seven days of the election. But if the candidate obtains merely a plurality of votes, the Federal President can within seven days either appoint him or dissolve the Bundestag for new nationwide elections to be held within 60 days.

Once the Chancellor is elected, he nominates the Federal Ministers (usually from among the members of the Bundestag) to be formally appointed by the Federal President. The Federal Chancellor, together with the Federal Ministers, comprise the Federal Government, which is often simply called the Cabinet.

WHICH PARTIES ARE RUNNING?

At present, the Bundestag is made up of four parties, all of which are running in the March 6 election:

The Christian Democratic Union (CDU);

The Christian Social Union (CSU), the Bavarian faction of the CDU;

The Free Democratic Party (FDP);

The Social Democratic Party of Germany (SPD).

The three parties first mentioned have made up the ruling coalition since October 1982; the SPD has been in the opposition since then.

In addition to these parties, candidates from 14 other parties are running in the election, among them

The Greens, an ecological-pacifist party;

The German Communist Party (DKP);

The National Democratic Party of Germany (NPD).

The Greens are the only one of these parties that has a serious chance of achieving at least five percent of the vote and of reaching the Bundestag. In the 1980 federal election, the Communists and the National Democratic Party each achieved 0.2 percent of the vote, and other minority parties tallied up even less.

PARTY PLATFORMS

The Christian Democratic Union (CDU) and Christian Social Union (CSU) are running with a joint platform calling for sacrifice by all sectors of the population for the solution of economic problems, particularly for lowering unemployment.

They favor some tax cuts starting in 1984 as a measure toward providing relief for small business and facilitating capital formation by employees. Tax subsidies for business should be reduced and the abuse of tax relief impeded.

On questions of foreign policy and security, the CDU and CSU affirm their commitment to the Atlantic Community, detente, and the NATO Two-Track Decision. Their goal is to bring about a dismantling of Russian nuclear missiles aimed at Europe.

The main emphasis of the Social Democratic Party (SPD) is on combatting unemployment, on environmental protection, and on promoting disarmament, particularly with regard to medium-range nuclear missiles in Europe.

The SPD calls for an "international employment agreement" by the large industrialized countries for the purpose of stimulating the economy. All sectors of the German economy are urged to join forces to combat unemployment. The SPD favors shortening the work week and lowering the retirement age.

The Geneva Disarmament Negotiations between the United States and the Soviet Union should be conducted with the goal of bringing about the dismantling of Soviet missiles. The Social Democrats would do everything within their power to obviate the stationing of new U.S. medium-range nuclear missiles in Europe. They would review the status of the NATO Two-Track Decision in the fall of 1983. The eventual goal is a Europe free of nuclear weapons.

The Free Democrats (FDP) also view the fight against unemployment as a top priority, and want to encourage private investment, consolidate public finances, and insure the funding of pension, health care and unemployment benefits.

On matters of national security, the FDP supports the zero solution to the Geneva negotiations on medium-range nuclear missiles. The party will reconvene in the future to decide whether the stationing of additional nuclear missiles in West Germany is called for.

The Free Democrats want the designated stationing sites of the nuclear missiles made public and the communities involved consulted.

The Greens are the political surprise of Germany within recent years. They are now represented in six of the eleven state parliaments, and have good prospects of reaching the Bundestag on March 6.

The Greens are striving for a new economic order that will do better justice to the basic needs of people both "here and in the Third World." They support shortening the work week to 35 hours in order that available jobs be distributed among a greater number of employees.

They support diverting investment into the ecological and social shperes. Their long-term goals include the elimination of private ownership of property, natural resources, the means of production, and banks which should be transformed into new social structures of ownership.

The Greens accord special importance to environmental protection, and they favor abandonment of nuclear energy.

The Greens oppose the stationing of nuclear weapons in West Germany.●

JIM WRIGHT SPEAKER OF THE YEAR

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● MR. WON PAT. Mr. Speaker, on Friday, February 25, the distinguished majority leader of the House of Representatives will be presented the prestigious Speaker of the Year Award from the Capitol Hill Toastmasters Club.

As a former member of the Capitol Hill Toastmasters, I can attest to the importance of this special, seldom-profered honor.

You yourself were the first and only other recipient of the award. In your acceptance speech, you said that in your opinion there were only two orators in the House—JOHN ANDERSON and JIM WRIGHT.

It is fitting, therefore, that the Speaker of the Year Award should go to JIM WRIGHT, who is recognized by Members of both sides of the aisle to be the finest speaker in the House.

Very few Members, today, have the verbal skills to cut through the near-constant drone that arises from the floor. Not so JIM WRIGHT. When he arises to speak on a major issue, the undercurrent of conversation stops. Even his opponents, who disagree with what he is saying, cease their asides and listen attentively because of the polish and aplomb with which he speaks.

He is an artist who often brings despair to the hears of his opponents. He uses the techniques of all great orators. He quotes from the classics; he uses effective alliteration; he uses words that are colorful and imaginative.

JIM WRIGHT is the master of the gesture, who with the slanting of a beetling brow can dredge up from his audience the desired response. When JIM WRIGHT speaks, he creates a cavalcade of oratorical excellence.

Mr. Speaker, I am pleased to be able to announce to my colleagues that the majority leader is the most worthy recipient of the Capitol Hill Toastmasters Speaker of the Year Award.●

ESTONIAN INDEPENDENCE DAY

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. RITTER. Mr. Speaker, I am honored to join with many of my colleagues and with Estonians around the world in commemorating the 65th anniversary of Estonian Independence Day.

The fate of Estonia is as sad as that of its Baltic neighbors, Lithuania and Latvia. As a result of the Hitler-Stalin pact, Russian forces invaded the Baltic countries, in 1940, and forced them to be annexed into the Soviet Union. This annexation was soon followed by massive arrests, deportations, and deaths as the Soviets committed what was later to become known as the Baltic genocide. In June of 1941 60,000 Estonians, more than 5 percent of the entire population, were either killed or sent to Soviet concentration camps. Even after World War II ended, the terror continued as the Soviets collectivized the land displacing 80,000 farmers. Between 1939 and 1949 350,000 people or one-third of the population was lost. Of the 350,000 many died in Russian labor camps and many more died in defense of their homeland.

Over the past four decades, the Soviets have employed virtually every method known to destroy Lithuanian culture and heritage. Rural life has been uprooted, the practice of Estonian language and culture forbidden and human rights activists either imprisoned or deported. In more recent years, the Soviets have taken young Estonians from their homeland and forced them into labor camps in the farflung parts of the Soviet Empire in an effort to destroy their will. However, despite the repression and forced attempts at Sovietization, Estonian culture still survives.

The Lehigh Valley of Pennsylvania, the area I am proud to represent in Congress, is the home for many families who trace their heritage to Estonia. Fleeing Soviet domination, many Estonians came here with only the clothes on their back and made a new life for themselves and children. Their many contributions have helped strengthen our community and make it a better place in which to live.

We in Congress have an important role in supporting the cause of Lithuanian freedom and, for that matter, freedom for all oppressed peoples. As the cochairman of the Adhoc Committee on the Baltic States and Ukraine, I am proud to rise with my colleagues in support of Lithuanian Independence Day and pray for the time when Estonia will once again to take its rightful place among the free nations of the world.●

NATURAL GAS CONTRACTING PROBLEM

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. HERTEL of Michigan. Mr. Speaker, Wednesday the Federal Energy Regulatory Commission approved more than $500 million in annual natural gas price increases for Midwestern States to purchase high-priced Algerian liquefied natural gas. This gas is triple the current average of U.S. prices. Ironically the Commission acknowledged that these prices are distorted and should be reduced, but neatly avoided how to force price reductions. This ruling is an obvious attempt by a natural-gas-producer-biased Commission to trigger a pricing crisis in this resource and accelerate decontrol of all natural gas. This is a direct affront to the depression-ravaged residents of the Midwest who are faced with natural gas rate increases of more than 25 percent. Record unemployment will be further aggravated by record home-heating bills.

In my home State of Michigan, the natural gas distributing utility has a 20-percent uncollectable rate for its residential users. The State of Michigan has a program to help the needy pay their heating bills. Michigan is spending $300 million in 1982-83. Next year it is estimated at $350 million, not counting this increase. By the 1990's more than $1 billion will be spent if this trend is not reversed.

Today I am proposing two pieces of legislation which address these natural gas contracting problems. The first freezes the pricing mechanisms of the Natural Gas Policy Act in relation to any natural gas contract at the price applicable as of January 1, 1983, unless those contracts are renegotiated to the satisfaction of purchasing parties and those contracts contain escape clauses called market out provisions. Upon renegotiation the course of the NGPA is once again set in motion. The second bill, a comprehensive package of much-needed tools to aid the renegotiation of these contracts and force downward pressure on the price of natural gas. This bill prohibits take or pay clauses or similar minimum purchase requirements under natural gas supply contracts, prohibits indefinite price escalator clauses, grants specific authority to FERC to prohibit pass through of natural gas prices or take other corrective action if the prices paid by natural gas companies are excessive to waste or imprudence.

The natural gas contracts problem is an extremely complex topic which requires a brief understafding of the history of Federal natural gas regulation.

The Natural Gas Policy Act is a law which has been mislabeled regulatory legislation. It is actually incentive or promotional legislation to encourage production of new reserves of natural gas. In contrast, the Natural Gas Act of 1936, which created the Federal Power Commission, would be considered classical regulatory legislation. The rates set for natural gas prices were based on the cost of production plus a just and reasonable profit. This rate model is a theoretical approximation of pricing theory in a truly competitive market. There were numerous problems with the administration of the act of 1936. These problems were illustrated in the congressional hearings on the Natural Gas Policy Act. In addition, the gas shortages of the mid-1970's highlighted the regulatory shortcomings of that act.

What, then, was the pricing mechanism upon which the Natural Gas Policy Act was based? Pricing is designed to encourage exploration and production of new reserves as well as tying the market price to a comparable fuel of similar heating capability. For the purpose of the act, the index fuel is sometimes No. 2 and sometimes No. 6 heating oil. To minimize the impact of a change to a producer-incentive price from a regulated price based on ideal free market conditions, complex formulas of wellhead pricing provisions were established for eight types of natural gas production. These formulas included escalator and inflation factors designed to smoothly bring the price of natural gas up to that of index fuel oil over an 8-year period.

As originally contemplated by the Natural Gas Policy Act, the projected price of heating oil was estimated at $15 a barrel in 1985. This is where the producer incentive pricing system broke down. The price of oil has been in the effective control of foreign-dominated cartels since the early 1970's. The pricing policies of this cartel are not based upon either the cost of production plus a fair and reasonable return or a producer-incentive price. Cartel pricing is based upon controlling production and supply to extract maximum premiums. When revolution devastated Iran and terminated oil and gas production, the price of oil doubled and now currently hovers around $35 a barrel. The pricing formulas of the Natural Gas Policy Act followed the inflationary curve of oil, skyrocketing upward.

Fundamentally, there is absolutely nothing to force any downward pressure on natural gas prices. There are also contracting provisions between gas producers and pipelines, and pipe-

lines and utilities which strongly reinforce the upward pricing spiral. This effect is the so-called price spike. The general concerns of advocates and adversaries of natural gas decontrol is that there will be further spike effects ranging between 60 percent to 100 percent should decontrol occur.

As stated above, these price spikes take place because Congress in passing the Natural Gas Policy Act, did not take into account possible disruptions in world energy prices, nor did Congress provide any mechanism to give downward pricing pressure. In the arcane world of natural gas regulation, there are certain identifiable factors which support the price spiral. Among these factors are escalator clauses, favored nations or field price clauses, and take or pay provisions. These devices appear uniformly in contracts between producers and pipelines and also between pipelines and utilities. Utilities then secure price adjustment allowances from State utility regulatory commissions. The effect this complex web of contracting provisions is to pass the price of the highest cost gas from producer to consumer in the fastest possible manner. That is why gas prices go up constantly.

Without entering the fray of decontrol versus contained control of natural gas, there are concrete proposals which the Congress can act upon to greatly slow the rapid increases in natural gas prices. I am proposing to suspend all escalator, favored nation, or field price clauses in natural gas sale or purchase contracts. Furthermore, it would address take-or-pay provisions by prohibiting minimum energy purchase requirements unless such requirements are absolutely essential to make a specific supply of energy economically feasible. Such requirements are to continue only so long as it is necessary to amortize that specific supply of energy.

These two measures are essential because these contracting provisions make natural gas supply contracts enforceable only for volume. Purchasers have no control, more certainty of price under currently existing market contract conditions. Pipelines, utilities, and ultimate users must ransom any certainty of price for certainty of volume. There is no incentive to reduce gas prices. The first two consumer energy relief acts seek to provide that incentive.

The text of the measures are as follows:

H.R. 1686

A bill to amend the Natural Gas Policy Act of 1978 to freeze the price under any natural gas contract at the price applicable as of January 1, 1983, to exempt from such freeze any contract having a market-out clause if the contract was entered into after the effective date of this Act and any contract entered into on or before such date which is renegotiated as to price after such date and which has a market-out clause

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title I of the Natural Gas Policy Act of 1978 is amended by inserting after section 110 the following new section:

"SEC. 111. CEILING PRICE FOR NATURAL GAS SOLD UNDER CERTAIN CONTRACTS.

"(a) APPLICATION.—The maximum lawful price computed under subsection (b) shall apply to any first sale of natural gas for any month beginning after the effective date of this section if such natural gas is sold under any contract with—

"(1) was entered into on or before the effective date of this section if such contract (A) is not renegotiated as to price on or after such date or (B) does not contain a market-out clause; and

"(2) was entered into after such effective date if such contract does not contain a market-out clause.

"(b) MAXIMUM LAWFUL PRICE.—The maximum lawful price, per million Btu's, under this section for any month shall be—

"(1) in the case of any contract entered into on or before such effective date, the price applicable under the contract for deliveries on January 1, 1983; and

"(2) in the case of any contract entered into after such effective date, the maximum lawful price determined by the Commission to be applicable under this subtitle for deliveries of the category of natural gas involved which occurred on January 1, 1983, or in the case of high-cost natural gas described in section 107(c)(1), (2), (3), or (4) the maximum lawful price under this subtitle which would have been applicable if the such natural gas were not decontrolled under section 121(b).

"(c) MARKET-OUT CLAUSE.—For purposes of this section, the term 'market-out clause' means the following contract provisions (or contract provisions having substantially the same effect);

"(1) GENERAL RULE.—The purchaser may, without obligation to pay, exercise a right not to accept delivery of any portion of the volumes of natural gas the purchaser has contracted to accept if the purchaser has determined he cannot market the total volume of natural gas contracted for.

"(2) AMOUNT OF REDUCTION.—A purchaser may not reduce, pursuant to these contract provisions, the volume the purchaser accepts delivery of below a level equal to 50 per centum of the volume the purchaser contracted to take delivery of under the contract (without regard to any previous reduction under these contract provisions).

"(3) HIGHEST PRICE GAS REDUCED FIRST.—Except as provided in paragraph (4), the purchaser may not reduce under these contract provisions the volume he accepts delivery of if he had not exercised his right under these provisions to reduce (to the maximum extent permitted under paragraph (2)) deliveries of natural gas he has contracted to take delivery of at a higher price under any other contract.

"(4) AFFILIATED PRODUCERS.—The purchaser may not reduce under these contract provisions the volume he has contracted to take delivery of if he has not exercised his right under these provisions to reduce (to the maximum extent permitted under paragraph (2)) deliveries of natural gas he has contracted to take at the same or a higher price under any other contract between the purchaser and any other person who is an affiliate of the purchaser.

"(5) CONTRACTED TO TAKE DEFINED.—For purposes of these contract provisions, the term 'contracted to take' refers to the volume of natural gas for which the purchaser has contracted to take delivery under a contract (whether or not the purchaser is obligated under the contract to pay for any lesser volume in the event delivery is not taken).

"(6) EFFECT OF TAKE-OR-PAY AND MINIMUM-BILL CLAUSES.—Any provision of any contract shall not apply to the extent it requires a purchaser to pay any fee or other charge with respect to any natural gas for which delivery is not taken pursuant to these contract provisions.

"(7) LIMITATION ON CONTRACTING FOR NEW SUPPLIES.—Any purchaser who has exercised his right under these contract provisions to reduce the volumes of natural gas he is obligated to take shall not accept delivery during the period of such reduction of any other volumes of natural gas at a price that is equal to or higher than the price of the natural gas involved in the reduction if such delivery is under any contract entered into or renegotiated after the date of the exercise of such right.

"(8) CONTRACTS COVERING MORE THAN ONE CATEGORY OF NATURAL GAS.—Any contract establishing two or more categories of natural gas for purposes of pricing the natural gas delivered under the contract shall be treated as separate contracts for each such category.

"(d) BAR AGAINST NONPRICE DISCRIMINATION.—Nothing in this section shall be construed as allowing any pipeline to discriminate against any one or class of producers or other sellers of natural gas on any basis other than the price of natural gas.

"(e) COMMISSION TO CONSIDER USE OR NONUSE OF CONTRACT CLAUSE IN CERTAIN PROCEEDINGS.—Notwithstanding section 601(c) or any other provision of this Act or the Natural Gas Act, the Commission shall take into account the use of or failure to use the contract provisions available by this section by any pipeline under the jurisdiction of the Commission as an element of—

"(1) any purchase gas adjustment proceeding under the Natural Gas Act involving that pipeline, and

"(2) any general rate proceeding under section 4 or 5 of the Natural Gas Act involving that pipeline.".

(b) Section 121 of such Act is amended by adding at the end thereof the following new subsection:

"(f) SECTION NOT TO AFFECT CONTROLS UNDER SECTION 111.—Notwithstanding any other provision of this section, this section shall not affect the applicability of section 111.".

(c) The table of contents for such Act is amended by adding after the item relating to section 110 the following new item:

"Sec. 111. Ceiling price for natural gas sold under certain contracts."

SEC. 2. The amendments made by this Act shall take effect on the first day of the first calendar month beginning more than fif-

teen days after the date of the enactment of this Act and shall apply in the case of any contract, whether entered into before, on, or after such date.

H.R. 1685

A bill to amend the Natural Gas Policy Act of 1978 to prohibit take-or-pay clauses or similar minimum purchase requirements under natural gas supply contracts, prohibit indefinite price escalator clauses, and to allow the Federal Energy Regulatory Commission to prohibit passthrough of natural gas prices, or take other corrective action, if the prices paid by natural gas companies are excessive due to waste or imprudence.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

PROHIBITION OF INDEFINITE PRICE ESCALATOR CLAUSES

SECTION 1. Section 313 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3373) is amended by redesignating subsections (a) and (b) as subsections (c) and (d), and by inserting before subsection (c) (as redesignated) the following new subsections:

"(a) GENERAL RULE.—Except as provided in subsection (b), any indefinite price escalator clause of any contract which is entered into on or after the date of the enactment of this subsection and which is applicable to the first sale of natural gas or to any subsequent sale of natural gas is hereby declared to be against public policy and unenforceable.

"(b) EXISTING CONTRACTS.—In the case of any indefinite price escalator clause of any contract which is entered into before the date of the enactment of this subsection and which is applicable to the first sale of natural gas or to any subsequent sale of natural gas, such clause shall be against public policy and unenforceable if the purchaser elects to have such clause voided. Such election shall be made at such time and in such manner as the Commission shall by rule prescribe. If such an election has not been made, the provisions of subsections (c) and (d) shall apply.".

PROHIBITION OF TAKE-OR-PAY CLAUSES

SEC. 2. (a) The Natural Gas Policy Act of 1978 (15 U.S.C. 3301 and following) is amended by inserting after section 315 the following new section:

"SEC. 316. TAKE-OR-PAY CONTRACT CLAUSES.

"(a) GENERAL RULE.—Except as provided in subsections (b) and (c), any take-or-pay clause of any contract which is entered into on or after the date of the enactment of this section and which is applicable to the first sale of natural gas or to any subsequent sale of natural gas is hereby declared to be against public policy and unenforceable.

"(b) EXISTING CONTRACTS.—In the case of any take-or-pay clause of any contract which is entered into before the date of the enactment of this section and which is applicable to the first sale of natural gas or to any subsequent sale of natural gas, such clause shall be against public policy and unenforceable if the purchaser elects to have such clause voided. Such election shall be made at such time and in such manner as the Commission shall by rule prescribe.

"(c) EXEMPTION FOR CHARGES REQUIRED FOR RECOVERY OF CERTAIN COSTS.—The Commission may, by rule, provide for exemption from the application of subsections (a) and (b) for take-or-pay clauses to the extent that such clauses are necessary for the recovery of natural gas acquisition costs of the seller or for the amortization of equipment and facilities used in connection with the delivery of natural gas to the purchaser.

"(d) DEFINITION OF TAKE-OR-PAY CLAUSE.—For purposes of this section, the term 'take-or-pay clause' means any contract provision which requires payment for the minimum quantity of natural gas contracted for under the contract in the event the purchaser fails to take delivery. Such term also includes any other contract clause which the Commission determines has the same effect.".

(b) The table of contents for such Act is amended by inserting after the item relating to section 315 the following new item:

"Sec. 316. Take-or-pay contract clauses.".

AUTHORITY TO PROHIBIT PASSTHROUGH OF EXCESSIVE COSTS DUE TO WASTE OR IMPRUDENCE

SEC. 3. Section 601(c) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3431(c)) is amended by striking out "or similar grounds." and inserting in lieu thereof "waste, imprudence, or similar grounds including action not in the public interest, in which case the Commission shall take appropriate action under sections 4 and 5 of the Natural Gas Act, including but not limited to, the revision, annulment, or mandating of contract terms and provisions.".●

HUMAN RIGHTS WORSEN IN U.S.S.R.

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. BONKER. Mr. Speaker, during the January 1983 recess, I joined a congressional delegation tour of Russia and three Eastern bloc countries to review our Government's relations with those nations, particularly concerning East-West trade—including export controls—rights violations, and the status of current disarmament negotiations. The delegation visited Leningrad, Moscow, Budapest, Bucharest, and Belgrade. The trip also included Athens where our delegation met with European parliamentarians on similar issues.

While the U.S. delegation met with a variety of officials and covered a range of subjects, I am limiting this report to human rights issues.

Overall, there is no discernible improvement in the oppressive conditions that exist in Communist countries. As the world becomes more conscious of human rights as a measure of national decency and many countries are working to improve the political conditions as an acceptable form of national behavior, we found little evidence of similar improvements in Russia and her satellite neighbors. If anything, the political climate has worsened in Russia and Romania with small likelihood that there will be any easing of the internal tension that is so obvious in those two countries. We discovered cautious optimism in the other countries as limited freedom is being experienced, but that may prove illusionary depending on a number of factors in what definitely is an uncertain future for the people of these areas.

At least two important developments add to that uncertainty. First, Secretary Yury Andropov, who has emerged as the undisputed boss at the Kremlin, remains an enigmatic political figure. In Russia, it is obvious that everyone was waiting and watching to see what kind of leadership he will provide. Andropov has moved quickly on a campaign against corruption, which was interpreted as legitimate given the widespread abuses at higher levels, but also a move of weeding out the decaying and possibly hostile elements in high level government and party positions.

The new Kremlin leader is viewed as smart and tough, and capable of providing enlightened leadership compared to the more bureaucratic Leonid Brezhnev, but he is equally adept of using his personal resources as a ruthless and unrelenting advocate of global communism. The consensus is that it is much too early to tell how he will deal with human rights issues at home, or how much latitude will be given to Soviet-dominated countries in Eastern Europe.

The second factor may be beyond Andropov's or anyone's control, for it concerns the economic fate of these countries. Everywhere we visited, it was the state of the economy, particularly the emerging Third World countries and the shaky international financial system that worried people the most. Economic strains were being felt, particularly in Hungary, Romania, and Yugoslavia. The link between economic conditions, public unrest and suppression is an undisputable fact. Poland is an obvious reminder. Leaders with whom we met talked incessantly about their economic problems and urged the United States to be sensitive and provide more help. In my judgment, the human rights picture will not improve under such conditions. As these regimes become more threatened by greater unrest among their populations, who have enjoyed meager but relatively bitter economic standards, there will undoubtedly be more repressive measures introduced.

U.S.S.R.

In our 4-day visit to Russia, we found no improvement in the human rights situation. If anything, we heard repeated statements about a new crackdown. There was little evidence that immigration quotas, which have declined remarkably in recent years, would improve. Refuseniks were frustrated in their attempts to leave the country. The more celebrated dissidents have all but given up hope for freedom. Religious persecution persists throughout the Soviet Union. We

know of several incidents where intimidation was used against people as the result of our visit. The Embassy staff, well informed and sensitive about individual cases, confirmed our suspicions that if anything, things were much worse in the Soviet Union, and will probably not get better in the foreseeable future.

Jewish immigration has nearly come to a standstill. Since reaching a yearly high of 51,000 in 1979, it has declined precipitiously to 10,000 in 1981 and a projected total of under 3,000 this year. In Leningrad, we met one evening in the small flat of a refusnik family and nine others to discuss their plight. The frustration was painfully evident. They have been denied visas and subjected to long delays and uncertainty about their applications to leave the country. Long-term refusniks have been threatened with arrest if they came in contact with westerners. Those present shared their own experiences, some of whom were professionals who were dismissed from their jobs and forced into temporary menial employment.

Despite the CSCE principle of family reunification, in practice the Soviet authorities have employed various procedural and technical pretexts to delay or deny immigration applications. It is currently estimated that some 50,000 Soviet Jews still are actively seeking to leave Russia. The tales we heard from this small group are being shared by many thousands throughout the country.

Congressman Lantos and others also met with Elena Bonner, wife of Sakharov; Leonard Shcharansky, brother of Anatoly and others in Moscow. They heard the same story. But the Moscow meeting had more ominous overtones because the group included close relatives of prominent dissidents.

Religious persecution remains a serious problem in the U.S.S.R. This discrimination is applied to all religious sects, but notably the Pentecostalists. The most publicized and moving example, of course, are the Vashchanks and Chmykholove families living like refugees in the basement of the U.S. Embassy. Every congressional delegation that visits Moscow cannot pass up this display of Russian tyranny, nor can they avoid heartbreak seeing a courageous family endure this crude punishment.

We met with the family and through their spokesperson, Lida Vashchanks, heard about their existence and particular problems, not only with the Soviet outbreaks but the U.S. Government as well.

We did not miss an opportunity to register our concern with Government officials. In our meeting with Vadim Zaglandin, First Deputy Chief of the Central Committees, our delegation pressed hard to have the families released. Representative SAM GIBBONS in particular demanded that Russia quickly resolve this problem by letting them immigrate.

Their fate is uncertain, but time is running out for the Embassy will be moving to new quarters shortly. President Reagan had made reference to this matter in national speeches, but apparently it is an issue that is not being raised at high official levels in deliberations among the two great powers. This is a source of frustration for the families because they are aware of all the political commotion and publicity about their circumstances, yet there seems to be little action by the U.S. Government. They also had some grievances with the U.S. Embassy which we took up with the appropriate officials there.

One other related matter. Apparently, it is possible the family could be reconciled with family members in West Germany if a request was submitted, but the family in question refuses to make application because of differing doctrinal views on Biblical Scripture. If this is the case, the Department of State should make an effort to clear up the matter if possible.

Two other cases of religious persecution should be mentioned. One concerns Matuey Finkel, who is a Soviet national, but whose wife is an American citizen. This is another example of family reunification—Finkel is not allowed to leave the U.S.S.R. and his wife, Susan Graham, cannot receive a travel visa to see him in Russia. I was to meet with Matuey Finkel at an Embassy reception, but he did not appear. We learned later that Mr. Finkel was visited by two policemen that evening. He was subjected to intimidation and warned not to attend the reception. We learned that it was possibly due to Andropov's son being at the reception.

Finally, I had intended to meet with another person who works with religious groups on human rights matters. The U.S. Embassy cautioned me not to meet her for apparently she was under surveillance and could be arrested at any moment.

HUNGARY

In Budapest, we found a different environment: a slowly emerging market economy with enough freedom for people to appear relaxed, but a government wholly pledged to back Russian foreign policy. Of all the Eastern bloc countries, Hungary appears to have the least restrictions on individual liberties. It retains its European flourish on cultural matters and is experimenting with democratic socialism. We were informed that most of national and local political offices are now contested and the process is increasingly becoming responsive to local needs and concerns. We met with the top leader of the Catholic Church, Cardinal Lekai. While there is relative freedom for the institutionalized church, smaller evangelical groups experience difficulty in a variety of ways—required permits to emigrate, churches being bulldozed to make way for other buildings, and so forth.

We did raise the case of Sander Zoboki at the meetings with top officials. Young Zoboki, age 12, is the son of Lt. Sander Zoboki, Sr., formerly of the Hungarian Air Force, who in 1970, flew a fighter jet from Hungary to Odino, Italy and requested and received political asylum from the United States. He has been in the United States since, and now wants his son to join him. Young Zoboki's mother died several years ago and is under custody of his elderly grandmother. Until now, Hungarian authorities forbid a passport so the father and son can unite. We got a formidable response from the officials, including the Prime Minister, that the case was under review and were left with the impression that the young boy will be allowed to depart shortly.

YUGOSLAVIA

Yugoslavia is not unlike Hungary with respect to human rights. The country is not without its problems given the multiple areas ethnic groups that comprise the present state. Marshal Tito, a much celebrated leader 3 years after his death, successfully guided Yugoslavia toward an independent foreign policy and relaxation of tensions at home as he championed the course of the nonalined states in the 1960's and 1970's. There is no single political figure capable of united support and the personal charisma that Tito enjoyed, so it is a collective effort, similar to a board of directors with the chairmanship routinely passed around to everyone who sits on the board.

There are no noticeable human rights problems that we knew of so none were raised with the many officials with whom we met. The exception was a meeting Representative and Annette Lantos and I had with Michael Djelas. A former compatriot of Tito's in the early years, Djelas fell out of favor because of his criticism, among other things, of the extravagant lifestyle of Communist leaders. This landed him in jail for a period of time and he is now persona non grata. He is denied a passport to leave the country and his son, now living in England and an occasional critic of the regime, is not allowed in the country. Mr. Djelas is a distinguished author whose books are not allowed to be published or distributed in the United States. His only request was that we ask the authorities to allow distribution of his nonpolitical works in the country.

ROMANIA

Romania, our last stop, is in a special category. While it retains a somewhat independent line of foreign policy mat-

ters, much to the consternation of the Kremlin leaders, it is undeniably the most repressive of the Eastern bloc countries and its leader, Nicolae Ceausescu, is a virtual dictator.

The delegation made two attempted landings in Bucharest, but poor weather conditions aborted our scheduled stop there.

The following week, Chairman LANTOS, Representative BILL FRENZEL, and I flew back to Bucharest to meet with Mr. Ceausescu and his top aides. Our 2-hour session with the Romanian President proved very disappointing. Representative FRENZEL questioned Romania's new law to impose an educational tax on emigrants. The issue is being linked by the administration to the extension of nondiscriminatory (MFN) treatment to imported products from Romania under the waiver provision in title IV of the Trade Act of 1974. Section 402 of the act prohibits the granting of MFN treatment if that country does not allow its citizens the freedom to emigrate.

Since 1976, the President, supported by the Congress, has moved the emigration requirements of section 402 because of its policy on Jewish emigrations, family reunification, and more recently the emigration of ethnic Germans has been satisfactory. There have been recent concerns about overall quotas—Romanian Jewish emigration to Israel has dropped from a high of 4,000 in 1973 to 1981 level of 1,012. Resolutions have been introduced to disapprove the extension of the waiver authority. Concerned about the massive "brain drain" from his country, Mr. Ceausescu wants further emigrants to pay hard currency for the full costs of their education—a sum that has been estimated to be $10,000 to $12,000. In addition, the property of emigrants would be confiscated.

Our visit followed Under Secretary of State Lawrence Eagleburger's meeting in Bucharest with Ceausescu. The Romanian leader informed us that he has no intention of repealing the new law, insisted that it was fair and equitable given the Government's cost of educating its citizens, expressed anger that the United States had no right to meddle in his country's internal affairs, and apparently he is willing to risk discontinuance of MFN treatment if the United States carries out its policy threat.

I raised the problem of religious persecution as a human rights problem, explaining that a number of religious organizations, human rights groups and individual Congressmen have expressed concern about repressive measures addressed at certain denominations. He denied the charges, pointed out that the institutionalized church is even subsidized by the state and referred to religious cults, some of whose leaders may have been arrested but only because they broke the laws.

Later I met with top aides to discuss individual cases, including Pastor Troian Dorg, who is in need of medical attention as he languishes in jail for possession of contraband of religious literature. Time did not permit us to raise the question of the more than 2 million ethnic Hungarians who live in that part of Romania known as Transylvania. They are the victims of earlier decisions to redraw European boundaries and now their cultural and ethnic identity are being threatened by a systematic, if not brutal, attempt by Romanian authorities to assimilate this large and reluctant population.

Repression is a way of life in Romania and the future looks even bleaker as economic conditions worsen and which will undoubtedly result in greater hardship. Credit should be given to Ceausescu for his independence on foreign policy matters, but the repression so readily apparent within the country does not justify our continued policy of extending favorable trade benefits to Romania.●

ALCOHOL AND DRUG ABUSE AMENDMENTS OF 1983

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 25, 1983

● Mr. WAXMAN. Mr. Speaker, I am pleased to announce the introduction of H.R. 1696, the "Alcohol and Drug Abuse Amendments of 1983." The legislation extends through fiscal year 1984 the authorization of appropriations for the research activities of the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA). NIAAA and NIDA are agencies of the Alcohol, Drug Abuse and Mental Health Administration (ADAMHA).

Funding is authorized in accordance with the following table.

	Fiscal year 1983 appropriation	Fiscal year authorization
Research:		
NIAAA	$33,484,000	$45,790,000
NIDA	47,374,000	56,160,000

Although the authorizations are not as high as I would like, nor as high as could be productively used by the institutes, they provide for a significant and long overdue increase in alcohol and drug abuse research capacity. The budget will permit the funding of 58 new research grants in fiscal year 1984 and continued emphasis upon alcohol and drug abuse prevention and education activities targeted to high risk populations.

Only recently have we come to appreciate the enormous human toll caused by addictive disorders. The impact of alcoholism, drug addiction and alcohol and drug abuse are staggering. They contribute to higher health care costs and decrease the productivity of our workforce.

The research activities of NIAAA and NIDA represent the Federal Government's commitment to better understand these disorders. Through the efforts of these agencies improvement in prevention and the development of more successful forms of treatment will be possible.

In addition, H.R. 1696 provides for:

Technical revision of the statutory authority for ADAMHA consistent with the agency's status as an independent agency of the Public Health Service.

Consolidation of alcohol and drug abuse congressional reporting requirements.

Increased emphasis upon support of prevention research through establishment within ADAMHA of a new position of Assistant Administrator for Prevention. The Assistant Administrator is charged with promotion and coordination of prevention research sponsored by NIAAA, NIDA, and the National Institute of Mental Health, and with preparation of an annual report to Congress describing these activities.

Systematic peer review of intramural research.

Establishment of a system for the investigation of reports of scientific misconduct.

Preparation of a report by the Secretary of the Department of Health and Human Services on the effectiveness of the alcohol, drug abuse, and mental health services block grant.

Dissemination of publications on current research findings respecting alcohol and drug abuse.

Mr. Speaker, H.R. 1696 is a noncontroversial bill and reflects provisions passed by the House at the end of the 97th Congress as a result of successful negotiations with the Senate on H.R. 6458 and a Senate amendment reflecting the provisions of S. 2365. Although the differences between our bills were resolved, the 97th Congress adjourned prior to the Senate completing action on the legislation.

I hope consideration of this legislation can be expedited in both the House and Senate early this year. An identical bill, S. 126, has been introduced in the Senate by Senators HUMPHREY and HATCH and it is my understanding that the Senate Labor and Human Resources Committee will consider the legislation at its earliest opportunity:

H.R. 1696

A bill to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; STATEMENT OF POLICY

SECTION 1. (a) This Act may be cited as the "Alcohol and Drug Abuse Amendments of 1983".

(b) It is the policy of the United States and the purpose of this Act to provide leadership in the national effort to reduce the incidence of alcoholism and alcohol-related problems and drug abuse through—

(1) a continued Federal commitment to research into the behavioral and biomedical etiology, the treatment, and the mental and physical health and social and economic consequences of alcohol abuse and alcoholism and drug abuse;

(2) a commitment to—

(A) extensive dissemination to States, units of local government, community organizations, and private groups of the most recent information and research findings with respect to alcohol abuse and alcoholism and drug abuse, including information with respect to the application of research findings; and

(B) the accomplishment of such dissemination through up-to-date publications, demonstrations, educational programs, and other appropriate means;

(3) the provision of technical assistance to research personnel, services personnel, and prevention personnel in the field of alcohol abuse and alcoholism and drug abuse;

(4) the development and encouragement of prevention programs designed to combat the spread of alcoholism, alcohol abuse, drug abuse, and the abuse of other legal and illegal substances;

(5) the development and encouragement of effective occupational prevention and treatment programs within Government and in cooperation with the private sector; and

(6) the provisions of a Federal response to alcohol abuse and alcoholism and drug abuse which encourages the greatest participation by the private sector, both financially and otherwise, and concentrates on carrying out functions relating to alcohol abuse and alcoholism and drug abuse which are truly national in scope.

THE ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION AND THE NATIONAL INSTITUTE OF MENTAL HEALTH, THE NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM, AND THE NATIONAL INSTITUTE ON DRUG ABUSE

SEC. 2. (a)(1) Title V of the Public Health Service Act is transferred to the end of the Public Health Service Act and redesignated as title XXI and sections 501 through 515 are redesignated as sections 2101 through 2115, respectively.

Sections 217(c), 217(d), and 384 of the Public Health Service Act (42 U.S.C. 218 and 278) are each amended by striking out "501" and inserting in lieu thereof "2101".

(b)(1) The Public Health Service Act is amended by inserting after title IV a new title designated as follows:

"TITLE ADMINISTRATION AND COORDINATION OF THE NATIONAL INSTITUTE OF MENTAL HEALTH, THE NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM, AND THE NATIONAL INSTITUTE ON DRUG ABUSE

"PART A—ADMINISTRATION AND INSTITUTES".

(2) Section 201 of the Act of May 14, 1974 (42 U.S.C. 3511) is transferred to title V of the Public Health Service Act established by paragraph (1), redesignated as section 501, and amended—

(A) by striking out "of Health, Education, and Welfare" each place it occurs;

(B) in subsection (c), by striking out "of the Public Health Service Act";

(C) by amending subsection (d) to read as follows:

"(d) To educate the public with respect to the health hazards of alcoholism, alcohol abuse and drug abuse, the Administrator shall take such actions as may be necessary to ensure the widespread dissemination of current publications of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse relating to the most recent research findings with respect to such health hazards.";

(D) by adding at the end the following:

"(e)(1) There shall be in the Administration an Associate Administrator for Prevention to whom the Administrator shall delegate the function of promoting the prevention research programs of the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse and coordinating such programs between the Institutes and between the Institutes and other public and private entities.

"(2) On or before January 1, 1984, and annually thereafter, the Administrator, acting through the Associate Administrator for Prevention, shall submit to the Congress a report describing the prevention activities (including preventive medicine and health promotion) undertaken by the Administration, the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse. The report shall include a detailed statement of the expenditures made for the activities reported on and the personnel used in connection with such activities.

"(f) The Administrator shall establish a process for the prompt and appropriate response to information provided the Administrator respecting (1) scientific fraud in connection with projects for which funds have been made available under this Act, and (2) incidences of violations of the rights of human subjects of research for which funds have been made available under this title. The process shall include procedures for the receiving of reports of such information from recipients of funds under this title and taking appropriate action with respect to such fraud and violations.".

(3) Section 101 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 is transferred to title V of the Public Health Service Act, inserted after the section 501 inserted by paragraph (2), redesignated as section 502, and amended—

(A) in subsection (a)—

(i) by striking out "this Act" the first time it occurs and inserting in lieu thereof "this section",

(ii) by striking out "assigned to the Secretary of Health and Human Services (hereafter in this Act referred to as the 'Secretary')" and inserting in lieu thereof "relating to alcohol abuse and alcoholism assigned to the Secretary", and

(iii) by striking out "of the Public Health Service Act", and

(B) by amending the section heading to read as follows:

"NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM".

(4) Section 501 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 502 inserted by paragraph (3), redesignated as section 503, and amended—

(A) in subsection (a)—

(i) by inserting "SEC. 503." before "(a)".

(ii) by striking out "this title" and inserting in lieu thereof "this section",

(iii) by striking out "of the Secretary of Health and Human Services (hereinafter in this title referred to as the 'Secretary') with respect to drug abuse prevention functions" and inserting in lieu thereof "relating to drug abuse assigned to the Secretary by this Act", and

(iv) by striking out "of the Public Health Service Act",

(B) by striking out "(hereinafter in this title referred to as the 'Director')" in subsection (b)(1), and

(C) by striking out the section heading

"§ 501. Establishment of Institute."

and inserting in lieu thereof the following:

"NATIONAL INSTITUTE ON DRUG ABUSE".

(5) Subsection (a) of section 406 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to section 503 (as so redesignated), inserted after subsection (d), and redesignated as subsection (e).

(6) Section 455 of the Public Health Service Act is inserted in title V of the Public Health Service Act after the section 503 inserted by paragraph (4) of this subsection and redesignated as section 504.

(7) The following sections are inserted in title V of the Public Health Service Act after the section 504 inserted by paragraph (6):

"REPORTS ON ALCOHOLISM, ALCOHOL ABUSE, AND DRUG ABUSE

"SEC. 505. (a) The Secretary shall submit to Congress on or before January 15, 1984, and every three years thereafter a report—

"(1) containing current information on the health consequences of using alcoholic beverages.

"(2) containing a description of current research findings made with respect to alcohol abuse and alcoholism, and

"(3) containing such recommendations for legislation and administrative action as the Secretary may deem appropriate.

"(b) The Secretary shall submit to Congress on or before January 15, 1984, and every three years thereafter a report—

"(1) describing the health consequences and extent of drug abuse in the United States;

"(2) describing current research findings made with respect to drug abuse, including current findings on the health effects of marihuana and the addictive property of tobacco; and

"(3) containing such recommendations for legislation and administrative action as the Secretary may deem appropriate.

"PEER REVIEW

"SEC. 506. (a) The Secretary, after consultation with the Directors of the National Institute of Mental Health, the National Insti-

tute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse shall by regulation require appropriate technical and scientific peer review of biomedical and behavioral research and development grants, cooperative agreements, and contracts to be administered through the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse.

"(b) Regulations promulgated under subsection (a) shall require that the review of grants, cooperative agreements, and contracts required by the regulations be conducted—

"(1) in a manner consistent with the system for scientific peer review applicable on the date of the enactment of this section to grants, cooperative agreements, and contracts under this Act for biomedical and behavioral research, and

"(2) to the extent practical, by peer review groups performing such review on or before such date.

"(c) The members of any peer review group established under such regulations shall be individuals who by virtue of their training or experience are eminently qualified to perform the review functions of the group and not more than one-fourth of the members of any peer review group established under such regulations shall be officers or employees of the United States.

"(d) The Administrator of the Administration shall establish procedures for periodic, technical, and scientific peer review of research at the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse. Such procedures shall require that—

"(1) the reviewing entity be provided a written description of the research to be reviewed; and

"(2) the reviewing entity provide the advisory council of the Institute involved with such description and the results of the review by the entity.".

(8) The following heading is inserted in title V of the Public Health Service Act after the section 506 inserted by paragraph (7):

"PART B—RESEARCH

"Subpart 1—Alcohol Abuse and Alcoholism".

(9) Sections 501, 503, and 504 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are transferred to the subpart 1 of part B of title V of the Public Health Service Act established by paragraph (8), redesignated as sections 510, 511, and 512, respectively, and amended as follows:

(A) Section 510 (as redesignated) is amended—

(i) by striking out "the Institute" in subsection (a) and inserting in lieu thereof "the National Institute of Alcohol Abuse and Alcoholism (hereinafter in this subpart referred to as the 'Institute')",

(ii) by striking out "make available through publications and other appropriate means" in subsection (b)(1) and inserting in lieu thereof "disseminate through publication and other appropriate means (including the development of curriculum materials)",

(iii) by striking out "; and such Council shall give" and all that follows in subsection (b)(3) and inserting in lieu thereof the following: ", giving special consideration to projects relating to—

"(A) the relationship between alcohol abuse and domestic violence,

"(B) the effects of alcohol use during pregnancy,

"(C) the impact of alcoholism and alcohol abuse on the family, the workplace, and systems for the delivery of health services,

"(D) the relationship between the abuse of alcohol and other drugs,

"(E) the effect on the incidence of alcohol abuse and alcoholism of social pressures, legal requirements respecting the use of alcoholic beverages, the cost of such beverages, and the economic status and education of users of such beverages,

"(F) the interrelationship between alcohol use and other health problems, and

"(G) the comparison of the cost and effectiveness of various treatment methods for alcoholism and alcohol abuse and the effectiveness of prevention and intervention programs for alcoholism and alcohol abuse.",

(iv) by inserting "or the impact of alcohol abuse on other health problems" before the semicolon in subsection (b)(5), and

(v) by amending the section heading to read as follows:

"ALCOHOL ABUSE AND ALCOHOLISM RESEARCH"

(B) Section 511 (as so redesignated) is amended—

(i) by striking out the last sentence of subsection (a),

(ii) by striking out the second sentence of subsection (b),

(iii) by striking out "of the Public Health Service Act (42 U.S.C. 292a)" in subsection (b), and

(iv) by striking out subsection (c).

(C) Section 512 (as so redesignated) is amended to read as follows:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 512. There is authorized to be appropriated to carry out this subpart $45,790,000 for fiscal year 1984. Of the funds appropriated under this section for any fiscal year, not more than 35 percent may be obligated for grants under section 511.".

(10) The following heading is inserted in title V of the Public Health Service Act after the section 512 inserted by paragraph (9):

"Subpart 2—Drug Abuse Research".

(11) Section 503 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to the subpart 2 of part B of title V established by paragraph (10), redesignated as section 515, and amended—

(A) by striking out "The Director" the first time it occurs in subsection (a) and inserting in lieu thereof "The Director of the National Institute of Drug Abuse",

(B) by amending subsection (b) to read as follows:

"(b) In carrying out the activities described in subsection (a), the Secretary, acting through the Institute, may—

"(1) collect and disseminate through publications and other appropriate means, including the development of curriculum materials, information as to, and the practical application of, the research and other activities under this section,

"(2) make grants or enter into contracts with individuals and public and nonprofit entities for the purpose of determining the causes of drug abuse in a particular area, and

"(3) make grants to and enter into contracts with individuals and public and private nonprofit entities for research respecting improved drug maintenance and detoxification techniques and programs.",

(C) by amending subsection (c) to read as follows:

"(c) For the purposes of subsections (a) and (b), there is authorized to be appropriated $56,160,000 for fiscal year 1984.",

"(D) by striking out the section heading and inserting in lieu thereof the following:

"DRUG ABUSE RESEARCH",

and

"(E) by inserting before "(a)" in subsection (a) the following: "SEC. 515.".

(12) The following headings are inserted in title V of the Public Health Service Act after the section 515 inserted by paragraph (11):

"PART C—MISCELLANEOUS PROVISIONS RELATING TO ALCOHOL ABUSE AND ALCOHOLISM AND DRUG ABUSE

"Subpart 1—Provisions Relating to Alcohol Abuse and Alcoholism".

(13) Sections 301, 201, 321, and 333 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are transferred to the part C of title V established by paragraph (12), redesignated as sections 520, 521, 522, and 523, respectively, and amended as follows:

(A) Section 520 (as so redesignated) is amended—

(i) by striking out "the Institute" in subsection (a) and inserting in lieu thereof "the National Institute of Alcohol Abuse and Alcoholism",

(ii) by striking out "section 321" in subsection (a)(4) and inserting in lieu thereof "section 522", and

(iii) by striking out "under this Act and under the Drug Abuse Prevention, Treatment, and Rehabilitation Act" and inserting in lieu thereof "under this title".

(B) Section 521 (as so redesignated) is amended—

(i) by striking out "section 413(b) of the Drug Abuse Prevention, Treatment, and Rehabilitation Act" in subsection (b)(4) and inserting in lieu thereof "section 525",

(ii) by striking out "title" in subsection (d) and inserting in lieu thereof "section", and

(iii) by striking out subsection (e).

(C) Section 522 (as so redesignated) is amended by striking out "of the Public Health Service Act" in subsection (a).

(14) The following heading is inserted in part C of title C of title of the Public Health Service Act after section 523 (as so redesignated):

"SUBPART 2—PROVISIONS RELATING TO DRUG ABUSE".

(15) Section 502 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the heading inserted by paragraph (14), redesignated as section 524, and amended—

(A) by striking out "The Director" in subsection (a) and inserting in lieu thereof "The Director of the National Institute on Drug Abuse",

(B) by striking out ", to promote the purposes of this Act," in subsection (b)(2),

(C) by striking out "section 407" in subsection (d) and inserting in lieu thereof "section 526",

(D) by striking out "under this Act and under the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" in subsection (d) and inserting in lieu thereof "under this title",

(E) by striking out the section heading and inserting in lieu thereof:

"TECHNICAL ASSISTANCE TO STATE AND LOCAL AGENCIES",

and

(F) by inserting before "(a)" in subsection (a) the following: "SEC. 524.".

(16)(A) Section 413 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 524 inserted by paragraph (15), redesignated as section 525, and amended—

(i) by striking out the section heading and inserting in lieu thereof:

"DRUG ABUSE AMONG GOVERNMENT AND OTHER EMPLOYEES";

(ii) by inserting before "(a)" the following: "SEC. 525."; and

(iii) by striking out "section 201(b) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" in subsection (b)(4) and inserting in lieu thereof "section 521".

(B) Sections 407 and 408 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act are transferred to title V of the Public Health Service Act, inserted after the section 525 inserted by subparagraph (A), redesignated as sections 526 and 527 and amended as follows:

(i) Section 526 (as so redesignated) is amended—

(I) by striking out the section heading and inserting in lieu thereof:

"ADMISSION OF DRUG ABUSERS TO PRIVATE AND PUBLIC HOSPITALS";

and

(II) by inserting before "(a)" in subsection (a) the following: "SEC. 526.".

(ii) Section 527 (as so redesignated) is amended—

(I) by striking out the section heading and inserting in lieu thereof:

"CONFIDENTIALITY OF PATIENT RECORDS";

(II) by inserting before "(a)" in subsection (a) the following: "SEC. 527."; and

(III) by striking out "of Health and Human Services" in subsection (g).

(c)(1) Sections 102, 103, and 502 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are repealed.

(2) Section 405 and 504 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act are repealed.

(d) Title V of the Medical Facilities Construction and Modernization Amendments of 1970 (Public Law 91-296) is repealed.

ALCOHOL AND DRUG ABUSE AND MENTAL HEALTH REPORTS BY THE SECRETARY

SEC. 3. (a) The Secretary of Health and Human Services shall submit to the Congress, on or before January 15, 1984, a report describing the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with—

(1) the problems of alcohol abuse and alcoholism,

(2) the problems of drug abuse, and

(3) mental illness.

(b) The report required by subsection (a) shall include information with respect to the services provided for alcohol abuse, alcoholism, drug abuse, and mental health under part B of title XIX of the Public Health Service Act. To obtain information respecting such services, the Secretary shall work with appropriate national organizations to ensure that State and local governments use compatible means of collecting data respecting such services so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

(c) In compiling data for the report required by subsection (a), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health Service Act.

DRUG ABUSE STRATEGY REPORT

SEC. 4. (a) Section 305 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act (21 U.S.C. 1165) is amended to read as follows:

"§ 305. Report

"The President shall submit to the Congress, on or before August 1, 1984, and every two years thereafter, a written report describing the strategy. The report shall specify the objectives, nature, and results of the strategy and shall contain an accounting of funds expended under title II.".

(b) Section 207 of such Act (21 U.S.C. 1117) is repealed.

HOUSE OF REPRESENTATIVES—*Monday, February 28, 1983*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore (Mr. LONG of Louisiana).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
February 24, 1983.

I hereby designate the Honorable GILLIS W. LONG to act as Speaker pro tempore on Monday, February 28, 1983.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, You have promised to be with all people wherever they are, whatever their need. We reach out in prayer for the homeless, the poor, those anxious about the future, those who are ill, or those to whom freedom has been denied. Instill in us, O God, the will to labor for justice and righteousness in our world that people will know Your fullness of spirit that gives peace and comfort to all. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 143. An act to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for 99 years certain lands held in trust for such band;

S. 304. An act to hold a parcel of land in trust for the Burns Paiute Tribe;

S. 366. An act to settle certain claims of the Mashantucket Pequot Indians;

S. 419. An act to provide that per capita payments to Indians may be made by tribal governments, and for other purposes;

S.J. Res. 15. Joint resolution designating month of March 1983 as "National Eye Donor Month";

S.J. Res. 21. Joint resolution to designate April 1983 as "National Child Abuse Prevention Month"; and

S.J. Res. 27. Joint resolution authorizing and requesting the President to designate the week of March 13 through 19, 1983, as "National Employ the Older Worker Week."

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries.

TRIBUTE TO FORMER STAFF MEMBER, DR. WILLIAM R. PITTS, SR.

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, it is my sad duty to inform the House of the passing this morning of Dr. William R. Pitts, Sr., one of the most dedicated and distinguished individuals ever to serve this House and its Members.

Bill Pitts, Sr., whose son continues to follow in his footsteps today, was a public servant in the truest and best sense of the words.

Bill devoted more than 40 years to the House, serving for a quarter century with Les Arends, my predecessor as minority whip. I know that Les admired him and depended upon him for everything. Being on staff back then was not what it is today.

Bill was a jack of all trades and superb at every task assigned him. If there was ever a staff member who could be described as indispensable, it was the old professor, Dr. Pitts.

Bill retired from the House in 1973, a scholar, a doctor of law, a counselor to statesmen and politicians and a citizen of great stature. He was wise, yet warm, intellectual, yet common in his approach. He was a great man, yet a humble man.

For all that he was and did, I suspect Bill would consider it an honor to be recorded in the history of the House as simply a dedicated public servant who left his mark on the institution he loved.

Bill may have lived his life behind the headlines, behind the spotlight, and in the shadow of the Members of this body, but he stood above us all. He contributed more to this country and more to the American way of life than most of us will ever hope to.

Services for Bill will be Friday at Fort Myer Chapel at 1 p.m. Memorials may be made to Arlington, Community Residences, Inc., 3136 North 10th Street, Arlington, Va. 22201.

CRISIS IN SCIENCE AND MATH EDUCATION, SHORTAGE OF SCIENTISTS, ENGINEERS AND TECHNICIANS

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, later this week the House is scheduled to consider two of the most critical issues facing our Nation: The crisis in science and math education and the shortage of scientists, engineers, and technicians. I urge my colleagues on both sides of the aisle to support H.R. 1310, the Emergency Mathematics and Science Education Act and the National Engineering and Science Personnel Act. This bipartisan initiative will go far toward attracting new teachers and upgrading the skills of current math and science teachers. This legislation will also insure an adequate supply of well-trained scientists, engineers and technicians to carry America into the technological age.

H.R. 1310 does not, however, address the problem of retaining math and science teachers. Thousands of math and science teachers leave the classroom each year for higher paying jobs in industry. If we do not eliminate the salary differential, the people we invest in with H.R. 1310 will apply their skills in industry rather than in the classroom. I have introduced legislation which directly attacks this problem. H.R. 836, the Math and Science Education Act, grants a tax credit to high-tech firms that hire math and science teachers during the summer. This initiative would supplement teacher salaries and provide them with hands-on-high-technology experience to prepare their students for future jobs.

H.R. 836 is an essential component of the solution to our education crisis. I urge my colleagues to support and cosponsor this initiative so vital to our Nation's future.

BAN ANY LAND DISPOSAL OF LIQUID HAZARDOUS WASTES

(Mr. BREAUX asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BREAUX. Mr. Speaker, the real problem with liquid hazardous waste in this country is simply not being addressed, in my opinion. The real problem is not that we are dumping chemical wastes in violation of existing regulations, but rather that we are continuing to dump them at all.

Our entire country is sick and tired of having toxic chemical wastes injected into our soil or dumped onto the ground. Those methods do not dispose of hazardous chemicals; they only store them so they can continue to haunt us like some dark cloud hanging over our heads.

I have, therefore, introduced legislation which will immediately ban any land disposal of liquid hazardous waste unless EPA finds there is no other technologically feasible means of doing it located within 500 miles.

Within 5 years no person could dispose of these chemical wastes by any land method, period.

Also, immediately the Federal Government, which is the largest generator of liquid hazardous waste is directed to dispose of these wastes by means other than land storage.

I would offer this legislation and ask other Members who are interested in taking an approach which eliminates the real problem to join me in cosponsoring this legislation.

SPECIAL SCREENING OF FILM, "ACID RAIN: REQUIEM OR RECOVERY"

(Mr. D'AMOURS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. D'AMOURS. Mr. Speaker, I would like to advise Members that I have arranged a special screening of the film, "Acid Rain: Requiem or Recovery." The film will be shown at 10:30 a.m., Tuesday, March 1, in the House Merchant Marine and Fisheries Committee hearing room, 1334 Longworth House Office Building.

"Acid Rain: Requiem or Recovery," produced by the National Film Board of Canada, has been showing in the United States for over 9 months, and has won top honors in a competition sponsored by the American Society of Foresters. The Justice Department has now classified this film as political propaganda.

In view of this extreme action, I think it is important that Members avail themselves of the opportunity to see this film irrespective of their personal positions on this issue in order to judge for themselves the propriety or impropriety of the administration's action.

WHISTLE BLOWERS USUALLY ARE DEMOTED, TRANSFERRED, AND REPRIMANDED

(Mr. DICKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, there is a phenomenon in this city which I find particularly distasteful. Whenever one of the courageous members of the bureaucracy, be it the EPA or the Defense Department, tells the truth—the whole truth—to Congress, we rarely hear from that person again. The internal pressures of the bureaucracy have a way of responding to the so-called whistle blowers which usually results in demotion, transfer, and reprimand. Recently we have seen this occur with Hugh Kaufman of the Environmental Protection Agency, and I fear that our next candidate now appears on this week's cover of Time magazine. Franklin Charles Spinney testified last Friday before the Senate Budget Committee and was candid, honest, and thorough in saying that our vaunted defense buildup is a house of cards. In typical fashion, the Defense Department tried to cancel, postpone, and downplay the Budget Committee meeting last week; and since it has issued several confusing clarifications and denials of parts of Mr. Spinney's statement. But once again we are fortunate that the national media has revealed the importance of Mr. Spinney's remarks. Unfortunately, however, I fear that the picture of Mr. Spinney on the front cover of Time magazine may preclude further comment from Spinney to congressional committees. As a member of one of those interested committees, the Defense Appropriations Subcommittee, I would like to state that I hope we will be seeing a lot more of Mr. Spinney around Capitol Hill.

SYNFUELS PROGRAM SHOULD BE RESEARCH AND DEVELOPMENT

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, today I am introducing legislation which would change the statutory character of the U.S. Synthetic Fuels Corporation.

Mr. Speaker, you may remember that back in 1980 when the Congress first created this agency, it had originally begun here in the House of Representatives as an R&D activity at a cost of some $3 billion. However, when it came back from the Senate, a tremendous amount of additional money, some $85 billion, had been added to it and the character had been changed from an R&D activity to a commercial-scale development.

In my judgment, Mr. Speaker, this needs to be changed. Our legislation would convert it back strictly to research and development. In today's energy marketplace, we certainly do not need to be spending the billions upon billions of dollars that we are now spending in order to finance the synfuels program. In my judgment, Mr. Speaker, we can use that money in a much better way, particularly to reduce the large deficits.

THE INTERNATIONAL DEBT PROBLEM

(Mr. LEWIS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEWIS of California. Mr. Speaker and my colleagues: One of the most critical issues facing the Congress this year involves the international monetary crises, the reality that the Third World presently finds itself in some $700 billion of debt largely extended by allied and American bankers—a good portion of which will not likely be repaid.

Recently I had the privilege of meeting with a group of distinguished American economists who had come together in Washington to analyze this situation. Following their discussions, they prepared a paper which I would add to my remarks today. This is, in my judgment, the most lucid and the most objective analysis of this circumstance, with clear recommendations as to what policy changes ought to be a part of the decisions we will be making in the months ahead.

Mr. Speaker, I commend this paper to my colleagues and suggest they evaluate it in depth before they are asked to vote on the international financial issues that confront this Congress.

The analysis follows:

THE INTERNATIONAL DEBT PROBLEM, INSOLVENCY AND ILLIQUIDITY: A POLICY PROPOSAL

(A Statement prepared by the Ad Hoc Committee on International Debt and U.S. Financial Policies—Jan. 14, 1983—Karl Brunner, Michele Fratianni, Morris Goldman, Jerry L. Jordan, Allan H. Meltzer, Anna J. Schwartz)

I. THE PROBLEM

The total volume of international debt of developing nations rose from about $340 billion in 1978 to about $640 billion in 1982. This increase of almost 90 percent over four years, even after adjustment for world inflation, has outpaced the debtor nations' real growth. Interest payments measured in current dollars exploded from about $20 billion to approximately $66 billion over the same period. A marked increase in the average rate of interest payable on outstanding loans, reflected in a more than 300 percent rise of interest payments compared to the 90 percent increase in debt, aggravated the debtor nations' real debt burden. Over the

same four years the proportion of international reserves to imports of developing nations fell from 27 percent to 17 percent.

A change in the debtor nations' structure of outstanding debt worsened their position. One-third of the $300 billion addition to developing nations' indebtedness was short term. The proportion of short-term debt in total international indebtedness of developing nations rose from about 18 percent in 1978 to approximately 28 percent in 1982. Commercial banks dominated international lending during the past four years. "Official sources" supplied less than one-third of total international loans.

The surge of international indebtedness exceeded any relevant real economic prospects and could be validated only by an acceleration of world-wide inflation, or at least, by an acceleration of inflationary policies in the United States. When major industrial nations shifted around 1980 to an anti-inflationary policy there were severe adjustment problems in all economies, and particularly for debtors, domestic and international, who had extended their debt position on the assumption that inflationary policies would continue.

The change from an inflationary to a disinflationary regime was not the only change affecting debtor nations. The variations in the real price of oil observed over the past four years first disappointed expectations of oil-importing and subsequently of oil-exporting nations. That change did not dominate their economic fate, however. The variety of experiences among developing nations points to the decisive role of domestic economic policies. Fiscal and monetary policies in some countries raised inflation above the worldwide average, and induced a flight of capital or stimulated hoarding of foreign currency. Economic policies frequently obstructed exports and encouraged imports. Policies to control food prices discouraged agricultural expansion so foreign exchange has been used to import food.

The complex network of international credit began to crack with the suspension of payments on Poland's debt. The fissures widened last year and the events in Argentina, Brazil and other nations, foremost in Mexico, threatened a chain reaction of insolvencies in debtor and creditor nations and a spreading liquidity crisis. Many feared that the world economy would be pushed into a disastrous depression.

II. THE SEARCH FOR A POLICY

A sense of emergency has gripped policymaking in Washington and Europe. Complex negotiations are under way to prevent defaults: to ward off the insolvency of creditors, and to exorcise the threat of financial collapse. Central banks have provided new credits and regulators have assured banks that they would disregard the low quality of de facto defaulted claims. Commercial banks have been urged and even prodded to extend additional credit to finance overdue interest payments. Perhaps most indicative of the current mood are the moves to enlarge the borrowing facilities of the IMF and related international institutions. The magnitude of the planned expansion of the IMF's facilities has been repeatedly raised over the past twelve months, particularly by the US government.

There is little evidence and almost no assurance that the series of piecemeal improvisations will provide a solution to the international debt problem. A policy dominated or publicly justified by panicky fears of a "debt bomb" or a deflationary collapse will most likely produce serious new problems in the future. The improvisations may obscure de facto defaults on actually prevailing moratoria, preventing deflation, but risking a drift into a new round of worldwide inflation or the wasteful use of potentially productive resources in various forms of a bailout.

The rush to improvise some urgent actions should not blur policymakers' vision. A long-run strategy is required to guide the tactical choices to be made in the more immediate future. The following criteria constitute a viable long-run strategy to overcome the current problem and provide a framework for the future.

No deflation: There is no reason to let the world or the creditor nations slide into a deflation and deep depression. A financial collapse or a major collapse in the financial industry should be, and can be, avoided.

No inflation: Similarly, there is not justification for recourse to inflationary policies to alleviate the debtor nations' real debt burden or to "provide additional liquidity" to debtors and creditor banks. Inflationary policies "solve" the debt problem by shifting the losses associated with the current state of international debt to the ultimate creditors, i.e., the holders of money and other nominal liabilities issued by banks and governments. This "solution" would reenforce the tendencies toward permanent inflation and impose high social costs.

No bailouts: There should be neither bailouts of debtor nations nor of creditor banks. The losses experienced or expected by the banks should be borne by their management and shareholders. Each case of potential default should be judged separately to determine the relative permanence of the underlying conditions. Additional loans cannot solve the permanent underlying problem of countries that have borrowed to maintain consumption above their prospective income; additional loans can assist countries faced with transitory adjustment difficulties. Poland and Brazil exemplify the two alternative cases. The probability that citizens of creditor nations will pay a tribute to the debtor nation under the guise of additional loans is comparatively small when loans are made to adjust to a transitory problem. The failure of the creditor nations to cope with de facto permanent default encourages the taxing of citizens in the creditor nations and imposing on them a corresponding loss of wealth. The loss could be contained if the permanence of the problem would be recognized now and acknowledged by policy makers, regulators, and banks.

The provision of additional loans without discrimination between permanent and transitory problems of debtors fosters incentive among debtor nations to continue policies that contribute to the current problem. Under the circumstances they find it useful to raise their demand for loans, to reject requests for domestic adjustments, or renege on implementing the policies that are agreed to when loans are extended.

The long-run consequences of negative incentives produced by piecemeal improvisations seriously affect the productive use of our resources. A persistent stream of bailout funding directs portions of our savings away from the most productive use. The savings absorbed in bailouts most probably will be used by debtor nations to maintain consumption in excess of their expected income or to protect a large political apparatus that makes little contribution to real economic growth.

The requirement that short-run measures be formulated in the context of an explicit longer-run strategic conception helps to assure that policy will not decay into imaginatively camouflaged bailouts. The longer-run strategy imposes obligations on both creditor and debtor nations. The creditor nations must seek a stable pattern of financial policymaking to prevent major swings between inflationary and disinflationary phases of policymaking. Creditor nations must oppose protections. The expansion of world trade forms a necessary condition for the resolution of the longer-run debt problem.

Debtor nations also bear an important responsibility. Variations in the financial fate observable among many nations in the "Third World" direct our attention to the role of domestic policies. This overhaul is an important condition for the economic viability of the debt. Without the needed changes in the course of domestic policies the probability of de facto default remain high.

III. ASPECTS BEARING ON DEBTOR NATIONS

The accumulated volume of international debt contains liabilities of both government and private institutions usually contracted in terms of a foreign currency. This latter condition exposes the debt to risks beyond those associated with the fate of a private business.

The financial failure of a private firm does not destroy the real resources it owns. These resources will remain intact and can still be operated to produce output in the future. The financial failure simply means that the balance sheet must be reevaluated and union contracts possibly renegotiated. Procedures exist to adjust valuations and to distribute the loss. Nothing in the procedures prevents the continued operation of productive resources. On the contrary, the adjustments described create an opportunity for a new management to put productive resources to work and to scrap unproductive processes. Financial failure of a private firm need not involve a social loss. It always involves a redistribution of wealth however.

Our current problem has an additional dimension that arises from the fact that foreign debt must be serviced in foreign currency. This exposes both private debt and government debt demoninated in foreign currency to the risks of government policy. With all debt denominated in domestic currency the government can always prevent explicit default by taxation or inflation. International indebtedness closes this route. Servicing of foreign debt requires conversion of domestic money into foreign money at exchange rates that reflect the government's policies. Policies that obstruct activities with comparative advantage, that guide the allocation of investable resources to raise consumption at the cost of investment for political convenience, and lastly, that support highly inflationary monetary actions, all contribute to raise the cost of conversions into foreign currency. Whatever other conditions may have contributed, or may contribute in the future, the domestic policies pursued by the debtor nations are generally sufficient to create or avoid a permanent problem of de facto default on a nation's international debt.

The best opportunities for productive investments in private firms can be turned into highly risky prospects by a government's general economic or financial policies. The pattern of policies pursued by governments determines the usefulness of continued lending. There is clearly no justification to lend additional funds without a clear understanding that a debtor nation's policy

if pernicious, will be substantially changed. Without such a commitment the underlying pattern will persist. Under such conditions it is advisable to recognize the actual default. The default acknowledges that the creditor nations have suffered a loss and that further lending will not prevent a future default. The creditors must be made to recognize that they have suffered a permanent loss that cannot be recouped by further transfers of wealth camouflaged as loans.

IV. ASPECTS BEARING ON CREDITOR NATIONS

The improvisations emerging under the pressures of concerned policymakers and banks confronted with potential insolvency offer no assurance that they will not drift into an international Ponzi scheme. The absence of any lien on government assets, in contrast to what is customary in private borrower-lender relations, makes the problem of an insolvent government debtor very difficult indeed. The dependence of private debt servicing on government policy amplifies the problem. It becomes tempting under the circumstances to develop bailout policies benefiting both creditors and debtors at the expense of the ordinary citizen.

Once more, an explicit default without bailout is the better course whenever debtor nations show little prospect of accepting conditions that are consistent with the long-term economic viability of their international debt. This admission of default means recognition and acceptance of a loss in wealth by creditors. This loss, even in the case of a temporary insolvency, need not destroy the real resources used in the financing industry. Banks, like other firms that are temporarily insolvent, can operate after appropriate adjustments and pursue a prospective stream of earnings. The human and non-human resources would still be available to generate future earnings that would absorb the current losses over time. The losses would thus be borne by those groups responsible for them.

There is of course the possibility that recognition of such losses may invite liquidity problems. A run on banks, as in the early 1930's, may emerge. In contrast to the 1930's, the liquidity problem would appear as a consequence of insolvencies.

Governments have a responsibility to prevent such runs. The appropriate central bank's response to bank runs has been clearly defined since Bagehot's Lombard Street, published more than one hundred years ago. The central bank needs to act promptly as a lender of last resort, offering whatever advances of base money may be required to finance the conversion of deposits into currency. The execution of this function presents no basic problem and can be carried out in various ways without recourse to accelerated monetary expansion and inflation.

Some confusion apparently prevails in the public arena about the distinction between a bailout and the execution of a lender-of-last resort function. Lending base money as a "last resort function" does not, and should not, mean that the loss of wealth is transferred to the central bank or the taxpayers. Nor should the central bank hesitate in extending loans because of inadequate collateral. Such hesitation would be entirely inappropriate as the banks involved would still, over time, have to bear their own losses.

V. THE COMPONENTS OF A POLICY

The characterization of the problem and the associated issues leads us to make seven recommendations.

1. Explicit formulation of a long-term strategy

The government has not formulated a long-term plan to guide its short-run actions. We run the risk of drifting into a policy of accelerated inflation and bailouts with burdensome long-term consequences. To stop this drift, governments must discriminate between countries that are unlikely to repay in the future and countries that can be expected to earn enough foreign exchange to repay principal and interest if payments are rescheduled. Countries that are unlikely to repay should be declared in default.

2. Rescheduling the maturity structure of outstanding debt

Insistence on repayment of maturing debt lowers any chance of a longer-run solution. Maintaining the flow of interest payments should be the immediate concern to protect the economic value of the loans. The magnitude of the problem and the long-term requirements of the solution suggest that rescheduling should be arranged at regular intervals. This approach offers an opportunity to monitor and assess the execution of commitments to adjust domestic policies that debtor countries accept as a condition of rescheduling.

3. Gradual adjustment of new loan extensions

This aspect is similar to a shift from an inflationary to a disinflationary policy. A sudden halt in international loan extension is likely to aggravate the problem. It contributes to uncertainty and confusion. But further loan extensions by governments and the financial industry without attention to a long-run strategy will worsen future problems. Loan extensions need to be tied to the debtor nations' commitment to alter their domestic policies. In the absence of such a commitment, interest payments may depend on further loan extensions even after the improvements expected with recovery from the current recession. This is not a viable solution. The veil of financial operations covering the de facto moratorium would rip open at some point in the future. Bailouts without reform merely postpone the day of reckoning. The ultimate reckoning would involve even larger losses of wealth for the western nations as a result of the implicit tribute or capital levy they paid to debtor nations.

4. The role of the IMF

Monitoring and assessment of domestic policies of both debtor and creditor nations form a crucial element in our program. The IMF seems the only institution equipped to perform this duty. However, this task requires a reexamination of the IMF's usual "austerity programs" that encourage countries to reduce imports. Concurrent reductions of imports by several debtor nations shifts the burden of adjustment onto other countries. Financial policies and the creation of incentives to produce and export should be the major targets of the IMF.

We admit at this point to some unease and reservations about a permanent increase in the IMF quota. The institutional interests of its bureaucracy contribute to the likelihood of massive expansion of lending facilities with a disposition for bailout under one guise or another. The only justification for loans is to assist countries to solve a temporary problem. Temporary problems do not require a permanent increase in the IMF quota.

5. Illiquidity

No liquidity crisis has thus far emerged and no such crisis need be tolerated. The prevention of such a crisis with the consequent threat of deflation does not require inflationary actions by the central banks. The central banks, as lenders of last resort, should make a commitment in advance to provide the required amounts in central bank money to all banks suffering mass conversion of deposits into currency. This operation can proceed without accelerating monetary growth and without abandoning a policy of gradually moving to a stable price level.

6. Insolvency

The potential spread of insolvency in the financial industry presents a state of affairs very different from the 1930's. Insolvency then resulted from the mismanagement of the liquidity crisis by the Federal Reserve. In contrast, a liquidity crisis would probably result now from defaults by borrowers.

Insolvency involves a loss of wealth. The loss must be suffered by some group. Our stand against its "socialization" i.e., a bailout, means that owners of banks (i.e., their shareholders), management, and some groups of creditors (owning non-liquid claims) must bear the loss. This does not require a formal bankruptcy and a closure of the banks involved in all cases. Banks that possess capital in the form of human resources, organization and connections may be able to operate profitably. They should be enabled to continue as operating units if they can be expected to cover their losses from prospective earnings and reestablish their solvency within a stipulated number of years.

7. Long-term consequences

A proper long-run policy will induce a sharpened risk evaluation of the competing banks by borrowers and depositors. It will reward management with a better sense of the risks associated with various loans and penalize incompetent or reckless management. Divergent movements in share values, in the cost of capital for various banks, and in their respective liability costs will express these evaluations. The currency ratio maintained by the public will probably be somewhat larger for some time as a result. The average spread between asset yields and interest rates offered on liabilities will also increase. These adjustments to a long-term plan will reduce the risk of a reoccurrence. A bailout, with losses borne by the taxpayers, will teach the lenders and borrowers that there is little risk to them in international lending and low costs of following imprudent policies.

EPA DELAYED CLEANUP OF HAZARDOUS WASTES IN MINNESOTA

(Mr. SIKORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKORSKI. Mr. Speaker, this weekend a UPI story confirmed my worst suspicion that the highest officials of EPA delayed cleanup of hazardous wastes at the Reilly Tar Site in Minnesota because of politics. It seems our site was a victim of EPA's political response to the Stringfellow site in California.

Although EPA Administrator Anne Gorsuch Burford has claimed her "program has been aggressive and free of politics," at least four EPA officials have now confirmed it is simply untrue. This is a classic, immoral example of what happens when a public official departs from her oath of office and makes decisions based on politics.

Even more shocking is today's disclosure that the Justice Department is not aggressively pursuing prosecution of just this type of political manipulation of Superfund money.

I call on the President to fire the EPA Administrator and instruct the Justice Department to undertake the aggressive, thorough investigation that is needed to get this mess cleaned up.

ISRAEL

(Mr. McNULTY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McNULTY. Mr. Speaker, recent events in the international waters of the Gulf of Sidra, the deployment of four AWAC's to Egypt, and the continuing presence of 1,200 marines in the international peacekeeping force in Lebanon remind all of us of the volatile problems in the Eastern Mediterranean.

In international affairs it is most important to remember the art of getting done what can be done.

Perhaps the most fruitful opportunity in the region is to encourage King Hussein of Jordan to begin direct negotiations with Israel.

The example set by the late President Sadat of Egypt ought to be followed in entering discussions: That no attempt ought to be made by either party to dictate the outcome before the negotiation process begins.

Direct discussions must be held. The Jordanian Government cannot expect to negotiate through American proxies with Israel. America can support the beginning of the process but neighbors must talk with neighbors.

There is no linkage between the issues outstanding between Israel and Jordan to other myriad problems of the Middle East. Matters between these two States are sufficiently complicated as it is.

Mr. Speaker, America has an abiding and permanent interest in the security of the Israeli democracy. It is in pursuit of that interest that America can and must act to see that negotiations begin.

NATURAL GAS CONSUMER REGULATORY REFORM AMENDMENTS OF 1983—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-23)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce and ordered to be printed:

(For message, see the proceedings of the Senate of today, Monday, February 28, 1983.)

HEALTH INCENTIVES REFORM PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-24)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means and the Committee on Energy and Commerce and ordered to be printed:

(For message, see proceedings of the Senate of today, Monday, February 28, 1983.)

SYNFUELS: R&D ONLY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 20 minutes.

Mr. CORCORAN. Mr. Speaker, since 1980, we have learned much about the way this Nation produces and consumes oil. We know now that it was not the political turmoil in Iran that put Americans in gasoline lines in 1979, but a misguided system of federally imposed price and allocation controls. We also know that when domestic price controls on oil were removed, domestic oil production held steady, rather than declined as had been occurring under price controls. We have seen consumers large and small devise ways to use energy more efficiently. As a result, oil consumption has fallen 13 percent since 1979 in the non-Communist world while U.S. demand has fallen 19 percent. This decline in demand, in conjunction with the development of non-OPEC crude oil supplies, has brought OPEC to the brink where it now teeters.

There are those professional doomsayers who forecast that with economic recovery, America will return to its oil-guzzling ways. Certainly some oil demand will come back with increasing economic activity. However, people are not going to take off their storm windows or rip out their insulation. More importantly, since they are larger consumers, industries are not about to undo the steps they have taken to reduce their engrgy costs. A February 24, 1983, Wall Street Journal article reported that most oil companies predict flat demand or small increases this year and "unspectacular gains even during an extended economic recovery."

Why? As the article explains:

> Commercial airlines are unlikely to burn more than the 10 billion gallons of oil they used last year even if traffic gains appreciably, because new planes on order use about 35 percent less fuel * * * new-model autos also are likely to continue emphasizing fuel efficiency even if they start growing in size again * * *

Celanese Corp., reports that conservation steps have made one of its chemical plants 79 percent more fuel efficient. Ford Motors is now monitoring heat flow by computers to save energy. According to Ford's energy engineering manager, these changes are part of basic operations and are not going to be reversed.

These basic changes in operating have completely turned the tables on OPEC and the conventional wisdom of ever-increasing oil prices. On February 22, John Lichtblau, president of the Petroleum Industry Research Foundation, testified before the Senate Energy Committee that OPEC will probably be able to hold a new price floor at $28 to 30 per barrel. He noted, however, that "the possibility of a price collapse is a very real one and will remain so for a number of years, given the likely demand for OPEC oil in the 1980's."

With this background, it should not be surprising that after more than 2 years, the Synthetic Fuels Corporation has been unable to find a single commercial synthetic fuel project upon which to bestow some of the nearly $15 billion in authorized funding authority that is available to it. As the cost of synthetic fuel projects soared and the cost of oil dropped, major equity sponsors withdrew from project after project. Now, the SFC has been reduced to issuing "letters of intent," and "letters of interest." With these letters in hand, the SFC hopes that project sponsors will be able to round up the remaining equity partners that they need.

Judging from the two letters of intent that have been issued, we may be better off it they do not. The first offers $465 million in loan guarantees and price guarantees to the first colony peat-to-methanol project in Creswell, N.C. This was done in December over the objection of SFC staff who warned that the limited availability of peat moss and its location in wetlands areas prevent any technology based on peat moss from making a significant contribution to our domestic

energy production capability. Moreover, there currently exists substantial excess methanol production capability capacity in this country and the price support subsidy ($1.05 per gallon as of January 1983 plus inflation plus 2 percent annually) is more than double the cost of methanol on the spot market.

The SFC has also signed a letter of intent with sponsors of the Santa Rosa tar sands project in New Mexico to provide up to $41 million in loan and price guarantees for the production of 4,000 barrels per day of oil. Apparently the SFC has some misgivings about how meritorious this project really is because the Santa Rosa sponsors must construct and operate a pilot project for 90 days "to confirm the technical and economic feasibility of the project" before any final assistance contracts are signed.

In January, the SFC issued a "targeted" solicitation for western oil shale projects, which promises up to $1.6 billion per project in price guarantees, up to an average of $67 per barrel in March 1983 dollars, with incremental prices as high as $95 per barrel. Offering such extravagant price guarantees, the SFC is putting itself in the same position as the banks who made liberal loans to oil producing nations on the security of ever-rising oil prices. In effect, the American people will be forced to pay for falling oil prices when they ought to be benefiting from them.

The potential for billion dollar outlays under such price guarantees is not idle speculation. Union Oil is constructing a plant near Parachute, Colo., that is expected to begin producing 10,000 barrels of oil from shale daily by late 1983. In July 1981, the Department of Energy guaranteed Union a floor price of $42.50 a barrel escalated for inflation and increases in natural gas costs, up to a total of $400 million. When the SFC became formally operational, the Union project was transferred to it from DOE.

In a February 18, 1983, report, "Analysis of U.S. Liability for Payments Under the Union Oil Shale Purchase Agreement," CRS analysts Larry B. Parker and Lawrence C. Kumins determined that the initial subsidy to Union will be $13 per barrel during 1983. This is the difference between the market price of $39.48 per barrel for the products specified in the DOE agreement and the guaranteed price of $52.57 per barrel to which Union is entitled under the agreement.

Although any oil price projections must be regarded as speculative, CRS indicates that the "most likely outcome will be that $342 million will be paid out in subsidies by 1989." Even with higher oil price assumptions, more than a quarter of a billion dollars will be paid to Union by 1989. Lower oil prices will cause the entire $400 million to be expended before 1989. With this kind of a deal, it is not surprising that Union has applied for additional SFC assistance to expand its oil shale facilities.

I have been studying the synthetic fuels program for some time. I have met with members of the SFC Board and I respect their competence and integrity. They are doing their best to implement the Energy Security Act of 1980, a law based on the conventional petroleum wisdom of 1980. I am now convinced that we must change that law. One look at the current and projected budget deficits is enough to show that we cannot afford to spend $88 billion or $50 billion or even $15 billion on synthetic fuels now or in the foreseeable future.

This does not mean we should abandon synthetic fuels entirely. I voted for the original Moorhead synthetic fuels research and development bill in 1979 and I continue to believe in the desirability of synthetic fuel research and development. The Chairman of the Synthetic Fuels Corporation, Edward Noble, notes that 90 percent of the Nation's fossil energy reserves are either oil shale, tar sands, or coal. We should be working to prepare the technology to utilize these reserves when they are needed.

Therefore, I am introducing today legislation to retool and redirect our synthetic fuels program from synfuel commercialization to synfuel research and development. Up to $3 billion of the funding authority currently available to the SFC may be used by the SFC, preferably for the purpose of funding synthetic fuel research and development. The remaining $11.9 billion now available to the SFC would revert to the Treasury. There would be no additional funds for the SFC and its ability to enter into new commitments would terminate on June 30, 1984, rather than September 30, 1992, as provided by the Energy Security Act. Finally, the Corporation would not be authorized to enter into joint ventures or to own synthetic fuel projects as it now may do.

This legislation would save more than $12.2 billion, assuming as the Executive Vice President of the SFC, Jimmie Bowden, has said, that the Corporation "will have to make good on most of the $15 billion in contingent liabilities it is expected to commit" and that the SFC's operating budget between 1988, when the Corporation would phase out entirely, and 1997, when the Corporation ends under present law, would be $35 to $40 million per year. At the same time, we will be using the expertise the SFC has developed to advance the state of synthetic fuel technology and hopefully to bring us closer to the time when commercial production of synthetic fuels does make sense.

With your support, we can make a change that is good energy policy, good environmental policy, and good budget policy.

Mr. Speaker, in view of the changed conditions, I would hope that not only would I have the support of my good friend, the gentleman from Massachusetts (Mr. MARKEY) but also that we would be able soon to get hearings in the Committee on Energy and Commerce on which both of us are privileged to serve.

Mr. MARKEY. Mr. Speaker, will the gentleman yield?

Mr. CORCORAN. I am pleased to yield to my good friend, the gentleman from Massachusetts.

Mr. MARKEY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I, too, support the general thrust of the proposal of the gentleman from Illinois (Mr. CORCORAN). I believe that the Synthetic Fuels Corporation, from the very first day, was a poor concept. It was one that said we were going to substitute Federal intervention for the workings of the free market principles that I think all of us in this body espouse.

My belief, as I am sure is that of the gentleman from Illinois, is that either we do one of two things. Either we put all energy sources out there to compete equally for scarce private investment dollars or we give all the same kinds of subsidies. In fact, there are many energy sources in this country that are starved for financing and cannot possibly compete for the development of new energy resources, as can those people who are able to benefit from having the life support system of the Federal Government being strapped on to a synthetic fuels industry that in fact could not survive otherwise.

There are many other better ways in which that money could be spent. I feel that the gentleman from Illinois (Mr. CORCORAN) in his philosophy is correct, and that is that the reordering of the energy markets in this country are better served by allowing those free market forces that he spoke of to operate freely rather than having us substitute our judgment as to which energy sources ought to be given preference.

In this particular instance I think that $3 billion is better than $88 billion. I would prefer to see it even less, but if in fact that is the best we can do, I think it is an approach that we ought to accept. So we ought to allow Adam Smith to rest comfortably, because I am sure he would be spinning in his grave if he ever saw a free market administration also simultaneously supporting a synthetic fuels program.

Mr. Speaker, I do support the direction of the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN. Mr. Speaker, I thank my good friend, the gentleman from Massachusetts (Mr. MARKEY), for his comments and I look forward to having his support on this issue.

A MEXICAN CUBA?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

● Mr. GONZALEZ. Mr. Speaker, human grievances are piling up in Mexico, and they threaten to create violent disorder there. The kind of poverty that exists is beyond most American understanding, and the fact is that Mexico is getting more—not less—poor. In the smooth phrasing of bankers and economists, Mexico is experiencing real losses in living standards. Put in more realistic terms, hunger is turning into starvation. Mass misery and mass despair are the ingredients of instability and the feeding ground of revolution, the match that sets off the fire of violence.

We have already seen disaster in the case of Mexico's neighbors—Guatemala and El Salvador. The Government of Honduras burst like a rotten corpse, and the new government could not today be said to be exactly a close friend of the United States. These events did not happen overnight; they were the result of years of neglect, malign and benign alike. They were the result of corrupt government, of grievances left unredressed. They were the result of poverty that finally turned to desperation.

Mexico is in very great trouble. We speak of it here as economic trouble, but it is more than that; it is human and political trouble as well. The pressure is building up in Mexico like steam in a closed vessel. Left untended, that pressure may well burst. If it does, El Salvador will look like a county fair, and the Cuban boat exodus like a Sunday excursion.

We need not face all this idly; in fact, we cannot afford to do so. If we want a friendly and stable neighbor in Mexico, we have to act. We have to be constructive and positive. We cannot afford to wait until the dam bursts; that will be too late.

Last October, and again in November, I urged the President to undertake an effort to build strength and stability in Mexico and elsewhere in Latin America. I asked that the President convene a summit conference for that purpose. I suggested that the organization of American States could be strengthened and vitalized, and that it could be a source of great strength. All of these suggestions were rejected by the administration.

I believe that it is not too late to overcome the problems in Mexico and elsewhere in Latin America, but the day is growing late. It will not be possible to solve those problems without American leadership and commitment. It will not be possible to solve those problems without hemispheric cooperation and commitment. It will not be possible to solve those problems by continuing to ignore the need for human hope and progress. It will not be possible to solve those problems without creative action.

I renew my suggestion to the President, and make part of the RECORD my correspondence with him, and also comments that I made in San Antonio on February 21, as reported in the San Antonio Express of the following day.

If we know what is happening, it is incumbent on us to act. We do know what is happening. We have a responsibility to act, and I urge the President to convene a hemispheric conference to exert American leadership, through the Organization of American States. That, and that alone, would be the kind of action that is broad enough, deep enough, and of a range long enough, to quell the fires that are raging in Latin America today, and not only in Mexico—though certainly it is there that our interests are greater, most exposed, and most vulnerable.

[From the San Antonio Express, Feb. 22, 1983]

HBG WARNS MEXICO COULD BE NEW CUBA

(By James McCrory)

The United States cannot afford to have a Cuba next door in Mexico, and if it reaches that point the United States will have an Afghanistan on its hands, U.S. Rep. Henry B. Gonzalez declared Monday.

DISORDER

Speaking out as he prepared to leave San Antonio for Washington, the 11th District congressman said that given the conditions of the economy in Mexico and the resulting social problems, there is a potential for serious disorder in Mexico.

Whether this disorder is seen as Marxism or Castroism, the congressman said, is beside the point point once things get out of control.

Gonzalez said the United States cannot continue to unilaterally intervene in countries to the south, as it has, without tragic results.

"We have viable international agencies like the OAS (Organization of States) we could cooperate with in an effort to stabilize the continent," Gonzalez said.

"What it means is, America is abdicating its responsibilities as leader in this part of the world. We have vital stakes in our front porch and we can't turn our backs on it. Of course, we can't tolerate a hostile government—fascist, communistic, vegetarian, or what have you."

Gonzalez's remarks came after U.S. Sen. Henry Jackson, member of the Senate Armed Services Committee, appeared on CBS's "Face the Nation" and said Mexico is the real target of Castro-Soviet activity to the south.

Jackson also said the fragile situation in Mexico is one of the prime concerns of the United States and warned of the possibility of a revolution and a Castro government on the border if the government is destabilized.

Gonzalez said Jackson's concern is proper but that it is unfortunate that the senator didn't speak out against what he said were the bankrupt policies of former Secretary of State Alexander Haig and President Reagan and others making the potential dangers a reality.

SUMMIT DENIED

He said the White House turned a deaf ear to his suggestion for an inter-American summit conference with the leaders of Mexico and other countries, saying the suggestion was not valid or feasible.

The congressman warned it is inexcusable for the United States to wait until things have reached a point calling for intervention with American soldiers in Mexico when corrective measures could be taken now.

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 6, 1982.

Hon. RONALD REAGAN,
President of the United States,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: Though for the past two years national attention has been concentrated on domestic economic issues, these are momentous times in the realm of foreign policy. Your planned meetings with heads of state in Washington, and your forthcoming journey to Latin America, clearly evidence the scope and depth of urgent problems.

I am, as you know, gravely concerned about the economic and social problems of our neighboring countries—problems that are reflected in grave political events. It was this concern that led me to suggest earlier a hemispheric version of the Bretton Woods talks. Concentrating on economic problems, these talks produced the framework of economic growth, international cooperation, and political stability that blessed the industrial world in postwar times. Since President Nixon ended the Bretton Woods monetary policy in 1971, there has been nothing to replace it. During the intervening years, we have seen an explosive growth in debt, a rapid erosion in trade terms for developing countries, and a steady march toward protectionism and similar beggarthy-neighbor policies. It is no secret that the prospect for world economic growth is not very bright today, nor that country after country is finding itself unable to repay debt, resist the drift toward trade warfare (for example, the threat only this week by Secretary Block to dump U.S. dairy products on the world market; Japan's deliberate cheapening of the yen; unwarranted European and Japanese export subsidies), or maintain political stability. More and more, it seems, there is a drift toward radical schemes that promise something different—though the radical is not often something that works. All of this, I think, reflects a growing kind of anarchy. This trend can be stopped, and must be. It can only be done if the world finds within itself the leadership and discipline to agree on sensible problems of the beneift of all—which is what Bretton Woods was all about. It ever there was a time when new arrangements were needed, it is now. If ever there was an opportunity for American leadership, it is now. Opportunity is at hand, and you can grasp it by the forelock, and I urge that you do.

Not only do I think that you should propose a Hemispheric Conference, on the order of Bretton Woods, I believe you should reassert American commitment to democracy and human rights. This could be done by revising the Haig policy of vast arms sales. This could be done by maintaining insistence (for example) that the Gov-

ernment of El Salvador make genuine progress toward redressing the grievances of that country's people. Violence is no substitute for honest government, and no substitute for necessary reform. The flight of hundreds of thousands of political refugees to our country signifies but one thing: that ours is a land of honest government, a land of open voices, a land where peaceful changes is possible.

Our country is frequently blamed for all the problems of neighboring nations. Mexican politicians, no less than Fidel Castro, are prone to blame their ills on the United States. Yet everywhere, the great mass of people look to the United States as the hope for reform, for progress, for a better world. To the extent that our policy nourishes those hopes, helps to realize them, we remain true to our Revolution, our national principles. But if we merely peddle arms, ignore abuse and grievance, and stand silent in the face of overwhelming abuse, we not only fail to live up to our own ideals, we promote enmity elsewhere. Therefore, I hope that you will use your forthcoming journey to revise the Haig arms sales drive, call for a Hemispheric Conference on economic and human progress, and hold high the American dream of freedom for all people.

With all good wishes, I am,

Respectfully yours,

HENRY B. GONZALEZ,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, D.C., October 27, 1982.

Hon. RONALD REAGAN,
President of the United States,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: Between 1975 and this year, the foreign indebtedness of Latin American countries quadrupled. During that same time, American bank lending in Latin America doubled. U.S. bank loans to Argentina increased sixfold in that period, while loans to Mexico increased fourfold. Neither Argentina nor Mexico is able to repay its debt. Brazil is also in great difficulty.

The extraordinary problems in Mexico caused the United States to take emergency action to stave off an outright collapse of the Mexican economy. There is still considerable question about Mexico's future. The future course of Mexico and other hard-pressed nations is very much an open question. These are not matters that trouble only the affected countries; economic crises do not respect national borders, they affect us all.

The problems of Mexico, for example, have caused U.S. citizens to take large losses on debts owed to them by Mexico. One constituent of mine is owed almost $200,000 for goods sold in Mexico. He has been told that he can be paid only in pesos, at a rate that would cause him to lose forty per cent of the amount due. The result will be ruinous. Another individual, a wholesaler, has found his business wiped out because his Mexican customers can no longer obtain currency to deal with him. Dozens of others who had a large Mexican retail trade now find their business in grave difficulty. Thousands of U.S. citizens with dollar deposits in Mexico are unable to recover their deposits. Hundreds of businesses throughout the border region are near collapse, unemployment is up, and there is no prospect for relief. At the same time, massive unemployment, rapid inflation, and growing desperation is sure to cause a large increase in illegal immigration from Mexico. These are matters that affect Americans, and as such they are of real and immediate concern to our country.

You know, I am certain, that economic disintegration soon leads to social unrest and political disorder. The threat facing Mexico is real. There is no question that disorder in Mexico would create enormous problems in our own country, and pose serious challenges to our policy.

The United States cannot ignore the problems of Mexico, Your clear recognition of this fact is evidenced by the emergency action that you took earlier this year. But more than emergency action is needed. It is necessary now for the United States to work with Mexico and other Latin American nations to forge a blueprint for the future. United States leadership and cooperation is essential if the economic problems of Latin America are to be resolved. Failure to address these problems will only complicate our already difficult domestic situation.

I know that you are planning a trip to Latin America at the end of November. Before that time, I believe that the United States should propose a mini-Bretton Woods Conference, to devise workable programs to deal with the debt crisis facing Latin America, to devise programs for recovery, and to establish mechanisms for cooperation. The problems that exist are too complex to be dealt with on an ad hoc, bilateral basis. They are too difficult to be resolved with emergency actions. They require a genuine program, and a genuine commitment of United States leadership. It was just such a program, just such leadership, and just such commitment at Bretton Woods that enabled the world to recover from the chaos and destruction of World War II, and to benefit from the longest and greatest economic growth of all time.

As matters now stand, the world is threatened with trade warfare, more so than at any time in the past five decades. We know, from long and bitter experience, that beggar-thy-neighbor actions not only fail to resolve domestic problems, but lead down the road to universal tragedy. This need not happen. We can best help ourselves, and our neighbors, by positive and responsive leadership. I urge that you act at once to establish a Western Hemisphere Conference on economic recovery, stabilization and cooperation. This type of conference, like Bretton Woods, offers the best hope of exerting the leadership that is essential to resolving the very great problems that our country and our neighbors must face together.

Respectfully yours,

HENRY B. GONZALEZ,
Member of Congress.●

NATURAL GAS DECONTROL—A FREE LUNCH

(Mr. MARKEY asked and was given permission to address the House for 1 minute.)

Mr. MARKEY. Mr. Speaker, the natural gas decontrol bill which the Reagan administration is introducing today is hailed by the President as that rarest of all commodities—a free lunch. According to the President, prices will go down, supplies will go up, the free market will operate perfectly to bring buyers and sellers together in harmony—in short, everyone will be fat and happy.

Mr. Speaker, that "free lunch" will be cooked with gas, but it will not be free. It is the American consumer who is going to pick up the $50 billion tab.

We are in our present predicament, with demand down and prices soaring up, because natural gas producers and natural gas pipelines used current legislation and an inactive Federal Energy Regulatory Commission to bid prices out of reason on contracts which pass costs on to the consumers whether or not the gas is actually shipped or consumed.

Those same companies now claim that the contracts which they negotiated are the blame of regulation and not their own greed. So how does the administration respond?

□ 1230

Take away any ceilings on gas discovered before 1977, which was never to be decontrolled.

The administration's proposal for extinguishing a fire is to pour on more fuel. It is like saying "We are going too fast; step on the gas."

What we need is a solution to the current gas price increases that treats all Americans fairly, that assures adequate supplies, adequate incentive for gas exploration and reasonable prices.

The President's proposal assures none of these basic criteria. His proposal is only a fool's rush to stuff more dollars into the pockets of the major oil companies. There is no free lunch. There can be none. When the President learns that basic lesson, then and only then will the American people accept his word on energy policy.

The residential consumer and America's small businesses and farmers deserve the assurance that their livelihoods will not be endangered by the cost of keeping warm. They deserve the help in the midst of their peril. They deserve much more than the wolf of decontrol in the attractive wrapping of consumer protection.

Mr. CORCORAN. Mr. Speaker, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Illinois.

Mr. CORCORAN. Mr. Speaker, I am somewhat hesitant to risk the newfound alliance that we have by commenting on what my good friend from Massachusetts has said. However, I think, upon his examination of the actual language of the legislation, which I understand the President has submitted to the Congress today, he will find that the impact of the changes will not be borne by the residential user of natural gas or the industrial user of natural gas because of the change in current law, which I think is absolutely essential.

Today, you know, as a result of the Natural Gas Policy Act of 1978, which I voted against, I would say to my

good friend from Massachusetts, there is in section 601 of the law the automatic opportunity for the pipeline company to pass through to the consumer, which is exactly what is being done with Algerian high-priced gas, Canadian gas, Mexican gas, and the like. What the President is proposing to do is to tighten that up so that you do not get the added passthrough to the consumer. I think that is the basis why the consumer will be benefited from this legislation. And, as I started to say, the President is correct in saying that this is really a consumer protection bill.

Mr. MARKEY. Mr. Speaker, I will reclaim my time to briefly comment, because I do not want to strain our alliance any more than is necessary either, and the point is this: Somebody is going to have to pay. The illusory promises of the increase in the cost of natural gas and oil back in the late 1970's and the accompanying programs for low income fuel assistance and funding for rapid transit and conservation and renewable energy source programs have proven to be false. And just as I believe that the same kind of inevitable, inexorable eventual increase in the price of natural gas to those end use customers, whether they be residential, commercial or industrial, has to eventually transpire; that there is no way in which the kinds of revenues that the gas companies are looking for can be generated without having someone pay the bill. And what we are talking about now is, again, something that is very much akin to Reaganomics, which is that there is some kind of major change in the way in which we deal with a significant economic program in this country without any dislocation whatsoever, that somehow or other prices come down, supply goes up and everybody is fat and happy. There is not any such thing. Somebody has to pay the price to get the kind of result that the President is looking for, and I believe that whether it be now or in the future a couple of years from now, that that will be the eventual result. FERC has shown absolutely no desire, no willingness to take the kinds of protective action that the gentleman is talking about in order to assure that the consumer is not affected.

Mr. CORCORAN. Well, Mr. Speaker, that is because of the law.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WOLF) to revise and extend their remarks and include extraneous material:)

Mr. CORCORAN, for 20 minutes, today.

(The following Members (at the request of Mr. SIKORSKI) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. WOLF) and to include extraneous matter:)

Mr. FISH.

Mr. YOUNG of Alaska in three instances.

Mrs. HOLT.

Mr. KEMP.

Mr. SCHULZE.

Mr. GREEN in two instances.

Mr. BEREUTER.

(The following Members (at the request of Mr. SIKORSKI) and to include extraneous matter:)

Mr. FORD of Michigan.

Mr. HERTEL of Michigan.

Mr. MAZZOLI.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. DORGAN.

Mr. DOWNEY of New York.

Mr. STRATTON in two instances.

Mr. COELHO in two instances.

Mr. BENNETT in two instances.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED

Bills and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 143. An act to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for 99 years certain lands held in trust for such band; to the Committee on Interior and Insular Affairs.

S. 304. An act to hold a parcel of land in trust for the Burns Paiute Tribe; to the Committee on Interior and Insular Affairs.

S. 366. An act to settle certain claims of the Mashantucket Pequot Indians; to the Committee on Interior and Insular Affairs.

S. 419. An act to provide that per capita payments to Indians may be made by tribal governments, and for other purposes; to the Committee on Interior and Insular Affairs.

S.J. Res. 15. Joint resolution designating the month of March 1983 as "National Eye Donor Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 21. Joint resolution to designate April 1983 as "National Child Abuse Prevention Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 27. Joint resolution authorizing and requesting the President to designate the week of March 13 through 19, 1983, as "National Employ the Older Worker Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. SIKORSKI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 34 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 1, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

425. A letter from the Secretary of Housing and Urban Development, transmitting a report on the administration of the Interstate Land Sales Full Disclosure Act, pursuant to section 1421 of the act, as amended; to the Committee on Banking, Finance and Urban Affairs.

426. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on the assessment of the United Nations Educational, Scientific and Cultural Organization, pursuant to section 108(d) of Public Law 97-241, and a report on the United Nations Educational, Scientific and Cultural Organization's policies that would restrict the free flow of information, pursuant to section 109(b) of Public Law 97-241; to the Committee on Foreign Affairs.

427. A letter from the Chairman for the Federal Election Commission, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

428. A letter from the Assistant Secretary of Defense (Public Affairs), transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

429. A letter from the Chairman, Federal Election Commission, transmitting proposed regulations governing the inclusion of disclaimer notices in political communications and advertising, pursuant to 2 U.S.C. 438(d)(1); to the Committee on House Administration.

430. A letter from the Director, Minerals Management Service, Department of the Interior, transmitting notice of the proposed refunds of $46,666.40 to the Exxon Co., U.S.A., Chevron U.S.A. Inc., Sonat Exploration, and General American Oil Co. of Texas of excess royalty payments, pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

431. A letter from the Assistant Secretary for Congressional Relations, Department of State, transmitting a draft of proposed legislation Radio Broadcasting to Cuba Act; jointly, to the Committee on Foreign Affairs and Energy and Commerce.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolu-

tions were introduced and severally referred as follows:

By Mr. PERKINS (for himself, Mr. FUQUA, Mr. SIMON, Mr. GOODLING, Mr. HAWKINS, Mr. FORD of Michigan, Mr. BURTON of California, Mr. GAYDOS, Mr. CLAY, Mr. BIAGGI, Mr. ANDREWS of North Carolina, Mr. MILLER of California, Mr. MURPHY, Mr. CORRADA, Mr. KILDEE, Mr. WILLIAMS of Montana, Mr. KOGOVSEK, Mr. WASHINGTON, Mr. MARTINEZ, Mr. OWENS, Mr. HARRISON, Mr. BOUCHER, Mr. WALGREN, Mr. ROE, Mr. BROWN of California, Mr. SCHEUER, Mr. HARKIN, Mr. WIRTH, Mr. GLICKMAN, Mr. YOUNG of Missouri, Mr. VOLKMER, Mr. NELSON of Florida, Mr. LUNDINE, Mr. MCCURDY, Mr. DYMALLY, Mr. MINETA, Mr. DURBIN, Mr. ANDREWS of Texas, Mr. VALENTINE, Mr. REID, Mr. TORRICELLI, and Mr. CHANDLER):

H.R. 1699. A bill to provide assistance to improve elementary, secondary, and postsecondary, education in mathematics and science; to provide a national policy for engineering, technical, and scientific personnel; to provide cost sharing by the private sector in training such personnel; to encourage creation of new engineering, technical, and scientific jobs; and for other purposes; jointly, to the Committees on Education and Labor and Science and Technology.

By Mr. BREAUX (for himself and Mr. FORSYTHE):

H.R. 1700. A bill amending title I of the Marine Protection, Research and Sanctuaries Act of 1972, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries and Energy and Commerce.

By Mr. CORCORAN (for himself and Mr. BROWN of Colorado):

H.R. 1701. A bill to eliminate phase II of the U.S. Synthetic Fuels Corporation, to support synthetic fuel research and development, to eliminate the authority of the Corporation to enter into joint ventures or own corporation construction projects, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs and Energy and Commerce.

By Mr. DOWNEY of New York:

H.R. 1702. A bill to amend title 23, United States Code, to require the Secretary of Transportation to reduce the apportionments of certain Federal-aid highway funds to any State in which highway motor vehicles displaying a handicapped parking sticker issued by any other State are not allowed to park in the parking spaces in which highway motor vehicles displaying a handicapped parking sticker issued by such State are allowed to park; to the Committee on Public Works and Transportation.

By Mr. FAZIO (for himself, Mr. MATSUI, Mr. PORTER, Mr. BARNARD, Mr. COELHO, Mr. BEREUTER, Mr. WILSON, Mr. EDGAR, Mr. RAHALL, Mr. HOWARD, Mr. MARTINEZ, Mr. DWYER, of New Jersey, and Mr. ROYBAL):

H.R. 1703. A bill to modify the mandatory sentence structure for the use of a firearm in the commission of a Federal felony, to establish a mandatory sentence for the use of a cutting or stabbing weapon in the commission of a Federal felony, and for other purposes; to the Committees on the Judiciary.

By Mr. HEFTEL of Hawaii (for himself, Mr. SUNIA, Mr. DE LUGO, Mr. WON PAT, Mr. CORRADA, and Mr. YOUNG of Alaska):

H.R. 1704. A bill to amend the Agricultural Act of 1949 to provide that the Secretary of Agriculture may not require deductions from the proceeds of sale of milk produced and commercially marketed in jurisdictions other than the 48 contiguous States and the District of Columbia; to the Committee on Agriculture.

By Mr. JACOBS (for himself, Mr. ROSTENKOWSKI, Mr. CONABLE, and Mr. MOORE) (by request):

H.R. 1705. A bill to provide for prospective payment rates under medicare for inpatient hospital services, and for other purposes; to the Committee on Ways and Means.

By Mr. MINETA (for himself, Mr. PANETTA, Mr. BARNARD, Mr. BONER of Tennessee, Mr. BONKER, Mr. BROOKS, Mr. BROWN of California, Mr. CORRADA, Mr. DAUB, Mr. DWYER of New Jersey, Mr. EMERSON, Mr. FLIPPO, Mr. FLORIO, Mr. FORSYTHE, Mr. FRENZEL, Mr. FROST, Mr. HOPKINS, Mr. HORTON, Mr. HUGHES, Mr. JEFFORDS, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LANTOS, Mr. MCHUGH, Mr. MARTINEZ, Mr. MATSUI, Mr. MONTGOMERY, Mr. MORRISON OF WASHINGTON, , Mr. O'BRIEN, Mr. RATCHFORD, Mr. REID, Mr. ROBINSON, Mr. ROE, Mr. SHARP, Mr. SHELBY, Mr. STANGELAND, Mr. TALLON, Mr. VANDERGRIFF, Mr. VENTO, Mr. WAXMAN, Mr. GUARINI, and Mr. DANIEL):

H.R. 1706. A bill to designate the square dance as the national folk dance of the United States to the Committee on Post Office and Civil Service.

By Mr. MINETA (for himself, Mr. HOWARD, Mr. SNYDER, Mr. HAMMERSCHMIDT, Mr. ANDERSON, and Mr. SHUSTER) (by request):

H.R. 1707. A bill to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1984, 1985, and 1986, and for other purposes; jointly, to the Committees on Public Works and Transportation and Energy and Commerce.

By Mrs. ROUKEMA:

H.R. 1708. A bill to require that the fourth Presidential certification with respect to El Salvador include a determination that the Government of El Salvador has made every effort to bring to justice those responsible for the murder of journalist John Sullivan; to the Committee on Foreign Affairs.

By Mrs. SNOWE:

H.R. 1709. A bill to amend chapter 44 of title 18 of the United States Code (relating to firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

By Mr. WON PAT:

H.R. 1710. A bill to amend the Clean Air Act to exempt electric power generating facilities on Guam from certain provisions of the Clean Air Act; to the Committee on Energy and Commerce.

H.R. 1711. A bill to amend the Immigration and Nationality Act to permit nonimmigrant alien crewmen on U.S.-flag fishing vessels to stop temporarily at ports in Guam; to the Committee on the Judiciary.

H.R. 1712. A bill to amend the Immigration and Nationality Act to permit waiver of the nonimmigrant visa requirement in the case of certain visitors to Guam; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII,

16. The SPEAKER presented a memorial of the General Assembly of the State of Arkansas, relative to mineral leases on Federal-owned lands; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARNES:

H.R. 1713. A bill for the relief of Yelizaveta Fankukhina; to the Committee on the Judiciary.

By Mr. BURTON of California:

H.R. 1714. A bill for the relief of Antonio Callejo Carsola; to the Committee on the Judiciary.

By Mr. FAZIO:

H.R. 1715. A bill for the relief of Margaret Patricia Lind; to the Committee on the Judiciary.

H.R. 1716. A bill for the relief of Divinia Manatad and Jeuerita Manatad; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 3: Mr. GORE.

H.R. 42: Mr. HALL of Ohio, Mr. HAMILTON, Mr. GRAY, Mr. SABO, Mr. CORRADA, and Mr. BARNARD.

H.R. 50: Mr. LEWIS of Florida.

H.R. 52: Mr. LEWIS of Florida.

H.R. 53: Mr. LEWIS of Florida.

H.R. 70: Mr. LEWIS of Florida and Mr. STENHOLM.

H.R. 836: Mr. DURBIN and Mr. GOODLING.

H.R. 1015: Mr. SOLARZ, Mr. LEVIN of Michigan, and Mr. DE LUGO.

H.R. 1016: Mr. SOLARZ, Mr. LEVIN of Michigan, and Mr. DE LUGO.

H.R. 1078: Mr. BEREUTER and Mr. DONNELLY.

H.R. 1147: Mr. STOKES.

H.R. 1176: Mr. WRIGHT, Mr. RANGEL, Mr. GORE, Mr. SHANNON, Mr. DASCHLE, Mr. STUDDS, Mr. COYNE, Mr. BERMAN, Mr. DE LA GARZA, Mr. MRAZEK, Mr. GILMAN, Mr. JONES of Tennessee, Mr. FORSYTHE, Mr. BOSCO, Mr. DURBIN, Mr. LUJAN, Mr. DYSON, Mr. HERTEL of Michigan, Mrs. SCHROEDER, Mr. SUNDQUIST, Mr. COOPER, Mr. AUCOIN, Mr. EDGAR, Mr. SPENCE, Mr. RICHARDSON, Mrs. BYRON, Mr. THOMAS of Georgia, Mr. DAVIS, Mr. VENTO, Mr. JEFFORDS, Mr. ANDREWS of North Carolina, Mr. RAHALL, Mr. CARR, Mr. CLAY, Mr. SEIBERLING, Mr. BARNARD, Mr. KILDEE, Mr. LUKEN, Mr. MCCURDY, Mr. SHELBY, Mr. MCKINNEY, Mr. DWYER of New Jersey, Mr. COELHO, Mrs. SCHNEIDER, Mr. TORRICELLI, Mrs. HOLT, Mr. NICHOLS, Mr. JONES of North Carolina, Mr. PERKINS, and Mr. WORTLEY.

H.R. 1285: Mr. WIRTH, Mr. MARTINEZ, Mrs. HALL of Indiana, Mr. EDGAR, Mr. SCHULZE, Mr. MRAZEK, Ms. MIKULSKI, Mr. CARR, Mr. OWENS, Mr. GILMAN, Mrs. COLLINS, Mr. GEJDENSON, Mr. FRENZEL, Mr. YATES, Mr. GREGG, Mr. D'AMOURS, Mr. LOWRY of Washington, Mr. WAXMAN, Mr. DASCHLE, Mr. BEDELL, Mr. MCNULTY, Mr. FORD of Tennessee, Mr. PANETTA, Mr. TORRICELLI, Mr. FAZIO, Mr. WOLPE, Mr. TOWNS, Mr. ROE,

Mrs. BOGGS, Mr. FOGLIETTA, and Mr. DE LUGO.

H.J. Res. 1: Mr. LEWIS of California.

H.J. Res. 2: Mr. OLIN, Mr. HORTON, Mr. VOLKMER, Mr. LONG of Louisiana, and Mr. ROSE.

H.J. Res. 22: Mr. DELLUMS, Mr. SILJANDER, and Mr. LOWERY of California.

H. Con. Res. 39: Mr. SCHEUER, Mr. SHELBY, Mrs. KENNELLY, Mr. BATES, Mr. TORRICELLI, Mr. BORSKI, Mr. FAZIO, Mr. FISH, Mr. ROE, and Mr. MOLLOHAN.

H. Con Res. 46: Mr. BLILEY, Mr. CORCORAN, Mr. DANNEMEYER, Mr. TAUKE, and Mr. WEAVER.

H. Res. 50: Mr. ANDREWS of North Carolina, Mr. OWENS, Mr. SMITH of Florida, Mr. LOWRY of Washington, Mr. MITCHELL, Mr. TOWNS, Mr. SHANNON, Mr. FRANK, Mr. HOWARD, Mr. STOKES, Mr. FAUNTROY, Mr. WEISS, Mr. DELLUMS, Mr. RATCHFORD, Mr. EDWARDS of California, Mr. MARKEY, Mr. SUNIA, Mr. FASCELL, Mr. ROE, Mr. FROST, Mr. DWYER of New Jersey, Mr. EVANS of Illinois, Mr. MRAZEK, Mr. OBERSTAR, Mr. LEVIN of Michigan, Mr. FAZIO, Mr. YATES, Mr. HALL of Ohio, Mr. OTTINGER, Mr. SCHEUER, Mr. BERMAN, Mr. WYDEN, Mr. MOODY, Mr. HUGHES, Mr. TORRICELLI, Mr. MORRISON of Connecticut, Mr. ADDABBO, Mr. MINETA, Mr. BATES, and Mrs. HALL of Indiana.

SENATE—*Monday, February 28, 1983*

(Legislative day of Wednesday, February 23, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious Father in Heaven, we have so much for which to be grateful. We thank Thee for breath and life—for health and strength—for clear intellect—the ability to reason and the freedom to choose. We thank Thee for our families, our most precious asset. Help us to honor them—to love them—to be to them all that strengthens enduring family ties. We thank Thee for peers, associates and staffs. May we never presume upon their dedicated, untiring service. Help us never to impose upon them more than body, mind and heart can bear. We thank Thee for the privilege of serving in the Senate. May we never forget that we are here by the suffrage of the people and that behind their choice is the appointment of the One from whom derives all power and authority.

Help us never to forget Thee, Loving God, and the common benefits which Thou hast so uncommonly lavished upon us and our beloved land. Receive our profound gratitude and consecrate us to the supreme destiny to which Thy perfect will calls us. In the name of the Sovereign Lord of History we pray. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. STEVENS. Mr. President, today the Senate will continue consideration of S. 47, the shipping bill.

An amendment is pending, and we anticipate amendments to be offered and rollcall votes to occur throughout the day—that is, if it is possible. Debate is scheduled to continue on this bill through Tuesday. Under the previous order and the cloture motion filed, there will be a vote on the question of cloture, in relation to S. 47, at 4 p.m. tomorrow.

The schedule for the remainder of the week may include a number of bills reported by the Committee on Energy and Natural Resources, consideration of Senate committee budgets and, it is hoped, the Montreal Aviation Protocols.

Mr. President, in order for the Senate to complete necessary business by July 1, the leadership urges all Senators to be diligent and to seek the reporting of legislation from the various committees at the earliest possible date.

We do have looming on the horizon issues that will undoubtedly require a substantial amount of time during March—the first concurrent budget resolution, the urgent supplemental, which has a jobs proposal, and social security.

Again, as to the plan for this week, we do anticipate that the Senate will see a series of votes this week. The majority leader will make a further announcement later in the day concerning the legislative schedule.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that following the time for the two leaders, there be a period for the transaction of routine morning business, not to extend beyond 11 a.m. today, during which Senators may speak for not to exceed 5 minutes each.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I reserve the remainder of our time, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE RUMOR

Mr. BAKER. Mr. President, this week's poem, "The Rumor," was written by Liam Rector. Mr. Rector's poems have appeared in Paris Review, Partisan Review, Shenandoah, the Reaper and other magazines. He is currently teaching at Phillips Academy in Massachusetts.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

I am busy doing drawings
for the upcoming publication
Drawings of Schizophrenics In Closed Institutions.
I am busy doing drawings
for the upcoming publication
Drawings of Schizophrenics In Closed Institutions.
because angelic voices will sing
if I draw lost enough to listen
and because it quiets the doctors down
since they are anxious
to see the book published
and to have my efforts included. . . .
If I could find the right line, I could balance
the entire design.
Not everyone has a career,
but the doctors have one, each of them,
and the publication of the book *should* help
to secure
that section of their lives.
Alice, across the hall, is doing
a goodbye drawing. The doctors
are wary of this impulse
on her part, noting that Alice
says goodbye
too often. They encourage her to talk
of her plans, should she be released,
or of her past,
should she end up staying.
Alice tells them it's a "picnic,
a picnic in a light drizzle."
Here in the hospital Alice,
who killed Frank, crosses the hall each
night
into my doorway and says,
"Frank, is that *you*, Frank?"
In my drawings I omit Alice
and concentrate
on calling forth the hall. Schizophrenia,
in this book, is another way of saying
across the hall.
In the public room, the section where we sit
and watch,
some read the newspaper while getting
the national news off the tube.
That way, if you read and listen,
you get the feeling
that the news is really coming at you,
that it might really amount to something.
Of late I have begun to think,
I get the impression,
that our lives are being moved
by some very public rumor.
We, in darkness, picture ourselves alone
with some sort of headline: *Man Claims He
Got Away*
With Murder, that sort of thing. . . .
We read as if dreaming and are then
dreamt as if living. Between
the solitary and the public, the rumor.
We picture ourselves closed-in, whirring,
but I doubt that.
In the drawings I stress
(and then surrender to) the fact

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

that there is some very "hard news"
in all of us, a murderer
for each of us, and that this is how
all these reports, these *mayhems,*
finally do manage to reach us.
Pavese, the Italian, said that each
murderer is a timid suicide. Alice,
who killed Frank, wanders each night
for all of us, wondering who Frank
really is.
If I could find the right line, I could balance
the entire design.
George, who lost his mind after losing
Carol, lives far down the hall. George says
Carol's infidelities first made him want
to do away with himself, to surrender, but
that later,
through the help of the doctors,
he realized it was Carol
that he wanted to kill
all along, that his impotence
was caused by a gun
that he didn't want to point
towards her, a thing he didn't want to see
go off.
None of this surprises me.
The drawings get so lost because the hall
is so wide. You come through a cauldron
before you ever sight home. . . .
My own crime bears no mention.
It was an argument, a debate gone wrong,
an affection historied into the beserk.
My work here now, my *calling,*
is to get these lines down right, to *delineate*
their deep gossip, that precise chamber
where they, right or wrong, do yak sub-
lime. . . .
The doctors say the book will receive
national distribution and I'm glad,
yes glad with all my heart,
for that. Ambition,
which is finally what we do to each other,
will undoubtedly see this project
into its rise and quiet. . . .
And the lines, they go off, they wander. . . .
If I could find the right line, it could bal-
ance, balance
this riot, that hall, that vacancy and pres-
sure
wherein we draw towards goodbye.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the remainder of the leadership time be reserved for the majority leader and the minority leader, for their use later today, and that the Senate now proceed with a period for morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

A NEW REPORT ON HUMAN RIGHTS VIOLATIONS

Mr. PROXMIRE. Mr. President, on Wednesday, February 16, the United Nations issued a report stating that in the past 15 years, over 2 million people have been put to death without due process of law. These victims were executed without a fair trial, without the right to a lawyer, and without the right to appeal their sentences.

This appalling statistic was gathered by the U.N. Human Rights Commission and represents findings from 37 countries. The murders include officially authorized executions ranging from scattered slayings to mass purges. While some killings were politically inspired, many others clearly resulted from religious, racial, ethnic or national prejudice. Torture and unjustified imprisonment preceded a number of these murders.

Mr. President, I think this terrible condition is another reason why the Senate should give serious consideration to action on the Genocide Convention.

I point out to the Senate that if we are to act on this kind of treaty, we should act at the beginning of a session, for obvious reasons, because there could be the problem of having it delayed later on. I have found in the past that it is impossible to call this up once we move into the body of the session, particularly in the second year. So this is an ideal time to act on it, and I hope the leadership will give it consideration.

The Commission based its report on information received from governments, international organizations, and human rights groups. Although the report refrains from giving individual figures for each country, it does indicate that these killings were almost equally frequent in Latin America, Africa, and Asia.

Mr. President, the growing scorn for human life has reached a point where it has become an international problem which must be confronted quickly. In its report, the United Nations reminds us that the principles of nondiscrimination and equality before the law and the right to freedom of thought, conscience, religion, and belief are the inalienable rights of every human being. As the world's foremost leader in the fight for justice, equality, and freedom, the United States must heed the message of the United Nations and take bold and meaningful steps to assure the protection of human rights throughout the world.

What can we do here in the Senate to respond to the U.N. call to defend the rights of the world's people? We can ratify the Genocide Convention. This treaty, which declares genocide of a national, ethnic, racial or religious group an international crime, stands for the same vital principles outlined in the United Nations' report.

Mr. President, let us take swift action toward giving our advice and consent to the Genocide Convention.

CONGRESSMAN GORE'S LOGICAL INTEGRATION OF ARMS CONTROL AND STRATEGIC ARMS POLICY

Mr. PROXMIRE. Mr. President, Congressman ALBERT GORE, JR., recently wrote the New York Times to propose a thoughtful integration between our arms control policies and our strategic weapons policies. Congressman GORE contends that a shift to single warhead missiles could reduce our vulnerability to Soviet attack provided we could achieve suitable changes in Soviet ICBM deployment through sensible arms control initiatives. Certainly, the purpose of arms control is to diminish the likelihood of nuclear war. Arms control can help greatly to achieve this by persuading both countries to adopt weapons that will provide effective deterrence with as little threat to the other side's deterrence as possible. To do this, we should work toward an enforceable arms control agreement to forgo or destroy weapons that pose a threat to the survival of the other side's deterrent.

Congressman GORE ably makes the case in his letter that appeared last Friday in the New York Times, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FOR A COURSE CHANGE ON ARMS AND THEIR CONTROL

To the Editor:

Leslie Gelb reports that the Scowcroft Commission may recommend a significant departure from earlier Administration plans for a new ICBM, i.e., that some MX ICBM's should be deployed in existing silos, but that we should also deploy small ICBM's, designed to carry only single warheads (news story Feb. 8).

I have thought for some time that a move to single-warhead missiles could help resolve our most difficult strategic problem—fears concerning the theoretical vulnerabilities of U.S. ICBM's to a Soviet first strike.

Single-warhead missiles would be less profitable targets for the Soviets than MIRV'd missiles. Moreover, it would require a great many single-warhead ICBM's to pose a first-strike threat against Soviet ICBM silos. Single-warhead ICBM's could be deployed in a variety of mobile modes, if that were necessary to prevent them from becoming targets. But they might also be deployed in fixed silos if suitable changes in Soviet ICBM deployments were to be worked out through arms control.

This last point is crucial. The proper context for this, or any other deployment, is a clear and sensible arms-control initiative. If the Administration hopes to put together a durable consensus in the Congress, and in the country, in support of a new proposal for strategic weapons, it must come to grips with political as well as technical realities.

The country wants arms control to be pursued vigorously, It is prepared to support new strategic weapons only with reluctance and only if the relationship between those weapons and our arms-control objectives has been made understandable in a manner that has so far eluded this Administration.

The Administration's efforts have heretofore been directed toward deploying new weapons that would put Soviet ICBM's at theoretical risk, just as ours are currently at theoretical risk—meanwhile, exempting from reductions new categories of weapons, such as the cruise missile, where the U.S. has an advantage.

Such an approach offers the prospect of mutual vulnerability, mutual instability and mutual fear. That objective is strategically

unwise and has become politically insupportable. In presenting any new approach to weapons, the Administration must display more restraint in its planning and much more initiative in its arms-control efforts.

The overall objective of U.S. policy for nuclear weapons and for arms control must be to combine the two in a manner which points us toward a strategically stable relationship with the Soviet Union, at sharply and progressively reduced numbers of weapons.

ALBERT GORE, JR.,
Member of Congress,
Fourth District, Tenn.,
Washington, Feb. 10, 1983.

REPORT ON THE ACTIVITIES OF THE SENATE SELECT COMMITTEE ON INTELLIGENCE AND RULES OF PROCEDURE

Mr. GOLDWATER. Mr. President, I send to the desk a report on the activities of the Senate Select Committee on Intelligence, and I ask unanimous consent to have 1,000 copies of this report printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. The Senate Intelligence Committee submits this report of its activities covering the period January 1, 1981, to December 31, 1982. Under the provisions of Senate Resolution 400, the committee has been charged with the responsibility to carry out oversight over the intelligence activities of the United States. Most of the work of the committee is, of necessity, conducted in secrecy. Nonetheless, the committee believes that intelligence activities should be as accountable as possible. Therefore, we submit this public report to the Senate in order to meet this responsibility.

I believe this report will reflect my view that the intelligence community is alive and well, and getting better every day despite the turmoil it experienced in the 1970's. This committee was formed 7 years ago as a result of that turmoil and, I am happy to say, the recovery process started following the committee's formation.

Mr. President, we are the only nation in the world that makes the intelligence community accountable to the general public. No other government produces the kind of public report that summarizes the activities of its intelligence oversight. In effect, we have made our intelligence services the most public secret services in the world. This action, along with the well established budget authorization procedure, has made the American system of legislative oversight of the intelligence community unique.

The budget authorization process is standard procedure now. No other nation in the world does this. I believe it is the best method of accountability there is in our Government. This method makes it clear that our constitutional responsibilities are fulfilled, while at the same time maintaining the confidentiality necessary for an effective intelligence system.

We examine in detail the budgets of the Central Intelligence Agency, the National Security Agency, and the intelligence activities of the Department of Defense, State, and Treasury, and of the Federal Bureau of Investigation, and the Drug Enforcement Administration. This function is a key aspect of effective congressional oversight of the intelligence community. Through this process, we can determine if intelligence continues to be well managed and responsive to our needs. It gives us a chance to focus on a wide range of issues, all important to our national interests, such as international trade and monetary policy, nuclear proliferation, energy, political developments in Third World countries, international terrorism, and narcotics.

Mr. President, even covert action, the most secret and sensitive activity of the intelligence community, comes under the scrutiny of the Intelligence Committee. The committee has received detailed reports and has heard testimony on covert action programs, and has actively monitored the progress of those programs once launched. Certain covert action programs have been modified to take into account views expressed by the committee. Under the provisions of Senate Resolution 400, the committee has also provided briefings on some programs to members of other committees.

In addition, the committee has been active in reviewing covert action during the annual budget authorization process. In that connection, the committee has continued its practice of annual review of each covert action line-item by line-item. Given the sensitivity of information regarding covert action, and the Presidential findings regarding it, this report does not discuss the details of these matters although they occupied a substantial amount of time and attention of our committee members.

This report shows that the committee and staff were involved in many areas of interest to our national security and foreign policy. For example, we have examined whether the intelligence community was effectively responding to the situation in Central America. The committee also made an inquiry into the conduct of the Director of Central Intelligence. It looked into the serious problems of technology transfer and it supported legislation to protect our agents' indentities from being disclosed.

Recent years have witnessed a growth in public awareness of the importance of intelligence that is timely, relevant, and of the highest quality. Accurate intelligence is required for informed decisionmaking on many critical defense and foreign policy issues, such as the development of national nuclear weapons programs or Soviet use of chemical agents in warfare.

Mr. President, my firm belief has always been that good intelligence is needed to protect the kind of freedom we enjoy in our great country. I believe this report will also show that we are getting good intelligence information which is so vital to our survival as a people and a Nation. I hope that this report will also show that congressional oversight of intelligence activities is effective, and that the American people are better off because of it.

In concluding, I would like to thank all of the staff for its fine work over the course of the 97th Congress. As well, I would like to thank Robin Cleveland, a professional staff member of the committee, who bore the major burden of preparing this report and coordinating its production with the members of our committee.

Mr. President, in accordance with rule XXVI of the Standing Rules of the Senate, requiring the publication of the rules of each Senate committee in the CONGRESSIONAL RECORD not later than March 1 of each year, I submit the procedural rules of the Senate Select Committee on Intelligence and ask unanimous consent that they be printed in the RECORD.

There being no objection, the rules were ordered to be printed in the RECORD, as follows:

RULES OF PROCEDURE

RULE 1. CONVENING OF MEETINGS

1.1 The regular meeting day of the Select Committee on Intelligence for the transaction of committee business shall be every other Wednesday of each month, unless otherwise directed by the chairman.

1.2 The chairman shall have authority, upon proper notice, to call such additional meetings of the committee as he may deem necessary and may delegate such authority to any other member of the committee.

1.3 A special meeting of the committee may be called at any time upon the written request of five or more members of the committee filed with the clerk of the committee.

1.4 In the case of any meeting of the committee, other than a regularly scheduled meeting, the clerk of the committee shall notify every member of the committee of the time and place of the meeting and shall give reasonable notice which, except in extraordinary circumstances, shall be at least 24 hours in advance of any meeting held in Washington, D.C., and at least 48 hours in the case of any meeting held outside Washington, D.C.

1.5 If five members of the committee have made a request in writing to the chairman to call a meeting of the committee, and the chairman fails to call such a meeting within seven calendar days thereafter, including the day on which the written notice is submitted, these members may call a meeting by filing a written notice with the clerk of the committee who shall promptly notify each member of the committee in writing of the date and time of the meeting.

RULE 2. MEETING PROCEDURES

2.1 Meetings of the committee shall be open to the public except as provided in Senate Resolution 9, 94th Congress, 1st session.

2.2 It shall be the duty of the staff director to keep or cause to be kept a record of all committee proceedings.

2.3 The chairman of the committee, or if the chairman is not present the vice chairman, shall preside over all meetings of the committee. In the absence of the chairman and the vice chairman at any meeting the ranking majority member, or if no majority member is present the ranking minority member present shall preside.

2.4 Except as otherwise provided in these rules, decisions of the committee shall be by majority vote of the members present and voting. A quorum for the transaction of committee business, including the conduct of executive sessions, shall consist of six committee members until that date of the sine die adjournment of the 1st session of the 95th Congress, and thereafter, shall consist of five committee members, except that for the purpose of hearing witnesses, taking sworn testimony, and receiving evidence under oath, a quorum may consist of one Senator.

2.5 A vote by any member of the committee with respect to any measure or matter being considered by the committee may be cast by proxy if the proxy authorization (1) is in writing; (2) designates the member of the committee who is to exercise the proxy; and (3) is limited to a specific measure or matter and any amendments pertaining thereto. Proxies shall not be considered for the establishment of a quorum.

2.6 Whenever the committee by roll vote reports any measure or matter, the report of the committee upon such measure or matter shall include a tabulation of the votes cast in favor of and the votes cast in opposition to such measure or matter by each member of the committee.

RULE 3. SUBCOMMITTEES

Creation of subcommittees shall be by majority vote of the committee. Subcommittees shall deal with such legislation and oversight of programs and policies as the committee may direct. The subcommittees shall be governed by the rules of the committee and by such other rules they may adopt which are consistent with the rules of the committee.

RULE 4. REPORTING OF MEASURES OR RECOMMENDATIONS

4.1 No measures or recommendations shall be reported, favorably or unfavorably, from the committee unless a majority of the committee is actually present and a majority concur.

4.2 In any case in which the committee is unable to reach a unanimous decision, separate views or reports may be presented by any member or members of the committee.

4.3 A member of the committee who gives notice of his intention to file supplemental, minority, or additional views at the time of final committee approval of a measure or matter, shall be entitled to not less than three workings days in which to file such views, in writing with the clerk of the committee. Such views shall than be included in the committee report and printed in the same volume, as a part thereof, and their inclusion shall be noted on the cover of the report.

RULE 5. NOMINATIONS

5.1 Unless otherwise ordered by the committee, nominations referred to the committee shall be held for at least 14 days before being voted on by the committee.

5.2 Each member of the committee shall be promptly furnish a copy of all nominations referred to the committee.

5.3 Nominees who are invited to appear before the committee shall be heard in public session, except as provided in rule 2.1.

5.4 No confirmation hearing shall be held sooner than seven days after receipt of the background and financial disclosure statement unless the time limit is waived by a majority vote of the committee.

5.5 The committee vote on the confirmation shall not be sooner then 48 hours after the committee has received transcripts of the confirmation hearing unless the time limit is waived by unanimous consent of the committee.

5.6 No nomination shall be reported to the Senate unless the nominee has filed a background and financial disclosure statement with the committee.

RULE 6. INVESTIGATIONS

No investigation shall be initiated by the committee unless at least five members of the committee have specifically requested the chairman or the vice chairman to authorize such an investigation. Authorized investigations may be conducted by members of the committee and/or by designated committee staff members.

RULE 7. SUBPENAS

Subpenas authorized by the committee for the attendance of witnesses or the production of memoranda, documents, records or any other material may be issued by the chairman, the vice chairman, or any member of the committee designated by the chairman, and may be served by any person designated by the chairman, vice chairman or member issuing the subpenas. Each subpena shall have attached thereto a copy of State Resolution 400, 94th Congress, 2d session, and a copy of these rules.

RULE 8. PROCEDURES RELATED TO THE TAKING OF TESTIMONY

8.1 *Notice.*—Witnesses required to appear before the committee shall be given reasonable notice and all witnesses shall be furnished a copy of these Rules.

8.2 *Oath or affirmation.*—Testimony of witnesses shall be given under oath or affirmation which may be administered by any member of the committee.

8.3 *Interrogation.*—Committee interrogation shall be conducted by members of the committee and such committee staff as are authorized by the chairman, vice chairman, or the presiding member.

8.4 *Counsel for the witness.*—(a) Any witness may be accompanied by counsel. A witness who is unable to obtain counsel may inform the committee of such fact. If the witness informs the committee of this fact at least 24 hours prior to his appearance before the committee the committee shall then endeavor to obtain voluntary counsel for the witness. Failure to obtain such counsel will not excuse the witness from appearing and testifying.

(b) Counsel shall conduct themselves in an ethical and professional manner. Failure to do so shall, upon a finding to that effect by a majority of the members present, subject such counsel to disciplinary action which may include warning, censure, removal, or a recommendation of contempt proceedings.

(c) There shall be no direct or cross-examination by counsel. However, counsel may submit in writing any question he wishes propounded to his client or to any other witness and may, at the conclusion of his client's testimony, suggest the presentation of other evidence or the calling of other witnesses. The committee may use such questions and dispose of such suggestions as it deems appropriate.

8.5 *Statements by Witnesses.*—A witness may make a statement, which shall be brief and relevant, at the beginning and conclusion of his testimony. Such statements shall not exceed a reasonable period of time as determined by the chairman, or other presiding member. Any witness desiring to make a prepared or written statement for the record of the proceedings shall file a copy with the clerk of the committee, and insofar as practicable and consistent with the notice given, shall do so at least 72 hours in advance of his appearance before the committee.

8.6 *Objections and Rulings.*—Any objection raised by a witness or counsel shall be ruled upon by the chairman or other presiding member, and such ruling shall be the ruling of the committee unless a majority of the committee present overrules the ruling of the chair.

8.7 *Inspection and Correction.*—All witnesses testifying before the committee shall be given a reasonable opportunity to inspect, in the office of the committee, the transcript of their testimony to determine whether such testimony was correctly transcribed. The witness may be accompanied by counsel. Any corrections the witness desires to make in the transcript shall be submitted in writing to the committee within 5 days from the date when the transcript was made available to the witness. Corrections shall be limited to grammar and minor editing, and may not be made to change the substance of the testimony. Any questions arising with respect to such corrections shall be decided by the chairman. Upon request, those parts of testimony given by a witness in executive session which are subsequently quoted or made part of a public record shall be made available to that witness at his expense.

8.8 *Requests to Testify.*—The committee will consider requests to testify on any matter or measure pending before the committee. A person who believes that testimony or other evidence presented at a public hearing, or any comment made by a committee member or a member of the committee staff may tend to affect adversely his reputation, may request to appear personally before the committee to testify on his own behalf, or may file a sworn statement of facts relevant to the testimony, evidence, or comment, or may submit to the chairman proposed questions in writing for the cross-examination of other witnesses. The committee shall take such action as it deems appropriate.

8.9 *Contempt Procedures.*—No recommendation that a person be cited for contempt of Congress shall be forwarded to the Senate unless and until the committee has, upon notice to all its members, met and considered the alleged contempt, afforded the person an opportunity to state in writing or in person why he should not be held in contempt, and agreed, by majority vote of the committee to forward such recommendation to the Senate.

8.10 *Release of Name of Witness.*—Unless authorized by the chairman, the name of any witness scheduled to be heard by the committee shall not be released prior to, or after, his appearance before the committee.

RULE 9. PROCEDURES FOR HANDLING CLASSIFIED OR SENSITIVE MATERIAL

9.1 Committee staff offices shall operate under strict security precautions. At least one security guard shall be on duty at all times by the entrance to control entry. Before entering the office all persons shall identify themselves.

9.2 Sensitive or classified documents and material shall be segregated in a secure storage area. They may be examined only at secure reading facilities. Copying, duplicating, or removal from the committee offices of such documents and other materials is prohibited except as is necessary for use in, or preparation for, interviews or committee meetings, including the taking of testimony, and in conformity with Section 10.3 hereof.

9.3 Each member of the committee shall at all times have access to all papers and other material received from any source. The staff director shall be responsible for the maintenance, under appropriate security procedures, of a registry which will number and identify all classified papers and other classified materials in the possession of the committee, and such registry shall be available to any member of the committee.

9.4 Whenever the Select Committee on Intelligence makes classified material available to any other committee of the Senate or to any member of the Senate not a member of the committee, the clerk of the committee shall be notified. The clerk of the committee shall maintain a written record identifying the particular information transmitted and the committee or members of the Senate receiving such information.

9.5 Access to classified information supplied to the committee shall be limited to those committee staff members with appropriate security clearances and a need-to-know, as determined by the committee, and under the committee's direction, the staff director and minority staff director.

9.6 No member of the committee or of the committee staff shall disclose, in whole or in part or by way of summary, to any person not a member of the committee or the committee staff for any purpose or in connection with any proceeding, judicial or otherwise, any testimony given before the committee in executive session including the name of any witness who appeared or was called to appear before the committee in executive session, or the contents of any papers or other materials or other information received by the committee except as authorized by the committee in accordance with section 8 of Senate Resolution 400 of the 94th Congress and the provisions of these rules, or in the event of the termination of the committee, in such a manner as may be determined by the Senate.

9.7 Before the committee makes any decision regarding the disposition of any testimony, papers, or other materials presented to it, the committee members shall have a reasonable opportunity to examine all pertinent testimony, papers, and other materials that have been obtained by the members of the committee or the committee staff.

RULE 10. STAFF

10.1 For the purpose of these rules, committee staff means employees of the committee, employees of the members of the committee assigned to the committee, consultants to the committee, employees of other government agencies detailed to the committee, or any other person engaged by contract or otherwise to perform services for or at the request of the committee.

10.2 The appointment of committee staff shall be confirmed by a majority vote of the committee. After confirmation, the chairman shall certify committee staff appointments to the financial clerk of the Senate in writing.

10.3 The committee staff works for the committee as a whole, under the general supervision of the chairman and vice chairman of the committee. Except as otherwise provided by the committee, the duties of committee staff shall be performed, and committee staff personnel affairs and day-to-day operations, including security and control of classified documents and material, shall be administered under the direct supervision and control of the staff director. The minority staff director and the minority counsel shall be kept fully informed regarding all matters and shall have access to all material in the files of the committee.

10.4 The committee staff shall assist the minority as fully as the majority in the expression of minority views, including assistance in the preparation and filing of additional, separate and minority views, to the end that all points of view may be fully considered by the committee and the Senate.

10.5 The members of the committee staff shall not discuss either the substance or procedure of the work of the committee with any person not a member of the committee or the committee staff for any purpose or in connection with any proceeding, judicial, or otherwise, either during his tenure as a member of the committee staff or at any time thereafter except as directed by the committee in accordance with section 8 of Senate Resolution 400 of the 94th Congress and the provisions of these rules, or in the event of the termination of the committee, in such a manner as may be determined by the Senate.

10.6 No member of the committee staff shall be employed by the committee unless and until such a member of the committee staff agrees in writing, as a condition of employment to abide by the conditions of the nondisclosure agreement promulgated by the Senate Select Committee on Intelligence pursuant to section 6 of Senate Resolution 400 of the 94th Congress, 2d Session.

10.7 No member of the committee staff shall be employed by the committee unless and until such a member of the committee staff agrees in writing, as a condition of employment, to notify the committee or in the event of the committee's termination the Senate of any request for his testimony, either during his tenure as a member of the committee staff or at any time thereafter with respect to information which came into his possession by virtue of his position as a member of the committee staff. Such information shall not be disclosed in response to such requests except as directed by the committee in accordance with section 8 of Senate Resolution 400 of the 94th Congress and the provisions of these rules, or in the event of the termination of the committee, in such manner as may be determined by the Senate.

10.8 The committee shall immediately consider action to be taken in the case of any member of the committee staff who fails to conform to any of these rules. Such disciplinary action may include, but shall not be limited to, immediate dismissal from the committee staff.

RULE 11. PREPARATION FOR COMMITTEE MEETINGS

11.1 Under direction of the chairman and the vice chairman, designated committee staff members shall brief members of the committee at a time sufficiently prior to any committee meeting to assist the committee members in preparation for such meeting and to determine any matter which the committee member might wish considered during the meeting. Such briefing shall, at the request of a member, include a list of all pertinent papers and other materials that have been obtained by the committee that bear on matters to be considered at the meeting.

11.2 The staff director shall recommend to the chairman and the vice chairman the testimony, papers, and other materials to be presented to the committee at any meeting. The determination whether such testimony, papers, and other materials shall be presented in open or executive session shall be made pursuant to the rules of the Senate and rules of the committee.

RULE 12. LEGISLATIVE CALENDAR

12.1 The clerk of the committee shall maintain a printed calendar for the information of each committee member showing the measures introduced and referred to the committee and the status of such measures; nominations referred to the committee and their status; and such other matters as the committee determines shall be included. The calendar shall be revised from time to time to show pertinent changes. A copy of each such revision shall be furnished to each member of the committee.

12.2 Unless otherwise ordered, measures referred to the committee shall be referred by the clerk of the committee to the appropriate department or agency of the Government for reports thereon.

RULE 13. COMMITTEE TRAVEL

13.1 No member of the committee or committee staff shall travel abroad on committee business unless specifically authorized by the chairman and vice chairman. Requests for authorization of such travel shall state the purposes and extent of the trip. A full report shall be filed with the committee when travel is completed.

13.2 When the chairman and the vice chairman approve the foreign travel of a member of the committee staff not accompanying a member of the committee, all members of the committee are to be advised, prior to the commencement of such travel, of its extent, nature and purpose. The report referred to in rule 13.1 shall be furnished to all members of the committee and shall not be otherwise disseminated without the express authorization of the committee pursuant to the rules of the committee.

13.3 No member of the committee staff shall travel within this country on committee business unless specifically authorized by the staff director as directed by the committee.

RULE 14. CHANGES IN RULES

These rules may be modified, amended, or repealed by the committee, provided that a notice in writing of the proposed change has been given to each member at least 48 hours prior to the meeting at which action thereon is to be taken.

S. RES. 400

Resolved, That it is the purpose of this resolution to establish a new select committee of the Senate, to be known as the Select Committee on Intelligence, to oversee and make continuing studies of the intelligence activities and programs of the United States Government, and to submit to the Senate appropriate proposals for legislation and

report to the Senate concerning such intelligence activities and programs. In carrying out this purpose, the Select Committee on Intelligence shall make every effort to assure that the appropriate departments and agencies of the United States provide informed and timely intelligence necessary for the executive and legislative branches to make sound decisons affecting the security and vital interests of the Nation. It is further the purpose of this resolution to provide vigilant legislative oversight over the intelligence activities of the United States to assure that such activities are in conformity with the Constitution and laws of the United States.

SEC. 2. (a)(1) There is hereby established a select committee to be known as the Select Committee on Intelligence (hereinafter in this resolution referred to as the "select committee"). The select committee shall be composed of fifteen members appointed as follows:

(A) two members from the Committee on Appropriations;

(B) two members from the Committee on Armed Services;

(C) two members from the Committee on Foreign Relations;

(D) two members from the Committee on the Judiciary; and

(E) seven members to be appointed from the Senate at large.

(2) Members appointed from each committee named in clauses (A) through (D) of paragraph (1) shall be evenly divided between the two major political parties and shall be appointed by the President pro tempore of the Senate upon the recommendations of the majority and minority leaders of the Senate. Four of the members appointed under clause (E) of paragraph (1) shall be appointed by the President pro tempore of the Senate upon the recommendation of the majority leader of the Senate and three shall be appointed by the President pro tempore of the Senate upon the recommendation of the minority leader of the Senate.

(3) The majority leader of the Senate and the minority leader of the Senate shall be ex officio members of the select committee but shall have no vote in the committee and shall not be counted for purposes of determining a quorum.

(b) No Senator may serve on the select committee for more than eight years of continuous service, exclusive of service by any Senator on such committee during the Ninety-fourth Congress. To the greatest extent practicable, one-third of the Members of the Senate appointed to the select committee at the beginning of the Ninety-seventh Congress and each Congress thereafter shall be Members of the Senate who did not serve on such committee during the preceding Congress.

(c) At the beginning of each Congress, the Members of the Senate who are members of the majority party of the Senate shall elect a chairman for the select committee, and the Members of the Senate who are from the minority party of the Senate shall elect a vice chairman for such committee. The vice chairman shall act in the place and stead of the chairman in the absence of the chairman. Neither the chairman nor the vice chairman of the select committee shall at the same time serve as chairman or ranking minority member of any other committee referred to in paragraph 6(f) of rule XXV of the Standing Rules of the Senate.

(d) For the purposes of paragraph 6(a) of rule XXV of the Standing Rules of the Senate, service of a Senator as a member of the select committee shall not be taken into account.

SEC. 3. (a) There shall be referred to the select committee all proposed legislation, messages, petitions, memorials, and other matters relating to the following:

(1) The Central Intelligence Agency and the Director of Central Intelligence.

(2) Intelligence activities of all other departments and agencies of the Government, including, but not limited to, the intelligence activities of the Defense Intelligence Agency, the National Security Agency, and other agencies of the Department of Defense; the Department of State; the Department of Justice; and the Department of the Treasury.

(3) The organization or reorganization of any department or agency of the Government to the extent that the organization or reorganization relates to a function or activity involving intelligence activities.

(4) Authorizations for appropriations, both direct and indirect, for the following:

(A) The Central Intelligence Agency and Director of Central Intelligence.

(B) The Defense Intelligence Agency.

(C) The National Security Agency.

(D) The intelligence activities of other agencies and subdivisions of the Department of Defense.

(E) The intelligence activities of the Department of State.

(F) The intelligence activities of the Federal Bureau of Investigation, including all activities of the Intelligence Division.

(G) Any department, agency, or subdivision which is the successor to any agency named in clause (A), (B), or (C); and the activities of any department, agency, or subdivision which is the successor to any department, agency, bureau, or subdivision named in clause (D), (E), or (F) to the extent that the activities of such successor department, agency, or subdivision are activities described in clause (D), (E), or (F).

(b) Any proposed legislation reported by the select committee, except any legislation involving matters specified in clause (1) or (4)(A) of subsection (a), containing any matter otherwise within the jurisdiction of any standing committee shall, at the request of the chairman of such standing committee, be referred to such standing committee for its consideration of such matter and be reported to the Senate by such standing committee within thirty days after the day on which such proposed legislation is referred to such standing committee; and any proposed legislation reported by any committee, other than the select committee, which contains any matter within the jurisdiction of the select committee shall, at the request of the chairman of the select committee, be referred to the select committee for its consideration of such matter and be reported to the Senate by the select committee within thirty days after the day on which such proposed legislation is referred to such committee. In any case in which a committee fails to report any proposed legislation referred to it within the time limit prescribed herein, such committee shall be automatically discharged from further consideration of such proposed legislation on the thirtieth day following the day on which such proposed legislation is referred to such committee unless the Senate provides otherwise. In computing any thirty-day period under this paragraph there shall be excluded from such computation any days on which the Senate is not in session.

(c) Nothing in this resolution shall be construed as prohibiting or otherwise restricting the authority of any other committee to study and review any intelligence activity to the extent that such activity directly affects a matter otherwise within the jurisdiction of such committee.

(d) Nothing in this resolution shall be construed as amending, limiting, or otherwise changing the authority of any standing committee of the Senate to obtain full and prompt access to the product of the intelligence activities of any department or agency of the Government relevant to a matter otherwise within the jurisdiction of such committee.

SEC. 4. (a) The select committee, for the purposes of accountability to the Senate, shall make regular and periodic reports to the Senate on the nature and extent of the intelligence activities of the various departments and agencies of the United States. Such committee shall promptly call to the attention of the Senate or to any other appropriate committee or committees of the Senate any matters requiring the attention of the Senate or such other committee or committees. In making such reports, the select committee shall proceed in a manner consistent with section 8(c)(2) to protect national security.

(b) The select committee shall obtain an annual report from the Director of the Central Intelligence Agency, the Secretary of Defense, the Secretary of State, and the Director of the Federal Bureau of Investigation. Such reports shall review the intelligence activities of the agency or department concerned and the intelligence activities of foreign countries directed at the United States or its interest. An unclassified version of each report may be made available to the public at the discretion of the select committee. Nothing herein shall be construed as requiring the public disclosure in such reports of the names of individuals engaged in intelligence activities for the United States or the divulging of intelligence methods employed or the sources of information on which such reports are based or the amount of funds authorized to be appropriated for intelligence activities.

(c) On or before March 15 of each year, the select committee shall submit to the Committee on the Budget of the Senate the views and estimates described in section 301(c) of the Congressional Budget Act of 1974 regarding matters within the jurisdiction of the select committee.

SEC. 5. (a) For the purposes of this resolution, the select committee is authorized in its discretion (1) to make investigations into any matter within its jurisdiction, (2) to make expenditures from the contingent fund of the Senate, (3) to employ personnel, (4) to hold hearings, (5) to sit and act at any time or place during the sessions, recesses, and adjourned periods of the Senate, (6) to require, by subpena or otherwise, the attendance of witnesses and the production of correspondence, books, papers, and documents, (7) to take depositions and other testimony, (8) to procure the service of individual consultants or organizations thereof, in accordance with the provisions of section 202(i) of the Legislative Reorganization Act of 1946, and (9) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The chairman of the select committee or any member thereof may administer oaths to witnesses.

(c) Subpenas authorized by the select committee may be issued over the signature of the chairman, the vice chairman, or any member of the select committee designated by the chairman, and may be served by any person designated by the chairman or any member signing the subpena.

SEC. 6. No employee of the select committee or any person engaged by contract or otherwise to perform services for or at the request of such committee shall be given access to any classified information by such committee unless such employee or person has (1) agreed in writing and under oath to be bound by the rules of the Senate (including the jurisdiction of the Select Committee on Standards and Conduct and of such committee as to the security of such information during and after the period of his employment or contractual agreement with such committee; and (2) received an appropriate security clearance as determined by such committee in consultation with the Director of Central Intelligence. The type of security clearance to be required in the case of any such employee or person shall, within the determination of such committee in consultation with the Director Central Intelligence, be commensurate with the sensitivity of the classified information to which such employee or person will be given access by such committee.

SEC. 7. The select committee shall formulate and carry out such rules and procedures as it deems necessary to prevent the disclosure, without the consent of the person or persons concerned, of information in the possession of such committee which unduly infringes upon the privacy or which violates the constitutional rights of such person or persons. Nothing herein shall be construed to prevent such committee from publicly disclosing any such information in any case in which such committee determines the national interest in the disclosure of such information clearly outweighs any infringement on the privacy of any person or persons.

SEC. 8. (a) The select committee may, subject to the provisions of this section, disclose publicly any information in the possession of such committee after a determination by such committee that the public interest would be served by such disclosure. Whenever committee action is required to disclose any information under this section, the committee shall meet to vote on the matter within five days after any member of the committee requests such a vote. No member of the select committee shall disclose any information, the disclosure of which requires a committee vote, prior to a vote by the committee on the question of the disclosure of such information or after such vote except in accordance with this section.

(b)(1) In any call in which the select committee votes to disclose publicly any information which has been classified under established security procedures, which has been submitted to it by the executive branch, and which the executive branch requests be kept secret, such committee shall notify the President of such vote.

(2) The select committee may disclose publicly such information after the expiration of a five-day period following the day on which notice of such vote is transmitted to the President, unless, prior to the expiration of such five-day period, the President, personally in writing, notifies the committee that he objects to the disclosure of such information, provides his reasons therefor, and certifies that the threat to the national interest of the United States posed by such disclosure is of such gravity that it outweighs any public interest in the disclosure.

(3) If the President, personally in writing, notifies the select committee of his objections to the disclosure of such information as provided in paragraph (2), such committee may, by majority vote, refer the question of the disclosure of such information to the Senate for consideration. The committee shall not publicly disclose such information without leave of the Senate.

(4) Whenever the select committee votes to refer the question of disclosure of any information to the Senate under paragraph (3), the chairman shall, not later than the first day on which the Senate is in session following the day on which the vote occurs, report the matter to the Senate for its consideration.

(5) One hour after the Senate convenes on the fourth day on which the Senate is in session following the day on which any such matter is reported to the Senate, or at such earlier time as the majority leader and the minority leader of the Senate jointly agree upon in accordance with section 133(f) of the Legislative Reorganization Act of 1946, the Senate shall go into closed session and the matter shall be the pending business. In considering the matter in closed session the Senate may—

(A) approve the public disclosure of all or any portion of the information in question, in which case the committee shall publicly disclose the information ordered to be disclosed,

(B) disapprove the public disclosure of all or any portion of the information in question, in which case the committee shall not publicly disclose the information ordered not to be disclosed, or

(C) refer all or any portion of the matter back to the committee, in which case the committee shall make the final determination with respect to the public disclosure of the information in question.

Upon conclusion of the consideration of such matter in closed session, which may not extend beyond the close of the ninth day on which the Senate is in session following the day on which such matter was reported to the Senate, or the close of the fifth day following the day agreed upon jointly by the majority and minority leaders in accordance with section 133(f) of the Legislative Reorganization Act of 1946 (whichever the case may be), the Senate shall immediately vote on the disposition of such matter in open session, without debate, and without divulging the information with respect to which the vote is being taken. The Senate shall vote to dispose of such matter by one or more of the means specified in clauses (A), (B), and (C) of the second sentence of this paragraph. Any vote of the Senate to disclose any information pursuant to this paragraph shall be subject to the right of a Member of the Senate to move for reconsideration of the vote within the time and pursuant to the procedures specified in rule XIII of the Standing Rules of the Senate, and the disclosure of such information shall be made consistent with that right.

(c)(1) No information in the possession of the select committee relating to the lawful intelligence activities of any department or agency of the United States which has been classified under established security procedures and which the select committee, pursuant to subsection (a) or (b) of this section, has determined should not be disclosed shall be made available to any person by a Member, officer, or employee of the Senate except in a closed session of the Senate or as provided in paragraph (2).

(2) The select committee may, under such regulations as the committee shall prescribe to protect the confidentiality of such information, make any information described in paragraph (1) available to any other committee or any other Member of the Senate. Whenever the select committee makes such information available, the committee shall keep a written record showing, in the case of any particular information, which committee or which Members of the Senate received such information. No Member of the Senate who, and no committee which, receives any information under this subsection, shall disclose such information except in a closed session of the Senate.

(d) It shall be the duty of the Select Committee on Standards and Conduct to investigate any unauthorized disclosure of intelligence information by a Member, officer or employee of the Senate in violation of subsection (c) and to report to the Senate concerning any allegation which it finds to be substantiated.

(e) Upon the request of any person who is subject to any such investigation, the Select Committee on Standards and Conduct shall release to such individual at the conclusion of its investigation a summary of its investigation together with its findings. If, at the conclusion of its investigation, the Select Committee on Standards and Conduct determines that there has been a significant breach of confidentiality or unauthorized disclosure by a Member, officer, or employee of the Senate, it shall report its findings to the Senate and recommend appropriate action such as censure, removal from committee membership, or expulsion from the Senate, in the case of Member, or removal from office or employment or punishment for contempt, in the case of an officer or employee.

SEC. 9. The select committee is authorized to permit any personal representative of the President, designated by the President to serve as a liaison to such committee, to attend any closed meeting of such committee.

SEC. 10. Upon expiration of the Select Committee on Governmental Operations With Respect to Intelligence Activities, established by Senate Resolution 21, Ninety-fourth Congress, all records, files, documents, and other materials in the possession, custody, or control of such committee, under appropriate conditions established by it, shall be transferred to the select committee.

SEC. 11. (a) It is the sense of the Senate that the head of each department and agency of the United States should keep the select committee fully and currently informed with respect to intelligence activities, including any significant anticipated activities, which are the responsibility of or engaged in by such department or agency: *Provided,* That this does not constitute a condition precedent to the implementation of any such anticipated intelligence activity.

(b) It is the sense of the Senate that the head of any department or agency of the United States involved in any intelligence activities should furnish any information or document in the possession, custody, or control of the department or agency, or person paid by such department or agency, whenever requested by the select committee with respect to any matter within such committee's jurisdiction.

(c) it is the sense of the Senate that each department and agency of the United States

should report immediately upon discovery to the select committee any and all intelligence activities which constitute violations of the constitutional rights of any person, violations of law, or violations of Executive orders, President directives, or departmental or agency rules or regulations; each department and agency should further report to such committee what actions have been taken or are expected to be taken by the departments or agencies with respect to such violations.

SEC. 12. Subject to the Standing Rules of the Senate, no funds shall be appropriated for any fiscal year beginning after September 30, 1976, with the exception of a continuing bill or resolution, or amendment thereto, or conference report thereon, to, or for use of, any department or agency of the United States to carry out any of the following activities, unless such funds shall have been previously authorized by a bill or joint resolution passed by the Senate during the same or preceding fiscal year to carry out such activity for such fiscal year:

(1) The activities of the Central Intelligence Agency and the Director of Central Intelligence.

(2) The activities of the Defense Intelligency Agency.

(3) The activities of the National Security Agency.

(4) The intelligence activities of other agencies and subdivisions of the Department of Defense.

(5) The intelligence activities of the Department of State.

(6) The intelligence activities of the Federal Bureau of Investigation, including all activities of the Intelligence Division.

SEC. 13. (a) The select committee shall make a study with respect to the following matters, taking into consideration with respect to each such matter, all relevent aspects of the effectiveness of planning, gathering, use, security, and dissemination of intelligence:

(1) the quality of the analytical capabilities of United States foreign intelligence agencies and means for integrating more closely analytical intelligence and policy formulation;

(2) the extent and nature of the authority of the departments and agencies of the executive branch to engage in intelligence activities and the desirability of developing charters for each intelligence agency or department;

(3) the organization of intelligence activities in the executive branch to maximize the effectiveness of the conduct, oversight, and accountability of intelligence activities; to reduce duplication or overlap; and to improve the morale of the personnel of the foreign intelligence agencies;

(4) the conduct of covert and clandestine activities and the procedures by which Congress is informed of such activities;

(5) the desirability of changing any law, Senate rule or procedure, or any Executive order, rule, or regulation to improve the protection of intelligence secrets and provide for disclosure of information for which there is no compelling reason for secrecy;

(6) the desirability of establishing a standing committee of the Senate on intelligence activities;

(7) the desirability of establishing a joint committee of the Senate and the House of Representatives on intelligence activities in lieu of having separate committees in each House of Congress, or of establishing procedures under which separate committees on intelligence activities of the two Houses of Congress would receive joint briefings from the intelligence agencies and coordinate their policies with respect to the safeguarding of sensitive intelligence information;

(8) the authorization of funds for the intelligence activities of the Government and whether disclosure of any of the amounts of such funds is in the public interest; and

(9) the development of a uniform set of definition is for terms to be used in policies or guidelines which may be adopted by the executive or legislative branches to govern, clarify, and strengthen the operation of intelligence activities.

(b) The select committee may, in its discretion, omit from the special study required by this section any matter it determines has been adequately studied by the Select Committee To Study Governmental Operations With Respect to Intelligence Activities, established by Senate Resolution 21, Ninety-fourth Congress.

(c) The select committee shall report the results of the study provided for by this section to the Senate, together with any recommendations for legislative or other actions it deems appropriate, no later than July 1, 1977, and from time to time thereafter as it deems appropriate.

SEC. 14. (a) As used in this resolution, the term "intelligence activities" includes (1) the collection, analysis, production, dissemination, or use of information which relates to any foreign country, or any government, political group, party, military force, movement, or other association in such foreign country, and which relates to the defense, foreign policy, national security, or related policies of the United States, and other activity which is in support of such activities; (2) activities taken to counter similar activities directed against the United States; (3) covert or clandestine activities affecting the relations of the United States with any foreign government, political group, party, military force, movement or other association; (4) the collection, analysis, production, dissemination, or use of information about activities of persons within the United States, its territories and possessions, or nationals of the United States abroad whose political and related activities pose, or may be considered by any department, agency, bureau, office, division, instrumentality, or employee of the United States to pose, a threat to the internal security of the United States, and covert or clandestine activities directed against such persons. Such term does not include tactical foreign military intelligence serving no national policymaking function.

(b) As used in this resolution, the term "department or agency" includes any organization, committee, council, establishment, or office within the Federal Government.

(c) For purposes of this resolution, reference to any department, agency, bureau, or subdivision shall include a reference to any successor department, agency, bureau, or subdivision to the extent that such successor engages in intelligence activities now conducted by the department, agency, bureau, or subdivision referred to in this resolution.

SEC. 15. For the period from the date this resolution is agreed to through February 28, 1977, the expenses of the select committee under this resolution shall not exceed $275,000, of which amount not to exceed $30,000 shall be available for the procurement of the services of individual consultants, or organizations thereof, as authorized by section 202(i) of the Legislative Reorganization Act of 1946, expenses of the select committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the select committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SEC. 16. Nothing in this resolution shall be construed as constituting acquiescence by the Senate in any practice, or in the conduct of any activity, not otherwise authorized by law.

S. RES. 9

Resolved, That paragraph 7(b) of rule XXV of the Standing Rules of the Senate is amended to read as follows:

"(b) Each meeting of a standing, select, or special committee of the Senate, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a portion or portions of any such meeting may be closed to the public if the committee or subcommittee, as the case may be, determines by record vote of a majority of the members of the committee or subcommittee present that the matters to be discussed or the testimony to be taken at such portion or portions—

"(1) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;

"(2) will relate solely to matters of committee staff personnel or internal staff management or procedure;

"(3) will tend to charge an individual with crime or misconduct, to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy, or will represent a clearly unwarranted invasion of the privacy of an individual;

"(4) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the investigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement; or

"(5) will disclose information relating to the trade secrets or financial or commercial information pertaining specifically to a given person if—

"(A) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

"(B) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person.

Whenever any hearing conducted by any such committee or subcommittee is open to the public, that hearing may be broadcast by radio or television, or both, under such rules as the committee or subcommittee may adopt.".

SEC. 2. Section 133A(b) of the Legislative Reorganization Act of 1946, section 242(a) of the Legislative Reorganization Act of 1970, and sections 102 (d) and (e) of the Congressional Budget Act of 1974 are repealed.

Mr. MOYNIHAN. Mr. President, I rise to join the Senator from Arizona, Senator GOLDWATER, the distinguished chairman of the Select Committee on Intelligence, in submitting this report of the committee's activities during the 97th Congress.

As vice chairman of the select committee for those 2 years, I believe the report accurately reflects the work done by the committee.

The report is important because it is an opportunity for the Senate and the public to get some sense of the nature of the committee's oversight of the intelligence community. It is also important in that its compilation forces the committee to see where it has been these past 2 years and, implicitly, where it is headed.

We do well to recall the situation in 1976 when the select committee was established. Investigations had revealed that our intelligence agencies abused their authority. In addition, the intelligence community had experienced a 40-percent reduction in personnel in the previous decade. Yet the world was becoming an increasingly dangerous place as the Soviet Union was engaging in an unprecedented military buildup and the Third World presented new challenges to the interests of the United States. Not surprisingly, questions were raised about the ability of the CIA and its sister agencies to supply the President and his advisers the kind of information they need to steer a prudent course for American foreign policy.

During my 6 years on the committee, we have concentrated our efforts on two major tasks. The first of these was to establish effective mechanisms for insuring that the intelligence community stays within the bounds of the law and common decency. The second was to provide the resources necessary for rebuilding our intelligence capabilities. It is to be hoped that the readers of this report will cull from its somewhat cryptic and numerous pages a sense that these tasks are in large part being accomplished.

Mr. President, in 1972, I observed that the public life of our age seems dominated by the unexpected and the unforeseen, while the task of governing seems increasingly that of imposing some measure of order on this less than cosmic chaos. I referred to the task as one of coping—of striving or contending on equal terms with a measure of success. While my remarks then concerned the practice of Government in general, they are entirely applicable to the experience of the Select Committee on Intelligence. I think it can fairly be said that the committee has coped well with the issues it has addressed. But in citing the committee's accomplishments, there is no intent to imply a sense of complacency. Oversight is not a static process. We have lain only the first blocks in the reconstruction of our intelligence community, not the final edifice. We are still a young committee, and during its less than 7 years tenure, there has been a continual effort to identify ways to improve our oversight. This is the spirit in which the members of the committee will continue their work in the 98th Congress.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 86-380, appoints the Senator from Delaware (Mr. ROTH) and the Senator from Minnesota (Mr. DURENBERGER) to the Advisory Commission on Intergovernmental Relations.

The Chair, on behalf of the Vice President, pursuant to Public Law 83-420, appoints the Senator from New York (Mr. D'AMATO) to the Board of Directors of Gallaudet College.

The Chair, on behalf of the Vice President, pursuant to Public Law 81-754, appoints the Senator from Oregon (Mr. HATFIELD) to the National Historical Publications and Records Commission.

APPOINTMENTS BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to Public Law 94-118, appoints the Senator from Delaware (Mr. ROTH) to the Japan-United States Friendship Commission.

The Chair, on behalf of the President pro tempore, pursuant to Public Law 96-388, as amended by Public Law 97-84, appoints the following Senators to the U.S. Holocaust Memorial Council: The Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Missouri (Mr. DANFORTH), and the Senator from Kansas (Mr. DOLE).

RULES OF THE COMMITTEE ON FOREIGN RELATIONS

Mr. PERCY. Mr. President, pursuant to the requirements of Senate Rule XXVI.2, I ask to have printed in the CONGRESSIONAL RECORD the rules of the Committee on Foreign Relations, for the 98th Congress, adopted by the Committee on February 22, 1983.

There being no objection, the rules were ordered to be printed in the RECORD, as follows:

RULES OF THE COMMITTEE ON FOREIGN RELATIONS

RULE 1—JURISDICTION

(a) *Substantive.*—In accordance with Senate Rule XXV.1(j), the jurisdiction of the Committee shall extend to all proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects:

1. Acquisition of land buildings for embassies and legations in foreign countries.
2. Boundaries of the United States.
3. Diplomatic service.
4. Foreign economic, military, technical, and humanitarian assistance.
5. Foreign loans.
6. International activities of the American National Red Cross and the International Committee of the Red Cross.
7. International aspects of nuclear energy, including nuclear transfer policy.
8. International conferences and congresses.
9. International law as it relates to foreign policy.
10. International Monetary Fund and other international organizations established primarily for international monetary purposes (except that, at the request of the Committee on Banking, Housing, and Urban Affairs, any proposed legislation relating to such subjects reported by the Committee on Foreign Relations shall be referred to the Committee on Banking, Housing, and Urban Affairs).
11. Intervention abroad and declarations of war.
12. Measures to foster commercial intercourse with foreign nations and to safeguard American business interests abroad.
13. National security and international aspects of trusteeships of the United States.
14. Ocean and international environmental and scientific affairs as they relate to foreign policy.
15. Protection of United States citizens abroad and expatriation.
16. Relations of the United States with foreign nations generally.
17. Treaties and executive agreements, except reciprocal trade agreements.
18. United Nations and its affiliated organizations.
19. World Bank group, the regional development banks, and other international organizations established primarily for development assistance purposes.

The Committee is also mandated by Senate Rule XXV.1(j) to study and review, on a comprehensive basis, matters relating to the national security policy, foreign policy, and international economic policy as it relates to foreign policy of the United States, and matters relating to food, hunger, and nutrition in foreign countries, and report thereon from time to time.

(b) *Oversight.*—The Committee also has a responsibility under Senate Rule XXVI. 8, which provides that ". . . each standing Committee . . . shall review and study, on a continuing basis, the application, administration, and execution of those laws or parts of laws, the subject matter of which is within the jurisdiction of the committee."

(c) *"Advice and Consent" Clauses.*—The Committee has a special responsibility to assist the Senate in its constitutional function of providing "advice and consent" to all treaties entered into by the United States and all nominations to the principal executive branch positions in the field of foreign policy and diplomacy.

RULE 3—MEETINGS

(a) *Regular Meeting Day.*—The regular meeting day of the Committee of Foreign Relations for the transaction of Committee business shall be on Tuesday of each week, unless otherwise directed by the Chairman.

(b) *Additional Meetings.*—Additional meetings and hearings of the Committee may be called by the Chairman as he may deem necessary. If at least three members of the Committee desire that a special meeting of the Committee be called by the Chairman, those members may file in the offices of the Committee their written request to the Chairman for that special meeting. Immediately upon filing of the request, the Chief Clerk of the Committee

shall notify the Chairman of the filing of the request. If, within three calendar days after the filing of the request, the Chairman does not call the requested special meeting, to be held within seven calendar days after the filing of the request, a majority of the members of the Committee may file in the offices of the Committee their written notice that a special meeting of the Committee will be held, specifying the date and hour of that special meeting. The Committee shall meet on that date and hour. Immediately upon the filing of the notice, the Clerk shall notify all members of the Committee that such special meeting will be held and inform them of its date and hour.

(c) *Minority Request.*—Whenever any hearing is conducted by the Committee or a subcommittee upon any measure or matter, the minority on the Committee shall be entitled, upon request made by a majority of the minority members to the Chairman before the completion of such hearing to call witnesses selected by the minority to testify with respect to the measure or matter during at least one day of hearing thereon.

(d) *Public Announcement.*—The Committee, or any subcommittee thereof, shall make public announcement of the date, place, time and subject matter of any hearing to be conducted on any measure or matter at least one week in advance of such hearings, unless the Chairman of the Committee, or subcommittee, determines that there is good cause to begin such hearing at an earlier date.

(e) *Procedure.*—Insofar as possible, proceedings of the Committee will be conducted without resort to the formalities of parliamentary procedure and with due regard for the views of all members. Issues of procedure which may arise from time to time shall be resolved by decision of the Chairman, in consultation with the Ranking Minority Member and with the advice of the Chief Clerk. The Chairman, in consultation with the Ranking Minority Member, may also propose special procedures to govern the consideration of particular matters by the Committee.

(f) *Closed Sessions.*—Each meeting of the Committee on Foreign Relations, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by the Committee or a subcommittee on the same subject for a period of no more than fourteen calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated in paragraphs (1) through (6) would require the meeting to be closed followed immediately by a record vote in open session by a majority of the members of the Committee or subcommittee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings—

(1) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;

(2) will relate solely to matters of Committees staff personnel or internal staff management or procedure;

(3) will tend to charge an individual with crime or misconduct; to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy, or will represent a clearly unwarranted invasion of the privacy of an individual;

(4) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the investigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;

(5) will disclose information relating to the trade secrets or financial or commercial information pertaining specifically to a given person if—

(A) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

(B) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or

(6) may divulge matters required to be kept confidential under other provisions of law or Government regulations.

A closed meeting may be opened by a majority vote of the Committee.

(g) *Staff Attendance.*—A member of the Committee may have one member of his or her personal staff, for whom that member assumes personal responsibility, accompany and be seated nearby at committee meetings.

Each member of the Committee may designate members of his or her personal staff, who hold a Top Secret security clearance, for the purpose of their eligibility to attend closed sessions of the Committee, subject to the same conditions set forth for Committee staff under Rules 12, 13, and 14.

In addition, the Majority Leader and the Minority Leader of the Senate, if they are not otherwise members of the Committee, may designate one member of their staff with a Top Secret security clearance to attend closed sessions of the Committee, subject to the same conditions set forth for Committee staff under Rules 12, 13 and 14. Staff of other Senators who are not members of the Committee may not attend closed sessions of the Committee.

Attendance of Committee staff at meetings shall be limited to those designated by the Staff Director or the Minority Staff Director.

The Committee, by majority vote, or the Chairman, with the concurrence of the Ranking Minority Member, may limit staff attendance at specified meetings.

RULE 4—QUORUMS

(a) *Testimony.*—For the purpose of taking sworn or unsworn testimony at any duly scheduled meeting a quorum of the Committee and each subcommittee thereof shall consist of one member.

(b) *Business.*—A quorum for the transaction of Committee or subcommittee business, other than for reporting a measure or recommendation to the Senate or the taking of testimony, shall consist of one-third of the members of the Committee or subcommittee, including at least one member from each party.

(c) *Reporting.*—A majority of the membership of the Committee shall constitute a quorum for reporting any measure or recommendation to the Senate. No measure or recommendation shall be ordered reported from the Committee unless a majority of the Committee members are physically present. The vote of the Committee to report a measure or matter shall require the concurrence of a majority of those members who are physically present at the time the vote is taken.

RULE 5—PROXIES

Proxies must be in writing with the signature of the absent member. Subject to the requirements of Rule 4 for the physical presence of a quorum to report a matter, proxy voting shall be allowed on all measures and matters before the Committee. However, proxies shall not be voted on a measure or matter except when the absent member has been informed of the matter on which he is being recorded and has affirmatively requested that he be so recorded.

RULE 6—WITNESSES

(a) *General.*—The Committee on Foreign Relations will consider requests to testify on any matter or measure pending before the Committee.

(b) *Presentation.*—If the Chairman so determines, the oral presentation of witnesses shall be limited to ten minutes. However, written statements of reasonable length may be submitted by witnesses and other interested persons who are unable to testify in person.

(c) *Filing of Statements.*—A witness appearing before the Committee, or any subcommittee thereof, shall file a written statement of his proposed testimony at least 48 hours prior to his appearance, unless this requirement is waived by the Chairman and the Ranking Minority Member following their determination that there is good cause for failure to file such a statement.

(d) *Expenses.*—Only the Chairman may authorize expenditures of funds for the expenses of witnesses appearing before the Committee or its subcommittees.

(e) *Requests.*—Any witness called for a hearing may submit a written request to the Chairman no later than twenty-four hours in advance for his testimony to be in closed or open session, or for any other unusual procedure. The Chairman shall determine whether to grant any such request and shall notify the Committee members of the request and of his decision.

RULE 7—SUBPENAS

(a) *Authorization.*—The Chairman or any other member of the Committee, when authorized by a majority vote of the Committee, when authorized by a majority vote of the Committee at a meeting or by proxies, shall have authority to subpoena the attendance of witnesses or the production of memoranda, documents, records, or any other materials. When the Committee authorizes a subpoena, it may be issued upon the signature of the Chairman or any other member designated by the Committee.

(b) *Return.*—A subpoena, or a request to an agency, for documents may be issued whose return shall occur at a time and place other than that of a scheduled Committee meeting. A return on such a subpoena or request which is incomplete or accompanied by an objection constitutes good cause for a hearing on shortened notice. Upon such a return, the Chairman or any other member designated by him may convene a hearing by giving two hours notice by telephone to all other members. One member shall constitute a quorum for such a hearing. The sole purpose of such a hearing shall be to elucidate further information about the return and to rule on the objection.

RULE 8—REPORTS

(a) *Filing.*—When the Committee has ordered a measure or recommendation reported, the report thereon shall be filed in the Senate at the earliest practicable time.

(b) *Supplemental, Minority and Additional Views.*—A member of the committee who gives notice of his intentions to file supplemental, minority, or additional views at the time of final Committee approval of a meas-

ure or matter, shall be entitled to not less than 3 calendar days in which to file such views, in writing, with the Chief Clerk of the Committee. Such views shall then be included in the Committee report and printed in the same volume, as a part thereof, and their inclusion shall be noted on the cover of the report. In the absence of timely notice, the Committee report may be filed and printed immediately without such views.

(c) *Rollcall Votes.*—The results of all rollcall votes taken in any meeting of the Committee on any measure, or amendment thereto, shall be announced in the Committee report. The announcement shall include a tabulation of the votes cast in favor and votes cast in opposition to each such measure and amendment by each member of the Committee.

RULE 9—TREATIES

(a) The Committee is the only committee of the Senate with jurisdiction to review and report to the Senate on treaties submitted by the President for Senate advice and consent. Because the House of Representatives has no role in the approval of treaties, the Committee is therefore the only congressional committee with responsibilitiy for treaties.

(b) Once submitted by the President for advice and consent, each treaty is referred to the Committee and remains on its calendar from Congress to Congress until the Committee takes action to report it to the Senate or recommend its return to the President, or until the Committee is discharged of the treaty by the Senate.

(c) In accordance with Senate Rule XXX.2, treaties which have been reported to the Senate but not acted on before the end of a Congress "shall be resumed at the commencement of the next Congress as if no proceedings had previously been had thereon."

(d) Insofar as possible, the Committee should conduct a public hearing on each treaty as soon as possible after its submission by the President. Except in extraordinary circumstances, treaties reported to the Senate shall be accompanied by a written report.

RULE 10—NOMINATIONS

(a) *Waiting Requirement.*—Unless otherwise directed by the Chairman and the Ranking Minority Member, the Committee on Foreign Relations shall not consider any nomination until six calendar days after it has been formally submitted to the Senate.

(b) *Public Consideration.*—Nominees for any post who are invited to appear before the Committee shall be heard in public session, unless a majority of the Committee decrees otherwise.

(c) *Required Data.*—No nomination shall be reported to the Senate unless (1) the nominee has been accorded a security clearance on the basis of a thorough investigation by executive branch agencies; (2) in appropriate cases, the nominee has filed a confidential statement and financial disclosure report with the Committee; (3) the Committee has been assured that the nominee does not have any interests which could conflict with the interests of the government in the exercise of the nominee's proposed responsibilities; (4), for persons nominated to be chief of mission, ambassador-at-large, or minister, the Committee has received a complete list of any contributions made by the nominee or members of his immediate family to any Federal election campaign during the year of his or her nomination and for the four preceding years; and (5) for persons nominated to be chiefs of mission, a report on the demonstrated competence of that nominee to perform the duties of the position to which he or she has been nominated.

RULE 11—TRAVEL

(a) *Foreign Travel.*—No member of the Committee on Foreign Relations or its staff shall travel abroad on Committee business unless specifically authorized by the Chairman, who is required by law to approve vouchers and report expenditures of foreign currencies, and the Ranking Minority Member. Requests for authorization of such travel shall state the purpose and, when completed, a full substantive and financial report shall be filed with the Committee within 30 days. This report shall be furnished to all members of the Committee and shall not be otherwise disseminated without the express authorization of the Committee. Except in extraordinary circumstances, staff travel shall not be approved unless the reporting requirements have been fulfilled for all prior trips. Except for travel that is strictly personal, travel funded by non-U.S. government sources is subject to the same approval and substantive reporting requirements as U.S. government-funded travel. In addition, members and staff are reminded of Senate Rule XXXV.4 requiring a determination by the Senate Ethics Committee in the case of foreign-sponsored travel.

Any proposed travel by committee staff for a subcommittee purpose must be approved by the subcommittee chairman and ranking minority member prior to submission of the request to the Chairman and Ranking Minority Member of the full committee.

When the Chairman and the Ranking Minority Member approve the foreign travel of a member of the staff of the Committee not accompanying a member of the Committee, all members of the Committee shall be advised, prior to the commencement of such travel, of its extent, nature, and purpose.

(b) *Domestic Travel.*—All official travel in the United States by the Committee staff shall be approved in advance by the Staff Director, or in the case of minority staff, by the Minority Staff Director.

(c) *Personal Staff.*—One member of the personal staff of a member of the Committee may travel with that member with the approval of the Chairman and the Ranking Minority Member of the Committee. During such travel, the personal staff member shall be considered to be an employee of the Committee.

RULE 12—TRANSCRIPTS

(a) *General.*—The Committee on Foreign Relations shall keep verbatim transcripts of all Committee and subcommittee meetings and such transcripts shall remain in the custody of the Committee, unless a majority of the Committee decides otherwise. Transcripts of public hearings by the Committee shall be published unless the Chairman, with the concurrence of the Ranking Minority Member, determines otherwise.

(b) *Classified or Restricted Transcripts.*—

(1) The Chief Clerk of the Committee shall have responsibility for the maintenance and security of classified or restricted transcripts.

(2) A record shall be maintained of each use of classified or restricted transcripts.

(3) Classified or restricted transcripts shall be kept in locked combination safes in the Committee offices except when in active use by authorized persons. They must never be left unattended and shall be returned to the Chief Clerk promptly when no longer needed.

(4) Except as provided in paragraph 7 below, transcripts classified secret or higher may not leave the Committee offices except for the purpose of declassification.

(5) Classified transcripts other than those classified secret or higher may leave the Committee offices in the possession of authorized persons with the approval of the Chairman. Delivery and return shall be made only by authorized persons. Such transcripts may not leave Washington, D.C. unless adequate assurances for their security are made to the Chairman.

(6) Extreme care shall be exercised to avoid taking notes or quotes from classified transcripts. Their contents may not be divulged to any unauthorized person.

(7) Subject to any additional restrictions imposed by the Chairman with the concurrence of the Ranking Minority Member, only the following persons are authorized to have access to classified or restricted transcripts:

(i) Members and staff of the Committee in the Committee rooms;

(ii) Designated personal representatives of members of the Committee, and of the Majority and Minority Leaders, with appropriate security clearances, in the Committee's Capitol office;

(iii) Senators not members of the Committee, by permission of the Chairman;

(iv) Members of the executive departments involved in the meeting, in the Committee's Capitol office, or, with the permission of the Chairman, in the offices of the officials who took part in the meeting, but in either case, only for a specified and limited period of time, and only after reliable assurances against further reproduction or dissemination have been given.

(8) Any restrictions imposed upon access to a meeting of the Committee shall also apply to the transcript of such meeting, except by special permission of the Chairman and notice to the other members of the Committee. Each transcript of a closed session of the Committee shall include on its cover a description of the restrictions imposed upon access, as well as any applicable restrictions upon photocopying, note taking or other dissemination.

(9) In addition to restrictions resulting from the inclusion of any classified information in the transcript of a Committee meeting, members and staff shall not discuss with anyone the proceedings of the Committee in closed session or reveal information conveyed or discussed in such a session unless that person would have been permitted to attend the session itself, or unless such communication is specifically authorized by the Chairman, the Ranking Minority Member, or in the case of staff, by the Staff Director or Minority Staff Director. A record shall be kept of all such authorizations.

(c) *Declassification.*—

(1) All restricted transcripts and classified Committee reports shall be declassified on a date twelve years after their origination unless the Committee by majority vote decides against such declassification, and provided that the executive departments involved and all former Committee members who participated directly in the sessions or reports concerned have been consulted in advance and given a reasonable opportunity to raise objections to such declassification.

(2) Any transcript or classified Committee report, or any portion thereof, may be declassified fewer than twelve years after their origination if:

(i) the Chairman originates such action or receives a written request for such action, and notifies the other members of the Committee; and

(ii) the Chairman, Ranking Minority Member, and each member or former member who participated directly in such meeting or report give their approval, except that the Committee by majority vote may overrule any objections thereby raised to early declassification; and

(iii) the executive departments and all former Committee members are consulted in advance and have a reasonable opportunity to object to early declassification.

RULE 13—CLASSIFIED MATERIAL

(a) All classified material received or originated by the Committee shall be logged in at the Committee's offices in the Dirksen Senate Office Building, and except for material classified as "Top Secret" shall be filed in the Dirksen Senate Building offices for Committee use and safekeeping.

(b) Each such piece of classified material received or originated shall be card indexed and serially numbered, and where requiring onward distribution shall be distributed by means of an attached indexed form approved by the Chairman. If such material is to be distributed outside the Committee offices, it shall, in addition to the attached form, be accompanied also by an approved signature sheet to show onward receipt.

(c) Distribution of classified material among offices shall be by Committee members or authorized staff only. All classified material sent to members' offices, and that distributed within the working offices of the Committee, shall be returned to the office designated by the Chief Clerk. No classified material is to be removed from the offices of the members or of the Committee without permission of the Chairman. Such classified material will be afforded safe handling and safe storage at all times.

(d) Material classified "Top Secret," after being indexed and numbered, shall be sent to the Committee's Capitol office for use by the members and authorized staff in that office only or in such other secure committee offices as may be authorized by the Chairman or Staff Director.

(e) In general, members and staff shall undertake to confine their access to classified information on the basis of a "need to know" such information related to their Committee responsibilities.

(f) The Staff Director is authorized to make such administrative regulations as may be necessary to carry out the provisions of these regulations.

RULE 14—STAFF

(a) *Responsibilities.*—

(1) The staff works for the Committee as a whole, under the general supervision of the Chairman of the Committee, and the immediate direction of the Staff Director; provided, however, that such part of the staff as is designated Minority Staff, shall be under the general supervision of the Ranking Minority Member and under the immediate direction of the Minority Staff Director.

(2) Any member of the Committee should feel free to call upon the staff at any time for assistance in connection with Committee business. Members of the Senate not members of the Committee who call upon the staff for assistance from time to time should be given assistance subject to the overriding responsibility of the staff to the Committee.

(3) The staff's primary responsibility is with respect to bills, resolutions, treaties, and nominations.

In addition to carrying out assignments from the Committee and its individual members, the staff has a responsibility to originate suggestions for Committee or subcommittee consideration. The staff also has a responsibility to make suggestions to individual members regarding matters of special interest to such members.

(4) It is part of the staff's duty to keep itself as well informed as possible in regard to developments affecting foreign relations and in regard to the administration of foreign programs of the United States. Significant trends or developments which might otherwise escape notice should be called to the attention of the Committee, or of individual Senators with particular interests.

(5) The staff shall pay due regard to the constitutional separation of powers between the Senate and the executive branch. It therefore has a responsibility to help the Committee bring to bear an independent, objective judgment of proposals by the executive branch and when appropriate to originate sound proposals of its own. At the same time, the staff shall avoid impinging upon the day-to-day conduct of foreign affairs.

(6) In those instances when Committee action requires the expression of minority views, the staff shall assist the minority as fully as the majority to the end that all points of view may be fully considered by members of the Committee and of the Senate. The staff shall bear in mind that under our constitutional system it is the responsibility of the elected Members of the Senate to determine legislative issues in the light of as full and fair a presentation of the facts as the staff may be able to obtain.

(b) *Restrictions.*—

(1) The staff shall regard its relationship to the Committee as a privileged one, in the nature of the relationship of a lawyer to a client. In order to protect this relationship and the mutual confidence which must prevail if the Committee-staff relationship is to be a satisfactory and fruitful one, the following criteria shall apply:

(i) Members of the staff shall not be identified with any special interest group in the field of foreign relations or allow their names be be used by any such group.

(ii) Members of the staff shall not accept public speaking engagements or write for publication in the field of foreign relations without specific advance permission from the Staff Director, or, in the case of minority staff, from the Minority Staff Director. In the case of the Staff Director and the Minority Staff Director, such advance permission shall be obtained from the Chairman or the Ranking Minority Member, as appropriate. in any event, such public statements should avoid the expression of personal views and should not contain predictions of future, or interpretations of past, Committee action.

(iii) Staff shall not discuss their private conversations with members of the Committee without specific advance permission from the Senator or Senators concerned.

(2) The staff shall not discuss with anyone the proceedings of the Committee in closed session or reveal information conveyed or discussed in such a session unless that person would have been permitted to attend the session itself, or unless such communication is specifically authorized by the Staff Director or Minority Staff Director. Unauthorized disclosure of information from a closed session or of classified information shall be cause for immediate dismissal and may, in the case of some kinds of information, be grounds for criminal prosecution.

RULE 15—STATUS AND AMENDMENT OF RULES

(a) *Status.*—In addition to the foregoing, the Committee on Foreign Relations is governed by the standing rules of the Senate which shall take precedence in the event of a clear inconsistency. In addition, the jurisdiction and responsibilities of the Committee with respect to certain matters, as well as the timing and procedure for their consideration in Committee, may be governed by statute.

(b) *Amendment.*—These Rules may be modified, amended, or repealed by a majority of the Committee, provided that a notice in writing of the proposed change has been given to each member at least 48 hours prior to the meeting at which action thereon is to be taken. However, rules of the Committee which are based upon Senate rules may not be superseded by Committee vote alone.

S. 145.—ACID RAIN CONTROL LEGISLATION

Mr. COHEN. Mr. President, I am pleased to cosponsor S. 145, legislation introduced by my colleague from Maine, Mr. MITCHELL, to control the spread of acid rain in the Northeast.

I cosponsored similar legislation in the last session of Congress, and want to commend my colleague for his persistent efforts in bringing this important and sensitive issue to the attention of the Senate and the Nation as a whole.

In November 1980, I addressed a conference on "Acid Rain and the Atlantic Salmon" and at that time indicated that the choices Congress makes on controlling the pollution of our atmosphere will determine the extent to which we can prevent an environmental disaster. This legislation provides us with the means to make intelligent choices, which will lead to an improved outlook for this Nation's wildlife, forests, and agriculture. By requiring a 10-million-ton reduction in sulfur dioxide emissions within 10 years of enactment of this legislation, S. 145 provides us with the tools with which we can carve out a better economic and environmental future.

We must act now on the issue of controlling acid rain, and the evidence exists overwhelmingly to support such action. A report published in September 1981 by the National Academy of Sciences concluded that the circumstantial evidence for the role played by powerplant emissions in the production of acid rain is plentiful. Since the publication of that report, additional evidence has been accumulated linking acid rain with crop damage, restricted timber growth, and the death of thousands of fishery habitats in the Northeastern United States.

The phenomenon of acid rain is by no means limited to this country. Canadian scientists have predicted the death of over 48,000 lakes in Canada over the next 20 years because of the effects of acid rain. Researchers in Sweden have estimated that forest growth in the Scandinavian peninsula has been reduced by 15 percent due to the acidification of the soil.

The evidence we have before us, though, hits very close to home. In my home State of Maine, it has been established that the acidity of the lakes in the State, which support valuable sport and commercial fishery activities, has increased eightfold since 1940. In the Adirondack Mountains of New York, 10 percent of the high-altitude lakes can no longer support fish life.

This kind of documented evidence supports the view that the problem of acid rain cannot be neglected any longer. The United States must join other nations of the world in acting to restrict harmful air pollutants. Our northern neighbor, Canada, has been looking to us for leadership on this matter, following on our earlier promises to make an effort to combat acid precipitation. There is no better time than the present to make good on our commitment.

According to the National Academy of Sciences study, the control of sulfur emissions is the key to the reduction in acidification of our soils and lakes. The evidence amassed over the past few years supports this conclusion, and the legislation I am cosponsoring provides the means to take on the responsibility of producing cleaner air.

I am pleased to have the opportunity once again to support such legislation, and I urge my colleagues to act quickly on S. 145.

WEST VIRGINIA STATE LEGISLATURE APPROVES A NUCLEAR WEAPONS MORATORIUM RESOLUTION

Mr. RANDOLPH. Mr. President, on February 25, I received a copy of West Virginia State Senate Resolution No. 8, memorializing Congress to adopt a resolution requesting the President of the United States to propose to the Union of the Soviet Socialist Republics a mutual and verifiable nuclear weapons moratorium.

The West Virginia State Senate passed the resolution on February 2, 1983, by a vote of 28 to 5. The West Virginia House of Delegates approved the same resolution on February 18, 1983, by a voice vote.

The alarming growth of nuclear weapons is a major concern to all of us. It is my belief that every American stands to lose or gain through the mechanisms we are able to set in place to assist us in preventing wars.

Mr. President, I ask unanimous consent that West Virginia State Senate Resolution No. 8 be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SENATE CONCURRENT RESOLUTION No. 8

Memorializing Congress to adopt a resolution requesting the President of the United States to propose to the Union of Soviet Socialist Republics a mutual and verifiable nuclear weapons moratorium.

Whereas, The greatest challenge facing the earth is to prevent the occurrence of nuclear war by accident or design; and

Whereas, The nuclear arms race is dangerously increasing the risk of a holocaust which would be humanity's final war; and

Whereas, The United States of America and the Union of Soviet Socialist Republics already have a combined total arsenal in excess of fifty thousand nuclear weapons; and

Whereas, An all-out nuclear exchange between said two nations would result in the deaths of millions of Americans and Soviet citizens and would result, throughout the entire world, in death, injury and disease on a scale that has no precedent in the history of human experience; and

Whereas, There is widespread agreement that the United States of America and the Union of Soviet Socialist Republics currently have equal nuclear fighting capabilities with neither nation having a distinct advantage over the other; and

Whereas, An immediate halt in the testing, production and deployment of new nuclear weapons would help secure world peace and avoid the possibility of a nuclear conflagration and would save our nation, over the next ten years, billions of dollars in military expenditures, which savings could be used to help balance the federal budget, reduce taxes, create employment and improve human services; therefore, be it

Resolved by the Legislature of West Virginia, That the Congress of the United States adopt a resolution requesting that the President of the United States propose to the government of the Union of Soviet Socialist Republics a mutual and verifiable nuclear weapons moratorium by which the said two nations would agree to halt immediately the testing, production and deployment of all nuclear warheads, missiles and delivery systems; and, be it

Resolved further, That the West Virginia delegation to the Congress of the United States introduce such a resolution or join with other members of Congress in its introduction; and, be it

Resolved further, That copies of this resolution be sent to the Clerk and Speaker of the United States House of Representatives, the Secretary and Majority Leader of the United States Senate, and to each member of the West Virginia Congressional delegation.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PROPOSED BLOCK GRANT LEGISLATION—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 18

Under the authority of the order of the Senate of Thursday, February 24, 1983, the Secretary of the Senate, on February 24, 1983, during the recess of the Senate, received the following message from the President of the United States, together with accompanying papers; which was ordered to lie on the table:

To the Congress of the United States:

I am transmitting to the Congress today four pieces of legislation: the State Fiscal Assistance Block Grant Act; the Local Fiscal Assistance Block Grant Act of 1983; the Federalism Block Grant Highway Act of 1983; and the Rural Housing Block Grant Act.

These four proposals represent a continuation and expansion of the efforts of my Administration to return authority, responsibility and revenue resources to State and local governments.

In my January 25, 1983 State of the Union message, I indicated that I would be sending to the Congress shortly a comprehensive federalism proposal that will continue our efforts to restore to State and local governments their roles as dynamic laboratories of change in a creative society. We have now completed our work on this effort and it is embodied in these four proposed bills.

Therefore, I am requesting today that these bills be referred to the appropriate committees and I urge their early enactment.

THE NEED FOR CHANGE

In a 1957 speech to the National Governors' Conference, President Eisenhower sounded the first words of caution about the trend toward increased central government control. He said:

"Our governmental system, so carefully checked, so delicately balanced, with power fettered and people free, has survived longer than any other attempt to conduct group affairs by the authority of the group itself. Yet, a distinguished American scholar has only recently counseled us that in the measurable future, if present trends continue, the states are sure to degenerate into powerless satellites of the

national government in Washington. That this forecast does not suffer from lack of supporting evidence, all of us know full well. The irony of the whole thing is accentuated as we recall that the national government was itself not the parent, but the creature of the states acting together. Yet today it is often made to appear that the creature, Frankenstein-like, is determined to destroy the creator.

Had he known how prophetic his statement was, his rhetoric undoubtedly would have been far stronger. During the two decades following the Eisenhower Administration, the Federal government increasingly encroached on state and local prerogatives. Narrow and restrictive Federal grant-in-aid programs grew from under 50 to over 500, pervading such obviously local concerns as rat control and sewer extensions. The dollar amount usurped from State and local treasuries to finance these programs ballooned from $7 billion in 1960 to $95 billion in 1981. With increased Federal dollars came suffocating Federal control. Lost was the efficiency and accountability of local spending priorities.

A generation of governors, state legislators, mayors and county officials began to echo President Eisenhower's sentiments throughout the 1960's and 1970's. They came to realize that the mushrooming Federal programs reflected the fact that Presidents and Congresses failed to trust State and local officials as their partners in our Federal system.

The Federal government had too much control, many felt. Programs lacked flexibility. Regulations were restrictive. Federal mandates were depleting State and local treasuries. Expenditures were being made for programs that were not really needed in particular localities. In short, State and local officials believed that they were more capable of making more prudent decisions to run their own jurisdictions than Federal bureaucrats. They started calling for a reordering of priorities and a sorting out of responsibilities among the various levels of government.

INITIATIVES IN 1981–82

During the past two years, hundreds of decisions and proposals have been made by my Administration in an effort to restore balance to our Federal system.

For example, throughout the economic recovery program, which I proposed in 1981, there was the underlying theme of federalism. The spending reductions were a reordering of priorities so that the national budget would address truly national needs. The tax cuts addressed the problem created by the Federal government usurping revenue sources which otherwise would have been available to State and local governments and to individuals. And the regulatory relief effort was directed in large part to removing the regulatory manacles which bind State and local governments.

In a more direct assault on Federal usurpation, we proposed the consolidation of scores of narrow and restrictive categorical grant-in-aid programs into seven broad block grants. The package which was ultimately passed by the Congress, and which I signed, consolidated 57 programs into nine block grants. It is estimated that these block grants resulted in a reduction of 5.4 million manhours (83%) in FY '82 for State and local officials and 5.9 million manhours (91%) in subsequent years from the level required to administer the predecessor categorical programs.

This block grant effort continued in 1982, with enactment of the Job Training Partnership Act and the Urban Mass Transportation Block Grant.

Many other initiatives were taken on the federalism front.

—Of the 119 regulatory reviews targeted by the Task Force on Regulatory Relief, 35 were directed to State and local governments.

—For the first time in many years, the Executive branch actively participated in the Advisory Commission on Intergovernmental Relations (ACIR).

—I created a Federalism Advisory Committee chaired by Senator PAUL LAXALT (R-Nevada). The work of that committee has now been completed and its suggestions have been incorporated into the package which I am today sending to the Congress.

—At the White House, we have pursued an active outreach effort with State and local officials. Personally, I have met with more than 1,000 such officials in the White House during 1981 and 1982.

Finally, early in 1982, I proposed the outline of a major Federalism Initiative. I stated at the time that my package was just a conceptual framework and that I wanted to work out the details following extensive consultation with State and local officials. The process which followed was unprecedented, and I want to thank the many State and local officials who assisted me in the development of the legislation. The package which I am sending to the Congress today reflects the input which we received from State and local officials throughout 1982 and early 1983.

THE 1983 FEDERALISM INITIATIVE

These legislative proposals would consolidate 34 programs into four mega-block grants. The Administration's budget request for these programs for FY '84 is approximately $21 billion.

The following programs would be consolidated into the four mega-block grants.

STATE BLOCK GRANT

Rehabilitation Services.
Vocational Education.
Adult Education.
State Education Block Grant (ECIA, Chapter 2).
WIN.
Low-Income Home Energy Assistance.
Social Services Block Grant.
Community Services Block Grant.
ADAMHA Block Grant.
MCH Services Block Grant.
Rural Water and Waste Disposal Grants (FmHA).
Water and Sewer Facility Loans (FmHA).
Community Facility Loans (FmHA).
CDBG—Non-Entitlement Portion.
Grants for the Construction of Municipal Waste Water Treatment Works (EPA).
Child Welfare Services.
Child Welfare Training.
Adoption Assistance.
Foster Care.
Prevention Health and Health Services Block Grant.
Child Abuse State Grants.
Runaway Youth.

FEDERAL-LOCAL BLOCK GRANT

General Revenue Sharing.
CDBG—Entitlement Portion.

TRANSPORTATION BLOCK GRANT

Urban System.
Secondary System.
Non-Primary Bridges.
Highway Safety (FHWA 402 Grants).
Hazard Elimination.
Rail-Highway Crossing.

RURAL HOUSING BLOCK GRANT

Rural Housing Insurance Fund.
Very Low-Income Repair Grants.
Mutual and Self-Help Grants.
Rental Assistance Program.

This is a five-year program. It would guarantee funding for the programs turned back at the level enacted for FY '84. This funding level would remain in effect through FY '88.

This will provide a stable and certain funding source for State and local governments. It is *not* a vehicle for budgetary savings.

During this five-year period we will carefully monitor the block grants and determine whether it would be feasible to return revenue sources, such as Federal excise taxes or a percentage of the Federal income tax, to State and local governments along with the programs in the block grants. I will appoint a presidential commission to review this issue and to provide recommendations to me.

The proposals have been drafted to avoid dislocations on State and local governments. For example:

—For the Federal-State and Federal-Local block grants, beginning on October 1, 1983, a recipient could take 20 percent of the money from the program and spend it any-

where else within the block. This percentage would increase to 40%, 60%, 80%, and finally 100% in each of the succeeding four fiscal years. Thus, in fiscal year 1988, a recipient would be able to spend 100 percent of the dollars in each block for any of the purposes within the block.

—In the Federal-State block grant, for programs where Federal dollars go to the States but are passed through to some degree by the State to local units of government, each State would be required to pass through the percentage that was available to localities in fiscal years 1981, 1982 and 1983 in that program.

—States would be required to have meaningful consultations with local officials prior to final decisions on the distribution of these pass-through funds.

—For three Farmer's Home Administration (FmHA) programs—rural water and sewer grants, water and sewer loans, and community facility loans—100% of these FmHA program funds will be passed through State governments directly to rural communities of less than 10,000 in population. In addition, at least 70% of the "small cities" funds of the Community Development Block Grant program will be apportioned to communities of less than 20,000 in population.

Implicit in the Federal-local block grant is the assumption that revenue sharing would be reauthorized for 5 years at the current funding level of $4.6 billion annually.

Allocations to States for each program included in the State block grant, would be based on the historical program shares (FY '81-'83), or on the basis of formula allocations.

Funding for the Federal-State block grant would come from three Federal excise taxes on alcohol, tobacco, and telephones. The transportation block grant would be funded by part of the Federal gasoline tax.

The swap of federalization of Medicaid for State assumption of AFDC and Food Stamps, which was included in my January, 1982 framework has been dropped from the package. Reform of these three programs will be considered on a separate track.

Many of the more controversial programs in the original package (such as child nutrition, handicapped education, urban development action grants and others) have been dropped from the initiative.

The block grants include vastly reduced Federal strings and regulations. I strongly urge Congress to provide the flexibility in the programs that State and local officials need and deserve.

I request that Congress give these legislative proposals its immediate attention. With the help of the Congress, we can make government work more effectively for all Americans.

RONALD REAGAN.

THE WHITE HOUSE, *February 24, 1983.*

NATURAL GAS CONSUMER REGULATORY REFORM AMENDMENTS OF 1983—MESSAGE FROM THE PRESIDENT—PM 19

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

I am pleased to transmit to the Congress today proposed legislation entitled the "Natural Gas Consumer Regulatory Reform Amendments of 1983." The proposal is designed to benefit consumers by creating a system in which gas prices can be responsive to the pressures of the market. Also attached is an associated Statement which I have issued today.

RONALD REAGAN.

THE WHITE HOUSE, *February 28, 1983.*

HEALTH INCENTIVE REFORM PROGRAM—MESSAGE FROM THE PRESIDENT—PM 20

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Finance:

To the Congress of the United States:

I am today transmitting to the Congress legislation comprising the Health Incentives Reform program. This legislation reforms health care financing policies to constrain rising health care costs and to keep high quality health care affordable for all Americans. Because of the coming shortage in the Medicare Trust Fund, prompt action is particularly important.

This legislative package addresses the underlying causes of excessive increases in health costs: The perverse incentives operating in the market for health services. Cost-based reimbursement, poorly structured cost-sharing, and open-ended tax subsidies for health insurance have contributed to inefficiency and inflation in the health sector. Our proposals correct these incentives. Our plan involves all participants in the health care market in restructuring financing and service delivery arrangements: Providers and patients, physicians and hospitals, and beneficiaries of public programs as well as privately insured workers. Thus it shares the responsibility for bringing down health care costs fairly among all segments of society.

THE HEALTH CARE COST PROBLEM

The need for action now is clear. Health care costs are climbing so fast they may soon threaten the quality of care and access to care which Americans enjoy. In 1982 health care costs went up almost three times the national inflation rate. Taxpayers have seen Federal outlays for Medicare and Medicaid go up nearly 600 percent since 1970. Health care funding is one of the fastest-rising expenditures in the Federal budget. The cost of health insurance rose 15.9 percent in 1982, the biggest increase ever. Health care costs are consuming a growing portion of the Nation's output: 10.5 percent of GNP in 1982, compared with 5.9 percent in 1965.

The cost of the average hospital stay jumped from $316 in 1965 to $2,168 in 1981. American taxpayers (mainly through Medicare and Medicaid) pay a large part of those costs: 40 percent of all hospital bills.

Rising health care costs are a problem that affects everyone. The elderly, who are covered by Medicare, face the threat of catastrophic illness expense, against which Medicare offers no protection. The poor on Medicaid have seen coverage reduced as States have been forced by rising costs to make cutbacks. Workers with employment-based health insurance have received lower cash wages, because of the unchecked cost increases for health benefits. Americans pay for health care costs in other hidden forms, including higher costs for the merchandise they buy, since the costs of employee health care benefits must be included in the price of products.

As is the case with many of our national difficulties, past Federal policy has been a part of the problem. These policies have thwarted normal incentives for efficiency in health care.

—Medicare's cost-based system has actually rewarded inefficiency by paying more to less efficient, higher cost hospitals.

—Cost sharing in Medicare has been backwards. Those who are less ill, and could act to keep their hospital stays shorter have been given no cost incentive to do so, and severely ill patients have been penalized with high cost sharing and no catastrophic coverage.

—Federal tax policy has created a bias for high priced medical coverage instead of wages, since employer contributions to health care benefits are not treated as income to the employee.

—Federal health care programs have made too little use of competitive bidding practices.

—Medicare beneficiaries have been unable to enroll in efficient private health plans.
—Unnecessary regulations have added to higher costs in past years.

THE ELEMENTS OF HEALTH INCENTIVES REFORM

The Health Incentives Reform package contains a number of specific provisions which address each facet of our multi-pronged strategy. First, it initiates Medicare coverage for the catastrophic costs of lengthy hospital stays and improves Medicare's cost-sharing provisions. These reforms encourage efficiency while reducing the cost burden on the severely ill.

The plan establishes a prospectively-set hospital rate structure under Medicare that rewards cost-effective hospital practices. This contrasts with the traditional Medicare policy of reimbursing hospitals retrospectively for whatever "reasonable" costs they incurred.

The plan limits the open-ended tax subsidy of relatively high-cost private health plans, which biases employee compensation towards elaborate health coverage instead of cash wages.

The plan expands opportunities for Medicare beneficiaries to use their benefits to enroll in private health plans as an alternative to traditional Medicare coverage.

The plan freezes payments to physicians under Medicare's reasonable charge system for one year at 1983 levels.

The plan provides for gradual yearly increases in the Medicare Part B premium and deductible once again to cover a sufficient portion of the program's costs through beneficiary payments.

The plan expands authority under Medicare for the use of competitive bidding procedures and other cost efficient approaches for the purchase of laboratory services, durable medical equipment, and other non-physician services and supplies. Furthermore, payment for durable medical equipment provided through home health agencies would be limited to 80 percent, the same percentage covered by Medicare under other circumstances.

A provision of the plan will entitle the elderly to Medicare benefits on the first day of the full month that individuals meet all eligibility conditions. At present, entitlement begins on the first day of the month in which an individual meets the conditions for only one day. This proposal is consistent with initial Social Security eligibilities for individuals who attain age 62. Also, most private insurance coverage now remains in effect until Medicare coverage begins; thus most beneficiaries would not be affected.

Finally, the plan makes two changes in Medicaid. The reduction in Federal payments to States authorized by the Omnibus Budget Reconciliation Act of 1981 would be extended beyond 1984 for an indefinite period. The reduction would be cut, however, from 4.5 percent to 3 percent. In addition, Medicaid beneficiaries would have to make nominal copayments for outpatient visits and hospital stays.

Our legislative package contains additional Medicare and Medicaid provisions to strengthen program management, simplify requirements for program participation, produce savings in program spending, and reduce waste, fraud and abuse in these programs.

MEDICARE CATASTROPHIC COVERAGE AND COSTS-SHARING REFORM

The "Medicare Catastrophic Hospital Costs Protection Act of 1983" improves coverage for long and expensive hospitalizations and introduces modest coinsurance on the initial days of hospitalization.

The current Medicare Hospital Insurance program neither adequately protects beneficiaries in cases of prolonged illness, nor provides financial incentives to minimize unnecessary utilization of services. Medicare covers only 90 to 150 days of hospitalization during a spell of illness (depending on whether a "lifetime reserve" of 60 days has been previously exhausted), even if additional hospitalization is clearly warranted. After the 60th day, cost sharing becomes onerous. Patients pay 25 percent of the inpatient hospital deductible ($88/day) for the 61st to 90th day and 50 percent ($175/day) for lifetime reserve days. On the other hand, after a deductible is paid for the first day, no coinsurance at all is imposed until the 61st day of hospitalization, eliminating any financial incentive for the beneficiary to leave a hospital as soon as it is medically advisable to do so.

The bill provides Medicare reimbursement for unlimited days of hospitalization under the Medicare Hospital Insurance program. At the same time, the bill imposes coinsurance for a maximum of 60 days annually (8 percent of the inpatient hospital deductible for the 2d through 15th day of a spell of illness and 5 percent thereafter) to encourage beneficiary cost-consciousness and the efficient use of health resources. The bill also limits to two the number of inpatient hospital deductibles that could be imposed annually (no matter how many spells of illness occur) and reduces the skilled nursing facility coinsurance rate from 12.5 to 5 percent of the inpatient hospital deductible.

PROSPECTIVE PAYMENT FOR INPATIENT HOSPITAL SERVICES UNDER MEDICARE

The "Medicare Prospective Payment Rates Act" will establish Medicare as a prudent buyer of services and will ensure for both hospitals and the Federal government a predictable payment for services. This system of payment can be implemented in October, 1983.

Medicare traditionally paid hospitals retrospectively determined reasonable costs. This system essentially paid hospitals for whatever they spent. There were, therefore, weak incentives for hospitals to conserve costs and operate efficiently. It is not surprising that under this system hospital expenditures have been and are continuing to increase rapidly. Medicare expenditures for hospital care have increased 19 percent annually from 1979 to 1982. The cost of a service varies substantially from hospital to hospital.

The Tax Equity and Fiscal Responsibility Act (TEFRA) changed this system of hospital reimbursement by placing limits on what hospitals could be paid. My proposal builds upon the TEFRA improvements. This bill establishes a system of prospectively determined rates which will foster greater efficiency in the provision of hospital services. Medicare payments for operating costs will be specifically related to the patient's condition, but will not vary from hospital to hospital (except to allow for differences in area wage rates). Rates will be set for each of 467 diagnosis-related groups. Capital expenditures and medical education costs will be excluded initially from the calculation of basic payments and reimbursed separately. Additional payments will be made for unusual cases involving exceptionally long hospital stays.

To the extent that a hospital operates efficiently it would earn a surplus, and to the extent it operates inefficiently it would show a deficit. Hospitals with higher costs will not be able to pass on extra costs to Medicare beneficiaries and thus will face strong incentives to make cost-effective changes in practices.

CHANGES IN THE TAX TREATMENT OF EMPLOYER CONTRIBUTIONS TO HEALTH PLANS

The Health Costs Containment Tax Act of 1983 is designed to encourage employers to provide an adequate level of health benefits to their employees, while eliminating the open-ended tax preference for health benefits over cash wages.

Under current tax law an employer's contribution to an employee's health plan is not included in the employee's gross income. This bill will limit tax-free health benefits paid by an employer to $175 per month for a family plan and $70 per month for individual coverage. These limits will be indexed to increase yearly in proportion to the Consumer Price Index. Employer contributions above these amounts will be included in the employee's income and taxed (income and Social Security) accordingly. Thus, individuals can choose to purchase as much health insurance as they wish with after-tax dollars, but the tax laws will not subsidize the purchase of unlimited health insurance.

11-059 O-87-13 (Pt. 3)

Elaborate health benefits funded with tax-free, employer-paid contributions are inflationary—they insulate consumers, providers, and insurers from the cost consequences of health care decisions. By doing so, they contribute both to the persistence of inefficient forms of health care financing and delivery and to overuse of health services. The limit on tax-free benefits will help to alleviate these problems while allowing employers to provide adequate tax-free coverage to protect an employee against the serious financial consequences of illness. Employees will be free to purchase more comprehensive health care coverage with after-tax dollars.

The proposal will be effective on January 1, 1984, except with respect to collective bargaining agreements in effect on January 31, 1983, which will not be subject to the new rules until the earlier of January 31, 1986, or the first date on which such agreement is reopened after January 31, 1983.

OPTIONAL MEDICARE VOUCHER

The provision of the Health Incentive Reform package that creates an opportunity for Medicare beneficiaries to enroll in alternative health plans is contained in the "Medicare Voucher Act of 1983."

Last year Congress, with the support of my Administration, amended the Medicare statute to permit payments on a risk basis to HMOs and other competitive medical plans that provide Medicare beneficiaries with coverage at least as extensive as the Medicare benefit package. The optional voucher provision will build on current law by allowing Medicare beneficiaries to use Medicare benefits to enroll in a wider array of private health plans. Medicare will contribute an amount equal to 95 percent of what it would have cost to care for the beneficiary if he or she had elected traditional Medicare coverage. If a beneficiary selects a private health plan with a premium lower than Medicare's contribution, the beneficiary will be eligible for a cash rebate from the private plan. If, on the other hand, the private plan costs more than Medicare's contribution, the beneficiary must pay the difference.

Enrollment in a private health plan will be voluntary. Once a year, beneficiaries will have the opportunity to switch private health plans or to elect traditional Medicare coverage. A qualified health plan may be an HMO, an indemnity insurer, or a service benefit plan. All private plans must cover, at a minimum the services provided under Parts A and B of Medicare, and must participate in a coordinated annual open enrollment period.

MEDICARE PHYSICIAN PAYMENT FREEZE AND HOSPITAL REIMBURSEMENT LIMITS

The other provisions of this package are contained in the "Health Care Financing Amendments of 1983."

Medicare customary and prevailing charges for physician services will be held at 1983 levels for one year beginning in July, 1984. Under current law prevailing charges would otherwise be increased in July, 1984, by the annualized 1984 value of the Medicare Economic Index while increases in customary charges would not be constrained. This limit is consistent with other steps contained in the Budget to reduce the structural deficit.

The Tax Equity and Fiscal Responsibility Act (TEFRA) limited the increase in hospital expenditures under Medicare to the increase in the cost of goods and services hospitals purchase (the hospital "market basket index") plus one percent. This provision amends TEFRA to limit the rate of increase in hospital expenditures for fiscal year 1984 only to the increase in the hospital market basket index.

These proposals are part of a government-wide freeze aimed at reducing the Federal deficit. Medicare spending for physicians increased by 21 percent in 1982 and is expected to rise by 19 percent in 1983 and 17 percent in 1984. As mentioned earlier, Medicare hospital expenditures have grown at comparable rates. In this time of fiscal crisis, we must ask all participants in the health care market, physicians, hospitals, and program beneficiaries, to do their part in slowing increases in spending.

GRADUATED INCREASES IN THE SUPPLEMENTARY MEDICAL INSURANCE (SMI) OR PART B PREMIUM

This provision will freeze the Part B premium at the present $12.20 per month for the remainder of 1983, instead of increasing it to $13.50 in July as was previously announced. The delay coincides with the delay in the cost-of-living increase for Social Security recommended by the National Commission on Social Security.

In January 1984, the Part B premium will be set at 25 percent—the percentage specified in current law—of program costs for aged beneficiaries for that calendar year. Over the next 4 years, the Part B premium will be increased 2.5 percentage points each year, to reach 35 percent of program costs for the elderly in January 1988. Thereafter, the premium for each calendar year would be set at 35 percent of program costs (the actuarially adequate rate) for the elderly for that year. When Medicare began, Congress envisioned that the elderly would bear 50 percent of SMI costs and the law initially required that SMI costs be equally financed by the general taxpayer and the users of SMI services.

By gradually raising the SMI premium to 35 percent of program costs, this provision provides for a more equitable balance between general revenue and premium financing of Medicare Part B.

INDEXING THE PART B DEDUCTIBLE

The Part B deductible will be increased in January of each year based on annual changes in the Medicare Economic Index. This provision would maintain the constant dollar value of the deductible.

The 1981 Reconciliation Act increased the Part B deductible from $60 to $75. Before this amendment, the deductible had remained at $60 since 1972, despite a 250 percent increase in program reimbursements per aged enrollee between 1972 and 1981.

Current law does not provide for future increases in the deductible. As a result, the initial beneficiary liability for medical services will decrease in real terms over time and these costs will be shifted to the Federal government. Furthermore, the value of the deductible as a deterrent to unnecessary utilization will again diminish.

OTHER PROPOSALS

The legislation I am submitting today includes other items, all of which are designed to make Medicare and Medicaid more effective and efficient programs. They include, among others, proposals for competitive purchasing for laboratory services and durable medical equipment and reimbursement charges for certain Medicare services.

NOMINAL MEDICAID COPAYMENTS

This provision requires States to impose nominal copayments on all Medicaid beneficiaries for hospital, physician, clinic, and outpatient department services. Specifically, the categorically needy would have to pay $1 per day for hospital services and $1 per visit for physician or outpatient services. The medically needy would have to pay $2 per for hospital services and $1.50 per visit for physician services. Beneficiaries who are enrolled in HMOs or who are institutionalized would be exempt from all copayment requirements.

First-dollar insurance coverage, such as that which Medicaid provides, leaves the consumer with virtually no financial incentive to question the need for services. Services that are totally free are likely to be overutilized. If patients share in some of the costs, they and their physicians will reduce unnecessary or marginal utilization. There is substantial evidence that cost-sharing can reduce health care costs, mostly by reducing unnecessary utilization.

BUDGETARY EFFECT OF THE HEALTH INCENTIVES REFORM PACKAGE AND OTHER MEDICARE AND MEDICAID PROVISIONS

These provisions will have a substantial impact on reducing the size of the Federal budget and the Federal deficit. In fiscal year 1984 this legislative package will have a cumulative budgetary impact of $4.2 billion: the net Medicare impact of spending reductions and premium increases is a budg-

etary reduction of $1.7 billion; Federal Medicaid spending reductions amount to $256 million, and increased tax revenues from the change in the tax treatment of employer-paid health benefits amount to $2.3 billion. These savings are sustained and, in fact, grow in subsequent years.

The legislation that we are advancing today reflects our most thoughtful effort to address and reform the basic economic incentives that operate in the health care sector. Since health care now represents over 10 percent of our Nation's Gross National Product and is growing as a proportion of GNP each year, the enormous task of structural reform is well worth undertaking. As I mentioned earlier, we have taken great care to devise a legislative package that shares the responsibility for such reform and the burden of reductions in health care financing fairly among all segments of our society. The distribution of budgetary savings among workers and Medicare and Medicaid beneficiaries confirms our efforts in this regard.

Our need to constrain the growth of our national spending for health care in the interests of a healthy and stable economy is urgent. Regulatory approaches to health care cost containment tried previously have proven ineffective and sometimes counterproductive to this goal. I urge you to join me in facing the challenge before us and consider favorably our approach to health incentives reform.

RONALD REAGAN.

THE WHITE HOUSE, *February 28, 1983.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-284. A communication from the Chairman of the U.S. International Trade Commission, transmitting a draft of proposed legislation to provide authorization of appropriations for the U.S. International Trade Commission for fiscal year 1984; to the Committee on Finance.

EC-285. A communication from the Acting Secretary of State, transmitting, pursuant to law, the status of certain loan guarantees to Poland; to the Committee on Foreign Relations.

EC-286. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60 days prior to February 3, 1983; to the Committee on Foreign Relations.

EC-287. A communication from the District of Columbia Auditor, transmitting, pursuant to law, reports of the District of Columbia Auditor on the District of Columbia Boxing and Wrestling Commission annual report and the report of the Advisory Neighborhood Commission; to the Committee on Government Affairs.

EC-288. A communication from the Director of the Office of Personnel Management, a report on the Senior Executive Service; to the Committee on Governmental Affairs.

EC-289. A communication from the Chairman of the Merit Systems Protection Board transmitting, pursuant to law, the annual report of Board for calendar year 1981; to the Committee on Governmental Affairs.

EC-290. A communication from the Acting Assistant Secretary of the Interior for Indian Affairs transmitting, pursuant to law, a plan for the use of the judgment funds of the Choctaw Nation; to the Select Committee on Indian Affairs.

EC-291. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Inconsistencies in Administration of the Criminal Justice Act"; to the Committee on the Judiciary.

EC-292. A communication from the Chairman of the Federal Maritime Commission transmitting, pursuant to law, the 1982 report of the Commission under the Freedom of Information Act; to the Committee on the Judiciary.

EC-293. A communication from the Secretary of Health and Human Services transmitting a draft of proposed legislation to amend the maternal and child health block grant; to the Committee on Labor and Human Resources.

EC-294. A communication from the Secretary of Agriculture transmitting, pursuant to law, annual evaluation reports by the Forest Service relative to forest and rangeland renewable resources planning; to the Committee on Agriculture, Nutrition, and Forestry.

EC-295. A communication from the Assistant Secretary and Chairperson of the National Advisory Council on Maternal, Infant, and Fetal Nutrition, Department of Agriculture, transmitting, pursuant to law, the 1982 report of the Council; to the Committee on Agriculture, Nutrition, and Forestry.

EC-296. A communication from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to provide that the Commandant of the Marine Corps shall be a member of the Armed Forces Policy Council; to the Committee on Armed Services.

EC-297. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller) transmitting, pursuant to law, the fourth quarterly report for 1982 on the value of property, supplies, and commodities provided by the Berlin Magistrate and under the German Offset Agreement; to the Committee on Armed Services.

EC-298. A communication from the Under Secretary of Defense for Research and Engineering transmitting, pursuant to law, a report on funds obligated for defense research in chemical warfare and biological defense research; to the Committee on Armed Services.

EC-299. A communication from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, descriptions of country-to-country and multinational agreements entered into by each Military Department during fiscal 1982 and expected to be in effect in fiscal 1983; to the Committee on Armed Services.

EC-300. A communication from the Chairman of the Board of Governors of the Federal Reserve System transmitting, pursuant to law, the monetary policy report pursuant to the Full Employment and Balanced Growth Act of 1978; to the Committee on Banking, Housing, and Urban Affairs.

EC-301. A communication from the General Counsel of the Federal Emergency Management Agency transmitting a draft of proposed legislation authorizing appropriations for the conduct of flood studies; to the Committee on Banking, Housing, and Urban Affairs.

EC-302. A communication from the General Counsel of the Federal Emergency Management Agency transmitting a draft of proposed legislation to extend the national flood insurance program; to the Committee on Banking, Housing, and Urban Affairs.

EC-303. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Improving Medicare and Medicaid Systems To Control Payments for Unnecessary Physicians' Services"; to the Committee on Finance.

EC-304. A communication from the President of the National Railroad Passenger Corporation transmitting, pursuant to law, the Amtrak Legislative Report; to the Committee on Commerce, Science, and Transportation.

EC-305. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "An Analysis of Natural Gas Pricing Policy Alternatives"; to the Committee on Energy and Natural Resources.

EC-306. A communication from the Assistant Secretary of the Interior transmitting, pursuant to law, financial statements for the Colorado River Basin project for 1982;

EC-307. A communication from the Secretary of the Interior transmitting, pursuant to law, a report on oil and gas lease sale No. 57; to the Committee on Energy and Natural Resources.

EC-308. A communication from the Administrator of the Environmental Protection Agency transmitting, pursuant to law, a report entitled "Controlling Emissions From Light-Duty Motor Vehicles at Higher Elevations"; to the Committee on Environment and Public Works.

EC-309. A communication from the Administrator of the Environmental Protection Agency transmitting, pursuant to law, a report on the Agency's 5-year plan for research, development, and demonstration; to the Committee on Environment and Public Works.

EC-310. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, a report on the Soil Conservation Service's plan for the Elk Creek Watershed, Kans.; to the Committee on Environment and Public Works.

EC-311. A communication from the Acting Director of the U.S. Arms Control and Disarmament Agency transmitting a draft of proposed legislation authorizing appropriations for the Agency; to the Committee on Foreign Relations.

EC-312. A communication from the Secretary of the Treasury transmitting a draft of proposed legislation to provide for increased U.S. participation in the African development fund; to the Committee on Foreign Relations.

EC-313. A communication from the Director, Office of Legislative Affairs, AID, transmitting, pursuant to law, a report on the Egyptian economy and debt repayment prospects; to the Committee on Foreign Relations.

EC-314. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international

agreements, other than treaties, entered into by the U.S. within the previous 60 days; to the Committee on Foreign Relations.

EC-315. A communication from the Chairman of the D.C. Council transmitting, pursuant to law, a copy of D.C. Act 5-3; to the Committee on Governmental Affairs.

EC-316. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports issued by the General Accounting Office for the month of January 1983; to the Committee on Governmental Affairs.

EC-317. A communication from the Chief, Insurance and Debt Management, Executive Secretariat, Air Force Welfare Board, transmitting, pursuant to law, the annual report on the Air Force nonappropriated fund retirement plan for civilian employees; to the Committee on Governmental Affairs.

EC-318. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting, pursuant to law, the annual report on the 15 positions (grades 16, 17, and 18) allocated to the Administrative Office of the U.S. Courts as of December 31, 1982; to the Committee on Governmental Affairs.

EC-319. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-320. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-321. A communication from the Assistant Attorney General for Administration, Department of Justice, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-322. A communication from the Freedom of Information/Privacy Officer of the Interstate Commerce Commission, transmitting, pursuant to law, the annual report of the Commission on activities under the Freedom of Information Act for calendar year 1982; to the Committee on the Judiciary.

EC-323. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting a draft of proposed legislation to reorganize the court system for cases and proceedings under the bankruptcy laws, and for other purposes; to the Committee on the Judiciary.

EC-324. A communication from the chairman of the Depository Institutions Deregulation Committee, transmitting, pursuant to law, the annual report of the committee on activities under the Freedom of Information Act for calendar year 1982; to the Committee on the Judiciary.

EC-325. A communication from the Director of the National Science Foundation, transmitting a draft of proposed legislation to authorize appropriations for the National Science Foundation for fiscal years 1984 and 1985; to the Committee on Labor and Human Resources.

EC-326. A communication from the Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a request by the Mobil Oil Corp. for a refund of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-327. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to terminate the authority of the Administrator of Veterans' Affairs to make advance payments of educational and subsistence allowances, and for other purposes; to the Committee on Veterans' Affairs.

EC-328. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to repeal the authority for eligible veterans and eligible spouses to pursue correspondence training, and for other purposes; to the Committee on Veterans' Affairs.

EC-329. A communication from the Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a request from the Superior Oil Co. for repayment of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-330. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Federal Meat Inspection Act, the Poultry Products Inspection Act, and the Egg Products Inspection Act to authorize the Secretary of Agriculture to determine the degree of inspection to be conducted in meat, poultry, and egg processing plants, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

EC-331. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to recover the cost of providing plant variety protection pursuant to the Plant Variety Protection Act; to the Committee on Agriculture, Nutrition, and Forestry.

EC-332. A communication from the Assistant Administrator of the Environmental Protection Agency (Pesticides and Toxic Substances), transmitting, pursuant to law, a report on the total number of applications for conditional registrations under the Federal Insecticide, Fungicide, and Rodenticide Act; to the Committee on Agriculture, Nutrition, and Forestry.

EC-333. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the allocation of funds made available for the fiscal year 1983 international military education and training and military assistance programs; to the Committee on Appropriations.

EC-334. A communication from the Secretary of the Army, transmitting, pursuant to law, a report stating that the Copperhead program has exceeded baseline unit costs by more than 25 percent; to the Committee on Armed Services.

EC-335. A communication from the Director of the Office of Legislative Affairs, Department of the Navy, transmitting, pursuant to law, notice of the intent of the Department of the Navy to donate a B-29 Superfortess aircraft to the Commonwealth of the Northern Mariana Islands for display at the Saipan International Airport; to the Committee on Armed Services.

EC-336. A communication from the Secretary of the Navy, transmitting, pursuant to law, a report that certain major defense acquisition programs have exceeded baseline unit costs; to the Committee on Armed Services.

EC-337. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, notice of the conversion of the shelf stocking function at the naval commissary store, Oceana, Va., to performance by contract; to the Committee on Armed Services.

EC-338. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the shelf stocking function at the commissary store, Naval Station, Norfolk, Va., to performance by contract; to the Committee on Armed Services.

EC-339. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the Department's report on Federal tax incentives and rental housing; to the Committee on Banking, Housing, and Urban Development.

EC-340. A communication from the Executive Director of the Neighborhood Reinvestment Corporation, transmitting a draft of proposed legislation to extend the authorization of appropriations for the Neighborhood Reinvestment Corporation; to the Committee on Banking, Housing, and Urban Affairs.

EC-341. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan, guarantee, and insurance transactions supported by Eximbank during October 1982 to Communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EC-342. A communication from the Secretary of Transportation, transmitting, pursuant to law, the final Urban Mass Transportation Administration's quarterly report for fiscal year 1982; to the Committee on Banking, Housing, and Urban Affairs.

EC-343. A communication from the Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a waiver of section 11(b) of the Stevenson-Wydler Act relating to scheduling of technology innovations functions in fiscal year 1984; to the Committee on Commerce, Science, and Transportation.

EC-344. A communication from the Chairman of the National Transportation Safety Board, transmitting a draft of proposed legislation to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1984, 1985, and 1986, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-345. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to enhance the transfer of technical information to industry, business, and the general public by amending the act of September 9, 1950 (64 Stat. 823-824; 15 U.S.C. 1151-1157), as amended, to establish the technical information clearinghouse fund, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-346. A communication from the Director of the Office of Congressional Relations, Consumer Product Safety Commission, transmitting, pursuant to law, proposed safety standard for omnidirectional citizens band base station antennas; to the Committee on Commerce, Science, and Transportation.

EC-347. A communication from the Director of the Office of Congressional Relations, Consumer Product Safety Commission, transmitting, pursuant to law, amendments to the requirements for full-size and nonfull-size baby cribs; to the Committee on Commerce, Science, and Transportation.

EC-348. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting a draft of proposed legislation to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear powerplant siting and licensing process, and

for other purposes; to the Committee on Environment and Public Works.

EC-349. A communication from the Chairman of the Advisory Council on Historic Preservation, transmitting, pursuant to law, the annual report of the Council for fiscal year 1982; to the Committee on Energy and Natural Resources.

EC-350. A communication from the Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, applications by Amoco Production Co., Shell Oil Co., ARCO Oil & Gas Co., and Texaco, Inc. for repayment of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-351. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report on the industrial energy efficiency improvement program for calendar year 1980; to the Committee on Energy and Natural Resources.

EC-352. A communication from the Secretary of the Interior, transmitting, pursuant to law, notice on leasing systems for oil and gas lease sale No. 69 (part II), Gulf of Mexico; to the Committee on Energy and Natural Resources.

EC-353. A communication from the Secretary of Energy, transmitting, pursuant to law, the first biennial report on implementation of the Alaska Federal-Civilian Energy Efficiency Swap Act of 1980; to the Committee on Energy and Natural Resources.

AC-354. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, a report of the nondisclosure of safeguards information by the Nuclear Regulatory Commission for the quarter ending December 31, 1982; to the Committee on Environment and Public Works.

EC-355. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the Toxic Substances Control Act report for fiscal year 1982; to the Committee on Environment and Public Works.

EC-356. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, the report on abnormal occurrences at licensed nuclear facilities for the third calendar quarter of 1982; to the Committee on Environment and Public Works.

EC-357. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to authorize the Secretary of the Treasury to accept gifts and bequests for the purposes of the Department of the Treasury; to the Committee on Finance.

EC-358. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, an agreement on trade in cotton, wool, and manmade fiber textile and textile products between the American Institute in Taiwan and the Coordination Council for North American Affairs; to the Committee on Foreign Relations.

EC-359. A communication from the Director of the Office of Legislative Affairs, Agency for International Development, transmitting, pursuant to law, notice of the delay in the submission of the annual report on the minority recruitment program; to the Committee on Foreign Relations.

EC-360. A communication from the Secretary of State, transmitting, drafts of proposed legislation to authorize supplemental assistance to aid Lebanon in rebuilding its economy and armed forces, and for other purposes; to authorize supplemental international security assistance for urgent purposes for the fiscal year 1983, and for other purposes; and to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize security and development assistance programs for the fiscal years 1984 and 1985, and for other purposes; to the Committee on Foreign Relations.

EC-361. A communication from the Secretary of State, transmitting, pursuant to law, the annual report of the Department of State's activities related to recruitment and equal employment efforts for fiscal year 1982; to the Committee on Foreign Relations.

EC-362. A communication from the Chairman of the Commission on Security and Cooperation in Europe, transmitting, pursuant to law, the annual report of the Commission for calendar year 1982; to the Committee on Foreign Relations.

EC-363. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to February 17, 1983; to the Committee on Foreign Relations.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-22. A joint resolution adopted by the General Assembly of the Commonwealth of Virginia; to the Committee on Armed Services:

"SENATE JOINT RESOLUTION No. 23

"Whereas, the United States Navy is striving to perform responsibilities essential to national defense over a three-ocean area while possessing ships and other resources adequate only for an area of about one and one-half oceans; and

"Whereas, it is well known that the battleship USS Missouri, a formidable ship of international renown with the potential for being modernized and outfitted with an array of modern and highly effective weapons systems, is available in the Navy's inactive fleet; and

"Whereas, this reactivation and modernization can be accomplished at a cost of about $325 million, far less than a new construction cost of nearly $2 billion, and would therefore be cost and time effective; and

"Whereas, the Soviet Navy is already three times as large as the United States Navy, is aggressively building larger and more powerful ships, and is expanding over the oceans of the world; and

"Whereas, in response to continuing needs in international theaters, the United States Navy has developed specific plans for the deployment and utilization of battleships as central ships in battle groups; and

"Whereas, this reactivation, modernization, deployment and utilization of the USS Missouri are important to the overriding national mission of providing for the common defense; and

"Whereas, this would also ensure employment and associated benefits for thousands of American citizens; and

"Whereas, the Congress of the United States has been requested to authorize and fund the reactivation of the battleship USS Missouri, and has not yet provided this augmentation of our naval defenses; now, therefore, be it

Resolved by the Senate, the House of Delegates concurring, That the Congress of the United States is hereby memorialized to provide the United States Navy with the extraordinary resources embodied in the battleship USS Missouri by authorizing and funding this project, and in petition for this purpose, we affix our signatures hereto; and, be it

Resoloved further, That the Clerk of the Senate send a copy of this resolution to the President of the United States, the presiding officer of each house of Congress, and to members of the Virginia Congressional Delegation."

POM-23. A joint resolution adopted by the General Assembly of the Commonwealth of Virginia; to the Committee on Commerce, Science, and Transportation:

"SENATE JOINT RESOLUTION No. 74

"Whereas, on January 18, 1983, the Honorable Andrew B. Fogarty, Secretary of Transportation for the Commonwealth of Virginia made a presentation to the Virginia Senate Finance Committee concerning the impact of the recently enacted Surface Transportation Assistance Act of 1982, and during the presentation, it became clear that Congress had included a number of mandates that will adversely affect certain laws of Virginia; and

"Whereas, the Act, which includes many provisions affecting the widths and lengths of tractor-trailers and the allowance of twin trailers, renders the Commonwealth powerless to determine if twin trailers are suitable for travel upon interstate and arterial highways of the Commonwealth; and

"Whereas, the operation of twin, and possible triple, trailers on Virginia highways, which has consistently been prohibited by the General Assembly, is a highly controversial issue which the General Assembly has the right and duty to resolve; and

"Whereas, this federal legislation serves to nullify laws that the General Assembly of Virginia has deemed to be in the best interest of the people traveling on the highways of the Commonwealth, and usurps state authority in an area previously controlled by both state and federal government; now, therefore, be it

"Resolved by the Senate, the House of Delegates concurring, That it is the sense of the General Assembly that the regulation of tractor-trailer length and width is the responsibility of state government; and, be it

"Resolved further, That the Surface Transportation Assistance Act of 1982 usurps the power of the Commonwealth and nullifies laws that the General Assembly of Virginia has deemed to be in the best interest of the people traveling on the highways of the Commonwealth; and, be it

"Resolved finally, That the Clerk of the Senate prepare a copy of this resolution for transmittal to the Congressional Delegation of Virginia, the Speaker of the House of Representatives, the President of the United States Senate, and the President of the United States in order that they may be apprised of the sense of the Senate of Virginia."

POM-24. A concurrent resolution adopted by the General Assembly of the State of Indiana; to the Committee on Commerce, Science, and Transportation:

A CONCURRENT RESOLUTION URGING CONGRESSIONAL APPROVAL FOR THE AMTRAK CINCINNATI-INDIANAPOLIS RAIL LINE

Whereas, Indiana has historically been a hub for rail transportation; and,

Whereas, Conrail and the United States Department of Transportation have threatened to close the Shelbyville to Thatcher rail line; and

Whereas, legislation now before Congress would authorize Amtrak to purchase and upgrade this line restoring passenger train service between Indianapolis and Cincinnati and completing the vital Chicago to Indianapolis to Cincinnati link; and

Whereas, freight trains would continue to run on this line, insuring service to shippers in southeastern Indiana and the 13,000 jobs they represent: Therefore,

"Be it resolved by the Senate of the General Assembly of the State of Indiana, the House of Representatives concurring:

"SECTION 1. That the General Assembly of the State of Indiana supports continued rail service, both passenger and freight transportation, to southeastern Indiana.

"SEC. 2. That we call upon all members of the Indiana delegation to the Congress of the United States of America to work for the approval of the Amtrak purchase in the last session days of the 97th Congress.

"SEC. 3. That immediately on its approval the Principal Secretary of the Senate transmit copies of this resolution to the leadership of both parties in both houses of Congress, the two United States Senators and eleven Congressional Representatives from Indiana, to Secretary of Transportation, Drew Lewis, to Conrail Chairman, Stanley Crane, and to Amtrak President, Graham Claytor."

POM-25. A resolution adopted by the Legislature of the Territory of Guam; to the Committee on Energy and Natural Resources:

"RESOLUTION NO. 349

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, serious questions have been raised about a possible cover-up in the Department of the Interior involving Assistant Secretary for Territorial and International Affairs Pedro Sanjuan and the Governor of Guam; and

"Whereas, Assistant Secretary Sanjuan, who last year pledged to work in the best interest of Guam, has interferred with the affairs of the government of Guam by removing the Government Comptroller during an investigation; and

"Whereas, the Government Comptroller, Ben T. Fukutome, was acting well within the duties of his assignment by investigating allegations that votes for the Primary Election has been "bought" with government funds by employing over 1,000 provisional employees—and Assistant Secretary Sanjuan's recall of Fukutome has clouded the credibility of Guam's electoral process; and

"Whereas, the Executive Branch is still hiring provisional employees; and

"Whereas, it is the sense of the Sixteenth Guam Legislature that it would be in the best interest of the people of Guam, as well as the taxpayers of America, if the Department of Justice were requested to probe this relationship and answer the questions that are being raised; and

"Whereas, it was only six months ago that the Guam Legislature adopted Resolution 244, a copy of which is attached, 'Expressing the Guam Legislature's support for Ben T. Fukutome for his objective examination of the fuel oil supply contract between Guam Power Authority and Coastal/Bermuda Limited'; and

"Whereas, the Sixteenth Guam Legislature adopted Resolution 244 as a result of Sanjuan's recall of Fukutome, and his arbitrary assignment of a retired federal comptroller from American Samoa to complete the audit commenced by Fukutome; and

"Whereas, the audit vindicated Fukutome and the Sixteenth Guam Legislature; now, therefore, be it

"Resolved, That Assistant Secretary Sanjuan's latest recall of Fukutome over the provisional hirees, and his withholding of the Supply Management Division audit impels the Sixteenth Guam Legislature to request the President of the United States to direct the Federal Bureau of Investigation to investigate a possible cover-up by Assistant Secretary Sanjuan and the Governor of Guam and the former's involvement in the internal affairs of the government of Guam during an election year; and be it further

"Resolved, That it is the sense of the Sixteenth Guam Legislature for the justice to prevail the federal comptroller must be free to objectively analyze the expenditures of Guam's public funds, in a timely manner so that honest public servants need not fear the results of audit; and be it further

"Resolved, That the members of the Sixteenth Guam Legislature request that the President of the United States direct the Secretary of the Interior to have the Government Comptroller for Guam immediately complete the audit concerning the provisional hirees; and be it further

"Resolved, That the Sixteenth Guam Legislature, on behalf of the people of Guam, does hereby express support for Fukutome's continuance as the Government Comptroller for Guam; and be it further

"Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the Vice President of the United States; to the President Protem of the United States Senate; to the Speaker of the United States House of Representatives; to the Secretary of the Interior; to the United States Attorney General; to the Comptroller General, General Accounting Office; to Guam's Delegate to the United States Congress; to the Chairman of the United States Senate Committee on Energy and Natural Resources; to the Chairman of the House Committee on Interior and Insular Affairs; and to the Governor of Guam."

POM-26. A resolution adopted by the City Council of the City of Long Beach, Calif., urging the Federal Energy Regulatory Commission to exercise its full regulatory authority; to the Committee on Energy and Natural Resources.

POM-27. A resolution adopted by the Board of Commissioners of Grand Traverse County, Mich., supporting Traverse Bay Regional Planning regarding Michigan House Resolution No. 6695; to the Committee on Environment and Public Works.

POM-28. A concurrent resolution adopted by the General Assembly of the State of Pennsylvania; to the Committee on Environment and Public Works:

RESOLUTION

"Whereas, the unemployment rate for the Commonwealth of Pennsylvania is 11.3% and some counties have rates which far exceed the average for the State; and

"Whereas, In certain areas of this Commonwealth, one out of every four workers is unemployed; and

"Whereas, The bridges, roads and mass transit systems of the Nation are in need of repairs and renovations; and

"Whereas, This Commonwealth is fourth in the number of bridges and total miles of highways which are adversely affected by the harsh winter weather prevalent in the area; and

"Whereas, Public Works Programs have had positive results in the past; and

"Whereas, Public Works spending plans could be justified solely on the need to repair our faulty transportation system; and

"Whereas, These projects need to be done regardless of the unemployment rate and doing these projects now gives us the perfect way to reduce high unemployment; therefore be it

"Resolved, (the House of Representatives concurring), That the General Assembly of the Commonwealth of Pennsylvania hereby memorializes Congress to appropriate funding as quickly as possible for an Accelerated Public Works Program, which will be established by the Commonwealth of Pennsylvania and all other states, to reduce unemployment, upgrade our bridges, roadways and missing links in Federal and State programs; and be it further

"Resolved, That copies of this resolution be delivered to the President of the United States, the Speaker of the House of Representatives, the President pro tempore of the Senate and each Senator and Congressman from Pennsylvania."

POM-29. A resolution adopted by the Legislature of the Territory of Guam; to the Committee on Environment and Public Works:

"RESOLUTION

Be it resolved by the Legislature of the Territory of Guam:

"Whereas, the matter of disposing of nuclear wastes by dumping them in the Pacific Ocean has become a matter of extreme concern to the people of Oceania; and

"Whereas, the people of Guam have repeatedly voiced through their elective representatives their stringent opposition to such dumping; and

"Whereas, the people of Guam are joined in this opposition by the people who inhabit the Commonwealth of the Northern Marianas, the Republic of Nauru, the Solomon Islands, the Republic of the Philippines, Vanuatu, Palau, Korea, Thailand, the Marshall Islands and other islands and nations in the Pacific Basin; and

"Whereas, the issue of nuclear waste dumping in the Pacific Ocean generated sustained discussion and controversy at the recently concluded General Assembly of the Asian-Pacific Parliamentarians' Union (APPU) in Guam; and

"Whereas, the only nation at the APPU General Assembly which supported the concept of ocean nuclear dumping and thus prevented the adoption of a resolution expressing the body's clearly dominant position (the APPU operating under a rule requiring unanimity for the adoption of any General Assembly Resolution) was Japan, a highly industrialized nation whose interests are not necessarily in sympathy with nor understanding of the positions of the people of Oceania; and

"Whereas, the subject of nuclear waste dumping in ocean waters will again be addressed at the London Dumping Convention in February; and

"Whereas, the people of Guam will not be represented at the London Dumping Convention except by the representatives of the United States at large; and

"Whereas, the representatives of the United States, not being directly affected nor fully advised as to the position of the people of Guam and the rest of the Pacific upon this critical subject, are unlikely to speak up against nuclear waste ocean dumping; and

"Whereas, the Seventeenth Guam Legislature finds it necessary that the delegates to the London Dumping Convention be informed of the widespread opposition of the people of the Pacific to this form of disposing of nuclear wastes; now, therefore, be it

"Resolved, That the Seventeenth Guam Legislature, on behalf of all of the people of the Pacific, save those of Japan, does state its unqualified opposition to any plan to dump nuclear wastes not only in the Pacific but in any ocean water; and be it further

"Resolved, That the Seventeenth Guam Legislature does request the representatives of the United States at the London Dumping Convention to register the opposition of the people of Guam and the Pacific to such dumping and, upon examination of the dangers of the dumping of nuclear wastes in ocean waters, to oppose any plan that would permit such dumping; and be it further

"Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the Secretary of State; to the Secretary of the Interior; to the Speaker of the House of Representatives; to the President of the Senate; to Guam's Delegate to Congress; to the Secretary General of the London Dumping Convention; to the Governor and presiding officer of each State Legislative body of California, Washington and Oregon; to the delegations of the Asian-Pacific Parliamentarians' Union; and to the Governor of Guam."

POM-30. A resolution adopted by the Legislature of the Territory of Guam; to the Committee on Finance:

"RESOLUTION No. 2

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, Public Laws 15-11, 15-110, 16-65 and 16-115 set the establishment of Guam as an international financial center as an economic objective for the territory of Guam; and

"Whereas, current tax statutes reasonably, rationally and consistently afford Guam rightful status as an international financial center; and

"Whereas, the U.S. Treasury Department is currently attempting to have The Netherlands/Antilles Treaty relative to tax applications repealed or modified; and

"Whereas, Guam as an integral part of the United States and with sources of international funds from international financial center activities would satisfy a major objective in the negotiations relative to the current treaties with The Netherlands/Antilles and of the British Virgin Islands in the past, that of increasing funds to the United States balance of payments; and

"Whereas, the U.S. Treasury Department, Internal Revenue Service issued Temporary Regulation T. D. 7865 (4a 861-1), December 28, 1982 and issued Internal Revenue Rulings 83-9 and 83-10, December 29, 1982; and

"Whereas, while Guam is denied voting representation in Congress, it nevertheless is granted the right under Section 31 of the Organic Act of Guam to administer and enforce the Guam Territorial Income Tax; and

"Whereas, the United States Department of the Treasury (Internal Revenue Service) by issuing Revenue Ruling 83-9 pertaining to the administration and enforcement of the Guam Territorial Income Tax is in violation of Section 31 of the Organic Act; and

"Whereas, such ruling would place Guam at a marked disadvantage in attracting foreign investment, compared to jurisdictions such as The Netherlands/Antilles; and

"Whereas, such ruling would prohibit Guam from engaging in certain activities which the United States Treasury has permitted in The Netherlands/Antilles for two decades and continues to permit in The Netherlands/Antilles; and

"Whereas, such ruling is based upon Temporary Regulation (4a 861-1) and proposed amendments to regulations 1.861-2 and 1.861-3; and

Whereas, such regulations reverse regulations which have been in effect for many years (1.935-1 (a) (ii) (A) fifth sentence), whose underlying principle was affirmed only a few months ago in Revenue Ruling 82-114; and

"Whereas, the proposed action by the United States Treasury would greatly handicap the development of Guam as a financial center and impair the ability of this government to become economically and financially self-sufficient; now, therefore, be it

"Resolved, That the Seventeenth Guam Legislature hereby expresses its opposition to the U.S. Treasury Department's rulings and regulations relative to Guam as a financial center; and be it further

"Resolved, That the Acts of the United States Treasury herein recited by imposing additional taxes and extending the jurisdiction of the United States Treasury beyond its established limits have a manifest tendency to subvert the rights and liberties of the people of Guam; and be it further

"Resolved, That the rule which the United States Treasury is attempting to force upon Guam will be extremely burdensome and grievous; and be it further

"Resolved, That the increase, prosperity and happiness of this territory depends on the full and free enjoyment by its residents of their rights and liberties, and a relationship with the United States which is mutually affectionate and advantageous and be it further

"Resolved, That this legislature petitions the United States Treasury to revoke Revenue Ruling 83-9 and Temporary Regulation (4a 861-1) and withdraw the proposed amendments to Regulations 1.861-2 and 1.861-3; and be it further

"Resolved, That this legislature petitions the Congress of the United States and the President of the United States to require that such remedial action be taken; and be it further

"Resolved, That the Governor of Guam and Guam's Delegate to the United States House of Representatives present this Resolution to the person petitioned; and be it further

"Resolved, That thirty days from the date hereof, the Governor of Guam report to this legislature upon the results of the petition contained herein, and in the event that the petition is not granted, recommend alternate means of achieving the same and including resort to the Courts of Guam and the United States, appeal to the United Nations, or action consistent with the traditions of the American People when subject to injuries and usurpations by an unyielding sovereign; and be it further

"Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Secretary of the Treasury of the United States; to the Vice-President of the United States in his capacity as presiding officer of the United States Senate; to the President of the United States; to Guam's Delegate to the United States House of Representatives; and to the Governor of Guam."

POM-31. A resolution adopted by United Paperworkers International Union Executive Board supporting the recommendations of the National Commission on Social Security in order to restore financial integrity to our Nation's social security system; to the Committee on Finance.

POM-32. A resolution adopted by the city of Altamonte Springs, Fla., supporting the reenactment of the general revenue sharing fund; to the Committee on Finance.

POM-33. A resolution adopted by the city commission of the city of Hallandale, Fla., requesting Congress to approve a joint resolution for a freeze and reduction in nuclear weapons; to the Committee on Foreign Relations.

POM-34. A resolution adopted by the House of Representatives of the State of Minnesota; to the Committee on Foreign Relations:

"RESOLUTION

"Whereas, a decade ago, on January 27, 1973, the Paris Peace Accords were signed to end American involvement in the war in Southeast Asia; and

"Whereas, one of the conditions of that agreement was provision for a return or accounting for prisoners of war and persons missing in action; and

"Whereas, the government of Vietnam has only provided information on a few of the missing and this only through the pressure of determined families and dedicated congressmen; and

"Whereas, 2,490 Americans, including 48 Minnesotans, remain unaccounted for with investigation of their status arrested by failure of the Socialist Republic of Vietnam and its allied governments to cooperate and assist; and

"Whereas, there have been repeated verified sighting reports that some of the missing men are still alive in Southeast Asia; and

"Whereas, the sorrow, anxiety, and frustration of the families of these men cannot be dispelled by delay or neglect; and

"Whereas, it is America's duty to ensure, through an authentic, comprehensive investigation, the return of Americans still in Southeast Asia and to account for Americans who have perished there; and

"Whereas, it is absolutely essential that the governments of the United States and the Socialist Republic of Vietnam act now to account for the missing; Now, therefore, be it

"Resolved by the House of Representatives of the State of Minnesota, that it joins with the families of the missing men in maintaining a constant vigil of anticipation and hope for a true accounting of their loved ones and the immediate return of the

remains of those who died as a result of the war or imprisonment. Be it further

"Resolved, That the government of the United States should do all it can to answer the questions surrounding the status of the missing men, to secure the return of any living prisoners or missing persons, and to secure the return of the remains of the dead. Be it further

"Resolved, That the Chief Clerk of the House of Representatives is directed to send enrolled copies of this resolution, authenticated by his signature and that of the Speaker, to the President of the United States, the Speaker and Chief Clerk of the United States House of Representatives, the President and Secretary of the United States Senate, the chairman of the Committee on Foreign Affairs of the United States House of Representatives, the chairman of the Committee on Foreign Relations of the United States Senate, to the Minnesota Representatives and Senators in Congress and to the Permanent Representatives of the Socialist Republic of Vietnam to the United Nations."

POM-235. A resolution adopted by the Senate of the State of Minnesota; to the Committee on Foreign Relations:

"SENATE RESOLUTION

"Whereas, a decade ago, on January 27, 1973, the Paris Peace Accords were signed to end American involvement in the war in Southeast Asia; and

"Whereas, one of the conditions of that agreement was provision for a return or accounting for prisoners of war and persons missing in action; and

"Whereas, the government of Vietnam has only provided information on a few of the missing and this only through the pressure of determined families and dedicated congressmen; and

"Whereas, 2,490 Americans, including 48 Minnesotans, remain unaccounted for with investigation of their status arrested by failure of the Socialist Republic of Vietnam and its allied governments to cooperate and assist; and

"Whereas, there have been repeated verified sighting reports that some of the missing men are still alive in Southeast Asia; and

"Whereas, the sorrow, anxiety, and frustration of the families of these men cannot be dispelled by delay or neglect; and

"Whereas, it is America's duty to ensure, through an authentic, comprehensive investigation, the return of Americans still in Southeast Asia and to account for Americans who have perished there; and

"Whereas, it is absolutely essential that the governments of the United States and the Socialist Republic of Vietnam act now to account for the missing; Now, Therefore, be it

"Resolved by the Senate of the State of Minnesota, That it joins with the families of the missing men in maintaining a constant vigil of anticipation and hope for a true accounting of their loved ones and the immediate return of the remains of those who died as a result of the war or imprisonment. Be it further

"Resolved, That the government of the United States should do all it can to answer the questions surrounding the status of the missing men, to secure the return of any living prisoners or missing persons, and to secure the return of the remains of the dead. Be it further

"Resolved, That the Socialist Republic of Vietnam should immediately yield all information it has on the status of the missing especially since there is no reason for them to refuse to give this information other than a calculated effort to protract the agony of the families of the missing. Be it further

"Resolved, That the Secretary of the Senate is directed to send enrolled copies of this resolution, authenticated by his signature and that of the President, to the President of the United States, the Speaker and Chief Clerk of the United States House of Representatives, the President and Secretary of the United States Senate, the chairman of the Committee on Foreign Affairs of the United States House of Representatives, the chairman of the Committee on Foreign Relations of the United States Senate, to the Minnesota Representatives and Senators in Congress and to the Permanent Representatives of the Socialist Republic of Vietnam to the United Nations."

POM-36. A joint resolution adopted by the General Assembly of the Commonwealth of Virginia; to the Committee on Foreign Relations:

"SENATE JOINT RESOLUTION NO. 65

"Whereas, the war in Southeast Asia ended over a decade ago but is still a tragic memory to those who did return as well as the families who lost their loved ones; and

"Whereas, the Commonwealth of Virginia recognizes the unique sacrifices made by the veterans of the war in Southeast Asia who answered their country's call in order to provide the American people with a strong national defense; and

"Whereas, there are still approximately 2,500 Americans unaccounted for in Southeast Asia; and

"Whereas, the Defense Intelligence Agency of the Department of Defense has collected and analyzed information which clearly establishes that the governments of Indochina possess information regarding American POWs and MIAs; and

"Whereas, the Defense Intelligence Agency is currently investigating more than 460 firsthand live sighting reports of Americans in Southeast Asia; and

"Whereas, the Defense Intelligence Agency obtained and substantiated information that the Socialist Republic of Vietnam has in its possession the remains of at least 400 U.S. personnel who were killed as the result of hostilities in Southeast Asia; and

"Whereas, the Socialist Republic of Vietnam has failed to accommodate American humanitarian and compassionate concerns regarding the release of American prisoners of war and the return of the remains of U.S. servicemen and civilians; and

"Whereas, the families of those U.S. servicemen and civilians missing in Southeast Asia have suffered untold grief and uncertainty because the governments of Indochina have failed to provide an adequate accounting of those missing; and

"Whereas, the Commonwealth of Virginia has an enduring interest in the welfare of Americans listed as missing or otherwise unaccounted for in Southeast Asia; now, therefore, be it

"Resolved by the Senate of Virginia, the House of Delegates concurring, That the General Assembly of Virginia memorializes the President and the United States Congress to call upon the Socialist Republic of Vietnam to end the years of uncertainty for American POW/MIA families by releasing all U.S. prisoners still held, providing all information concerning the fate of U.S. servicemen and civilians still missing, and repatriating all American remains which are now in their possession or may subsequently be found; and, be it

"Resolved finally, That the Clerk of the Senate is directed to prepare copies of this resolution for transmittal to the President of the United States, the Speaker of the United States House of Representatives, the President of the United States Senate and the members of the Virginia Congressional Delegation in order that they may be apprised of the sense of the General Assembly."

POM-37. A petition from the Statewide Committees Opposing Regional Plan Areas (SCORPA) relative to redress of grievances under section 5 of rule VII, U.S. Senate; to the Committee on Governmental Affairs.

POM-38. A resolution adopted by the Legislature of the Territory of Guam; to the Committee on the Judiciary:

"RESOLUTION NO. 16

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, the unincorporated territory of Guam is a territory of the United States and its people are subject to certain benefits, privileges, powers, rights and duties derived from the Constitution of the United States; and

"Whereas, a resolution proposing an amendment to the United States Constitution which would guarantee the equal rights of all persons regardless of sex has been introduced in the United States Congress for its consideration; and

"Whereas, the people of Guam are firmly committed to the principle embodied in the proposed amendment, namely that equality of rights under the law shall not be denied or abridged by the United States government or any state on account of sex; now, therefore, be it

"Resolved, That the Guam Legislature does request the United States Congress to expeditiously approve the proposed amendment to the United States Constitution; and be it further

"Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Vice President of the United States; to the President Pro-tempore of the Senate; to the Speaker of the House of Representatives; to the Chairperson of the Senate Judiciary Committee; to the Chairperson of the House Judiciary Committee; to Guam's Representative in the United States Congress; and to the Governor of Guam."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GOLDWATER, from the Select Committee on Intelligence:

Annual Report of the Select Committee on Intelligence for the period January 1, 1981 through December 31, 1982 (Rept. No. 98-10).

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment, and an amendment to the title:

S.J. Res. 37. Joint resolution providing that the week containing March 8, 1983, 1984, and 1985, shall be designated as "Women's History Week".

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

S. 612. An original bill to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior. (Rept. No. 98-11).

S. 613. An original bill to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Arizona (Rept. No. 98-12).

By Mr. HEINZ, from the Special Committee on Aging:

Special report entitled "Developments in Aging, Volumes 1 and 2" (Rept. No. 98-13).

Mr. HEINZ. Mr. President, as chairman of the Special Committee on Aging, under authority of Senate Resolution 333, 97th Congress, I submit the report of the committee entitled "Developments in Aging: 1982," volumes 1 and 2.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Lewis Arthur Tambs, of Arizona, to be Ambassador Extraordinary and Plenipotentiary of the United States to Colombia.

(The above nomination was reported from the Committee on Foreign Relations with the recommendation that it be confirmed; subject to the nominee's commitment to respond to the requests to appear and testify before any duly constituted committee of the Senate.)

LEWIS A. TAMBS

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Lewis A. Tambs.

Post: U.S. Ambassador to Colombia; Nominated January 25, 1983.

Contributions, Amount, Date, Donee:

1. Self—Volunteer worker, $100.00, 1978-82, Republican Party of Arizona; 1980, Ronald Reagan, Barry Goldwater, John Rhodes; Volunteer Foreign Policy Consultant, 1982 to Dean Sellers and Pete Dunn.

2. Spouse—$100.00 in 1980 to Woody Jenkins of Louisiana.

3. Children and spouses, None.

4. Parents—Marguerite J. Jones, Mother, $50.00, 1978-82 Robt. Lagomarsino (R., Ca); Father (deceased).

5. Grandparents (deceased).

6. Brothers and spouses (only child).

7. Sister and spouses (only child).

Mr. PERCY. Mr. President, for the Committee on Foreign Relations, I also report favorably a nomination list in the Foreign Service which appeared in the CONGRESSIONAL RECORD of February 14, 1983, and, to save the expense of reprinting them on the Executive Calendar, ask that these nominations lie on the Secretary's desk for the information of Senators.

By Mr. HATCH, from the Committee on Labor and Human Resources:

Robert A. Gielow, or Illinois, to be a member of the Railroad Retirement Board for the term of 5 years from August 29, 1982.

(The above nomination was reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PROXMIRE:

S. 606. A bill to prohibit the owners and operators of federally assisted rental housing for the elderly or handicapped from restricting the ownership of pets by the tenants of such housing; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GOLDWATER (for himself and Mr. HOLLINGS):

S. 607. A bill to amend the Communications Act of 1934; to the Committee on Commerce, Science, and Transportation.

By Mr. PERCY (by request):

S. 608. A bill to amend the Arms Control and Disarmament Act, as amended, in order to extend the authorization for appropriations; to the Committee on Foreign Relations.

S. 609. A bill to provide for increased participation by the United States in the African Development Fund; to the Committee on Foreign Relations.

By Mr. SPECTER:

S. 610. A bill entitled the "Collegiate Student-Athlete Protection Act of 1983"; to the Committee on the Judiciary.

By Mr. COHEN:

S. 611. A bill for the relief of the Bank of Maine; to the Committee on the Judiciary.

By Mr. McCLURE:

S. 612. An original bill to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior; from the Committee on Energy and Natural Resources; placed on the calendar.

S. 613. An original bill to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Ariz.; from the Committee on Energy and Natural Resources; placed on the calendar.

By Mr. GORTON (for himself, Mr. DANFORTH, Mr. DOMENICI, Mr. GOLDWATER, Mr. HEFLIN, Mr. HEINZ, and Mr. TSONGAS):

S. 614. A bill to establish within the Office of Science and Technology Policy a Presidential program for the Advancement of Science and Technology and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. McCLURE:

S. 615. A bill to correct deficiencies in the Natural Gas Policy Act of 1978, to protect natural gas consumers from price increases because of current distortions in the regulated market for natural gas, to provide for a free market for natural gas, to permit natural gas contracts to reflect the change from a regulated to a free market, to eliminate incremental pricing requirements for natural gas, to eliminate certain fuel use restrictions, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DURENBERGER (for himself, Mr. BAUCUS, Mr. DOMENICI, Mr. BUMPERS, Mr. COHEN, Mr. GOLDWATER, Mr. PELL, Mr. PERCY, Mr. STENNIS, and Mr. TSONGAS):

S. 616. A bill to promote the use of solar and other renewable forms of energy developed by the private sector; to the Committee on Finance.

By Mr. STENNIS (for himself, Mr. GOLDWATER, Mr. DOMENICI, and Mr. BUMPERS):

S. 617. A bill to promote the use of energy-conserving equipment and biofuels by the Department of Defense, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. PERCY (for himself, Mr. PELL, Mr. DOMENICI, and Mr. BUMPERS):

S. 618. A bill to revise certain Federal training and economic development programs to create jobs and develop skills in renewable energy and energy conservation industries, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. TSONGAS (for himself, Mr. COHEN, Mr. DOMENICI, and Mr. BUMPERS):

S. 619. A bill to reauthorize, extend, and enhance existing Federal programs to encourage conservation and the use of renewable energy by this Nation's consumers.

By Mr. LEVIN (for himself and Mr. RIEGLE):

S. 620. A bill to amend Public Law 89-668 relating to the Pictured Rocks National Lakeshore to require the development of a local land use plan and zoning regulations for the inland buffer zone; to the Committee on Energy and Natural Resources.

By Mr. BYRD:

S. 621. A bill to place signs memorializing the New River Gorge Bridge as the world's largest steel-arch span bridge; to the Committee on Environment and Public Works.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PELL (for himself, Mr. GLENN, and Mr. KENNEDY):

S. Res. 74. Resolution expressing the sense of the Senate concerning the future of the people on Taiwan; to the Committee on Foreign Relations.

By Mr. PERCY (for himself, Mr. DIXON, Mr. JOHNSTON, Mr. BOSCHWITZ, Mrs. KASSEBAUM, Mr. DANFORTH, Mr. BURDICK, Mr. JEPSEN, and Mr. LEVIN):

S. Res. 75. Resolution to ask for international negotiations on natural gas; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 606. A bill to prohibit the owners and operators of federally assisted rental housing for the elderly or handicapped from restricting the ownership of pets by the tenants of such

housing; to the Committee on Banking, Housing, and Urban Affairs.

PET OWNERSHIP IN FEDERALLY SUBSIDIZED HOUSING

Mr. PROXMIRE. Mr. President, today I would like to introduce a bill that would prohibit Federal assistance to all local housing projects which bar pet ownership by elderly and handicapped tenants.

Neither HUD nor the Federal Housing Administration have any regulations dealing with pets in apartment buildings insured by the FHA or subsidized by HUD. Whether or not tenants in such housing are allowed to keep pets is a decision of the building owner or manager, not the Federal Government. This leaves a wide degree of discretion for local housing projects and usually results in a blanket no-pet policy for these rental units. Such a policy is, in a sense, one of the last strongholds of discrimination a renter must face.

Rather than sanctioning the use of Federal funds to discriminate against pet owners, Government should try to find ways to support and facilitate the rich relationships that can develop between pets and their owners.

The growing number of elderly member of society who are in need of inexpensive public housing have been hardest hit by no-pet clauses. They are often forced to surrender their longtime companions when they move into public housing. This surrender is more than an inconvenience; frequently it has a traumatic effect on the senior citizens' physical and mental health.

An animal depends on its owner for care, feeding, and love, and returns these favors by offering companionship and a feeling of importance to that person. Psychological experimentation has shown that pets often comfort their owners by drawing their attention away from lonely and painful thoughts of an uncaring world outside. Pets also offer protection and unconditional love to their owners. Unlike spouses or family members, pets do not talk back, criticize, or issue commands. They are generally nonthreatening, nonjudgmental, and attentive.

Dr. Bill McCulloch, professor of veterinary medicine at Texas A&M University, and his brother Dr. Michael McCulloch, a Portland, Oreg., psychiatrist, have studied pet-people relationships extensively. In a Detroit Free Press article, Michael said that people project personalities onto their pets and will construe even their boa constrictor's, hamster's, or turtle's behavior as loving or caring. According to his studies, owning a pet seems to significantly contribute to self-esteem and gives the owner a sense of affiliation and bonding which can be very therapeutic.

Besides the direct companionship that a pet can give to its owner to combat loneliness, a pet can increase its owner's chances of meeting other people. A study in London's Hyde Park showed that when accompanied by their dogs, pet owners spoke to more people and had longer conversations than when they walked alone.

Pets can be especially good for the handicapped because animals do not reject someone who is an amputee, nor do they look away when someone is in a wheelchair, or shun those with speech impediments. Pets accept anyone and will seek anyone's love and attention.

One program run by Dr. Daniel Lagos at Pennsylvania State University gave pets to 65 rural elderly people, nearly one-half of whom lived alone. Dr. Lagos reported that for some people the pets sparked dramatic transformations, enabling severely disabled people to rise above their handicaps and helping depressed reclusive people to become more socially active.

Scientific evidence also shows that the presence of pets can help heal human infirmities and, in some cases, may even increase life expectancy. One study showed that 94 percent of heart patients who owned pets survived the difficult years following a heart attack as opposed to 62 percent who survived and did not own pets.

The evidence from these studies reads clearly: Pets seem to have a profound influence on the ability to survive.

Findings like this have prompted a host of programs in which pets are used to revitalize the elderly and motivate the handicapped. One such program, sponsored by the American Humane Education Society, places shelter animals in area nursing homes. Judith Star, director of AHES, says of the program's benefits to the elderly, "They are enormous. There are physical and mental benefits—having to get up to feed an animal, the person finds a sense of reality and added motivation to live."

By contrast, the loss of a pet can have a severe negative influence upon both the health and the emotional states of the owner. One such example comes to my mind, of Bambi, a Chihuahua who was the constant companion of a school-crossing guard named Roy. Bambi used to nestle every day in the pocket of Roy's parka as he conducted his duties. Upon retirement, Roy's small pension compelled him to move into an apartment complex for senior citizens. Two months later, Roy's distressed sister called Bambi's veterinarian and explained to him that the apartment manager had ordered Roy to dispose of Bambi or move out of the apartment. This order, she concluded, was responsible for Roy's severe depression. He refused to eat and sat crying all day long with Bambi. Fortunately, this story has a happy ending. With the help of the veterinarian, Roy's sister was able to convince the manager to let Bambi stay. But how many elderly and handicapped pet owners who are not as fortunate as Roy must make the choice between keeping their beloved pet and having a roof over their head?

An important battle for the rights of elderly pet owners has recently been won in California. Thanks to a law that went into effect on January 1, 1982, no city, State, or Federal agency can prohibit the elderly from owning pets in public housing. Similar legislation is now pending in Connecticut, New Jersey, New York, and Maryland.

A resolution allowing the elderly and disabled to keep pets in federally funded housing passed the 1981 White House Conference on the Aging, proving again that more and more people are beginning to understand the critical importance that a pet can have on one's health, safety, and happiness.

Landlords and managers of public housing are not necessarily the villains in this story. Fearful of the actions of irresponsible pet owners, they have resorted to blanket no-pet policies. However, nothing in the bill I am introducing can prevent a building manager of federally assisted rental housing from ordering the removal of a pet that constitutes a health or safety threat to the occupants of the building. Owning a pet is not a right without a responsibility.

This legislation should be dealt with as seriously as any law or regulation aimed at improving the health, safety, and well-being of the elderly or handicapped. These people matter, their needs must be considered, and they deserve to be protected under the law. I hope that my colleagues will join me in an effort to prevent the elderly and handicapped in our society from being victimized by blanket bans on pets.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no owner or operator of any federally assisted rental housing for the elderly or handicapped may—

(1) as a condition of tenancy or otherwise, prohibit or prevent any tenant in such housing from owning pets or having pets living in the dwelling accommodations of such tenant in such housing; or

(2) restrict or discriminate against any person in connection with admission to, or continued occupancy of, such housing by reason of the ownership of pets by, or the presence of pets in the dwelling accommodations of, such person.

SEC. 2. Not later than the expiration of the twelve-month period following the date

of the enactment of this Act, the Secretary of Housing and Urban Development and the Secretary of Agriculture shall each issue such regulations as may be necessary to ensure compliance with the provisions of the first section of this Act with respect to any program of assistance referred to in section 4 that is administered by such Secretary.

SEC. 3. Nothing in this Act may be construed to prohibit any owner or operator of federally assisted rental housing for the elderly or handicapped, or any local housing authority or other appropriate authority of the community where such housing is located, from requiring the removal from any such housing of any pet whose conduct or condition is duly determined to constitute a threat to the health or safety of the other occupants of such housing or of other persons in the community where such housing is located.

SEC. 4. For purposes of this Act, the term "federally assisted rental housing for the elderly or handicapped" means any rental housing project that—

(1) is assisted under section 202 of the Housing Act of 1959; or

(2) is assisted under the United States Housing Act of 1937, the National Housing Act, or title V of the Housing Act of 1949, and has as a majority of its tenants elderly or handicapped families, as such term is defined in section 202(d)(4) of the Housing Act of 1959.

By Mr. GOLDWATER (for himself, Mr. PRESSLER, and Mr. STEVENS):

S. 607. A bill to amend the Communications Act of 1934; to the Committee on Commerce, Science, and Transportation.

AUTHORIZATION OF APPROPRIATIONS FOR FEDERAL COMMUNICATIONS COMMISSION

Mr. GOLDWATER. Mr. President, the bill I introduced today authorizes appropriations for the Federal Communications Commission (FCC) for 2 years, fiscal year 1984 and 1985, at $86.4 million for each year.

Prior to the last Congress, the FCC was permanently authorized pursuant to the Communications Act of 1934. This act established the FCC to plan and carry out reallocation of broadcast stations to prohibit interference. The Agency's permanent status was based upon the need to expertly regulate rapidly expanding broadcast services—the only regulatory need at that time. Today, however, the FCC has far-reaching jurisdiction over international and interstate communications by radio, television, wire, and cable.

During the last Congress, the Senate Communications Subcommittee originated major amendments to the Communications Act, several of which were enacted into law. Other significant amendments passed the Senate but were not acted on by the House. One of the major amendments to the act was based on a widespread belief that Congress ought to exercise closer scrutiny of administrative agencies in recognition of its appropriate role in making national telecommunications policy. Thus, in 1981, we enacted an FCC authorization for 2 years. This bill continues the process begun in the 97th Congress. Periodic authorization gives the Congress an opportunity to supplement the ongoing oversight of the FCC's implementation of congressional policy with a regularly scheduled expiration of the authorization. In effect, through this process, the FCC must justify its continued activities and the appropriate level of those activities.

By Mr. PERCY (by request):

S. 608. A bill to amend the Arms Control and Disarmament Act, as amended, in order to extend the authorization for appropriations; to the Committee on Foreign Relations.

AUTHORIZATION OF APPROPRIATIONS UNDER THE ARMS CONTROL AND DISARMAMENT ACT

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to amend the Arms Control and Disarmament Act, as amended.

This legislation has been requested by the U.S. Arms Control and Disarmament Agency and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Acting Director of the Arms Control and Disarmament Agency to the President of the Senate dated February 16, 1983.

S. 608

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 49(a) (22 U.S.C. 2589(a)) of the Arms Control and Disarmament Act, as amended, is further amended to read as follows:

"SEC. 49(a) To carry out the purposes of this Act, there are authorized to be appropriated—

(1) for the fiscal year 1984, $21,385,000 and for the fiscal year 1985, $21,675,000 (and such additional amounts as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs, and to offset adverse fluctuations in foreign currency exchange rates).

Amounts appropriated under this subsection are authorized to remain available until expended."

U.S. ARMS CONTROL AND DISARMAMENT AGENCY,
Washington, February 16, 1983.

Hon. GEORGE BUSH,
President of the U.S. Senate.

DEAR MR. PRESIDENT: Enclosed is a draft bill to amend the Arms Control and Disarmament Act to extend the authorization for appropriations for the U.S. Arms Control and Disarmament Agency (ACDA).

The Agency's current two-year authorization expires on September 30, 1983. The proposed legislation would authorize appropriations of $21,385,000 for fiscal year 1984 and $21,675,000 for fiscal year 1985.

The funds to be authorized by this legislation will be devoted primarily to the conduct of and support for negotiations on the Intermediate-Range Nuclear Forces in Europe (INF), and the Strategic Arms Reduction Talks (START), both in Geneva; the Mutual and Balanced Force Reduction Talks (MBFR) in Vienna; the 40-nation Committee on Disarmament in Geneva, where we are working to develop effective limitations on nuclear testing and chemical weapons, and at the United Nations in New York.

In addition, these funds will help support implementation of the Nonproliferation Treaty and our policy to prevent the spread of nuclear explosives to additional countries, as well as enable us to fulfill other statutory arms control responsibilities. The early enactment of this legislation will facilitate congressional consideration of the Agency's 1984 budget.

The Office of Management and Budget has advised that there is no objection to the presentation of this proposal to the Congress, and that its enactment would be in accord with the program of the President.

Sincerely,

JAMES L. GEORGE,
Acting Director.●

By Mr. PERCY (by request):

S. 609. A bill to provide for increased participation by the United States in the African Development Fund; to the Committee on Foreign Relations.

AFRICAN DEVELOPMENT FUND

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to provide for increased participation by the United States in the African Development Fund.

This legislation has been requested by the Department of the Treasury and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Secretary of the Treasury to the President of the Senate dated February 18, 1983.

S. 609

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the African Development Fund Act, as amended (22 U.S.C. 290g, et seq.), is further amended by adding at the end the following new section:

"SEC. 213. (a) The United States Governor of the Fund is hereby authorized to contribute on behalf of the United States $150,000,000 to the Fund as the United States contribution to the third replenishment of the resources of the Fund, except

that any commitment to make such contribution shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution provided for in this section, there is hereby authorized to be appropriated without fiscal year limitation $150,000,000 for payment by the Secretary of the Treasury."

THE SECRETARY OF THE TREASURY,
Washington, February 18, 1983.

Hon. GEORGE BUSH,
President of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith is a draft bill, "To provide for increased participation by the United States in the African Development Fund."

Submission of a bill is required by Section 205 of the African Development Fund Act, 22 U.S.C. 290g, et seq., which provides that Congressional authorization must be obtained for the United States to agree to increase its contribution of the Fund.

The bill being submitted authorizes the U.S. Governor of the African Development Fund (AFDF) to contribute on behalf of the United States $150,000,000 as the U.S. contribution to the third replenishment of the resources of the AFDF. It requires that any commitment to make a contribution to the Fund be made subject to obtaining the necessary appropriations. It also authorizes the appropriation of $150,000,000 for payment of the contribution to the AFDF.

U.S. participation in the third replenishment of the African Development Fund is an important way of demonstrating this country's continuing commitment to Africa's economic growth and development. The United States has increasing economic, political and security interests in Africa which underscore the need to strengthen our ties with the nations of that continent. We also have a strong humanitarian interest in helping to reduce poverty among the poorest people in the world's least developed continent.

The U.S. contribution to the AFDF is fundamental to the Fund's program to help meet developmental needs of the poorest African countries, those with low per capita incomes and limited external debt repayment capacity which warrant concessional lending terms. Except under the most unusual circumstances, AFDF loans are not granted to countries with a 1976 per capita GNP which is above $550. Absolute priority is given to countries which have a 1976 per capital GNP of $280 or less. Since its establishment, the Fund has channeled lending to high priority projects for agriculture, transportation, water supply and sewerage.

As a result of provisions contained in the replenishment agreement, the Fund has a backlog of approved loans that it cannot sign until the United States makes its contribution. In addition, the Fund can only make contingent commitments until the United States agrees to participate in the replenishment and makes its first payment.

The replenishment, which is to finance AFDF lending for the 1982-84 period, totals about $1075 million. The proposed U.S. share is $150 million, or 14 percent of the total. Appropriations for the first $50 million installment of the U.S. contribution would be provided under the FY 1983 Continuing Resolution and the two remaining installments would be sought in fiscal years 1984 and 1985.

It would be appreciated if you would lay this bill before the Senate. An identical bill has been submitted separately to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that there is no objection to the presentation of this proposal to Congress and that enactment of this bill would be in accord with the President's program.

With best wishes.

Sincerely,

DONALD T. REGAN.●

By Mr. SPECTER:

S. 610. A bill entitled the "Collegiate Student-Athlete Protection Act of 1983"; to the Committee on the Judiciary.

COLLEGIATE STUDENT-ATHLETE PROTECTION ACT OF 1983

Mr. SPECTER. Mr. President, last week, longstanding rules governing recruiting by professional football teams of college players, who had not completed their education or eligibility, were shattered in the Herschel Walker case. The reason—or perhaps the excuse—given by the commissioner of the U.S. Football League, Chet Simmons, was that the league rules, which limited recruiting, violated antitrust laws. In the volatile competition between the National Football League and the U.S. Football League, the Walker case could lead to a stampede on recruiting of college players if the longstanding rules are not reinstated and preserved. For this reason, I am today introducing the Collegiate Student-Athlete Protection Act of 1983.

At the outset, I emphasize that this bill does not inject Congress into a determination of what rules and regulations should govern this issue. This bill only grants a limited exemption which makes it clear that the antitrust laws do not prohibit the professional football teams or any professional teams from establishing a rule prohibiting recruitment of college athletes who have not finished their education or eligibility.

Professional and college athletes obviously have a significant impact on interstate commerce. The games stimulate many jobs at the stadium and in the surrounding areas when large crowds travel to cities or campuses for the games.

Based on my experience in the antitrust filed in private practice and the insights gained from similar issues on the professional football stabilization bill, (S. 2821—97th Congress), it is my judgment that the problems posed by the Herschel Walker case can be effectively dealt with by the approach in this proposed legislation.

In dealing with the U.S. Football League, Walker's attorney repeatedly had submitted a legal brief which concluded that the antitrust laws prohibited the league rules banning recruitment of his client. The U.S. Football League then reportedly secured opinions from two other law firms on the same subject which led the league to annouce that it approved the contract between Herschel Walker and the New Jersey Generals, because the league rules violated the antitrust laws.

There has been immediate speculation that other college football stars will be targeted for such recruitment. Given the tremendous public interest in football and the gigantic money-making opportunities for the franchises and collegiate athletes, it would indeed be amazing if owners, general managers, attorneys, and collegiate athletes were not, at this very moment, running in the open field created by the Herschel Walker precedent.

Certainly, there is a substantial public interest in a policy to encourage student-athletes to finish college. There are many examples of collegiate athletes, lured by the big bucks of professional athletics to leave school, who later sustain injuries and spend the rest of their lives regretting their decision to enter professional athletics early.

At the same time, there is a serious question on the right of young adults to decide their employment opportunities for themselves and leave school to take advantage of phenomenal offers. Given the limited timespan of a professional football career and the possibility of a collegiate injury precluding a later professional career, there is some validity to the contention that college players should be free to seek lucrative contracts before finishing their education and eligibility. Commentators have also suggested that the professional leagues use college football as a minor league system which has enabled the National Football League and the colleges to reap big profits at the expense of the collegian.

These and other issues should be fully explored at hearings. At a minimum, in my judgment, Congress should give careful consideration to this bill to preserve the current arrangements regarding recruitment of college football players which has worked reasonably well over the many years. The absence of any successful legal challenge to the existing rule is significant evidence of its value.

These issues have a somewhat different focus in this setting than when Congress itself must resolve such competing issues of public policy. Here, the scope of the congressional judgment is more restricted since we need decide only whether the antitrust laws should ban the freedom of the teams to limit their own activities to leave collegians in school and avoid interference with college football which is a major national pastime.

While other issues may be addressed in hearings, it is my view that Congress should not act more broadly than the narrow issue posed by the current problem. In my judgment, the

Congress should not now deal with any antitrust issues raised by the NCAA or Olympic rules barring athletes from amateur competition after negotiation with professional teams. It was for this reason that I personally opposed legislation to create a general antitrust exemption for professional football on the issue raised by the move of the Raiders from Oakland last year.

This limited antitrust exemption addresses the problem posed by the Herschel Walker case for college football athletes and professional football with an appropriately narrow response.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 610

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Collegiate Student-Athlete Protection Act of 1983.

SEC. 2. The Act of September 30, 1961 (75 Stat. 732; 15 U.S.C. 1291-1295), is amended by inserting after section 5 the following:

"SEC. 6. The antitrust laws as defined in section 1 of the Clayton Act, and in the Federal Trade Commission Act shall not apply to a joint agreement by or among persons engaging in or conducting the professional sports of football, baseball, basketball, soccer or hockey designed to encourage college student-athletes to complete their undergraduate education before becoming professional athletes.

By Mr. COHEN:

S. 611. A bill for the relief of the Bank of Maine; to the Committee on the Judiciary.

RELIEF OF THE BANK OF MAINE

Mr. COHEN. Mr. President, I am introducing legislation to reimburse a Maine bank for the wrongful loss of interest resulting from an erroneous transfer of funds to the U.S. Treasury.

The increasing use of computers in every field has made Americans more aware of the unfortunate errors that result when fallible human beings enter incorrect data into the computer. These mistakes can—and do—occur in the banking industry, given its growing reliance on high-speed and high-volume electronic transfers of funds.

Generally, when errors in transmitting funds occur, banks simply reimburse one another for any lost interest income, whether the mistake is caused by the sending or the receiving financial institution. This comity, however, apparently does not apply when a bank has the misfortune to misdirect funds to a U.S. Treasury account.

On December 24, 1980, the bank of Maine, N.A. attempted to transfer more than $2 million to the Bank of Nova Scotia via Bankers Trust in New York. The bank's staff incorrectly wired the funds, entering the wrong code which sent the money to a U.S. Treasury account at the Federal Reserve Bank of New York, instead of to its proper destination.

In most cases, the receiving financial institution catches a wiring error on the day of the transfer and notifies the sending bank. The funds are then forwarded to the correct location with no loss of interest. The Treasury Department, however, did not discover the error and notify the Bank of Maine until January 1, 1981, 9 days after the erroneous transfer had occurred.

The correct recipient of the funds, the Bank of Nova Scotia, asked the Bank of Maine to reimburse it for the interest lost during the 9 days that the funds were held by the Treasury. After considerable negotiation, the Bank of Nova Scotia agreed to settle for payment of $9,605.45, the amount of interest computed at the 19.13 percent Federal funds rate for the applicable period and less than the 22-percent interest rate on the loan against which the funds were to be applied.

Since the Bank of Maine had to compensate its customer for the loss of interest, bank officials requested that the Treasury pay the imputed interest for the time it held the funds. Stating that it was unable to pay interest on a claim unless pursuant to a specific statutory authority or a court order, the Treasury refused to reimburse the bank. This legislation will provide that statutory authority.

Mr. President, it is clear that the Treasury has been unjustly enriched at the expense of the Bank Maine. And, although $9,605.45 is a small amount compared to multi-billion-dollar Treasury accounts, it is not insignificant to a small Maine bank. I think that simple equity requires that the Bank of Maine be compensated for the loss of its interest.

I ask unanimous consent that this legislation be printed in the RECORD following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 611

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury shall pay, out of any money in the Treasury not otherwise appropriated, the sum of $9,605.45 to the Bank of Maine, Augusta, Maine, in full satisfaction of the claim of the Bank of Maine for interest on funds which were erroneously transferred from the Bank of Maine to the United States Treasury on December 24, 1980, and retained by the United States Treasury until January 2, 1981.

SEC. 2. No part of the amount appropriated by the first section of this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with the enactment of this Act, any contract to the contrary notwithstanding. Violation of the provision of this section is a misdemeanor punishable by a fine not to exceed $1,000.

By Mr. GORTON (for himself, Mr. DANFORTH, Mr. DOMENICI, Mr. GOLDWATER, Mr. HEFLIN, Mr. HEINZ, and Mr. TSONGAS):

S. 614. A bill to establish with the Office of Science and Technology Policy a Presidential program for the advancement of science and technology, and for other purposes; to the Committee on Commerce, Science, and Transportation.

NATIONAL SCIENCE AND TECHNOLOGY ADVANCEMENT ACT OF 1983

Mr. GORTON. Mr. President, today, our Nation faces a problem and a challenge unprecedented since the launching of Sputnik. For nearly three decades, Americans have assumed that the United States led the world in its scientific, engineering, and technological resources and achievement. But in recent years, quietly and without fanfare, that lead has slipped. The implications, both now and for the future, are devastating. This challenge to our prominence has impacts not only in the potential failure to achieve new breakthroughs; it has real human impacts that touch the lives of working men and women across the country.

While the importance of adequate technological resources cannot be overstated, the most significant factor in our Nation's decline in prominence is the human factor. Across the United States, there is a growing awareness that the next generation of Americans lacks the scientific, mathematical, and technological skills needed to enable them to participate fully in the technological revolution sweeping the world. Without those skills, individuals cannot hope for a decent life, and our Nation cannot regain its lead among tough international competition. Without that skilled work force, economic recovery can be only marginal and short-lived at best.

The following facts amply illustrate the severity of the problem:

During the past decade, the number of precollege science and mathematics teachers decreased by 50 percent while demand rose by 50 percent, according to researchers at the University of Washington;

Nationwide, in 1981-82, 50 percent of the newly employed precollege mathematics and science teachers were teaching under emergency certification, according to a survey by the National Science Teachers Association;

In Washington State, it is estimated that 25 percent of the secondary school science and mathematics teachers currently teaching will leave the profession in 3 to 5 years, according to researchers at the University of Washington;

Ten percent of all engineering faculty positions, some 3,000, remain un-

filled because of a critical lack of qualified candidates;

In the United States, only 9 percent of high school graduates take even 1 year of physics, 16 percent a year, of chemistry, and 45 percent a year, of biology. By contrast, the average Soviet high school graduate has taken 5 years of physics, 4 years of chemistry, and 5 years of biology;

In 1980 men outnumbered women in the entire scientific and technological work force by more than 4 to 1. In some fields, such as engineering and environmental sciences, women comprise less than 10 percent of the work force.

Only 20 percent of the students enrolled in technical vocational programs are women, and women comprise only 5 percent of the recipients of advanced engineering degrees.

The problems of inadequate numbers of secondary science and mathematics teachers, unfilled teaching positions, unprepared secondary school students and under representation of women and minorities demand bold new approaches.

This administration has been very supportive of basic research. In the state of the Union address, the President called for a national commitment to scientific and technological research and literacy, stating:

> * * * Education, training and retraining are fundamental to our success, as are research, development and productivity. Labor, management and government at all levels can and must participate in improving these tools of growth. Tax policy, regulatory practices, and government programs need constant re-evaluation in terms of our competitiveness. * * *

In my judgment, the Congress must also join in a wide bipartisan effort to address this urgent national problem. For this reason, today I am introducing the National Science and Technology Advancement Act of 1983.

The essential elements of my bill provide for assessments of the critical problems of our science and technology work force, strengthening of research and instructional facility capabilities in the sciences, engineering and mathematics, and a cooperative sharing of responsibility among the Federal Government, universities, industry, States and localities in the efforts to address these problems.

While it is entirely appropriate for the Federal Government to take the leadership role in addressing this problem, the States, localities, and the private sector all have a role to play as well.

Already, cooperative programs are forming between some of our great research universities and the public schools in the communities those universities serve. Major corporations, such as IMB and Hewlett-Packard, are emphasizing their commitment to engineering, science, and technology by increased funding of both basic research in universities and graduate fellowships to train our next generation of scientists.

A number of the States have begun to develop initiatives to encourage the growth of high technology industry. Cities are developing innovative approaches for attracting and holding qualified teachers of science and mathematics in their elementary and secondary schools. The National Science and Technology Advancement Act of 1983 is designed to encourage those initiatives, and to provide incentives for new initiatives.

In the bill, we propose a program aimed not only at inservice training of elementary and secondary teachers, but at the development of materials, resource centers and innovative programs in cooperation with university departments of physical and biological sciences, mathematics, and engineering. Any and all such programs will be developed in close cooperation with the States so as to adequately reflect their needs and will involve the private sector and the schools.

Another issue that cuts across many disciplines is that of support of our young scientific and engineering research faculty in the first years of their careers. These young faculty face enormous competition for scarce research funds. It is imperative that these young faculty not desert the academic environment for industry since it is they who will train the next generation of scientists and engineers. We recognize this and so provide for Presidential science, engineering, and technology awards for promising young faculty. These awards, consisting of Federal dollars matched with money from any non-Federal source can run up to $100,000 for 5 years. Not only will this provide the freedom and the resources to help these promising scientists realize their full potential as innovative researchers—and mentors for their graduate students—but will also encourage the private sector to share in the support of this important endeavor.

In addition, to further support this effort, we propose that those Federal agencies with heavy obligations in basic research share with the private sector in supporting academic research—such support could include equipment for research and instructional facilities improvement, scholarships, and fellowships, as examples. Cost estimates for upgrading research equipment in university laboratories to industrial standards range from $1 to $4 billion. Thus, industry has a critical stake in the health and success of the academic research enterprise. My legislation recognizes this shared responsibility by providing incentives for matching funding.

For years, women and minorities have been discouraged from entering the sciences, mathematics, and engineering. The result is an untapped and largely wasted reservoir of potential talent. It is vital that we increase the role of women and minorities in science, mathematics, and engineering. My bill addresses this need by directing that the Office of Science and Technology Policy specifically assess the influences that affect the interest of children in science and mathematics at an early age.

Mr. President, I believe that the approach which we are proposing is responsive and appropriate and I ask unanimous consent that a copy of the National Science and Technology Advancement Act of 1983 and a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 614

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Science and Technology Advancement Act of 1983."

FINDINGS AND PURPOSES

SEC. 2. The Congress finds that—

(1) the Nation's economy, welfare and security have been and increasingly are dependent on the vitality and productivity of research and development in science and technology;

(2) the advantages which the Nation has enjoyed due to research and development in science and technology are being challenged increasingly and vigorously by other nations, with adverse implications for the economic competitiveness, general welfare and national security of the United States;

(3) the most important elements of research and development are the men and women who make discoveries and inventions and who transform such discoveries and inventions into new goods and services, thereby contributing to our national welfare and security, and to the vitality of our economy;

(4) there exists a pressing need for men and women trained and qualified in the fields of science and technology, and mathematics, and such a need is likely to increase as our Nation's welfare, security, and economic well-being become increasingly reliant on new technological developments;

(5) during the past decade there has been a continuing decline in the level of the science and mathematics literacy needed to provide a base for quality higher education or for maintenance of a technically skilled work force;

(6) women and minorities have historically been underrepresented in science, engineering and technical professions and can make such greater contributions to meeting the Nation's needs for research and development in science and technology; and

(7) achieving and maintaining a superior capability for research and development in science and technology is a national responsibility which must be actively assumed and shared, as appropriate, by the public and private sectors.

POLICY

SEC. 3. (a) The Congress declares that it is the policy of the United States to—

(1) promote international leadership by the United States in science and technology;

(2) pursue Federal responsibilities for research and development, particularly those for basic research, applied research and engineering applications;

(3) encourage the development of scientific, engineering, and technical personnel necessary to achieve the policies of this Act; and

(4) solicit the support of the private sector in meeting the Nation's needs for research and development and for science, engineering and technical personnel.

(b) The Congress further declares that the primary responsibility in the executive branch for developing policies for Federal support of resarch and development, science engineering, and technical personnel lies with the Office of Science and Technology Policy in the Executive Office of the President.

PRESIDENTIAL PROGRAM FOR THE ADVANCEMENT OF SCIENCE AND TECHNOLOGY

SEC. 4. There is established in the Executive Office of the President a Presidential program for the advancement of science and technology, to be administered by the Office of Science and Technology Policy. Such program shall consist of science and technology policy assessments, research capabilities improvements, Presidential science, engineering and technology awards, and a Presidential science and mathematics enhancement program, as provided in this Act.

SCIENCE AND TECHNOLOGY POLICY ASSESSMENTS

SEC. 5. The Office of Science and Technology Policy will undertake a study of currently critical problems of science and technology policy, including—

(1) the nature and distribution of shortages of elementary and secondary teachers qualified in science and mathematics, along with recommendations for increasing the relevant personnel pools;

(2) the needs of business and industry for personnel trained and qualified in the fields of science and technology, and mathematics;

(3) the problem of retraining workers in the fields of decreasing employment and from traditional skills to new skills appropriate to the needs of existing and emerging high technology businesses and industry; and

(4) factors which are most consequential to the development of interest in science and mathematics in young children and those factors which are most likely to increase the population of children who are competent in science and mathematics.

The Office of Science and Technology Policy shall submit such assessments, along with any recommendations for further action, to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives prior to the submission by the President to the Congress of the Federal Budget for fiscal year 1985.

RESEARCH CAPABILITIES IMPROVEMENT

SEC. 6. (a) There is established a Federal program for the improvement of university research facilities and scientific and technical personnel for the physical and biological sciences, mathematics, and engineering. Any Federal agency with obligations for basic research in excess of $100,000,000 in any fiscal year is authorized to make grants by means of the program. Such grants shall be made to any academic institution for research and instructional scientific equipment, renovation of research facilities, fellowships, scholarships, and such other purposes as the Director of the Office of Science and Technology Policy determines are most appropriate to promote academic research and scientific and technical personnel improvement in the physical and biological sciences, mathematics, and engineering.

(b)(1) The Office of Science and Technology Policy will develop guidelines and plans for agency participation in the program established under subsection (a) of this section. Such guidelines and plans shall include a provision that the Federal contribution in any fiscal year to awards under such program shall not exceed the amount of funds contributed for such awards by non-Federal and private sources.

(2) The Director of the Office of Science and Technology Policy shall submit such guidelines and plans to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives prior to the submission by the President to the Congress of the Federal Budget for fiscal year 1985.

(c) The Director of the Office of Science and Technology Policy shall submit a report at least annually on such program to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives.

(d) The program established under subsection (a) of this section shall continue in effect for five years after the date of enactment of this Act. Continuation of such program after that date shall require the specific authorization of Congress.

PRESIDENTIAL SCIENCE, ENGINEERING AND TECHNOLOGY AWARDS

SEC. 7. (a) There is established within the Executive Office of the President the Presidential science, engineering and technology awards program to support and encourage promising new scientists and engineers to establish careers in academic research. The program shall be administered by the Office of Science and Technology Policy.

(b) The Director of the Office of Science and Technology Policy, after consulting with representatives from the scientific and educational communities and with such other persons as the Director considers appropriate, shall select the recipients of such awards from among individuals who—

(1) are untenured faculty members in the physical or biological sciences, mathematics, or engineering;

(2) have received a doctoral degree in one of these disciplines or have reentered academic research within five years before the award is made; and

(3) show unusual promise in their respective fields.

(c)(1) Any such award will consist of—

(A) a base research support award of $25,000 per year for five years; and

(B) at the discretion of the Director, an additional research support award of up to $75,000 per year for five years; the total annual Federal share of the additional research support award shall not exceed $25,000 and shall be contingent upon private and other non-Federal unrestricted matching of at least $2 for each Federal dollar awarded.

(d) Any such award shall be made on the basis of merit only and may not be used to pay the salaries of Presidential science, engineering and technology award recipients during any academic year.

(e) There is authorized to be appropriated for the Presidential science, engineering and technology awards program not to exceed $10,000,000 for the fiscal year ending September 30, 1984; not to exceed $20,000,000 for the fiscal year ending September 30, 1985; not to exceed $30,000,000 for the fiscal year ending September 30, 1986; not to exceed $40,000,000 for the fiscal year ending September 30, 1987; and not to exceed $50,000,000 for the fiscal year ending September 30, 1988.

PRESIDENTIAL SCIENCE AND MATHEMATICS PERSONNEL ENHANCEMENT PROGRAM

SEC. 8. (a) There is established within the Executive Office of the President a Presidential science and mathematics personnel enhancement program. Such program shall be administered by the Office of Science and Technology Policy, which shall develop a plan and guidelines for the program. To ensure that the program reflects appropriately the plans and intentions of the separate States and to assist them in their responsibilities, the Director of the Office of Science and Technology Policy shall coordinate the activities of such programs with—

(1) the Governors of the separate States; or

(2) in the case of States in which the Members of the State Board of Education are elected (including election by the State Legislature), by such Board.

(b)(1) The plan and guidelines developed pursuant to subsection (a) of this section shall provide for stipends for eligible elementary and secondary teachers of science and mathematics to enable such teachers to participate in programs to improve their instructional skills and subject-matter expertise. Such plan and guidelines may also include—

(A) development of instructional materials for teachers through university departments of physical and biological sciences, mathematics and engineering;

(B) teacher institutes and resource centers; and

(C) other innovative instructional programs.

(2) Such plan shall include criteria for selection of participants in such programs.

(3) The nominations of eligible participants in such programs shall primarily be the responsibility of State and local school authorities.

(4) At least one-half of the funds necessary for such stipends shall be made available through non-Federal or private sources.

(c) There is authorized to be appropriated for the Presidential science and mathematics personnel enhancement program not to exceed $10,000,000 for the fiscal year ending September 30, 1984; not to exceed $20,000,000 for the fiscal year ending September 30, 1985; not to exceed $30,000,000 for the fiscal year ending September 30, 1986; not to exceed $55,000,000 for the fiscal year ending September 30, 1987; and not to exceed $55,000,000 for the fiscal year ending September 30, 1988.

SECTION BY SECTION ANALYSIS

Section 1. *Title.*

Section 2. *Findings and Purposes.*

Section 3. *Policy.*

Section 4. *Presidential Program for the Advancement of Science and Technology.* Authorizes the Director of the Office of Science and Technology Policy in the Executive Office of the President to establish the programs in Sections 5,6,7 and 8.

Section 5. *Science and Technology Policy Assessments.* Directs the Office of Science and Technology Policy to undertake assess-

ments of critical problems of science and technology policy including: shortages of teachers qualified in science and mathematics; the needs of business and industry for personnel trained and qualified in science and mathematics; the need for retraining workers for the new demands of existing and emerging high technology industries and the factors influencing the interest of young children in science and mathematics.

Section 6. *Research Capabilities Improvement.* Establishes a program for improvement of university research facilities, instructional and research equipment, and scientific and technical personnel for the physical and biological sciences, engineering and mathematics. Authorizes Federal agencies with basic research obligations in excess of $100 million dollars per year to participate in this program. Directs the Office of Science and Technology Policy to develop guidelines for agency participation, to submit their guidelines and report annually on this program to the appropriate Congressional committees. Federal monies contributed under this program shall not exceed the amounts contributed by non-Federal or private sources.

Section 7. *Presidential Science, Engineering and Technology Awards.* Establishes an awards program administered by the Office of Science and Technology Policy to support promising new scientists and engineers in academic research. The Director of the Office of Science and Technology Policy in consultation with other appropriate persons shall select recipients from untenured, unusually promising faculty members in the sciences, engineering or mathematics who have either received their doctorates or reentered academic research within 5 years prior to the award. Awards, based on merit only, will consist of a base support amount and an additional discretionary sum of which the Federal share shall not exceed one-third. Authorizes appropriations for this program of $10 million for fiscal year 1984, $20 million for fiscal year 1995, $30 million for fiscal year 1986, $40 million for fiscal year 1987 and $50 million for fiscal year 1988.

Section 8. *Presidential Science and Mathematics Personnel Enhancement Program.* Establishes a program, administered by the Office of Science and Technology Policy, which may provide for stipends for: (1) elementary and secondary science and mathematics teachers to participate in programs to improve their instructional skills and subject-matter knowledge; (2) monies for development of instructional materials for teachers through university departments; (3) teacher institutes or resource centers; and, (4) other innovative instructional programs. The Office of Science and Technology Policy shall coordinate this program with the appropriate State officials and shall develop a plan and guidelines for the program. At least one-half the funds necessary for this program shall be obtained through non-Federal or private sources. Authorizes appropriations of $10 million for fiscal year 1984; $20 million for fiscal year 1985; $30 million for fiscal year 1986; $55 million for each of fiscal year 1987 and fiscal year 1988.

Mr. HEFLIN. Mr. President, I am pleased to cosponsor, with Senator GORTON, this legislation for advancing the science and technology programs so vitally needed today by this Nation. The ability of the United States to maintain a competitive edge in science and technology will influence not only our economic well-being but our national security as well. In recent years our leadership position has become at risk to the technological base formed by other nations. This is partially due to the national negligence of the growing problems of inadequate supply of trained personnel to meet the rapidly increasing demand by high technology industries, the shortage of qualified science and mathematic teachers, and inadequate instructional and research equipment.

Past basic research into the fundamental laws of mathematics, physics, and engineering was the foundation on which the development of new ideas, procedures, and products such as the laser were built. Without the talent and tools for careful basic research we would not be blessed with the numerous applications of the laser, such as its fantastic uses in medicine, in industry, and the national defense.

My primary goal as ranking Democrat of the Science, Technology, and Space Subcommittee is to see that the United States remains the world leader in science and technology on which so much of our future depends. I look forward to working with Senator GORTON on this high priority legislation that will put us back on the right track for maintaining our leadership. I believe that it provides a basis for us to address the immediate science and technology problems facing us and will also provide a basis for evaluating the national science and technology goals and establishing a coherent policy to avoid future problems.

By Mr. McCLURE:

S. 615. A bill to correct deficiencies in the Natural Gas Policy Act of 1978, to protect natural gas consumers from price increases because of current distortions in the regulated market for natural gas, to provide for a free market for natural gas, to permit natural gas contracts to reflect the change from a regulated to a free market, to eliminate incremental pricing requirements for natural gas, to eliminate certain fuel use restrictions, and for other purposes; to the Committee on Energy and Natural Resources.

NATURAL GAS CONSUMER REGULATORY REFORM AMENDMENTS OF 1983

● Mr. McCLURE. Mr. President, today I am introducing the administration's natural gas bill, which was transmitted to the Congress a few hours ago.

Mr. President, during the past 2 years, average prices of natural gas have increased rapidly, with the result that financial hardships have been imposed on large numbers of gas consumers in many parts of the country. Furthermore, serious gas marketing distortions have occurred within the natural gas industry. Some pipelines have been compelled to buy too much high-priced gas, and there are severe inequities in the pricing of gas among various regions of the country. These distortions are being criticized extensively by a wide spectrum of gas consumers, distributors, pipelines, and producers. We cannot permit these conditions to continue, Mr. President. I am convinced that the Congress must act, as soon as possible, to restrain retail gas price increases and to correct the current distortions in the natural gas markets.

The administration bill contains all of the elements needed to achieve those two basic goals, as well as the equally important objective of insuring that gas shortages do not occur in the late 1980's. The bill would allow the free market to operate to provide natural gas at the lowest competitive price, while providing solutions for most of the distortions which regulation has introduced into the marketing system. It would also provide a very strong consumer protection feature in insuring that, during the transition to free market pricing, the basic wholesale price of natural gas cannot rise in real terms except after careful scrutiny and justification.

The bill would establish a true free market price and would allow the market some latitude to operate. The bill would accomplish this by allowing complete freedom both as to terms and as to price on all new contracts for natural gas and on all renegotiated contracts. Because these contracts can be freely signed, there should be an appropriate balance of terms and prices between the various parties. In light of current market conditions, it appears that these new free market contracts are likely to be at or below some of the prices now being charged for regulated gas.

Consumers would gain an immediate benefit from this new free market price because that price would serve as an additional ceiling on regulated prices which have not yet been renegotiated. In other words, if the current regulated price is below the free market average, it remains subject to the Natural Gas Policy Act ceilings. However, if the regulated price is higher than the new free market average, then the regulated price is reduced to that average until or unless the contract is renegotiated.

In addition, parties to current contracts would have an immediate incentive to renegotiate their contracts, because the bill provides that on January 1, 1985, any contract that has not been renegotiated may be abrogated at the request of either party. The bill also provides that natural gas sellers not bound by contract may sell their gas directly to any purchaser, and interstate pipelines would be required

to furnish transportation when they have available capacity.

The bill contains several mechanisms that would provide consumer protection during the transition to free market pricing. These include reducing all pipeline take-or-pay obligations to 70 percent. If a pipeline exercises its option to change its contract, it runs the risk that the seller may sell the gas elsewhere, with the pipeline being required to furnish transportation at a modest profit. This provision should insure a reasonable bargaining relationship between the two parties, and it would also allow pipelines who have improvidently entered into excessive take-or-pay requirements some opportunity to reduce those obligations.

The bill contains two additional consumer protection features. First, it would limit the price increases that would result from applying indefinite price escalator clauses. Price increases under such clauses could not exceed the free market price ceiling. Second, there have been allegations of problems because of pipelines dealing more favorably with their own affiliates or company divisions than with outsiders. The bill would require that a pipeline take gas from itself or its affiliates at rates no higher than its rate of take from others at a cheaper price. This insures equitable treatment of all producers, and it would protect consumers.

Mr. President, in my judgment, the key feature of the administration bill is that it would permit gas producers and pipelines, through the process of renegotiating and terminating contracts, to receive market signals and to make the necessary adjustments in prices, purchases and sales. By relying on the free market to establish the lowest possible competitive prices, the administration has wisely refrained from choosing the alternative approach that has proven to be unfair and unworkable—the setting of wellhead price ceilings by the Congress and the Federal Energy Regulatory Commission.

The administration bill is comprehensive and reasonably balanced, and it represents a solid first step in the development of final legislation. That process will begin next week, when the Committee on Energy and Natural Resources holds hearings on the bill on March 9–12, 1983.

Mr. President, I ask unanimous consent that the following documents be printed in the RECORD: The President's statement of February 28, 1983, transmitting the legislation; the text of the President's radio address to the Nation of February 26, 1983; the bill; the section-by-section analysis; the DOE executive summary of the legislation; and the DOE factsheet for the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
February 28, 1983.

STATEMENT BY THE PRESIDENT

It is a pleasure today to do what we long have anticipated: to send to Congress our proposal for correcting problems that have resulted from excessive regulation of the natural gas market. Our goal must be to obtain an adequate supply of natural gas at a reasonable price. Anything less is not sufficient and will not solve the problems currently faced by many Americans who depend on natural gas.

In recent months, thousands of people have written to me, to Members of Congress and to State and local officials expressing their distress about rapidly rising natural gas bills. Some areas of the country have been especially hard hit. It is clear that consumers are being poorly and unfairly served by the existing regulatory system—a system which prevents natural gas producers and their customers from establishing contracts that respond to market forces, including downward pressure on prices that otherwise would occur as a result of plentiful gas supplies and declining oil prices. There is widespread agreement that something must be done to relieve the regulatory straight jacket in which the natural gas market now operates.

The proposal I am submitting to the Congress today will achieve the needed result. It is not a partisan plan, nor does it resort to seemingly simple "quick fixes," which would turn out to be neither simple nor quick and ultimately would not fix the problems. Instead, our approach is a comprehensive proposal that can—and I believe will—be supported by Congressmen and Senators of both parties and will be beneficial to the consumers they represent.

Our legislative package will allow, but not require, the parties to negotiate toward a free market, so that there will be real and long-term incentives to produce and market abundant gas supplies at the lowest possible cost. In this regard, I note the declines in gasoline and home heating oil prices that have occurred since we deregulated oil two years ago.

Although we believe free markets not only can, but will, achieve these results, the American consumer need not take this on faith alone. To assure that the consumer is protected, I have insisted on a provision which reverses the present law by providing that, untill 1986, there will be a moratorium on the automatic pass-through of increased gas costs other than those increases attributable to inflation, which as you know has been declining steadily.

We believe these ideas offer the best achieveable combination of consumer protection and efficient, economic use of our valuable gas resources. I look forward to working closely with the Congress to obtain passage of this urgently needed legislation without delay.

THE WHITE HOUSE,
February 26, 1983.

RADIO ADDRESS OF THE PRESIDENT TO THE NATION

The PRESIDENT: My fellow Americans, today I'd like to talk to you about a subject that touches on all of us one way or another in our homes, schools and work places and in the overall economy. I want to talk about one of our major energy sources—natural gas—and what this administration proposes to do to ensure abundant supplies of it at reasonable prices.

As the situation stands now, the American consumer is being hurt by government regulations that actually contribute to higher gas bills. We want to change that. Now, I know all too well that energy is a subject that some people in public life just can't resist playing politics with. It's unfortunate, but I guess it's a fact of life, or at least a fact of life as we know it in Washington, which can be pretty different from hometown America.

Many of you, I'm sure, recall the howls that went up when we acted to deregulate oil prices two years ago. Remember how you were told that deregulation would lead to skyrocketing prices for the gasoline that fuels millions of American cars or the oil that heats millions of American homes? Well, the evidence is in. And the doomsayers were dead wrong.

You don't have to go any further than the nearest filling station to see that prices have gone down, not up since decontrol, just as we promised they would. The economic realities of the marketplace have done more to bring down the price of oil than all those years of frenetic government regulating.

I think there's a lesson here for all of us and one that goes a lot deeper than the price of energy. Way back in 1824, Thomas Jefferson wrote about the difference between two kinds of political mentalities. Both of them are still very much with us today. Here's what Jefferson said about them. "Men by their constitutions are naturally divided into two parties—those who fear and distrust the people and wish to draw all powers from them and those who identify themselves with the people and have confidence in them."

Now, the vast majority of us identify with the second group, the one that believes in trusting the wisdom of the people rather than taking power away from them and concentrating it in the other hands. On a more personal level, anyone who's ever wrestled with a tax form or had to make sense out of a complicated bureaucratic regulation knows how costly and time-consuming government over-regulation can be.

And that brings me back to regulation, in this case regulation of natural gas. I'm convinced, and I believe that the evidence backs me up that just as deregulation of oil has led to a better deal for the American consumer, a freer market in natural gas will have the same beneficial effect for you. So, next week I'm sending the Congress a proposal for correcting the problems that have resulted from past excessive regulation of the natural gas market.

While I'm taking this step out of a deep belief in the principle involved, there are human reasons as well. In recent months, thousands of you have written to me, to members of Congress, and to state and local officials expressing your distress about rapidly rising natural gas bills. Some areas of the country have been especially hard-hit and it's clear that consumers are being poorly and unfairly served by the existing regulatory system.

That system prevents natural gas producers and their customers from entering into contracts that respond to market forces including pressure for lower prices that are now possible due to plentiful gas supplies and declining oil prices. Today there's a surplus of natural gas and oil prices are dropping. These factors normally would result in lower natural gas prices. But the regulatory morass has kept the marketplace from achieving lower natural gas prices. In sharp contrast, the Department of Energy esti-

mates that if our proposal is enacted, natural gas prices will drop by at least 10 to 30 cents per thousand cubic feet in the first year.

The measure I will submit to the Congress is not a partisan plan and it resorts to no quick political fixes. Instead our approach is a comprehensive proposal that can and I believe will be supported by Congressmen and Senators of both parties and will benefit the consumers they represent.

Basically, out legislative package will allow a freer market for natural gas so that there will be real and long-term incentives to produce and market abundant gas supplies at the lowest possible cost, just as gasoline and home heating oil prices have declined since we deregulated oil. Although we believe free markets not only can but will achieve these results, we aren't asking you, the consumer, to take that on faith. To assure that consumers are protected, I have insisted on a provision which reverses the present law and provides that until 1986, there will be a moratorium on the automatic pass-through to consumers of increased gas costs by the gas pipelines other than those caused by inflation which, as you know, has been declining steadily.

The key to cheaper, more abundant energy for all Americans is a policy that combines consumer protection, incentives to produce, and efficient economic use of our resources. That's what our program will do. And I look forward to working closely with members of both parties in the Congress to obtain its passage without delay.

Until next week, thanks for listening and God bless you.

S. 615

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Natural Gas Consumer Regulatory Reform Amendments of 1983".

TABLE OF CONTENTS

TITLE I—PURCHASED GAS COST

Sec. 101. Purchased Gas Cost.

TITLE II—REMOVAL OF WELLHEAD PRICE CONTROLS AND REPEAL OF JURISDICTION OVER CERTAIN FIRST SALES

Sec. 201. Removal of Wellhead Price Controls.
Sec. 202. Repeal of Natural Gas Act Jurisdiction Over First Sales of Committed or Dedicated Natural Gas.
Sec. 203. Repeal of Provisions Allowing Reimposition of Price Controls and Report to Congress.

TITLE III—TRANSITIONAL PRICE AND CONTRACT PROVISIONS

Sec. 301. Limitation on Ceiling Prices for Natural Gas.
Sec. 302. Repeal of Certain Contract Requirements and Imposition of Take-or-Pay Limits.
Sec. 303. Market-Out Provision.
Sec. 304. Effect of Gas Cap Price.

TITLE IV—REMOVAL OF IMPEDIMENTS TO INTERSTATE MOVEMENTS OF GAS

Sec. 401. Authorization of Certain Interstate Sales, Transportation and Assignments.
Sec. 402. Access to Interstate Supply Sources.
Sec. 403. Contract Carrier Authorization.

TITLE V—REPEAL OF CERTAIN RESTRICTIONS ON NATURAL GAS AND PETROLEUM USE AND PRICING

Sec. 501. Repeal of Certain Sections of the Powerplant and Industrial Fuel Use Act of 1978.
Sec. 502. Conforming Amendments.
Sec. 503. Repeal of Incremental Pricing Requirements.

TITLE I—PURCHASED GAS COST

PURCHASED GAS COST

SEC. 101. (a) Title VI of the Natural Gas Policy Act of 1978 (15 U.S.C. 3431 et seq.) is amended by adding a new section 603 to read as follows:

"SEC. 603. LIMITATION ON THE PASSTHROUGH OF CERTAIN PURCHASED GAS COSTS.

"(a) LIMITATION ON PURCHASED GAS ADJUSTMENTS.—Notwithstanding section 601(c) of this Act, for purposes of sections 4 and 5 of the Natural Gas Act, from the first day of the first month following enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 through December 31, 1985, the part of a pipline's rate that reflects purchased gas costs may not exceed its allowed rate for purchased gas cost, except as provided in subsection (b).

"(b) RECOVERY OF ADDITIONAL PURCHASED GAS COST.—A pipeline may file an application under this subsection with the Commission to increase its rates to reflect any purchased gas cost that subsection (a) of this section prevents it from recovering. Notwithstanding section 4(e) of the Natural Gas Act, no increase to the rates of a pipeline that may be recovered under this subsection may go into effect unless the Commission, after opportunity for hearing, issues an order that grants the application, in whole or in part, with such modifications and upon such terms and conditions as the Commission may find necessary and appropriate. The proceeding under this subsection shall be conducted by the Commission separately from proceedings on other rate applications that are filed under section 4 of the Natural Gas Act. In any such proceeding, the Commission shall allow recovery if it determines that the costs sought to be recovered were just, reasonable, and prudently incurred. In making this determination, the Commission shall consider the reasonable availability of lower cost supplies to the pipeline and the necessity of such costs for the pipeline to render adequate service to its existing customers. Within sixty days of the date of the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983, the Commission shall prescribe rules for applications under this subsection. These rules shall facilitate expeditious decisions on these applications.

"(c) DEFINITIONS.—

"(1) ALLOWED RATE FOR PURCHASED GAS.—The term "allowed rate for purchased gas" means, for a particular pipeline, for a particular month, the pipeline's average cost per million Btu's for purchased gas delivered to the pipeline during the month preceding the enactment of the Natural Gas Consumer Regulatory Reform Act of 1983 plus the adjustment amount for that particular month.

"(2) ADJUSTMENT AMOUNT.—The term "adjustment amount" means, for a particular month, the difference between the national rate and the adjusted national rate for that particular month.

"(3) NATIONAL RATE.—the term "national rate" means the national average cost per million Btu's for purchased gas delivered to all interstate pipelines during the month preceding the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983.

"(4) ADJUSTED NATIONAL RATES.—The term "adjusted national rate" means—

"(A) for the month in which the Natural Gas Consumer Regulatory Reform Amendments of 1983 is enacted, the national rate multiplied by the annual inflation adjustment factor (as defined in section 101(a) of this Act) for that month; and

"(B) for any particular succeeding month, the adjusted national rate for the preceding month multiplied by the annual inflation factor (as defined in section 101(a) of this Act) for that particular month.

"(d) REPORTING REQUIREMENT.—By the fifth day following the enactment of the Natural Gas Consumer Regulatory Reform Amendment of 1983, each interstate pipeline shall report its average cost per million Btu's for purchased gas delivered to it during the month preceding the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 and the volume of purchased gas delivered to it during that month.

"(e) PUBLICATION.—The Commission shall compute and publish the adjustment amount for each month at least five days before the beginning of that month.

"(f) AFFILIATED PRODUCTION.—No interstate pipeline may recover any costs associated with its own production or purchases from any affiliated producer to the extent such production or purchases were not reduced to a percentage of deliverability no higher than the percentage of deliverability to which the pipeline had exercised contemporaneously a contractual right to reduce its takes of less expensive gas."

(b) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by inserting after the item relating to section 602 the following:

"Sec. 603. Purchased Gas Cost."

TITLE II—REMOVAL OF WELLHEAD PRICE CONTROLS AND REPEAL OF JURISDICTION OVER CERTAIN FIRST SALES

REMOVAL OF WELLHEAD PRICE CONTROLS

SEC. 201. Section 121 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3331) is amended to read as follows:

"SEC. 121. ELIMINATION OF PRICE CONTROLS FOR CERTAIN NATURAL GAS SALES.

"(a) GENERAL RULE.—The provisions of subtitle A respecting the maximum lawful price for any first sale of natural gas shall cease to apply to any first sale of natural gas subject to any contract that was executed or amended after the date of enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983, unless the contract specifically provides that the contract shall not operate to terminate the application of subtitle A.

"(b) HIGH-COST NATURAL GAS.—Except as provided in subsection (a) of this section, with respect to the first sale of high-cost natural gas which is described in section 107(c) (1), (2), (3), or (4)—

"(1) beginning on the effective date of the incremental pricing rule required under section 201, the provisions of subtitle A respecting the maximum lawful price for the first sale of natural gas shall cease to apply; and

"(2) beginning on the date of enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 through December 31, 1985, the price shall not exceed

the higher of the contract price on the date of the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 or the gas cap price, if published, for the month during which the gas is delivered.

"(c) SPECIAL RULE FOR CERTAIN GAS.—Except as provided in subsection (a), with respect to the first sale of gas covered by this subsection,—

"(1) beginning January 1, 1985, the provision of subtitle A respecting the maximum lawful price shall cease to apply; and

"(2) beginning January 1, 1985, through December 31, 1985, the price shall not exceed the gas cap price for the month during which the gas is delivered.

"(3) GAS COVERED BY THIS SUBSECTION.—This subsection applies to—

"(A) new natural gas (as defined in section 103(c));

"(B) natural gas produced from any new, onshore production well (as defined in section 103(c)), if such natural gas—

"(i) was not committed or dedicated to interstate commerce on April 20, 1977; and

"(ii) is produced from a completion location which is located at a depth of more than 5,000 feet; and

"(C) natural gas sold under an existing contract, any successor to an existing contract, or any rollover contract, if—

"(i) such natural gas was not committed or dedicated to interstate commerce on the day before the day of the enactment of this Act; and

"(ii) the price paid for the last deliveries of such natural gas occurring on December 31, 1984, or, if no deliveries occurred on such date, the price that would have been paid had deliveries occurred on such date is higher than $1.00 per million Btu's.

"(d) REMOVAL OF WELLHEAD PRICE CONTROLS ON ALL NATURAL GAS.—Except as provided in subsections (a), (b), or (c), beginning January 1, 1986, the provisions of subtitle A respecting maximum lawful price shall cease to apply to the first sale of any natural gas."

REPEAL OF NATURAL GAS ACT JURISDICTION OVER FIRST SALES OF COMMITTED OR DEDICATED NATURAL GAS

SEC. 202. Section 601(a)(1)(B) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3431(a)(1)(B)) is amended to read as follows:

"(B) COMMITTED OR DEDICATED NATURAL GAS.—Effective on January 1, 1985, for the purposes of section 1(b) of the Natural Gas Act, the provisions of such Act and the jurisdiction of the Commission shall not apply solely by reason of any first sale of natural gas which was committed or dedicated to interstate commerce as of the day before the date of enactment of this subsection. Effective on the date of enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 through December 31, 1984, for the purposes of section 1(b) of the Natural Gas Act, the provisions of such Act and the jurisdiction of the Commission under such Act shall not apply solely by reason of any first sale of natural gas which is committed or dedicated to interstate commerce as of the day before the day of enactment of this Act and which is—

"(i) high-cost natural gas (as defined in section 107(c) (1), (2), (3), or (4) of this Act);

"(ii) new natural gas (as defined in section 102(c) of this Act);

"(iii) natural gas produced from any new, onshore production well (as defined in section 103(c) of this Act);

"(iv) natural gas exempted from the operation of subtitle A of title I pursuant to section 121(a); or

"(v) natural gas that was subject to a contract that expired, lapsed, was terminated pursuant to its own terms, or was terminated pursuant to the provisions of section 316 of this Act."

REPEAL OF PROVISIONS ALLOWING REIMPOSITION OF PRICE CONTROLS AND REPORT TO CONGRESS

SEC. 203. (a) Sections 122, 123, and 507 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3332, 3333, and 3417) are repealed.

(b) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by striking the items relating to sections 122, 123, and 507.

TITLE III—TRANSITIONAL PRICE AND CONTRACT PROVISIONS LIMITATION ON CEILING PRICES FOR CERTAIN NATURAL GAS

SEC. 301. (a) Title I of the Natural Gas Policy Act of 1978 (15 U.S.C. 3311-3333) is amended by adding the following new section:

"SEC. 111. LIMITATION ON CEILING PRICES FOR CERTAIN NATURAL GAS.

"(a) GENERAL RULE.—Except as provided in section 121 of this Act, beginning on the date of enactment of this section, the maximum lawful price of any first sale of natural gas subject to this subtitle shall not exceed the lower of the applicable price as calculated pursuant to sections 102 through 106, 108, and 109 or the gas cap price, if published, for the month during which the gas is delivered.

"(b) SPECIAL RULE FOR SECTION 107(c)(5) GAS.—Except as provided in section 121 of this Act, beginning on the date of the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983, the maximum lawful price for gas described in subsection (c)(5) of section 107 of this Act shall be no higher than the maximum lawful price for such gas during the month in which the Natural Gas Consumer Regulatory Reform Amendments of 1983 are enacted.

"(c) DEFINITION OF GAS CAP PRICE.—The term "gas cap price" means, for a particular month, the volume-weighted average price of natural gas that is estimated to be—

"(1) delivered during the second, third, and fourth months preceding that particular month; and

"(2) delivered during the first three months of deliveries under a contract filed under subsection (e) of this section.

"(d) CALCULATION AND PUBLICATION OF THE GAS CAP PRICE.—Beginning with the fourth month after enactment of the Natural Gas Consumer Regulatory Amendments of 1983, the Commission (in accordance with section 101(a)(6) of this subtitle) shall compute and publish the gas cap price for each month through December 1985.

"(e) FILING REQUIREMENT.—A purchaser of natural gas subject to a first sale contract executed or amended on or after the date of the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 shall file with the Commission within five days of the date on which the contract is executed or amended—

"(1) a summary of the contract and all ancillary agreements, including all pricing provisions;

"(2) the prices to be paid under the contract during the first three months of deliveries;

"(3) the estimated volumes (in millions of Btu's) to be delivered during the first year of the contract; and

"(4) any additional data required by the Commission.

This filing requirement does not apply in the case of an amendment of a contract for which data previously relating to price has been filed with the Commission under this subsection.

"(f) COMMISSION RULES.—Within thirty days of the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983, the Commission shall issue rules to implement this section."

(b) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by inserting after the item relating to section 110 the following:

"Sec. 111. Limitation on Ceiling Prices for Certain Natural Gas."

(c) Section 101(b)(5) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3311(b)(5)) is amended by striking the period at the end and inserting the following:

", but in no event shall the operation of this paragraph be deemed to entitle any seller to collect a price in excess of that established pursuant to section 111."

(d) Section 105(b)(3)(B) of the Natural Gas Policy Act of 1978 is amended by adding a new sentence at the end to read as follows:

"This definition shall not include any clause which establishes the price for natural gas exempted from the operation of this subtitle pursuant to section 121(a)."

REPEAL OF CERTAIN CONTRACT REQUIREMENTS AND IMPOSITION OF TAKE-OR-PAY LIMITS

SEC. 302. (a) Section 315 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3375) is repealed, and a new section 315 is inserted in its place to read as follows:

"SEC. 315. IMPOSITION OF TAKE-OR-PAY LIMITS.

"(a) GENERAL RULE.—In the case of any first sale contract in effect on the date of enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983, which has not been amended subsequent to the date of enactment, and which contains a clause requiring a purchaser to take delivery of, or if not taken, to pay for, volumes of gas in excess of 70 percent of available deliverability from those wells included under a contract, the purchaser may exercise without obligation to pay for volumes not taken in excess of 70 percent of well deliverability, a right not to accept delivery of any portion of the total volume which exceeds 70 percent of well deliverability. This right applies only to deliveries under a contract from the date of enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 through December 31, 1985.

"(b) NOTICE REQUIREMENT.—Any purchaser electing to reduce volumes purchased pursuant to this section must give the seller a minimum of thirty days written notice prior to the date of delivery of the natural gas involved.

"(c) RELEASE OF CONTRACTUAL OBLIGATIONS.—Upon receipt of the notice provided for in subsection (b), the seller shall have the right to terminate the contract with respect only to amounts not taken by reason of this section. If the seller elects to terminate the contract in accordance with this section, the purchaser shall tender to the seller full and unconditional release from all duties and obligations in contract or in law. The purchaser, if a transporter of natural

gas, shall tender transportation in accordance with the provisions of section 316(d) of this Act.

"(d) DRAINAGE SITUATIONS.—The Commission, by rule or order, may determine that this section shall not apply to the extent the production of the volume for which delivery is required to be taken is necessary in order to prevent drainage and protect the correlative rights of the person producing the natural gas involved.

"(e) CASINGHEAD NATURAL GAS.—This section shall not apply to casinghead natural gas.

"(f) CONTRACTS COVERING MORE THAN ONE CATEGORY OF NATURAL GAS.—For purposes of this section, any contract establishing two or more categories of natural gas for purposes of pricing the natural gas delivered under the contract shall be treated as separate contracts for each such category.

(b) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by striking the item relating to section 315 and inserting in its place the following:

"Sec. 315. Imposition of Take-or-Pay Limits."

MARKET-OUT PROVISION

SEC. 303. (a) Title III of the Natural Gas Policy Act of 1978 (15 U.S.C. 3361-3375) is amended by adding a new section 316 to read as follows:

"SEC. 316. MARKET-OUT PROVISION.

"(a) GENERAL RULE.—Beginning January 1, 1985, either party to a contract for the first sale of natural gas which was in effect on the date of enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983 and which contract was not thereafter amended shall have the right to terminate the contract under the following conditions:

"(1) The party wishing to terminate the contract must give notice to the other party between November 16, 1984, and November 15, 1985, and at least 45 days in advance, that the contract is to be terminated;

"(2) the party giving notice of termination does not materially breach the contract at any time prior to the end of the notice period; and

"(3) the party giving notice of termination must offer to the other party a full and unconditional release from all future duties and obligations in contract or in law relating to the contract, which release is effective upon termination of the notice period.

"(b) EFFECT OF SECTION 315 REDUCTION.—A reduction of a take-or-pay obligation pursuant to section 315 of this Act shall not be considered an amendment for purposes of subsection (a) of this section.

"(c) OBLIGATIONS OF PARTIES UPON TERMINATION.—Neither party to a contract terminated pursuant to this section shall have an obligation to perform any act because of the contract on and after the effective date of the termination of the contract, except that a party that has received a good or service under the contract before the effective date of its termination shall have a duty to pay for that good or service as provided for in the contract and that a party that has received payment under the contract for a good or service that was not provided before the effective date of its termination shall have a duty to make restitution of the payment in cash or in kind in accordance with the contract.

"(d) TRANSPORTATION OBLIGATION.—

"(1) IN GENERAL.—In the event that a contract is terminated under this section, a pipeline that was a party to the terminated contract shall have an obligation to transport natural gas for a producer that was a party to the terminated contract. The obligation of the pipeline shall not exceed on an annual basis the largest volume delivered under the contract during any twelve consecutive months in the thirty-six months prior to its termination.

"(2) LIMITATION OF OBLIGATION.—The Commission, or in the case of an intrastate pipeline the State agency with jurisdiction over that pipeline, upon application by the pipeline and after opportunity for hearing, may order a limitation of the obligation of the pipeline under this subsection if compliance with the obligation would require construction of additional facilities or would impair the ability of the pipeline to render adequate service to its existing customers.

"(3) CONSIDERATION.—The consideration for any transportation provided under this subsection shall be $.05 per million Btu's plus the cost of such transportation, as established by the appropriate State or Federal regulatory body, unless the Commission has established, by rule, a different rate as just compensation for such transportation. No amount of such consideration shall be required to be credited and flowed back to the customers of such pipeline."

(b) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by inserting after the item relating to section 315 the following:

"Sec. 316. Market-Out Provision."

EFFECT OF GAS CAP PRICE

SEC. 304. (a) Title III of the Natural Gas Policy Act of 1978 (15 U.S.C. §§ 3361-3375) is amended by adding a new section 318 to read as follows:

"SEC. 318. EFFECT OF GAS CAP PRICE.

"(a) PRICE ESCALATOR CLAUSES.—Except for natural gas described in section 107 of this Act, no price escalator clause may operate to establish a price for natural gas which is subject to the provisions of subtitle A respecting the maximum lawful price for the first sale of natural gas higher than the gas cap price. For purposes of this subsection, the term "price escalator clause" means any contract clause that provides for a periodic price increase, either on a fixed or indefinite basis, or that references other natural gas prices, Federally imposed price ceilings, or prices of other commodities.

"(b) AREA RATE CLAUSES.—For purposes of an area rate clause, the gas cap price is a Federally established rate or price. After December 31, 1985, the gas cap price for December 1985 is a Federally established rate or price."

(b) The table of contents of the Natural Gas Policy Act of 1978 (U.S.C. 3301 note) is amended by inserting after the item relating to section 317 the following:

"Sec. 318. Effect of Gas Cap Price."

TITLE IV—REMOVAL OF IMPEDIMENTS TO INTERSTATE MOVEMENTS OF GAS

AUTHORIZATION OF CERTAIN INTERSTATE SALES, TRANSPORTATION AND ASSIGNMENTS

SEC. 401. (a) Section 311(a) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3371(a)) is amended by—

(1) amending subparagraph (A) of paragraph (1) to read as follows:

"(A) IN GENERAL.—The Commission may, by rule or order, authorize any interstate pipeline to transport natural gas on behalf of any person."

(2) inserting "AND LOCAL DISTRIBUTION COMPANIES" after "INTRASTATE PIPELINES" in the paragraph (2) heading;

(3) inserting in paragraph (2) "or local distribution company" after "intrastate pipeline";

(4) amending subparagraph (A) of paragraph (2) to read as follows:

"(A) IN GENERAL.—The Commission may, by rule or order, authorize any intrastate pipeline or local distribution company to transport natural gas on behalf of any person."

(5) in subparagraph (B)(ii) (I) and (II) of paragraph (2), inserting "or company" after "pipeline".

(b) Section 311(b) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3371(b)) is amended by—

(1) amending paragraph (1) to read as follows:

"(1) IN GENERAL.—The Commission may, by rule or order, authorize any pipeline or local distribution company to sell natural gas to any pipeline or local distribution company."

(2) amending paragraph (2) by—

(A) striking "MAXIMUM FAIR AND EQUITABLE PRICE" after the subparagraph designator "A" and inserting in its place "INTRASTATE PIPELINES AND LOCAL DISTRIBUTION COMPANIES";

(B) inserting "or local distribution company" following "pipeline" and "or local distribution company's" following "pipeline's" wherever they appear; and

(C) inserting "(including storage)" after "transportation" in clause (i) of subparagraph (B);

(D) adding a new subparagraph (D) to read as follows:

"(D) INTERSTATE PIPELINES.—The rates and charges of any interstate pipeline with respect to any sales authorized under subsection (b)(1)(A) shall be just and reasonable (within the meaning of the Natural Gas Act).";

(3) in paragraph (4), striking "pipeline's" and inserting in its place "seller's," and striking "INTRASTATE" in the heading and inserting in its place "EXISTING;"

(4) in paragraphs (4)-(7), except for subparagraph (5)(a)(i), striking "intrastate pipeline" or "pipeline" wherever they appear and inserting in their place "seller;"

(5) in paragraph (5)(A)(i), striking "interstate pipeline or local distribution" and inserting in its place "purchasing;" and

(6) adding a new paragraph (8) to read as follows:

"(8) DEFINITION OF SELLER.—For purposes of this subsection, the term 'seller' means any person that sells gas under paragraph (b)(1)."

(c) Section 312 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3372) is amended—

(1) by amending subsection (a) to read as follows:

"(a) AUTHORIZATION OF ASSIGNMENTS.—The Commission may, by rule or order, authorize a pipeline or local distribution company to assign, without compensation, to any other pipeline or local distribution company, all or any portion of the assignor's right to receive surplus natural gas at any first sale, upon such terms and conditions as the Commission determines appropriate."; and

(2) by amending subsection (c) to read as follows:

"(c) SURPLUS NATURAL GAS.—For purposes of this section, the term 'surplus natural gas' means, with respect to any pipeline or local distribution company, any natural gas

which exceeds the then current demands of such person for natural gas, as determined by—

"(1) the Commission, or

"(2) the State agency having regulatory jurisdiction over that person."

ACCESS TO INTERSTATE SUPPLY SOURCES

SEC. 402. (a) Section 314 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3374) is amended by—

(1) striking "first" in subsection (a), and

(2) amending subsection (b) to read as follows:

"(b) NATURAL GAS COVERED BY THIS ACT.—For purposes of subsection (a), the term 'natural gas covered by this Act' means—

"(1) for any first sale contract, natural gas—

"(A) which is not subject to the jurisdiction of the Commission under the Natural Gas Act by reason of section 601(a)(1) (A) or (B);

"(B) the sale in interstate commerce of which—

"(i) is authorized under section 302(a) or 311(b); or

"(ii) is pursuant to an assignment under section 312(a); or

"(C) the transportation in interstate commerce of which is—

"(i) pursuant to any order under section 302(c) or section 303(b), (c), (d), or (h), or

"(ii) authorized by the Commission under section 311(a); or

"(2) for any contract, natural gas the sale of transportation of which under the contract is not in interstate commerce by reason of section 601(d) of this Act."

"(b) Section 601 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3431) is amended by adding new subsections (d) and (e) to read as follows:

"(d) LIMITATION OF COMMISSION JURISDICTION OVER INTRASTATE TRANSACTIONS.—

"(1) GENERAL RULE.—No intrastate pipeline or local distribution company shall be subject to the jurisdiction of the Commission under the Natural Gas Act by reason of purchasing natural gas in a covered transaction.

"(2) SUBSEQUENT TRANSACTIONS.—Any transportation or sale of natural gas purchased in a covered transaction which occurs beyond the point at which such gas is received in the facilities of the purchaser in the covered transaction shall not be in interstate commerce (within the meaning of the Natural Gas Act) and shall not be subject to the jurisdiction of the Commission under the Natural Gas Act to the extent that such gas remains in the State of purchase.

"(3) NATURAL-GAS COMPANY.—For purposes of the Natural Gas Act, the term "natural-gas company" (as defined in section 2(6) of that Act) shall not include any person by reason of, or with respect to, any transportation or sale of natural gas if the transportation or sale is not subject to the jurisdiction of the Commission solely by reason of paragraph (2) of this subsection.

"(4) STATE OF PURCHASE RULE.—For purposes of this subsection, natural gas shall be deemed to remain in the State of purchase if the gas is not transported outside the State in which it was received into the facilities of the purchaser of the gas in a covered transaction, unless such transportation occurs in connection with—

"(A) transportation authorized under sections 302(a) or 311(a) of this Act, or

"(B) a sale or assignment authorized under sections 311(b) or 312 of this Act.

"(5) DEFINITION OF COVERED TRANSACTION.—For purposes of this subsection, the term "covered transaction" means—

"(A) a first sale of gas—

"(i) which is not subject to the jurisdiction of the Commission under the Natural Gas Act by reason of subparagraphs (A) or (B) of paragraph (1) of subsection (a),

"(ii) which is produced on the outer Continental Shelf, or

"(iii) which is transported pursuant to an order issued under section 317 of this Act;

"(B) a sale or assignment authorized under sections 302(a), 311(b), or 312(a) of this Act; or

"(C) a sale for resale by any person not subject to the jurisdiction of the Commission solely by reason of section 1(c) of the Natural Gas Act.

"(e) NONDISCRIMINATION PROVISION.—The Commission may not condition or deny any authorization of the sale or transportation of natural gas under this Act or the Natural Gas Act on the basis of whether gas is consumed in the interstate market or the intrastate market."

CONTRACT CARRIER AUTHORIZATION

SEC. 403. (a) Title II of the Natural Gas Policy Act of 1978 (15 U.S.C. 3361-3375) is amended by adding a new section 317 to read as follows:

"SEC. 317. CONTRACT CARRIER AUTHORIZATION.

"(a) IN GENERAL.—Upon application by a producer of natural gas or by a purchaser of natural gas from a producer, the Commission shall order any interstate pipeline to carry gas under contract between producer and purchaser upon such terms and subject to such conditions as it considers just and reasonable if the Commission finds that such pipeline has available capacity, that no undue burden will be placed upon such pipeline, that no construction of new facilities would be required, and that such order would not impair the ability of such pipeline to render adequate service to its existing customers. The Commission may implement this section by rule or order.

"(b) CONSIDERATION.—The consideration for any transportation provided under this section shall be $.05 per million Btu's plus the cost of such transportation, as established by the Commission, unless the Commission has established, by rule, a different rate as just compensation for such transportation. No amount of such consideration shall be required to be credited and flowed back to the customers of such pipeline."

(b) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by inserting after the item relating to section 316 the following:

"Sec. 317. Contract Carrier Authorization."

TITLE V—REPEAL OF CERTAIN RESTRICTIONS ON NATURAL GAS AND PETROLEUM USE AND PRICING

REPEAL OF CERTAIN SECTIONS OF THE POWERPLANT AND INDUSTRIAL FUEL USE ACT OF 1978

SEC. 501. (a) The following sections of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 et seq.) are repealed:

(1) sections 102(a)(16), (a)(18), (a)(19), and (a)(29) (42 U.S.C. 8302 (a)(16), (a)(18), (a)(19,) and (a)(29));

(2) sections 201 and 202 (42 U.S.C. 8311 and 8312);

(3) section 302 (42 U.S.C. 8342);

(4) section 401 (42 U.S.C. 8371);

(5) section 402 (42 U.S.C. 8372); and

(6) section 405 (42 U.S.C. 8375).

(b) The table of contents in section 101(b) of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301(b)) is amended by striking the items relating to the sections repealed by subsection (a) of this section.

CONFORMING AMENDMENTS

SEC. 502. (a) Section 102 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301) is amended by striking "and major fuel-burning installations" and "and new" wherever these phrases appear.

(b) Section 103 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8302) is amended—

(1) in subsections (a)(13)(B), by—

(A) striking clause (ii)(III);

(B) striking "; or" at the end of clause (ii)(II), and inserting a period in its place; and

(C) inserting "and" at the end of clause (ii)(I);

(2) in subsection (a)(15), by striking "or major fuelburning installation" and "or new" wherever these phrases appear;

(3) in subsection (a)(20), by striking "or major fuelburning installation";

(4) by redesignating subsections (a)(17), (a)(20), (a)(21), (a)(22), (a)(23), (a)(24), (a)(25), (a)(26), (a)(27), and (a)(28) as subsections (a)(16), (a)(17), (a)(18), (a)(19), (a)(20), (a)(21), (a)(22), (a)(23), (a)(24), and (a)(25);

(5) in subsection (b), by striking or "major fuelburning installation" wherever this phase appears;

(6) in subsection (b)(1)(D), by striking everything after "synthetic gas involved" and inserting in its place a period; and

(7) by striking subsection (b)(3), and redesignating subsection (b)(4) as subsection (b)(3).

(c) Sgction 104 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8303) is amended to read as follows:

"The provisions of this Act shall apply in all the States, Puerto Rico, and the territories and possessions of the United States."

(d) Section 303 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8343) is amended—

(1) by striking "or installation" and "or installations" wherever the phrases appear;

(2) by striking "or 302" wherever the phrase appears;

(3) by striking subsection (a)(3);

(4) by amending subsection (b)(1) to read as follows:

"(1) The Secretary may prohibit, by rule, the use of natural gas or petroleum under section 301(b) in existing electric powerplants.";

(5) in subsection (b)(3), by striking "or major fuelburning installation"; and

(6) by amending the last sentence of subsection (b)(3) to read as follows:

"Any such rules shall not apply in the case of any existing electric powerplant with respect to which a comparable prohibition was issued by order."

(e) Section 403 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8373) is amended by striking—

(1) in subsection (a)(1), "major fuel-burning installation, or other unit" and the comma immediately preceding this phrase and "installation, or unit" and the comma immediately preceding this phrase;

(2) in subsection (a)(2), "installation, or other unit" and the comma immediately preceding that phrase, and "installation, or unit" and the comma immediately preceding that phrase;

(3) in subsection (a)(2), the last sentence; and

(4) subsection (a)(3).

(f) Section 404 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8374) is amended by striking—

(1) in subsection (c), "new or" in the phrase "applicable to any new or existing electric powerplant"; and

(2) subsection (g).

(g) Section 701 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8411) is amended by striking—

(1) in the last sentence of subsection (b), "or installation";

(2) subsection (c);

(3) in the title of subsection (d), "AND EXEMPTIONS";

(4) in the first sentence of subsection (d)(1), "or any petition for any order granting an exemption (or permit)";

(5) in subsection (d)(1)(B), "or in the consideration of such petition";

(6) in subsection (f), "or a petition for an exemption (or permit) under this Act (other than under section 402 or 404),"; and

(7) subsection (g).

(h) Section 702 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8412) is amended by striking—

(1) in the title of subsection (a), "OR EXEMPTION";

(2) in subsection (a), "or granting an exemption (or permit)";

(3) subsection (b), and redesignating subsection (c) as subsection (b);

(4) in the first sentence of subsection (b)(1) (as redesignated), "or by the denial of a petition for an order granting an exemption (or permit) referred to in subsection (b),";

(5) in the first sentence of subsection (b)(1) (as redesignated), "such rule, order, or denial is published under subsection (a) or (b)" and inserting in its place "such rule, or order is published under subsection (a)";

(6) in the first sentence of subsection (b)(2) (as redesginated), "the rule, order, or denial" and inserting in its place "the rule or order";

(7) in the second sentence of subsection (b)(2) (as redesignated), "(or denial thereof)"; and

(8) in subsection (b)(3) (as redesignated), "any such rule, order, or denial" and inserting in its place "any such rule or order".

(i) Section 711 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8421) is amended by striking in the first sentence of subsection (a), "or major fuel-burning installation".

(j) Section 721 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8431) is amended by striking subsection (c) and redesignating subsection (d) as subsection (c).

(k) Section 723 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8433) is amended by striking subsection (b) and redesignating subsections (c) and (d) as subsections (b) and (c).

(l) Section 731 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8441) is amended by striking—

(1) "or major fuel-burning installation" wherever the phrase appears; and

(2) "title II or" in subsections (a)(1) and (g)(3).

(m) Section 745 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C 8455) is amended by striking in the first sentence of subsection (a), "from new and existing electric powerplants and major fuel-burning installations" and inserting in its place "from existing electric powerplants".

(n) Section 761 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C 8471) is amended by striking—

(1) in subsection (a), "any existing or new electric powerplant or major fuel-burning installation" and inserting in its place "any existing electric powerplant"; and

(2) in subsection (b)—

(1) "new or" in the phrase "In the case of any new or existing facility"; and

(2) "except to the extent provided under section 212(b) or section 312(b)" and the comma immediately preceding that phrase.

REPEAL OF INCREMENTAL PRICING REQUIREMENTS

SEC. 503. (a) Subject to subsections (b) and (c) of this section, title II of the Natural Gas Policy Act of 1978 (15 U.S.C. §§ 3341-3348) is repealed, and the items relating to title II are stricken from the table of contents of that Act.

(b) A rule promulgated by the Commission under title II of the Natural Gas Policy Act of 1978 shall continue in effect only with respect to the flow-through of costs incurred before the enactment of the Natural Gas Consumer Regulatory Reform Amendments of 1983, including any surcharges based on such costs.

(c) The Commission may take appropriate action to implement this section.

SECTION-BY-SECTION—NATURAL GAS CONSUMER REGULATORY REFORM AMENDMENTS OF 1983

TITLE I—PURCHASED GAS COSTS

Section 101 would amend Title VI of the Natural Gas Policy Act of 1978 (NGPA) to add a new section 603, entitled "Limitation on the Passthrough of Certain Purchased Gas Costs." This section would impose a moratorium until 1986 on the automatic passthrough to natural gas customers of price increases that result from an interstate pipeline's paying higher prices for natural gas. A pipeline could increase the price to its customers to reflect higher acquisition costs for natural gas only if the Federal Energy Regulatory Commission ("Commission") approved recovery of such costs after a hearing in which the Commission considered the question of whether these higher costs were just, reasonable, and prudently incurred.

Currently, a pipeline can recover its costs of acquiring natural gas at the wellhead and from other pipelines ("purchased gas costs") by means of either a general rate proceeding or a purchased gas adjustment ("PGA") proceeding. A general rate proceeding reviews all aspects of a pipeline's operation, while a PGA proceeding considers only a pipeline's purchased gas costs. A pipeline can apply in either type of proceeding to raise its rate to reflect increased purchased gas costs and the rate increase can, and in a PGA proceeding usually does, go into effect after a one day suspension, subject to refund if the Commission ultimately determines the change in rate is not just and reasonable. Alternatively, the Commission can suspend the effectiveness of the rate increase for no more than five months, at which time the rate goes into effect subject to refund.

Section 603(a) would prohibit the immediate passthrough of purchased gas costs to the extent such costs have increased at a rate higher than the rate of inflation. Section 603(b) would provide that rate increases prohibited by section 603(a) could not go into effect unless the Commission made an affirmative determination, after providing an opportunity for hearing to interested persons, that the costs were just, reasonable, and prudently incurred. In making this determination the Commission would be required to consider the availability of lower priced gas and the need of the pipeline to acquire the gas in order to render adequate service to its existing customers. The Commission also could consider other factors, including the physical depletion of old gas. In order to minimize the amount of time a pipeline would have to wait to find out whether the passthrough of any costs in excess of inflation would be allowed, this section would establish a special Commission proceeding to review applications to pass through such costs. The Commission would be required to adopt rules for such proceedings that would facilitate expeditious decisions.

Section 603 would not affect all increases to a pipeline's rate, but only increases in the purchased gas cost component of the rate that exceeded the pipeline's allowed rate for purchased gas costs. Each pipeline would have a different allowed rate. Section 603(d) would define the term "allowed rate" as the average price a particular pipeline paid for gas delivered to it during the month preceding the enactment of this Bill plus an "adjustment amount" to reflect inflation. Section 603(d) would define the "adjustment amount," which would be the same for each pipeline, as the difference between the average price all pipelines paid for gas delivered during the month preceding the enactment of this Bill and that average price adjusted to reflect inflation since the enactment of this Bill.

Subsection (f) would establish a rateable purchase requirement for interstate pipelines. Under this requirement, an interstate pipeline would be required to reduce its own production or purchases from any affiliated producer to a percentage of deliverability no higher than the percentage of deliverability to which the pipeline had exercised contemporaneously a contractual right to reduce its takes of less expensive gas. If a pipeline violated this rateable purchase requirements, it would be prohibited from passing through any purchased gas costs that resulted from the violation.

TITLE II—REMOVAL OF WELLHEAD PRICE CONTROLS AND REPEAL OF JURISDICTION OVER CERTAIN FIRST SALES

Section 201 would amend NGPA section 121 to provide for the ultimate elimination of all price controls on first sales of natural gas. New subsection (a) would establish the general rule, under which natural gas sold under contracts executed or amended after the enactment of this Bill would be free from any NGPA price controls. This provision would permit natural gas prices to be established immediately in accordance with market forces and not the existing artificial price ceilings. Subsection (b) would establish a price cap for high-cost section 107(c)(1)-(4) gas sold under contracts in effect on the date of enactment of this Bill. The cap would be the higher of the contract price in effect on the date of enactment of this Bill or the gas cap price (*see* section 301). The cap would be effective from the date of enactment through December 31, 1985. However, the cap would be removed immediately from any gas which qualified for free market prices under subsection (a). Subsection (c) would remove price controls from section 102 gas, certain section 103 gas, and certain intrastate natural gas on January 1, 1985, as currently scheduled under the NGPA. However, during 1985, this gas could not exceed the gas cap price, unless the gas is sold under a contract covered by subsec-

tion (a). Subsection (d) would remove price controls on January 1, 1986, from all first sales of natural gas not previously decontrolled and thus end the Federal government's involvement in establishing wellhead price for natural gas.

Section 202 would eliminate the Commission's jurisdiction under the Natural Gas Act (NGA) to regulate non-price aspects (such as certification and abandonment) of first sales of natural gas. NGPA section 601(a)(1) currently exempts from such jurisdiction first sales of natural gas that was not dedicated to interstate commerce prior to the enactment of the NGPA or that was described in certain sections of the NGPA (such as high-cost gas in section 107). Section 202 would amend NGPA section 601(a)(1)(B) to eliminate the Commission's NGA jurisdiction over any first sale of natrual gas after 1984. NGPA section 601(a)(1)(B) also would be amended to provide for the immediate elimination of Commission jurisdiction over any gas exempted from price controls by reason of the post-enactment execution or amendment of a contract, and thus make the first sale of such gas free from both price and non-price regulation. In addition, any gas that previously had been sold under a contract that lapsed, expired, terminated by its own terms, or terminated because of the market-out provision of new NGPA section 316 after the enactment of the Bill would be exempted from the Commission's NGA jurisdiction. This provision would allow the fullest operation of the market by permitting the gas to be sold to any purchaser and not just the purchaser under the terminated contract.

Section 203 would repeal those sections of the NGPA that would have allowed the President or the Congress to reimpose price controls.

TITLE III—TRANSITIONAL PRICE AND CONTRACT PROVISIONS

Section 301 would add a new section 111 to the NGPA that would provide a transitional pricing mechanism for natural gas currently subject to price controls. Section 111 would establish a new limit, or price cap, for all currently price controlled natural gas, except section 107 gas. This price cap would be the lesser of the maximum lawful price under any other section of the NGPA and the "gas cap price", which would be the average price of natural gas under recent new or amended contracts which could reflect market prices because of new NGPA section 121(a). Until the gas cap price is computed and published, the NGPA prices would apply. Section 107(c)(5) natural gas, including "tight sands" and other types of gas, would be capped at the applicable maximum lawful price under the NGPA for such gas in the month this Bill is enacted. However, the Commission would retain its current authority under section 107(b) to lower the incentive price that such gas currently receives and, if it does so, the new, lower price would be applicable. The price limits established by section 301 would terminate on January 1, 1986, and could be terminated earlier if a producer and purchaser agree to a new or renegotiated contract. (*See* discussion of section 201 for treatment of section 102, certain section 103, and certain intrastate gas during 1985.)

The gas cap price would reflect the current market price for natural gas and thus would eliminate distortions under the NGPA by which maximum lawful prices act as "price floors" preventing gas prices from responding to downward market pressures. In order to reflect current market conditions, the gas cap price would be a volume-weighted average of prices paid during the first three months of deliveries under any contract that had been executed or renegotiated since the date of enactment of this Bill. This average would be based on the prices estimated to be paid for gas estimated to be delivered under all such contracts during the second, third, and fourth months before the month for which the gas cap price is published. The estimated prices and volumes would be required to be filed with the Commission within five days of the post-enactment execution or amendment of a contract. Beginning with the fourth month following the enactment of this Bill, the Commission would be required to calculate the gas cap price for each month through December 1984. The Commission would publish the gas cap price for each month at least five days before the beginning of that month.

The gas cap price would be calculated as follows. If this Bill is enacted on March 15, 1983, July 1983 would be the first month for which a gas cap price would be published. The July gas cap price would be the average of the estimated prices paid for estimated deliveries from March 15 through May 31, 1983. The gas included in the average would be all gas estimated to be delivered during the first three months of operation of a contract whose execution or amendment removed the gas from price controls. The average would be weighted to reflect the various volumes of gas at different prices. The August gas cap price would be the average price for certain gas estimated to be delivered in April, May, and June, and so forth. The effect of dropping March and adding June would be to make the gas cap price a rolling average that reflects the most recent market prices.

Section 302 would repeal NGPA section 315 and substitute a new section 315 entitled "Imposition of Take-or-Pay Limits" giving purchasers the right to refuse volumes in excess of 70 percent of available deliverability from wells included under a first sale contract.

Currently, section 315(a) provides that the Commission can specify the minimum duration of certain contracts. Section 315(b) provides purchasers with a right of first refusal in certain circumstances. Section 315(c) permits the Commission to require the filing of contracts for the first sale of natural gas. The repeal of the existing NGPA section 315, along with the elimination of the Commission's NGA jurisdiction over first sales (*see* section 202), would remove all non-price regulation of first sales of natural gas.

New section 315 would free purchasers to respond to market signals and reject deliveries of high priced gas that was not marketable. New section 315(a) would give purchasers subject to take-or-pay requirements under contracts not amended after the date of enactment a right to refuse delivery of volumes in excess of 70% of available deliverability from those wells included under the contract. Purchasers that exercised this right would also be relieved of their contractual obligation to pay for volumes not taken under this provision. This right could be exercised with respect to deliveries made from the date of enactment through December 31, 1985. New section 315(b) would require a purchaser electing to refuse deliveries to give notice to the seller at least 30 days prior to the date of the delivery being reduced. New section 315(c) would enable a seller that has been notified that its purchaser has elected to refuse delivery of certain volumes to protect its ongoing financial requirements by allowing the producer to terminate the contract with respect to the volumes refused. If a producer terminated a contract in this manner, the refusing purchaser would be subject, however, to certain transportation obligations described in new section 316(d). New section 315(d) would allow the Commission to determine, by rule or order, that the election to refuse delivery under this section shall not apply where production of the volume subject to a take-or-pay requirement is necessary to prevent drainage. New section 315(e) exempts casinghead natural gas from this section. Section 315(f) would treat contracts covering two or more pricing categories of natural gas as separate contracts for each category.

Section 303 would add a new section 316 to the NGPA, entitled "Market-Out Provision", that would allow either party to a contract for the first sale of natural gas to terminate the contract. Any termination under this section could not go into effect before January 1, 1985 or after December 31, 1985.

Section 316(a) would permit both the purchaser and seller under a first sale contract in effect on the date of enactment and not amended thereafter to terminate the contract as follows. The party terminating the contract would be required to give notice to the other party at least 45 days in advance of the termination of the contract. This notice could not be given before November 16, 1984 or after November 15, 1985. The party terminating could not materially breach the contract prior to the end of the 45 day notice period and would be required to release the other party from all future obligations under the terminated contract. Section 316(b) would provide that, for purposes of this section, a reduction of a take-or-pay obligation under new section 315 would not be considered an amendment of the contract. This provision would make clear that a pipeline did not have to choose between reducing its take-or-pay obligation immediately or waiting until 1985 to terminate the entire contract. Section 316(c) would require a party that had received a good or service under the contract prior to termination under this section to make payment for that good or service, and also would require a party that received payment for a good or service that was not provided before the effective date of termination to make restitution of the payment, in cash or in kind, in accordance with the contract. This provision would ensure that parties to a terminated contract resolve on an equitable basis any questions concerning advance payments, prepayments or other matters. It is intended that any payments returned to a pipeline under this provision would be flowed through to the pipeline's customers to the extent that the pipeline's rates previously had reflected the payments. Section 316(d) would require a terminating pipeline to transport a volume of natural gas not to exceed, on an annual basis, the largest volume delivered under the contract during any twelve consecutive months in the thirty-six months immediately prior to termination. This provision would permit a producer to seek another buyer for the gas sold under the terminated contract even if the former purchaser controlled all the transportation facilities servicing the producer. Upon application by the affected pipeline and after hearing, the Commission or State agency with jurisdiction over that pipeline could limit by order the transportation obligation if it determined that full

compliance would require the pipeline to construct additional facilities or would impair the pipeline's ability to render adequate service to existing customers.

Section 304 would add a new section 318 to the NGPA entitled "Effect of Gas Cap Price," that would define the effect of the gas cap price on certain contract clauses. New section 318(a) would provide that no price escalator clause could operate to establish a price for natural gas subject to NGPA Title I (other than section 107 gas) higher than the gas cap price. New section 318(b) would provide that, for purposes of any area rate clause, the gas cap price is a Federally established rate or price.

TITLE IV—REMOVAL OF CERTAIN IMPEDIMENTS TO INTRASTATE MOVEMENTS OF GAS

Section 401 would facilitate transactions between the interstate and intrastate markets without subjecting those transactions to certification procedures under section 7 of the Natural Gas Act (NGA), and without requiring intrastate companies to become jurisdictional "natural gas companies" under the NGA. Current NGPA section 311(a) permits the Commission to authorize transportation by interstate pipelines on behalf of any intrastate pipeline or local distribution company, and by an intrastate pipeline on behalf of any interstate pipeline or local distribution company served by an interstate pipeline. Current NGPA section 311(b) permits the Commission to authorize any intrastate pipeline to sell gas to any interstate pipeline or local distribution company. Current NGPA section 312 permits the Commission to authorize any intrastate pipeline to assign surplus gas to an interstate pipeline or local distribution company. These provisions were designed to permit the then existing "bubble" of gas in intrastate markets to flow into interstate markets that were facing gas shortages. Sections 401(a), (b), and (c) would amend these NGPA provisions to allow natural gas to flow both ways to correct imbalances in any market. Section 401(a) would expand NGPA section 311(a) to permit the Commission to authorize any pipeline or local distribution company to transport gas on behalf of any person. The use of the phrase "any person" is not intended to reflect any view concerning the persons on whose behalf gas currently can be transported under section 311(a). Section 401(b) would expand NGPA section 311(b) to permit the Commission to authorize any pipeline or local distribution company to sell gas to any other pipeline or local distribution company. Section 401(c) would expand section 312 to permit the Commission to authorize any pipeline or local distribution company to assign surplus gas to any other pipeline or local distribution company. In addition, the definition of "surplus gas" would be broadened.

Section 402(a) would expand NGPA section 314. Currently, NGPA section 314 voids anticommingling clauses with respect to certain first sales. Section 402(a) would expand section 314 to void anticommingling and similar clauses in contracts for the resale and transportation of natural gas that is not deemed to be in interstate commerce because of NGPA section 601(d) (see section 402(b)). This change is designed to facilitate transactions between the interstate and intrastate markets.

Section 402(b) would add a new subsection (d) to NGPA section 601 which would establish the principle that, in most instances, intrastate pipelines should not be subject to the Commission's jurisdiction just because the intrastate pipeline acquires gas from another State as long as there is no regulatory gap concerning the sale and transportation of such gas. New NGPA section 601(d)(1) would provide that purchasers of gas in certain "covered transactions" would not become subject to the Commission's jurisdiction because of such purchases. New section 601(d)(2) would provide that transactions downstream from such covered transactions would not, solely on that basis, be considered to be in interstate commerce, and that intrastate recipients of this natural gas would not thereby be considered to be "natural gas companies" under the NGPA. Covered transactions would be defined as the first sale of natural gas not subject to the jurisdiction of the Commission by reason of section 601(a)(1) (A) or (B), the first sale of gas produced on the outer Continental Shelf, a sale or assignment under sections 302(a), 311(b) or 312(a), a first sale under section 317 (the new "Contract Carrier" provision), and a sale for resale by a Hinshaw pipeline. This section would only apply to natural gas that remained in the State in which the purchaser in the covered transaction received the gas, except if gas is transported outside of that State in connection with a transaction under sections 302(a), 311(a), 311(b) or 312.

Section 402(b) also would add a new subsection (e) to NGPA section 601, entitled "Nondiscrimination Provision." New subsection (e) would prohibit the Commission, in exercising its jurisdiction over any gas under either the Natural Gas Act or the NGPA, from discriminating against either intrastate or interstate purchasers.

Section 403 would add a new section 317 to the NGPA providing for "Contract Carrier Authorization." Section 317(a) would provide that, upon application by a producer or a producer's customer, the Commission shall order an interstate pipeline to transport gas on behalf of the producer and purchaser, under such terms and conditions as the Commission determines to be just and reasonable. This section is intended to open the natural gas market to the operation of the laws of supply and demand to the fullest extent possible by allowing producers and users of natural gas to deal directly with one another. There would be limitations on this provision to protect the pipeline and its customers. A pipeline would not be required to construct new facilities. In addition, the Commission could find the transportation would impair service to the pipeline's customers, and thus limit or disallow the application. Finally, the Commission is given the option to implement this section either by rule or order. Section 317(b) would provide that in consideration for this carriage, the pipeline would receive five cents per million Btu's in addition to the normal transportation rate which the pipeline would receive under the Natural Gas Act for such transportation. The five cents would not be credited and flowed back to the pipeline's customers, but would be reserved for the pipeline's shareholders. Except for the special treatment of the five cents, the revenue from transportation under this provision would be treated in the same fashion as revenue from transportation under the Natural Gas Act.

TITLE V—REPEAL OF CERTAIN RESTRICTIONS ON NATURAL GAS AND PETROLEUM USE AND PRICING

Sections 501 and 502 would repeal several sections of the Powerplant and Industrial Fuel Use Act of 1978 (FUA).

The bill would repeal (1) the prohibitions on the use of natural gas and petroleum as a primary energy source in new electric powerplants and new major fuel-burning installations, (2) the prohibition on the construction of new powerplants without alternate fuel capability, (3) the discretionary authority of the Secretary of Energy to prohibit nonboiler installations from using natural gas and petroleum as a primary energy source, and (4) all corresponding exemption provisions.

The bill would repeal section 302 of FUA which authorizes the Secretary of Energy to prohibit the use of natural gas or petroleum as a primary energy source where coal or alternate fuel capability exists in existing major fuel-burning installations.

The Secretary of Energy's authority under section 401 of FUA to prohibit the use of natural gas as a primary energy source in certain boilers would be repealed.

The bill would repeal section 402 of FUA which prohibits certain installations of new outdoor lighting fixtures that use natural gas and certain uses of natural gas therein.

The bill would repeal section 405 of FUA which authorizes the Secretary of Energy to restrict, by rule, increases in the use of petroleum as a primary energy source in existing powerplants that used coal or another alternate fuel in 1977.

The bill would repeal subsections 103(a)(16), (a)(18), (a)(19) and (a)(29) of the Powerplant and Industrial Fuel Use Act of 1978, which provide certain definitions for general reference that are no longer necessary due to the proposed repeal of many statutory provisions.

Section 503 would repeal title II of the NGPA, which provides for an incremental pricing system whereby low priority users of natural gas pay a larger share of the first sale acquisition costs for natural gas, and thus would end this regulatory system. Acquisition costs incurred prior to the enactment of this bill would be passed through to users on the basis of the existing Commission regulations for incremental pricing. Any acquisition costs incurred after the enactment of this bill would be dealt with without regard to incremental pricing requirements.

EXECUTIVE SUMMARY—ANALYSIS OF NATURAL GAS CONSUMER REGULATORY REFORM LEGISLATION

BACKGROUND

If the wellhead price of natural gas were not regulated, market forces would affect natural gas prices as they do all other unregulated commodities. When deliverable supplies were high, as they are today, the price would fall; when deliverable supplies were reduced, the price would increase. If the price of the principal competing fuel (oil) were to drop, the price of natural gas also would drop in order to maintain a competitive position in the marketplace.

But the domestic gas market has been distorted by existing law. The Natural Gas Policy Act of 1978 (NGPA) currently is causing natural gas prices to rise despite an oversupply of deliverable gas, declining oil prices, and a low rate of inflation.

PROPOSAL

The legislative proposal provides a transition to a free market for natural gas that both protects consumers from the effects of market distortions on prices during the transition and provides strong incentives for producers and purchasers to renegotiate contracts to minimize costs. Key differences from the NGPA include the following:

Consumers are protected through a moratorium on automatic Purchased Gas Adjust-

ment (PGA) increases above the level of inflation, with other increases requiring a full public proceeding by the Federal Energy Regulatory Commission (FERC).

All new and renegotiated contracts are deregulated, with the volume-weighted average price of these new contracts becoming a cap on prices that can be charged under old regulated contracts. Pipelines may reduce take-or-pay contract volumes to 70 percent.

On January 1, 1985, either party may opt out of any old (pre-enactment) contract, and transportation of gas from producers to new buyers is guaranteed.

MAJOR ASSUMPTIONS OF THE ANALYSIS

Oil price assumptions are critical to any analysis of natural gas pricing policies because the fuels substitute for and compete with each other over a broad range of uses. This analysis uses in its reference cases those oil prices developed for the fiscal year 1984 budget. These prices are relatively flat in real terms ranging from about $31 to $32 over the 1983-90 time period. A low oil price sensitivity case was run at the $23-to-$24-barrel level in real terms through 1985, with growth at 1 percent in each year through 1990.

Other key assumptions include the following:

GNP growth at 1.7 percent in 1983 with a recovery peaking in 1984-85 (4 to 4.5 percent). The average annual growth rate for the rest of the decade is 3.4 percent.

Excess deliverability of natural gas in 1982 averaging about 1.4 trillion cubic feet.

Conservative estimates of the number of producer/pipeline contract renegotiations before January 1, 1985.

RESULTS OF THE ANALYSIS

Under current law, prices are projected to continue on a steady upward path, reflecting both the changes in mix (depleting supplies of old, low-priced gas and additions of more expensive gas) and some subsidization of drilling for more expensive gas. As prices currently are approaching market-clearing levels, the analysis does not show a sudden price increase when partial decontrol takes effect in 1985. But just what will happen to gas prices in 1985 will be strongly influenced by oil prices.

Under a low oil price scenario, prices under current law continue to rise until after the partial deregulation in 1985, as certain contract provisions cause the price ceilings under the NGPA to continue to act as floors that rise with the rate of inflation.

The legislative proposal shows a much different pattern in the near term. Under base case price assumptions, the average price of gas shows a decrease in the first year of 10 cents to 30 cents per thousand cubic feet. This is about 20 cents to 40 cents below projected NGPA prices. Prices under the proposal remain below those under current law (NGPA), with both rising to about 10 percent above 1982 prices by 1985, assuming no PGA restrictions as a worst case. If FERC disallows some purchased gas cost increases until 1986, residential prices will not rise by the full 10 percent.

Under a low oil price scenario, residential prices should drop by about 30 cents to 60 cents in the first year, about 40 cents to 70 cents below NGPA projections, and should remain well below 1982 levels until 1985. After 1985, the difference between current law and the proposal is very small, as low prices do not offer substantial incentives or subsidies to drill for expensive gas.

In terms of economic efficiency, the legislative proposal shows sizable gains as resources flow to their most efficient uses in a competitive market rather than to the less efficient uses caused by a distorted market. Under the base case oil price assumptions, the legislative proposal provides net national economic benefits over the period that are in the range of at least $1 billion to $2 billion. Such benefits to the economy also are very sensitive to oil prices; when oil prices increase, the free market will cause low-cost gas to be produced first—unlike the current situation with its distorted incentives to produce high-cost deep gas because of its deregulated status. Using the higher oil prices expected in the analysis of 1 year ago, economic efficiency gains are in the range of $25 billion.

DEPARTMENT OF ENERGY.
FEBRUARY 28, 1983.

DEPARTMENT OF ENERGY FACTSHEET: NATURAL GAS CONSUMER REGULATORY REFORM LEGISLATION

The Natural Gas Policy Act (NGPA) of 1978 currently is causing natural gas prices to rise in spite of an oversupply of deliverable gas, declininig oil prices, and a low rate of inflation.

The proposed natural gas legislation submitted by the President to the Congress today will benefit consumers by creating a system in which gas prices can be responsive to the pressures of the market. Through this approach to the free market, the proposal will protect consumers from uneconomic natural gas price increases while eliminating regulatory barriers that prevent natural gas from being purchased, distributed and used efficiently.

A primary purpose of the proposal is to see that consumers not bear the risk of price increases from this effort to let the market work. This proposal modifies, until January 1, 1986, the current Federal Energy Regulatory Commission regulations which allow pipelines immediately to pass through to consumers all wellhead cost increases. This will provide fairness to consumers and provide incentives to suppliers and pipelines to renegotiate contracts to minimize costs.

Purchased gas costs automatically passed to consumers will be limited to the pre-enactment levels plus the increase attributable to inflation.

Price increases above the rate of inflation may not be passed to consumers unless such increases specifically are approved by the Federal Energy Regulatory Commission after a public proceeding with appropriate standards.

Under current market conditions, the proposed natural gas legislation should result in a first year drop in the average price of gas of 10 to 30 cents per thousand cubic feet (mcf). This estimate is based on assumptions about the extent of producer-pipeline renegotiations, the current excess of deliverable gas supplies, the rate of economic growth and what path oil prices will follow over the next few years. If, for example, oil prices were to fall below the cautious projections used (which do not take into account recent price reduction announcements by major foreign oil producing nations), we would expect gas prices to drop even further in the near-term.

Under the proposed legislation, any new contracts for natural gas purchases may be negotiated, and existing contracts may be renegotiated, at the option of the contracting parties, and all these contracts will operate on whatever terms the parties agree. As an incentive to renegotiation, either party will be allowed to opt out of any pre-enactment contract beginning January 1, 1985.

Before 1986, the average price of gas purchased through renegotiated and new contracts will become the "gas cap," and the price for all regulated gas will be limited to the lower of either the "gas cap" or the NGPA-controlled price (where the price category remains in effect under NGPA), with the exception of "tight sands" gas which is capped at its maximum lawful price at date of enactment.

The price of gas not currently regulated—so-called "deep gas"—will be capped at the higher of the contract price as of the date of enactment or the "gas cap" until January 1, 1986, unless such contracts are renegotiated prior to that date.

The "gas cap" will be applied as a ceiling for price escalator clauses in existing contracts until January 1, 1986, or sooner if such contracts are renegotiated.

Until January 1, 1986, the legislative proposal will allow pipelines companies to reduce their minimum rates of take to 70 percent under those "take-or-pay" provisions that require pipelines to pay for a specified quantity of gas regardless of how much gas they can sell. If the purchaser elects to reduce the amount of gas taken under "take-or-pay" provisions, the seller may sell that portion of the gas elsewhere.

The proposal will require pipelines to carry gas at an incentive rate where producers can find buyers directly, there is available capacity, and existing pipeline customers are not penalized.

DEPARTMENT OF ENERGY.
FEBRUARY 28, 1983.●

By Mr. DURENBERGER (for himself, Mr. BAUCUS, Mr. DOMENICI, Mr. BUMPERS, Mr. COHEN, Mr. GOLDWATER, Mr. PELL, Mr. PERCY, Mr. STENNIS, and Mr. TSONGAS):

S. 616. A bill to promote the use of solar and other renewable forms of energy developed by the private sector; to the Committee on Finance.

SOLAR ENERGY NATIONAL SECURITY AND EMPLOYMENT ACT

● Mr. DURENBERGER. Mr. President, it is my pleasure to join with the Senator from Montana (Mr. BAUCUS) and others to introduce a bill entitled the Renewable Energy Small Business Development Act. This Legislation also serves as title I of the Solar Energy National Security and Employment (SENSE) Act of which I am a cosponsor.

The principal provision of this legislation extends the business energy tax credits for investment in renewable energy properties. Under current law, when a business buys wind, or solar, or geothermal equipment to generate power for its own use, the business gets a tax credit equal to 15 percent of the cost of the equipment purchased. That is a tangible incentive. But those credits expire in 1985—in most cases—and were somewhat diluted by the Tax Equity and Fiscal Responsibility Act passed last summer.

Renewable energy is an industry. In this country it is generally an industry of small businesses. But they are busi-

nesses. They need to make investments in plant to build the equipment for the marketplace. They need to plan. They need to know where their markets are headed. A tax credit which ends in 2 years is not much help, if you are planning for a business. Legislation will provide the real incentive that is needed to make sure that our progress toward a renewable energy future does not come to an abrupt halt with changing energy markets.

A second provision in the legislation reserves 12 percent of the Export-Import Bank's loan authority for small businesses—that is businesses with sales under $25 million in the previous year. The legislation puts particular emphasis on small renewable energy businesses because of the potential for renewable energy to lead the way in rebuilding export markets for America's products.

A third provision requires the U.S. Department of Commerce to put renewable energy on the same footing with other industries when it comes to the trade policy and export assistance of the U.S. Government.

A fourth provision relates to the cogeneration section of the Public Utility Regulatory Policies Act of 1978. That law assured that small generators using renewable energy resources would have a ready market for the energy they supply by requiring the electric utility industry to offer fair prices to small power producers for the energy that they feed into the electric utility grid.

Although the 1978 act is clear in its intent, it has been confused in the process of implementation. Electric utility companies across the Nation are resisting connection with small power producers and in many cases have gone to court to halt PURPA implementation.

The legislation I am offering today would restate congressional intent and make it clear that small power generators using renewable energy resources are to be offered prices for their electric production at least equal to the incremental cost of new production by the electric utility itself.

Finally, the Renewable Energy Small Business Act amends an act passed last year, the Small Business Innovation Act which set aside 1 percent of all research and development funds in several Federal Government agencies for small business. The bill I introduce today would assure that the Department of Energy includes research and development funds for small renewable energy businesses in its set-aside for small business generally.

Mr. President, with the news comming out of the OPEC cartel—the news that oil prices may be falling—it would be easy for Americans to get complacent about our energy supply once again. During an oil glut, like the one we have now, we tend to forget about things like conservation and alternative energy sources. The market sends business and consumers the wrong message.

But we must not forget that over the long term we will most assuredly run out of easily produced and relatively inexpensive fossil fuels. And in the short term, we will continue to be vulnerable to supply interruptions that can threaten our economy.

The legislation that we are introducing today gives Congress the chance to reply to the news from the OPEC capitals. The support already gathered for this legislation gives me real hope because it means that our reply will be a commitment not to forget that renewable energy is the future of this country.

Mr. President, I ask that a copy of the legislation that I am introducing be included in the RECORD with my comments today. Thank you, Mr. President.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 616

Be it resolved by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This act may be cited as the "Renewable Energy Small Business Development Act of 1983".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment of a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the United States of America is dependent on a finite and diminishing resource base of fuels;

(2) the business sector of the Nation, including small business, has the capacity to develop and market energy conservation and renewable energy devices and fuels;

(3) Federal programs to assist businesses in the financing and marketing of renewable energy systems are in place, and can be improved to provide even greater assistance in renewable energy development;

(4) energy tax credits provide incentives for the use of renewable energy systems that complement the natural forces of the marketplace;

(5) a guarantee that small renewable energy electric power producers will be able to interconnect with the utility grid and will be paid a fair and reasonable rate for their power will encourage them to help develop more diversified sources of electricity that will lead to lower rates for the Nation's consumers of electricity;

(6) the innovative character of the Nation's small business sector is critical to the success of the Nation's effort to develop productive renewable energy technologies, systems and components;

(7) the participation of small business in the export of renewable energy products is essential if the Nation is to take full advantage of the opportunities provided by the growing world renewable energy market.

(b) POLICY.—The Congress reaffirms that it is the policy of the federal government to—

(1) pursue a vigorous and balanced program of basic research and technology development that will make renewable energy a significant contributor to the Nation's future energy mix;

(2) assist the development of practical means to employ solar and other renewable forms of energy on a commercial scale; and

(3) reassert the goals of existing Federal legislation that encourages private-sector development of renewable energy, including the—

(A) Solar Heating and Cooling Demonstration Act of 1974,

(B) Solar Energy Research, Development and Demonstration Act of 1974,

(C) Ocean Thermal Energy Conversion Research, Development and Demonstration Act,

(D) Wind Energy Systems Act of 1980, and

(E) Solar Photovoltaic Energy Research, Development and Demonstration Act of 1978.

SEC. 3 INCREASE IN ENERGY PERCENTAGE.

(a) IN GENERAL.—The table contained in clause (i) of section 46 (a) (2) (C) is amended to read as follows:

"Column A—Description: In the case of:	Column B—The energy percentage is:	Column C—For the period: Beginning on:	And ending on:
I. General Rule.—Property not described in any of the following provisions of this column.	10 percent	Oct. 1, 1978.	Dec. 31, 1982.
II. Solar, Wind, or Geothermal Property.—Property described in section 48(1)(2)(A)(ii) or 48(1)(3)(A)(viii).	A. 10 percent.	Oct. 1, 1978.	Dec. 31, 1979.
	B. 15 percent	Jan. 1, 1980.	Sept. 30, 1983
III. Ocean Thermal Property.—Property described in section 48(1)(3)(A)(ix).	A. 15 percent.	Jan. 1, 1980.	Dec. 31, 1990.
IV. Qualified Hydroelectric Generating Property.—Property described in section 48(1)(2)(A)(vii).	A. 11 percent.	Jan. 1, 1980.	Sept. 30, 1983.
	B. 15 percent.	Oct. 1, 1983.	Dec. 31, 1990.
V. Biomass Property.—Property described in section 48(1)(2)(A)(x).	A. 10 percent.	Oct. 1,	Dec. 31, 1990.

(b) AFFIRMATIVE COMMITMENTS—

(1) IN GENERAL—Subparagraph (C) of section 46(a)(2) (relating to energy percentage) is amended by redesignating clause (iv) to clause (v) and by striking out clause (iii) and inserting in lieu thereof the following:

"(iii) LONGER PERIOD FOR CERTAIN PROPERTY—For the purpose of applying the energy percentage contained in subclause (I), (II), (III), or (IV) of clause (i) with respect to any property, the extended date shall be substituted for the termination date with respect to such property if—

"(I) on or before the termination date with respect to such property, the taxpayer or any other person has completed all feasibility studies in connection with the acquisition, construction, reconstruction, or erection of the property, or with the commencement of construction of the project which the property is a part, and has applied for all environmental and construction permits required under Federal, State, or local law in connection with the acquisition, construction, reconstruction or erection of the property, or with the commencement of the construction of the project of which the property is a part, and

"(II) on or before the date which is 3 years after the termination date with respect to such property, the taxpayer has entered into binding contracts for the acquisition, construction, reconstruction or erection of:

(A) the property;

(B) the equipment for the project of which such property is a part, the aggregate cost of which to the taxpayer is at least 50 percent of the reasonably estimated cost for all equipment which is to be placed in service as part of the project upon its completion, or

(C) the equipment specially designed for the project of which such property is a part, the aggregate cost of which to the taxpayer is at least 50 percent of the reasonably estimated cost for all equipment specially designed for the project which is to be placed in service as apart of the project upon its completion.

"(iv) DEFINITIONS RELATED TO CLAUSE (III).— For the purposes of clause (iii)—

"(I) In the case of subclause (I) of clause (i), the term 'termination date' means 'December 31, 1983', and the term 'extended date' means 'December 31, 1990'.

"(II) In the case of subclause (II), (III), or (VI) of clause (i), the term 'termination date' means 'December 31, 1990', and the term 'extended date' means 'December 31, 1995'.".

(2) HYDROELECTRIC GENERATING PROPERTY.— Clause (v) of section 46(a)(2)(C), as redesignated by paragraph (1), is amended to read as follows:

"(v) LONGER PERIOD FOR CERTAIN HYDROELECTRIC GENERATING PROPERTY.—If an application for a preliminary permit, license, or license exemption has been filed with the Federal Energy Regulatory Commission before January 1, 1990, with respect to the installation of any qualified hydroelectric generating property, for purposes of applying the energy percentage contained in subclause (IV)(B) of clause (i) with respect to such property, 'December 31, 1995' shall be substituted for 'December 31, 1990'.".

SEC. 4. AMENDMENTS RELATING TO BIOMASS AND COGENERATION PROPERTY.

(a) BIOMASS RECYCLING EQUIPMENT TREATED AS BIOMASS PROPERTY.—Subparagraph (A) of section 48(1)(15) is amended by striking out "and" at the end of clause (i), by striking out the period at the end of clause (ii) and inserting in lieu thereof ", and", and by adding at the end thereof the following new clause:

"(iii) any property described in paragraph (6), as modified by subparagraph (B) of this paragraph.".

(b) DEFINITION.—Subparagraph (B) of section 48(1)(15) is amended by striking out "and" at the end of clause (i), by striking out the period at the end of clause (ii) and inserting in lieu thereof ", and", and by adding at the end thereof the following new clause:

"(iii) for purposes of subparagraph (A)(iii) of this paragraph, paragraph (6) shall be modified by substituting 'biomass' for 'solid' each place it appears.".

(c) QUALIFIED FUEL.—Clause (ii) of section 48(1)(15)(C) is amended to read as follows:

"(ii) alcohol for fuel purposes.".

(d) ENERGY PROPERTY.—Subparagraph (A) of section 48(1)(2) is amended by striking out "or" at the end of clause (viii), by adding "or" at the end of clause (ix), and by adding at the end thereof the following new clause:

"(x) biomass property.".

SEC. 5. AMENDMENT TO EXPORT-IMPORT BANK ACT OF 1945.

Section 7(a) of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(3) Not less than 12 percent of the loan authority of the Export-Import Bank in any fiscal year shall be made available only to businesses with $25,000,000 or less in previous-year sales and shall include an amount of loan authority for transactions involving renewable energy that is appropriate to the demand for such loans."

SEC. 7. AMENDMENTS TO THE PUBLIC UTILITIES REGULATORY POLICIES ACT OF 1978.

(A) Subsection (b) of section 210 of the Public Utility Regulatory Policies Act of 1978 is amended to read as follows:

"(b) RATES FOR PURCHASE BY ELECTRIC UTILITIES.—(1) The rates for purchases by an electric utility under subsection (a) of this section of electric energy from any qualifying cogeneration facility or qualifying small power production facility shall be established at the incremental cost of alternative electric energy of such electric utility, unless—

"(A) the State regulatory authority having ratemaking authority over such electric utility determines (by rule or order of prospective application), or

"(B) a nonregulated electric utility determines, with prospective application, and publishes its reasons therefor,

that some other rate would be sufficient to encourage cogeneration and small power production, would not discriminate against qualifying cogenerators and small power producers, and would be consistent with the interests of consumers and with the public interest. In exercising the authority under this paragraph, a State regulatory authority or nonregulated electric utility may distinguish between new and existing facilities and may distinguish among classes of qualifying cogeneration facilties and qualifying small power production facilities.

"(2) A rate for the purchases under subsection (a) of this section of electric energy from any qualifying cogeneration facility or qualifying small power production facility which—

"(A) was established by a State regulatory authority, by State law, or by a nonregulated electric utility, prior to the date of enactment of the Renewable Energy Small Business Development Act of 1983, and

"(B) conformed with the requirements of regulations under this subsection (as in effect on January 1, 1982),

shall be treated as satisfying the requirements of this subsection unless and until such rate is amended or revised in accordance with this subsection, as amended by the Renewable Energy Small Business Development Act of 1983.

"(3) Nothing in this subsection—

"(A) limits the authority of an electric utility and a qualifying cogeneration facility or qualifying small power production facility to enter into a contract which contains a rate or rates which differ from those referred to in paragraph (1) or (2), or

"(B) affects the validity of such a contract."

(b) Subsection (a) of section 210 of the Public Utility Regulatory Policies Act of 1978 is amended:

(1) in paragraph (1), by striking out "and" and inserting in lieu thereof ";";

(2) in paragraph (2), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding after paragraph (2) the following:

"(3) interconnect with such facilities.".

(c) Section 210 of the Public Utility Regulatory Policies Act of 1978 is amended by adding at the end thereof the following new subsection:

"(k) ARRANGEMENTS FOR INTERCONNECTION.—(1) The rules under subsection (a)(3) of this section shall insure that, where any electric utility is required to offer to interconnect with a qualifying cogeneration facility or qualifying small power production facility, the qualifying cogeneration facility or qualifying small power production facility shall be obligated to pay any reasonable interconnection costs incurred by the utility, including costs incurred—

"(A) to protect the safety of (i) the electric utility's employees, (ii) other customers, and (iii) the public, and

"(B) to avoid the impairment of the reliability of any electric utility affected by such interconnection.

"(2) The rules referred to in paragraph (1) shall provide that if the electric utility and qualifying cogeneration facility or qualifying small power production facility are unable to resolve disputes concerning the interconnection between the electric utility and qualifying cogeneration facility or qualifying small power production facility, the State regulatory authority (in the case of an electric utility over which it has ratemaking authority) may prescribe the terms applicable to such interconnection, including the costs to be borne by the qualifying cogeneration facility or qualifying small power production facility on a nondiscriminatory basis.

"(3) The Commission shall promulgate the rules referred to in paragraph (1) not later than 6 months after the date of the enactment of the Renewable Energy Small Business Development Act of 1983. Prior to the effective date of such rules, the rules promulgated by the Commission respecting the interconnection of qualifying cogeneration facilities or qualifying small power production facilities and electric utilities, as in effect on January 1, 1983, shall remain in force and effect.".

AMENDMENT TO REORGANIZATION PLAN NO. 3 RELATING TO INTERNATIONAL TRADE FUNCTIONS

SEC. 7. Chapter 5 United States Code app. 19 of the Reorganization Plan No. 3 of 1979 is amended by inserting in section 1(b)(3)(F) after the word "energy" the words "including renewable energy."

AMENDMENTS TO THE SMALL BUSINESS INNOVATION ACT OF 1982

SEC. 8. Public Law 97-219 is amended—

(1) by adding after SEC. 4(f)(2) the following new paragraph

(3) A reasonable portion of the amounts appropriated and the non-nuclear programs of the Department of Energy shall for the purposes of paragraph (1) be set aside for renewable energy and energy conservation businesses.●

● Mr. BAUCUS. Mr. President, I am pleased to join my colleague from Minnesota, Senator DURENBERGER, in introducing the Renewable Energy Small Business Development Act, title I of the Solar Energy National Security and Employment Act (SENSE).

Montanans have been leaders in energy conservation and use of alternative, renewable energy resources. They understand that it makes good

sense—for the economy and for the environment.

Montanans understand the importance of diversifying our energy resources. That is why I am pleased to join in introducing the SENSE Act.

This bill is designed to spur the growth of this Nation's energy conservation and renewable energy industries. The goal of the bill is to create jobs, stimulate the growth of business, save consumers' money, give the United States new products for export, and decrease our vulnerability to disruptions in our oil supply.

The SENSE Act does not create giant, expensive new spending programs to accomplish these goals. Instead the bill refines existing conservation and renewables programs. It also broadens the use of renewables and conservation in other Federal programs.

SMALL BUSINESS

The first part of the SENSE Act, which I am sponsoring, is essentially an economic development program for small conservation and alternative energy businesses.

As a member of the Senate Finance and Small Business Committees, I am an ardent supporter of efforts to provide capital to small businesses that want to invest in renewables and conservation.

This legislation provides tax incentives that should be a great help to the growing alternate energy industry in Montana. Most important, this legislation would extend, and in some cases increase, the business tax credits available for renewable energy investments. These tax credits were scheduled to expire in 1985.

My bill would increase the tax credit for solar, wind, and geothermal investments from 15 to 25 percent, and it would extend the credit for all renewables to 1990. This includes the 11-percent credit for hydroelectric property and the 10-percent credit for biomass investments.

These tax credits are essential for maintaining the viability of thousands of renewable energy technology producers in Montana and across the Nation. They help offset Federal tax subsidies for the established energy industries with which the emerging renewable energy industry must compete. And they help these businesses overcome the high up-front costs that often act as a barrier to investments in renewable energy equipment.

EXPORTS

Title I of the bill also would help the American renewables industry enhance its position in the world market. Countries such as Japan, West Germany, and Italy have been able to erode the U.S. lead in many renewable energy technologies.

Many experts argue that the Japanese could capture more than half the expanding world market for photovoltaic cells within the next few years. This is despite the fact that until very recently, the United States controlled 80 percent of this market.

Japan, Germany, and Italy all give their renewables industries sizable government subsidies. My bill would put U.S. producers on a more equal footing.

My bill would increase the availability of loans for these businesses from the Export-Import Bank. It would reserve 12 percent of the Bank's loan authority for small businesses, with special emphasis on renewable energy investments.

Second, the act would require the U.S. Department of Commerce to provide the same treatment and export assistance to renewable energy as it does to other U.S. industries. The International Trade Administration at the Commerce Department has effective programs to help private businesses develop markets overseas.

In 1981, the Energy and Commerce Departments jointly sponsored a $500,000 trade development program for renewables businesses that, in turn, generated $3 million in immediate overseas sales and another $60 million in projected 12-month sales. One of the purposes of this bill is to encourage the Commerce Department even more to promote exports in an industry that has very high export potential.

SET-ASIDE

Finally, my bill would amend the Small Business Innovation Act, which requires the Energy Department and several other agencies to set aside at least 1 percent of their research and development funds for small businesses.

My bill would guarantee that renewable energy businesses that are included in this set-aside. This provision is necessary to insure that the Department of Energy does not allot its entire small business set-aside to research and development of conventional energy sources.

CONCLUSION

All of us recognize that these are difficult economic times. The alternative energy industry offers one way to create jobs, spur economic growth, and insure future energy self-sufficiency.●

● Mr. DOMENICI. Mr. President, I today join in introducing the Solar Energy National Security and Employment Act of 1983 (SENSE Act) along with Senators BUMPERS, BAUCUS, COHEN, DURENBERGER, GOLDWATER, PELL, PERCY, STENNIS, AND TSONGAS. This act, which is a series of four bills, is designed to emphasize renewable energy and conservation use as well as assist small businesses and jobs development related to these energy technologies. It will do so principally by emphasizing the use of these technologies in defense installations where cost effective, by targeting renewable and conservation small businesses in existing assistance programs, and by the expansion and extension of renewable energy tax credits for business and residential use.

This approach to the broadening of the use of renewable energy and conservation has been tried successfully in my State of New Mexico through a coordinated effort by the Solar Energy Industry Development Corp., founded by me and former Gov. Bruce King; solar businesses; and the State government to double the number of jobs related to renewable energy over the past 2 years—600 to 1,200—which we hope to double again over the next 2 years.

This legislation represents that same sort of cooperative effort to better utilize existing programs and emphasize renewable energy resources and conservation in our domestic economy as well as in international markets.

Mr. President, I would like to include at this point in the RECORD a summary of the provisions of the bill.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF SENSE ACT PROVISIONS

I. THE RENEWABLE ENERGY SMALL BUSINESS DEVELOPMENT ACT

The Small Business Title of SENSE redefines and broadens five existing federal programs that assist renewable energy small businesses to ensure that they are more effective. Except for the extension of the business energy tax credits, none of the provisions require additional federal expenditures. These provisions will assist and stimulate small business development through exports, interconnection with the utility grid, use of DOE research dollars, and business development spurred by the tax incentives.

1. This Act extends the renewable energy business tax credits to 1990 and increases the credits for solar, wind, and geothermal applications. Ocean thermal, biomass, and hydroelectric credits would remain at current levels through 1990. The business tax credits for renewable energy, due to expire in 1985, provide a 15 percent credit for solar, wind, and geothermal expenditures; 15 percent for ocean thermal applications designated by DOE; 11 percent credit for hydroelectric; and 10 percent for biomass.

2. The Act reserves 12 percent of the Export-Import Bank's loan authority to small businesses with previous-year sales of $25 million or less. Renewable energy businesses are highlighted as representative of the high-growth industries that should receive this money.

3. The Act requires the U.S. Department of Commerce to provide the same treatment and export assistance to renewable energy as it does to other U.S. industries. Currently, the Commerce Department's International Trade Administration handles export programs and has actively helped the renewable energy industry. In 1981, the Department of Energy and the Department of Commerce jointly sponsored a $500,000 trade development program that generated $3 million of immediate sales and another $60 million in projected 12-month sales.

4. It clarifies the original Congressional intent of PURPA to guarantee the right of

renewable energy small power producers to connect with the electric utility grid and to receive a fair and reasonable payment for the electricity they supply to the grid. The rate of payment should be based on the 100 percent replacement cost (or "full avoided cost") to the utility.

5. It expands the Small Business Innovation Act, which mandated that the Department of Energy and several other agencies set aside at least 1 percent of their research and development funds for small businesses, to guarantee that renewable energy businesses are included.

II. THE RENEWABLE ENERGY NATIONAL SECURITY ACT

The National Security Title uses three existing federal programs to establish a role for renewable energy in national defense planning and modernization. The expanded role of renewable energy and energy conservation will make the U.S. military more secure in its energy supply. Farmers will have access to liquid fuels (ethanol) produced domestically in times of petroleum shortages, a necessity at harvest time. The Department of Defense will have the access to information on production and fuel stockpiles of renewable energy technologies in times of natural emergencies. As a result, our nation will be prepared for unplanned cuts in conventional energy supplies.

1. The Act clarifies in legislative language that all renewable energy technologies and fuels and energy conservation equipment should be purchased when cost-effective. Language in the Defense authorization bill in 1982 directed the Department of Defense to procure only renewable energy generating devices. As the law stands, DOD should procure these technologies when cost-effective.

2. It directs USDA to assess the options for creating an alcohol fuels reserve and to report to Congress on its plan. In the provision, the Commodity Credit Corporation is directed to use spoiled and contaminated grains first for such a reserve and gives them the authority to store the ethanol fuel in an effective way.

3. It requires a two-page report from the Secretary of Defense on the feasibility of using mobile renewable energy generators such as photovoltaic cells and wood gasifiers to back up existing conventional energy supplies for military facilities in case of emergency.

4. It permits the Department of Defense access to other Federal databanks to collect information on the production capacity and stockpiles of renewable energy devices and fuels for use in emergencies. This information would be shared with the Federal Emergency Management Agency and others.

III. THE RENEWABLE ENERGY EMPLOYMENT ACT

This Employment Title uses two existing programs, the DOE weatherization program and the USDA Agricultural Extension Service to further energy conservation and renewable energy development in low-income housing stock and on small farms.

1. The Act requires that energy conservation and renewable energy skills be considered as allowable training skills in all renewable job training programs. The provision does not require these skills to be taught in each Federal jobs training program. It simply guarantees those programs that wish to provide this kind of training will be able to do so.

2. The Act reaffirms Congress' support of the DOE low-income weatherization program and requests level funding at the fiscal year 1983 level for the successive fiscal years.

3. The Act requires the Department of Agriculture to centralize information on low-energy, renewable energy farming practices and develop a process to convey this information to the Agricultural Extension Service. Agricultural agents can distribute the information and provide farm energy audits.

4. It requires the Farmers Home Administration Loan Programs (USDA) and the Urban Development Action Grant and Community Development Block Grant (HUD) to include renewable energy and energy conservation considerations as key components in the funding selection criteria.

IV. THE RENEWABLE ENERGY CONSUMER INCENTIVES ACT

Title IV uses existing federal programs to assist consumers in making informed decisions on renewable energy and energy conservation purchases and use. The Title also broadens existing programs that build consumer confidence in the use of renewable energy devices so that the transition to broad use of renewable energy takes place quickly.

1. It extends the residential tax credits to 1990 and directs the Internal Revenue Service to allow credits to be taken on both active and passive solar systems. The 40 percent tax credit for residential solar expenditures under current law expires in 1985.

2. It extends the authorization of the Solar Energy and Energy Conservation Bank until 1990 and directs the Bank to fund active solar applications, to treat single and multifamily housing equally, and to allow entities other than the states (e.g., cities, credit unions, banks) to participate in the Bank program.

3. It allows a small portion of funds appropriated for energy aid to be used to create formal information exchanges among governments at all levels to improve the effectiveness of energy programs. Through meetings, publications exchanges, or other means, the states will be able to learn from one another's experiences and to enhance the effectiveness of their energy programs.

4. This provision provides clearer authorization for three complementary renewable energy information programs now conducted by the federal government. The Technical Information Program of the Solar Energy Research Institute (SERI) produces technical documents for the commerical renewable energy sector that draws on highly technical information from specific research activities. The Conservation and Renewable Energy Inquiry and Referral Service (CAREIRS) provides general information and business referrals to consumers, through a toll-free phone number as well as by mail. The National Appropriate Technology Assistance Service (NATAS) will provide technical assistance to individuals designing and building their own renewable energy systems or devices.

5. It reaffirms Congress' intentions to provide consumers with energy-efficiency labels on automobiles and appliances so they can make informed purchasing decisions. This provision also directs the Small Business Administration Energy Loan Program to fund small renewable energy businesses for the testing of their new products.

6. It requires state electric utility regulatory commissions to implement programs under which electric utilities make available standardized interconnection and power purchase contracts under PURPA for renewable energy electric systems of less than 100 kW.

7. It requires all federal agencies to submit yearly reports of not more than 15 pages to Congress on their energy conservation and renewable energy program's impact on the production or use of renewable energy and energy conservation. In addition, it requires the Department of Energy in its Monthly Energy Review to include national statistics on energy conservation and renewable energy use as it does with other energy sources. Finally, the provision requires information from the Department of Commerce on the impact of renewable energy exports on the international balance of payments of the U.S.; and the Department of Labor on the employment generation of the renewable energy and energy conservation industries in the U.S. and the Department of Energy on the imported petroleum displacement.●

● Mr. BUMPERS. Mr. President, I am pleased to join the Senator from New Mexico in introducing the Solar Energy National Security and Employment Act of 1983, which we are calling the SENSE Act, because it makes such good sense. It recognizes the potential of renewable energy sources, not only in lessening our energy problems, but also in providing employment. It also recognizes the contribution which renewables can make to our national defense and to the economy by expanding export markets.

The potential of renewable energy sources is unmatched by any nonrenewable energy. The Department of Energy's second national energy plan estimated that renewables could provide as much as 28.5 quadrillion Btu a year by the year 2000. Such an achievement would represent more than 35 percent of current consumption or 24 percent of projected consumption in the year 2000. Admittedly, the DOE estimate is of the technical limit, but even the maximum practical amount of 18.5 quadrillion Btu is extremely impressive. It would equal 16 percent of the projected demand.

The recent growth of the photovoltaic industry demonstrates that the DOE projections may be achieveable. In 1981, domestic producers of photovoltaics sold 40 percent more cells than in 1980, and in 1982 the industry grew an additional 40 percent. It also attracted an additional $2 million in capital investment. Since this growth occurred during the worst recession since the Great Depression, it is truly stunning. The industry's future potential is even more impressive. DOE has estimated that the world market could increase by the year 2000 to 400 megawatts, an increase of 47 times the current sales.

It is essential for us to remove any barriers to the production of photovoltaics and other devices using renewable energy sources so that they will be able to compete in both the world and domestic markets. That is what the SENSE Act does.

Certainly one of the barriers to greater development of renewables is simply lack of information. Consequently, the SENSE Act would require the Department of Agriculture to centralize its information on low energy farming and disseminate it through the Agriculture Extension Service. It would also use the Service to coordinate a national rural energy service to identify methods of fertilizing, harvesting, and processing food without imported oil. Small farms hold great potential for using photovoltaic cells in irrigation systems. DOE has estimated that there are 50 million farms throughout the world that could use solar power where diesel-powered irrigation systems are not cost-effective. We should begin to develop that market.

Similarly, the SENSE Act requires the Department of Defense to assemble existing data on the location of renewable energy stockpiles and production facilities. It would continue the Conservation and Renewable Energy Inquiry and Referral Service, the National Appropriate Technology Assistance Service, and the technical information program at the Solar Energy Research Institute. These offices would disseminate existing information concerning renewable energy to consumers who are interested in installing devices to use renewable energy. It would also require a coordinated communications network among Federal, State, county, city, and other local governments in order to assure fuller awareness and use of available renewable energy sources.

In addition, the act recognizes the value of renewables in increasing employment. It would include renewable energy production, installation, and maintenance as allowable occupations eligible for Federal job training and placement purposes. It would require the Department of Labor to report to Congress the impact of renewable energy industries upon employment.

Furthermore, the act would help promote the export of renewables by creating a 12-percent set-aside of the Export-Import Bank's loan authority for small businesses. It also instructs the Department of Commerce International Trade Administration to treat renewable energy as a discrete industry sector which will help stimulate exports.

None of these provisions will require additional appropriations. In fact, the only provision with a substantial budget impact is the extension and increase of the energy tax credits. This change may cost as much as $333 million per year, but it will probably be less, especially when we take into account the effect of reduced business deduction for fuel costs. Moreover, this budget impact is necessary in order to put renewable energy sources on a footing more equal to its domestic competition, oil and gas, which received tax subsidies totaling $6.4 billion in 1982. By comparison, the energy tax credits totaled $1.1 billion. Since consumers and investors will choose tax considerations, there should be some sort of equality.

I have stressed the market opportunities which lie ahead for renewable energy, but we cannot forget their great environmental benefits. These sources have no emissions or effluents or wastes. They require no scrubbers, dumps, filters, or disposal sites. We will never need a Superfund to clean up a photovoltaic array. It will never require a waste disposal bill.

Just as we cannot ignore these market opportunities, neither can we ignore the consequences of failing to seize them. Just as we cannot ignore their benefits, neither can we ignore the damage stemming from failure to enjoy them. The report to the President called Global 2000 estimated that by the year 2000 worldwide demand for oil would exceed supply by 15.2 million barrels per day, an amount equal to 30 percent of anticipated demand. If this gap is not filled with energy from renewables, at least in part, Global 2000 concludes that it will require far higher prices, slower economic growth, and stronger Government policies. The energy report of the Harvard Business School, Energy Future, concluded that the United States would have two choices, either to import more oil or to conserve and use renewable energy sources. If the oil will not be available, there is only one choice, renewable energy.

Some might argue that we should build more nuclear plants and make more use of coal, but Global 2000 also contains the response to that approach. It estimates that with even moderate growth, emissions from some types of energy facilities will nearly double between 1985 and 1990 alone. For example, it estimates that emissions of tritium will increase from 361,000 curies to 655,000 curies and that solid high-level nuclear wastes will increase from 38.4 billion curies to 69.8 billion curies. Consequently, the exposure of people to radioactive materials will increase from 13,900 man-rems to 25,200 man-rems. This measure is usually given in millirems, that is in thousandths of a rem. The increase in a short 5 years would be enormous and possibly alarming. By comparison, no emissions will increase from the use of solar energy. It will not expose the population to radiation.

Finally, I should point out the clear precedent for Government involvement in developing such new technologies when the need is as pressing as it is here. For example, in the last century, when Congress concluded that railroads were necessary to hasten the development of the continent, it granted Federal lands to railroad companies. The Government similarly helped develop such divergent technologies as telegraphy, analog, and digital computers, scientific agricultural practices, radar and microwave communication, fixed-wing and rotary-wing aircraft, gas turbines, jet engines, and xerography. Most significant, the Government was instrumental in developing nuclear power, and it has provided essential support to the oil and gas industry through tax subsidies, the import quotas of the 1950's, and generous leasing policies.

The precedent is clear, the need is clearer and the opportunity is obvious. We must, at the very least, remove the obstacles to the development of promising renewable technologies. It makes good sense, and the SENSE Act will do it. I urge my colleagues to support this important legislation.●

By Mr. STENNIS (for himself, Mr. GOLDWATER, Mr. DOMENICI, and Mr. BUMPERS):

S. 617. A bill to promote the use of energy-conserving equipment and biofuels by the Department of Defense, and for other purposes; to the Committee on Armed Services.

RENEWABLE ENERGY NATIONAL SECURITY ACT OF 1983

● Mr. STENNIS. Mr. President, a great deal of this Nation's economic difficulties were caused by enormous increases in the price of oil and natural gas, especially imported energy, during the past 10 years. Out of this extremely difficult period we were taught the hard lesson of how vulnerable the industrial world was to the supply of energy and natural gas. This natural resource which had been taken for granted, is very limited.

Even if there is a temporary glut of oil and gas above the ground, there is a shortage beneath the ground. The clock is running on the supply of oil and natural gas. There is an urgent need to continue our development of alternate, abundant, and renewable sources of energy. Out of this urgency of need comes a great challenge and great opportunity for this country to offer scientific and engineering leadership to the rest of the world in the development of energy alternatives and energy conservation technologies. There are endless possibilities for research, experimentation, and development of new products and techniques which will alleviate the hardships caused by the current high costs of energy, especially the outrageous costs for heating and cooling our homes. And this effort will provide thousands of jobs for our scientists, and engineers, and technicians who pursue these new fields.

The Renewable Energy National Security and Employment Act of 1983 is a step in the right direction. This act

will coordinate existing Federal programs in renewable energy and conservation programs. It is my hope that this act will increase the efforts in this vital area and keep the focus of our scientific and technical community on the importance of developing new forms of energy and conservation to insure the prosperity of our Nation's future.●

● Mr. GOLDWATER. Mr. President, I am pleased to join today in introducing a bill to promote solar energy development and to coauthor with my distinguished colleague from Mississippi, Senator JOHN STENNIS, this bill which specifically relates to the use of solar and other renewable sources of energy at military installations. The legislation also encourages the development of storage facilities for alcohol produced from spoiled grain which would be utilized by farmers in times of national emergency.

The part of the Solar Energy National Security and Employment Act of 1983 authored by Senator STENNIS and myself is entitled "The Renewable Energy National Security Act of 1983." Many recent events, including our domestic economic recession, increased energy conservation, and the growing use of alternative and renewable sources of energy, such as solar, have substantially lessened our Nation's dependence on imported oil. However, we still depend on imported oil for over 30 percent of our daily petroleum needs. Because oil is a diminishing resource, it must in the long run be replaced.

Mr. President, I know my colleagues have heard these statements many times, but I believe they are worth repeating. Our large importation of foreign oil negatively affects our balance of trade. It feeds inflation and destroys job opportunities. It affects the foreign policy decisions because of the related need to protect foreign oil suppliers when other choices might be better for us. This oil dependence strikes directly at our national security. Obviously, it is not in the best interest of this country to allow this vulnerability in our energy supply to continue.

The Renewable Energy Security Act of 1983 encourages our military to utilize solar and other renewable sources of energy at military installations. The bill also asks the Department of Energy to maintain a data base of the locations of stockpiles of renewable fuels and production facilities. The possible use of mobile renewable energy production and conversion systems for use at military bases in times of shortages will be studied by the Department of Defense as part of this bill. The Department of Agriculture is given the authority to utilize waste commodities and surplus agricultural products for alcohol production to be used by farmers during times of fuel emergencies in order to assure a continuing supply of fuel for the agricultural sector.

Mr. President, I believe we must move toward energy independence at a faster rate in order to make certain that our economy and our national defense are much less influenced by external energy factors and the actions of other countries.●

By Mr. PERCY (for himself, Mr. PELL, Mr. DOMENICI, and Mr. BUMPERS):

S. 618. A bill to revise certain Federal training and economic development programs to create jobs and develop skills in renewable energy and energy conservation industries, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RENEWABLE ENERGY EMPLOYMENT ACT

● Mr. PERCY. Mr. President, today, together with my distinguished colleague from Rhode Island, I would like to introduce title III of the Solar Energy National Security and Employment Act.

This title emphasizes the role of the conservation and renewable energy in present Federal job training and placement programs.

I am particularly pleased to introduce this title because it captures three of my highest domestic priorities: job creation, energy conservation, and the development of a renewable energy industry in the United States.

Already, private industry has accomplished a great deal in this area.

As one of the cofounders of the Alliance to Save Energy, I think we can be very proud of the substantial progress made through more fuel-efficient automobiles and creative industrial and residential conservation programs.

As oil prices continue to break downward, we should not lose sight of the role conservation plays in lessening demand for overpriced imported petroleum. These conservation efforts must be continued until our importation of petroleum is at an absolute minimum.

Furthermore, the ethanol fuel industry in the United States has grown substantially in the last year. Ethanol-gasoline blends in 19 States, comprising the bulk of U.S. blend volume, were up 166 percent during the first 10 months of 1982 compared with the same period in 1981.

The increase in demand has created jobs in the United States and improved prices received by corn farmers.

A University of Illinois study reported that the ethanol and allied industries in the State have generated $1 million in additional income in 1981. Three thousand new jobs were created.

Title III of this legislation uses the Department of Energy weatherization program and the Agricultural Extension Service to further energy conservation and renewable energy development in low-income housing and on small family farms.

In summary here are the four major provisions of this important title:

First, requires that energy conservation and renewable energy skills training be allowable training activities in Federal job programs. The Joint Economic Committee reported that as many as 2 million jobs in this area could be created in the next 17 years.

Second, reaffirms Federal support for low-income weatherization programs and calls for the maintenance of the current $143 million Federal budget for these programs. This year 140,000 residences will benefit from lower utility bills as a direct and immediate result. This provision will help decrease the $2 billion the Federal Government pays annually to help low-income individuals pay their utility bills.

Third, requires the Department of Agriculture to centralize information on low-energy farming and convey this information through the Agricultural Extension Service.

Fourth, establishes renewable energy and conservation programs as key funding criteria for three large Federal economic development programs: the Farmers Home Administration, the urban development action grants (UDAG) program, and the community development block grants (CBDG) program. These programs have total funds of $4 billion and could be used as a valuable components of a low-capital, labor-intensive renewable and conservation industries.

Mr. President, the other titles of this legislation also merit enactment into law. These include titles pertaining to national security, small business, and consumer incentives.●

● Mr. PELL. Mr. President, I am very pleased to join with my distinguished colleague, Senator PERCY, today in introducing title III of the SENSE Act, the Renewable Energy Employment Act of 1983.

The Renewable Energy Employment Act is part of a four-title bill, the Solar Energy National Security and Employment Act (SENSE) developed in close cooperation with the solar lobby which attempts to again focus national attention and encourage a strong commitment by the Federal Government on the importance of renewable energy and conservation. The SENSE legislation integrates energy conservation and the use of renewable sources of energy, including wind, hydropower, and solar, into existing Federal efforts to create jobs, stimulate small business development, and enhance our national security.

Mr. President, the Reagan administration has for 2 years attempted to dismantle Federal renewable energy and conservation programs and to di-

minish the importance of the role that conservation and renewable energy can play in the American economy. The SENSE legislation attempts through strong congressional leadership and the outstanding efforts of the solar lobby to redirect our thinking toward the importance of renewable programs in revitalizing the American economy.

Title III of the SENSE legislation, the Renewable Energy Employment Act is a critical part of this renewable energy employment initiative. It is of great importance for many individuals across the Nation and in Rhode Island who are unemployed, and those who are deeply concerned about job security and job retraining in new career fields.

The provisions of title III have the potential to respond to some of these concerns almost immediately and with dramatic impact. Specifically, title III reaffirms the Nation's present commitment to low-income weatherization programs and funding at the fiscal year 1983 appropriation level—$143 million. The proposed measure will also include renewable energy and conservation production, installation, and maintenance activities as allowable occupations eligible for all Federal job training and placement programs.

In addition, the Renewable Energy Employment Act will target funds for renewable energy and conservation efforts in existing major development programs including the Farmers Home Administration loan program, urban development action grants, and community development block grants and urge that specific funds within each program be set aside for renewable energy and small business development.

Mr. President, the impact of the SENSE legislation and specifically the Renewable Energy Employment Act on the American economy would be significant.

According to a 1979 report for the Joint Economic Committee, a major solar and conservation investment could create 2.1 million jobs by 1990. In addition, such a major commitment to renewable energy over the next decade would result in a savings of an estimated 44.9 quads (Btu's) of energy per year, or an equivalent of 7.7 billion barrels of crude oil annually—quite impressive when compared to the estimated 100 quads (Btu's) that we are expected as a country to use every year if we continue our current rate of energy consumption. In this regard I ask unanimous consent that an article from the Christian Science Monitor on the employment potential from a renewed national effort on conservation and renewable energy be inserted in the RECORD at the end of my remarks.

Mr. President, I believe it is clear, considering an employment potential of 2.1 million jobs along with substantial energy savings which mean fewer dollars leaving our country and more for business development, that we must incorporate energy conservation and renewable energy development as an integral part of our domestic economic programs. We must also insure that American workers are trained appropriately for these new opportunities. At present, tragically, over 10 percent of the American work force is unemployed. Now is not the time for the Government to abandon its involvement in the development of the solar and conservation industries.

The United States now has an opportunity to shift its energy policy from one that is centered upon nuclear power and the polluting, finite fossil fuels industry which employs relatively few people per dollar of investment to a policy based on energy efficiency and renewable resources. Such a shift will help preserve our environment and create the jobs we so desperately need.

I hope my colleagues will strongly support this critical SENSE initiative.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Feb. 7, 1983]

A WAY TO HELP PUT AMERICA BACK TO WORK—AND SAVE ENERGY

(By Leon Lindsay)

SAN FRANCISCO.—One of the best job-producing moves government could make, according to energy-conservation advocates, would be an investment in weatherization and solar-energy devices for homes and businesses across the United States.

People involved in such conservation activities say their potential for producing new jobs, business expansion, and energy savings has been demonstrated. A much larger commitment than has been proposed either by the Reagan administration or congressional Democrats is justified, the conservationists argue.

A $5.4 billion Democratic jobs bill, passed by the US House late last year but not acted upon by the Senate, would have provided $250 millon for weatherproofing homes and apartments occupied by low-income residents.

Although Department of Energy funding for conservation projects is cut almost in half in President Reagan's proposed fiscal 1984 budget—from $670 million in fiscal '83 to $383 million in the budget year beginning next July 1—statistics gathered over the past several years by agencies involved in weatherization and solar energy projects indicate these activities are very efficient employment stimulators.

The Solar Lobby in Washington, D.C., will announce later this month a "Solar Energy, National Security, and Employment Act." The measure would provide major impetus to the energy conservation effort. it will not require any new funding in fiscal 1984, according to Scott Sklar, the lobby's political director.

The bill has four parts, explains Mr. Sklar, dealing with small business, national security, employment, and consumer information. "Basically they either protect or broaden certain programs to help renewable energy or extend programs that are due to be cut off in the future," he says. Energy tax credits for small businesses and homeowners, due to expire in 1985, would be extended to 1990. Under the bill, skill training for workers in renewable energy and conservation activities, such as solar and weatherization, would be allowable in all federal jobs programs.

A bipartisan group of 20 US senators and representatives, several of them chairmen of key committees, are sponsoring the legislation.

Ted Rauh, chief of the Division of Conservation of the California Energy Commission, points out that conservation activities are a close second to highway construction in providing jobs and stimulating business activity—with the added benefit of cutting energy consumption and costs. Energy efficiency programs and businesses in California provided $750 million worth of jobs and investments in 1982, Mr. Rauh reports.

Researchers for the AFL-CIO's Industrial Union Department project that energy conservation activities could create 600,000 jobs by 1990.

Michael Gordon, program director of The Institute for the Human Environment in San Francisco, says: "An expanded effort to 'button up our homes' would provide many thousands of jobs in both the public and private sectors—through production of home weatherization materials; retail sales of insulation, weatherstripping, caulk, water-heater blankets, low-flow shower heads, and other products; and the organization, administration, and implementation of coordinated local weatherization programs throughout the United States."

He cites Santa Clara County, Calif., as an example. It is estimated, Mr. Gordon says, that "if even 25 percent of homes in the county needing weatherization were made energy-efficient, almost $30 million in local sales of material could be realized."

Portland, Ore., which began an ambitious weatherization and energy-conservation program in 1979, provides impressive evidence of what it can mean to a local economy.

According to Jeanne McCormick, director of the Portland [Ore.] Energy Office, that city's weatherization and energy-conservation program has produced many benefits in terms of residential and business savings—and jobs saved as well as created. "We have found," she says, "that, generally, investment of $15 million by local businesses in such projects such as insulating buildings, or changing to more energy-efficient ways of making their products, create—directly—525 jobs.

"There's not only the contractor who comes in to do the job, there are engineers who perform energy audits and architects who design changes. Then there's what we call the "leveraging effect," where you have the secretary who works for the contractor, and so forth.

"We have done energy audits for 146 small businesses, which have been able to cut energy consumption [an average of] 19½ percent as a result. Even though energy costs in Portland are lower than in many other areas of the country, those firms collectively are saving $525,000 a year. They can reinvest that money in expansion.

"So it's not just the number of jobs created by the weatherization itself, but how much money that business saves that can be used to diversify or expand or spend on training or use it to keep people on the job."

Mrs. McCormick and others point out that little retraining of workers is involved in these energy-conservation activities. Most

come from the existing pool of unemployed skilled workers—carpenters, pipefitters, boilermakers, and plumbers, and others in light construction and light manufacturing. Other direct and indirect positions are created in marketing, retail sales, business management, lending, and the appraisal and real estate fields.●

By Mr. TSONGAS (for himself, Mr. COHEN, Mr. DOMENICI, and Mr. BUMPERS):

S. 619. A bill to reauthorize, extend, and enhance existing Federal programs to encourage conservation and the use of renewable energy by this Nation's consumers; to the Committee on Finance.

RENEWABLE ENERGY CONSUMER INCENTIVES ACT

● Mr. TSONGAS. Mr. President, though our energy problem appears to have abated with the disarray of OPEC and falling oil prices, I continue to believe that our energy situation is one of the most serious long-term threats to our economic and military security. That is why I am proposing today that the Senate consider the Solar Energy National Security and Employment Act.

Our energy vulnerability, and that of our allies, is still serious. Widening of the Iraq-Iran war, sabotage of critical oil facilities in the Mideast, or an assassination could precipitate the drastic price rises and global market disruptions that we have suffered in the past. As the world pulls out of the current recession, increasing oil demand could fuse OPEC back together again.

In this country, we continue to draw down our finite fossil resources. Pollution arising from energy production and consumption is still a serious and growing threat to our environmental quality and our health. As scientific evidence accumulates on acid rain and carbon dioxide, we will face increasing constraints on our ability to use coal.

Energy costs still represent a significant burden on most consumers. Oil imports continue to drain our country of tens of billions of dollars. The energy problem is still a reality, and energy efficiency and renewable resources must be the central elements of our response.

Ultimately, we must make the transition to renewable resources. The sooner we adopt more efficient energy utilization technologies and develop renewable energy sources, the easier that transition will be and the sooner we will enjoy the environmental and economic benefits that conservation and renewables can provide.

The current oil glut gives our Nation an opportunity to draft policy dispassionately. So far, our energy policy has been shaped by crises: the oil embargo, the natural gas shortage, the coal strike, and the Iranian oil cutoff. Each crisis resulted in a new set of Government programs—programs that have recently been sharply criticized.

Created during crises, these programs have had little opportunity to move up the learning curve. Frequent reorganization, large and rapid swings in annual budgets, unrealistic goals, and little regard for problems of implementation—all have plagued our Nation's energy program. But, there have been significant successes. Our technology has advanced because of Government supported R&D. Energy prices more realistically reflect the value of our energy resources. There is fairly widespread recognition of our energy vulnerability. The benefits and importance of energy efficiency and renewable resources are broadly acknowledged. Incentives for conservation and renewable resources have been enacted to offset the longstanding subsidies to conventional sources. We are also beginning to understand which programs have worked and why.

But the Reagan administration has brought a radically different—and I believe misguided—approach to energy policy. The administration believes that energy is not a priority, that it does not merit a Cabinet-level department. The administration takes an ideological approach, maintaining that the free market should determine which technologies are developed and adopted.

In carrying out this approach, the administration has tried to eliminate virtually every solar and conservation program that the last three Congresses have enacted, including tax credits, information programs, the Solar and Conservation Banks, and solar R&D. Yet the administration has not put in place any monitoring programs to determine whether the private sector is assuming responsibility for existing technology programs. And the administration has not applied its approach consistently, leaving the nuclear budget undiminished while slashing solar, conservation, and fossil budgets.

The administration justifies its efforts by asking us to rely on the free market. But does a free market in energy exist and will it result in a level of renewable energy development consistent with the national interest? I believe not. There are significant market imperfections that inhibit the market from performing optimally:

Energy prices. Energy prices do not reflect the national security costs or the environmental costs inherent in conventional energy sources. Energy prices also reflect average costs, not marginal costs, thus consumers undervalue energy conservation and renewable resources.

Capital availability. For the market to work, individuals must be free to respond to price signals by substituting capital for energy. If capital is too expensive for most individuals or is not readily available, then economically attractive investments are discouraged.

Discount rates. Individuals tend to avoid investments that have paybacks greater than 2 years. This rate of return is much higher than the social discount rate or the effective discount rate used in conventional energy sources.

Information. Even when price signals are accurate and capital is available on attractive terms, individuals need to have access to reliable information about the benefits and costs of various energy options.

Frustration factor. For many, the difficulty in learning about alternative energy sources, evaluating savings, obtaining loans, and selecting contractors is discouraging. It is thus often easier to pay higher bills each month than make the up-front investment no matter how economically attractive.

These and other factors result in smaller investments in renewable resources than is economically justified. Thus, through a range of programs, the Government has sought to encourage increased utilization of renewable resources.

While Congress has largely rebuffed the administration's proposals to eliminate the solar programs outright, funding cutbacks have taken their toll. The administration's de facto dismantling of the Department of Energy has also diminished its capacity to develop and carry out a rational, balanced energy policy. We are in danger of backtracking on all of the gains we have made since 1973.

It is time to launch a counteroffensive to regain the national initiative on renewable energy resources. The Solar Energy National Security and Employment Act (SENSE) is the opening salvo in this effort. I am proud to be part of it and pleased to sponsor title IV, the Renewable Energy Consumer Incentives Act.

This title encompasses a range of important programs for correcting market imperfections that affect the purchasing of renewable resources. The title reauthorizes the Solar and Conservation Bank, which I authored in 1980, and provides low interest loans for solar and conservation investments. It extends the 40 percent renewable energy tax credits and expands them to include passive solar. It maintains and coordinates consumer information services and requirements for appliance and auto efficiency labeling. It requires utilities to implement standardized power purchase agreements with individuals who install renewable energy equipment.

This title, combined with the other three titles, adds up to a coordinated Government policy in support of renewable resources. I urge my colleagues to examine it, consider it, and cosponsor it. Our energy future depends on it.

Mr. President, I ask unanimous consent that the following factsheet prepared by the Solar Lobby be printed in the RECORD.

Mr. President, I also ask unanimous consent that the text of the bill that I am introducing with Senator COHEN and others be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 619

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Renewable Energy Consumer Incentives Act of 1983".

FINDINGS AND POLICY

Sec. 2. The Congress hereby finds that—

(1) the United States of America is dependent upon a finite and diminishing energy resource base;

(2) energy is the lifeblood of every industrialized nation and, therefore, lasting economic prosperity is linked ultimately to access to plentiful and affordable energy resources;

(3) energy conservation and the development of domestic renewable energy technologies is of vital importance to our Nation's future;

(4) continuing the Federal energy conservation and solar energy tax credits and loan programs is critical to maintaining and expanding the market for energy conservation and renewable energy products;

(5) the coordinated dissemination of information regarding renewable resources that is not provided by the private sector is necessary for consumers and business to respond to the market;

(6) requirements for labeling of appliances and automobiles are essential for consumers to make informed purchasing decisions on the basis of energy efficiency;

(7) the private sector, especially small business, may benefit from financial assistance for the testing of new energy products, and that this assistance can be provided through existing Federal programs;

(8) standardized and streamlined methods for interconnecting into utility grids should be made available to individuals using renewable energy electrical generating equipment on their residences; and

(9) Federal agencies administering energy programs should provide information annually, in a brief form, on the contributions renewable energy and energy conservation have made to our balance of payments, the generation of employment, and the displacement of imported petroleum.

SOLAR ENERGY AND ENERGY CONSERVATION BANK

SEC. 3. (a) Section 505(a) of the Solar Energy and Energy Conservation Act of 1980 is amended by striking out the last sentence and inserting in lieu thereof "The Bank shall not exist after September 30, 1990."

(b) Section 509 of such Act is amended by adding at the end thereof the following:

"(d) Payments by the Bank to financial institutions made pursuant to section 509(1)(B)(i) shall allocate a portion of their funds for active type solar energy as defined in section 504(6).

"(e) No Federal preference shall exist with regard to financial assistance between single family residences and multifamily residences.

"(f) Subject to the conditions contained in sections 513, 514, and 515 and limitations in sections 516 and 517, that all financial institutions are permitted to apply directly to the Bank for funding and shall not be limited to apply directly for funds through State governments.".

(c) Section 522(a) of such Act is amended by—

(1) striking out "and" after the semicolon in clause (3); and

(2) by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(5) the sum of $875,000,000 for fiscal year 1985 and for each of the succeeding five fiscal years, of which sum for any such fiscal year not more than $7,500,000 may be used to carry out section 581.".

(d) Section 522(b) of such Act is amended by—

(1) striking out "and" after the semicolon in clause (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) the sum of $250,000,000 for fiscal year 1985 and for each of the succeeding five fiscal years, of which sum for any such fiscal year not more than $7,500,000 may be used to carry out section 518.

RENEWABLE ENERGY RESIDENTIAL TAX CREDITS

SEC. 4. (a) Section 44C(c)(4)(A)(viii) of the Internal Revenue Code of 1954 is amended by inserting after "dwelling" the following: "including any item that serves a purpose in addition to energy efficiency such as thermal draperies)".

(b) Section 44C(c)(5)(A)(i) of such Act is amended by adding after "solar energy" the following: "(including the passive type based on convective, conductive, or radiant energy transfer and which has significant impact on home energy savings)".

(c) Section 44C(f) of such Act is amended by striking out "1985" and inserting in lieu thereof "1990".

COORDINATION OF EXISTING ENERGY INFORMATION PROGRAMS ON THE STATE AND LOCAL LEVEL WITHIN THE UNITED STATES

SEC. 5. (a) Subsection (f) of section 2604 of the Low-Income Home Energy Assistance Act of 1981 (Public Law 97-35; 95 Stat. 893) is amended by—

(1) striking out "or" at the end of clause (2);

(2) adding "or" after the semicolon in clause (3);

(3) adding after clause (3) the following:

"(4) support of energy related information systems; and"; and

(4) striking out "and (3)." at the end of the first sentence and inserting in lieu thereof "(3), and (4).".

(b) The Secretary of Energy shall establish a process for the solicitation and consideration of views of—

(1) units of local government;

(2) regional councils;

(3) Indian tribes within the States;

(4) local educational agencies;

(5) not-for-profit and private sector organizations; and

(6) the public,

to develop a formalized exchange of information on the Federal, state and local levels so as not to duplicate information programs and provide the most efficient form of assistance to encourage the public to utilize conservation and renewable energy.

(c)(1) For the purpose of providing financial assistance to the States and local governments pursuant to this section, there is hereby authorized sums of money that may be considered appropriate by the Secretary of Energy under section 512 of the National Energy Extension Service Act (Public Law 95-39).

(2) For the purpose of cataloging information on Federal, State and local energy programs, the Secretary of Energy shall make available information on these various programs to other relevant Federal agencies and the appropriate arms of Congress such as the General Accounting Office, the Congressional Research Service, and the Office of Technology Assessment.

MAINTAINING ENERGY INFORMATION SYSTEMS

SEC. 6. Section 8(a) of the Solar Energy Research, Development, and Demonstration Act of 1974 (Public Law 93-473) is amended to read as follows:

"(a)(1) In carrying out his or her function under this Act, the Secretary of Energy, utilizing the capabilities of the Solar Energy Research Institute and other Federal laboratories and contractors of the United States Department of Energy involved in solar research and development activities, as well as other appropriate Federal agencies, shall maintain a continued program whereby information reflecting the latest results of federally-funded research and development activities is developed, centrally compiled, and transferred to the private sector in a timely, accurate and easily understandable manner.

"(2) Information to be developed and compiled shall include—

"(A) technical information including articles, dissertations and reports on renewable energy research and development;

"(B) information on the design, construction, an maintenance of equipment utilizing renewable energy;

"(C) information on the physical and chemical properties of materials required for renewable energy utilization; and

"(D) nontechnical information that affects renewable energy utilization, such as legal and environmental considerations of the commercial sector and prospective solar energy users.

"(3) In accordance with regulations prescribed under section 12, the Secretary of Energy shall take the appropriate steps to facilitate the timely transfer of the information described in paragraph (2) to—

"(A) the private sector;

"(B) universities, colleges and other educational institutions for their related research; and

"(C) other Federal, State and local information systems and the general public and consumers who express interest in this information.

"(4) In carrying out this subsection, the Secretary shall—

"(A) take all possible steps to assure that complete information with respect to renewable energy and conservation technologies, systems and components is made on a continuing basis to the general commercial sector and the concerned American public and is available in printed fashion and accessible by a toll-free telephone service to be known as the 'conservation and Renewable Energy Inquiries and Referral Service';

"(B) establish a 'National Appropriate Technology Assistance Service' (NATAS) to

provide individualized technical assistance to persons, local organizations, communities, and local governments seeking to apply self-built renewable energy and energy efficient technologies to cite specific applications by such methods as—

"(i) collecting and assessing data on small-scale renewable energy technologies;

"(ii) providing detailed, individualized, technical assistance to persons through available publications, bibliographies, and technical counseling; and

"(iii) cooperating closely with other providers of information to avoid duplication and publicize the service provided by NATAS; and

"(C) utilize, when feasible, existing scientific and technical information previously developed through Federal funding in order to prevent duplication and to ensure efficient operations.".

AUTOMOBILE AND APPLIANCE ENERGY EFFICIENCY LABELING

SEC. 7. Section 502(e) of the Motor Vehicle Information and Cost Savings Act is amended by—

(1) striking out "and" after the semicolon in paragraph (3);

(2) redesignating paragraph (4) as paragraph (5); and

(3) inserting after paragraph (3) the following:

"(4) the use or integration of renewable fuels and any other approach which maximizes conservation and renewable energy applications; and".

(b) Section 324(a)(1) of the Energy Policy Conservation Act is amended by inserting after "The Commission", the following: ", particularly in cases where there is a direct consumer benefit to save energy or utilize renewable energy,".

(c) Section 7(l)(1) of the Small Business Act is amended by inserting after "service any of the following energy measures," the following: "and reduced rate loans may be provided under this subsection to assist any qualified small business concern to acquire system performance ratings from testing laboratories for energy conservation and renewable energy systems and technologies:".

PROVISION FOR REQUIRING STANDARDIZED PURPA CONTRACTS

SEC. 8. Section 201 (f) of title 11, United States Code, is amended by adding at the end thereof the following:

"(3) Beginning on or before the date after any rule is prescribed by the Commission, with respect to this provision, each State regulatory authority shall, after notice and opportunity for public hearing and after consultation with each electric utility for which it has ratemaking authority, implement standardized contracts for renewable energy systems generating less than 100 kilowatts—

"(A) for the sale of electric energy from each utility for which it has ratemaking authority to any qualifying small power production facility; and

"(B) for the purchase of electric energy produced by any qualifying small power production facility to any electric utility for which it has ratemaking authority.".

FEDERAL REPORTING REQUIREMENTS

SEC. 9. (a) The Department of Energy shall include renewable energy as a discrete energy sector in all of its publications of "The Monthly Energy Review".

(b) Each Federal agency with programs that deal with renewable energy, shall submit to Congress an annual report of no more than fifteen pages, on their programs' impact on the production and utilization of domestic renewable energy resources, technologies and fuels, and energy conservation systems and measures.

(c) An annual report of at least two pages, shall be submitted to the appropriate committees of the Congress from—

(1) the United States Department of Commerce and the United States General Accounting Office, on the contribution of renewable energy to the United States' international balance of payments;

(2) the United States Department of Labor, on the impact of renewable energy and energy conservation industries on domestic employment levels; and

(3) the United States Department of Energy, or the quantities of imported energy displaced by renewable energy and energy conservation.

(d) All the reports required for the purposes of this section shall be submitted no later than thirty days after the close of each fiscal year.●

● Mr. COHEN. Mr. President, I am pleased to join with Senator TSONGAS in introducing the Renewable Energy Consumer Incentives Act as title IV of the Solar Energy National Security and Employment Act (SENSE). The SENSE Act is designed to better coordinate and sharpen the focus of Federal support for the development of renewable energy resources.

During the decade of the 1970's, energy issues dominated the national agenda. With the quadrupling of world crude oil prices following the 1973 oil embargo, many Americans began to change their habits and drive smaller cars and fewer miles. Thermostats were turned down and homes were insulated. Major changes occurred in the manner in which we used and thought about energy.

While all of us welcome the recent drop in energy prices, it remains clear that the United States still faces a major challenge in the energy area. The current glut of crude oil will not last and, in the absence of a continuing conservation effort, we could again find ourselves in serious trouble on the energy front. Rather than being complacent about our improved energy situation, we need to redouble our efforts to further reduce our dependency on foreign energy sources. In our volatile world, today's stability could easily become tomorrow's chaos.

The SENSE Act, which will be introduced today, is designed to further stimulate private investment in renewable energy resources. Increased development of renewable energy resources is critical to moving our Nation toward energy security.

Consumer motivation to invest in conservation and renewable measures stems largely from a desire to save money. The dramatic energy price increases of the past decade have demonstrated to consumers that reducing consumption is a wise investment. The decision to invest in conservation or renewable measures hinges on several factors: Whether reliable information on the systems and products can be obtained; whether the consumer has confidence that the system will produce the desired results; whether he is able to afford or finance such improvements; and whether he is assured of payback in a short-term period.

Title IV of the SENSE Act addresses these concerns by expanding a number of Federal programs that encourage private investment in energy conservation improvements and renewable energy measures. Before I discuss some of the provisions in title IV, I would like to comment briefly on the importance of removing market barriers to the increased application of renewable energy measures.

At present, there are a number of market barriers that inhibit private investment in energy efficiency and renewable energy measures. While oil decontrol was an important step in moving our Nation toward energy security, until all consumers pay the replacement cost of energy, our Nation's success in reducing consumption of traditional energy sources and moving toward greater use of renewables will be limited.

I must note that, hard as it may be for New Englanders to imagine, many people are unaware of how their energy habits affect their monthly energy bills. In these cases, increasing fuel prices will not alter a household's behavior. Consumers often lack sufficient information on the benefits of energy conservation and much of the information they do have access to is too complicated. This is especially true in apartments and condominiums where energy costs are included in monthly rents or condo fees. When a household pays a monthly fee based on aggregate energy use, there is little incentive to conserve.

Many homeowners lack practical knowledge about how to accomplish conservation and are unwilling or unable to pay for professional assistance. Moreover, they are often unwilling to pay a higher purchase price for a home that reflects the cost of insulation and other conservation measures.

Families are extremely mobile these days, reducing the prospects of recouping their investment costs. Without a 3- to 4-year payback, many homeowners are unwilling to make major energy investments. This is more evident in rental units where the tenants are almost certain to move before they can recoup any investment in energy efficiency equipment.

Another major impediment to increased energy conservation measures, both passive and active, is the inexperience of architects and builders in designing and installing such measures and equipment. All facets of the construction industry need to be provided with detailed and up-to-date technical

information on improving the energy efficiency of buildings.

Major household appliances such as furnaces, water heaters, and refrigerators pose an additional barrier to energy conservation. These appliances are usually purchased by builders, not homeowners, whose choices are often dictated by price rather than by energy efficiency. When consumers are purchasing appliances for themselves, their decisions are often influenced by price and/or appearance. Unless energy prices increase dramatically, appliance prices are likely to remain the major determining factor in selection. For example, the $20 to $50 annual savings that may be gained from using a highly efficient major appliance may seem insignificant to the buyer in comparison to the $20 to $300 in added costs for a highly efficient unit.

Studies have shown that while the individual energy savings from the use of efficient appliances may be minimal, the aggregate energy savings is quite significant. For example, if the efficiencies of space heaters and air conditioners were improved by 20 percent, 888,000 barrels of oil could be saved daily.

Until consumers become aware of the monetary benefits of purchasing energy efficient appliances and become confident of the seller's representation, many will continue to make unwise decisions.

Although rising prices provide a strong incentive for conservation, they present special hardships for low-income consumers who cannot meet increased fuel bills, and cannot afford energy conservation improvements. Many low-income families are spending nearly 40 percent of their disposable incomes on energy and, out of economic necessity, have reduced their energy consumption more than any other group in our society. These individuals can only further reduce their energy consumption by making permanent conservation improvements to their homes. Yet, many of these individuals are unable to afford such improvement even with the benefit of Federal energy tax credits. It is clearly in our Nation's best interest to continue to help these people reduce their energy consumption.

In an effort to overcome or minimize the aforementioned market barriers, a variety of Federal programs have been developed. Title IV of the SENSE Act broadens many of these programs. The principal Federal program to stimulate energy conservation and renewable energy development in the residential sector is the residential energy tax credit program authorized by the Energy Tax Act of 1978 and amended by the Crude Oil Windfall Profits Tax Act of 1980. This act authorizes tax credits of 15 percent for energy conservation investments up to $2,000, for a maximum credit of $300, and 40 percent for investments in renewable energy equipment up to $10,000, for a maximum of $4,000.

While residential energy tax credits have helped to overcome barriers, passive solar systems generally do not qualify for tax credits. Internal Revenue Service regulations preclude all components of passive solar systems which serve a dual function from being eligible for a tax credit. In effect, most passive systems do not qualify since, by design, they employ a combination of materials and components. As a result, very few homebuilders are utilizing passive solar designs because the front-end costs are so high. With interest rates high, most builders cannot afford to take such a risk. A tax credit for passive solar systems would reduce this risk substantially while, at the same time demonstrate benefits of passive solar construction. The SENSE Act will qualify passive systems for residential energy tax credits.

Although Federal tax credits provide an incentive for moderate and high-income families to make energy efficiency improvements and install renewable energy measures, the majority of low-income Americans are unable to benefit from them. The Solar Energy and Energy Conservation Bank was established to make loans to low-income families unable to afford such improvements. The SENSE Act will reauthorize the bank and insure that active solar applications are eligible for funding.

As I mentioned earlier, one of the primary obstacles to increased energy conservation and renewable energy applications is the lack of consumer information. Title IV of the SENSE Act will continue three Federal energy programs that provide consumers with information on renewable energy and energy conservation applications. The Conservation and Renewable Energy Information and Referral Service (CAREIRS) provides general information and business referrals to consumers, through a toll-free phone number as well as by mail. The National Appropriate Technology Assistance Service (NATAS) provides specialized technical information to individuals designing and building their own renewable energy systems. Finally, the technical information program of the Solar Energy Research Institute (SERI) produces technical documents for the commercial renewable energy sector.

To help the consumer to make more informed purchasing decisions, title IV will reaffirm energy-efficiency labeling for automobiles and appliances. If we are to increase our reliance on market forces to stimulate energy conservation, knowledge on the energy-efficiency of competing products is necessary. The marketplace simply does not provide complete and accurate information on all options.

The SENSE Act will also provide reduced-rate loans through the existing Small Business Administration energy loan programs for renewable energy small businesses to test their new products. This provision addresses the problem small businesses face in attempting to finance product testing in the current tight capital markets. Even if the small business is willing to take the risk, the lending institutions are frequently unwilling to participate.

While Federal, State, and local governments are each involved in establishing energy policies, they do not benefit from a transfer of information to one another. The SENSE Act authorizes a small amount of funds from the low-income energy assistance program to be used by States to establish a formal communications network between State, local, and Federal energy programs to prevent duplication.

In addition, title IV requires all Federal agencies to submit brief annual reports to Congress on their programs' impact on the production or use of renewable energy and energy conservation. There are currently no reporting requirements and we suffer from this lack of knowledge. A compilation of the Federal Government's application of renewable energy techniques and the savings which result will help to demonstrate the important role renewables play in reducing our dependency on foreign energy sources.

There are additional provisions in title IV which I will not mention in the interest of time. I urge my colleagues to review carefully these provisions as well as the preceding three titles.

In conclusion, I am pleased to be a sponsor of the SENSE Act, and in particular, title IV.

By broadening existing Federal programs that build consumer confidence in renewable energy equipment, title IV will expedite the transition to widespread use of renewables. Increased development of renewable energy sources is essential to our Nation's energy security.●

By Mr. LEVIN (for himself and Mr. RIEGLE):

S. 620. A bill to amend Public Law 89-668 relating to the Pictured Rocks National Lakeshore to require the development of a local land use plan and zoning regulations for the inland buffer zone; to the Committee on Energy and Natural Resources.

PICTURED ROCKS NATIONAL LAKESHORE LAND USE AND ZONING

● Mr. LEVIN. Mr. President, I am introducing legislation today for myself and Senator RIEGLE concerning Pictured Rocks National Lakeshore in the Upper Peninsula of Michigan. This bill

contains some technical modifications of an earlier version we introduced. These modifications are necessary so that the bill accurately reflects the agreement reached by the many groups that worked with my staff, Senator RIEGLE's staff, and the staff of Congressman DAVIS, including representatives of the Alger County Planning Commission, the Burt Township Zoning Board, the Friends of Pictured Rocks, and the Neighbors of Pictured Rocks. To avoid any confusion, I ask that the bill be printed in full in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 620

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 8 of the Act entitled "An Act to establish in the State of Michigan the Pictured Rocks National Lakeshore, and for other purposes" approved October 15, 1966 (Public Law 89-668; 80 Stat. 922) is amended by adding at the end thereof the following: "The Secretary is further authorized to acquire by transfer from any Federal agency, or by donation, property within the Grand Marais, Michigan and Munising, Michigan corporate limits lying outside the boundary described in section 2 for the purpose of providing visitor information and administrative centers for the National Lakeshore.".

SEC. 2. Section 10 of such Act is amended to read as follows:

"SEC. 10. (a) The Secretary shall be prohibited from acquiring by condemnation any (1) improved property within the inland buffer zone, or (2) any other property used in a manner consistent with zoning regulations as may be adopted by local units of government pursuant to section 12.

"(b) As used in this Act, the term 'improved property' shall mean any one-family dwelling on which construction was begun before September 1, 1982, together with so much of the land on which the dwelling is situated (such land being in the same ownership as the dwelling) as shall be reasonably necessary for the enjoyment of the dwelling.".

SEC. 3. Section 12 of such Act is amended to read as follows:

"SEC. 12. (a) Local units of government having authority to establish zoning regulations for the regulation of land uses within their boundaries and having lands within the inland buffer zone within their boundaries may, within one year of the date of enactment of this section, jointly develop a land use plan and zoning regulations for the regulation and management of land uses within the inland buffer zone.

"(b) The land use plan and zoning regulations shall set forth specific policies for use of the inland buffer zone which are compatible with the intent and purpose of the Pictured Rocks general management plan, as prepared pursuant to section 6 and the purposes of this Act and with the following objectives:

"(1) define land uses for the stabilization and protection of the existing character and uses of lands, waters, and other properties within such zone, the preservation of the existing shoreline and lakes, and the protection of watersheds and streams;

"(2) establish standards for the encouragement of the private development and operation of visitor service facilities including overnight lodging, camping, and similar facilities in appropriate locations;

"(3) provide for the maximum economic utilization of the renewable resources through sustained yield timber management and other resource management;

"(4) maintenance and improvement of roads which provide access to and from the Pictured Rocks National Lakeshore; and

"(5) provide for the establishment of standards for improved residential properties and other appropriate land uses.

"(c) Zoning regulations developed by local units of government pursuant to this section shall provide for, among other things, the granting or denial of variances to such regulations and the continuance of land uses in existence prior to September 1, 1982, and shall, to the maximum extent possible, be consistent with State zoning laws and existing local zoning regulations.

"(d) The land use plan and zoning regulations adopted pursuant to this section shall be subject to the approval of the Secretary of the Interior, pursuant to the following procedure:

"(1) Within thirty days of completion of a land use plan and zoning regulations pursuant to this section, the local units of government shall hold a public hearing to present such plan and regulations for public review and comment. After the public hearing, the local units of government shall, within thirty days, make any changes or modifications in the land use plan and zoning regulations deemed necessary in light of the public comments received, and shall submit the land use plan and zoning regulations to the Secretary of the Interior for review and approval.

"(2) After receiving a plan and regulations submitted pursuant to paragraph (1), the Secretary shall have one hundred eighty days in which to review the plan and submit in writing to the local governments his approval or his specific objections and reasons for such objections regarding all or any part of the land use plan and the zoning regulations. If the Secretary objects he shall propose alternatives in accordance with his objections. The Secretary may hold a public hearing on the land use plan and zoning regulations as part of this review.

"(3) Upon disapproval by the Secretary of all or any part of the land use plan or the zoning ordinance, the local units of government shall have sixty days to make any changes or modifications necessary to bring the plan or the zoning regulations into conformance with the written objections of the Secretary. The local units may request a meeting with the Secretary or his designee to negotiate what changes or modifications need to be made in the land use plan or zoning regulations. If such a meeting is requested, the local units of government shall have an additional thirty days from the date of the meeting to make any changes and modifications necessary for approval.

"(e) Upon final approval of a land use plan and the zoning regulations by the Secretary, the land use plan and the zoning regulations shall be formally adopted, administered, and enforced by the local units of government pursuant to applicable State law.

"(f) In the event the Secretary determines under applicable State law that a land use within the inland buffer zone is inconsistent with the zoning regulations as may be adopted pursuant to this section, the Secretary shall petition the appropriate local zoning body to take remedial action pursuant to the provisions of such zoning regulations before the Secretary may initiate condemnation proceedings against such property.

"(g) Zoning regulations adopted by local units of government pursuant to this section may be changed or amended at any time in the same manner, and subject to the same procedure as adoption of the original ordinance.".

SEC. 4. Section 14 of such Act is amended to read as follows:

"SEC. 14. (a) There are hereby authorized to be appropriated not more than $6,873,000 for the acquisition of lands and interests in land in connection with, and not more than $26,780,800 for development of, the Pictured Rocks National Lakeshore.

"(b) There is authorized to be appropriated up to $350,000 annually for the maintenance and improvement of primary access roads within the boundary of the National Lakeshore as described in section 2 without regard to whether title to such road rights-of-way is in the United States, provided that such annual appropriations are authorized for a period not to exceed five years, beginning October 1, 1983.".●

By Mr. BYRD:

S. 621. A bill to place signs memorializing the New River Gorge Bridge as the world's largest steel-arch span bridge; to the Committee on Environment and Public Works.

NEW RIVER GORGE BRIDGE

Mr. BYRD. Mr. President, today I am introducing a bill to permit recognition of one of the world's great engineering wonders, the New River Gorge Bridge in West Virginia.

My bill authorizes the Secretary of Transportation, in cooperation with State officials, to permit signs memorializing the New River Gorge Bridge as "the world's largest steel-arch span," to be placed along U.S. Highway 19 in Fayette County.

The bridge has to be seen to be appreciated, but a short description is in order. The bridge rises 876 feet above the New River, making it the highest span east of the Mississippi River, and the third highest in the United States. It is 3,030 feet long—reportedly the longest in the world—and required 42.8 million pounds of structural steel for its construction.

The New River Gorge Bridge is an engineering marvel that spans a beautiful, untamed river valley in my State. My bill will provide the recognition that this amazing structure deserves.

ADDITIONAL COSPONSORS

S. 13

At the request of Mr. DOLE, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 13, a bill to amend the Internal Revenue Code of 1954 to decrease the holding period for long-term capital gain treatment from 1 year to 6 months.

S. 17

At the request of Mr. DOLE, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Montana (Mr. BAUCUS), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of S. 17, a bill to expand and improve the domestic commodity distribution program.

S. 26

At the request of Mr. HELMS, the name of the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 26, a bill to provide legal protection for unborn human beings and for other purposes.

S. 27

At the request of Mr. MOYNIHAN, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 27, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes.

S. 107

At the request of Mr. THURMOND, the names of the Senator from Iowa (Mr. GRASSLEY), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of S. 107, a bill to establish the Veterans' Administration as an executive department.

S. 137

At the request of Mr. ROTH, the names of the Senator from Montana (Mr. BAUCUS), the Senator from South Dakota (Mr. PRESSLER), and the Senator from Georgia (Mr. MATTINGLY) were added as cosponsors of S. 137, a bill to amend the Internal Revenue Code of 1954 to continue to allow mortgage bonds to be issued.

S. 210

At the request of Mr. HELMS, the name of the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 210, a bill to provide legal protection for unborn human beings and for other purposes.

S. 212

At the request of Mr. PRESSLER, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 212, a bill to authorize funds for the U.S. Travel and Tourism Administration.

S. 216

At the request of Mr. THURMOND, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 216, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 217

At the request of Mr. THURMOND, the name of the Senator from Alabama (Mr. HEFLIN) was added as a cosponsor of S. 217, a bill to reform procedures for collateral review of criminal judgments, and for other purposes.

S. 250

At the request of Mr. PROXMIRE, the name of the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of S. 250, a bill to abolish the Synthetic Fuels Corporation.

S. 283

At the request of Mr. HATCH, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 283, a bill to amend titles 18 and 28 of the United States Code to eliminate, and establish an alternative to, the exclusionary rule in Federal criminal proceedings.

S. 292

At the request of Mr. DANFORTH, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 292, a bill to increase the funding authorization for low-income home energy assistance.

S. 307

At the request of Mr. RIEGLE, the name of the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 307, a bill to provide for continuation of health insurance for workers who lose such insurance by reason of unemployment.

S. 338

At the request of Mr. COHEN, the name of the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 338, a bill to revise the procedures for soliciting and evaluating bids and proposals for Government contracts and awarding such contracts, and for other purposes.

S. 454

At the request of Mr. BYRD, the names of the Senator from Hawaii (Mr. INOUYE), and the Senator from Virginia (Mr. TRIBLE) were added as cosponsors of S. 454, a bill to provide for an accelerated study of the causes and effects of acidic deposition during a 5-year period, and to provide for grants for mitigation at sites where there are harmful effects on ecosystems resulting from high acidity.

S. 497

At the request of Mr. HUMPHREY, the name of the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 497, a bill to amend title 39 of the United States Code to provide that drug abuse oriented advertisements and shipments of drugs in response to drug abuse oriented advertisements shall be nonmailable matter.

S. 503

At the request of Mr. HUMPHREY, the name of the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 503, a bill to make it unlawful to manufacture, distribute, or possess with intent to distribute, a drug which is an imitation of a controlled substance or a drug which purports to act like a controlled substance.

S. 518

At the request of Mr. CHAFEE, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 518, a bill to establish a program of grants administered by the Environmental Protection Agency for the purpose of aiding State and local programs of pollution abatement and control.

S. 527

At the request of Mr. GRASSLEY, the names of the Senator from Illinois (Mr. DIXON), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of S. 527, a bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of agricultural commodities received under a payment-in-kind program.

S. 529

At the request of Mr. SIMPSON, the names of the Senator from Georgia (Mr. MATTINGLY), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 529, a bill to revise and reform the Immigration and Nationality Act, and for other purposes.

S. 554

At the request of Mr. PELL, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 554, a bill to authorize the Secretary of Education to provide financial assistance to States for the training and retraining of older Americans.

S. 563

At the request of Mr. CHILES, the names of the Senator from Indiana (Mr. LUGAR), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of S. 563, a bill to reform the laws relating to former Presidents.

SENATE JOINT RESOLUTION 1

At the request of Mr. LONG, the names of the Senator from Hawaii (Mr. INOUYE), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of Senate Joint Resolution 1, a joint resolution proposing an amendment to the Constitution of the United States with respect to fixing the compensation of Members of the Congress.

SENATE JOINT RESOLUTION 9

At the request of Mr. HELMS, the name of the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of Senate Joint Resolution 9, a joint resolution to amend the Constitution of the United States to protect the right to life.

SENATE JOINT RESOLUTION 11

At the request of Mr. ROTH, the name of the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of Senate Joint Resolution 11, a joint resolution entitled "National Safety in the Workplace Week."

SENATE JOINT RESOLUTION 14

At the request of Mr. HELMS, the name of the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of Senate Joint Resolution 14, a joint resolution to amend the Constitution of the United States to protect the right to life.

SENATE JOINT RESOLUTION 34

At the request of Mr. RIEGLE, the names of the Senator from Michigan (Mr. LEVIN), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Montana (Mr. MELCHER), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Arkansas (Mr. BUMPERS), the Senator from Ohio (Mr. GLENN), the Senator from Montana (Mr. BAUCUS), and the Senator from Mississippi (Mr. COCHRAN) were added as cosponsors of Senate Joint Resolution 34, a joint resolution designating "National Reye's Syndrome Week."

SENATE JOINT RESOLUTION 37

At the request of Mr. HATCH, the names of the Senator from Pennsylvania (Mr. SPECTER), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Rhode Island (Mr. PELL), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of Senate Joint Resolution 37, a joint resolution providing that the week containing March 8 of 1983, 1984, and 1985, shall be designated as "Women's History Week."

SENATE JOINT RESOLUTION 38

At the request of Mr. HEINZ, the name of the Senator from Kentucky (Mr. FORD) was added as a cosponsor of Senate Joint Resolution 38, a joint resolution to declare March 18, 1983, as "National Energy Education Day."

SENATE RESOLUTION 70

At the request of Mr. MELCHER, the names of the Senator from Tennessee (Mr. SASSER) and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Resolution 70, a resolution to encourge delay of the implementation of withholding of interest.

SENATE RESOLUTION 74—FUTURE OF TAIWAN

Mr. PELL (for himself, Mr. GLENN, and Mr. KENNEDY) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 74

Whereas February 28, 1983 marks the eleventh anniversary of the Shanghai Communique signed by the United States and the People's Republic of China;

Whereas the Communique and the 1979 U.S.-PRC normalization agreement greatly improved relations between Washington and Beijing;

Whereas peace has prevailed in the Taiwan Strait since the normalization of relations between the U.S. and PRC;

Whereas maintaining a sound U.S.-PRC relationship serves the interests of both countries and the interests of peace in the Pacific region;

Whereas the United States has also pledged in the Taiwan Relations Act to continue commercial, cultural and other relations between the people of the United States and the people of Taiwan;

Whereas the United States established diplomatic relations with the People's Republic of China in the expectation that the future of Taiwan will be determined by peaceful means: Now, therefore, be it

Resolved, That it is the sense of the Senate that Taiwan's future should be settled peacefully, free of coercion and in a manner acceptable to the people on Taiwan and consistent with the laws enacted by Congress and the communique entered into between the United States and the People's Republic of China.

Mr. PELL. Mr. President, I wish to introduce a resolution today concerning the future of the people of Taiwan. It asks that Taiwan's future be settled peacefully, free of coercion, and in a manner acceptable to the people of Taiwan. I believe it important, as we celebrate the 11th anniversary of the Shanghai Communique signed by the United States and the People's Republic of China on February 28, 1972, to remind ourselves that we also have an obligation to protect the rights and freedoms of the Taiwanese people.

After Mao Tse-tung's 1949 victory on the China mainland and the Korean war the United States tried to isolate China from the rest of the world. Hostility and misunderstandings strained relations throughout the 1950's and 1960's and caused each country to keep the other at arms length. President Nixon's dramatic 1972 visit to China presented both nations an opportunity to make a start at repairing the damage. President Carter's achievement of a United States-People's Republic of China normalization agreement in 1979 marked another important benchmark in our efforts to improve relations with China.

I supported these bipartisan efforts and hope for continued good relations with the People's Republic in the future. A positive dialog between the United States and a nation of over a billion people serves our interest, China's and, of course, our friends and allies in the region.

At the same time, we pledged in the Taiwan Relations Act to continue commercial, cultural and other relations with the people on Taiwan. And, our decision to normalize and improve relations with China assumed that Taiwan's future would be determined by peaceful means.

In this regard, I am happy to report that tensions in the Taiwan Strait are at an all time low. Moreover, China announced last August that it considers a peaceful resolution of its dispute with Taiwan to be a fundamental principle of its policy.

In fact, both China and the Chinese authorities on Taiwan agree that the island should someday be reunited with the mainland. Beijing presses for negotiations to settle the dispute and has offered a nine-point peace proposal. Taipei responds that it is prepared to talk but only if and when the PRC rejects communism. China contends that its patience is not infinite and refuses to rule out settling the dispute by force.

To complicate matters further, China insists that failure to resolve the matter poses a major obstacle to improved relations with the United States. Officials charge that the TRA, and the commitments to Taiwan it symbolizes, constitutes interference in China's internal affairs and bolsters Taipei's unwillingness to negotiate reunification. They demand that it be repealed or modified significantly. They also urge the United States to use its influence to force Taipei to come to the bargaining table. We respond that reunification is not something for us to decide but an issue that the Chinese on both sides of the Taiwan Strait must resolve themselves.

Some of you may say, "Well what's wrong with that?" We desire a peaceful resolution, as do China and Taiwan, and taking sides in the dispute would jeopardize our own national interests. Others argue that the sooner this problem is resolved the better.

I admit that these views made a lot of sense. No one wants a peaceful resolution more than I do. And, of course, I fully recognize the importance of our new relationship with China. But, what troubles me is that this practical approach fails to take into account the views of the people most affected by reunification—the people on Taiwan. Right now a majority of those people have little or no say in their future, and if given a choice would oppose the reunification option.

Some 2 million mainland Chinese, most of whom fled to the island after the 1949 Nationalist defeat, still rule over 16 million native Taiwanese. Martial law remains in effect after 34 years. Few Taiwanese participate at the highest level of government and all crucial decisions are made by a small mainlander elite. Although the political situation has improved somewhat over time, reforms fall far short of Taiwanese hopes and aspirations. Those who speak out too loudly for Taiwanese rights are often jailed or forced to flee the country.

Consequently, a decision by the authorities on Taiwan at this time to resolve their differences with the mainland would no doubt serve America's strategic interests, but only by presenting us with a monumental moral dilemma. Do we stand aside and watch

the fate of 16 million Native Taiwanese be decided by a Communist controlled mainland and a Taiwan Government in which a majority of its people have no voice? If we were talking about the people of Afghanistan or Poland we all know that the answer would be a resounding "No!" In the case of Taiwan, however, many try to avoid answering the question altogether or argue that raising the issue unduly complicates United States-People's Republic of China relations. They see no alternative to reunification and so, demand only that it be accomplished peacefully.

I accept the proposition that an accommodation of some sort between China and Taiwan serves everyone's interests. But I am not yet ready to concede that this should be accomplished without Taiwanese participation or that the only alternative is Taiwan's absorption by the mainland. Should this occur, it would be at the expense of those principles and freedoms that set America apart from most nations of the world. I do not think we can afford to stand back and let that happen.

Instead we should reaffirm to all parties concerned that we oppose settling the Taiwan dispute by force or coercion. Second, we should put the Taiwan authorities on notice that they must end martial law and speed up the process of reform so that the government on Taiwan speaks for all its people. Then, and only then, will an environment exist for China and Taiwan to resolve their differences. Then, and only then, can the United States expect a final resolution fair to all.

Thank you, Mr. President.

Mr. GLENN. Mr. President, I rise today to join with Senator PELL in introducing a resolution concerning the future of the people of Taiwan. The resolution reaffirms the Senate's hope that the Taiwan dispute can be settled peacefully, free of coercion, and in a manner acceptable to the people on Taiwan. It is the last provision—one we too often ignore—that I want to concentrate on today.

The Taiwan Relations Act states unequivocally our view on the necessity of peaceful resolution, free of coercion for the Taiwan problem. It addresses the hopes and aspirations of the Taiwanese less directly, however. Section 2(c) states that:

> Nothing contained in this act shall contravene the interest of the United States in human rights, especially with respect to the human rights of all the approximately 18 million inhabitants of Taiwan. The preservation and enhancement of the human rights of all the people of Taiwan are hereby reaffirmed as objectives of the United States.

For my part, I can think of a no more important human right than the right to participate in one's government and thereby have a say in the future course of national policy for one's self, his or her's children, and all the children yet unborn. Our forefathers believed this, of course, and established our Nation so that our fundamental rights could be preserved.

Unfortunately, the same is not true for a majority of the people on Taiwan. The government there continues to be dominated by the Mainland China political elite that retreated to Taiwan in 1949 after being defeated in the Chinese civil war. Today, some 16 million native-born Taiwanese participate actively in local affairs, but continue for the most part, to be effectively excluded from national level decisionmaking.

In fairness, I should also note the undenied accomplishments since 1949 of the island's Nationalist authorities. They brought stability to the island, instituted a sweeping land reform program and supervised the creation of an economic miracle for the island that provides a standard of living the envy of developing nations around the world. Small steps have also been made in widening the opportunity for political dissent and freedom of the press. Nevertheless much remains undone. In short, promises of reform must be matched by action.

I am confident that given time and repeated reminders of our interest in reform, that Taiwan's authorities will move foward in opening the political process to the Taiwanese majority. Hopefully, the leadership recognizes that its willingness to champion the cause of greater Taiwanese participation gains its support of the people while foot dragging causes animosities hard to ignore for long. Nothing would be more warmly received by the people on Taiwan than the authorities announcing that it was their long-range objective to allow for Taiwanization of the political system, and the presentation of a step-by-step plan for gradually implementing their proposal. In my view, they might begin by releasing political prisoners, such Reverend Kao and others.

Once the reform plan had been enacted and bore fruit the authorities would have a mandate from the people to then move forward in addressing the China-Taiwan dispute. Many Taiwanese politicians opposed to the present Nationalist policies have freely admitted to me that the dream of an independent Taiwan no longer seems practical. They recognize that an island of 18 million people must find a way to accommodate itself to a giant neighbor with a population of some 1 billion. They merely ask that when the deal is struck they have some say in deciding the terms.

As for those of us in the United States, Warren Christopher told the Foreign Relations Committee during the TRA debate:

> It is our position that if there is to be a reunification, it is of great importance that it be peaceful and not be destabilizing in the area. But we do not have a position of encouraging the people on Taiwan to do something against their will.

That was an excellent policy then an one I fully endorse today.

For me that was what the Taiwan Relations Act was all about. Despite derecognition, we were pledging to the people of Taiwan that the American people would do what they could to insure that the island's people had a free choice. If they freely chose to reunify with the mainland we would not object. But if they chose instead a course short of reunification that also would be acceptable.

Mr. KENNEDY. Mr. President, I am pleased to join Senators PELL and GLENN in introducing this resolution expressing the sense of the Senate concerning the future of the people on Taiwan.

Today marks the 11th anniversary of the Shanghai communique. On this date in 1972, leaders of the United States and the People's Republic of China jointly recognized that "progress toward the normalization of relations between China and the United States is in the interests of all countries." The communique rightly noted that normalization of relations between the two countries "is not only in the interest of the Chinese and American peoples but also contributes to the relaxation of tension in Asia and the world."

I am proud to have been among the first in the Senate to have called for normalization of relations with the People's Republic in 1966—6 years before the Shanghai communique was signed. Since diplomatic relations were finalized in 1979, I have advocated continuing steps to strengthen this important relationship. In 1977, I had the opportunity to travel to China, and through this trip to emphasize again the importance of improving relations between the United States and the People's Republic of China.

At the same time, America has had a long relationship with those who live on Taiwan. I am proud of my role in the Senate as a principal sponsor of the Taiwan security resolution in 1979, now a part of the law of the land. In that resolution, Congress reassured the people on Taiwan about our concern for their security and well-being, and for lasting peace in the area. I continue to support both the letter and the spirit of the Taiwan Relations Act. We must not jeopardize either our longstanding obligation to the people of Taiwan or our new relationship with the People's Republic.

Nor do these relations mean that we should shrink from criticism of human rights problems wherever they occur. I have spoken out against abuses both

in the People's Republic and on Taiwan.

The decision of the United States to establish diplomatic relations with the People's Republic of China was based on the expectation that the future of Taiwan would be determined by peaceful means, and that commercial, cultural, and other relations would continue between the people of the United States and the people on Taiwan. Subsequent experience has shown the wisdom of that approach. All of us take satisfaction today that peace has prevailed in the Taiwan Strait since the normalization of relations between the United States and the People's Republic.

It is thus entirely consistent with the Shanghai communique, with our promising new relationship with the People's Republic and with our historic ties to the people on Taiwan for the Senate to express its sense that Taiwan's future should be settled peacefully, free of coercion, and in a manner acceptable to the people on Taiwan. The United States should continue to act consistently both with the joint communiques between the United States and the People's Republic of China, including the Shanghai communique, and with the laws enacted by the Congress, including the Taiwan Relations Act.

The continued improvement of relations with the People's Republic and the continued security and well-being of the people on Taiwan are the two guiding principles of our Nation's Chinese policy. These same two principles guide our resolution today, and I join Senators PELL and GLENN in urging favorable action by the Committee on Foreign Relations and the Senate.

SENATE RESOLUTION 75—RELATING TO IMPORTED NATURAL GAS

Mr. PERCY (for himself, Mr. DIXON, Mr. JOHNSTON, Mr. BOSCHWITZ, Mrs. KASSEBAUM, Mr. DANFORTH, Mr. BURDICK, Mr. JEPSEN, and Mr. LEVIN) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 75

Whereas the foreign policy and economic well-being of the United States depend on mutually-beneficial relationships with our trading partners throughout the world;

Whereas America's present economic difficulties have been caused in part by the huge increases in the price of energy, especially imported energy, during the 1970's;

Whereas at a time when prices for other forms of energy are stabilizing or falling, the burner-tip price of natural gas continues to rise throughout the United States;

Whereas the high price of natural gas is a severe hardship for low-income persons, the elderly, the agricultural industry, small businesses, and other consumers without alternative fuel sources.

Whereas high-priced imported natural gas is a major factor contributing to these price increases;

Whereas imports of high-priced natural gas continue at prices above fair market levels, despite the increased availability of uncommitted and ample supplies of lower-priced domestic gas;

Whereas it is in the interest of the United States to continue to import natural gas from secure sources in whatever quantity consumers require, as long as the price is fair;

Whereas the principles of free and fair international trade require that natural gas prices and terms of trade be made fair to all trading partners;

Whereas the immediacy of this problem requires the prompt and serious attention of all parties involved: Now therefore be it

Resolved, That it is the sense of the Senate that (1) the United States government should move immediately to reestablish fair market conditions and lower prices for imported natural gas; (2) to promote this objective, the Secretary of State, with the assistance of the Secretary of Energy, should immediately enter negotiations with nations presently exporting natural gas to the United States; and (3) 30 days after this Resolution is adopted, the Secretary of State should report to the Congress on the progress of these negotiations.

IMPORTED NATURAL GAS PRICES

Mr. PERCY. Mr. President, I would like to submit today, on behalf of myself, Senator DIXON, Senator JOHNSTON, Senator BOSCHWITZ, Senator KASSEBAUM, Senator DANFORTH, Senator BURDICK, Senator JEPSEN, and Senator LEVIN a resolution calling on the U.S. Government to take action immediately to reestablish fair-market conditions and lower prices for imported natural gas.

Earlier today, I chaired a hearing of a Governmental Affairs Energy Subcommittee inquiring into Government management of issues related to the high price of imported natural gas. Two conclusions were clear from this hearing: First, imported gas is exorbitantly priced, and U.S. consumers should not have to buy it; and second, regulatory officials at the Department of Energy have been far too slow to act in the public interest in this matter. This is why this resolution is so important.

Many gas-consuming States, including several in the Midwest, have suffered heavily from the current economic recession. Factories and plants have closed, and once prosperous businesses have been forced to lay off employees. Unemployment is approaching 20 percent in some areas. Now, in the midst of these economic difficulties, consumers are facing large increases in their natural gas bills—in part because they are paying super high prices for foreign gas while there is plenty of domestic gas available at much lower prices. This simply makes no sense.

Prices for imported gas are two or three times what we pay for domestic gas. I am including for the record a table which clearly shows this. Canadian gas is sold at the Toronto city gate for exactly half what this same gas is sold for in Springfield, Ill.—even though Springfield is closer than Toronto to the main Canadian wells.

This is a bizarre situation. In effect, this is the same thing as not just asking, but forcing American consumers to pay double for imported cars or televisions that are no better than the ones we make here at home.

We should not ask Americans to pay a premium, as we are currently doing, for imported natural gas. This is especially true at a time when many of our domestic producers are forced to shut in their gas wells. Dr. Alice Rivlin, of the Congressional Budget Office, concurs with this. She has stated in response to my letter on this issue, "there is no economic rationale for continuing to pay prices that are above the competitive level". I am submitting a complete copy of this letter for the record to share with my colleagues.

For the past 6 months, I have been particularly concerned about the import of exorbitantly priced liquefied natural gas from Algeria. Last week, I met with the Algerian Ambassador, and I told him that current LNG prices are way out of line. The pipeline acquisition cost for this Algerian LNG is two and a half times the average for domestic U.S. gas. And where does this gas go? It goes to Illinois, Michigan, Indiana, Ohio, and other hard-pressed Midwestern States.

We successfully won a postponement of a passthrough of the cost of this LNG to consumers during the winter months. But beginning tomorrow, the Trunkline and Panhandle Eastern pipeline companies, the ones shipping the Algerian LNG, will pass on the added costs of the LNG to consumers. This, by itself, will mean as much as a 10-percent increase in gas prices for our already beleaguered consumers.

We are not talking about small change here. We are talking about people's jobs, their daily lives, sometimes even their choice between eating and keeping warm. I have received piles of letters from consumers and businesses about this. Let me read an excerpt from a letter I recently received from a spokesman for our Nation's soybean processors:

With respect to the natural gas pricing situation in Illinois, occasioned by the resale of regasified Algerian LNG to soybean processors, soybean processing companies may be approaching the point of lay-offs of personnel and even plant shut-downs may be necessary.

I have been advised by industry sources that certain lay-offs have already occurred and that the scheduled March 1, 1983 natural gas pricing increases could provide the

occasion for more lay-offs and possible plant closings. While we can understand the need for a reasonable return on a natural gas suppliers' investment, at the same time we do not feel that industries such as ours—a fundamental link in the food and fiber chain which provides much of the protein content to the American diet—should have its profitability and viability undermined in Illinois by remote business arrangements entered into by natural gas suppliers with the Algerians over which it had no control.

Yet, last Wednesday, the Federal Energy Regulatory Commission approved this cost passthrough, at the expense of consumers throughout the Midwest. The FERC decision admits that prices are too high, and asks the LNG importers to renegotiate their contracts with the Algerians. And last Friday, the Department of Energy compounded this problem by approving the continuation of these overpriced imports, reaching the astonishing conclusion that it is premature to say that these prices are too high.

The FERC and DOE both offer vague statements that they may not tolerate these prices indefinitely, but vague statements of this kind are not enough. Consumers deserve price relief, and they deserve it soon. These regulatory agencies were created to serve the interests of American people, and it is time they started doing that.

The one bright spot is that every day, clearer and clearer signals are reaching all gas exporting nations that U.S. companies and U.S. consumers will not tolerate unrealistic prices for gas imports much longer. It is consumers—in Illinois and a great many other States—who will pay for any delays. Today, to reinforce this sense of urgency, I am introducing a resolution calling on the Secretary of State, with assistance from the Secretary of Energy, immediately to enter negotiations with nations presently exporting natural gas to the United States, and to report back to Congress on the progress of these discussions within 30 days.

Our Government has already discused gas prices with the Canadians, but I am concerned that these conversations have not had the sense of urgency they deserve. Canada has always been America's closest trading partner, and I have no doubt that the import by the United States of Canadian gas can continue to be mutually beneficial. But to keep this trading relationship fair, to keep it of mutual benefit, the gas must be priced at fair market levels. On Friday, I conveyed this message personally to two high ranking emissaries of the Canadian Prime Minister, Pierre Trudeau. I asked them to deliver a letter from me to the Prime Minister, in which I told him these prices have to come down soon. Last week, I conveyed the same message to a high ranking Mexican delegation.

It is time for the U.S. Government to promote the interests of American consumers more aggressively. This does not necessarily mean that prices should be altered through direct government-to-government negotiation. In fact, we may find that the best negotiations will be those involving the buyers and sellers of imported gas, It is my intention in introducing this resolution to leave the State Department as much flexibility as possible to solve this problem in the best and quickest manner, but we do need to bring more of a sense of urgency to the task.

In the past, we had to accept energy-exporting nation's policies of pushing natural gas and other energy prices up in times of tight markets. Now that markets are soft and domestic supplies abundant, it is time that gas prices move down. Our trading partners must understand this. Oil-exporting nations plainly do. It is time for gas-exporting nations to face the same facts.

I ask unanimous consent that the following exhibits be included in the RECORD: Domestic vs. Imported Gas Prices and a letter from Dr. Alice Rivlin, CBO, February 25, 1983.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DOMESTIC VERSUS IMPORTED GAS PRICES

(U.S. dollars per million Btu)

	1976	1977	1978	1979	1980	1981	1982
Domestic (interstate gas)	0.43	0.68	0.82	1.20	1.48	2.06	2.50
Domestic (intrastate gas)	.....	.79	.91	1.50	2.04	2.26	2.82
Canadian gas	1.64	1.95	2.15	2.56	4.23	4.73	4.92
Mexican gas	.....	.....	.....	.....	4.32	4.91	4.92
Algerian LNG	.....	1.05	1.50	1.99	3.70	5.94	6.56

Note: Data shown are average pipeline acquisition prices.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS
Washington, D.C., February 25, 1983.

Hon. CHARLES H. PERCY,
Chairman, Subcommittee on Energy, Nuclear Proliferation, and Government Processes, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is in response to your inquiry of February 17, 1983, regarding imports of liquified natural gas from Algeria and pipeline gas from Canada and Mexico. These imports are currently priced well above many domestic sources of natural gas that are not being brought to market, thus raising the issue of whether the public interest would be served if this situation were to continue for the long run.

In general, there is no economic rationale for continuing to pay prices that are above the competitive level. If there is an energy policy rationale, it must rest with energy security—the need to build stable and diverse sources of energy supplies that can be guaranteed during future oil disruptions. Such a rationale is questionable for two reasons. First, the goodwill generated by such purchases may be fleeting, and there is no way to evaluate how strongly it would influence foreign actions during an energy crisis. This may be particularly true in the case of Alegeria, if the source of a future disruption lies in deliberate OPEC action. Second, even if goodwill could be counted upon to yield aditional natural gas during a future oil supply disruption, it unclear whether this would be a cost-effective investment. Other investment options, such as oil for the Strategic Petroleum Reserve, could well be superior and would certainly increase the degree of control that the U.S. government could exercise in an oil emergency.

If I can be of further assistance to you in this matter, please contact me.

With best wishes.

Sincerely,

JAMES BLUM
(For Alice M. Rivlin,
Director.)

Mr. DIXON. Mr. President, I rise as an original cosponsor of this resolution. Illinois is a State beset with a crisis—a natural gas crisis. I believe that with perhaps the sole exception of overall national economic conditions, nothing deserves our immediate attention more.

But how can economic recovery occur when the manufacturing plants, which are the largest users of natural gas, must pay almost three times the amount for imported gas when cheaper domestic supplies are readily available?

How can a family provide heat for its home without bankrupting its budget? Are we to tell the people in nearly 15 million households that they must choose between heating and eating?

I hope not. I will not.

Mr. President, I have petitioned both the Federal Energy Regulatory Commission (FERC) and the Economic Regulatory Administration (ERA), which have joint jurisdiction in this matter, arguing against these unnecessary price rises. Unfortunately, my petition has fallen on deaf ears.

Therefore, I believe that the fastest way to give relief to gas consumers will be with the passage of this resolution. It is straightforward in its approach. Thirty days after adoption, the Secretaries of State and Energy should report back to the Congress on the progress of negotiations in the private sector to bring about a reduction in the price of imported gas to a fair market level. The current cost for Algerian liquefied natural gas is $7.11 per Mcf. Canadian gas costs $4.94 when it crosses the border, as does Mexican gas. The most recent figure for the average wellhead price of domestic gas is $2.49.

It is because of these wide fluctuations in price and the resulting burdens on both consumers and industry that we have taken this action.

I hope every Senator will review this resolution carefully and consider the adverse impact imports are having on this country.

AMENDMENTS SUBMITTED FOR PRINTING

OCEAN SHIPPING ACT

AMENDMENT NOS. 7 THROUGH 231

(Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 225 amendments intended to be proposed by him to the committee substitute to the bill (S. 47) to improve the international ocean commerce transportation system of the United States.

AMENDMENT NOS. 232 THROUGH 460

(Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 229 amendments intended to be proposed by him to the bill S. 47, supra.

AMENDMENT NO. 461

(Ordered to be printed and to lie on the table.)

Mr. BOSCHWITZ submitted an amendment intended to be proposed by him to the bill S. 47, supra.

AMENDMENT NOS. 462 THROUGH 465

(Ordered to be printed and to lie on the table.)

Mr. STEVENS submitted four amendments intended to be proposed by him to the bill S. 47, supra.

AMENDMENT NO. 466

(Ordered to be printed and to lie on the table.)

Mr. STEVENS (for Mr. LONG) submitted an amendment intended to be proposed by him to the bill S. 47, supra.

AMENDMENT NO. 467

(Ordered to be printed.)

Mr. THURMOND proposed an amendment to the bill S. 47, supra.

AMENDMENT NO. 468

(Ordered to be printed.)

Mr. STEVENS proposed an amendment to the amendment (No. 467) proposed by Mr. THURMOND to the bill S. 47, supra.

AMENDMENT NO. 469

(Ordered to be printed.)

Mr. GORTON (for Mr. HATCH) proposed an amendment to the bill S. 47, supra.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the hearing previously scheduled before the Subcommittee on Energy Conservation and Supply on the fiscal year 1984 budget for energy conservation and related programs within the jurisdiction of the subcommittee for Tuesday, March 8, will begin at 8:30 a.m. instead of 10 a.m. Staff contact: Mr. Tom Winn at 224-0613.

In addition, the subcommittee has scheduled a hearing to consider S. 589, to amend section 1(a)(1) of Public Law 95-348 (92 Stat. 487) to authorize the appropriation of $4,038,000 for capital improvement projects on Guam for fiscal year 1984. This hearing will also be held on Tuesday, March 8, beginning at 9:30 a.m., following the abovementioned budget hearing. Staff contact: Mr. Jim Beirne at 224-2564.

The hearings will be held in room SD-366 of the Dirksen Senate Office Building.

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Committee on the Budget will hold a hearing on Thursday, March 3, 1983 at 10 a.m. to receive testimony on defense matters from Senator JOHN TOWER, chairman of Senate Committee on Armed Services. The hearing will be held in Dirksen Senate Office Building, room 608.

For further information, contact Nancy Moore of the Budget Committee staff at 224-4129.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public that the hearings scheduled before the Committee on Energy and Natural Resources for March 9, 10, 11, and 12, to consider pending natural gas legislation, will be hearings on the President's proposal, S. 615, as well as on S. 60, S. 239, S. 291, S. 293, and S. 370.

For further information regarding these hearings please contact Mr. David Doane at 224-7144 or Mr. Howard Useem at 224-5205.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON GOVERNMENTAL EFFICIENCY AND THE DISTRICT OF COLUMBIA

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Governmental Efficiency and the District of Columbia of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, March 1, at 9:30 a.m., to hold a hearing on the Chesapeake Bay program.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON BUDGET AUTHORIZATION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Budget Authorization of the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, March 1, at 2 p.m., to hold a closed-session hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Wednesday, March 2, at 10 a.m., to consider agriculture export legislation and S. 17, Domestic Commodity Distribution and Food Assistance Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CAPITAL ASSISTANCE REVENUE SHARING DATA

● Mr. SASSER. Mr. President, I plan to introduce this week the Capital Assistance Revenue Sharing Act of 1983, a bill that would—in addition to the current general revenue sharing program—provide $3.5 billion annually for quick-start capital improvement projects by State and local governments, and today I want to share information on just how the funds under this act would be distributed to States and eligible local governments.

This legislation would have a twofold purpose: First, it would provide a minimum of 250,000 jobs annually; and second, it would make a start toward a long-range program of Federal aid to State and local governments aimed at needed capital construction projects, as well as repair and rehabilitation of existing infrastructure.

Of the $3.5 billion annually appropriated under this legislation, $3 billion would go to State and local governments on a formula basis: One-third would go to States and two-thirds to local government. The additional $500,000 million will constitute a discretionary fund, from which aid would be distributed on a project-by-project basis for those local governments not eligible for funding under the formulae.

This bill uses the current GRS distribution formulae as a model, but makes further simplifications by relying solely on population and per capita income as the distribution components.

Eligibility will be restricted to municipalities with populations of more than 35,000, and to counties with populations of more than 10,000.

Of course, I expect that there may be changes to the bill and I welcome discussion of its provisions

I want to point out today that, unlike any other public works jobs bill now under consideration in the Congress, there is no mystery attached to just how much each State would receive under the legislation: I have prepared a computer simulation of what the States and their local governments would receive under the bill's formula.

Prior to my formal introduction of the Capital Assistance Revenue Sharing Act of 1983, I want to share this data with my colleagues and urge that

they support my effort by cosponsoring the bill.

At this point, I want to commend Craig Doyl and Charles Gialloreto of the Senate Computer Center for their work in the design of the computer model which made the data breakdown possible, and I ask that this information be printed in the RECORD. My office will be happy to provide additional data or information concerning this bill prior to its introduction this week. For further information on the Capital Assistance Revenue Sharing Act and funding distributions to individual local jurisdictions in the various States, please contact Mr. Tom Berrigan of the staff of the Intergovernmental Relations Subcommittee, extension 49514.

The material requested to be printed in the RECORD follows:

CAPITAL ASSISTANCE REVENUE SHARING ACT OF 1983 ANNUAL ALLOCATION OF PROPOSED $3,000,000,000 APPROPRIATION

[Does not include funds from $500,000,000 discretionary fund]

State	Population	Income per capita	State total	Local governments allocation	State government allocation

NEW SOVIET MISSILE TEST

● Mr. BIDEN. Mr. President, the February 16 Washington Post and New York Times ran articles regarding a Soviet test of a new missile that convey a misunderstanding regarding the SALT II test. The articles say that the new, small intercontinental ballistic missile which the Soviets tested on February 8 differs from a medium-sized ICBM which the Soviets tested in October and December. Because SALT II limits the U.S.S.R. and the United States to the flight testing and deployment of only one new type of ICBM, which must be a light one, the article states that, according to a variety of U.S. officials, the recent test "could raise questions about whether Moscow is violating the terms of the unratified" SALT II.

In fact, if all three missiles tested to date have the same number of stages and same propellant, there has been no violation of the provisions alluded to in the SALT II text governing the testing of one new type of permitted ICBM.

Article IV of SALT II text requires only that, in the beginning of a test program, every missile tested of the one new type have the same number of stages and the same propellant of each stage as the first missile tested. It is only further into what is usually a test program of 20 or more launches that various dimensions of the tested missile must fall within narrow boundaries. Specifically, during the last 12 launches of the first 25 test flights or during the last 12 launches before deployment, whichever 12 launches occur earlier, the length, the diameter, the launch weight, and the throw-weight of the tested missile may vary by no more than 10 percent. After these 12 tests, these dimensions may vary by no more than 5 percent. In any event, the three launches to date of new ICBM's are almost certainly not among the last 12 launches of a new ICBM test program, and therefore, not limited by either the 5 or 10 percent boundaries.

Of course, there are other provisions of the SALT II text which come into play after these tests, such as the prohibition on the testing of the small-solid mobile SS-16 missile and on measures aimed at concealing the association between ICBM's and launchers during testing, among others. However, the articles as run contain no in-

formation which suggests that there has been a violation of SALT II's testing provisions although they do suggest the need for vigilant monitoring efforts.

I ask that the articles be printed in the RECORD.

The articles follow:

[From the Washington Post, Feb. 16, 1983]

SOVIETS TEST NEW MISSILE, POSSIBLY VIOLATING SALT TERMS

The Soviet Union has fired a new intercontinental ballistic missile in a test that could raise questions about whether Moscow is violating the SALT II nuclear arms treaty, U.S. intelligence sources said yesterday.

Officials said a small solid-fuel missile was launched Feb. 8 from Plesetsk and that preliminary analysis of information picked up by American monitoring equipment suggests that it may have been the first successful test of a second new Soviet ICBM.

U.S. officials confirmed in December that the Soviets had test fired a medium sized solid fuel ICBM.

The SALT II treaty specifies that the Soviet Union and the United States may flight test and deploy only one new type of ICBM, which must be a light one, according to a June 21, 1979, letter signed by then Secretary of State Cyrus R. Vance in submitting the treaty to President Carter.

There was no formal comment last night from either the Defense or State departments. Officials cautioned against jumping to the conclusion that the Soviets have broken the agreement.

Although the United States never ratified SALT II, the Reagan administration has said it will abide by it as long as the Soviets do the same.

[From the New York Times, Feb. 16, 1983]

UNITED STATES SAYS RUSSIANS SUCCESSFULLY TESTED A NEW TYPE ICBM

WASHINGTON, Feb. 15 (AP).—The Soviet Union has fired a new intercontinental ballistic missile in a test that could raise questions about whether Moscow is violating the terms of the unratified second strategic arms limitation treaty, United States intelligence sources said today.

Officials said that a small, solid-fuel missile was launched Feb. 8 from Plesetsk in northern Russia and that preliminary analysis of information picked up by American monitoring equipment suggested that it might have been the first successful test of a second new Soviet ICBM.

"It was a missile we haven't seen before," said one of the sources, who spoke on the condition that he would not be named.

United States officials confirmed last December that the Russians had test-fired a medium-size, solid-fuel ICBM.

TREATY LIMITS NEW TYPES

The second strategic arms limitation treaty, signed in 1979, specifies that the Soviet Union and the United States may flight-test and deploy only one new type of ICBM, which must be a light one, according to a letter of July 21, 1979 by Secretary of State Cyrus R. Vance submitting the treaty to President Carter.

There was no formal comment from either the Defense or State Departments. Officials cautioned against jumping to the conclusion that the Soviet Union had broken the agreement.

Although the United States did not ratify the 1979 treaty, the Reagan Administration has said it will abide by it so long as the Soviet Union does.

A State Department official said he was not "aware of any charges that the Soviets may be preparing to violate the agreement." He, like the intelligence sources, insisted that his name not be used.

TEST CONFIRMED IN DECEMBER

The United States Government confirmed in December that the Soviet Union had flight-tested a new type of ICBM. It did so after reports that a medium-size solid-fuel missile had been launched Oct. 26 but that its first-stage rocket motor had failed.

In late December, amid reports that the Soviet Union was preparing for another missile test, Alan Romberg, a State Department spokesman, said that "if they begin to test another new type of ICBM, this would conflict with the terms of SALT II."

According to intelligence sources, some of the characteristics of the small missile fired from Plesetsk on Feb. 8 differed from those of the medium-size solid-fuel missile tested last fall.

The missile fired a week ago carried four warheads, the intelligence sources said.●

FUNERAL RULE

● Mr. KASTEN. Mr. President, on January 25, 1983, the Federal Trade Commission formally submitted its proposed trade rule governing funeral home pricing practices to Congress for review under existing legislative veto procedures. On February 24, a resolution to disapprove the funeral rule was introduced in the House by Congressman MARTY RUSSO (H. Con. Res. 70)

I take this opportunity to announce to the Senate that after carefully studying the proposed rule, and considering the improvements the FTC has made during the course of the rule's development, I have decided to support the FTC rule and oppose any congressional veto.

The central provision of the funeral rule requires funeral directors to provide consumers with itemized price information about the goods and services offered for sale. Detailed priced lists must be available at the funeral home, and funeral directors must answer questions about prices over the telephone. Funeral directors must provide any combination of goods and services selected by the consumer, unless the combination is "impossible, impractical or excessively burdensome to provide."

The purpose of these requirements is to provide consumers with an alternative to the widespread industry practice of "package pricing" for "standard," preselected funeral packages. Under the rule, consumers who wish to do so would have the option of designing a funeral that best meets their needs, declining unwanted services, and perhaps saving some money in the process.

I support this goal, and I believe the terms of the FTC's funeral rule are reasonably and fairly calculated to achieve this end.

In 1977, the average price of a traditional funeral and burial was $2,400—making funerals one of the largest single purchases consumers ordinarily make. Despite the size and importance of this purchase to consumers, however, precious little price information is usually available to those making purchase decisions. According to industry data cited by the FTC, about 65 percent of all funeral directors use some form of package pricing.

A survey conducted in my own State of Wisconsin in 1981 showed that 85.5 percent of the funeral directors who responded to the survey use some form of package pricing, while only 14.5 percent issue separate individual charges for each item of service, merchandise, equipment and facilities.

While many—or even most—people planning a funeral would rather leave the arrangements in the able hands of a funeral director by accepting a predesigned funeral package, others would prefer to make a more systematic and well-informed choice. I believe that itemized price information—and a realistic alternative to package pricing—should at least be available to consumers wishing to exercise this option, and that the disclosure scheme devised by the FTC is a reasonable and balanced means to achieve this end.

The conservative Heritage Foundation also acknowledged the need for the funeral rule in a 1981 report on the FTC that was otherwise very critical of the agency:

> There is no effective remedy available to a consumer when a funeral home refuses to provide him with an itemized bill, or when it induces a family to purchase an unwanted package of services and goods for a funeral. In those instances, the bereaved family has no adequate market-place remedy. . . . Rules and regulations appear to be the only alternative.

The involvement of the Federal Government is appropriate in this instance due to a regulatory gap that now exists in most States. Virtually all States set educational, apprenticeship, and examination requirements for funeral directors, and public health standards for funeral homes. In addition, States typically have some form of consumer protection legislation on the books. In only a very limited number of States, however, does State law go on to require the kind of detailed price itemization required by the FTC rule.

Again, looking at Wisconsin, our State law contains only a general prohibition of fraud and deception in the funeral industry, and a requirement that a card or brochure be placed in each casket stating the price of the funeral using that particular casket and listing the service and merchandise included in that price. As noted above, only 14.5 percent of Wisconsin funeral

directors were found to itemize prices in 1981.

In addition, I would point out that the funeral rule has been altered substantially over the course of its development. The rule is now less "regulatory" in approach, relying relatively more heavily on market-oriented information disclosure remedies.

As proposed by the FTC staff in 1975, for example, the funeral rule provided that funeral directors could not furnish any funeral services or merchandise or even take custody of the body itself without explicit permission from the family. Funeral directors had to expand their casket selection facilities to make room for a full line of plain, inexpensive caskets, and they had to disclose in any advertising they did that detailed price information was now available over the telephone.

These provisions and others in the "command and control" tradition were dropped from the rule finally adopted by the FTC last September. Now, by and large, the rule seeks to use information disclosure, informed consumer choice, and the free market mechanism to address problems identified in the industry.

I also approve of a few other changes to the rule. First, the terms of rule now require the FTC to reevaluate the need for the rule within 4 years after it becomes effective. Second, recordkeeping requirements have been reduced. Indeed, the Office of Management and Budget has approved the rule under the Paperwork Reduction Act. Finally, States can be exempt from the rule if State consumer protection laws provide an equivalent or greater degree of protection to consumers. There is no attempted preemption of State law involved.

One important fact distinguishing the funeral rule from the FTC's used car rule which was vetoed by Congress in May 1982, is that Congress has already considered the funeral rule in detail and enacted specific guidelines for the FTC to follow in finalizing the rule.

Section 19 of the FTC Improvements Act of 1980 (15 U.S.C. 57a note), enacted after much public discussion of this issue, provided that the FTC's funeral rule may only:

One, require disclosure of the fees or prices charged for funeral goods and services; and

Two, prohibit misrepresentations, boycotts, tie-ins, and furnishing goods and services without prior approval.

Section 19 also required the FTC to take certain additional procedural steps to insure that public had notice of the terms of the proposed rule and that public comment was adequately solicited. In effect, at a relatively advanced stage in the rule's 10-year history, Congress considered the issue and gave advance prior approval to a rule meeting certain specific guidelines.

By contrast, in the case of the used car rule, while the 1975 Magnuson-Moss Act specifically authorized the FTC to develop a rule "dealing with warranties and warranty practices in connection with the sale of use motor vehicles," the FTC went further, requiring used car dealers to disclose "known" defects to consumers as well as warranty terms. Congressional consideration of the disclosure of known defects requirement was thus entirely appropriate.

The funeral industry has already filed challenges to the funeral rule in Federal court. The traditional role of the court in such a review is to see that the rule is adequately supported by the evidence, that it was developed in accordance with proper procedures, and that the agency acted within the bounds of its legal authority. The court may thus insure that the FTC has complied with the guidelines Congress established in the 1980 Improvements Act and also address concerns, expressed by FTC Chairman Miller and others, that the rulemaking record is inadequate to support the rule.

Mr. President, I support legislative veto and congressional oversight of regulatory agency decisions. This does not mean, however, that Senators and staff must spend hundreds of hours evaluating each and every rule issued by the Government. Congress itself would then become a bureaucracy out of control.

Rather, Congress must focus its efforts on the rules that are plainly out of sync with the goals of regulatory reform and leave to the courts their traditional task of seeing that other rules are lawfully promulgated and supported by the evidence. This latter course of action is especially appropriate in the case of the funeral rule, where Congress performed its oversight function in advance, setting out specific guidelines for the agency to follow.

Congressional disapproval is inappropriate also because the funeral rule addresses a real consumer need. Currently, most consumers do not have an adequate opportunity to comparison shop for funeral services and decline unwanted services and merchandise. State consumer protection laws and industry complaint-handling systems, as well motivated as they are, simply do not focus on this problem. The FTC rule, developed with broad public participation, is fair and balanced in approach and reasonably calculated to make useful information available to consumers with a minimum of disruption and burden to the funeral industry.

Mr. President, a coalition of groups has formed to oppose congressional veto of the funeral rule, including the American Association of Retired Persons, Congress Watch, Consumer Federation of America, Consumers Union, and Continental Association of Funeral and Memorial Societies. I am pleased to offer my support in opposing a veto of the funeral rule, and I look forward to working with this coalition and others in coming months.●

DANGERS TO SOCIAL SECURITY DISABILITY SYSTEM

● Mr. SASSER. Mr. President, I rise today to draw the attention of my colleagues to a recently proposed classification study by the Office of Personnel Management (OPM) of the Administrative Law Judge Corps and other legal personnel.

I point out this proposed study out because I believe that it is an ill-timed and ill-advised study which poses special dangers for the 810 Health and Human Services administrative law judges who will conduct more than 400,000 social security disability appeals during 1983.

I, along with my distinguished colleauges, Senator DAVID PRYOR and Senator CARL LEVIN, have formally protested this proposed classification study. We have done so for several reasons.

First, we believe that it is imperative that any classification study shall be done with due regard for the independence and impartiality of the Administrative Law Judge Corps. In that regard, we believe that it is unwise for the Office of Personnel Management to postpone action on pending requests for upgrading various ALJ positions, and ceasing to accept applications for GS-16 ALJ positions after March 18. Such actions appear to precondition the findings of the proposed classification study of administrative law judges. Second, we are distressed about the effect that this study may have on the social security disability appeals process. The 810 Health and Human Services administrative law judges will hear some 422,000 social security disability appeals during 1983. Their caseload has grown dramatically since 1965 when the national caseload was only 23,323. During these difficult times, it is imperative that disability recipients be assured of having experienced administrative law judges to hear their appeals. A classification study that appears preordained to "Downgrade" that status of these administrative law judges could have deleterious effects on the social security disability hearings and appeals system.

It is my hope that the Office of Personnel Management will rescind the personnel actions in the February 9 announcement. I also hope, as requested by our letter of February 24, that officials of the Office of Personnel

Management will meet with the Senate Governmental Affairs Committee to reconsider the merits of this proposed classification study.

Mr. President, I ask that our February 24 letter to OPM Director Donald Devine on this matter and OPM's February 9 announcement of this proposed classification study be printed in the RECORD.

The correspondence follows:

U.S. SENATE,
Washington, D.C., February 24, 1983.

Hon. DONALD J. DEVINE,
Director, Office of Management and Personnel, Washington, D.C.

DEAR MR. DEVINE: We understand that the Office of Personnel Management (OPM), pursuant to a letter of February 9, 1983, has initiated a one year "classification" study of Administrative Law Judges (ALJ's) and other government legal personnel. During the time that OPM proposes to conduct this study, OPM has taken other actions that have the cumulative effect of preventing any upgrading of ALJ classifications and the filling of vacant ALJ positions at the GS-16 level.

We are vitally concerned that these pending actions can have a demoralizing effect on the Administrative Law Judge Corps. And we are most distressed that this action could portend an effort by the Office of Personnel Management to downgrade Administrative Law Judges in violation of the letter and spirit of the laws governing classification of these federal employees. In light of the duties and responsibilities of Administrative Law Judges, any effort to downgrade these positions would be disruptive of the personnel standards set forth in U.S.C. 5, sections 5105, 5106, and 5341, as they apply to ALJs, most of which are classified at a GS-15 and GS-16 level.

Furthermore, the type of action suggested in the February 9th letter may run afoul of the Administrative Procedure Act (APA) which recognizes the independence of Administrative Law Judges. The comprehensive scheme of administrative adjudication established by the Administrative Procedures Act provides for an independent and impartial corps of Administrative Law Judges. Actions such as that contemplated in the cited OPM letter raise the possibility that OPM may be violating the rights of ALJ's to be secure in their tenure and compensation as provided for by 5 U.S.C. 7521.

In particular, we are extremely distressed at the impact that a reclassification study may have on the more than 800 ALJ's employed by the Department of Health and Human Services. These ALJ's are working under extreme pressures to review Social Security Disability claims and determinations under the Social Security Act. It is estimated that these 800 or so ALJ's will carry the heavy responsibility of hearing some 422,000 disability cases during 1983. With normal turnover of HHS ALJ's running about 40 per year, it is clear to us that any potential downgrading actions would add tremendously to an already heavy workload and have a devastating effect on the Social Security disability review process. Our concern about an adverse classification action is further heightened due to the pending suit brought by the HHS ALJ's against the Social Security Administration, *Association of Administrative Law Judges, Inc.* v. *Richard S. Schweiker et. al.*

Thus, we strongly recommend that the Office of Personnel Management rescind the actions contained in the February 9th letter to the Honorable Charles N. Bono and suspend the decision to conduct the proposed classification study until OPM officials have met with representatives of the Senate Governmental Affairs Committee to review the merits of such a proposed classification study. Such a meeting is necessary in order to determine and confirm to our satisfaction that the proposed classification study will not in any way adversely affect the independence and impartiality of the Administrative Law Judges Corps nor violate the statutory guidelines for classification procedures as they pertain to Administrative Law Judges.

We look forward to your prompt reply to this letter.

Sincerely,

JIM SASSSER,
CARL LEVIN,
DAVID PRYOR,
U.S. Senators.

U.S. OFFICE OF
PERSONNEL MANAGEMENT,
Washington, D.C., February 9, 1983.

Hon. CHARLES N. BONO,
Chairman, Association of Administrative Law Judges in the Department of Health and Human Services, Federal Office Building, Kansas City, Mo.

DEAR JUDGE BONO: The Office of Personnel Management (OPM) is concerned that the Federal government needs to do a better and more accurate job in the future of classifying Civil Service positions. With this concern in mind, OPM plans to develop, within one year, classification criteria for "hear and decide" type work performed by attorney examiners and ALJ's. These criteria will be incorporated in the classification standard for GS-905 attorney positions which has been used historically by OPM as a guideline for classifying ALJ positions.

Pending development of these new classification criteria, OPM is taking the following actions:

1. postponing action on pending and any future requests to upgrade Chief ALJ, Deputy Chief ALJ, Associate Chief ALJ, and all other ALJ positions;

2. ceasing to accept applications under the ALJ Examination Announcement No. 318 for the GS-16 register after March 18; and

3. filling all future ALJ position requests at the GS-15 level.

A meeting to discuss the above plans and actions is scheduled for agency Chief ALJ's, ALJ Association Representatives and Personnel Directors (or representatives) on Friday, February 18, at 1:00 p.m., in Room 1304, U.S. Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. Your presence is cordially invited.

I look forward to seeing you at the meeting.

Sincerely,

RICHARD B. POST,
Associate Director, Staffing Group.●

SENATOR THURMOND'S REPORT ON VISIT TO THE FEDERAL REPUBLIC OF GERMANY

● Mr. TOWER. Mr. President, I would like to call to the attention of the Senate a report written by my distinguished colleague, the senior Senator from South Carolina, Senator STROM THURMOND.

Senator THURMOND visited the Federal Republic of Germany following the adjournment of the 97th Congress and toured several military installations. He also had occasion to visit with Ambassador Burns and his staff and receive their views on German-American relations. Additionally, Senator THURMOND had the opportunity to meet with officials of the German Ministry of State and Ministry of Defense.

Senator THURMOND's report indicates very serious German concern over issues such as "Specialty Metals" and the deletion of funds for "Host Nation Support." The decision on "Specialty Metals" alone could well destroy the cooperative efforts on standardizing NATO arms that have been underway since 1976.

Mr. President, I find Senator THURMOND's analysis to be timely and I commend it to the attention of my colleagues. I ask that the report with enclosures be included in the RECORD at the conclusion of my remarks.

The report follows:

VISIT TO THE FEDERAL REPUBLIC OF GERMANY—SENATOR STROM THURMOND

INTRODUCTION

General.—During the period December 26-31, 1982, Senator Strom Thurmond, Ranking Majority Member of the Senate Armed Services Committee and Chairman of its Military Construction Subcommittee, visited military installations in the Federal Republic of Germany (FRG). In addition, Senator Thurmond met with officials of the German government, and with Ambassador Burns and his staff.

Purpose.—Senator Thurmond last visited the FRG during April 1981. In making a return visit to the FRG, Senator Thurmond set several objectives:

1. To review the facilities situation with emphasis on the living and working conditions faced by American service personnel;

2. To review with major U.S. military commanders the overall balance of forces situation;

3. To meet with key German government officials to discuss matters of mutual concern; and

4. To confer with Ambassador Burns and his staff to get the benefit of their views on German-American relations.

Itinerary.—Travel to and from the FRG was by regularly scheduled Military Airlift Command C-5 aircraft. Senator Thurmond arrived in the FRG on the morning of December 27, 1982, and departed in the evening on December 31, 1982. Locations visited included Ramstein Air Force Base, Baumholder, Heidelberg, Bonn, Frankfurt, Fulda, Wildflecken, and Rhein Main Air Force Base. Key officials contacted included General Frederick Kroesen, Commanding General, U.S. Army Europe; Lieutenant General Robert Bazley, Deputy Commanding General, U.S. Air Forces Europe; Dr. Arthur Burns, U.S. Ambassador to the Federal Republic of Germany; His Excellency Peter-Kurz Wuerzbach, FRG Ministry of Defense and His Excellency Berndt von Staden, FRG Ministry of State. A detailed itinerary is attached as Enclosure 1.

U.S. FORCES ISSUES

General.—At each visit with U.S. forces, Senator Thurmond received briefings on the overall military situation with emphasis

on facilities issues. The issues discussed in detail in this section are the more significant issues which will require the support of, or action by, the Congress in future years.

Military Construction Levels.—The backlog of military construction requirements for U.S. forces in Europe is over $20 billion. In the past two years, construction spending for U.S. forces has been about $1.5 billion—$1.0 billion in appropriated funds, $400 million in NATO Infrastructure funds and $100 million in non-appropriated funds. Construction expenditures for the future are expected to remain at about these same levels. At these annual rates of expenditure there will be little chance that the construction backlog can be reduced in the future. A comprehensive capital investment program for Europe needs to be developed with emphasis on programs that will increase the allied contribution to U.S. force stationing requirements (e.g., the Master Restationing Program and family housing initiatives that are discussed in greater detail below).

The problem of military facilities is greatly compounded by the introduction of new equipment which is occurring at an unprecedented rate. For example, more than a third of USAEUR's construction budget for the next fiscal year will be spent on facilities that are needed to accommodate new weapon systems that are scheduled to arrive in Europe in the next few years. This necessary expenditure drains resources that might otherwise be applied against the backlog of replacement living and working facilities.

Family Housing.—The requirement to provide adequate military family housing has bcome a number one priority with General Kroesen. The number of service personnel eligible for family quarters has grown over time as more and more military personnel are now married. Currently, USAEUR has some 68,000 service persons that are eligible for family quarters; 61,000 of these persons are adequately housed, leaving 7,000 Army personnel without family housing. The only alternative for these personnel is to leave their families in the United States and to get on a waiting list. Some soldiers are being forced to wait nearly two years before a set of family quarters becomes available; waiting times of up to a year are not uncommon.

In an attempt to alleviate this situation, the Congress has agreed to additional lease allocations for Europe, and the lease term has been increased from five to ten years to encourage entrepreneurs to build additional housing for lease to the military. These efforts have been only marginally successful. For the first time in many years, the Army sought authority to build new family housing in Europe in conjunction with the fiscal year 1983 Military Construction Bill. The Congress was reluctant to start a family housing building program in Europe due to the high unit cost ($120,000 per unit) and directed the Defense Department to do a comprehensive analysis of the family housing requirements in Europe and examine options to address this requirement. It was evident from the briefings that considerable work had been done on this analysis, however, much remains to be done. This subject will get special attention during hearings on the fiscal year 1984 Military Construction Bill.

Force Modernization.—The Army is undergoing unprecedented force modernization. Nearly every major item of military equipment will be replaced in the next few years. The Abrams tank, the Bradley fighting vehicle, the Patriot air defense system, the Multiple Launch Rocket System, the Apache Attack helicopter, the Blackhawk support helicopter, and the Pershing II missile system, all will be fielded in the next five years. The introduction of these systems creates unforeseen problems—problems in manning, problems in logistical support, and problems in warfighting doctrine (for example, the most recent Reforger exercise revealed that field commanders are going to have to reevaluate armor doctrine because the capabilities of the Abrams tank—its speed and its ability to fire on the move—renders current armor doctrine virtually obsolete.) This force modernization effort is going to require strong leadership and resourceful management to prevent a hiatus that could damage the capability of U.S. forces. Military commanders are eager to get the new equipment and feel that they can absorb it, given currently anticipated delivery schedules. They emphasized that this new equipment will increase their conventional war-fighting capability by an order of magnitude which will substantially increase the deterrent value of our conventional forces.

End Strength Allowances.—One of the problems brought on by force modernization is the management of the numbers of personnel deployed to Europe. This year in the Continuing Resolution, the end strength for all service personnel stationed in Europe was "capped" at 315,600—the same as the level deployed in Fiscal Year 1982. This was the first time that the Congress specified a "not-to-exceed" figure for personnel deployed to Europe. The apparent purpose of this cap is to freeze spending on forces overseas and to send a message to the allies that they should pay an additional portion of the defense cost burden. This cap may be manageable for Fiscal Year 1983 (although the Air Force had planned personnel increases to accommodate the deployment of the Ground Launched Cruise Missile system). However, the Army has plans for significant personnel increases after Fiscal Year 1983 and if personnel ceilings are to be imposed in future years, the impact on force modernization and force structure must be carefully considered.

Pershing/GLCM Deployments.—Announcements have been made that the Army will deploy the Pershing II missile system in the FRG, and the Air Force will deploy the Ground Launched Cruise Missile (GLCM) in Italy and in Great Britain during the next year. Despite many minor problems, military commanders were confident that initial operating capability dates could be met. Significant, but manageable, public demonstrations in opposition to the deployments are anticipated.

Collocated Operating Bases (COBs).—The Air Force has a program to provide minimum essential facilities at selected allied airfields to permit deploying U.S. based aircraft to operate effectively upon arrival in Europe. At each such base, the Air Force negotiates with the host nation, an agreement that provides the basis for deploying U.S. Air Force units to use the airfields. To be able to operate effectively at these bases, certain minimum essential facilities must be constructed; these facilities generally involve additional ramp parking space and added storage capability for fuel and ammunition at a cost averaging $5 million at each base. This construction is eligible for NATO Infrastructure funding, and some $32 million in NATO funds has been made available for the current year. The Air Force accords this program high priority and in the past has sought unilateral U.S. funding to prefinance this construction with the intent to recoup the funding from NATO in the future; Congress has been reluctant to approve prefinancing, preferring instead that direct NATO funding be used. The Air Force advised that NATO has programmed only $1 million for COB construction for next year and, therefore, the Air Force intends to pursue the prefinancing option again in conjunction with the Fiscal Year 1984 budget. The failure of NATO to continue to accord COB construction sufficient priority, to maintain at least current year funding levels, is disappointing and may well prejudice Congress against further unilateral U.S. funding.

U.S.-FRG ISSUES

Continuing Resolution.—The visit occurred immediately following the "lame duck" session of the 97th Congress, and several issues resulting from the Continuing Resolution, which provides appropriations for the Defense Department for the remainder of Fiscal Year 1983, were uppermost in the minds of German officials and Ambassador Burns. Attached at Enclosure 2 are translations from German newspapers that provide their perspective on these issues.

The "specialty metals" issue seemed to be the item of greatest concern. From 1976 through 1982 there had been a provision in law which waived the so-called "specialty metals" import restrictions and permitted the U.S. to import certain defense-related items from our allies. In the Continuing Resolution this waiver provision was modified to permit the continued importing of "weapon systems", but the importing of components or parts that contain foreign specialty metals was prohibited. There was general consensus on this trip that this action could well destroy the cooperative efforts on standardizing NATO arms that had been underway since 1976.

The Administration's budget for Fiscal Year 1983 contained $40 million to begin a cooperative program with the FRG wherein the FRG would provide support to U.S. combat forces in time of war. This program, called "Wartime Host Nation Support", was the product of several years negotiations between the two countries that was finalized by the signing of an agreement by Ambassador Burns in April 1982. Under the agreement, the FRG would establish reserve units which would provide logistical support to U.S. combat units. The logistical support would include, for example, the transportation and treatment of battlefield casualties, rear area security, prisoner-of-war handling, the operation and maintenance of airfields, etc. Some 93,000 German reservists would be dedicated to this task. Costs for this support structure were to be shared under an agreed cost sharing formula. The $40 million request in the Defense Department's Fiscal Year 1983 budget was matched by a 43 million German mark appropriation which has been approved by the German government. If the same capability were to be provided with U.S. reserve units, estimates of the cost to the U.S. indicate that the U.S. would pay 20 to 30 times more than the costs now estimated to support the Wartime Host Nation Support agreement. The denial of the $40 million by the Congress places the entire Wartime Host Nation Support agreement in jeopardy.

Current U.S. plans envision the prepositioning of military equipment in Europe

in amounts sufficient to support six U.S. Army divisions that would deploy to NATO in time of war. The Continuing Resolution limits the amount of equipment that can be pre-positioned to an amount sufficient for only four U.S. divisions and funding requests to acquire the necessary depots for storage to support the fifth and sixth divisions were denied. This effort, as well as the Wartime Host Nation Support agreement mentioned previously, grew out of the 1978 NATO "Long Term Defense Program" which has provided the foundation for increasing the conventional war-fighting capability for the alliance. The failure of the U.S. Congress to support these initiatives is very damaging to the viability of NATO.

Master Restationing Plan (MRP).—Negotiations are in progress on a proposal to restation three U.S. Army brigades nearer to the East German border and their wartime fighting positions. This proposal was tabled with the FRG in the Stoessel Demarche of November 1980. The concept of the proposal was to restation U.S. units to improve the ability of these units to accomplish their wartime mission and at the same time to provide new or upgraded living and working facilities for U.S. forces that now occupy deplorable facilities. The U.S. has proposed to the FRG that the facilities costs at the restationing sites should be borne by the FRG. In negotiations to date, the FRG has agreed with the concept of the Master Restationing Plan, but there has been no agreement on cost sharing—in fact, to date, FRG negotiators have insisted that under the terms of the Status of Forces Agreement, the costs for replacement facilities should be borne by the United States. From all discussions, it appears that the Defense Department testimony and briefings to the U.S. Congress may have been overly optimistic with regard to the prospect to FRG funding. The U.S. Congress has agreed to certain limited MRP construction (and certain MRP construction funding has been authorized subject to an acceptable cost sharing arrangement being agreed to) with the expectation that the FRG will agree to fund a significant share of the cost. The Defense Department and the State Department need to impress on the FRG the importance of these negotiations; there is a perception in the U.S. Congress that our allies are not paying an appropriate share of the collective defense burden and this leads to actions such as the troop strength ceilings and the denial of unilateral U.S. funding requests in support of NATO. If the FRG refuses to fund a reasonable share of the MRP costs, it will be perceived by the Congress as an indication that the allies are unwilling to share equitably in the NATO collective defense burden. Officials from the FRG Defense Ministry did surface the option of paying MRP costs through some type of special arrangement with the NATO Infrastructure Fund. This option appears to have some merit (and is not without precedent since the previous Slice Group did contain the "U.S. Special Program") and should be pursued if unilateral FRG funding is not forthcoming.

Pershing II/GLCM Deployments.—The FRG appears firmly committed to proceeding with the deployment of the Pershing II as scheduled in the absence of firm progress at the Geneva disarmament talks and under the assumption that the GLCM deployment will occur on schedule in Italy and Great Britain. In all discussions, strong linkage between Pershing II deployment and the disarmament talks was emphasized. Civil disturbances and protests are anticipated as the deployment date approaches, but recent polls conducted by the FRG demonstrate that the vast majority of Germans support NATO and a continued U.S. presence. The poll results reflect little change in German popular opinion in support of U.S. forces that has prevailed over the last 20 years.

Terrorism.—Acts of terrorism against U.S. personnel, especially bombings, have increased in recent months. German officials expressed special concern for these incidents, contending that they were perpetrated by a very small radical element and did not represent a general decline in the support for U.S. forces. Special steps are being taken to attempt to reduce these terrorist incidents by both Germans and U.S. officials.

ENCLOSURE 1

ITINERARY

27 DECEMBER 1982

0900—Arrive Ramstein Air Force.

0900-0930—Check in Ramstein Hotel.

0930-1200—Briefings and discussions with Deputy Commanding General Bazley and USAFE staff.

1200-1300—Lunch Ramstein Officers Club.

1300-1400—Enroute Baumholder.

1400-1800—Visit U.S. Army units in Baumholder area, RON Ramstein Air Force Base Hotel.

28 DECEMBER 1982

0900-0930—Enroute Heidelberg Army Airfield.

0930-0945—Enroute Keyes Building.

0945-1000—Office call with General Kroesen, Commander in Chief, U.S. Army Europe (USAREUR).

1000-1230—Briefings and discussions in Keyes Building Conference Room as follows:

Briefing title and staff agency:

The Threat: Office of the Deputy Chief of Staff, Intelligence CPT Watford.

Force Modernization/Div. 86: Office of the Deputy Chief of Staff, Operations MG Dyke.

Wartime Host Nation Support Update: Office of the Deputy Chief of Staff, Host Nation Activities COL Schleusing.

USAREUR Construction Program (MCA): Office of the Deputy Chief of Staff, Engineer COL Royce.

Real Property Maintenance Activities (RPMA)/Backlog of Maintenance and Repair (BMAR): Office of the Deputy Chief of Staff, Engineer COL Franklin.

Army Family Housing: Office of the Deputy Chief of Staff, Engineer COL Benn.

Master Restationing Plan: Office of the Deputy Chief of Staff, Engineer COL Napper.

1230-1330—Lunch in CINC's Dining Facility hosted by the CINC.

1330-1700—Open time. RON Heidelberg, PHV Hotel.

29 DECEMBER 1982

0900-1600—Drive to Bonn with stops at Mainz, Ruedesheim and Remagen and Lunch enroute Bonn.

1600-1630—Arrive Bonn. Check in Dreesen Hotel.

1630-1900—Open time.

1900-TBD—Dinner with Ambassador and Mrs. Burns and guests. RON Bonn, Dreesen Hotel.

30 DECEMBER 1982

0900-1630—US Embassy Bonn itinerary to include discussion on emerging relations with Kohl government, Stoessel Demarche, Host Nation Support and Master Restationing Plan. Also, meeting with new Federal Republic of Germany Defense Minister and meet with Bundestag counterparts.

1630-1700—Enroute Rhein Main.

1700-1715—Check in Rhein Main Hotel. RON Frankfurt, Rhein Main Hotel.

31 DECEMBER 1982

0800-0900—Breakfast.

0900-0915—Enroute Abrams Building, V Corps Headquarters.

0915-1115—V Corps itinerary to include office call with Commander, GDP Update and briefings on Military Construction Army.

1115-1145—Press and TV availability.

1145-1230—Enroute Fulda and border trace flight via V Corps rotary wing aircraft.

1230-1330—Lunch with Commander, Command Sergeant Major, NCO's and soldiers 11th Armored Cavalry Regiment.

1330-1530—Visit East German border and receive 11th Armored Cavalry Regiment border briefing.

1535-1630—Enroute Rheim Main via V Corps rotary wing aircraft.

1630-1915—Open time and flight processing.

1915—Depart for CONUS.

ENCLOSURE 2

[Translated from: "Die Welt," Bonn, 23 December 1982, Page 1 by Th. Kielinger]

U.S. CONGRESS VIOLATES DECISIONS FOR THE STRENGTHENING OF NATO—STRIKE AGAINST ARMAMENT COOPERATION/WOERNER'S WARNING LETTER NOT HEEDED

In the heated final days of the debate about the continuing resolution, the US Congress made a few decisions, which will have long-range and partly negative repercussions for America's alliance relationships. This has just now become known. Details of these budget decisions were literally buried in the overall package for the vote with which the Congress made the continuation of the US budget for 1983 possible.

Following thorough inquiries by WELT among NATO diplomats and in the Congress the following picture appears, divided according to various programs of the budget.

1. The so-called Stevens Amendment, the proposal of Republican Senator Ted Stevens (Alaska) concerning a qualified US troops withdrawal from Western Europe, was turned down. Instead, both houses agreed on a freeze of the US troop ceiling in Europe at the 1982 level. This was received with great relief by European diplomats in Washington. The actual strength of 1982 (about 318,000 soldiers) is actually higher than the authorized level.

2. The Congress blocked the money for the procurement of further Pershing II medium-range missiles, for the present, until the US Army can prove that the weapon is reliable. To date, no Pershing II flight test has run flawlessly. The stationing of the missiles in the Federal Republic is to begin end of 1983, if there are no results in the Geneva disarmament talks.

The stationing time schedule will not be affected by the blocked procurement money, since the means for the construction of about 20 Pershing II missiles are available from last years' budget. The production of this number of missiles can continue.

3. Congress struck the defense cooperation within NATO with its decision for the so-called Specialty Metals Clause (see

WELT, 18 Dec 82). According to this, the US government may not import parts and components for the armament of the American forces—also not from NATO countries—in as far as these parts contain traces of certain metals, from simple alloy steel to chrome, nickel, titanium, etc.

This practically means the end of the German armament trade with the respective US industry and with the Pentagon. Also producers in Belgium, Holland or such non-NATO countries as Switzerland or Australia were strongly affected. Only complete weapon systems—for example, a plane like the British "Harrier"—are exempt from the ban.

The Congressional decision violates a 6 year old agreement of political NATO institutions according to which the "two-way street" within the alliance was to be continually expanded. The main point of this agreement was that the Europeans could compensate their extensive weapons purchases in the USA with orders for military equipment from the US, at least to a moderate extent. Especially for the sake of this cooperation, NATO was excluded already in 1976 from the Specialty Metals Clause (it has been discussed in Congress since the early 70s).

This exemption was now withdrawn, against the expressed wish of the White House and other participating cabinet ministers. Neither common European diplomatic efforts in Congress nor a letter from Defense Minister Woerner last week, who urgently warned once again against this Congressional decision were successful.

According to Woerner's letter, it should also be feared that the planned conventional modernization of NATO will be seriously delayed. Affected by the Specialty Metals Clause are a number of new joint projects, among them the air defense system Patriot. Orders for American defense materiel from NATO countries will probably decrease.

4. Likewise not approved by Congress was the US money for the so-called Wartime Host Nation Support. These are financial means for the logistical support on site for the six additional American divisions to be deployed to Western Europe in time of crisis or war. Also in this, the Congressional decision violates an existing NATO agreement, this time between the US and the Federal Republic of Germany.

Bonn had just approved this year, with great efforts, its share of Wartime Host Nation Support (WHNS). Accordingly, the Federal Republic of Germany agreed to mobilize 93,000 reserves and assume one half the cost for the logistical support for American reinforcements, deployed in crisis or war. The 1983 Bonn defense budget includes an initial amount of DM 48 million. The deleted 1983 US share would have amounted to approximately DM 100 million.

5. Finally, the Congress also cut funds for the construction of two new NATO depots in Belgium and Holland. These depots were to be used for storage of major military equipment, also planned for use in times of crisis. Consequently, the number of major depots maintained in Germany will remain at the present four. The program for prepositioning of major items of equipment is dealt with in NATO under the abbreviated title POMCUS, "prepositioned materials configurated in unit sets". This program, as well as "Wartime Host Nation Support" belongs to the approved 1978 "long-term defense program" with which NATO intended to strengthen the credibility of conventional deterrence.

The administration was not capable of reversing the above mentioned congressional resolutions because they were altogether part of the continuing resolution. The president would have to veto the whole package if he wanted to reject single programs. This straitjacket also hindered the president from rejecting a compromise concerning the MX, which Congress practically forced upon him. (WELT, 21 Dec. 82).

According to speculations by diplomatic observers in Washington, the fate of the affected NATO-budget positions was sealed when Congress buried all of its own hopes for funds for the jobs program. The legislators demanded as a price, reductions which were welcomed because of the constantly cited "insufficient European defense support".

In the total budget for the Pentagon, these reductions were not significant. All in all the Congress passed Reagan's wishes for defense and approved a record Pentagon budget at $231.4 billion, an absolute Pentagon record.

Concerning the MX and cut NATO funds, the next serious discussions will again be resumed in connection with the 1984 budget.

THE COMMENTARY—THE SETBACK

(By Thomas Kielinger)

German-American relations are not without frictions. Only one short year ago the US ambassador in Bonn warned against "noises" from Congress. In the meantime in the Federal Republic a new government established itself and friendship with America became more emphasized, considering a supremacy-oriented Soviet Union versus the free portion of Europe which interprets the identity of interests as President Reagan. One would think that this common philosophy would substantially improve relations. Unfortunately this is not the case.

Congress dismantles the foundation on which a "two-way street" of armament cooperation could be built over the transatlantic bridge from America to Europe. Congress requires that with a few exceptions, all weapons and materiel must be bought only on the domestic market—a completely new way of protectionism. In addition, the Congress halts the expansion of all programs, which in crisis would strengthen the presence of US defense forces in Europe with a few days, from 4 to 10 divisions, including additional air force squadrons.

Looking from Europe to America, it is becoming more and more difficult to understand the motives which lead the House of Representatives and the Senate to these decisions which will deeply shake NATO. Doesn't the Congress realize what it is doing to the friendly opposite coast on the other side of the Atlantic? The new decisions from the Capitol are contributing to estrange allied Europeans from the U.S. more and more.

The coming year—as things stand in Geneva—could mark the beginning of stationing of new American-produced deterrence weapons in Western Europe, which demands a high level of understanding and support from Washington in view of the anticipated domestic political differences in the affected European countries. None of this is demonstrated by Congress.

[From the Daily Press Review]

U.S. INFORMATION SERVICE, EMBASSY OF THE UNITED STATES OF AMERICA, OFFICE OF THE PRESS ATTACHÉ

Major topics today and over the Christmas weekend include optimistic statements by Bonn coalition party leaders on economic developments in the FRG in 1983, the closing of internment camps in Poland and the arrest of seven "solidarity" union leaders, reaction to Andropov's disarmament proposals, statements by President Reagan and other western political leaders on the third anniversary of the Soviet invasion of Afghanistan, and Bonn reaction to the decision by the U.S. Congress on the "Specialty Metals Clause."

Die Welt (Dec. 24) (lead story from Bonn by Ruediger Moniac) under the headline "Bonn: Decision by Congress may be more damaging than useful for the U.S.": Foreign Minister Genscher has emphatically warned the U.S. Congress against adhering to its protectionist measures which would adversely affect NATO cooperation. A similar statement was made by State Secretary Kurt Jung of the Bonn Defense Ministry in reaction to the decision by Congress to use the "Specialty Metals Clause" as a means of equipping the U.S. Armed Forces almost exclusively with U.S.-made arms. Genscher said in a "Deutschland-Funk" statement that, from the German point of view, the decision taken by Congress "can only be regretted" because arms cooperation in an alliance of partners of equal rights should provide for including the economies of individual allied countries.

State Secretary Jung called the "Specialty Metals Clause" a "purely protectionist measure that favors certain groups of the U.S. metal industry." On the basis of pertinent studies, "more jobs in U.S. industry will be lost as a result of less European orders than will be preserved as a result of the protectionist clause," Jung said. He referred to calculations by the U.S. Department of Commerce that orders in the amount of one billion dollars mean jobs for about 30,000 persons in U.S. industry. The FRG orders arms and equipment in the U.S. for about one billion dollars annually. About ten billion dollars are envisaged for implementing joint arms projects as planned by Bonn for the next ten years. The statement issued by the Bonn defense ministry points out that if the "specialty metals clause" is adhered to for an extended period, "basic reexamination of our arms cooperation with the U.S. will be inevitable." That would be the end of "two-way traffic" in transatlantic arms cooperation as called for especially by Bonn. Moreover, adherence to the "specialty metals clause" would undermine the decision taken by the NATO defense ministers in early December to improve within the framework of the transatlantic dialog the arms of allied forces for fighting second-echelon forces of the Warsaw Pact as envisaged by the "Rogers Plan." Genscher and Jung expressed the hope that the new Congress will "critically reexamine the clause" for the benefit of cooperation with the European NATO partners.

Handelsblatt (p. 1) covers the statement by Bonn Defense Ministry state Secretary Kurt Jung under the headline "arms cooperation with U.S. to be reexamined." Jung pointed out that the "Specialty Metals Clause" is "incompatible with the NATO decision on intensified arms cooperation," Handelsblatt says.

U.S. CONGRESS BREAKS DECISIONS ON STRENGTHENING NATO

Die Welt (Bonn, Lib-Cons, lead story by Thomas Kielinger, Washington, under the above headline): ". . . The U.S. Congress has taken a number of decisions that will

have grave and partly adverse repercussions for alliance policy . . . that has transpired most recently . . . on the basis of careful inquiries undertaken by this paper among NATO diplomats and in Congress, the following picture may be drawn . . .:

(1) The so-called Stevens amendment on withdrawal of U.S. troops from Europe has been rejected . . . Both Houses agreed to freeze U.S. troops in Europe at the level of 1982. That has given rise to great relief on the part of European diplomats in Washington . . .

(2) Congress refuses to make funds available for procuring additional Pershing-2 missiles unless the U.S. Army can prove the system's serviceability . . . That does not affect the time-table for deployment in Europe of Pershing-2 missiles since last fiscal year's budget provided for funds for continuing production of some 20 missiles . . .

(3) In endorsing the so-called 'specialty metals clause', Congress dealt a heavy blow to NATO armament cooperation . . . In effect, it kills U.S.-German arms trade . . . The congressional vote is incompatible with a NATO agreement achieved six years ago on 'two-way traffic' (in the area of arms procurements) . . . Its principal purpose was to make sure that the Europeans are given some compensation for their voluminous procurement of U.S.-made arms . . . For the sake of such cooperation, NATO was exempted from the specialty metals clause in 1976 . . . In spite of the White House's objection, this has been revoked now . . . Joint European diplomatic efforts at making a case with Congress produced as little effect as did a letter from Bonn Defense Minister Manfred Woerner in which he emphatically warned against such a congressional decision . . . According to this letter, there is now reason for concern lest the planned modernization of NATO's general-purpose forces be seriously impeded since the specialty metals clause affects several joint programs, including the 'patriot' air defense systems. Procurement by NATO countries of U.S.-made materiel probably will decline.

(4) Congress also refused to make funds available for the war-time host nation support' program which provides for rushing six additional U.S. divisions to Europe in a contingency . . . again Congress violates an existing NATO agreement, namely, an agreement between Washington and Bonn. . . .

(5) Congress also cancelled appropriations for the construction in Belgium and the Netherlands of two new NATO depots for prepositioning materials within the framework of contingency planning . . .

The administration could not prevent the above Congressional decisions because they are part of a coherent budget bill. The President could have tried to prevent individual elements only by casting his veto against the aggregate package . . ."

Die welt (editorial by Ruediger Moniac): "German-American relations are not free from strain. About a year ago, the U.S. Ambassador in Bonn warned of 'noises' from Congress. In the meantime, a new government was established in Bonn which keeps emphasizing friendship with America and, in view of supremacy-minded Soviet policy vis-a-vis the free part of Europe, shares President Reagan's view of the identify of interests. One should think such accord is found substantially to improve relations. Unfortunately, that is not so. Congress is destroying the fundament from which the transatlantic bridge for two-way traffic in the field of arms cooperation could be built from the U.S. to Europe. Congress insists that the U.S. Armed Forces, with only a few exceptions, buy arms and equipment exclusively on the American market. That is an entirely new kind of protectionism. Moreover, Congress is applying the brake to all programs which, in a contingency, would make it possible to reinforce within a few days U.S. defense forces in Europe from four to ten divisions plus additional air squadrons. From the European point of view, it is increasingly difficult to comprehend the motives of the Members of the House of Representatives and of the Senate for taking decisions that have a profoundly negative effect of NATO. Do Congressmen fail to see what damage they are causing in friendly countries on the other side of the Atlantic? The latest decisions taken on Capitol Hill contribute to growing estrangement between the U.S. and its European allies. As things are (in the INF negotiations) in Geneva, the coming year is likely to see the beginning of deployment of new U.S.-made weapons of deterrence in Western Europe. In view of the anticipated domestic controversies in European countries concerned, maximum understanding and support from Washington would be required. Congress is not showing anything like that."

[From the Daily Press Review, Dec. 28, 1982]

U.S. INFORMATION SERVICE, EMBASSY OF THE UNITED STATES OF AMERICA, OFFICE OF THE PRESS ATTACHÉ

Major topics include optimistic as well as skeptical prognoses for economic developments in the FRG in 1983, the third anniversary of the Soviet invasion of Afghanistan, Soviet calls for a "concrete" U.S. reply to Andropov's disarmament proposals, and the impending negotiations between Israel and Lebanon.

WARTIME HOST NATION SUPPORT

Frankfurter Rundschau (front-page report from Bonn by Horst Schreitter-Schwarzenfeld): Implementation of provisions of the U.S.-German Wartime Host Nation Support Agreement, which was signed in Bonn last April, has become questionable. Since the U.S. Congress—according to reports from Washington—has failed to appropriate the required funds, Bundestag deputies intend to block the 43.8 million Deutschmarks Bonn has earmarked for implementation host nation support projects in 1985. The agreement States that the funds for implementing the envisaged projects will be raised jointly by the two governments concerned. Bundestag Deputy Peter Wuerz (SPD) told this papers that "if the Americans do not spend money (on this project) we will not spend anything either," He indicated that he failed to understand the position taken by the U.S. Congress on this matter since it were "the Americans who had shown great interest in working out a joint program." If Washington drops that program "we would just say alright" since "Bonn would save money," Wuerz said sarcastically.

Lothar Haase (CDU), chairman of the Bundestag Budget Committee, used less pointed but equally clear language in saying that "this thing makes sense only if both partners participate." Bonn Foreign Office and Defense ministry quarters are not happy about this development. They say the Bonn Government regrets the decision taken by the U.S. Congress on this matter and hopes that it will be revised. They pointed out that the Bonn Government has made its contribution to implementing this project by appropriating the required funds.

Frankfurter Rundschau (editorial by Horst Schreitter-Schwarzenfeld): "The attitude taken by the U.S. Congress in failing to appropriate funds for implementing wartime host nation support projects given rise to three different conclusions:

(1) It may have been a deliberate affront.

(2) Nobody is interested in this subject.

(3) There is total chaos.

Perhaps it was a combination of all these three points. Things are taken more seriously on this side of the Atlantic. At stake is our security. The agreement was signed last spring in a ceremony marked by mutual references to the spirit of German-American friendship . . . it would be wrong to assume that the Washington administration backs Congress in this matter. The administration certainly will do all it can to correct this congressional blunder . . . However, if the U.S. failed to participate, the wartime host nation support project would sink into oblivion."

OBSERVATIONS FROM MY TRIP TO THE FEDERAL REPUBLIC OF GERMANY

(By Mrs. Nancy M. Thurmond)

RAMSTEIN AIR FORCE BASE

At Ramstein Air Force Base on December 27, 1982, I had the pleasure of meeting Mrs. Robert W. Bazley, wife of the Vice Commander of the U.S. Air Force—Europe, and other assembled ladies. No complaints per se were expressed. Most of the ladies seemed well integrated into the military and civil community and appeared to be very happy.

On a subsequent tour of the Family Services Center with Colonel Loy, the Base Commander at Ramstein, I saw firsthand the important benefit of the Center in orienting new families to the area and in providing needed items such as pots, pans, clothing, etc., for families when they are getting settled in an overseas assignment. For many, I am sure, the assignment at Ramstein Air Force Base is their first tour of duty outside the United States.

I was also impressed with the Youth Recreation facility, which I also toured with Colonel Loy. It occurred to me that it would be an excellent deterrent to crime and drug usage among young people. An ice cream bar had just been installed as an inducement for teenagers to use the Center and its facilities after school. Colonel Loy discussed in detail the problem of getting young people to use this facility since it is packed with younger children who arrive immediately after school.

Because of economics, many spouses work, necessitating adequate afternoon supervision and activities, as well as good day care centers.

We also had an opportunity to visit the Chapel at Ramstein Air Force Base which was very large and well staffed. It had a variety of nondenominational religious services and related activities.

The ladies with whom I visited were enthusiastic and well informed. Many of them live off base on the "German economy." Many have learned German in an effort to maximize the opportunities available to them and to their families. Even though they were from diverse backgrounds and of diverse ages, I was impressed with the rapport and friendship they felt for each other—a very supportive atmosphere and fraternal ambiance filled the room.

U.S. ARMY, V CORPS

Later during the trip I met with six ladies at the Army's V Corps headquarters in Frankfurt at the Abrams Building. All were extremely gracious and beautifully attired—after all, it was New Year's Eve, and they probably had many other places to go!

They immediately began discussing the various problems and difficulties they and their families have encountered:

1. Housing—The inadequacy of housing, especially for young families, was discussed in great depth. "Stairwell housing" received the worst criticism. Having appliances, i.e., washers and dryers in working order, and lack of space were also concerns.

2. Commissary Usage—All expressed deep alarm and grave concern that the commissary and PX facilities may be curtailed or abolished. The ladies repeatedly talked about how difficult it is to make it on "military pay" with the high cost of living. They also expressed anger at the lack of stock at the PX, i.e., toy selection prior to Christmas and even the lack of adequate grocery supplies at the commissary, such as flour.

3. Dependent or Spouse Seclusion—The ladies expressed themselves very vocally on the necessity of "getting out" and not becoming isolated, especially for the newly arrived wife. They said it helped both emotionally and financially to work and to become active in the wives' club. They said there was nothing such as a welcome kit or family services center to help orient and assist new families on base. They repeatedly said that the Army conditions were not up to the standards of the Air Force.

4. Schools—The ladies were adamant about the inadequacy of schools and lack of educational opportunities for their children. For example, one lady said that her elementary school-aged children came home at 1 p.m. because there was no lunch program at the school. Teacher shortage and lack of educational and recreational materials were also concerns.

5. Terrorism—All were very worried about terrorist attacks and the lack of security they felt. They said they had become paranoid about looking for bombs, i.e., on the seats of their cars, in the trash, in coke bottles and even in luggage, as these were all prime receptacles and locations for explosive devices planted by terrorists. There had been five incidents just in the previous month alone. One lady said her eight-year-old son has developed repeated nightmares because of the terrorist fear.

I felt their sense of desperation and despair as all plaintively told me details of their individual situations. I was candid in telling them that I as only one person, myself just a spouse, even though empathetic and sympathetic to their plight and their needs, could do little except to pass on their complaints and to do a little "Monday morning quarterbacking" with my husband. I frankly told them they needed to be talking to Senator Thurmond directly and to members of the Senate Armed Services Committee, the Secretary of the Army, Jack Marsh, the Secretary of Defense, Caspar Weinberger, or all of the above. They seemed very grateful that someone would listen to them, and I wondered if this was the first time anyone had taken time to sit down with them and let them air their grievances. They all seemed committed to serving their Country alongside their husbands, but were hopeful of improving the quality of their life overseas in the United States Army.●

PRINTING OF THE RULES OF THE COMMITTEE ON ARMED SERVICES

● Mr. TOWER. Mr. President, in accordance with rule XXVI of the Standing Rules of the Senate, requiring the publication of the rules of each Senate committee in the CONGRESSIONAL RECORD not later than March 1 of each year, I submit the procedural rules of the Committee on Armed Services and ask that they be printed in the RECORD.

The rules follow:

ARMED SERVICES COMMITTEE RULES OF PROCEDURE

(Adopted February 24, 1983)

1. Regular Meeting Day and Time. The regular meeting day of the committee shall be each Thursday at 10:00 a.m., unless the committee or the chairman directs otherwise.

2. Additional Meetings. The chairman may call such additional meetings as he deems necessary.

3. Special Meetings. Special meetings of the committee may be called by a majority of the members of the committee in accordance with paragraph 3 of Rule XXVI of the Standing Rules of the Senate.

4. Open Meetings. Each meeting of the committee, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by the committee or a subcommittee thereof on the same subject for a period of no more than fourteen (14) calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated below in clauses (a) through (f) would require the meeting to be closed, followed immediately by a record vote in open session by a majority of the members of the committee or subcommittee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings—

(a) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;

(b) will relate solely to matters of committee staff personnel or internal staff management or procedure;

(c) will tend to charge an individual with a crime or misconduct, to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy or will represent a clearly unwarranted invasion of the privacy of an individual;

(d) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the investigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;

(e) will disclose information relating to the trade secrets or financial or commercial information pertaining specifically to a given person if—

(1) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

(2) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or

(f) may divulge matters required to be kept confidential under other provisions of law or Government regulations.

5. Presiding Officer. The chairman shall preside at all meetings and hearings of the committtee except that in his absence the ranking majority member present at the meeting or hearing shall preside unless by majority vote the committee provides otherwise.

6. Quorum. (a) A majority of the members of the committee are required to be actually present to report a matter or measure from the committee.

(b) Except as provided in subsections (a) and (c), and other than for the conduct of hearings, six members of the committee shall constitute a quorum for the transaction of such business as may be considered by the committee.

(c) Three members of the committee, one of whom shall be a member of the minority party, shall constitute a quorum for the purpose of taking sworn testimony, unless otherwise ordered by a majority of the full committee.

(d) Proxy votes may not be considered for the purpose of establishing a quorum.

7. Proxy Voting. Proxy voting shall be allowed on all measures and matters before the committee. The vote by proxy of any member of the committee may be counted for the purpose of reporting any measure or matter to the Senate if the absent member casting such vote has been informed of the matter on which he is being recorded and has affirmatively requested that he be so recorded.

8. Announcement of Votes. The results of all rollcall votes taken in any meeting of the committee on any measure, or amendment thereto, shall be announced in the committee report, unless previously announced by the committee. The announcement shall include a tabulation of the votes cast in favor and votes cast in opposition to each such measure and amendment by each member of the committee who was present at such meeting. The chairman may hold open a rollcall vote on any measure or matter which is before the committee until no later than midnight of the day on which the committee votes on such measure or matter.

9. Subpoenas. Subpoenas for attendance of witnesses and for the production of memoranda, documents, records, and the like may be issued by the chairman or any other member designated by him, but only when authorized by a majority of the members of the committee. The subpoena shall briefly state the matter to which the witness is expected to testify or the documents to be produced.

10. Hearings. (a) Public notice shall be given of the date, place, and subject matter of any hearing to be held by the committee, or any subcommittee thereof, at lecst 1 week in advance of such hearing, unless the committee or subcommittee determines that good cause exists for beginning such hearings at an earlier time.

(b) Hearings may be initiated only by the specified authorization of the committee or subcommittee.

(c) Hearings shall be held only in the District of Columbia unless specifically authorized to be held elsewhere by a majority vote of the committee or subcommittee conducting such hearings.

(d) Witnesses appearing before the committee shall file with the clerk of the committee a written statement of his proposed testimony at least 24 hours not including weekends or holidays prior to a hearing at

which he is to appear unless the chairman and the ranking minority member determines that there is good cause for the failure of the witness to file such a statement.

(e) Confidential testimony taken or confidential material presented in a closed hearing of the committee or subcommittee or any report of the proceedings of such hearing shall not be made public in whole or in part or by way of summary unless authorized by a majority vote of the committee or subcommittee.

(f) Any witness summoned to give testimony or evidence at a public or closed hearing of the committee or subcommittee may be accompanied by counsel of his own choosing who shall be permitted at all times during such hearing to advise such witness of his legal rights.

(g) Witnesses providing unsworn testimony to the committee may be given a transcript of such testimony for the purpose of making minor grammatical corrections. Such witnesses will not, however, be permitted to alter the substance of their testimony. Any question involving such corrections shall be decided by the chairman.

11. Nominations. Unless otherwise ordered by the committee, nominations referred to the committee shall be held for at least seven (7) days before being voted on by the committee. Each member of the committee shall be furnished a copy of all nominations referred to the committee.

12. Real Property Transactions. Each member of the committee shall be furnished with a copy of the proposals of the Secretaries of the Army, Navy, and Air Force, submitted pursuant to 10 U.S.C. 2662 and with a copy of the proposals of the Director of the Federal Emergency Management Agency, submitted pursuant to 50 U.S.C. App. 2285, regarding the proposed acquisition or disposition of property of an estimated price or rental of more than $50,000. Any member of the committee objecting to or requesting information on a proposed acquisition or disposal shall communicate his objection or request to the chairman of the committee within thirty (30) days from the date of submission.

13. Legislative Calendar. (a) The clerk of the committee shall keep a printed calendar for the information of each committee member showing the bills introduced and referred to the committee and the statute of such bills. Such calendar shall be revised from time to time to show pertinent changes in such bills, the current status thereof, and new bills introduced and referred to the committee. A copy of each new revision shall be furnished to each member of the committee.

(b) Unless otherwise ordered, measures referred to the committee shall be referred by the clerk of the committee to the appropriate department or agency of the Government for reports thereon.

14. Except as otherwise specified herein, the Standing Rules of the Senate shall govern the actions of the committee. Each subcommittee of the committee is part of the committee, and is therefore subject to the committee's rules so far as applicable.

15. Powers and Duties of Subcommittees. Each subcommittee is authorized to meet, hold hearings, receive evidence, and report to the full committee on all matters referred to it. Subcommittee chairmen shall set dates for hearings and meetings of their respective subcommittees after consultation with the chairman and other subcommittee chairmen with a view toward avoiding simultaneous scheduling of full committee and subcommittee meetings or hearings whenever possible.●

ORGANIZATION OF THE COMMITTEE ON ARMED SERVICES FOR THE 98TH CONGRESS

● Mr. TOWER. Mr. President, I am pleased to report to the Senate that the Committee on Armed Services has completed the process of organizing and is now prepared to move forward with the orderly handling of those matters within our jurisdiction.

I ask that a copy of our subcommittee organization and the members of our six subcommittees be printed in the RECORD.

The material referred to follows:

SENATE ARMED SERVICES COMMITTEE

SUBCOMMITTEE ON MILITARY CONSTRUCTION

Senator Thurmond (Chairman), Senator Warner, Senator Humphrey, Senator Quayle, Senator East, Senator Hart (Ranking Member), Senator Jackson, Senator Stennis, Senator Exon.

SUBCOMMITTEE ON TACTICAL WARFARE

Senator Goldwater (Chairman), Senator Tower, Senator Warner, Senator Jepsen, Senator Wilson, Senator Kennedy (Ranking Member), Senator Levin, Senator Bingaman.

SUBCOMMITTEE ON STRATEGIC AND THEATER NUCLEAR FORCES

Senator Warner (Chairman), Senator Tower, Senator Thurmond, Senator Goldwater, Senator Cohen, Senator Quayle, Senator Jackson (Ranking Member), Senator Stennis, Senator Nunn, Senator Hart, Senator Exon.

SUBCOMMITTEE ON PREPAREDNESS

Senator Humphrey (Chairman), Senator Goldwater, Senator Jepsen, Senator Wilson, Senator Levin (Ranking Member), Senator Jackson, Senator Kennedy.

SUBCOMMITTEE ON SEA POWER AND FORCE PROJECTION

Senator Cohen (Chairman), Senator Tower, Senator Quayle, Senator East, Senator Wilson, Senator Nunn (Ranking Member), Senator Stennis, Senator Hart, Senator Levin.

SUBCOMMITTEE ON MANPOWER AND PERSONNEL

Senator Jepsen (Chairman), Senator Thurmond, Senator Humphrey, Senator Cohen, Senator East, Senator Exon (Ranking Member), Senator Nunn, Senator Kennedy, Senator Bingaman.●

DR. HELEN CALDICOTT ADDRESSES NATIONAL PRESS CLUB

● Mr. KENNEDY. Mr. President, last Friday, February 25, I was honored to join in introducing Dr. Helen Caldicott, president of the Physicians for Social Responsibility, to the National Press Club.

Dr. Caldicott is one of the most eloquent voices on Earth for the prevention of nuclear war. Physicians for Social Responsibility, the group which she has led so ably and effectively, has taken a leading role in awakening people everywhere to the true horror of nuclear war. In the past 3 years alone, Physicians for Social Responsibility has grown tenfold to a membership of 30,000 in more than 180 chapters in all 50 States.

In her address to the National Press Club, Dr. Caldicott noted that:

In the past, PSR's role as a leader in the antinuclear movement has been to educate the public on the medical dangers of nuclear war. Now PSR must help to prescribe the therapy.

In its critical educational effort, Physicians for Social Responsibility has alerted the public to the dangers of the arms race and broken through psychic numbing on the consequences of nuclear war. It has now become a driving force in advocating an immediate, bilateral nuclear weapons freeze.

In addition, PSR is advocating a number of other important steps, including conclusion of a comprehensive test ban and opposition to the deployment of new destabilizing nuclear weapons systems by the United States and the Soviet Union.

I request that Dr. Caldicott's eloquent and compelling address be printed at this point in the RECORD.

The address follows:

[Embargoed until February 25, 1983]

SPEECH BEFORE NATIONAL PRESS CLUB

(By Dr. Helen Caldicott, President, Physicians for Social Responsibility)

In 1980, less than 26 percent of the voting American public elected Ronald Reagan as President. Recent Harris polls show that 66 percent of the public feel that President Reagan is doing an unsatisfactory job on arms control. 57 percent believe that America is at least as strong as the Soviet Union. 75 percent want a bilateral nuclear weapons freeze, and 80 percent favor bilateral reductions. 90 percent would favor a multi-lateral freeze, and 91 percent multi-lateral reductions in nuclear weapons.

Among the strongest supporters for these proposals are Republicans, conservatives, and people who voted for Ronald Reagan.

This represents almost a total mandate from the American people, people who are becoming increasingly knowledgeable about nuclear weapon strategies. They watch this Administration's policies with alarm. Yet, how does the President respond to this mandate? He produces two sets of proposals: INF and START, which are designed by the nature of the numerical advantage they give the U.S. to fail. The INF proposals do not account for the British, French, or Chinese nuclear weapons nor the American forward-based systems on bombers and submarines designated to NATO. Mr. Reagan's zero option is a call for partial unilateral disarmament on the part of the Soviet Union. The START proposal calls for dismantling of more than half the Soviet land-based strategic nuclear weapons (75 percent of which are land-based), while the U.S. can actually add a few more weapons to its 25 percent ratio of land-based nuclear weapons (50 percent are on relatively invulnerable submarines and 25 percent in bombers). Bombs on intercontinental airplanes are not included, nor are 8,000 cruise missiles about to be produced and deployed.

He has initiated a $65 million public relations program to convince the American and European public that more nuclear weapons are good for them, while the Arms Control

and Disarmament Agency—responsible for all the negotiations on arms control—has an annual budget of only $20 million. This will only act as a catalyst to the cynical, well-informed European public, and also I suggest to the increasingly well-informed American public.

While the President talks about deep reductions, he is, in fact, planning to build 17,000 more hydrogen bombs, including the small strategic sea-launched cruise missile, unverifiable by National Technical Means, which signals the end of arms control agreements; the extremely accurate and rapid Pershing II missile, which could well instigate a Soviet Launch-On-Warning system where computers initiate nuclear war; MX and D5 Trident II missiles, which were designed with the accuracy and reliability the Administration feels it needs for a first-strike, so-called "winnable" war. Such a nuclear war is described in the Pentagon's Five-Year "Defense Guidance," which calls for preparations for a protracted nuclear war to be fought over a period of 6 months, at the end of which time the U.S. will "prevail." That is, the U.S. will have more nuclear warheads than the Soviet Union. The "guidance" also calls for decapitation of the Soviet leadership by Pershing II missiles (leaders who could only "control" such a war if alive); for guerrilla warfare in eastern Europe; for anti-satellite and anti-submarine warfare; and for economic warfare with the Soviet Union.

The President's past advisor, Eugene Rostow, said that "We are living in a pre-war and not a post-war world," and his new nominee to head the Arms Control and Disarmament Agency, Kenneth Adelman, calls arms control a "sham," and said that one reason not to rush into talks is "that in a democracy these negotiations tend to discourage money for defense programs."

The Administration plans to spend $2.2 trillion, including cost over-runs on defense in the next 5 years, while programs for health care, Medicaid, health insurance are cut, and WIC programs which supply milk for infants and pre-natal and post-natal care for poor women are dismantled. The national infant mortality is now 12.8 per 1,000; in Washington, D.C., 22.8, with whites at 8 and blacks at 28 per thousand. The world's most affluent nation now ranks 11th in the world in infant mortality. The world spends $600 billion a year or $1 million a minute on the arms race, while two-thirds of the world's children are malnourished and starving. The economy of this country is in disrepair, a large cause being the cost-plus exorbitantly expensive dead-end defense industry. More than half the country's scientists and engineers are funded by the Defense Department. The brilliant technological expertise which once made this country so powerful economically is systematically being diverted towards weapons technology, while Japan and West Germany, with virtually no war budgets, forge ahead in their economies, relatively speaking.

The people of this country are now understanding the magnitude of the problem. They are beginning to realize that there is no "defense" against nuclear weapons; that the Department of Defense is a misnomer and should probably be accorded its original title of Department of War.

Physicians, along with many others, have produced this enormous popular mandate to end the arms race. The people now understand that there may very likely be no long-term biological or social survival after a nuclear war, and that nuclear war cannot be "limited" or "protracted."

Conversely, the Administration seems to believe in post-nuclear war survivability; otherwise, there can be no rationale for these new weapon systems. I would suggest that T. K. Jones, Deputy Under Secretary of Defense, who said, "If there are enough shovels to go around, we are all going to make it," and others, have not studied the scientific literature on long-term survivability.

Recently, the Royal Swedish Academy of Sciences investigated the medical and ecological consequences of a conservative nuclear war scenario, using only one-half the total 1985 megatonnage of the superpowers. Targeting involved all cities and towns with populations greater than 100,000 in the U.S., Canada, east and west Europe, USSR, Japan, North and South Korea, Vietnam, Australia, South Africa, and Cuba, and cities of more than 500,000 in India, China, Pakistan and the rest of Southeast Asia.

Of the 1.3 billion urban population in the northern hemisphere, 750 million would be killed immediately from blast alone, and 350 million severely injured. Fire and fall-out will kill hundreds of millions more. An attack only on the nuclear reactors in Europe and the U.S. would render uninhabitable by normal radiation standards for years or even decades both these continents.

Many millions of survivors would die from epidemics of cholera, typhoid, dysentery, tuberculosis, rabies, polio, Black Plague, and hepatitis. These diseases would be spread by proliferating radiation-resistant insect vectors (cockroaches, flies, lice and fleas) from animal and human corpses to the living. Birds which normally eat the insects will be killed from fall-out. Survivors will be susceptible to disease as fall-out and starvation compromise their immune systems, and antibiotics and medical care will be virtually non-existent.

By conservative estimates, 5.4–12.8 million will die of fatal cancers, 17–31 million will be sterile, and 6.4–16.3 million children will be born genetically defective. (These calculations were made only for a 7-day radiation dose. A 25-year dose would incur millions more cases of disease.)

A summer attack could spark forest and grass fires, which could cover the U.S. A thick layer of particulate and photo-chemical smog from forest, oil and gas fires could blanket the northern hemisphere, reducing noon-day sun by a factor of 2–150.

Massive reductions of stratospheric ozone could cause increased solar UV light to damage most unprotected human and animal eyes; induce lethal sunburn within an hour to exposed people; increase the incidence of skin cancer, melanomas, and vitamin D toxicity in the northern and southern hemisphere survivors; destroy large populations of phytoplankton in the ocean, which create oxygen to replace the ozone layer. The increased UV light could also kill most microorganisms which constitute the base of the pyramid of life at which man stands at the apex.

Severe famine induced by smog, UV damage, cooling of the earth, absent fertilizers, insecticides, machinery and manpower would catalyze the effects of disease and would kill hundreds of millions in the Third World. Cooling of the earth by 1–2 degrees Fahrenheit could induce another Ice Age.

Rain water and surface water and most food will be contaminated with radio-active isotopes. Survivors may well be psychotic with grief, acutely anxious, or so severely depressed that the drive for survival and reproduction may disappear.

If these known and unknown global effects reacted in a synergistic fashion, it is possible that most planetary life would be extinguished.

The 19th century German pathologist, Rudolph Virchow, said, "Medicine is a social science, and politics is medicine writ large." In the past, physicians have worked with politicians to practice preventive medicine—to eliminate smallpox, control malaria, and immunize our children.

Nuclear war is the ultimate medical issue. PSRA has effectively educated the public about the medical dangers of nuclear war. It must now help to prescribe the therapy. Prevention of nuclear war can only be accomplished through the democratic political process.

PSR will, therefore, encourage passage of bilateral nuclear weapons freeze resolutions in the House and Senate, will support passage of a comprehensive test-ban treaty, and will discourage authorization and appropriation for the new destablizing weapons and delivery systems—the MX, D5-Trident II Missile, Pershing II, sea-launched and advanced cruise missile. This is not unilateralism. There now exists a position of strategic parity between the two superpowers. Russia has said if these new weapons are produced she, too, will build them. Therefore, the window of opportunity for obtaining a freeze remains open, at the most, 1–2 more years.

The freeze movement has only just begun. It will become the dominant topic of the Presidential and Congressional campaigns.

But what beyond the freeze? There are still 50,000 nuclear weapons and only 1,000-2,000 "worthwhile" targets in either superpower. Every day we live on borrowed time. Do the politicians, Pentagon officials, scientists, and military industrial complex understand this?

The children do. Recently, the American Psychiatric Association studied 1,000 adolescents in Boston, and to their horror found the majority don't believe they will live to adulthood, have babies, or get jobs. One little girl recently said at a conference, "Nobody likes to be given a broken gift. This is how we feel about our future." The parents do. The polls reflect this. The women do, illustrated by the gender gap in the polls. Women and men with nurturing vision are the driving force in this movement. They provide a unique contribution. They comprehend the genesis of life and, also, understand the concept of conflict resolution. Negotiating from the "position of strength" never produces resolution, only destruction of relationships.

How many leaders of the world really emotionally understand what they are doing? They are people who are caught in pre-nuclear thinking. Einstein said, "The splitting of the atom has changed everything save man's mode of thinking, thus we drift towards unparalleled catastrophe."

How many leaders of the world have witnessed the explosion of a hydrogen bomb, felt the intense heat, and seen battleships disappear in the ocean like splinters? How many have witnessed the miracle of the birth of a baby? How many have helped a child to die and supported the parents in their grief?

The American people are realizing the only pragmatic way to break the psychic numbing of politicians is to threaten their political survival.

Americans are organizing in towns and cities throughout the country to elect a

President and Congress in 1984, committed to rapid bilateral nuclear disarmanent.

We live on a gravely threatened planet and face an acute clinical emergency. Time is of the essence. As we move towards disarmament, we must not forget that the cause of the illness is not the weapons per se, but the relationship of the superpowers. This can be solved only by moral initiatives and a climate of good will. Recent history demonstrates such a move with a hegemonic Communist superpower, which has not always respected human rights. Nuclear-armed China, once such a despised and bitter enemy, was made an ally by a conservative Republican president.

After the Cuban missile crisis, President Kennedy initiated conciliatory moves with the Soviet Union. He stopped atmospheric testing. They responded. They stopped production of strategic bombers. A hotline was established. The Russians were so pleased with these moves they called it "The Policy of Mutual Example." Tensions between the superpowers reached an all-time low. The whole world breathed a sigh of relief and then deeply mourned his death.

President Reagan could also be perceived by posterity as a great statesman, if he took the moral initiative and made the first move towards the Soviet Union. For example, he could offer them a much-wanted Most-Favored Nation status in trade. Should Russia and America become friends, the weapons would become anachronistic overnight.

America is the greatest democracy on earth. Because the Russian people don't have a democracy, we have double the responsibility to prevent nuclear war. Americans are wonderful, kind, loving people, who desperately want to do the right thing. America built and used the first nuclear weapon. It has led the arms race. It can and will lead the world to salvation and survival.

To this end and on behalf of humanity, I make this call today. Mr. President, you have given us a Five-Year Plan for massive rearmament with a goal of nuclear war fighting capability. We call upon you to respond to the peoples' needs, and give us a five-year plan for disarmament with a goal of nuclear war prevention.

We call upon you to negotiate a U.S.-Soviet freeze within one year.

We call upon you to achieve a 50 percent bilateral cut in all nuclear weapons and delivery systems in the next two years.

We call upon you to achieve a bilateral two-thirds reduction of the remainder in the following two years.

The vast majority of Americans want not only a freeze, but also reduction.

It is your patriotic duty to preserve this country. Four billion human beings live neither in America nor Russia and they, too, desperately want to survive.

We are the curators of life on earth. The decisions we make in the next two years may determine the future of God's creation.●

OLDER AMERICANS VOCATIONAL EDUCATION

● Mr. BENTSEN. Mr. President, I am pleased to join Senator PELL as an original cosponsor of the Older Americans Vocational Education Act, S. 554.

Unemployment amongst older Americans has grown at an alarming rate throughout the course of this recession with joblessness for those over 45 reaching a record of nearly 2 million persons during the month of December 1982. Approximately one-half of these individuals is 55 or older. Since July of 1981, this represents an increase of almost 58 percent for a group of persons who often face barriers to employment not applied to younger workers.

Mr. President, I would particularly like to call my colleagues attention to the eligibility criteria for participating in this program and to the structure through which the program, if enacted, will be administered. State allocations—based on the number of residents over 45 years of age—will be available for employment based programs where job opportunities can be identified, particularly in industries with new and emerging technology. Training programs, placement services, and counseling for older workers are also eligible for funding. I might point out that, in an effort to facilitate participation, the legislation specifically names as training sites community and junior colleges, vocational programs, and other facilities accessible and convenient to the older worker.

In carrying out the training programs under this act, priority will be accorded older Americans who are entering the work force for the first time, who are unemployed and in need of retraining for new job opportunities, and who need training for high technology positions.

Each State desiring to receive assistance will be required to establish an older Americans job training committee composed of representatives from the State education agency, the State agency on aging, the State board of vocational education, a representative from the postsecondary vocational education community, an officer from the State agency responsible for administering the Jobs Training and Partnership Act, and a representative of the private sector. The expertise represented on this committee should insure effective and innovative use of available funds with programs tailored to individual communities.

Mr. President, at a time when structural unemployment among the older members of our work force has reached an alltime high, I can think of no program more deserving of our attention than retraining and placement of those individuals who have a proven history of participation in the work force, who are anxious to continue to contribute actively, and whose principal barriers to effective contribution are age and the need to upgrade their skills.

I call upon my colleagues to join with us in support of the Older Americans Vocational Education Act—it is an investment well worth making.●

REAGAN ADMINISTRATION'S ARMS REQUEST FOR EL SALVADOR

● Mr. KENNEDY. Mr. President, I oppose the administration's request for an additional $60 million in arms aid for El Salvador. Instead of pursuing a policy of military escalation in that war-torn nation, I believe the United States must work with our democratic allies to achieve a military truce, a halt to arms supplies to any of the belligerents from any source, and a negotiated settlement of that tragic conflict.

In this connection, I would like to draw my colleagues' attention to "End Run on El Salvador," a commentary on the administration's unfortunate policy toward that country written by former New York Times senior editor John B. Oakes and published in that newspaper last week. Mr. Oakes warns that the United States risks total disaster in El Salvador by playing "fast and loose" with the certification process imposed by Congress, rejecting proposals for negotiations, and relying instead on increasingly massive American military equipment to save the day for democracy in Central America. I ask that Mr. Oakes' commentary be printed in the RECORD.

The commentary follows:

END RUN ON SALVADOR

(By John B. Oakes)

Secretary of State George P. Shultz is in danger of putting himself in the same class as the Watts and the Burfords and all the other Presidential appointees who are busily engaged in doing end runs around Congress and the law in order to carry out the policy objectives of the Reagan Administration.

He is falling into this trap by blandly and blindly following the road to disaster in Central America as laid out by his predecessor, former Secretary Haig, for whose policies Mr. Shultz only recently expressed warm admiration. That's not surprising, he observed, since they both serve the same President.

What is surprising, however, is that a man of Mr. Shultz's stature would put his name to the latest State Department document certifying to Congress that El Salvador's Government qualifies for the threefold increase in military aid that the Administration is now proposing.

Two revealing reports, virtually unnoticed in the press, by American observers just back from El Salvador demonstrated the falsity of the State Department's—and Secretary Shultz's—position.

The first of these comes from a mission to El Salvador of the Association of the Bar of the City of New York and is signed by a former President of the Association and a former chairman of its Committee on Inter-American Affairs.

"The slaughter of civilians by security forces goes on at a monstrous rate," the report declares, "and, thus far, there is no evidence that a single member of these forces has been convicted or sentenced in any case involving the murder or torture of a citizen labeled 'subversive' by the security forces. . . . If the incidence [of civilian mur-

ders] should decline to 'only' 5,000 killed a year [the most probably accurate count, as against the State Department's estimate of 2,600] it suggests a decline in available targets rather than an increase in humane behavior or attitude."

As a condition of continued aid, Mr. Shultz had to certify, under United States law, that El Salvador is making "a concerted and significant" human rights effort and is achieving enough control over its own security forces "to bring to an end the indiscriminate torture and murder of Salvadoran citizens." But if El Salvador's Government is in control of its security forces, then it obviously is not making the required human rights effort; if it is not in control, then it cannot bring the murders to an end. Either way, the report observes, the Secretary's certification is "unwarranted and unsupportable."

Secretary Shultz's certification does something more than evade the clear meaning of the law. It suggests to all the world that, despite the State Department's periodic denunciation of human rights violations, the United States is willing for policy reasons to acquiesce in the elimination by illegal means of alleged subversives abroad. If, then, abroad, why not at home?

The other new report cites compelling evidence of the State Department's obstructionism and collusion with Salvadoran authorities in blocking a thorough investigation of the murder two years ago of four American church-connected social workers, three of whom were nuns. Issued by the highly respected Lawyers Committee for International Human Rights, which represents the victims' families, this report is almost as much an indictment of Mr. Shultz's State Department as it is of Salvadoran justice. It accuses the Department of supporting Salvadoran officials in their refusal to follow leads that point clearly to the involvement of "higher-ups" in ordering the murders, for which five wretched low-ranking guardsmen are now awaiting trial.

The Reagan Administration has played so fast and loose with the certification procedure that proposed additional restrictions—such as a requirement that the Salvadoran Government open negotiations with the opposition—are likely to be no more effective than the existing ones. The real change that is needed is not in law but in policy.

Secretary Shultz sounded a good deal like former Secretary Haig the other day when he rejected the idea of negotiations to bring this American-fueled war to an end. In doing so, he only strengthened the analogy between United States policy in El Salvador now to that in Vietnam a few years ago, where a "no-negotiation" stance—until too late—helped pave the way to total disaster. If we continue to pursue the same course in Central America's revolutionary civil wars—whether in El Salvador, Nicaragua or Guatemala—as we did in Southeast Asia's, we are likely to end up with the same appalling result.

Unfortunately, the Reagan Administration still seems to believe that American military "advisers," American military training and increasingly massive American military equipment will save the day for democracy in Central America—instead of burying it.●

SENATOR SARBANES SALUTES BALTIMORE CITY SCHOOLS

● Mr. SARBANES. Mr. President, Thomas Jefferson told us that "If a nation expects to be ignorant and free, it expects what never was and never will be." From the beginning of the Republic, we have recognized the central importance of education and placed a premium on achieving the educated citizenry necessary to a democracy.

Unlike any other nation, America has established as a national goal the opportunity that a young boy or girl, through the development of their own talents and abilities, can go from the very bottom of the ladder to the top. It is the dedicated teachers and principals in our schools and classrooms day in and day out who are the prime resource for delivering on that promise of America.

In Maryland we are indeed fortunate to have large numbers of dedicated and qualified educators preparing our children and working to build the talents of the next generation. Every county and city has innumerable examples of such outstanding molders of our Nation's youth. I am pleased to bring to the attention of my colleagues a recent article from the Wall Street Journal which highlights two such educators in Baltimore City and points out the many advances and improvements in Baltimore's outstanding school system.

The two fine school principals, Evelyn Beasley and Arnett Brown, highlighted by the article are not only highly qualified educators and managers, but leaders involved in instilling the love of learning, as well as insuring that their students learn the fundamentals of the curriculum. Their efforts have been rewarded in the best way possible—in the achievement and success of their students.

Mr. President, all over Maryland and, I am sure, all over America, there are effective educators like Mrs. Beasley and Mr. Brown—strong, caring principals able to guide dedicated teachers. The recent article from the Wall Street Journal tells the story of two such outstanding leaders, and I ask that it be reprinted in the RECORD at this point.

The article follows:

INNER CITY SCHOOLS LIFT STANDARDS WITH HELP OF STRONG PRINCIPALS

(By Burt Schorr)

BALTIMORE.—Roland Park School here exemplifies an encouraging phenomenon in American education: the reconstituted urban public school that works, often under the leadership of a strong-minded principal.

Roland Park once was an elite preserve of the high-income northwest Baltimore neighborhoods that surround the elementary and junior high school. Then came desegregation and a 1971 rezoning plan. Black students and some whites from low-income neighborhoods arrived, and more-affluent white students departed.

Conditions at the school deteriorated, partly because many of the new arrivals resented being transferred. They wrote on the walls. Some urinated in the stairwells. In 1975, police had to break up a student melee in the streets outside. Worst of all, Roland Park ninth graders were scoring more than a year behind the national average for reading skills and almost two years behind in math.

Things began to change on March 8, 1976, the day Evelyn Beasley walked through Roland Park's battered front door and took over as principal. There were new rules: Bring a notebook and pen or pencil every day; don't wear tank tops or shorts; don't throw food in the cafeteria. And Mrs. Beasley, a chunky, motherly woman, didn't hesitate to suspend violaters. She also encouraged effective teachers and was able to get rid of poor ones. With parents, she lobbied successfully for an advanced academic program open to bright students citywide as well as to neighborhood children.

Today, with some 1,550 students crowded into its weathered brick building, a majority of them from low-income black homes. Roland Park School is 20 percent over capacity. But the walls and stairways are clean. Disciplinary suspensions have fallen more than 80 percent since 1976. And junior-high students are nearly two years ahead of the national reading and math averages.

BROAD TREND

Urban schools of this quality still are in the minority. Problems such as high dropout rates, low achievement and occasional violence continue to plague the upper grades of public education in many cities. However, educators say, some newly effective schools have emerged from one-time blackboard jungles in Baltimore, Richmond, Atlanta, Dallas, Detroit, Milwaukee and elsewhere. And despite budget cutbacks and teacher layoffs, these educators say, the trend continues.

Confidence in public education in Memphis was strong enough that a comfortable majority of black and white voters last year approved a sales-tax increase that includes $13 million annually for the city's schools. Willie Herenton, the Memphis school superintendent, estimates that 60 percent of his first-through-eighth graders currently score at or above their grade level in reading and math. Four years ago, only 40 percent did, he says. He attributes much of the improvement to training that principals are getting from administrators on how to evaluate teachers and suggest improvements.

The turnabout isn't limited to "magnet" schools like Roland Park that offer special programs to attract bright pupils. Baltimore's list of much-improved schools also includes Cherry Hill Junior High, whose student body is drawn almost entirely from an all-black, mostly poor or blue-collar community on the city's southeast side. Cherry Hill's principal, 54-year-old Arnett Brown Jr., plays the role of strong father for many of his students, the great majority of whom come from fatherless households.

The end of the Vietnam-protest era and the reviving of respect for authority have helped. "Ten years ago, you'd walk into a school and the kids would run all over you," says John Crew, who recently retired as Baltimore's superintendent of schools. "We don't have that anymore."

Another factor is community and state pressure to improve students' basic skills. "We want students who can read and write and compute, who can get and hold jobs and who can be active in Baltimore public life," says Baltimore's Mayor, William Schaefer.

Six years ago, after a decade marked by desegregation problems, a bitter teachers'

strike, white flight and declining test scores, Baltimore overhauled its school curriculum. It emphasized basics such as reading and arithmetic that would be tested on achievement exams, and it tied these to more-frequent testing of student skills. Reading and math scores have since climbed significantly throughout the system, although last spring's high-school graduates remained well below the national average on the Scholastic Aptitude Test for college admission.

Baltimore also has added a third year of math and science and a third and fourth year of French or Spanish to its graduation requirements for college-bound high-school students. Some middle-class white students have been returning to the system, officials say.

What makes a school effective continues to be debated. Not surprisingly, though everyone's list begins with a strong principal able to guide, or at least recognize and support, effective teachers—a description that fits Evelyn Beasley at Baltimore's Roland Park and Arnett Brown at Cherry Hill.

EVELYN BEASLEY

A few days before she took over troubled Roland Park school in 1976, Mrs. Beasley opened a folder that had been prepared for her. It contained letters and memos detailing the teacher shortcomings and other problems she would face at her new post. After glancing at a couple of the comments, though, she threw away most of the folder's contents. "I didn't want to read any of that stuff," she remembers, "I wanted to judge for myself."

Evelyn Beasley has been figuring it out for herself ever since her 1930s childhood in an east Baltimore black ghetto. The Baltimore school system knows her as "a bit of a renegade who often ignores bureaucratic procedures but who firmly believes that bright students should be challenged," says Ruth Silverstone, a former president of the Roland Park parent-teacher association and now a member of the Baltimore school board.

Soon after moving to Roland Park, Mrs. Beasley—who puts in 10- and 12-hour days and works through summer vacation as well—got out in front of parents and teachers who wanted to create the city's first advanced program at the school, with emphasis on math, science, writing and foreign languages.

The proposal irked some other principals, who resented—and still resent—the loss of their brightest students to Roland Park and what they saw as favored treatment for a well-off neighborhood. "Roland Park actually is a private school within a public system," complains Mr. Brown, the principal of Cherry Hill Junior High.

Mrs. Beasely counters that 75 percent of her junior-high youngsters are black—close to the citywide average; that 52 percent of her students qualify for free or reduced-price lunches; and that per-pupil costs and class sizes at Roland Park are no different from those at other schools.

Unquestionably, though, Roland Park is special. Last spring its math team placed second in a statewide competition. Close to 200 youngsters, some now enrolled in private schools, are on Roland Park's waiting list. Mrs. Beasely's ideas are spreading; a second Baltimore junior high school started an advanced program last year, and similar programs at still other schools are under study.

As the final evaluator of her teachers, Mrs. Beasley tries to remain aloof from their day-to-day problems. She delegates most classroom monitoring to department heads and two assistant principals. She also has brought in part-time "master teachers" to guide other teachers, seek out special books and teaching materials, and give additional instruction to extremely bright youngsters.

The Roland Park climate has attracted innovative teachers, as well as platoons of parent volunteers for activities ranging from music instruction to running the school fair. Dan Cohen, the youthful head of the math department, created a computer programming course with a single desktop computer that he won in a raffle. Later, he persuaded a Baltimore bank to donate four more computers.

Roland Park's principal describes herself as "a bug about grammar and syllabification." When a teacher's blackboard instructions or ditto sheets are deficient in either, the teacher hears about it from Mrs. Beasley. Recently, a teacher newly transferred from another school complained of unfair treatment by her former supervisors. After listening to the teacher's ungrammatical speech, Mrs. Beasely bluntly advised her that the criticism had been to the point. "I told her she needed to wear a dictionary on one wrist and an English grammar on the other," she says.

Discipline is strict, but the enforcement style is parental rather than penal. "Mrs. Beasley is like a mother to all the kids. They know she's going to be fair," says the parent of a seventh-grader after listening to the principal deliver a stern lecture to her son and three other boys found fighting in a washroom.

"Mrs. Beasley isn't going to let anyone hurt you," says Cydney Scott, a seventh grader, in explaining why her mother was willing to let her transfer from a private school to Roland Park this fall. A first grader who encounters Mrs. Beasley in a crowded hallway is even more direct. "I love you," she says, reaching up to hug the beaming principal.

ARNETT BROWN, JR.

If Roland Park school enjoys a certain mystique because of its location, Cherry Hill Junior High, situated in a poor black community overlooking an arm of Baltimore Harbor, suffers a certain reputation.

Mr. Brown saw the physical evidence when he took over as principal five years ago: burned-out student lockers, graffiti-covered walls, a ravaged second-floor corridor that was closed off with heavy steel gates to keep out the vandals and pot smokers. Some students customarily came equipped with nothing but their transistor radios. Cafeteria fights with full milk cartons and street fights with fists were regular events.

"The children acted like heathen," recalls Rosa McCoy, a city official based in the Cherry Hill section. She says the junior high was considered "a graveyard for older teachers." Students also were more than a year behind the national average in math and over two years behind in reading.

Today, Cherry Hill students get a tough message from their principal in his usual opening-day speech: "Students do as they are directed. Those who persist in disrupting our school are removed permanently."

Hall signs are reminders: "Late today? Stay today," and "I don't fight! I think!" To a newly arrived seventh grader who mumbles unconvincingly that he accidentally flushed away his washroom pass, Mr. Brown says sternly: "Don't tell me any Mary-had-a-little-lamb stories."

Mr. Brown has strictly enforced rules against troublemaking. He has reversed the previous principal's policy against ever calling the police. As a result, nowadays the school needs only one security officer instead of two.

"I've been like the bulldog here," Mr. Brown says. But, while Cherry Hill pupils now are a year ahead of the national average in math and up to grade level in reading, the principal fears that many still lack the ambition, curiosity and reasoning power they need to rise in the world. although they can add, subtract, multiply and divide well enough, for example, too often they can't compare unit prices at the supermarket, he says. (Tests suggest that student ability to use math in everyday life has declined nationwide.)

Mr. Brown prefers to give his teachers wide latitude. "There is no single method of effective teaching," he believes. His role, he says, is "to assure teachers of a disruption-free environment in the classroom."

Cherry Hill's best students usually come from two-parent homes—the ones in which adults tend to "reinforce what's done in the school," Mr. Brown observes. Unfortunately, over 90 percent of his kids are from homes without a father, he estimates.

Thus, the Cherry Hill principal plays an important role for his students by "providing a very strong black male figure" for them to look up to, says John Hulla, an English teacher at the school for much of the past decade.

Sophia Cooper, a ninth grader, seems to agree: "Mr. Brown treats us like his children, and that's good. Young people don't like discipline, but everybody has got to have rules."

To show his kids what blacks can achieve, Mr. Brown arranges such trips as a visit by 35 ninth graders with Baltimore's newly elected council president, Clarence Du Burns. Mr. Du Burns, a one-time school shower-room attendant and jazz saxaphonist who worked his way up in the city's Democratic Party, doesn't disappoint them.

"This was my seat for six years," Mr. Du Burns says, indicating one of the council's floor desks. "But my eyes were up here," he adds, pointing to the raised chair of the council president. "When the mayor goes out of town, I run the city. In other words, I'm the king and I love it. Being poor doesn't stop you from achieving."

With almost no parent volunteers at his school, Mr. Brown finds himself stretched to the limit. Unable to get a new desk, he rebuilt his old one himself in the school shop, gluing on an old door to provide a new top. He also built and installed many of the classroom bulletin boards and currently is planning to spray paint 25 drafting tables that an assistant found in a warehouse. He's the school photographer, posting pictures of honor-roll students to boost school spirit. His days begin at 6:30 or earlier, and three nights a week until 10 p.m. he supervises Cherry Hill's model-airplane club, one of its few extracurricular activities.

"I get involved in everything," he says. "Because if I do it, others on the staff will make similar contributions."●

DEDICATION OF THE ARTHUR ROSS GALLERY

● Mr. MOYNIHAN. Mr. President, I rise today to recognize the latest achievement of the Arthur Ross Foundation: The completion of the Arthur Ross Gallery at the University of

Pennsylvania. While I had the misfortune of being unable to attend the dedication of the gallery on February 7, I cannot let the moment pass without paying tribute, if all too briefly, to this generous man and the philanthropic organization he leads.

I speak with a certain authority in this regard. Having known Arthur for many years, I have long been impressed with his great personal generosity and desire to further the common weal. Indeed, he has served the public in several different and diverse capacities, including but not limited to his work as senior adviser to the United States delegation to the 18th annual conference of UNESCO in Paris in 1974 and closer to home as a member of the New York City Parks Council.

In addition, it has been my good fortune as a New Yorker that the foundation's efforts to construct, to improve, and to preserve have often had their greatest impact in my State. Put simply, the foundation has enhanced the cultural and artistic lives of many New Yorkers.

The dedication of the Arthur Ross Gallery at the University of Pennsylvania, then, is but the most recent of the foundation's accomplishments. Yet, in so many ways, it epitomizes Arthur Ross' extraordinary ability to identify and accomplish that which needs to be done. The university's museum has long been recognized for its most distinguished archeological and anthropological departments. Thanks to the Arthur Ross Foundation, it now has the facilities necessary to greatly expand its program in the visual arts as well.

Arthur Ross and all those who made the opening of the gallery possible are to be commended, and the University of Pennsylvania is to be congratulated on its newest addition to its museum. Mr. President, I ask that the eloquent words of Sheldon Hackney, president of the university, on the occasion of the dedication of the Arthur Ross Gallery be printed in the RECORD.

The remarks follow:

THE ARTHUR ROSS GALLERY OF THE UNIVERSITY OF PENNSYLVANIA

(By Sheldon Hackney)

With this exhibition of works by Goya from the collection of the Arthur Ross Foundation we celebrate an invaluable new resource at the University of Pennsylvania and dedicate the Arthur Ross Gallery.

Arthur Ross has a long-standing friendship with the University of Pennsylvania where he studied and which has benefited from his interest in education and the arts as well as his habitual energy in working to make dreams become reality. His keen sense of what needs to be done has been felt primarily in New York where his programs for preservation and beautification have affected both the cultural life and the environment of the city. It is a matter of pride he has chosen to establish the Arthur Ross Gallery in Philadelphia, recognizing it as an appropriate means of enriching the learning experience at the University of Pennsylvania.

Through his generosity Arthur Ross has also completed a cultural triangle—almost a century in the making—at this University. Since it opened its doors nearly a hundred years ago the University Museum has become one of the leading archeological and anthropological institutions in the country. More recently, major art exhibitions have been displayed at the University at the Institute of Contemporary Art. Philadephia's major institution devoted to the new visual arts. The potential for extending these academic and aesthetic experiences at the University is evident. The campus community comprises an alert body of students and faculty and the Graduate School of Fine Arts attracts people with special creativity in a variety of fields: fine arts, planning, and design, and includes acclaimed creative artist and renowed names in landscape design and architecture among its professoriat. In recent years the University of Pennsylvania has also attracted increasing numbers of visitors from the city and the region by its offerings on campus. This was apparent in 1981 when Arthur Ross lent his set of the Caprichos and the Proverbios etchings by Goya for display in the print room of the Van Pelt Library.

Arthur Ross has thoughtfully answered an educational need by providing the gallery the University lacked for displaying its treasures and making possible a variety of exhibitions. He is further to be congratulated for his help in enhancing the University's ability to contribute to the aesthetic and intellectual life of the Philadephia region. He has the appreciation of all of us.●

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, we are notified that Members who wish to be involved in the debate on the pending amendment will not be able to be here until approximately 11 a.m.

RECESS UNTIL 11 A.M.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 11 a.m.

There being no objection, the Senate, at 10:19 a.m., recessed until 11 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. DURENBERGER).

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

SHIPPING ACT OF 1983

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 47) to improve the international ocean commerce transportation system of the United States.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

Mr. STEVENS. Mr. President, if I might inquire of the Senator from Ohio and the Senator from South Carolina, it is my understanding that there is a unanimous-consent agreement that this amendment of the Senator from Ohio be set aside until the chairman of the Judiciary Committee (Mr. THURMOND) wishes to propose the amendments referred to in the agreement that he will offer on behalf of the Judiciary Committee.

I would like to inquire of the Senator from Ohio if he is prepared at this time for the Senate to proceed with the Judiciary Committee amendments.

Mr. METZENBAUM. I am.

Mr. STEVENS. Mr. President, I ask unanimous consent that the amendment of the Senator from Ohio be temporarily set aside and that we now proceed to the Judiciary Committee amendments. First, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the distinguished chairman of the Committee on the Judiciary (Mr. THURMOND), will offer, on behalf of the committee, a series of amendments. I ask unanimous consent that those amendments be in order notwithstanding the fact that they may touch the bill in more than one place.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UP AMENDMENT NO. 4

Mr. STEVENS. Is the distinguished chairman ready to offer the amendments?

Mr. THURMOND. Yes, Mr. President.

On behalf of the Committee on the Judiciary, I am pleased to offer a package of amendments to S. 47 which address the antitrust implications of this bill. These amendments were unanimously adopted by the committee on February 22, following a hearing and intensive study. I am personally satisfied that these amendments substantially improve S. 47 and are unquestionably in the public interest.

Taken as a whole, these amendments reflect the various concerns

raised by the Federal Trade Commission in testimony before the committee. The amendments have also been reviewed by the administration, which agrees that they are consistent with the essential goal of S. 47, to increase the efficiency of our ocean shipping industry while addressing the antitrust concerns raised by the legislation as currently drafted.

Mr. President, I believe that the Committee on the Judiciary has faithfully discharged its responsibilities to oversee the antitrust laws as they concern S. 47. Let me assure this body that the committee will continue to study this legislation closely and monitor its progress.

Mr. President, I send to the desk these amendments that are being offered.

The PRESIDING OFFICER. The clerk will state the amendments.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes a series of amendments numbered unprinted amendment numbered 4.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the amendments be considered en bloc with the exception of one amendment which deals with the tariff exemption in existing law.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, it is my understanding now that there is a group of amendments to be considered en bloc, There is one amendment that is separated out, is that correct? That was the intent of what I asked.

The PRESIDING OFFICER. That was the intent of the request.

Mr. STEVENS. Mr. President, I ask for the yeas and nays on the first group of amendments that will be considered en bloc.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, it is my intention, once that vote takes place, to offer an amendment in the second degree to the remaining amendment of the Judiciary Committee. This vote will dispose of the overwhelming majority of the Judiciary Committee amendments.

I say for the benefit of the cloakrooms that that first block of amendments will probably be voted on sometime between, I would say, 2 and 3 p.m. this afternoon.

Mr. METZENBAUM. Mr. President, I just want for the moment to indicate my support for all of the amendments that have been offered by the distinguished chairman of the Committee on the Judiciary. These amendments, in my opinion, go a long way toward improving this bill. In all fairness and frankness to my colleagues in the Senate, they do not make the bill acceptable to the Senator from Ohio. However, I strongly urge Members of this body to support these amendments.

They certainly represent not only a consensus of the position of the Judiciary Committee but the unanimous position of the Judiciary Committee. I commend the distinguished chairman of the committee for his leadership in proposing these amendments in committee and offering them here, on the floor.

With respect to the one more controversial amendment which will be offered, as I understand it, by the distinguished Senator from Alaska, I am prepared to debate that at the appropriate point, when the amendment is offered.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quroum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, my request was that the Judiciary Committee amendments be considered en bloc; that they not be considered as one amendment but a series of amendments that will be voted on en bloc.

The understanding the Commerce Committee had with the Judiciary Committee was that they had a series of amendments, and we would like to have them reported as a series of amendments and then voted on en bloc with the exception of the one amendment that was pulled off.

I ask, may that be done?

The PRESIDING OFFICER. It can be accomplished by unanimous consent.

Mr. STEVENS. I ask unanimous consent that the agreement be carried out and those amendments not be considered as unprinted amendment No. 4 but as a series from No. 4 through how many numbers they have to have in order to carry out the agreement we made, and that those amendments be considered en bloc for the purpose of voting with the exception of that one amendment we set aside, which is the tariff amendment which will be a separate amendment.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The amendments are as follows:

UP AMENDMENT NO. 4

(Purpose: To amend the provisions relating to tariff filing and enforcement)

On page 65, line 23, strike out all after "item".

On page 76, beginning with line 21, strike out all through line 25 on page 77.

On page 78, line 1, strike out "(b)" and insert in lieu thereof "(a)".

On page 78, line 4, strike out "(c)" and insert in lieu thereof "(b)".

On page 79, beginning with line 6, strike out all through line 20 on page 80.

On page 80, between lines 21 and 22 insert the following:

(a) TARIFFS.—(1) Each controlled carrier shall file with the Commission, and keep open to public inspection, tariffs showing all its rates, charges, classifications, rules, and practices between all points or ports or its own route and on any through transportation route that has been established. However, common carriers shall not be required to state separately or otherwise reveal in tariff filings the inland divisions of a through rate. Tariffs shall—

(A) plainly indicate the places between which cargo will be carried;

(B) list each classification of cargo in use;

(C) set forth the level of freight forwarder compensation, if any, by a carrier or conference;

(D) state separately each terminal or other charge, privilege, or facility under the control of the carrier or conference and any rules or regulations that in any way change, affect, or determine any part or the aggregate of the rates or charges; and

(E) include sample copies of any loyalty contract, bill of lading, contract of affreightment, or other document evidencing the transportation agreement.

(2) Copies of tariffs shall be made available to any person and a reasonable charge may be assessed for them.

On page 80, line 22, strike out "(a) Controlled Carrier Rates" and insert in lieu thereof "(b) Rates".

On page 81, line 16, strike out "(b)" and insert in lieu thereof "(c)".

On page 82, line 14, strike out "(c)" and insert in lieu thereof "(d)".

On page 82, line 14, beginning with "Notwithstanding" strike out through "9(d), the" on line 15, and insert in lieu thereof "The".

On page 83, line 3, strike out "(d)" and insert in lieu thereof "(e)".

On page 84, line 3, strike out "(e)" and insert in lieu thereof "(f)".

On page 84, line 19, strike out "(f)" and insert in lieu thereof "(g)".

On page 87, strike out lines 9 through 11.

On page 87, line 12, strike out "(4)" and insert in lieu thereof "(3)".

On page 88, line 11, strike out the comma after "greater".

On page 88, line 12, strike out "less, or different".

On page 88, beginning with line 16, strike out through line 2 on page 89.

On page 89, line 3, strike out "(5)" and insert in lieu thereof "(2)".

On page 89, line 9, strike out "(6)" and insert in lieu thereof "(3)".

On page 89, line 21, strike out "(7)" and insert in lieu thereof "(4)".

On page 89, line 22, strike out "(8)" and insert in lieu thereof "(5)".

On page 90, line 23, beginning with "authorized" strike out through "tariffs" on line 24.

On page 97, line 3, strike out "Tariff Suspension" and insert in lieu thereof "Suspension of Right to Use Tariff".

On page 97, lines 4 and 5, strike out "(1), (2), (3),".

On page 97, line 5, strike out "or (8)".

On page 97, strike out all of line 6 after "suspend".

On page 97, line 12, beginning with "any" strike out through "or" on line 13.

On page 97, line 17, beginning with "under" strike out through "or" on line 18.

UP AMENDMENT No. 5

(Purpose: To eliminate the exemption for shippers' councils.)

On page 63, strike out lines 5 through 25.

On page 64, line 1, strike out "(d)" and insert in lieu thereof "(c)".

On page 67, strike out lines 4 through 19.

On page 67, line 20, strike out "(g)" and insert in lieu thereof "(f)".

On page 75, line 18, strike out "and".

On page 76, line 2, strike out the period and insert in lieu thereof "; and".

On page 76, between lines 2 and 3 insert the following:

(9) joint ventures established by small shippers to—

(A) consult and confer with any ocean common carrier or conference regarding general rate levels, charges, classification, rules practices, or services; and

(B) combine cargo with one or more small shippers for the purpose of obtaining time-volume rates and service contracts with ocean common carriers. For the purpose of this subsection, a small shipper shall be considered to be any shipper who in the normal course of its business (including any business conducted by a parent corporation or subsidiary that, in whole or in part, either controls or is controlled by such shipper) ships in international ocean transportation an annual average of not more than 35, forty-foot containers a month.

On page 78, line 6, strike out "shippers council" and insert in lieu thereof "shipper joint venture".

UP AMENDMENT No. 6

(Purpose: To clarify immunity for pooling marine terminal operators)

On page 62, line 26, after "services;" insert "and".

On page 63, strike out lines 1 and 2.

On page 63, line 3, strike out "(3)" and insert in lieu thereof "(2)".

On page 92, line 2, strike out "or".

On page 93, line 11, strike out the period and insert in lieu there of "; or".

On page 93, between lines 11 and 12 insert the following:

(4) boycott or take any other concerted action resulting

in an unreasonable refusal to deal.

UP AMENDMENT No. 7

(Purpose: To prohibit the pooling of net profits and losses)

On page 91, line 4, strike out "or".

On page 91, line 11, strike out the period and insert in lieu thereof "; or".

On page 91, between lines 11 and 12 insert the following:

(8) form or participate in a net profit or loss pool with other common carriers operating in the same trade.

On page 59, between lines 19 and 20 insert the following:

(17) "net profit and loss pool" means a pooling or apportionment of net profit or losses, or any similar arrangement that results in the participants sharing all or virtually all of their costs of operation, but the term does not include a pooling or apportionment of revenues in which each participant continues to bear his own costs even if such a pooling provides for certain adjustments to revenue or expense or results in the sharing of certain costs.

On pages 59 through 61, renumber paragraphs (17) through (28) as paragraphs (18) through (29), respectively.

UP AMENDMENT No. 8

(Purpose: to amend the remedy provisions.)

Beginning on page 95, line 22, strike through line 2, page 96 and insert in lieu thereof the following:

(f) REPARATIONS.—For any complaint filed within three years after the cause of action accrued, the Commission shall, upon petition of the complainant and after notice and hearing, direct payment of reparations to the complainant for actual injury (which, for purposes of this subsection, also includes the loss of interest from the date of injury) caused by a violation of this Act. Upon a showing that the injury was caused by activity that is prohibited by section 12(b) (5) or (7) or section 12(c) (1) or (4), or that violates section 12(a) (1) or (2), the Commission may direct the payment of additional amounts; but the total recovery of a complainant may not exceed twice the amount of the actual injury. In the case of injury caused by an activity that is prohibited by section 12(b)(6) (A) or (B), the amount of the injury shall be the difference, plus interest from the date of the injury, between the rate paid by the injured shipper and the most favorable rate paid by another shipper.

(g) INJUNCTION.—In connection with any investigation conducted under this section, the Commission, at its sole discretion, may request the Attorney General to bring suit in a district courts of the United States to enjoin conduct in violation of this Act after notice to the defendant, and upon a determination that—

(1) the Attorney General demonstrates substantial likelihood to prevail on the merits,

(2) irreparable injury would otherwise occur,

(3) issuance of the relief requested will not unduly harm the defendant or other persons, and

(4) the public interest would be served,

the court may grant a temporary restraining order or preliminary injunction for a period not to exceed ten days after the Commission has issued an order disposing of the issues under investigation. Any such suit shall be brought in the district in which the defendant person, partnership, or corporation resides or transacts business.

UP AMENDMENT No. 9

(Purpose: To amend the standard required for immunity)

On page 74, line 21, strike out "in the reasonable belief" and insert in lieu thereof "with a reasonable basis to conclude".

UP AMENDMENT No. 10

(Purpose: To assure a broader right of independent action from interconference agreements)

On page 66, line 25 beginning with "serving" strike through line 1 on page 67.

UP AMENDMENT No. 11

(Purpose: To amend the provisions regarding contract disputes)

On page 73, line 2 beginning with "In any" strike through "the contract." on line 5.

UP AMENDMENT No. 12

(Purpose: To reserve 5 percent of a shipper's tonnage to independent carriers)

On page 74, line 4, strike out "and".

On page 74, line 8, stike out the period and insert in lieu thereof "; and".

On page 74, between lines 8 and 9 insert the following:

(10) the contract shipper is permitted to utilize competing services for 5 percent or less of the shipper's tonnage that would otherwise be subject to the loyalty obligation.

UP AMENDMENT No. 13

(Purpose: To provide procedures to obtain needed information)

On page 70, line 3, strike out "a hearing" and insert in lieu thereof "an investigation and hearing".

On page 70, between lines 19 and 20, insert the following:

(f) INFORMATION.—At any time before the expiration of the forty-five day period referred to in subsection (a), the Commission, upon its own motion or motion of the complainant, may issue a subpena or discovery order for any additional information that it deems necessary to determine whether the agreement is in violation of this Act.

On pages 70 through 71 redesignate subsections (f) through (h) as subsections (g) through (i), respectively.

UP AMENDMENT No. 14

(Purpose: To restrain the Federal Maritime Commission from creating exemptions that would significantly lessen competition)

On page 103, line 22, before the period insert the following: "and is not likely to result in any significant lessening of competition in any trade serving the United States in which ocean common carriers operate".

UP AMENDMENT No. 15

(Purpose: To provide that once litigation on a Commission order has begun, the Attorney General has control over the subsequent proceedings)

On page 98, line 21, strike out "The" and insert in lieu thereof "Until a matter is referred to the Attorney General, the".

On page 99, line 6, strike out "the Commission shall" and insert in lieu thereof "the Attorney General may".

On page 101, strike out lines 19 through 23, and insert in lieu thereof the following:

(f) ENFORCEMENT OF NONREPARATION ORDERS.—In case of violation of any order of the Commission, or for failure to comply with a Commission subpena, the Attorney General or any party injured by such violation may seek enforcement by any United States district court having jurisdiction over the parties. If, after a hearing, the court determines that the order was properly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

UP AMENDMENT No. 16

(Purpose: To give ample time for discovery of a violation)

On page 101, line 17 beginning with "1" strike out through line 18 and insert in lieu thereof "two years after the date of the violation of the order, or one year after the date the violation is known or reasonably should have been known.".

UP AMENDMENT No. 17

(Purpose: To clarify that certain carriers not previously permitted to engage in cartel activity, will not be so permitted under this Act)

On page 60, line 4, before the semicolon insert the following: ", or bulk cargo vessels".

On page 60, line 1, after "means" insert ", for purposes of this Act only,"

UP AMENDMENT No. 18

(Purpose: To amend the provision dealing with discussions of inland divisions of through rates)

On page 76, line 9, strike out "fixing" and insert in lieu thereof "discussing".

Mr. STEVENS. Mr. President, I want to call to the attention of the Members of the Senate, this is the first time we have had this situation this year. It is my understanding that amendments in the first degree must be filed with the clerk before 1 p.m. today if they are to be considered under the cloture rule, if cloture is voted tomorrow afternoon at 4 p.m. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. I hope Members will be on notice and that the two cloakrooms will notify Members that those amendments must be on file. It is the intention of the leadership to ask that we stand in recess between 12:30 and 1:30 p.m., so I now ask that filing of the amendments take place in accordance with the rule, notwithstanding the fact that we are in recess. Is that proper?

The PRESIDING OFFICER. It is in order by unanimous consent.

Mr. METZENBAUM addressed the Chair.

Mr. STEVENS. I ask unanimous consent.

Mr. METZENBAUM. May I?

Mr. STEVENS. Yes.

Mr. METZENBAUM. I do not wish to take issue with the acting majority leader, and I will be able to protect myself, but because it is just possible that some Members could be anticipating filing amendments until 1 p.m., I wonder whether the acting majority leader, when he takes the recess, could not at that point get unanimous consent that, notwithstanding the recess, any Member could file his amendments up until 1 p.m.?

Mr. STEVENS. That is what I am doing right now.

The PRESIDING OFFICER. That is the request of the acting majority leader.

Mr. METZENBAUM. Fine. I stand corrected. I withdraw my comments.

The PRESIDING OFFICER. Is there any objection?

The Chair hears none, and it is so ordered.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. The amendments, I believe, have been sent to the desk?

The PRESIDING OFFICER. The Senator is correct.

STATEMENTS ON UNPRINTED AMENDMENT NOS. 5 THROUGH 18

Mr. THURMOND. Mr. President, I should now like to make a statement on unprinted amendment No. 5, shippers' councils.

In order to balance the power of the carriers who are permitted to cartelize and enforce their agreements with the help of the Federal Maritime Commission, S. 47 provides similar antitrust immunity for shippers' councils. Thus, rather than restraining the activities of carriers, S. 47 deals with their increased power by letting the shippers get together to price fix and engage in anticompetitive activities as well. Unfortunately, this solution has the sorry outcome of expanding the evils of price fixing to another industry. When widget manufacturers are permitted to "mutually consult and exchange information of views regarding rates, charges, classifications, rules, practices, or services," under Section 4(c) of this bill, there is little to prevent them from slipping into a discussion about the price of widgets at the same time.

This is far too risky a "solution." Eliminating the U.S. enforcement of conference agreements is a sufficient limitation on their power so as to make shippers' councils unnecessary. Accordingly, this amendment eliminates the exemption for shippers' councils provided in S. 47.

Mr. President, I have a statement on unprinted amendment No. 6, antitrust immunity for marine terminal operators.

S. 47 grants blanket antitrust immunity for Marine terminal operators to fix rates, to participate in pooling agreements and to engage in exclusive or preferential working arrangements. While some antitrust immunity may be appropriate to balance the bargaining power of the conferences, there is no justification for permitting pooling agreements. Indeed, we have been informed by representatives of the marine terminal operators that they neither need nor want immunity for pooling. In addition to eliminating pooling, our amendment would assure that marine terminal operator's cannot use their immunity for preferential or exclusive agreements to engage in group boycotts of independent carriers by adding them to the group of persons prohibited from such behavior.

Mr. President, I have a statement on unprinted amendment No. 7, an amendment to prohibit net profit and loss pools.

Pooling of profit and losses can have no puprose or effect except to reduce competition between carriers within a conference. If just revenues are pooled, a carrier will still have the incentive to keep his costs down in order to maximize his profits. If profits and losses are pooled as well, even this incentive is lost. This amendment would, therefore, prohibit the pooling of net profits and losses by making participation in such pool a prohibited act under section 12(c) of the bill. The language of this amendment was agreed to as part of the House/Senate compromise reached last Congress.

Mr. President, I have a statement to make on unprinted amendment No. 8, strengthened remedies.

The elimination of treble damage antitrust liability must be balanced by meaningful and substantial penalties for violation of the Shipping Act. This amendment increases the reparations which must be paid if there is a violation of the Shipping Act. It is consistent with the House/Senate compromise of last Congress.

Mr. President, I have a statement with respect to unprinted amendment No. 9, objective standard for activity pursuant to unfiled agreements.

As originally drafted, S. 47 would have provided antitrust immunity for all agreements within the scope of the act, even if the agreement was never filed or effective. The Commerce Committee amendment added two requirements for immunity: That the agreement be filed and effective, or that there was "reasonable belief" that the actions were pursuant to a filed and effective agreement. Our amendment makes the standard more objective than the "reasonable belief" of the particular carrier involved.

Mr. President, I have a statement to make concerning unprinted amendment No. 10, to expand the right of independent action from intraconference agreements.

As currently drafted, S. 47 would limit the right of independent action from interconference agreements in accordance with the language proposed to be stricken. There does not appear to be any justification for this limitation. The amendment would assure a broader right of independent action from interconference agreements.

Mr. President, I have a statement to make on unprinted amendment No. 11, loyalty contract disputes.

Loyalty contracts are a means for shippers to obtain discounts from the standard conference rate in return for

shipping all or a specified part of their goods via the conference. Shippers, however, will sometimes allow their customers to choose the form of transportation for their goods. When a customer requests a nonconference carrier, an occasional dispute will arise as to whether the shipper has deliberately breached the shipper-conference loyalty contract by guiding the customer's choice. S. 47 creates a special burden-of-proof rule for this situation. The amendment strikes this rule in favor of standard contract law.

Mr. President, I have a statement to make on unprinted amendment No. 12, loyalty contracts, percentage limitations.

S. 47 would allow conferences to require 100 percent of a shipper's tonnage to be subject to a loyalty contract. This would have the tendency of eliminating competition from independent carriers in trades where loyalty contracts are prevalent. The amendment would reserve 5 percent of a shipper's tonnage to independent carriers.

Mr. President, I have a statement to make on unprinted amendment No. 13, information needs.

S. 47 contains no procedure for a complaining party to obtain additional information which may be needed to determine whether a filed agreement will result in a violation of this act or substantial injury to a third party. This amendment will provide such a procedure.

Mr. President, I have a statement to make on unprinted amendment No. 14, to require a competition test for FMC exemption authority.

Section 18 of the bill gives the Federal Maritime Commission broad authority to exempt any activity or class of agreements from any requirement of the act so long as to do so would not "substantially impair effective regulation by the Commission." This broad and vague standard would allow the FMC to rewrite the carefully crafted provisions of this legislation almost at whim. This amendment, which was included in last year's House/Senate compromise bill, would restrain the FMC from creating exemptions that would significantly lessen competition.

Mr. President, I have a statement to make on unprinted amendment No. 15, court enforcement of commission orders.

Congress has long recognized that the Attorney General has the authority to conduct the litigation of the United States. Numerous policy goals are effectuated by this centralization of litigation authority. S. 47 deviates from this policy by permitting the Federal Maritime Commission to assess civil penalties and change that assessment after litigation has commenced, to seek payment of penalties through the courts, and to represent itself in any court case. This amendment, while allowing the Commission to assess penalties and conduct proceedings to that end, provides that once litigation on a Commission order has begun, the Commission's authority terminates and the Attorney General has control over any subsequent proceedings.

This amendment is specifically requested by the Department of Justice on behalf of the administration.

Mr. President, I have a statement to make on unprinted amendment No. 16, statute of limitations for bringing an action.

It could well be difficult to bring an action within 1 year of the violation as S. 47 now requires. The amendment will give greater time for discovery of a violation while providing a cutoff mechanism if due diligence would have led to the earlier discovery of a violation.

Mr. President, I have a statement to make on unprinted amendment No. 17, clarification of application to bulk parcel tankers.

There are only four major bulk parcel tanker companies serving the U.S. trades. Accordingly, the Commission has consistently refused to permit them to engage in joint activity and they have never had antitrust immunity. S. 47 automatically confers antitrust immunity on bulk parcel tankers because they meet the definition of "ocean common carriers." The amendment will clarify that these carriers, which have never been permitted to engage in cartel activity, will not be so permitted under S. 47, by removing them from the definition of ocean common carriers. However, I wish to make it very clear that this exemption from the definition of common carriers is for purposes of this act only.

Mr. President, I have a statement to make on unprinted amendment No. 18, protection against abuses of intermodal rate-setting authority.

An intermodal or through rate is the amount charged for carrying cargo from a port or inland point all the way to its inland destination. For example, shipping from London to Kansas City—via the Port of New York—would be an intermodal transaction. The costs could be divided into the port-to-port division—London to New York—and the inland division—New York to Kansas City.

Under current law, individual carriers negotiate with truckers and railroads for the inland divisions of intermodal transportation. Obviously, this leaves a lot of bargaining room for the surface carriers. S. 47 permits the conference to set the intermodal rate. This raises serious competitive concerns for the trucking and railroad industries.

Even though the bill prohibits conferences from doing the negotiating, surface carriers fear that the individual carriers will function like agents of the conferences, with the conference's bargaining strength behind them. At the least, the surface carriers believe they will be disadvantaged if ocean carriers engage in discussing about their surface rates.

Also of concern is the risk of extending price fixing into these other types of transporation. During an era of deregulation and renewed competition in the trucking and railroad industries, it hardly seems appropriate to introduce private price fixing by the back door. Nevertheless, we recognize that shippers want to be quoted an intermodal rate, particularly as the use of containerized loads increases.

In an attempt to balance these concerns, we suggest an amendment to clarify that carriers may not discuss with their conference members the prices they are able to negotiate for the inland divisions of their routes. Thus, while the carrier may inform the conference of its proposed charge for the entire intermodal transport, which information the conference could use in setting the conference intermodal rate, it would still be up to each individual carrier to separately and confidentially negotiate its rates with the railroad and trucking companies.

STATEMENT ON UNPRINTED AMENDMENT NO. 4

Mr. President, I have a statement on unprinted amendment No. 4, tariff filing and enforcement.

Under current law, carriers are permitted to participate in conferences to set the terms and prices for carrying sea cargo. The FMC, however, must review these agreements to determine if they are "contrary to the public interest." Only after the FMC has determined that the anticompetitive restraint is required by a serious transportation need, is necessary to secure important public benefits, or is in furtherance of a valid regulatory purpose of the Shipping Act, will antitrust immunity be granted for the activity. The agreement is then filed with the FMC which has the responsibility for enforcing it.

S. 47 does away with the FMC's public interest review of the agreements. Instead, the bill grants blanket antitrust immunity (with two very limited exceptions) to any agreement which the carriers choose to reach. At the same time, S. 47 provides that the agreements will continue to be filed with and enforced by the FMC.

Both the administration and the Federal Trade Commission have concluded that this is going too far. We must agree. The Department of Transportation, submitted testimony to our committee on behalf of the administration on this issue. These are the administration's words:

The administration is, however, strongly opposed to the provision of S. 47 that would continue to require the filing of tariffs and

their enforcement by the Federal government. The government has no business enforcing the prices fixed by a private producer group. Doing so is not merely unnecessary—it introduces substantial inefficiencies in conference ratesetting and perpetuates problems of excess capacity.

It should also be noted that the UNCTAD Code, which has been signed by most maritime nations, requires publication and adherence to tariffs, so it is not necessary to file them with the FMC to make them public. S. 47, as amended by this committee, would clearly continue to prohibit unfair or unjustly discriminatory rates or other contract terms. Thus, there are plenty of protections for the small shipper, without having the U.S. Government in the business of policing private cartel agreements.

Mr. President, that completes my statement on the various amendments that were included in the package brought to the floor by the Judiciary Committee.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. THURMOND. I am pleased to yield.

Mr. STEVENS. I ask the Chair, is the excluded amendment, to which I want to offer my amendment in the second degree, UP amendment No. 4? Is that the way it shows up in the RECORD?

The PRESIDING OFFICER. It is the first part of the original UP amendment No. 4 and could be assigned the number 4.

Mr. THURMOND. It is UP amendment No. 4.

Mr. STEVENS, I ask unanimous consent that the understanding of the chairman of the committee be what is shown in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. THURMOND. I yield.

S. 47: THE SHIPPING ACT OF 1983

Mr. HATCH. Mr. President, as we begin debate on S. 47, I would like to express my opposition to the bill in its present form. The heart of my concern over this bill is the way in which it addresses competition. Since my first hours on this floor, 6 years ago, I have expressed my profound respect for the free enterprise system. As a basic economic policy, we reject the notion of giving control of commerce to either Government or to private cartels. I view our antitrust laws as a practical expression of our concern for economic democracy, and I have actively sought to insure the efficient operation of these laws.

I view the ability of the marketplace to determine prices as being infinitely wiser than any government authority. In addition to rejecting a nonmarket economy philosophy, our antitrust laws are designed to prevent individuals or firms from so controlling a part of commerce that they are able to substitute that control for the independent allocation of resources achieved by a competitive marketplace.

The bill before us strikes at these protections of our economic democracy. It permits an industry to cartelize, while granting the industry sweeping antitrust immunities.

Mr. President, for a wise purpose have our laws created a presumption against the policy of permitting cartels. Cartels, by their very nature, promote price-fixing conspiracy. Fixed prices discourage competition. And without competition, consumers suffer. I know of no historical rebuttal of these facts.

Based on the testimony of witnesses appearing before the Senate Commerce Committee and the Senate Judiciary Committee, and based on studies issued by the General Accounting Office and the House Republican Research Committee, I am not persuaded that circumstances in the shipping industry are so unique that carriers should be exempt from the greatest of our consumer protection laws, our antitrust laws. My concern, Mr. President, is over the increased prices of imported goods which will be paid by the consumers of Utah, and of every other State; increased costs which history, not theory, tells us will result from the operations of monopolistic power. My concern is over the increased costs of carriage which will be charged to the small shippers of Utah, and of every other State.

In the most recent testimony before the Senate Commerce Committee, Allen Ferguson, Chairman of the National Institute of Economics and Law testified that S. 47 "can be expected to impose costs of some billions of dollars per year on American consumers, farmers, workers and exporters."

Mr. Ferguson calculates that if conferences are able to raise tariff rates by 20 percent, the shipping costs of exports and imports, shipped on U.S. carriers would rise by $3 billion per year. Among shippers, the greatest disadvantage would fall on small- and medium-size shippers, those which predominate in Utah, and in every other State.

Subsequent testimony presented to the Senate Judiciary Committee by Thomas J. Campbell, Director of the Federal Trade Commission Bureau of Competition, is very precise on this point. He states,

I believe that consumer welfare is best served by a policy of promoting competition in ocean liner shipping.

He continues:

Further reduction or elimination of effective competition in liner shipping would be extremely unfortunate. The result would be to deny to U.S. exporters and importers, and ultimately U.S. consumers as well, the economic benefits of a competitive marketplace.

This language is clear and unmistakable.

The FTC Commissioners, comprised of three Republicans and two Democrats, authorized their Bureau of Competition, the antitrust enforcement arm of the FTC, to clearly state that S. 47, as reported by the Senate Commerce Committee, is inconsistent with the free enterprise system. They state that, in part, "S. 47 fails to provide necessary and feasible protections against cartel power."

I am concerned that we are allowing an institutionalized legislative precedent extending back over nearly 70 years to unreasonably dictate the final nature of this bill. The FTC testimony cites a survey conducted by the Canadian Government in 1982 which questioned Canadian users of ocean shipping services. More than 85 percent of the respondents were dissatisfied with exemptions granted to the cartels, and over half considered the marketplace to be the best regulator of the system. This FTC testimony should be closely read by my colleagues. For it not only states that S. 47 is seriously flawed, but it concludes that "unless these faults are corrected, the proposed Shipping Act of 1983 will inflict unnecessary injury on the American economy and the American consumer."

In addition to the testimony provided by witnesses, I would like to focus attention on a report by the House Republican Research Committee's Task Force on Congressional and Regulatory Reform, published July 14, 1982, entitled "The U.S. Maritime Industry: More Competition Is Needed".

This report concurs with President Reagan's acknowledgement that a strong U.S. merchant marine is vital as an "economic instrument for the support of U.S. interest abroad". The research committee's report emphatically supports the theory that the key to the development of a viable merchant marine and a way to offer the public quality liner service at the lowest possible price is through more—not less—competition.

Although our present open conference arrangements, regulated by the Federal Maritime Commission (FMC) have been inefficient and costly, the report states that increased cartelization can only have more serious economic consequences, and that exporters, importers, and consumers are likely to bear the brunt of less competitive policies through higher transportation and product costs. The report also postulates that less competitive policies may lead to carrier complacency and service quality to decline.

The report points out that advocates for cartelization have argued that

closed conferences have eliminated excess cargo space on their ships and result in effectively scheduled sailings. According to a 1981 University of Liverpool study, efficiency during the last 15 years has resulted primarily from the "introduction of new transport technologies and the associated development of intermodal transport systems."

Advocates of the closed conference system further argue that open conferences would not succeed because:

A high proportion of fixed costs in the industry would lead to destructive price wars, price collapse, bankruptcies, and eventual monopolization.

Shipping capacity could not adjust to cyclical shifts in demand.

Fleets operating as instruments of political and military power undercut conference rates so severely that these fleets would monopolize the industry. In addition, countries finding their lines squeezed out of particular trades would be compelled to protect their lines through subsidization and preferential cargo transport policies; thus, creating further inefficiencies.

Many of these same arguments were raised in other transportation industries, but successful deregulation suggests that fears of high fixed costs and an inability to adjust to demand changes are unfounded.

The report states: "Recent experience in airline, trucking and railroad industries indicate that domestic transportation can operate most efficiently in a free market. Many of these principles of competition can be applied to international ocean liner service. Theoretically, unfettered competition would balance liner supply and demand, apply downward pressure on rates, push out excess capacity, reduce costs, and produce optimal fare/service combinations." For example, the report cites "the oil tanker industry, where fixed costs are high but tankers are not arranged into conferences." The real cost of tanker service has declined steadily since World War II, while tanker fleet sizes have multiplied nearly twenty times," the report states.

In conclusion, the House Republican Research Committee said:

It is desirable for the United States to improve its merchant marine capabilities. Yet, the current proposal with its call for a closed conference system, free of antitrust prosecution is not the best way to achieve it. The more complete monopolization of liner trades makes some subsidization of U.S.-flag operators a tax placed on the backs of importers, exporters and consumers. U.S. ocean commerce can now best be served by free market forces as a result of technological advances, evidence of increased competition worldwide, and the successful deregulation in other transportation industries.

Finally, I would like to draw the attention of my colleagues to a recent report to the Committee on Merchant Marine and Fisheries of the House of Representatives by the Comptroller General of the United States (July 1982), which concludes that the circumstances and condition of the present U.S. merchant marine does not justify legislation designed to protect the industry.

The report analyzes one of the reasons why this bill is pending before Congress: "Concern about the condition of the U.S.-flag liner fleet." The picture painted by those supporting increased antitrust immunity suggests that recent developments are leading to a deterioration of our cargo liners. The GAO report concludes:

The evidence shows, however, that these developments are, in large part, attributable to the confirmation of a stagnent volume of U.S. liner cargoes, and the rapid adoption of container handling technology by U.S.-flag liner companies.

The report concludes that there are two alternatives for Congress to consider:

The first is to initiate more price competition by reducing or eliminating the antitrust immunity currently granted to shipping conferences. The second is to expand the antitrust immunity * * *. The first alternative would introduce more price competition and competition would consequently be of more value to shippers.

Thus, the GAO offers the conclusion that a reduction of antitrust immunity for carriers, the reverse of this bill, would provide greater competition, and that this competition would benefit shippers.

In addition to concluding that the U.S. merchant marine is not in the state of decay which many S. 47 advocates are proclaiming, the report states that "it appears that the U.S.-flag liner fleet is not in a state of general distress significant enough to justify a major revision of the Shipping Act." I view these as significant conclusions which persuasively argue against the merits of this bill.

Mr. President, I appreciate the opportunity which I have had to address my concerns over this bill. In earlier days, the Supreme Court rightly noted that our antitrust laws are the Magna Carta of American free enterprise. To suspend these laws, is an act, a statement of supreme import. It is only with the threat of grave consequences that such an act should be undertaken. I do not believe that the advocates of this bill have created a presumption favoring the suspension of our antitrust laws; certainly not to the degree delineated by S. 47.

For this reason, I must oppose the bill in its present form, and for this reason I supported and continue to support the Judiciary Committee amendments which will shortly be offered by the chairman of the Judiciary Committee, Senator THURMOND.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. HATCH, I yield.

Mr. STEVENS. Mr. President, before the distinguished Senator leaves, and I do know he does have an appointment, will the Senator yield for a question?

Mr. THURMOND. I am pleased to yield for a question.

Mr. STEVENS. Mr. President, it is my understanding now that UP amendment 4 is the amendment to which I will offer my amendment in the second degree, and we will vote on all the other amendments the Senator has offered prior to that time. Is that the Senator's understanding?

Mr. THURMOND. Mr. President, that is correct.

Mr. STEVENS. Is that correct? I will ask the Chair.

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Very well.

I will say to the Senator that following the statement by the Senator from Washington (Mr. GORTON) we will recess at 12:30 p.m. Is the 1:45 p.m. time agreeable to the Senator for coming back in?

Mr. THURMOND. Yes.

Mr. STEVENS. I yield to the Senator from Utah.

Mr. HATCH. I would like to make a statement in support of the amendments of the distinguished Senator from South Carolina.

Mr. STEVENS. Would the Senator like to do it now?

Mr. HATCH. I would like to make that statement now.

Mr. STEVENS. Does the Senator from Washington have any objection?

Mr. GORTON. No.

Mr. THURMOND. Mr. President, let me explain to the Senator from Utah that I have made a statement on all the amendments. Senator STEVENS indicated he is about to offer an amendment to my UP amendment No. 4. Does the Senator want to speak on that or does he want to speak on the whole package?

Mr. HATCH. I want to speak on the whole package and then I will have some comments on UP amendment No. 4.

Mr. THURMOND. The Senator wants to speak on the whole package?

Mr. HATCH. That is correct.

Mr. THURMOND. I have no objection.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator from Utah.

Mr. HATCH. I thank the Chair.

Mr. METZENBAUM. Mr. President, will the Senator from Utah yield to me for a moment?

Mr. HATCH. I yield.

Mr. METZENBAUM. I rise to offer amendments to the bill and amendments to the committee substitute prior to the p.m. deadline.

The PRESIDING OFFICER. The amendments will be received.

Mr. METZENBAUM. I yield back the floor to my friend from Utah.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. HATCH. I yield.

Mr. STEVENS. Before the distinguished Senator from South Carolina, the chairman of the Judiciary Committee, leaves, it is my understanding that there were two amendments in the Judiciary Committee's original package which were proposed by the Senator from Louisiana (Mr. LONG) that have not been included; is that correct?

Mr. THURMOND. That is correct.

Mr. STEVENS. I have been requested to offer those as a separate amendment now, which would be another amendment, so that Senator LONG will be able to have them considered. Is there objection to that as far as the Senator from South Carolina is concerned?

Mr. THURMOND. We have no objection.

Mr. METZENBAUM. Mr. President, reserving the right to object—and I do not intend to object—it is my understanding that the Senator from Louisiana has one amendment having to do with recycling, the recycling industry. Would the Senator from Alaska be good enough to explain what the other amendment is?

Mr. STEVENS. It deals with permitting U.S.-flag carriers exporting from foreign states which would otherwise be unavailable to the carrier by reason of cargo reservation law trade practices of such state, and it was in the original Judiciary Committee.

Mr. METZENBAUM. This was one of the Judiciary Committee amendments?

Mr. STEVENS. It did not come out with the Judiciary Committee. It was in the Judiciary Committee package to be offered by the chairman we are talking about.

Mr. THURMOND. Mr. President, we did not include Senator LONG's amendments in our package.

Mr. STEVENS. I am misinformed. It was Senator LONG's understanding they were there, and I wish to offer them now in behalf of Senator LONG so that they will be considered in conjunction with the rest of those items.

Mr. METZENBAUM. I have no objection to the recycling amendment. I would like to have an opportunity to study the other amendment. I have no objection to it, but I am taken somewhat by surprise.

Mr. THURMOND. Senator LONG is not here, and just out of courtesy to him I think it is proper for the assistant majority leader to offer them.

Mr. STEVENS. I have not made the request that they be considered part of the package. I was misinformed. I do offer it and send it to the desk in behalf of the Senator from Louisiana, I offer this amendment for him that he will wish to address in connection with the matters before the Senate now, and I ask that it be printed, be given a number, and that the same courtesy be given to Senator LONG as given to the other amendments, and that they not be considered out of order even though they touch the bill in more than one place.

Mr. METZENBAUM. They would not be considered as part of the Judiciary Committee amendments.

Mr. STEVENS. Not at all.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENTS ON UNPRINTED AMENDMENT NOS. 5 THROUGH 18

Mr. HATCH. Mr. President, I would like to offer my full support to all of the amendments which have been offered by Senator THURMOND on behalf of the Judiciary Committee. As Senator METZENBAUM has previously noted, nearly 70 days of hearings have been held on this, or similar, proposed legislation over the past 6 years. Unfortunately, the Senate Judiciary Committee has only enjoyed 6 days of jurisdiction and has held one hearing—all within the past 2 weeks.

I would like to commend the chairman of the Judiciary Committee, Senator THURMOND, for obtaining temporary jurisdiction over this bill. He deserves particular credit for assuring the integrity of his committee's jurisdiction, and for convening witneses on very short notice. I would also like to note that the testimony of the witnesses he convened has been significant from an antitrust analysis point of view.

Others on the Judiciary Committee, in addtion to myself, have expressed a deep concern over the sweeping extension of antitrust immunity permitted by this bill. Without the chairman's efforts, these concerns would not have been addressed, and no committee action would have been possible.

Finally, I would like to commend the efforts by Chairman THURMOND in drafting a series of amendments designed to address some antitrust deficiencies and anticompetitive flaws of this bill. These amendments were reviewed by the full Judiciary Committee in executive session last Tuesday, February 22, and were unanimously adopted. While the committee members expressed reservations about reporting the bill, despite the THURMOND amendments, the record will reflect unanimity with respect to these amendments.

It is no secret that I have some real concerns about this bill with or without the Thurmond amendments, and I believe we have to be very, very careful before we make a choice to grant wide, sweeping antitrust immunities in any sector of our commerce.

I reserve any further remarks I have to make until we debate the major amendment which is in controversy. I thank the Chair and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, at some time before we vote, even on the series of amendments which are agreed to between the sponsors of the bill and the Commerce Committee on the one side and the Judiciary Committee on the other side, it is appropriate to have an explanation of the understanding of each set of interested parties on the meaning of those amendments.

The distinguished Senator from South Carolina, the chairman of the Judiciary Committee, has outlined a number of the amendments. As prime sponsor of the bill, I should like to do so as well, although I will simply take them one at a time and a number of those explanations or explanatory comments will not take place until after the recess at approximately 12:30 p.m. this afternoon.

In the order in which they have been presented, the first of the amendments, and one of the most significant, relates to shippers councils. The Commerce Committee, in reporting the bill, authorized the shippers councils for two separate purposes. One was simply to consult and to confer with on common carriers or with the conferences regarding general rate levels charges, rules, practices, and the like; and was open to all kinds of shippers, both large and small.

A second power of shippers councils in the Commerce Committee bill was actually to combine cargo and to negotiate rates for that combined cargo in order to give small shippers a greater voice in the way in which they were treated by carriers in international commerce.

There was a certain degree of objection to this set of propositions on the part of the Judiciary Committee, largely, I believe, because they were concerned about significant additional exemptions from the antitrust laws of the United States and were concerned that any such councils would be dominated by large shippers rather than by small shippers and that if push came to shove it would be the small shippers who would suffer.

After extended negotiations between the distinguished Senator from South Carolina, the chairman of the Judiciary Committee, and ourselves, the chairman suggested a change which I think is highly constructive and which is included in the package which is before the Senate right now. Instead of authorizing shippers councils, which is something new to the United

States, though not to Europe, the Judiciary Committee proposes to go to a more familiar concept and to allow joint ventures to be established by small shippers, for two separate purposes.

Before I go into those purposes, I should point out that this excluded the large shippers, the major chemical manufacturing companies and the like, from any ability to engage in joint action among competitors. The theory of course is that these large shippers have enough market share and enough economic power to negotiate the best possible deal with ocean common carriers without having to join with their competitors in order to do so.

Small shippers are rather specifically defined in the proposal which the Judiciary Committee now makes to be shippers who, during the course of the year, average no more than 35 40-foot containers per month being shipped during the course of the normal business of each of those organizations. Those small shippers are allowed to form joint ventures for two purposes. The first is to consult and confer either with an individual ocean common carrier or with the conference regarding general rate levels, charges, classifications, rules, practices or services; that is to say, the entire mix of services which ocean common carriers offer to their customers. And then more specifically those small shippers are allowed to combine cargo with one or more of their own membership for the purpose of obtaining time volume rates and service contacts with ocean common carriers.

This is, of course, an important improvement over present circumstances. It clearly will enhance the ability of the small shippers who join in these joint ventures to get the best possible rates for the shipment of their goods and to see to it that they are in no way discriminated against by either large shippers or by the common carriers who are members of conferences or, for that matter, who are independents and are not members of conferences at all.

I should emphasize at this point, of course, that there is no requirement on any small shipper for joining into such a joint venture, but the people representing small shippers who appeared before the Commerce Committee indicated a very, very significant desire to engage some kind of organization of this sort so that they could gain the advantages of any efficiencies in operation and lower costs of operation on the part of common carriers which would result from the passage of S. 47.

As a consequence, speaking for myself, but I think reflecting the views of the majority of the members of the Commerce Committee, I would point out that this is probably an improvement over the bill as it was reported by the Commerce Committee and we are delighted to accept the shift from shippers councils to joint ventures limited to small shippers, which is contained in the amendments on which we will vote in a relatively short period of time.

Mr. METZENBAUM. Mr. President, on behalf of Senator HATCH, who I know had intended to qualify his amendment—it has been pretty relaxed about permitting amendment to be considered—he has an amendment that he intended to ask that it be considered germane for purposes of this measure and I, therefore, on his behalf, ask unanimous consent that it be considered germane.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECESS UNTIL 1:45 P.M.

Mr. BAKER. Mr. President, for the reasons which have been stated on the floor, I believe, it appears that the schedule of the Senate will be expedited if there could be a brief recess at this time. I ask unanimous consent that the Senate recess at this moment until the hour of 1:45 p.m. today.

There being no objection, the Senate, at 12:32 p.m., recessed until 1:45 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. COHEN).

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

Mr. President, on Thursday last, the distinguished Senator from Ohio, Senator METZENBAUM, indicated on the floor that he anticipated that there would be votes on amendments on today, Monday; that they should be expected early, as I recall, and that there would be an objection to stacking the votes, all of which I understand and which were entirely proper to protect the position the Senator from Ohio was asserting.

It now appears, however, that we will deal with 14 of the amendments today, en bloc, perhaps, and a rollcall vote has been ordered on those amendments, one rollcall vote.

But I am now told that we have not ascertained any opposition to those votes. If that is the case on the other side, there is simply no reason to have a rollcall vote. I will not do it now so Senators will have a chance to register their objection, if they wish to, but later today, and before the vote occurs, I plan to ask unanimous consent to vitiate the yeas and nays on the vote.

Mr. METZENBAUM. Mr. President, if the floor leader will allow me to express my thoughts on this subject, I have no objection to vitiating the votes on the agreed-upon amendments, and I ascertain it would be a good procedure that we get on about our business in connection with this measure. I am prepared to move forward and do so.

The Senator from Alaska has an amendment that may entail some debate, but I would be prepared, at least for myself, to vote on that at 3:30 or 4 p.m. this afternoon. I then have an amendment that is pending. I would be prepared to vote on that immediately after the vote on the Stevens amendment. I am concerned. We have a cloture vote tomorrow. We have a limited time for debate tomorrow. I have a number of amendments that I am prepared to call up, am ready to call up. I am concerned that we are running out of time without anybody being particularly involved. But I think that cloture quite often is invoked by reason of the fact that there is some extended debate in order to bring it to a conclusion. It is not normally invoked to preclude a Member from calling up legitimate amendments that are germane. I do have a number of those.

I am concerned that tomorrow morning when we come in at 11:30 a.m. and recess from 12 to 2 p.m., from 2 to 4 p.m. having controlled time. I am simply attempting to point out to the leadership that I do not think it is his intention to deny any Member from asking for a vote.

I know the distinguished Senator from Utah has an amendment that he expects to call up.

All of this makes me believe that we ought to get on about our business and take the amendments that are noncontroversial, debate the Stevens amendment, agree to vote on it at 4 p.m., if that suits the leader's purposes, and debate the next amendment and vote upon that immediately thereafter. Senator HATCH has an amendment. Perhaps we can stack that up and vote on it. I know I have discussed stacking amendments, but it is obvious that we have not moved forward today. I am willing to expedite this decision with respect to amendments, having an opportunity to call up subsequent amendments.

Mr. BAKER. Mr. President, we came in today at 10 a.m., so that we would have time for Members to offer their amendments. It is now almost 2 p.m. Maybe it is just that it is Monday, but, really, I cannot ascertain that an awful lot has gone on between 10 this morning and 2 this afternoon. I do not know how much longer we will be in this afternoon. Perhaps I should have tried harder to get a time agreement on other amendments, or a time-certain vote. That would have expedited things. I doubt that I would have gotten an agreement on Thursday.

I am anxious to finish this bill. There are other things that must be done. It is the intention of the leadership yet this week to call up the Montreal protocols, if it is possible to do so,

and to try to deal with that sticky issue. There are other things backed up that argue forcibly that we finish this bill as fast as possible. But at least we have a cloture vote on for tomorrow at 4 p.m.

I am perfectly willing to change the order for the convening time tomorrow, which is now 11:30 a.m., I believe, to make it earlier if that will help. As far as I am concerned, I am prepared to stay in today as long as it appears useful to do so. I am even bold enough to suggest that maybe we could arrange the rest of the schedule on this bill, including a time certain for the vote on the remaining amendments and passage. I sense a certain stiffening in the jaw of the Senator from Ohio at this point, which indicates to me that may be unlikely. I heard him mumble that that was a perceptive understanding.

Mr. METZENBAUM. The Senator from Ohio is prepared to move forward. If the Senator from Alaska is prepared with his amendment, I am prepared to agree to a time certain on that amendment, subject, of course, to the agreement of the chairman of the Judiciary Committee. I have no objection to agreeing to vote on that at a time certain, nor do I have any objection to agreeing to a time certain on my amendment that is pending.

I guess, of the Senator from Utah—though I have no way of knowing—that he would be willing to agree to a time certain on his amendment. I do not think there is any effort on the part of those of us who are opposing this bill at this point to forestall some of these matters being brought to a conclusion.

Mr. BAKER. Mr. President, there is one aspect of the leadership of the Senate that I have learned from bitter experience. That is when to withdraw from the field of battle. I have a feeling now, and it is coming through to me strong, that it is time for me to withdraw from this conversation and return to the debate on the issue between the managers of the bill.

The Senate has many traditions. One of the new and growing traditions is the ability of the Senator from Ohio and the Senator from Alaska to resolve their differences. They do it sometimes with some gusto, but I have observed that sometimes, the Senator from Ohio and the Senator from Alaska have learned to resolve their issues. That may strain the generic meaning of the word, "issue," but it serves to dispatch the matter.

Mr. President, I am going to withdraw from the floor after repeating what I said before, that I am going to ask the Senate to stay in today as long as we can productively utilize the time. I am disappointed we have not done so by now. I asked the Senate to come in at 10 a.m. today, which is very unusual for Monday, owing to the various problems of Senators returning from the break.

I am prepared to change the order for the Senate to convene tomorrow at 11:30 a.m., if that seems useful to the purpose, which is to give Senators time to offer amendments which might not be disposed of today. I am prepared to shop for unanimous-consent agreements on amendments on this bill.

Having said all that, Mr. President, I am going to yield the floor in the hope that the Senator from Alaska (Mr. STEVENS) and the Senator from Ohio (Mr. METZENBAUM) may engage once more in the highly enthusiastic debate for which they are both noted.

Mr. METZENBAUM. Mr. President, what is the pending order of business?

The PRESIDING OFFICER. The question is on unprinted amendment Nos. 5 through 18 en bloc.

Mr. METZENBAUM. Would the Senator from South Carolina, the distinguished chairman of the Judiciary Committee, state whether he is prepared for a vote to be taken in connection with all his amendments, with the exception of the one that is in controversy with the Senator from Alaska?

Mr. THURMOND. In reply to the distinguished Senator from Ohio, I say that when we offered this package of 15 amendments, they agreed to accept 14 of them. If they want a rollcall, it is all right with me. I do not think it is necessary, however. The other one can be debated. I believe they said something about going over until tomorrow on that one.

What is the wish of the majority leader?

Mr. BAKER. Mr. President, before I answer the question of the distinguished President pro tempore, could I inquire of my friend, the minority leader, if he knows of any objection on his side or if he has an objection to vitiating the yeas and nays on this package?

Mr. BYRD. I have no objection, Mr. President. We have contacted our people through the cloakroom. We have no objection to vitiating the rollcall.

Mr. BAKER. Mr. President, I am ready to indicate we have no objections to vitiating the rollcall, so if no Senator now on the floor will object, I ask unanimous consent that the order for the yeas and nays on the amendments be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, once again, I wonder if that answers now the question put to the Senator from South Carolina?

Mr. THURMOND. The question was whether I wanted to vitiate the yeas and nays, to which I answered we have no objection.

Mr. BAKER. I wonder if the managers are ready to go forward now with the adoption of the amendments?

Mr. THURMOND. We are ready to go forward with those 14 that have been agreed upon.

Mr. GORTON. Mr. President, because there are 14 of these amendments and because they are somewhat technical in nature and should be explained on the RECORD, I shall take a few more minutes to discuss 13 of them. One of them, perhaps the most significant, I discussed before the luncheon break, with the indulgence of the Senator from Ohio. Those remarks are on their way to the floor now. I should be able to start my remarks on that subject within the next 2 or 3 minutes.

Mr. METZENBAUM. Would the Senator from Washington indicate the kinds of things that can be adopted in the Judiciary Committee absent the ones in controversy?

Mr. GORTON. I cannot imagine the remarks I would have would last beyond 2:30 p.m.

Mr. METZENBAUM. I hope we can adopt these. I hope we can then proceed to the Stevens amendments, with the exception of the one amendment still in controversy, and that we shall be in a position to vote that up or down as rapidly as possible. I am prepared to move forward.

Mr. GORTON. I would prefer that the vote on the Stevens amendment, which I assume will be a rollcall vote, be deferred until tomorrow because of the large number of absentees here. I think it is better to be debated and the Senator from Alaska and I are prepared to do so. I think it would be better if, upon conclusion of the debate on that in the next couple of hours, we nevertheless would debate an additional amendment before going on to vote.

Mr. METZENBAUM. I hope we can get on and move as promptly as possible, because I have a number of other amendments to call up before the cloture vote. As the Senator well knows, I cannot do that very well as long as this matter is pending.

Mr. GORTON. I believe I am not subverting any understandings if I agree to allow the Senator from Ohio to do just that, exactly as we debated one of these amendments on Friday last, with the understanding that it would not be voted upon until all of the Judiciary Committee amendments have been disposed of. I am sure we can go on the same basis this afternoon.

Mr. METZENBAUM. Let us see how far we can go, Mr. President. The more rapidly the Senator can go, the more prepared I am to cooperate. I hope he will not be delaying so we will not have to invoke cloture.

Mr. GORTON. Mr. President, my statement on these amendments is on its way here. For a very brief period, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

Mr. GORTON. Mr. President, before the break for lunch I had discussed one of the amendments presented by the Judiciary Committee, that relating to the substitution of joint ventures among small shippers for shippers councils.

I will now proceed to discuss the other amendments which have been agreed to between the Judiciary Committee and the Commerce Committee and outline their impact on the bill and the business which is the subject of this bill.

The next amendment deals with antitrust immunity for marine terminal operators, as that immunity was included in S. 47 as reported by the Commerce Committee.

The Judiciary Committee, in contrast, proposed that pooling agreements between marine terminal operators be removed from the scope of antitrust immunity offered by S. 47.

This amendment on the part of the Judiciary Committee is acceptable to me and to the distinguished Senator from Alaska and the members of the Commerce Committee because we understand that section 4(b)(1) will operate to permit marine terminal operators to enter into arrangements with vessel operators which vary rates with the volume of cargo offered.

The next Judiciary Committee amendment deals with intermodal rate setting authority.

The Senate will remember that on Friday we discussed a proposed amendment by the Senator from Ohio (Mr. METZENBAUM) which would strike any authorization for conferences to set intermodal rates, that is to say rates which would also include a segment of land transportation within the United States.

The Judiciary Committee, however, does have an amendment on that subject which is somewhat more restrictive than the form of the bill as it was reported by the Commerce Committee.

The Judiciary Committee amendment on intermodal rate setting authority would clarify the proposition that carriers may not discuss with their conference members the prices they are able to negotiate for the inland portions of their routes.

The Commerce Committee has consistently been of the view that conferences should be authorized to set and publish intermodal through rates. We have, at the same time, stated that conferences should not be allowed to use their market power to negotiate divisions of through rates with individual inland carriers. Only individual ocean carriers should be allowed to negotiate the inland portion of intermodal rates with individual inland carriers, and that is the purport of this amendment and of the bill as it will be amended by the Judiciary Committee's proposal.

Once such an agreement has been made it may be adopted by the entire conference.

We understand the Judiciary Committee amendment to be a clarification of these principles but not one which restricts or limits a conference's authority to set and publish through intermodal rates when the procedure which I have outlined has been followed.

The next amendment the Judiciary Committee has proposed and to which we have acceded deals with a percentage limitation on loyalty contracts.

A loyalty contract is an arrangement by which a shipper receives a prescribed, but lower, freight rate in exchange for a contractual commitment on the part of the shipper to ship with a particular carrier or conference. Those prices may be lower by amounts up to 15 percent.

Section 7 of S. 47 continues to provide for such loyalty contracts modeled on existing law. There are a number of changes in S. 47 but none would alter the cargo requirements of such agreements. Indeed, the effectiveness of the loyalty contract system as a tying device has been severely questioned in the past.

Loyalty contracts promote stability in the ocean transportation of our international trade and therefore ultimately result in lower costs for the American consumer. This delicate balance would have been drastically altered by the original Judiciary Committee amendment which would have further weakened the effectiveness of such loyalty contracts. The current proposed amendment would authorize a contract shipper under a loyalty contract nevertheless, to utilize competing services for not more than 5 percent of the shippers tonnage which would otherwise be subject to the loyalty obligation and, therefore, frees up the situation for somewhat more competition.

The next Judiciary Committee amendment deals with disputes relating to loyalty contracts.

The Judiciary Committee's amendment strikes the language setting out breach of contract rules in connection with loyalty contract disputes.

We understand, and I speak for myself and for the Commerce Committee, that that amendment does not in any way preclude such provisions from a loyalty contract itself. Obviously, a shipper and carrier should be free to negotiate whatever terms they desire.

The amendment would have normal contract law govern any such dispute in the absence of provisions covering the special breach of contract rules which are contained in the loyalty contract itself.

The next Judiciary Committee amendment has to do with the method by which orders of the Federal Maritime Commission are enforced in the courts of the United States. Essentially the amendment causes that enforcement to take place by litigation brought on behalf of the Federal Maritime Commission by the Department of Justice as opposed to the provision in S. 47 and pursuant to which the Federal Maritime Commission could represent itself through its own counsel.

The Judiciary Committee amendments to S. 47's provisions in this regard are certainly acceptable to us.

In point of fact, speaking for myself at this stage, as a former State attorney general, I generally favor consolidating the litigation responsibilities of the Federal Government in the Department of Justice and not in the individual agencies.

The committee does not interpret the amendment to effect any change or diminution in the existing authority of the Federal Maritime Commission to assess penalties, to compromise claims, or to represent its interests in appellate review proceedings arising under the Hobbs Act.

The next amendment by the Judiciary Committee would prohibit net profit and loss pools.

The Commerce Committee associates itself with the remarks of the distinguished Senator from South Carolina on the Judiciary Committee amendment which would prohibit net profit and loss pools.

The Commerce Committee recognizes the potential loss of the incentives of a carrier who is a party to such a profit and loss pool.

As a matter of interest, this provision was a topic of discussion during the 97th Congress and was an agreed part of legislation which passed the House of Representatives late during the 97th Congress but which was not disputed or debated on the floor of the Senate.

The next amendment has to do with the ability of the Federal Maritime Commission to require clarifying information. The proposal of the Judiciary Committee would state that the Federal Maritime Commission's ability to require information which has been submitted to it to be clarified is one which is consistent with the intent of S. 47.

It should be clear that the ability of the Federal Maritime Commission to subpena information in the 45-day period following the filing of an agreement will not cause undue delays of the processing of such agreements, and it must be at the request of a private person and not a Federal agency.

The final Judiciary Committee amendment with which we are dealing at this time amends the standard required for gaining immunity under the antitrust laws. The amendment of the Judiciary Committee would strike the language "in the reasonable belief" and insert in place thereof the language "with a reasonable basis to conclude."

Some background in respect to the past erosion of antitrust immunity first established by the Shipping Act of 1916 is probably useful and appropriate at this point in this debate.

For the first 50 years, after enactment of the Shipping Act of 1916, the courts held that the antitrust laws did not apply to liner conferences and agreements, and that the Shipping Act provided the exclusive remedies for unapproved activities which were within the scope of section 15 of the act.[1]

In 1966, the Supreme Court overturned 50 years of precedent in the Carnation case.[2] The Court held that Congress had not intended to grant the shipping industry total antitrust immunity and therefore that the implementation of ratemaking agreements which were later found not to have been approved by the Commission was subject to the antitrust laws. For the first time liner carriers found that the Shipping Act did not provide the exclusive remedy for alleged wrongs. Carriers were exposed to treble damages and penalties if they acted collectively in a way later found to have been outside the scope of their approved conference agreement.

In the Sabre case,[3] the antitrust exemption was further eroded. In that case, the Court held that even though the conference lines were operating pursuant to approved agreements, the particular rates which they agreed upon were so low as to be "detrimental to the commerce of the United States." The antitrust immunity conferred by approval of the conference agreement was retroactively found not to apply. Thus, where particular rates were later found to be unlawful under another provision of the Shipping Act, the act of agreeing upon those rates was subject to the full force of the antitrust laws.

I should emphasize that in this case the gravamen of the case was that rates were too low, not too high.

In the same year, it became increasingly more difficult for shipping conferences to obtain approval of their agreements. In the Svenska case,[4] the Supreme Court upheld a Commission decision that agreements which interfere with the policies of the antitrust laws will be approved only if the proponents can factually demonstrate that the agreement is required by a serious transportation need, necessary to secure important public benefits, or in furtherance of a valid regulatory purpose of the Shipping Act.

Thus, Svenska and subsequent cases have completely done away with the presumption of approvability which Congress intended to attach to agreements relating to international ocean shipping. Commercial standards for approval have been replaced with antitrust and regulatory standards.

As a result, the section 15 antitrust exemption of the Shipping Act has been seriously eroded, and shipping conferences act at their peril in conducting the very activities for which they were organized.

Conferences are encouraged to act collectively if they can surmount the hurdles which stand between their desire to act and Commission approval. When they do act after such Commission approval, they are in constant danger of retroactive application of antitrust penalties. Carriers and conferences are now unable reliably to predict that actions might later be found to have violated the antitrust laws.

The intent of these provisions is to confer antitrust immunity on agreements and conduct properly submitted to the regulatory process of the act. It confers no immunity on secret or covert conduct, on agreements that are not filed and in effect, and on conduct that is not undertaken with a reasonable basis to conclude that it is pursuant to an agreement. It is intended that this test allow latitude for good faith errors of judgment, particularly in situations in which the dividing line between prohibited and authorized conduct under the Shipping Act cannot be drawn with precision. At the same time, this test, though subjective, is limited by the objective test that the actor's belief be with a reasonable basis to conclude that the conduct is pursuant to a filed agreement. It is the intent however to resolve conflicts between the Shipping Act and the antitrust laws in the maritime sector in favor of Shipping Act jurisdiction.

Once the requirements of sections 5 and 6 have been met, activities pursuant to such agreements or undertaken or with a reasonable basis to conclude that such activities are pursuant to such agreements, are subject solely to the Shipping Act. Only the standards, remedies, and penalties of this legislation will apply. Carriers operating in the U.S. foreign commerce will no longer face a dual risk of being regulated under both the Shipping Act and the antitrust laws for their conference activities. This is intended to be a broad exemption from the antitrust laws for the activities outlined therein.

The amendment on the part of the Judiciary Committee is appropriate and should be adopted.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NOS. 5 THROUGH 18 AGREED TO, EN BLOC

Mr. THURMOND. Mr. President, what is pending before the Senate?

The PRESIDING OFFICER. The question is on agreeing to unprinted amendments numbered 5 through 18, en bloc.

Mr. THURMOND. Is that 14 amendments?

The PRESIDING OFFICER. The Senator is correct.

Mr. THURMOND. Mr. President, I move the passage of the amendment.

The PRESIDING OFFICER. The question is on agreeing to unprinted amendments numbered 5 through 18, en bloc.

The amendments (UP Nos. 5 through 18) were agreed to, en bloc.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 4

(Subsequently numbered amendment No. 467.)

The PRESIDING OFFICER. The question is on unprinted amendment No. 4.

Mr. GORTON. Mr. President, the Senator from Alaska (Mr. STEVENS) will have an amendment to this amendment and will call that up as soon as he arrives on the floor. While we await his arrival, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

[4] (*Federal Maritime Commission* v. *Aktiebolaget Svenska Amerika Linen*, 390 U.S. 238 (1968)).

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I am glad the Senator from Washington came to the floor. I would like to make an inquiry of him and tell him that I am about to offer a unanimous-consent request and I wish to explain it.

As the Senator well knows, I have a number of amendments that I am prepared to call up, one of which is actually pending, and I am prepared to call up a number of others.

I know that we have agreed that the amendment of the Senator from Alaska will be called up next and that we vote on it. That is agreeable with me. It is also my understanding that Members on the other side of the aisle have indicated that they prefer not to vote this afternoon on the amendment of the Senator from Alaska. That is agreeable with me, provided that the Senator from Ohio is given an opportunity to call up his amendment and get them to a vote before cloture.

We are under a limited time tomorrow. It is for that reason that I hope the Senator from Washington will understand the unanimous-consent request I am about to make and will be sufficiently accommodating so that I may go forward with my amendments without in any way diminishing the rights of those who are on the opposite side of the aisle or on the opposite side of the issue from me.

Mr. GORTON. Will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. GORTON. How many such amendments are there?

Mr. METZENBAUM. Six, in addition to the one——

Mr. GORTON. We are speaking, then, of seven amendments on which there would be rollcall votes in addition to the amendment by the Senator from Alaska?

Mr. METZENBAUM. Yes. My unanimous-consent request would be that if we can get them to a rollcall vote, and I am prepared to move very rapidly to a rollcall vote on them after the amendment of the Senator from Alaska is disposed of and after the first amendment of the Senator from Ohio is disposed of, if we can get them to a vote, fine, and if not, I am asking unanimous consent that they be voted on immediately prior to the cloture vote.

Mr. GORTON. The Senator from Washington really is not able to answer that question of the Senator from Ohio since that is a question more properly directed to the majority leader. I will ask that he be called to the floor to deal with that.

In the interest of clarification, while we are waiting for the majority leader, however, I might ask the Senator from Ohio whether or not, recognizing that the Senator from Alaska does not wish to have his amendment voted on this afternoon, we might nevertheless go through debate on each of the additional six amendments of the Senator from Ohio during the course of the day today even though we were going to vote on all or most of them tomorrow before cloture?

Mr. METZENBAUM. We certainly can debate most of them and I think debate all of them. It is my understanding that there are some Members on both sides of the aisle who would like to be out of here by 4:30 or 5 p.m. I am agreeable to that as well. I do not believe that the amendments that I have are complicated. I think I might speak for just a few minutes to explain them and the Senator from Washington might want to speak for several minutes, indicating his opposition.

Mr. GORTON. I hope we could spend this afternoon in debate and not simply quorum calls. We will see whether or not we can make such an arrangement which would allow enough debate on each of these issues and also for a greater presence of Senators in attendance.

Mr. METZENBAUM. I did not want to press the issue this morning. I will wait for the arrival of the majority leader.

Mr. GORTON. If the Senator will await the arrival of the majority leader, I would appreciate it.

Mr. METZENBAUM. I certainly will.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HECHT). Without objection, it is so ordered.

Mr. STEVENS. Mr. President, it is my understanding that the amendment of the distinguished Senator from South Carolina is now pending, that amendment being committee unprinted amendment No. 4. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 19

(Subsequently numbered amendment No. 468.)

Mr. STEVENS. Mr. President, I send to the desk an amendment to that amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 19.

Mr. STEVENS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment is as follows:

Strike on page 1, line 1 through line 9.

Strike on page 1, line 12 through line 14 on page 4.

Strike all on page 1, line 11, and insert in lieu thereof the following: "common carrier by water in foreign commerce or conference of such carriers shall charge or demand or collect or receive a greater or less or different compensation for the transportation of property or for any service in connection therewith than the rates and charges which are specified in its tariffs on file with the Commission and duly published and in effect at the time; nor shall any such carrier rebate, refund, or remit in any manner or by any device any portion of the rates or charges so specified, nor extend or deny to any person any privilege or facility, except in accordance with such tariffs: *Provided, however,* That the Federal Maritime Commission may in its discretion and for good cause shown permit a common carrier by water in foreign commerce or conference of such carriers to refund a portion of freight charges collected from a shipper or waive the collection of a portion of the charges from a shipper where it appears that there is an error in a tariff of a clerical or administrative nature or an error due to inadvertence in failing to file a new tariff and that such refund or waiver will not result in discrimination among shippers: *Provided, further,* That the common carrier by water in foreign commerce or conference of such carriers has, prior to applying for authority to make refund, filed a new tariff with the Federal Maritime Commission which sets forth the rate on which such refund or waiver would be based: *Provided further,* That the carrier or conference agrees that if permission is granted by the Federal Maritime Commission, an appropriate notice will be published in the tariff, or such other steps taken as the Federal Maritime Commission may require, which give notice of the rate on which such refund or waiver would be based, and additional refunds or waivers as appropriate shall be made with respect to other shipments in the manner prescribed by the Commission in its order approving the application: *And provided further,* That application for refund or waiver must be filed with the Commission within one hundred and eighty days from the date of shipment.".

Mr. STEVENS. Mr. President, this amendment provides a compromise of the final remaining issue between the legislation reported by the Commerce and Judiciary Committees. It concerns the filing and enforcement of tariffs. Adoption of this compromise I think would permit us to proceed with this long overdue legislation.

The Judiciary Committee amendment would revise some of the provisions of the Commerce Committee bill to in effect repeal the requirement that carriers publicly file and adhere to tariffs. Probably no amendment has been more contentious or divisive. The intent of the amendment, like all others proposed by the Judiciary Com-

mittee and accepted by the floor managers of S. 47, is to promote competition. There is widespread concern that instead the amendment would result in discrimination against small ports and small businesses, preclude enforcement against foreign shipholders, and disadvantage U.S. exporters.

Although there has been some support for the Judiciary Committee's position, the amendment has been strongly opposed by the U.S. ports, the carriers, U.S. labor, and others involved in this issue.

Given this impasse, it seems to me the sensible approach is to compromise and simply retain existing law without change while proceeding with the rest of the changes in the Shipping Act that are widely supported by all of the affected parties. While existing law with regard to this subject may not be perfect, it nonetheless does provide a strong basis for compromise and agreement among the affected parties and no one can assert injury by preservation of the status quo on this subject.

Mr. President, the amendment in the second degree that I have offered will preserve the existing provisions of the Shipping Act that have been in effect since 1963. I believe that this compromise can effectively settle this issue now between the Commerce Committee and the Judiciary Committee and it should enable us to join together and support this much needed legislation.

What this amendment does is to delete the Commerce Committee provisions with respect to tariff filing and enforcement and reinstate paragraph 3 of section 18 of the existing law which the Commerce Committee had stricken and inserted other language in lieu of that existing provision. All other changes in this amendment are strictly of a conforming nature, and as I said the intent of it is to preserve existing law and to preserve the interpretation of existing law as it has been provided in the past under the Shipping Act.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, the Judiciary Committee offered 15 amendments to this bill which we feel are in furtherance of the public interest. Fourteen of these amendments have been accepted and adopted today.

I rise in opposition at this time to the amendment offered by the distinguished Senator from Alaska to UP amendment No. 4 which is one of the amendments in the Judiciary Committee's package and shall make a very brief reply.

Although some have characterized it as a compromise on the issues of tariff filing and enforcement, unfortunately it is not. The issue raised by this amendment is clear: Should there continue to be tariff filing and enforcement of tariffs by the Federal Maritime Commission? The Stevens amendment says yes; the Committee on the Judiciary says no.

Before adopting the committee amendment, which the Senator from Alaska now seeks to amend, the Judiciary Committee studied this matter thoroughly. Both the administration and a unanimous Federal Trade Commission support our committee amendment and not the Stevens amendment thereto.

While I understand the desire of the Senator from Alaska to preserve the status quo regarding tariff filing and enforcement, I cannot support his amendment. It directly conflicts with the Judiciary Committee's resolution of this difficult policy question and would serve to undermine the strength and effect of our effort to address the antitrust implications of S. 47. It is my belief that the Judiciary Committee amendment is in the public interest, without being amended by the Stevens amendment.

Mr. President, I must urge the defeat of the amendment by the distinguished Senator from Alaska.

The able Senator from Utah (Mr. HATCH) will speak briefly in behalf of the Judiciary Committee on this subject.

I now yield to the distinguished Senator from Utah.

Mr. HATCH. Mr. President, I have been concerned about the committee's jurisdiction of this bill. However, at this particular point in the proceedings, it is not my important consideration. I really have to offer my support to what has been referred to as Senator THURMOND's "tariff filing and enforcement" amendment.

Under current law, carriers are permitted to participate in conferences which set the terms and prices for the carriage of sea cargo. The Federal Maritime Commission (FMC), however, must review these agreements to determine if they are "contrary to the public interest." Only after the FMC has determined that the anticompetitive restraint is required by a serious transportation need, is necessary to secure important public benefits, or is in furtherance of a valid regulatory purpose of the Shipping Act, will antitrust immunity be granted for the activity. The agreement is then filed with the FMC which has the responsibility for enforcing it.

While these prices filed by the conferences are called tariffs, it should be noted that the FMC has no role in setting prices. The carriers alone determine the rates which their conference will file. And if there is some wrong committed by a carrier offering a discount from the tariff filed by his conference, it cannot be considered a wrong committed against the Government, or against shippers, or against consumers. At most, it is a wrong committed against the members of the conference who agreed to fix prices at a different level.

What we have here is price fixing par excellence. What we have here are cartel members being able to tell everybody else to get lost, and that concerns me a great deal.

S. 47 eliminates the FMC's "public interest" review of proposed agreements. And instead, the bill grants blanket antitrust immunity, with two very limited exceptions, to any agreement which carriers choose to reach. At the same time, S. 47 provides that the agreements will continue to be filed with and enforced by the FMC.

According to the House report filed on last year's version of this bill, the Department of Transportation has stated that the United States is "the only country on Earth that polices the price-fixing agreements of ocean carriers." And "if the rest of the world can price fix, without government help, why can't we?"

Mr. President, I object to the anticompetitive provisions of this bill, on which I elaborated in my opening remarks, but my objection is greatly multiplied against the provision of this bill which requires the U.S. Government to enforce price-fixing agreements.

I understand that U.S.-flag carriers oppose this amendment. Let me ask what industry would not want cartel authority, and then have the backing of their government in enforcing that cartel's agreements. These conferences have there own enforcement mechanisms and if the cartel members cannot hold together, a problem currently besetting the OPEC cartel, then let the members compete, and let consumers benefit.

Additional views in the House report state that U.S.-flag carriers demand Government enforcement of their cartels, because without such Government backing, their foreign competitors would cheat on the conference price. The report continues:

> Yet, these carriers tell us that the purpose of the conference as an institution is to allow for greater efficiencies so that goods can be transported at competitive rates. We are not asked to endorse the conference system so that monopoly overcharges may be exacted from the American people. We support the conference system for their benefit. So if the U.S. flag carriers are correct, foreign competition should not be a problem so long as we treat ocean carriers within our jurisdiction in the same manner that foreign governments treat ocean carriers within their jurisdictions. If the U.S. flag carriers are incorrect and the purpose of this legislation is to support monopoly tariffs, then "cheating" by those who want to cheat will continue, coaxed by market forces, yet either undetected in the maze of our over regulation or unreachable beyond our jurisdiction. Not only is it true that the FMC should not enforce tarifffs, it is true that the FMC cannot enforce tariffs.

The Judiciary Committee "tariff filing" amendment supports these views. This amendment would not remove the FMC authority to safeguard against predatory pricing, unjust discrimination, or other potential abuses of monopoly power. But, the amendment, approved unanimously be the Judiciary Committee, would remove the Federal Maritime Commission from the job of enforcing price-fixing agreements among ocean carriers. Without this Judiciary Committee amendment, ocean carriers not only would have complete immunity from antitrust laws, but, also, they would have the Federal Government seeing to it that no carriers offered discounts from the fixed price.

The Reagan administration and the unanimous Federal Trade Commission strongly support the Judiciary Committee amendment, as our chairman of the Judiciary Committee has stated on the floor. Testimony submitted by the Department of Transportation, on behalf of the administration, states:

> The Administration is . . . strongly opposed to the provision of S. 47 that would continue to require the filing of tariffs and their enforcement by the Federal government. The government has no business enforcing the prices fixed by a private producer group.

I could add to that that the Government has no business enforcing private agreements made by a cartel for the purpose of fixing prices, to the detriment of consumers in the United States.

Thomas J. Campbell, speaking on behalf of the Federal Trade Commission—consisting of three Republicans and two Democrats—also testified on this point. Mr. Campbell stated that:

> If it is necessary to grant antitrust immunity to these shipping cartels, then it would seem highly desirable that the FMC's authority over tariff filing and tariff enforcement be repealed.

This amendment is also supported by exporters and importers, farmers, consumer groups, and the American Association of Retired Persons.

Finally, I should like to once more commend the chairman of the Judiciary Committee for his sponsoring this amendment in the full committee, and for advocating this amendment on behalf of the Judiciary Committee before the Senate today. I urge my colleagues to support this vital amendment, and to oppose any effort to undermine its intent.

Furthermore, I understand that if the Stevens amendment should happen to be adopted rather than the amendment of the chairman of the Judiciary Committee and the full Judiciary Committee in support thereof, we would just go back to the same system, whereby the Federal Government would be sanctioning and enforcing private cartel agreements that are made to the detriment of individual consumers throughout the United States—not only consumers but also those who do shipping on a positive basis. I think this is wrong. I believe this undermines the very basis of the antitrust laws. It really takes away the protections that consumers should have.

I urge all Senators to vote for the amendment of the distinguished Senator from South Carolina.

Mr. GORTON. Mr. President, the retention of tariff requirement is not only widely supported by the vast majority of all interests, carriers, labor unions, ports, and most shippers, but it is a procompetitive rather than anticompetitive feature of the present regulatory system and of S. 47.

I should emphasize most strongly that should S. 47 not pass, tariff filing and enforcement will continue along with the many other features of the present law which not only hobble competition but which consistently add to the costs of ocean transportation on the part of both American importers and exporters.

It is the purpose of the distinguished Senator from Alaska (Mr. STEVENS) and his amendment to retain existing requirements not to move to a new and untried system in the field of regulation of ocean commerce.

The 68 days of hearings on shipping reform legislation which have been held by the Commerce Committee in recent years show broad and deep support for tariff requirements. Speculative arguments have been advanced that tariff requirements are anticompetitive, but they are pure speculation and they have brought forth no evidence to support those contentions. To the contrary, tariff requirements interact with other provisions in S. 47 in a manner which both promotes competition and provides certainty in the uncertain world of international trade.

The following points make clear that tariff requirements should be retained.

First. Tariff requirements promote competition by providing the shipping public with information on carrier rates and the services included in such rates. This information facilitates comparison shopping by shippers and the development of new price offerings by any carriers which discover that they are not competitive with the tariffs of other carriers. Information is the key to competition.

Mr. President, I wish to reemphasize that point. Competition is not possible in the absence of information as to what prices are. Tariff filing and enforcement simply see to it that every potential shipper can find out what the price of the carriage of goods are and can enforce that price against predatory activity in favor of its competitors. If a shipper does not know which carrier offers the lowest rate, that low priced carrier has no more than a random chance of getting that shipper's business. The tariff system, thus, promotes competition by facilitating the activity of information.

Second. Tariffs also facilitate Federal Maritime Commission enforcement of critical procompetitive provisions of the S. 47, such as the prohibitions against predatory pricing, unreasonable boycotts, and against conferences engaging in practices other than those authorized. Open and widely publicizing the tariff terms under which ocean transportation services are offered is the best protection against anticompetitive or predatory conduct.

Third. Tariffs facilitate enforcement of the antidiscrimination provisions of the legislation. From tariffs, both shippers and the Federal Maritime Commission are more readily able to determine the existence of discriminatory practices and file complaints and take other enforcement actions.

Fourth. Abolition of tariff requirements has almost no support from persons engaged in the real world business of ocean shipping.

And I wish to emphasize that this does not only apply to carriers but to most shippers as well, as well as to the other professions which are intimately involved in ocean shipping.

Fifth. Tariffs involve more than just rates, but also set forth what is included in these rates. Loading and unloading practices, demurrage, and other key components of a complete rate/service offering are reflected in tariffs. Thus, without tariffs, the Federal Maritime Commission would be restricted, compared to the present, in its ability to exercise its authority with respect to conference efforts to collectively set conditions of service. The Federal Maritime Commission would be hindered in measuring the effect of concerted activities with respect to rates and/or services in the competitive environment.

Sixth. The availability of tariff information is critical to ports. Decisions to invest millions of dollars in port facilities depend on information as to the demand for those facilities. The competitive status of carrier rates for service to a particular port and to competing ports is probably the critical indicator of demand for a port's services and the need to modernize a port's services.

Seventh. It should be noted at this point that this Judiciary Committee amendment does not affect the controlled carrier provisions of this act. Those provisions apply to carriers which are owned by various foreign flags including Eastern bloc nations which will be required to follow tariffs in any event. Precisely the rationale for requiring them to continue to file their tariffs apply to competition on the part of privately owned carriers,

both those under the American flag and those under foreign flags.

Eighth Tariffs are the key to enforcement of the provisions of the bill against secret rebating.

Ninth. Under S. 47, there is complete opportunity for ocean carriers and conferences, other than controlled carriers, to reduce tariff rates without Federal Maritime Commission approval. Yet those who would abolish tariff requirements appear to be saying little more than that ending tariff requirements would promote rate competition. Thus, those opponents of tariff requirements do not appear to recognize that, under this legislation, tariff rate reductions can be implemented on a moment's notice, only increases in rates are delayed in implementation. Thus, the secret rebating which would certainly result from the abolition of tariff requirements—rebating which appears to be all but advocated by the opponents of tariff requirements—is not needed to promote price competition. Secret rebating is simply an abuse that handicaps the ability of American carriers to compete fairly, under a bill which already allows price flexibility.

In addition, of course, secret rebating will almost exclusively be directed at large shippers and not against small shippers whose interests are so strongly advanced by this legislation. Further, the bill adds numerous devices such as service contracts and loyalty contract reforms to further enhance price competition.

Tenth. Tariff requirements are the handle by which the Federal Maritime Commission regulates the right of carriers to serve the U.S. trades. For severe violations of the law, the Federal Maritime Commission may suspend a carrier's tariffs. Since tariffs must be on file as a prerequisite to a service being offered, suspending a carrier's tariff is a straightforward and workable way of insuring compliance with the law, as the suspension of the tariff bars the offering of the service. The opponents of tariff filing have developed no substitute for this remedy, which is an important part of the bill's overall regulatory scheme. Those who would abolish tariff filing would allow illegal rebaters and predatory carriers to abuse the privilege of serving American ports with impunity.

An excellent analogy and precedent in this respect is the Airline Deregulation Act of 1978. In that act, Congress deregulated the air transportation industry. The objectives were to introduce competitive forces into the air transportation industry as much as possible. That act provided that in domestic air transport, carriers would no longer be required to file tariffs. Despite the extensive changes Congress made in the economic regulation of domestic air transportation, after lengthy debate and study, Congress continued the tariff filing and enforcement requirement in international air transportation when it passed the International Air Competition Act of 1980. International carriers by air are today required to file tariffs with the Civil Aeronautics Board, and those tariffs are subject to suspension by the Board.

S. 47 will follow the international aviation precedent if the Stevens amendment is adopted. Senator STEVENS' amendment is a compromise, and simply retains existing law without change. While existing law with regard to this subject may not be perfect, it nonetheless provides a basis for compromise. The existing tariff system works. American carriers, labor, and ports are unequivocally opposed to eliminating tariff filing and enforcement.

I wish simply once again to emphasize the fact that in the deregulation of air transportation Congress quite consciously sought not to end tariff filing and enforcement in international air transportation. It did so because customs in other countries are radically different from our own, and because many air transport companies serving international routes are owned by the nations in which they are located.

Precisely the same condition exists in the transportation by sea. It is an entirely different kind of business than is domestic trade by air, by rail, or by truck, and precisely the justifications which remain for requiring tariff filing and enforcement and nondiscrimination on the part of international air carriers apply with equal or greater measure in the transportation of goods by water.

Mr. METZENBAUM. Mr. President, will the Senator from Washington yield for a question?

Mr. GORTON. The Senator will.

Mr. METZENBAUM. The Senator from Washington has stated at an earlier point, and states once again, that labor supports this amendment—I am speaking about the Stevens amendment, that labor supports the Stevens amendment.

My understanding is that the AFL-CIO has a neutral position on the overall subject. My further understanding is that Mr. Frank Drozak, the head of the Maritime Trades Department of the AFL-CIO said in connection with this bill generally:

> While the regulatory bill may help the liner operators, it will also assist the foreign operators as well.

He was speaking about the bill last year.

> This is basically a housekeeping chore which will not develop the American maritime industry, will not create one new job, and will not reduce the unemployment problem of this country. Passage of this bill will increase the unemployment of American seamen, shipyard workers, and American supply businesses and will siphon off American taxes abroad.

In view of that statement and in view of the fact that Mr. Dennison, legislative counsel of the AFL-CIO, has advised me directly that the AFL-CIO has no position on the bill, would my good friend from Washington indicate on what basis he represents to the Senate that labor sides with supporting the Stevens amendment?

Mr. GORTON. I thank the Senator from Ohio for his question.

I would, in response, read into the RECORD at this point a copy of a letter which I hold in my hand, the heading of which is "AFL-CIO Maritime Committee, The Voice of Maritime Labor, 100 Indiana Avenue NW., Washington, D.C. 20001," and which is dated February 23, 1983, less than 1 week ago, which is addressed Senator PACKWOOD and reads as follows:

FEBRUARY 23, 1983.

Senator BOB PACKWOOD,
Russell Senate Office Building
Washington, D.C.

DEAR SENATOR PACKWOOD: We understand that during consideration of S. 47, the Ocean Shipping Act of 1983, the Judiciary Committee will be offering an amendment to eliminate the liner operators' current requirement of filing their tariffs with the Federal Maritime Commission and the F.M.C.'s authority to require compliance with such tariffs.

The AFL-CIO Maritime Committee has actively supported this legislation for several years but we are absolutely opposed to this Judiciary Committee amendment that would eliminate these requirements.

We respectfully urge your support for the defeat of this amendment.

Sincerely,

TALMAGE E. SIMPKINS,
Executive Director.

Mr. METZENBAUM. Is it not the fact that the AFL-CIO Maritime Committee is not actually affiliated with the AFL-CIO, and that on—I have in my hand a letter dated December 14, 1981, in which the Maritime Trades Department of the American Federation of Labor and Congress of Industrial Organizations wrote to Members of the House saying as follows:

> For your information, we would like to advise you that the only official representatives of Maritime Trades Department, AFL-CIO, who will be working on legislative matters on Capitol Hill are • • •

and then they list seven different names, one of which is not Mr. Talmage Simpkins, executive director, and it does not show anywhere in his letter any talk about the AFL-CIO Maritime Committee which, it is my understanding, is sort of an ad hoc committee for management and labor and not the official voice of the AFL-CIO?

Mr. GORTON. I simply answer the Senator from Ohio by stating that the quotation he has made is now, I believe—was it in 1982 or 1981?

Mr. METZENBAUM. The official statement as to who speaks for the

maritime trades is dated December 14, 1981. The statement of Mr. Drozak was made, I believe, in a speech, if my recollection serves me correctly—it was made on October 14, 1982, in connection with this matter.

So we have the AFL-CIO Maritime Committee representing their opposition to the Judiciary Committee amendment but that, if you will notice, even their stationery does not indicate that it is officially affiliated with the AFL-CIO or that it has authority to speak for it; whereas the Maritime Trades Department stationery indicates who has authority to speak for the AFL-CIO, and it does not list that group nor does it list Mr. Simpkins.

I am representing—and I would like the attention of my friend from Washington for 1 minute—to the distinguished Senator from Washington that Ray Dennison, the official spokesperson for the AFL-CIO has told me that labor, the AFL-CIO, does not have a position with respect to this legislation; and I am further representing that as of last Friday Mr. Dennison indicated to my staff that the only people who had authority to speak for the AFL-CIO were the seven people listed here:

Frank Drozak, President.
Jean F. Ingrao, Executive Secretary-Treasurer.
Marianne Rogers, Political Director.
Elizabeth Coker, Legislative Representative.
Frank Pecquex, Legislative Representative.
Mark Reihl, Legislative Representative.
Fred Somers, Legislative Representative.

And, therefore, I do not believe the AFL-CIO—in fact I do not have to say I do not believe, I feel certain in stating correctly that representing the position of the AFL-CIO is that of a nonposition.

Mr. GORTON. With respect to the distinguished Senator from Ohio, in the formal part of my remarks before he interrupted me with this question, I referred to organized labor. I did not refer specifically to the AFL-CIO, although the letter I have just read to the Senator does come from the AFL-CIO Maritime Committee.

I also point out to the Senator that both the statement of December 1981 and oral statements of last fall on the part of Mr. Drozak obviously do not apply to the Judiciary Committee amendment with which we are dealing at the present time because abolition of tariff filing was not included in any of the bills which were considered by the 97th Congress.

It was not until a meeting of the Judiciary Committee 6 days ago on last Tuesday that this became an issue. Obviously, in a period of 6 days the formal endorsing council of the entire AFL-CIO would not have an opportunity to take a position on a particular amendment. A group which is very, very intimately involved in the maritime trade on behalf of maritime labor has done so. I have read it into the RECORD, and I suppose that the summary is the letter which I have read on the correspondence which the Senator from Ohio has read into the RECORD must stand for whatever weight either of them may carry in the debate.

Mr. METZENBAUM. I agree.

Mr. GORTON. Mr President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

Mr. LONG. Mr. President, I send an unprinted amendment to the desk on my own behalf and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair will advise the Senator there are two amendments currently pending.

Mr. LONG. Mr. President, I ask unanimous consent that they be temporarily set aside and that I may call up my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 20

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 20.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 95, line 7, strike out "or".

On page 95, line 11, strike out the period and insert in lieu thereof "; or".

On page 95, between lines 11 and 12, insert the following:

"(D) permits United States flag carriers to carry cargo of the importing or exporting foreign state which would otherwise be unavailable to such carrier, or available only on unequal terms by reason of the cargo reservation laws or trading practices (governmental or otherwise) of such state, provided that such agreement is not unjustly discriminatory among United States flag carriers."

On page 76, line 23, following "state,", insert the following: "and recyclable or recycled metals and metal bearing materials, waste paper or paper waste,".

Mr. LONG. Mr. President, it would be simpler to explain this amendment because the meaning is not clear from the mere reading of it.

I would like to explain the second part first because it is easiest to explain. The second part of the amendment, Mr. President, seeks to treat recyclable materials on the same favorable basis as is the case with regard to the virgin materials with which they compete and is the case with regard to bulk cargo. In other words, as S. 47 now stands, the tariff filing requirement would not apply to certain virgin materials nor would it apply to bulk products. It would apply, without this amendment, however, to wastepaper, let us say. Wastepaper competes with pulpwood, it competes with wood chips, and it is only fair that it be treated on the same basis, that we not discriminate against recyclable materials in favor of their competing virgin material counterparts.

In fairness to the recyclable industry, it should be treated on the same competitive basis as is the other.

The first part of the amendment, Mr. President, deals with the matter of equal access and pooling agreements. This part would require approval of equal access and pooling agreements entered into by U.S.-flag vessels out of necessity by reason of the cargo reservation laws or trading practices of other foreign countries. There was a provision in the House-passed compromise bill of last year that is essential to our carriers in the United States-South American trade. This amendment would add such a provision to S. 47.

The problem is the cargo reservation laws and trading practices of most Latin American countries restrict access to national flag and associated carriers. To establish associated carrier status, some U.S.-flag carriers have, of necessity, become a party to several equal access or pooling agreements in these trades. The effect of S. 47 without the language included in my amendment is to penalize U.S.-flag carriers by excluding them from trades where these restrictive laws of other countries exist.

Adoption of this amendment would merely require approval of equal access pooling agreements entered into by U.S.-flag carriers out of necessity by reason of the cargo reservation laws or trade practices of foreign countries.

Mr. President, this amendment is necessary in order to avoid doing unnecessary damage to American carriers who, through no fault of their own, are required to comply with the laws of foreign countries.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, as chief sponsor and manager of the bill, I simply wish to say that the dedication of the Senator from Louisiana to reforms of the Ocean Shipping Act of 1916 has existed far longer than I have been a Member of the Senate and has been highly principled and ef-

fective during that period of time. I wish to associate myself with his remarks and agree to the amendment.

Mr. LONG. I thank the Senator very much. I hope the amendment will be agreed to.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (UP No. 20) was agreed to.

Mr. LONG. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GORTON. Mr. President, what is before the Senate?

The PRESIDING OFFICER. The amendment of the Senator from Alaska in the second degree is pending to the amendment of the Senator from South Carolina in the first degree.

Mr. GORTON. I thank the Chair.

UP AMENDMENT NO. 19

I will now summarize and conclude my reasons for supporting the amendment of the distinguished Senator from Alaska.

The Judiciary Committee amendment would repeal existing law requiring international ocean carriers to publicly file and adhere to tariffs. In contrast, the Commerce Committee would require that this basic element of common-carrier service be preserved, just as it has been in international aviation.

The amendment of the Senator from Alaska would resolve these differing positions by simply restating current law word-for-word. When the General Accounting Office study required under S. 47 is completed, Congress can then determine the proper ways to proceed on this highly controversial issue.

Tariff filing and enforcement is important:

First, the Antitrust Subcommittee of the Judiciary Committee of the House recommended tariff filing and enforcement as far back as 1962, and it has been the law since. The "Stevens' compromise" would simply continue that law.

Second, the amendment assures that similarly situated exporters and importers receive equal treatment in ocean shipping. It is the basis of the principle that ocean cargo carriers are common carriers. As such, they are prohibited from unjustly discriminating against other carriers, ports, or shippers. Without tariffs, these prohibitions are largely unenforceable, since secrecy will be encouraged.

Third, one of the major purposes of S. 47 is to assure that American companies engaging in international commerce are subjected to the same ground rules as their foreign competition. Unless there are tariffs to suspend, the enforcement mechanisms requiring foreign carriers to obey U.S. law become meaningless.

I wish to substantially emphasize that latter point. One of the great paradoxes and problems of the present law is the fact that the antitrust laws, to the extent that they apply in this area, are imposed and enforced almost solely against American-flag carriers. In curing that, we do not wish to go into a worse discrimination under which American carriers can effectively be regulated by the Federal Maritime Commission, but their foreign competition cannot be.

Eliminating tariff enforcement unfairly penalizes U.S.-flag carriers. Foreign shipping companies would be able to practice under-the-table pricing prohibited to American carriers under the Foreign Corrupt Practices Act, and engage in price discriminations unfair to American importers and exporters. The best way to prevent this is to require both United States and foreign carriers to adhere to their published rates.

Fourth, it has been argued that private enforcement actions are all that is necessary. However, this simply will not work. First, there is the extreme expense of bringing court action and conducting proceedings in foreign countries, as well as in U.S. courts. The biggest companies can afford it, but small shippers cannot. Second, foreign countries have often come to the aid of their carriers, and have prevented the application of U.S. laws in their countries. This is why some foreign carriers would not mind if the Judiciary repeal of tariff enforcement is successful. It is only the American interests that oppose the Judiciary amendment.

Mr. President, that concludes my remarks on the amendment of the distinguished Senator from Alaska. Unless there are other Members who wish to speak to the Stevens amendment, I believe that we have the majority leader coming to the floor to propound a unanimous-consent request which has met with the approval of all parties.

I note the Senator from Ohio standing. Does he wish to speak on the Stevens amendment?

Mr. METZENBAUM. Yes; I do, Mr. President.

Mr. GORTON. I yield the floor.

Mr. HATCH. Mr. President, will my friend from Ohio yield to me?

Mr. METZENBAUM. Yes.

Mr. HATCH. I should like to speak after the Senator from Ohio speaks.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I think we ought to understand what this amendment is all about. First, the suggestion has been made that all we are doing is putting back the current law. We cannot put back the current law in view of the fact that this bill is being amended in a host of different areas.

Back in 1962, there was a whole Federal Maritime Commission regulatory scheme. Since then, we have deregulated most transportation industries because of a renewed faith in the free enterprise system's ability to set prices. What this amendment will do is make it possible to deregulate ocean shipping, permit the cartels to engage in price fixing and in territory agreements, and permit pooling of revenues, but it will leave the worst aspect intact. It will make it possible for the Federal Maritime Commission to enforce the price-fixing aspect of the cartel.

We have to understand what that is all about, Mr. President. What we are really saying is that the cartel may operate that we are going to legalize by other sections of this measure. We are going to violate the antitrust laws—that is bad enough; then we are going to say that the Federal Maritime Commission is going to enforce the cartel agreement.

You have to understand why the cartel wants the enforcement. They want it because they are concerned that some members who agreed to the cartel will in fact violate the cartel. Ask the OPEC nations what that is all about. They found they did not have a means to provide enforcement, and the shipping industry does not have a means to provide enforcement. So if you accept the Stevens amendment, which the Judiciary Committee unanimously opposes, what you are in effect doing is saying that the Federal Government will be the policeman to enforce the cartel arrangement.

As Tom Campbell of the Bureau of Competition, speaking on behalf of all five members of the Federal Trade Commission, stated:

> There are two aspects, the posting of tariffs and the enforcement of tariffs. The Congress should know that the United States would in adopting this legislation join only 1 other county, Canada in having an arm of the government enforce cartel tariff agreements. None of the European trading partners have them. So, to whatever extent the argument is that it is necessary to help us come to the same footing as our European trading partners, I do not see why an arm of the Federal Government should be involved in enforcing prices fixed by this cartel. Let the cartel enforce its own prices if we must have a cartel.

The chairman then said to Mr. Campbell:

> Mr. Campbell, would you recommend that tariff filings and enforcement provisions be amended out of this bill?
>
> Mr. CAMPBELL. I would.

The Thurmond amendment would take it out. The Stevens amendment would put it back in.

Mr. President, I think it is important that we give some heed in this instance, and I would not always agree to that but in this instance I do, to the position of the Reagan administration, because the Reagan testimony submitted by the Department of Transportation on behalf of the administration stated as follows:

The administration is strongly opposed to the provision of S. 47 that would continue to require the filing of tariffs and their enforcement by the Federal Government. The Government has no business enforcing the prices fixed by a private producer group.

Mr. President, I do not always agree with the Reagan administration, but when they are right, they are right. In this instance, they are right. Therefore, in my opinion, the Stevens amendment should be rejected.

Eliminating this function does not expose the carriers to antitrust liability. It merely means if they want to price fix, they have to do their own supervision. If they want to have a cartel, which I oppose, then I, sure as the devil, do not believe that the U.S. Government ought to be providing enforcement of that cartel's provisions.

I yield the floor to the Senator from Utah.

Mr. HATCH. I thank the Senator.

The analogy has been made to the Airline Deregulation Act of 1978. It is argued that, although domestic airline transportation has been deregulated, tariff filing and enforcement was retained for international air transportation. However, there are significant differences between the manner in which tariffs are computed and filed in the international airline context and the tariff filing and enforcement proposed in this legislation for ocean common carriers. These differences make the analogy completely invalid, in my opinion.

First of all, before airlines are even permitted to meet to discuss tariffs, they must ask permission of the Civil Aeronautics Board. The ocean carriers, by contrast, are allowed to meet in their conferences any time they please to discuss and fix prices. Once the airlines have settled on an agreed tariff, they are required to submit it to the CAB. At that point, the tariffs are subject to challenge on the basis of reasonableness, and the CAB will review them if any such challenge is made. Even after the CAB has approved the reasonableness of the tariff, the President of the United States may exercise a veto power to disapprove the fare. In fact, the President exercised this power just last week in refusing to permit a proposed Canadian fare schedule to go into effect.

By contrast, S. 47 provides for no review of the tariffs set by the private conference cartels. There is no procedure for challenging these tariffs and certainly no evaluation of their reasonableness by either the CAB or the President.

Thus, the analogy to international airline tariffs is fatally flawed. It is one thing to permit the Government to enforce a tariff that it has had the opportunity to review for reasonableness, and to veto if it is unreasonable. It is quite another matter to have the U.S. Government enforce a price agreement reached by private parties in an unregulated cartel. This is going too far, and this is the practice that the Judiciary Committee amendment would stop.

Mr. President, I do believe that Senator THURMOND is more correct on this amendment and that we should support him.

In addition, I would like to put into the RECORD at this point a letter from Allen R. Ferguson, representing the National Institute of Economics and Law, and a statement in opposition to the proposed Ocean Shipping Act of 1983, S. 47, where the undersigned economists strongly oppose the Ocean Shipping Act of 1983.

I might just mention that the economists who signed this statement are:

Prof. Walter W. Heller, regents professor of economics, University of Minnesota, former Chairman, President's Council of Economic Advisers.

Sydney L. Jones, resident scholar, American Enterprise Institute, former Assistant Secretary of Treasury, 1974–77 and former Assistant Secretary of Commerce, 1973–74.

Dr. Thomas Gale Moore, senior fellow, Hoover Institution.

Prof. Lester Thurow, Massachusetts Institute of Technology.

Prof. James Tobin, Yale University, Nobel laureate, former member, President's Council of Economic Advisers.

Allen R. Ferguson, chairman, National Institute of Economics and Law.

I ask unanimous consent that this letter and this statement be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL INSTITUTE OF ECONOMICS AND LAW,
Washington, D.C., February 25, 1983.

Hon. ORRIN HATCH,
Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR HATCH: I understand that you are deeply concerned about some aspects of the currently pending "Ocean Transportation Shipping Act of 1983." Consequently, I am sending you the enclosed statement in opposition to the bill, signed by six prominent economists extending over a very broad range of policital identities.

You may recall that I met you in an entirely different context, when I was serving as co-chairman of the Social and Economic Committee of the Food Safety Council two years ago.

Sincerely,

ALLEN R. FERGUSON.

STATEMENT IN OPPOSING TO THE PROPOSED "OCEAN SHIPPING ACT OF 1983," S. 47

We the undersigned economics strongly oppose the Ocean Shipping Act of 1983. This is one of many special-interest bills intended to reduce the effectiveness of the antitrust laws. It would provide the ocean liner cartels (called "conferences") virtually total exemption from the antitrust laws and would annul much of the present limited governmental regulation. Yet it would require the United States Government, through the Federal Maritime Commission, to enforce price regulation established by private parties—giving their price agreements the force of law.

The bill would permit the cartel carriers to increase profits in ocean transportation and to protect those profits from competition. Higher liner rates can be expected to follow, and would, in some markets, be much higher.

The bill would impose on American consumers, workers, importers, farmers and other exporters, a burden of subsidizing foreign liner companies. In recent years, approximately three-quarters of the liner traffic has been carried in foreign-flag ships; consequently, the vast majority of the increase in profits would go to foreign companies, with a small fraction to American operators.

The bill provides a bail-out for an inefficient American industry—a bail-out that is provided through a kind of off-budget financing by permitting more monopolistic pricing as, in effect, concealed subsidies. The legislation would, thus, create legal, unregulated monopolies in an essential service that handles import and export shipments amounting to $148 billion in 1981. Although the bill is alluded to as a regulatory reform bill, it, in fact, undermines the premise of deregulation, namely that, freed of regulation, industries will be competitive—not cartelized.

The bill would serve special interests, predominantly foreign ocean liner operators, and would reduce jobs, make American products less competitive abroad, raise consumer prices at home, and require the government to enforce cartel agreements. It should be defeated.

RECESS FOR 1 MINUTE TO GREET GOV. MARIO CUOMO OF NEW YORK

Mr. BAKER. Mr. President, I observe that the distinguished Governor of the State of New York is in the Chamber. We welcome the Governor of New York. I ask unanimous consent that the Senate now stand in recess for 1 minute so that Members may greet him.

There being no objection, at 4:21 p.m., the Senate recessed until 4:22 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. CHAFEE).

SHIPPING ACT OF 1983

The Senate continued with the consideration of the bill, S. 47.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I have just a brief summary before we finish

dealing with the amendment of the Senator from Alaska.

It is a paradox that the position for which both the Senator from Utah and the Senator from Ohio argue is one which would penalize the American merchant marine very, very significantly by causing easy enforcement against it of the requirements of ocean conferences here in the United States, but would make it almost impossible to enforce the same agreements against its foreign competition.

It is also a paradox that they argue for a system which would very significantly penalize the small- and medium-size shippers of the United States who, in the absence of filed tariffs, will have no convenient or practicable way of knowing whether or not they are getting the best possible deal. Nothing in the amendment by the Senator from Alaska prevents competition. As a matter of fact, it enhances competition because the most important factor in competition is knowledge about the competing parties. Tariffs provide that knowledge. There is so much independent action at work and so many services offered by nonconference carriers that the provisions of the Stevens amendment requiring the filing of tariffs mean that that competition is real for the small- and medium-sized shippers. This competition is real; it is not based simply on a theory on behalf of the sponsors of the Judiciary Committee amendment, a theory which would harm small shippers as well as the American merchant marines.

With that, Mr. President, I believe that debate on the so-called Stevens amendment is at an end.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, there are a number of other amendments to be dealt with; and as Members will recall, there is an order for a cloture vote at 4 p.m. tomorrow, with the time between 2 and 4 p.m. to be equally divided and under the control of the majority leader and the minority leader or their designees. What that means is that we may be hard-pressed to finish before 4 p.m. all the items I am about to describe and enumerate, unless we come in much earlier than had been contemplated originally.

I am about to propound a unanimous-consent request, and I earnestly invite the attention of Senators who are involved, because I have to do it on a piecemeal basis. But I believe we can arrange the schedule of the Senate for the remainder of this day and tomorrow in a way that will accommodate the needs of all Senators.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I might say that Senators should be reminded that we originally had an order for 11:30 a.m. tomorrow, and this is advancing the time for the convening of the Senate until 9 a.m.

ORDER FOR THE RECOGNITION OF SENATOR CHAFEE ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order the Senator from Rhode Island (Mr. CHAFEE) be recognized for not to exceed 15 minutes on special order.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

Mr. BAKER. The occupant of the Chair is most gracious in that respect.

ORDER FOR A PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that following the execution of the special order there be a period for the transaction of routine morning business not to extend past 9:45 a.m. with statements limited therein to not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, at the conclusion of the period for the transaction of routine morning business and not later than 9:45 a.m. the Senate will resume consideration of the pending business, which is S. 47.

UNANIMOUS-CONSENT REQUEST—S. 47

Mr. BAKER. Mr. President, I ask unanimous consent that after the Senate resumes consideration of S. 47 tomorrow there be 10 minutes of additional debate on the Stevens amendment to be equally divided between Senator STEVENS and the distinguished Senator from——

Mr. METZENBAUM. Senator THURMOND.

Mr. BAKER. Yes; between the distinguished President pro tempore, Senator THURMOND, and the minority leader or his designee.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. BYRD. Mr. President, reserving the right to object, I cannot agree to any further items on this until I check with my colleagues which I will do as rapidly as possible.

Mr. BAKER. Very well.

Mr. President, let me describe then what else I wish to do and perhaps the minority leader can consider the whole thing in sequence.

I withdraw the request in respect to the 10 minutes on the Stevens amendment in view of the reservation of the minority leader.

Mr. President, I would propose that when the Senate resumes consideration of S. 47 on tomorrow there be 10 minutes of additional debate on this Stevens second-degree amendment dealing with tariffs to be equally divided between the distinguished Senator from South Carolina (Mr. THURMOND) and the minority leader or his designee.

I further propose—and may I say this is not a request; I am describing it for the RECORD and for the minority leader and other Senators—that after the disposition of the Stevens amendment by vote on or in relation to that amendment the Senate then proceed immediately to vote on the underlying Thurmond amendment on or in relation to the underlying Thurmond amendment without further debate, amendment, or point of order.

Mr. President, after the disposition of the Thurmond amendment, I would then ask that the Senate turn to the consideration of the Hatch amendment on which there would be a time agreement of 30 minutes equally divided to be controlled by the distinguished Senator from Utah and the distinguished minority leader or his designee, on or in relation to the Hatch amendment.

After that, Mr. President, I would propose the Senate turn to the consideration of the Boschwitz amendment dealing with cargo preference on which there would be 40 minutes equally divided, and that after the disposition of the Boschwitz amendment the Senate turn to the consideration of seven Metzenbaum amendments dealing with: First, Justice/FTC revenue pool injunctions; second, loyalty contract limits; third, strike section 18 (FMC exemption powers); fourth, strike section 8(a)(2) (immunity for agreements "reasonably" with section 4 or section 18); fifth, add "among themselves" to section 4(a)(6); sixth, strike section 8; and seventh, intermodal.

I propose that on each of those amendments there be a 20-minute time limitation to be equally divided and controlled by the distinguished Senator from Ohio (Mr. METZENBAUM) and the manager of the bill or his designee.

Mr. President, after the disposition of the Metzenbaum amendment there would be two Stevens amendments on which there would be 30 minutes

equally divided, one dealing with the tariff issue in the first degree and the other dealing with the tariff issue in the nature of a substitute.

Mr. President, I would further propose that on any other amendments that may be offered there be a 20-minute limitation equally divided and to be controlled by the sponsor of the amendment or the manager of the bill except in those cases where the manager of the bill and the sponsor of the amendment are on the same side in which case the control would be in favor of the minority leader or his designee.

Mr. President, I would further propose that in view of the number of amendments that we have listed and the possibility of others that we reclaim from the previous order the hours between 12 and 2 when the Senate otherwise would be in recess but with the proviso that no rollcall votes would occur during that time.

Mr. President, that describes the nature of the rather extensive unanimous-consent requests that I would wish to propound, and I understand fully the requirement of the minority leader that he would wish to put that through his clearance process.

Mr. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. BYRD. This request would mean first of all that a rollcall vote could occur as early as 10 a.m. tomorrow morning.

Mr. BAKER. Yes; it would mean that.

Mr. BYRD. Second, perhaps I did not hear the majority leader, but I did not hear the majority leader make reference to the Hatch amendment.

Mr. BAKER. I believe I did. I think there was to be 30 minutes equally divided.

If I did not, Mr. President, I would include that. It is listed as on my list here as the third action proposed to be taken, that is, the Stevens second-degree amendment, then action on the underlying Thurmond amendment in the first degree, and then the Hatch amendment.

Mr. BYRD. I misunderstood the majority leader to say that was the Boschwitz amendment.

Mr. BAKER. The Boschwitz amendment is to be fourth.

Mr. BYRD. I thought I heard the majority leader say Boschwitz instead of Hatch.

Mr. BAKER. I thank the minority leader.

Mr. BYRD. Anyhow, the general time limit on other amendments would include that they be germane I suppose.

Mr. BAKER. Yes, Mr. President.

Mr. METZENBAUM. Mr. President, if I may interject for a moment, since these are to be prior to cloture, they need not be germane.

Mr. BYRD. This is one on which I would not want to agree that there be 10 minutes on any amendment.

Mr. BAKER. I think the minority leader's point is well taken.

Mr. BYRD. They have to be germane. I do not think a Senator would want to agree to limit that.

Mr. METZENBAUM. May I interject?

Mr. BYRD. I am sorry I interrupted the Senator.

Mr. METZENBAUM. There is some question as to whether some or all of these amendments are or are not germane.

In order to forestall that, we want to be certain they would be taken up prior to the cloture vote.

The amendments the Senator from Ohio was offering are amendments that are very relevant and pertinent to this pending bill. They are not something totally extraneous. The amendment that the Senator from Minnesota is offering is somewhat extraneous, but I will let him address himself to that subject.

The amendment of the Senator from Utah is relevant and pertinent to this bill.

But the germaneness question and also the question of affecting the bill in two places becomes an issue, and I would hope that the minority leader would not insist upon the germaneness question because I think it would only complicate the problem rather than help to resolve it.

Mr. BAKER. Mr. President, will the Senator yield to me? I believe I have the floor.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BAKER. May I say to the distinguished Senator from Ohio his amendments would qualify in any event.

I think the observation of the minority leader is very well taken. If we are to put a time limitation of 10 minutes, we certainly ought to know what we are dealing with.

Mr. METZENBAUM. I was not addressing myself to the catchall which, I understand, the majority leader is. In the catchall, where those are not designated, those would certainly have to be germane.

Mr. BAKER. I thank the Senator, and I thank the minority leader especially for calling that to my attention and, as I said, it is very well taken.

I would propose, in making the agreement, to provide that the other amendments in which a time limitation of 20 minutes is provided must be germane.

Mr. BYRD. Yes, indeed; because any major bill could be hooked on with a 20-minute time limitation, and we are not specifying that it be germane.

Mr. BAKER. Yes; that is the request.

Mr. BYRD. The only other problem I have is the listing of the 2 hours. The majority leader has said there will be no rollcall votes. If there can be no quorum-call votes I am concerned about attendance on my side of the aisle.

Mr. BAKER. As the minority leader has stated, if we start doing anything to quorum calls by unanimous consent—and I notice the Parliamentarian tenses up, gets nervous, because quorum calls are, of course, a constitutional right of every Senator—so I will strike that section.

Let me simply say that tomorrow or this evening, if possible, when we seek this unanimous-consent agreement finally that that portion will not be in there. But tomorrow if we get in a bind I may very well wish to speak with my colleague, the minority leader, about gaining some of that time in order to do justice to all Senators who have amendments.

Mr. President, I am prepared to ask the Senate to stay in as long as it is useful, and especially until the minority leader can give us an answer on the request.

Mr. BYRD. I have one more question of the majority leader, if I may. Will it be possible or can we have assurance that all of these amendments would be disposed of before the vote on the cloture motion?

The BAKER. That is one of the reasons I wanted to reclaim the 4 p.m.

I have some Senators who have already indicated to me that they did not wish to change the 4 p.m. time. It poses a problem though, as the minority leader earlier implied, and I would suggest for his consideration one course of action in between, and that is that any votes that are stacked tomorrow—and I am not sure they will be—but if any are stacked, that they would be acted on before the cloture vote would occur. Otherwise we are going to have a moving target on a 4 p.m. cloture vote, and I think some Senators on my side—at least one Senator I am aware of—would object to changing the 4 p.m. time.

Looking at the amendments we know of now, and measuring from 9 a.m. in the morning, it looks to me as if we can finish easily. But if there is a rain shower of unknown amendments tomorrow we may be in a different situation.

I might also say I would provide in the request that any amendments to those unknown amendments in the second degree or points of order, if the same are submitted to the Senate, would have a time limitation of 5 minutes equally divided.

Let me change that to no second-degree amendments to the unknown amendments.

Mr. BYRD. Very well, Mr. President. We will see as quickly as we can what the reaction is.

Mr. BAKER. I thank the Senator. I wonder if there is any Senator willing to go forward at this time to conserve time and offer an amendment for debate at least?

Mr. GORTON. Will the majority leader yield?

Mr. BAKER. Yes.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. The Senator from Utah (Mr. HATCH) left his statements on his amendment with me to present. The Senator from Alaska, however, hopes to persuade the Senator from Utah not to bring his amendment up until after cloture is granted, with the agreement to have it considered germane, and I am attempting to contact the Senator.

Mr. BAKER. Mr. President, I am sure that cannot be done except by unanimous consent, and I am not at all sure that any request to qualify any further amendments after cloture would be granted.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

Mr. GORDON. Mr. President, earlier this afternoon the question was raised by the Senator from Ohio about the degree of organized labor opposition to the Thurmond amendment and support for the Stevens amendment. The Senator from Ohio quite properly at that point stated that the SIU and Mr. Drozak had not taken any position on the Stevens amendment.

Since the discussion of that point, I have been informed that Mr. Drozak and SIU, which represents the other group of maritime labor from those represented in the letter which I earlier read into the RECORD, do indeed strongly support the Stevens amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, what is the question before the Senate?

The PRESIDING OFFICER. The amendment offered by the Senator from Alaska (Mr. STEVENS) to the amendment offered by the Senator from South Carolina (Mr. THURMOND).

Mr. BAKER. Yes.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, first I ask unanimous consent that the Stevens second-degree amendment to the Thurmond amendment be temporarily laid aside at the conclusion of this request and that the Senate proceed to the consideration of the Hatch amendment on which there will be a 10-minute time limitation to be equally divided and on which no second-degree amendment would be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask that if a rollcall vote is ordered on or in relation to the Hatch amendment, it be sequenced to occur after the disposition of the Thurmond first-degree amendment which will be included in the request I am about to make.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I ask unanimous consent that when the Senate resumes consideration of S. 47 on tomorrow there be a 10-minute time limitation of the Stevens second-degree amendment to the Thurmond amendment to be equally divided with the time under the control of the distinguished Senator from Alaska and the distinguished Senator from South Carolina.

Mr. President, I further ask unanimous consent that after the disposition of the Stevens second-degree amendment, the Senate then proceed to vote on the underlying Thurmond first-degree amendment on which no debate would be in order and no further amendments would be in order.

I ask unanimous consent, Mr. President, that after the disposition of the Thurmond first-degree amendment, the Senate then proceed according to the order previously entered to dispose of the Hatch amendment on which debate has already been concluded; that after the disposition of the Hatch amendment, the Senate then proceed to the consideration of the Boschwitz cargo preference amendment, on which there will be a time limitation of 40 minutes equally divided under the control of the distinguished Senator from Minnesota and the minority leader or his designee; that after the disposition of the Boschwitz amendment, the Senate turn to the consideration of seven Metzenbaum Justice-FTC amendments on which there will be a time limitation of 20 minutes each equally divided, with control of the time allocated to the sponsor of the amendment (Mr. METZENBAUM) on the one hand and the manager of the bill on the other. The seven amendments are: First, the Justice-FTC revenue pool; second, loyalty contract limits; third, to strike section 18 FMC exemption powers; fourth, to strike section 8(a)(2), immunity for agreements reasonably within section 4 or section 18; fifth, add "among themselves" to section 4(a)(6); sixth, to strike section 8, and seventh, intermodal.

Mr. President, the order in which the Metzenbaum amendments were listed would not necessarily be the order in which they are presented, and I ask unanimous consent that the distinguished sponsor of the amendment may choose among that list the sequence in which he wishes to present them.

I further ask unanimous consent, Mr. President, that all amendments prior to cloture must be germane and limited to 20 minutes equally divided to be controlled by the sponsor of the amendment and the manager of the bill and provided that no second-degree amendment prior to cloture shall be in order.

Mr. BOSCHWITZ. All other amendments would have to be germane. Is that correct?

Mr. BAKER. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the minority leader for his cooperation in working this out.

I also thank all Senators who have participated in the formulation of this agreement. I believe it will materially assist in the final disposition of this matter.

Mr. President, there is another matter: The order provides that the Hatch amendment will be presented at this time. It is not anticipated that it will take more than 5 minutes. It is anticipated that a rollcall vote will be asked for, and then, under the order, will be sequenced in to occur tomorrow after the disposition of the Thurmond first-degree amendment.

I remind Senators that we convene tomorrow at 9 a.m. Under this formulation, it is entirely possible that votes will occur early, perhaps before 10 a.m. in the morning. Senators should take account of that very real possibility.

Mr. BYRD. Mr. President, I ask the majority leader if he does not mean to limit an amendment to 20 minutes after cloture has been invoked.

Mr. BAKER. No; the request, I hope, was recorded by the Official Reporter of Debates that all other amendments prior to cloture must be limited to 20 minutes.

Mr. BYRD. Must be germane and limited to 20 minutes?

Mr. BAKER. Must be germane and limited to 20 minutes.

Mr. BYRD. And no second-degree amendments are in order.

Mr. BAKER. That is correct.

Mr. BYRD. After cloture, amendments will not be limited to 20 minutes, because they will not be germane after cloture, and I take it that the majority leader would allow second-

degree amendments to come in under cloture if they are timely filed.

Mr. BAKER. Mr. President, the way the request was put, it could perhaps be read either way, so let me clarify it this way:

All this agreement pertains to proceedings precloture. The postcloture provisions will be dealt with according to the provisions of rule XXII.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, I ask unanimous consent that the request be modified to reflect that language.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the minority leader.

Now, Mr. President, I am prepared to yield the floor so that the distinguished Senator from Washington may call up the Hatch amendment, which I understand he has been requested to do.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. I thank the majority leader.

The text of the agreement follows:

S. 47 (PRECLOTURE AGREEMENT)

Ordered, That when the Senate completes morning business on March 1, 1983, it resume S. 47, with 10 minutes equally divided in the usual form on the Stevens second-degree amendment, to followed by a vote thereon, to be followed by an immediate vote on the Thurmond first-degree amendment and a vote on the Hatch independent action amendment. Following this vote the Senate will proceed to the Boschwitz cargo preference amendment for 40 minutes equally divided in the usual form, to be followed by seven Metzenbaum amendments for 20 minutes each dealing with the following topics: Justice/FTC revenue pool; loyalty contract limits; strike section 18 (FMC exemption powers); strike section 8(a)(2) (immunity for agreements reasonably within section 4 or section 18); add "among themselves" to section 4(a)(6); strike section 8; and intermodal.

All other amendments offered prior to cloture must be germane and will be limited to 20 minutes equally divided in the usual form, with no second-degree amendments in order.

UP AMENDMENT NO. 21

(Subsequently numbered amendment No. 469.)

(Purpose: To promote the right of independent action)

Mr. GORTON. Mr. President, I have the rather interesting duty at this point of presenting Mr. HATCH's remarks on behalf of his amendment and then debating against him.

On behalf of the distinguished Senator from Utah (Mr. HATCH), the proponent of this amendment, I call up the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON), for Mr. HATCH, proposes an unprinted amendment numbered 21.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 65, line 17, through page 66, line 21, strike all of subsection (d), and insert on page 65, line 17: "(7) permit any member to take independent action on any rate, charge, classification, rule, or practice."

On page 66, line 22, strike "(e)", and insert in lieu thereof "(d)".

On page 67, line 4, strike "(f)", and insert in lieu thereof "(e)".

On page 67, line 20, strike "(g)", and insert in lieu thereof "(f)".

(By request of Mr. GORTON, the following statement was ordered to be printed in the RECORD:)

● Mr. HATCH. Mr. President, in remarks offered at the beginning of debate on this bill, I expressed my respect for our free enterprise system, and for the role of our antitrust laws in insuring competition. As a basic economic policy, the Congress of the United States has time, and time again, rejected the notion of giving control of commerce to either Government or to private cartels. We have viewed our antitrust laws as a practical expression of our concern for economic democracy, and have actively sought to insure the efficient operation of these laws. In part, our antitrust laws are designed to prevent individuals or firms from so controlling a part of commerce that they are able to substitute that control for the independent allocation of resources achieved by a competitive marketplace.

It is not without reason that our laws have created a presumption against the policy of permitting cartels. Cartels, by their very nature, promote price-fixing conspiracy. Fixed prices discourage competition. And without competition, consumers suffer.

Mr. President, this bill is designed to reduce competition among carriers. It is designed to permit conduct which, in other industries, would subject perpetrators to civil and criminal penalties. And proponents of the bill cite the current state of deterioration within the industry as a justification for protection. The GAO has concluded that "the U.S.-flag liner fleet is not in a state of general distress significant enough to justify a major revision of the Shipping Act." Other proponents argue that conforming to worldwide shipping practices dictates the need to rewrite our laws.

Beyond the idealogical convictions of the opponents and proponents to this bill, however, is the consensus that the monopolistic power granted to conferences must be balanced by some countervailing means. The bill proposed shipper's councils as one means for giving shippers a combined influence in consulting with conferences.

In principle, the Judiciary Committee members unanimously agreed that expanding the potential abuses of cartelization to another industry only multiplies the flaws of this bill. The Judiciary Committee amendment, eliminating the exemption for shipper's councils has earlier been adopted. Thus, even in the eyes of many proponents of this bill, the balance of monopolistic power, tilts in favor of the carrier cartels. To legislate monopolistic power should not be lightly undertaken. But to invite abuse of that power, by not providing for countervailing power, is unconscionable.

Mr. President, we have before us an amendment, under my sponsorship, which permits competitive market forces to counterbalance the potential monopolistic abuses of the carrier conference system. I urge my colleagues to adopt this amendment.

Under section 5(d), S. 47 currently allows carriers to take independent action, that is, to deviate from the conference tariff, only when a conference loyalty contract is in effect. This severely restricts the right of independent action, and would allow a conference to avoid independent action altogether simply by eliminating loyalty contracts. There is no valid justification for tying the right of independent action to the existence of loyalty contracts. My amendment would simply allow carriers to take independent action regardless of the existence of loyalty contracts. This amendment would permit the benefits of conference membership while its provisions for competition would insure the adoption of the lowest practicable tariff rates. This approach has the support of shippers, consumers and has been endorsed by at least one carrier.

The idea is not novel. Four years ago, I served as a member of the National Commission for the Review of Antitrust Laws and Procedures, along with other Senate colleagues. That Commission recommended the right of independent action which I am proposing today. The Commission recognized that:

. . . While this Commission is not now in a position to recommend that the ocean shipping immunity be abolished, it does appear that the immunity could be narrowed in some important respects to increase competition and enhance efficiency, in the absence of overriding defense or diplomatic considerations.

Specifically, each ocean shipping conference member should have a right of independent action. At present, conference agreements may preclude individual conference members from offering tariff rates and conditions which differ from those adopted by the conference. If a right of independent action were guaranteed in the Shipping Act, as it is in the Interstate Commerce Act, conference members could opt out of particular conference rates without losing their conference membership.

Subsequently, this same call for an expanded right of independent action was issued by the U.S. Department of Justice. The 97th Congress hearings record on this matter cites a Department of Justice study which concluded that a statutorily mandated right to independent action was necessary to offset the potential abuses presented by a conference system.

In its recent testimony before the Senate Judiciary Committee, the FTC concluded that a right to independent action was a procompetitive measure which S. 47 rightly used to offset the potential abuses of the dual rates permitted by loyalty contracts. One recent witness before pointed out the deficiencies of the proposed independent action provisions in S. 47. He views the appearances of the proposed language as "deceptive." He points out, that:

An individual member of a conference does not have any general right of independent action, such as that provided in the Staggers Act to railroads in rate bureaus. Conferences are required to permit independent action only if they already have loyalty contracts in effect and if the proponent of the independent rate goes through a number of steps, subjecting its proposal to scrutiny and comment by all other members of the cartel. After such review, it can put an unpopular rate into effect, if it still wants to do so. However, conferences frequently operate on a principle of unanimity; therefor, the gains from any prospective unpopular independent action must be weighed against the costs of alienating other members of the conference, any one of which could veto some other future proposal. This suggests that truly independent action is most unlikely.

I fully agree with this statement, and urge any other Senator who supports competitive forces moving our economy, to support this amendment.●

Mr. GORTON. Mr. President, on my own behalf and on behalf of the Commerce Committee, I oppose this amendment, which would mandate that all members of conferences in international trade be permitted a right of independent action. The most fundamental reason for which I oppose this proposal is that the debate already has been carried on.

Were this bill to include a closed conference system—that is to say, a system in which conferences of carriers in a given trade could exclude any other new carriers from joining—a right of independent action would make a great deal of sense; in fact, it might well be vital.

On the other hand, we have included only open conferences in this bill. An open conference is one which any carrier wishing to join at any point can join.

We also have allowed a right of independent action in those conferences which utilize loyalty agreements, agreements under which a given shipper agrees to send all his goods under the flag of a single carrier or a single conference. This has been slightly amended by a Judiciary Committee amendment, already accepted, allowing 5 percent of any shipper's goods to be sent by other carriers or by other conferences.

The Commerce Committee in considering S. 47 agreed that requiring open conferences to permit all members to deviate from established rates by independent action would seriously weaken the ability of these conferences to maintain rate stability in the trades in which they operate. Rate stability is, of course, a major reason for permitting these cartels which would otherwise be prohibited by our antitrust laws.

While a requirement for independent action may possibly provide some short-term benefit to shippers if it resulted in lower freight rates, the Commerce Committee believes that in the long run it is more likely to be detrimental to shippers by undermining rate stability and causing reduced service if carriers are driven out of the trade for economic reasons. Major shippers could fully utilize their bargaining power by playing off one carrier against another. That, in turn, would lead to erosion of the conference system and the concurrent tariff structure which preserves the stability of the liner trades, and would leave only a few strong carriers surviving.

Finally, it should be noted that one of the specific policy objectives and standards of approval specified in the bill is "comity with nations engaged in trade with the United States."

In commenting on legislation in 1980, which was similar to S. 47, and opposing the requirement of independent action, the representative of the vessel operators of our major trading partners stated:

This requirement (independent action) runs counter to the declaration of policy of the bill. If anything, it would seriously inhibit development and maintenance of an efficient, innovative, and economically sound ocean transportation system. Independent rate action between member carriers of a conference is totally destructive of the fundamental principles of liner conferences and the concept of mutual consultation between the conferences and shipping councils. Independent rate action does not only put a conference at risk but also potentially prejudices the interests of smaller shippers, as it is evident that the so-called independent rate action device will favor shippers who control large blocs of cargo; triggering the mechanism would be tantamount to legalizing unofficial rebating.

While there may be a need for independent action in certain trades where independents have made significant penetration and therefore caused disruption, the imposition of such a requirement upon all trades to satisfy unique problems creates too great a risk to the stability and durability of the conference system.

By retaining open conferences, permitting greater flexibility in carrier-shipper arrangements, permitting shippers' councils with the right to negotiate on general rate levels, and providing presumptive approval for conference agreements which provide for independent action, the Commerce Committee believes the legislation achieves its objectives more effectively than the alternative proposed by Senator HATCH.

I emphasize again that the benefits from this amendment would be highly disproportionate. They would go to large shippers who are already well able to use their bargaining position to get the lowest possibile rates, and they would freeze out small shippers even in connection with the joint ventures which they are permitted under this bill.

It is for precisely that reason that when representatives of all shippers' organizations, large and small, met with carriers to deal with and to negotiate this provision, they came up with the provisions in S. 47 which allow a certain degree of independent action but not complete independent action among conference members.

Finally, I emphasize that in almost every trade there are nonconference carriers and various independent operators who are not bound by any conference agreement whatsoever. This is already a highly competitive business.

The effect of the Hatch amendment would be, after a short period of time, to make it a less competitive rather than a more competitive business, and for that reason the amendment should be defeated.

Mr. BAKER. Mr. President, it is my understanding that the distinguished Senator from Utah does wish a rollcall vote on this amendment.

Mr. GORTON. It is my understanding as well.

Mr. BAKER. I thank the Senator.

Mr. President, in view of that I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, under the order previously entered, since the yeas and nays have been entered, the vote on this measure will occur in sequence after the disposition of the Thurmond first degree amendment on tomorrow. Is that not correct?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. Mr. President, I yield back the remainder of the time if any is remaining on the amendment on this side.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have here a series of requests that have been cleared by the distinguished minority leader, and I am going to put them in just a moment and then ask the Senate to go out until tomorrow.

ORDER FOR A PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business to extend not past the hour of 6 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

WEST VIRGINIA SENATE REQUESTS MUTUAL AND VERIFIABLE NUCLEAR WEAPONS MORATORIUM PROPOSAL TO U.S.S.R.

Mr. BYRD. Mr. President, I submit for the RECORD the following resolution adopted by the Senate of West Virginia.

SENATE CONCURRENT RESOLUTION No. 8

Whereas, the greatest challenge facing the earth is to prevent the occurrence of nuclear war by accident or design; and

Whereas, the nuclear arms race is dangerously increasing the risk of a holocaust which would be humanity's final war; and

Whereas, the United States of America and the Union of Soviet Socialist Republics already have a combined total arsenal in excess of fifty thousand nuclear weapons; and

Whereas, an all-out nuclear exchange between said two nations would result in the deaths of millions of Americans and Soviet citizens and would result, throughout the entire world, in death, injury and disease on a scale that has no precedent in the history of human experience; and

Whereas, there is widespread agreement that the United States of America and the Union of Soviet Socialist Republics currently have equal nuclear fighting capabilities with neither nation having a distinct advantage over the other; and

Whereas, an immediate halt in the testing, production and deployment of new nuclear weapons would help secure world peace and avoid the possibility of a nuclear conflagration and would save our nation, over the next ten years, billions of dollars in military expenditures, which savings could be used to help balance the federal budget, reduce taxes, create employment and improve human services; therefore, be it

Resolved by the Legislature of West Virginia, That the Congress of the United States adopt a resolution requesting that the President of the United States propose to the government of the Union of Soviet Socialist Republics a mutual and verifiable nuclear weapons moratorium by which the said two nations would agree to halt immediately the testing, production and deployment of all nuclear warheads, missiles and delivery systems; and, be it

Resolved further, That the West Virginia delegation to the Congress of the United States introduce such a resolution or join with other members of Congress in its introduction; and, be it

Resolved further, That copies of this resolution be sent to the Clerk and Speaker of the United States House of Representatives, the Secretary and Majority Leader of the United States Senate, and to each member of the West Virginia Congressional delegation.

CARIBBEAN BASIN INITIATIVE

Mr. PERCY. Mr. President, yesterday the President resubmitted the Caribbean Basin Initiative to the Congress. The new bill reflects changes introduced by the House of Representatives after its detailed consideration of the trade and tax portions of the CBI last year. The House voted 260 to 142 last December 17 in favor of this legislation.

I hope this Chamber will be able to give the same positive consideration to the CBI as soon as possible this year. I know we will have the full cooperation of Senator DOLE's Finance Committee in this effort.

Our neighbors in the Caribbean Basin are waiting for us to give them this very strong sign of our interest and concern for their future development and prosperity. As President Luis Alberto Monge of Costa Rica said to the Foreign Relations Committee when he visited us last summer:

We have been waiting for 34 years for this kind of trade opportunity with the United States. It is vital to us for our future economic prosperity.

My good friend and neighbor, Robert Anderson, is our Ambassador to the Dominican Republic. In a recent speech before the American Chamber of Commerce in Santo Domingo, Ambassador Anderson described both the tremendous economic and political changes that have been taking place in the Dominican Republic since 1965 and the number of ways the Dominican Republic can take advantage of the enhanced trade opportunities represented by the CBI. A related article appeared in the Wall Street Journal describing the very difficult situation in which the Dominican Republic finds itself today and the crying need for the many changes that it has undertaken.

The Dominican Republic has a dynamic President in Dr. Salvador Jorge Blanco and a capable government ready to make the changes necessary to take full advantage of the Caribbean Basin program. Our support for the CBI will be a sign to them that we in the United States are behind their efforts to create democracy and prosperity in their country, our neighbor.

Mr. President, I ask unanimous consent that these two items be printed in the CONGRESSIONAL RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE DOMINICAN REPUBLIC: A CORNERSTONE FOR CARIBBEAN STABILITY

Ladies and Gentlemen: I am honored to be with you today, and am most grateful to your President and his Board of Directors for inviting me to meet with you. Initially, I thought it unwise, if not hazardous, to meet with such a prestigious group only five months after my arrival in the Dominican Republic. I decided, however, to follow your tradition of having the American Ambassador set the stage for the Thanksgiving holiday, counting on an ample feast tomorrow to enable you to recover.

Today I would like to share with you my appreciation of the mutuality of interests in Dominican/American relations and the outlook for the future in this important part of the world. I would never presume to be able to cover all the problems or identify the answers to them. I hope, however, to discuss some areas of interest to us all during our few moments together. And if this stimulates Americans and Dominicans alike to consider a positive and realistic approach to the stable future in the Caribbean which both our nations seek, I will have accomplished a limited, yet important objective.

Let me state at the outset that when President Reagan telephoned me to ask if I would serve as his representative in the Dominican Republic it was one of the most unforgettable moments in my 37 years of diplomatic service.

Unforgettable not just to be asked to serve my country once again as an Ambassador, but primarily because I would have a chance to become associated with a country so important to mine in so many ways. As I began to prepare myself for this assignment last Spring, it became abundantly clear that this was to be one of the greatest and most pleasurable challenges of my career. Senator Charles Percy, the Chairman of the Foreign Relations Committee of our Senate, succinctly stated the nature of this challenge in my confirmation hearings last May before his Committee. He said, "In short, you will have an opportunity to affirm and reaffirm our country's commitment to the political and economic development and well-being of the Dominican Republic and the countries of the Caribbean." What more welcome objective could one have than to have the honor of cooperating with one of our closest friends to achieve a common goal—stability and peace in the Caribbean. I pledge to you now that our Embassy will continue working diligently towards this imperative for both our countries.

I would now like to comment on the fundamentals of our relationship. One may ask if or why the Dominican Republic is of great importance to the United States. The answer is clear. The very location of your country on one of the most important strategic and commercial arteries for the United States speaks for itself. Nearly half of our trade, two thirds of our imported energy and more than half of the strategic minerals necessary for our industrial production pass through the Caribbean. Further, and this is not generally recognized, 70 percent of the reinforcement and resupply of Europe by the United States in the event of a NATO conflict will have to be transported from our ports in the Gulf of Mexico through the Caribbean and on to Europe.

As President Reagan noted in addressing this subject at the Organization of American States in February of this year: "Make no mistake. The well-being and security of

our neighbors in this region are in our own vital interest."

Aside from your geographic location, your country is, in my view, important to the United States for reasons which have to do with ideas and ideals, not numbers. They deal basically with what your nation stands for: democracy and freedom. No matter what those opposed to these tenets may proclaim, democracy can and will flourish. Indeed, it is flourishing in many places around the world: not just in Northern Europe and North America, but in Asia and in Africa, and here in the Caribbean as well.

Your nation and your leaders should rightly be proud of what has been accomplished in building democratic institutions in your country. Your constitution provides a valuable framework for elections, for the adoption of laws, for the administration of government, for a system of justice, and for the protection of human rights. That structure has been tested this year, and has been proven strong. We in the United States rejoice in this further success in consolidating a vibrant democratic system emerging from the will of the people and responsive to it. It is precisely because of this favorable evolution that the Dominican Republic is a cornerstone for stability in the Caribbean.

As the largest democracy in this critical area, your country stands as a model towards which the aspirations of all who love freedom can turn. I am thinking in particular of the many new or emerging nations in the Caribbean who are or will be deciding on their own systems of government. From my own travels during the past three years visiting many of these island states I can tell you that each passing year they look more and more towards your country in weighing what political and economic system best suits their needs. I think we would all agree, however, that the Dominican Republic's contribution to regional stability will be in direct proportion to the role it chooses to play in the area. For this reason, my Government welcomes the intention of the new Administration of President Salvador Jorge Blanco to reactivate or establish diplomatic relations with its democratic neighbors in the Caribbean. I see this as another sign of your Government's recognition that stability in this area is in its national interest, and of a readiness to assume greater responsibilities to contribute to it in a meaningful way. For this we are grateful.

The pursuance of a successful foreign policy rests first and foremost on political and economic stability at home. As we all know, the state of an economy is more often than not crucial to preserving political stability. That this is recognized by the new Administration is clear. Your President has already taken a series of difficult and courageous steps to surmount the pressing financial problems facing your nation. These, coupled with the reports of positive discussions with the International Monetary Fund and the Work Bank, make it difficult for me to share the views of the school of doom and gloom about this country's economic future. Rather, I am confident that with perseverance in the effort to obtain the badly needed infusion of additional foreign exchange, the short term difficulties will be overcome. I am not alone here. In his remarks in Santo Domingo on October 28, 1982, Henry Wallich, a distinguished Governor of our Federal Reserve Board, noted: "Temporary difficulties are likely to remain just that—temporary. They will scarcely be visible on the upward-sweeping graph of long-term trends."

One may rightly ask why I am optimistic about the long-term economic future of the Dominican Republic. A nation dependent on imported energy at prices set abroad. A nation dependent for its foreign exchange in large measure on the export of five or six primary products whose prices are also set in the world market place. My optimism stems from the fact that I have served in or worked with nations where there was little hope, no matter what effort and imagination their leaders could apply. Resources above the subsistence level were just not there. By comparison, I am now in a garden of Eden. The Dominican Republic has ample resources, human and material, for future development. Let us examine briefly this potential.

First, because of its political stability in recent years, because of its nearness to the United States market, and because of its long friendship with our country, the Dominican Republic is becoming more and more attractive to American investors. Your nation is truly a rare asset in this world. Where else, for example, would an American visitor ask me where he could invest in the Dominican Republic simply because, as he put it, "I love this country"? He really had no clear idea of where to invest. He just wanted to help a very special country which he felt deserved his support. Needless to say, our American Chamber will do its best to assist this friend of the Dominican Republic.

Secondly, the areas for potential growth in this country are clear and, as your Government has indicated, seem best fostered by private enterprise drawing on domestic and foreign investments. Agrobusiness and tourism are of particular interest and should prosper. Why, for example, could not the Dominican Republic export far more specialty fruits and vegetables to our market than now? Your okra and snow peas are the best. And then there is top quality pineapple which is being exported in limited quantities, but could supply an almost limitless market covering the Eastern part of the United States. From what I have been told there is room for expanding the export of processed and semi-processed tropical and other foods. With these opportunities go challenges, such as the development of clear Dominican product-recognition on the part of the American consumer, reliability as high quality, dependable supplier to meet the needs of an exigent market, and the ability to compete in the all-important area of transportation. These then would appear to be illustrative of areas worthy of exploration. And not to be omitted as part of the industrial potential is the twin plant concept. From conversations I have had with American firms, I can attest that there is an active interest here.

A third factor which would could benefit your country's agricultural and industrial development is the existence of a market which has not yet been exploited to its full extent. I refer to the English, French and Dutch-speaking islands of the Caribbean, which are so dependent on food imports. The aggregate population is over 11 million people. One may conservatively add another 11 million representing the annual influx of tourists. These 22 million potential customers then could be an interesting market for reasonably priced household items, shoes and clothing, and for non-traditional agricultural exports from the Dominican Republic. There may be good and sufficient reasons, but I am not clear, for example, why so many fruits and vegetables come from Central America via the United States for eventual consumption in the Eastern Caribbean. This may also merit examination, perhaps leading to positive and profitable action. Then again, I was perplexed to learn that no Dominican fruits and vegetables go to the Turks and Caicos, only 125 miles away. This currently represents $15 million annually in cash for some enterprising supplier.

With this brief overview of your country's potential, it is clear that there are no quick and easy answers. But it is equally clear that with realistic priorities, hard work, determination and persistence success may be achieved. Towards this end you may be assured that the United States will always be ready to play its part.

For the past twenty years, as you know, we have provided bilateral economic assistance in addition to our contributions to such multilateral aid efforts as the World Bank and Inter-American Development Bank. From 1975 through 1978 our direct bilateral assistance averaged $16.9 million per annum. During the following four years the average was $57.7 million. We fully expect our help to continue at about this level for the foreseeable future, even though the level of our assistance worldwide may drop slightly.

While our government-to-government aid programs can be helpful, particularly technical assistance, they should be considered a supplement to meeting the overall needs of a developing country. Experience in other areas has taught me one basic fact. It is the participation of private enterprise and the infusion of its capital that are the major determinants for economic development. It is in this spirit that our assistance can be most accurately viewed.

This spirit has been most recently expressed by the Caribbean Basin Initiative of President Reagan. The economic assistance part of this Initiative has been enacted into law. The two other parts are even more important than the first. These cover areas of great potential importance to your Government in its efforts to increase employment and export-oriented industries. The first represents a move never before taken by our country—to grant one-way free trade into our market for twelve years. Under this proposal, all imports from the nations included in the Initiative—other than textiles which are governed by international agreements—would enter duty free. For the Dominican Republic, 87 percent of its products now enter duty free. One might therefore ask what then is the real benefit to your country with only the remaining 13 percent of your exports being reduced to duty free status. In point of fact it will be of great potential benefit. Take sugar, for example, for which the Dominican Republic is now our number one foreign supplier. The reduction of the duty from 2.8 cents a pound to zero under the CBI will mean an increase of revenues of over $27 million. With regard to other products, there were 178 dutiable items imported into the United States from the Dominican Republic in 1980, for a total value of $74 million. A quick review of the Dominican share of the U.S. import market for these items indicates a handsome potential to capture a larger percentage of our market when certain items become duty free for your country, but not for those outside the CBI region.

The third part of our President's Initiative, designed to encourage American private investment in the Caribbean, would grant a 10 percent tax credit on any such in-

vestment. Despite the number of items already on the Congressional agenda, I am hopeful that these remaining sections of the CBI will be passed in the special session of our Congress which begins in less than a week. The visit, four days ago, of members of the Ways and Means Committee of our House of Representatives makes me even more hopeful. President Reagan has made it clear that he considers this a top priority for consideration by our legislators, and plans to do everything possible to encourage its passage.

One brief comment related to the tax incentive for American investors may be helpful. When considering this section of the CBI, our Congress will wish to know the views of our foreign friends towards American investments, and specifically what measures they wish to take in this regard. With regard to the Dominican Republic, it comes as no news to you, I am sure, that American businessmen have long questioned the merits of Law 861 as a stimulant to foreign investments. They now look forward to a change which might more realistically reflect the stated desire of the new Administration to attract increased foreign investment. As a final point on this important subject, I would only say that our Embassy will take every step possible to encourage investments by our countrymen, and that I will personally participate in this endeavor. Our effectiveness in these efforts, however, will only be determined when the investment policy of your Government is articulated.

After listening to these few thoughts, I hope you may now understand my enthusiasm for this assignment, my optimism about the future of the Dominican Republic, and the importance of your nation's role in the Caribbean for our mutual security. Remarkable strides have been made in the past twenty years. From a nation then, with one agronomist, two industrial engineers, and three economists, one has only to observe your country today. From a nation then, with virtually no middle class, observe it today. From a nation then, with most of its industrial production concentrated in the hands of one man, observe it today. From a nation then, with freedom of expression and freedom of assembly excluded, observe it today. From a nation then, with democratic institutions little more than symbols, observe it today. From a nation then, unconcerned with human rights, observe it today. And finally, from a nation then, oblivious to the needs and aspirations of the individual, observe it today: a vibrant democracy, a cornerstone for Caribbean stability.

Thank you very much.

[From the Wall Street Journal, Jan. 7, 1983]

CARIBBEAN CRISIS: DOMINICAN REPUBLIC, MIRED IN DEEP SLUMP, TURNS TO U.S. FOR HELP

(By Erik Calonius)

SANTO DOMINGO, DOMINICAN REPUBLIC.—When 23,000 U.S. troops landed in this Caribbean capital in 1965, forcing an end to a four-day civil war between battling populists and military factions, a curious graffito began to appear on the city's walls. "Yanqui go home," was the first phrase, as expected. But the second part was, "and take me with you."

The message says much of the continuing love-hate entanglement Dominicans have with the U.S. On one hand, the country of 5.7 million people has embraced American culture. "Lassie," "Los Duques of Hazzard," and "Plaza Sesamo" are seen daily on TV, from the spanish-tiled suburban homes to the galvanized-steel and wood shacks that huddle shoulder to shoulder in the barrios.

Baseball is the national pastime (along with the national lottery), and close attention is paid to the 19 Dominican players in the U.S. major leagues. Dominicans travel to the U.S. when they can; many are educated in the U.S. Surprisingly, 10% of the Dominican Republic's citizens live in the U.S., mostly in New York, often mailing their money home.

HISTORY OF INTERVENTION

The bitter feelings, on the other hand, are born of the long history of U.S. intervention in Dominican affairs: the U.S. military occupation of the country from 1916 to 1924, subsequent U.S. corporate ownership of 80% of the agricultural lands, then the 30-year iron rule of dictator Rafael L. Trujillo, whose repressive government was backed for many years by the U.S. government.

Most Dominicans remember the bloody occupation of 1965, and the tale of a U.S. marine is still retold. "People knew him by name," says a young Dominican, pointing to the darkened outline of a grain silo overlooking Santo-Domingo. "And he stayed up there night and day with a high-powered rifle and would kill anything that stepped into the street—a person, a dog, whatever. Later, people said that he had been sent to Vietnam and was killed there."

Now it isn't civil war that is rending this land of mountains and sugar-cane fields, but the worst economic chaos in 15 years. Sugar, which dominates the Dominican economy and provides as much as 50% of the country's foreign exchange, has tumbled in price recently to about six cents a pound on the world market, or about 11 cents less than Dominicans can produce it for. Cane fields are being pulled out of production, mills are being closed, and jobless workers are walking into an economy already strapped with 30% unemployment and substantial underemployment.

EARLIER PROSPERITY

Gone are the halcyon days of the early 1970s, when the Dominican economy galloped at an 11% growth rate and 60-cent-a-pound sugar provided cash for Mideast oil and U.S. food and consumer goods. Growth now has slowed to 2%, but years of import consumption have drained the economy of its cash.

"I'm taking over the presidency at a sorry time," 57-year-old Salvador Jorge Blanco said in August as he took office. Noting that the government was already $485 million in default on its $1.2 billion external debt, the former law professor said, "We have a national economy with debts of hundreds of millions of dollars, no cash on hand, and no lenders in sight."

The Dominican Republic can't do much to influence the world price of sugar. The country's one million tons hardly make a dent in a world market that produces 90 million tons and exports about 20 million. Nor has the Dominican Republic, or any other nation, successfully persuaded the European common market to end its subsidy of European beet-sugar producers, whose five million tons on the world market have caused prices to plummet. "We should declare war on France," says one Dominican sugar producer. "They might as well be dropping bombs on us as dumping sugar."

Short of that, the Dominican Republic is turning for aid to the U.S., stressing the common interest and history of the two nations and hoping to receive preferential treatment for its sugar. The Caribbean Basin Initiative would be a good place to start, Dominican leaders say.

The Caribbean Basin Initiative—as proposed last winter by President Reagan in a good-will gesture to 28 Caribbean and Central American nations—would offer the nations 12 years of tariff-free trade with the U.S. as well as a 10% tax-credit incentive for American investors in the Caribbean Basin region. Although the legislation died in Congress during the recent lame-duck session, the president has vowed to push it back into Congress in the new year.

If passed by Congress, the measure would remove the 2.8-cent-a-pound tariff currently levied on Dominican sugar, giving the country an immediate $27 million bonus. The measure would also drop tariff from about 178 other items exported from the Dominican Republic, for another $75 million (87% of Dominican exports already enter the U.S. without tariffs). And the 10% tax investment credit would spur activity in the nation's three "industrial free zones," which employ about 9,000 workers in manufacturing operations.

Beyond the proposed measures, Dominican leaders also want to increase their quota of sugar exports to the U.S. (where government subsidies keep sugar at about 20 cents a pound) to 800,000 tons from 500,000 tons. "The United States has a responsibility to us," says Francisco Pena Gomez, the secretary-general of the governing Dominican Revolutionary Party and mayor of Santo Domingo. "If the United States cannot give preference to the trade and sugar of the Dominican Republic, then it is directly causing the ruin of democracy in the Caribbean."

Statements like that tend to hit buzzers and bells in Washington, Mr. Pena Gomez knows, particularly at a time of tumult in Central America and perceived Soviet arms build-ups in Cuba. "One may ask if or why the Dominican Republic is of great importance to the United States," American Ambassador Robert Anderson said in a recent speech here entitled "The Dominican Republic: Cornerstone for Caribbean Stability."

"The answer is clear," he said. "The very location of the country on one of the most important strategic and commercial arteries for the United States speaks for itself."

In fact, half of U.S. trade, two-thirds of imported oil and 70% of reinforcement shipments to Europe in the event of a NATO conflict must steam through the Caribbean and past the Dominican Republic. For the same strategic reasons, the U.S. has demanded Dominican Republic allegiance in the past. It occupied the small country during World War I (because of "the threat of European intervention"), supported the Trujillo dictatorship (because Mr. Trujillo was anti-Communist), and landed 23,000 troops in 1965 (on the evidence of a "list of 50 Communists" who were allegedly manipulating the civil war).

U.S. interest in the Dominican Republic is also piqued by the fragile Democratic government that has emerged there in the last five years. The election last May of President Jorge Blanco was the fifth election since the 1965 U.S. occupation. But this election and the election of President Antonio Guzman in 1978 were the first truly free transfers of power in this land that had been governed for the past 500 years by a succession of foreign powers, dictators and military juntas.

In the past five years, personal liberties have flowered. Political exiles have returned

home. Political parties (including the Communist Party) are free to organize. The military forces have been more removed from the political process. A two-party system now fights it out in Congress and in the press (whereas traditionally, the party in control simply extinguished the other party). And a middle class of entrepreneurs has gained political power.

Furthermore, in a nation where a vocal crowd will often gather around a traffic accident and where baseball umpires are given police escort past hostile fans, Dominicans have embraced a free press. The country now has seven morning daily newspapers, a noon paper, three evening papers, six TV stations and more than 50 radio stations. "There are two things every Dominican feels he could do well," one Dominican says "be president or be a newspaper reporter."

CUTTING SALARIES

But just as the country has reached this new level of personal freedom, the economic fabric is unraveling. In recent months the new president has slashed the salaries of the country's 186,000 government workers (including 40 percent pay cut he took himself) and extended the government workday by one hour. He has imposed a 10 percent tax on luxury items and pushed into Congress measures to freeze business dividends, install wage and price freezes in the private sector, and establish the first property taxes since 1965.

Mr. Jorge Blanco recently declared a ban on 150 imports, ranging from cars, tractors and trucks to pasta, peanut butter and rice. Upbraiding his countrymen for importing foodstuffs that could be grown at home, he scolded, "Let me warn you: If we don't produce enough rice ourselves from today on, we'll have to eat more of the other foods produced here, because I plan to take the necessary steps, starting today, to outlaw the importation of rice."

They were strong steps from a political leader who won the election by less than a majority and whose countrymen are more accustomed to coup than compromise. Although the country now is calm by Dominican standards, government sugar workers recently battled police over wage demands, and at the city's university a student was killed by police during demonstrations that called for a doubling of the university's budget. Whether the young democracy can withstand such pressures is unanswered. "We can live with this austerity for a time, but we have to tell people that there's light at the end of the tunnel, and hope that tunnel isn't very long," says Bernardo Vega, the governor of the country's central bank.

But even if the economy recovers, observers see the need for long-term changes. The dependence on sugar is questioned, particularly since the volatile commodity gives no stability or sturdy promise of national income from year to year. Furthermore, the U.S. is using more corn sweeteners, and the State Department says the U.S. may get by without any sugar imports in as few as five or six years.

HOW SWEET IT WAS

Sugar had been like oil to the Dominican Republic, allowing the country to import its needs without learning to develop them locally. "Over the last few years we've been able to create the illusion of being a developed country—we have the latest computers, automobles and appliances," says Felipe Vicini. "But we aren't developed at all."

Stripped of its imported goods, the Dominican Republic is essentially what it was 100 years ago—a plantation society with thousands of acres of sugar cane, some bananas and cocoa, and several gold and silver mines. Today, in this plantation society, about 6% of the population owns 40% of the wealth. Most of the people are peasants, living in rural areas where unemployment is 50%, illiteracy is 80% and many of the adults and children are malnourished. The impoverished population spills over into urban barrios, and in the city streets children beg for money, contorting their arms and legs to appear as cripples.

In the sugar fields, wages average $3.50 a day, at least during the six-month cutting season when work is available. Much of the cutting is done by Haitians, trucked into the country under contracts arranged by the Dominican and Haitian governments. Many of the Haitians never return to their impoverished homeland, however, and Dominican officials concede that some half million of them roam the Dominican countryside, often working in conditions approaching slavery.

DIVERSIFICATION FAILS

Diversification of the Dominican sugar crops into grains and vegetables has thus far failed. The soil is too poor, and water too scarce in the sugar-growing regions to support anything other than sugar cane and pasture land. And turning sugar fields into pasture land would leave most of the 90,000 sugar workers in the country jobless. Improvements have been made in the living conditions of sugar workers lately. But low sugar prices have doomed plans to modernize the industry. At Gulf & Western Industires Inc. plantations in the eastern part of the Dominican Republic, an austerity budget has been put in effect. "We've increased our oxen-driven cart operation by 25%," says Calos Moales Troncose, the president of the Dominican unit. "We are being driven back in history" because of high oil prices.

Development of free industrial zones, focused to bring U.S. manufacturing from Asian underdeveloped countries to the Caribbean, is a popular idea here. But it has its critics, "That will only encourage us to convert our economy into one where we're selling cheap labor and no other resource," argues Felipe Vicini. "Let's not use misnomers. When people talk about putting in an electronics industry in the Dominican Republic, they're talking about a packaging industry. You bring in the subassemblies, you have Dominicans put it into a chassis and into a carton and ship it out."

"And do you know what the industry will do when it finds a cheaper source of labor somewhere else?" he asks. "Just what they did in coming here: They take a wrench and undo four bolts, remove their equipment, crate it up and ship if off."

WORKING ON JOBS

But the present government can't be choosy about where it finds jobs. Santo Domingo's Mayor Pena Gomez, who 17 years ago burst into Radio Santo Domingo and called the people into the streets in insurrection against the military government, made his first declarations in office ordering trash removed from the streets and potholes filled. Meanwhile, the stairways and corridors to his office are crammed with people wanting jobs in the state's sugar industry and its collection of 30 nationalized industries (both inherited from the Trujillo regime and both bankrupt). As secretary-general of the Dominican Revolutionary Party, however, Mr. Pena Gomez has loftier goals: a $90 million program to provide 5,000 new homes, several hydroelectric dams to provide irrigated land for a new class of small farmers. Democratic socialism is the form of government he espouses, "like Sweden, Norway or France," he says.

But skeptics don't feel the country has the educational or industrial base for such a government. "This country would run better under a benevolent dictator," says Alexander Rood, a Dominican importer who feels the country will inevitably turn to one in the next 10 to 15 years. "Latin people need direction," he says, adding, "Many people still look back to the time of Trujillo as a period of great growth."

THE HONORABLE MARGARET CHASE SMITH

Mr. MITCHELL. Mr. President, I am deeply gratified to be able to inform my colleagues that one of our Chamber's most distinguished former Members has returned to the Capitol for the first time in the decade since her retirement.

I speak of former Senator Margaret Chase Smith who represented the State of Maine with integrity and distinction for 32 years, 8 in the House of Representatives and 24 in the Senate of the United States.

Senator Smith has been honored in her home State by the dedication of a library for her papers in Skowhegan, Maine. But it has been 10 years since her former colleagues and those of us, like myself, who have admired Mrs. Smith for many years, have had a chance to meet her again, here in the Capitol. The Senate is honored by her return, and I am personally deeply honored to have had the chance to arrange for her return.

I want to take the opportunity to describe what I believe was Senator Smith's most enduring contribution to the public life of this Nation. That contribution consists not of one vote or one speech but of a lifetime of service which exemplified the best kind of representation an elected official can give.

It is the kind of representation that does not shrink from confronting challenges, and that is not wearied by the daily obligations of office.

Senator Smith's career demonstrated both her ability to speak with rare courage, disdaining the risk to her political future, and also to fulfill, with perseverence, one of the most fundamental and least appreciated of Senate duties—the duty to vote. In her Senate career, Senator Smith never missed a single rollcall vote on the Senate floor, a record rarely matched. It was not until I came to the Senate myself that I understood the difficulty of achieving and maintaining that kind of record. But there is no question that the daily responsibilities, unheralded and unsung, are as much a part of representative responsibility as the great debates of our time.

It is also in the larger sense of representation that Senator Smith's career commands our admiration.

The nature of an elected official's responsibility in a democratic republic such as ours is a matter of disagreement. Does representation imply carrying out the wishes of the electorate? Or does it imply the independent exercise of one's own judgment. Everyone elected to public office has wrestled with that question, for it goes to the heart of our system of government.

It is all too easy, with the abundance of polls now available, to accept the approach that votes cast, speeches made or not made, issues addressed or avoided should reflect the views of the majority. Some would say that is the most representative form of government. A political career resting on the views of majority public opinion, aside from probably being a successful one, can be defended as a legitimate and conscientious discharge of duty.

Yet it is a paradox that those who model their actions exclusively on the popular will ultimately tend to subvert that very will. Highly popular votes can have unintended outcomes. Highly attractive programs can have unbearable costs. And highly evocative speeches can stampede the Nation in a dangerous direction.

It takes courage and a farsighted view of our Nation and its future to stand aside, to consider the implications of popular clamor, and to act against it when it is misguided.

Senator Margaret Chase Smith exemplified that kind of courage and that kind of representation for the people of her State and the entire Nation when she led the effort that ultimately returned civil political discourse to the Senate.

I am referring to the famous Declaration of Conscience which Senator Smith made on June 1, 1950, at the height of the witchhunting and namecalling that then prevailed in our Nation's political life.

That action was not one that had the support of majority public opinion. It took immense courage to speak up against a member of her own political party, at risk of being personally smeared as so many other victims of McCarthyism were smeared. That, in my judgment, was an example of the kind of representation that we should all strive to provide for those who elected us to serve.

It is a kind of representation which does not avoid difficult and controversial issues, does not back away from confronting them and dares to break with popular belief when a higher principle is at stake.

Senator Smith's career was marked by that kind of integrity, intellectual rigor, and courage.

In her service in the Senate Armed Services Committee, Senator Smith consistently spoke for and voted for a stronger America without being blind to its changing security needs. Senator Smith's was the deciding vote in the historic 1969 ABM debate, which maintained the ABM system in production. But she did not hesitate, 3 years later, to cast her vote just as clearly for the SALT I Treaty, which limited ABM defenses for the purpose of curtailing the arms race. Senator Smith was guided, not by a rigid, unyielding adherence to hardware, but rather by an unyielding adherence to the national interest.

That is the difference between the kind of representation that blindly follows every up and down of the public opinion polls and the kind of representation that looks behind the immediate popular clamor to the roots of the issue at stake. It is the kind of representation that takes political risks for the sake of enduring principles that rise above temporary political expedience. And that is the kind of representation which our people enjoyed for 32 years while Margaret Chase Smith served in the Congress.

It is all too easy in the rush of everyday business to be guided by the immediate political practicalities and the imperatives of election campaigns. But representation which sets the good of the Republic and the endurance of our political system above those immediate demands is rare and difficult. It takes courage and single-minded dedication to the greater principles that underlie service in the Senate. It cannot be better expressed than in Senator Smith's own words of 33 years ago, when she said, "I think it is high time that we remember we have sworn to uphold and defend the Constitution." Senator Smith never forgot.

I am honored to be able to announce Senator Smith's visit to the Capitol after 10 years, and to be able to express my admiration for what she has always stood for in my mind: The best kind of public service.

ELEVENTH ANNIVERSARY OF THE SIGNING OF THE SHANGHAI COMMUNIQUE

Mr. DURENBERGER. Mr. President, today we observe the 11th anniversary of the signing of the Shanghai Communique which recognized the People's Republic of China as the one and only Government of China. This is a particularly memorable occasion for me because 4 years ago today I addressed this issue in my first speech in the Senate.

This communique and the Taiwan Relations Act created a deliberately ambiguous situation. These acts recognized the legitimacy of the PRC while insuring a close and continuing friendship with Taiwan. This policy has become particularly vexsome because both share a common vision of China, both claim the same territory for China, and both adamantly refuse to consider any form of partition. This ambiguity became particularly clear when our Government entered into negotiations to sell fighter aircraft to Taiwan.

While the political and military aspects of this situation have been highlighted in the press, there is a very worrisome issue that has not received the worldwide attention that it deserves. The human rights situation in Taiwan remains as serious as it was 4 years ago, when I was prompted to speak out in the Senate. The concerns I had then are the same today. While we have guaranteed our political relations with Taiwan, we have done nothing to insure that the Government of Taiwan observes the basic human rights of its people. Today, under martial law, the people of Taiwan are denied the same rights guaranteed to the citizens of our other allies. I can see no excuse for denying the Taiwanese the freedoms and fundamental rights that are already denied to people on the mainland. Martial law must come to an end in Taiwan so that the people's right to self-determination and representative government can begin.

But martial law is not the only issue. We often overlook the fact that the native Taiwanese are distinct from the mainland Chinese. As such, they are in the unenviable position of seeing their homeland treated by both the Communist and the KMT governments as simply a province of China, rather than a distinct entity. Their position is not dissimilar from that of people in the Baltic States, who have been incorporated into the Soviet Union despite a history and ethnicity which are not Russian.

The Shanghai Communique is a unique solution to a vexsome problem involving three governments. But it accepts without question the position long held by both the Communist and the KMT governments concerning Taiwan. As such, it is incomplete, for it does not take into account the views of the native Taiwanese themselves. This oversight is regrettable, to say the least.

Clearly, we cannot repudiate the Shanghai Communique. But I believe that we ought to bear in mind the position and the concerns of the native Taiwanese when we deal with the People's Republic and with authorities on Taiwan. To accept without question the view that native Taiwanese are Chinese subjects—regardless of who

governs China—is to overlook the concerns of many millions of people. And surely, the native Taiwanese would be no better off under a Communist government than under martial law. I hope, therefore, that we will bear in mind their views as we further deal with the People's Republic and with the authorities on Taiwan.

FREEDOM FROM HUNGER: THE AMERICAN CHALLENGE

Mr. CHAFEE. Mr. President, the distinguished junior Senator from Missouri, our colleague, Senator DANFORTH, gave a very thoughtful speech recently on the subject of hunger. It is a matter that has been of great concern to him and on which he has made thoughtful contributions in the past.

Mr. President, I ask unanimous consent that Senator DANFORTH's speech be printed in the RECORD in its entirety.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

FREEDOM FROM HUNGER: THE AMERICAN CHALLENGE

(By Senator John C. Danforth)

Let us begin tonight, here at Lincoln University, an American commitment to free the world from the scourge of hunger. Let us commit ourselves to have that goal in sight by the end of this century.

I cannot think of a better place than the campus of Lincoln University to make such a commitment, and I cannot think of a better time than now. For Lincoln is the first of the 1890 land grant universities, and our land grant institutions have led the way, here in the United States, in making agricultural productivity a 20th Century miracle.

Aided by the land grant programs, American genius and know-how have made farming America's biggest business and the United States the leading food producer in the world. Farm productivity has increased tenfold in the past 50 years, and today the average American farmer can feed and clothe 75 Americans and some portion of the world besides. As a Food "superpower," we now harvest more than half of all exported grain and hold the largest grain reserves in the world. In fact, we now provide 50 percent of all the food in international trade. At the same time, we maintain enormous stocks of surplus commodities and find ourselves with millions of tons of foodstuffs that go unconsumed each year.

This great abundance of food is often taken for granted. It is difficult for most Americans to picture how much of the world's population still lives in abject poverty and hunger. But while high quality food is available in great quantities in the United States, hunger is a constant threat for many millions around the world.

Today, millions of human beings still suffer from hunger—in conditions of poverty that would fill us all with horror. Many of these people suffer from starvation caused by famine, natural disasters, and political crises. Many more suffer chronic malnutrition—the silent, day-to-day scourge of the world's poorest people, who wake up each morning without enough to eat.

Unlike a sudden natural disaster or a war, hunger is a continuing tragedy which seldom makes the headlines. Yet its enormity cannot be denied. Unbelievable as it may seem to us, who take for granted our food abundance here in the United States, at least one-eighth of the world's total population suffers from severe hunger and malnutrition most of the time. And the problem is getting worse.

Eight hundred million of the earth's poorest people never have enough to eat. Hunger reduces the human potential of these people: It diminishes their physical and mental capabilities. It makes them less energetic and less productive. It diminishes their ability to learn. It ultimately increases their susceptibility to disease and shortens their lifespan.

More than half of those suffering from hunger and malnutrition are children, under the age of five. Each year, between 13 and 15 million children, most between infancy and the age of three, die unnecessarily from the combined effects of malnutrition and the diseases to which it makes them susceptible.

The horrible magnitude of this problem can be expressed in many ways.

Forty thousand people awaken each day to die of hunger. Every year more than 20 million lives are lost.

In the next 60 seconds, 234 babies will be born: 136 in Asia, 41 in Africa, and 23 in Latin America. Twenty-three of these infants will die before their first birthday. Thirty-four more will die before the age of 15—most of these before the age of 5. Between 50 and 75 percent of these deaths can be attributed to a combination of malnutrition and infectious diseases.

In other words, one in every four children in the developing world dies before the age of 15—primarily from nutrition-related causes. Moreover, many of those who survive beyond the age of 15 will be stunted in growth and will suffer brain damage that will incapacitate them for life.

Most of these inadequately nourished people live in developing countries on the Indian subcontinent, in Southeast Asia, and in Sub-Saharan Africa. Many also live in parts of Latin America and the Middle East. But in 1983, Africa is clearly the most pressing concern. Africa is the heart of the tragedy. Africa is the only region in the world where per capita food production has declined over the past two decades. In Africa today, between 60 million and 70 million human beings face severe malnutrition, even starvation.

In Sub-Saharan Africa, food production has been decreasing at the same time the population has been growing. Prolonged droughts have ravaged the continent. The mass migration of refugees in the Horn of Africa and, most recently from Nigeria, has made the disaster even worse. As a result, starvation is a fact of life in African villages and refugee camps. The crisis is now intolerable, and daily it is getting even worse.

The tragedy in Africa is shocking. But just as shocking and disturbing is the fact that hunger and malnutrition have not disappeared even in the United States. Here, in Missouri and across the nation, hunger and malnutrition are becoming realities for Americans struggling with the problems of a sluggish economy, high unemployment, rising food costs, and the increased cost of utilities.

It is in the relief centers, food banks and emergency distribution facilities across the country that the problem of hunger becomes most visible. The number of people appearing at these facilities to request assistance has increased substantially. Church groups and other volunteer organizations have responded superbly to the increased demand, but they cannot meet the need for assistance by themselves. People are falling between the cracks of our social programs, and already we are hearing reports of rising infant mortality rates due to malnutrition and the increased incidence of such problems as infant water intoxication due to formula dilution.

It is hard to comprehend that, with our great agricultural abundance, so many people are going hungry. Yet some Americans are again suffering from the kind of hunger and malnutrition that once plagued our country before federal nutrition programs became a nationwide reality.

Against this miserable background, let me stress the positive. I am absolutely convinced that hunger can be conquered, not only here at home, but throughout the world. Along with a growing number of Americans, I am firmly persuaded that the resources, the techniques, and the human ability to eradicate world hunger already exist.

This is not to say that the eradication of hunger is a simple matter, for the more we study the question, the more complex it becomes. The distribution of food from our abundant resources is part, but only part of the answer, and we must continue our commitment to make that distribution. The food stamp program at home and the food for peace program abroad are essential in an effort to deliver our abundance to those who are unable to acquire or produce it themselves.

But distribution of surpluses, however essential in meeting emergencies, is not the long-term answer to the hunger problem. If relied upon to the exclusion of indigenous production, it can thwart developing countries in their own efforts to gain the self-sufficiency they need and want. It can upset local markets and blunt the economic reform and agricultural research efforts necessary for long-term strength in poorer countries. For this reason, emergency relief must be combined with a sustained effort to improve educational institutions, agricultural research, production incentive systems and transportation in Africa and elsewhere.

The obstacles are great, but I am confident that the world today possesses the resources, the technology, and the ability to overcome them. By working in cooperation with other developed nations we can do the job. By providing technical and financial assistance, promoting corporate investment, and encouraging the elimination of trade barriers, we can lead one-quarter of the human race out of conditions of absolute poverty and toward the agricultural self-sufficiency and balanced economic development that are necessary to the final eradication of world hunger.

There is no question in my mind that we can succeed in this effort. I am confident that we inhabit a world in which hunger is no longer an inevitable fact of life. We can succeed, provided only that we want to succeed and provided that we in America are willing to make the eradication of hunger a

primary national objective. And this is exactly what I propose we begin here and now. I propose that we declare the right to food a fundamental human right and freedom from hunger a fundamental American goal.

America is the leading food producer in the world. No other country is in our position to make this kind of commitment. No other country could undertake leadership to end world hunger. We can. Therefore, we must. But as yet we have not done so.

The United States is the world's largest donor of total food and technical assistance to developing countries, but our relative share of total assistance has been declining. In recent years, we have spent 20 times more on defense than development assistance, and we have ranked behind 12 other countries when such assistance is measured as a percentage of gross national product. If we are to take the lead in eliminating hunger, we must do much more.

If the elimination of hunger is to be a primary national objective, it cannot be secondary to some other objective. It has been argued that food should be used as a tool of foreign policy and that the shipping or withholding of food can be used to bring pressure on other countries such as the Soviet Union. But where it has been tried, the embargoing of food for foreign policy purposes has not worked well. The interruption of grain shipments to the Soviet Union did not lead to modifications of Soviet policy. It did cause significant hardship to our own farmers.

Here at home, it could be argued that to guarantee an adequate diet to all Americans lessens the incentive to work and encourages laziness. But I do not believe that hungry people make good workers or that the provision of a minimum diet reduces one's willingness to work.

What is more, the use of food as a means to some other end—to alter behavior at home or abroad, is more characteristic of a totalitarian value system than of the United States. If we value the dignity of human beings, then we should feed them because they are hungry, not because they do as we please. To make the elimination of hunger a national priority is to make a clear statement about our national values.

There is no doubt that a major effort to end hunger would serve the self-interest of the United States. If this were not so, our attention span on the issue would be brief indeed. Philosophical reflections on values are worthwhile, but when joined with national self-interest they gain the form and shape necessary for effective public policy.

To take the lead in eliminating hunger would reduce our own surpluses; it would open up markets abroad; it would help our agricultural sector; it would improve our balance of trade; and it would increase our influence in the third world. It would, in short, be of practical benefit to our country. But, again, beyond all the tangible advantage, it would further our system of values and appeal to the idealism of the American people. It would enhance our national identity.

The relationship between food policy and a country's value system were brought home to me in 1979 when I journeyed to Cambodia and the border of Thailand. There I saw refugees from political brutality in the most abject condition of human misery I had ever experienced. Thousands were lying on the ground, too weak to walk, dying of starvation before my eyes. I saw babies dying in their mother's arms. Hunger, once seen, is never forgotten.

Two Communist regimes, fighting over the same territory, caused this misery—two Communist regimes that were willing to use food as a weapon of war—two Communist regimes that seemed wholly insensitive to the human tragedy they were causing. And it was western countries, especially America, citizens of the western world, especially Americans, who were there on that border to see what relief they could provide. They had come from half way around the world. They had come to people of a different race and language—of an abhorrent political philosophy. They had come to help—to help because fellow human beings, however different, were in desperate need.

And when I returned from that journey, the response here in Missouri was enough to bring tears to the eyes. School children held car washes and bake sales. Fourth and fifth grade children from a school for the deaf contributed their nickels and dimes. Church groups gave their support.

Why did so many Missourians respond in this way? Why should they have cared about the Cambodians? What did Cambodia have to do with them? Were not these Cambodians of a difference race, a different tongue, a different ideology? What was so special about them that deserved our time, our funds, our attention?

And the answer, of course, is that they were not special at all. They were human beings and we valued them for that reason alone. They were suffering. They needed help. And we helped them. That was all that mattered.

It mattered then and it matters now. It must always matter—to us, to Americans. We believe in the value of human beings. We must always believe in that if we are to be true to ourselves. And we must demonstrate our belief by action.

There is nothing else on earth that shows forth a nation's values as much as food. How a nation deals with food—whether it hoards it, or withholds it or shares it—is a window into a nation's character.

Americans believe in their country—they should. Let us commit ourselves to giving substance to that belief. Let us commit ourselves to freeing the world from hunger.

HOUSE CONCURRENT RESOLUTION 65—WELCOMING QUEEN ELIZABETH AND PRINCE PHILIP

Mr. BAKER. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of House Concurrent Resolution 65, a concurrent resolution welcoming Queen Elizabeth and Prince Philip on the occasion of their official visit to the United States, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 65) welcoming Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, on their official visit to the United States.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. PERCY. Mr. President, House Concurrent Resolution 65, which is before the U.S. Senate today, welcomes Her Majesty Queen Elizabeth II, and His Royal Highness, Prince Philip, Duke of Edinburgh, to the United States for their current visit, and pays special recognition to the historic ties of friendship between the peoples of the United States and the United Kingdom.

It is fitting that we in the Senate join in this American welcome to the Queen and her husband during their 10-day tour of our west coast. The political, economic, and cultural links between the American and British peoples are uniquely deep and enduring. So much of our own national heritage is bound up with Great Britain. And our close ties continue in the present lives of our two nations.

The PRESIDING OFFICER. The question is on agreeing to the preamble to the concurrent resolution.

The preamble was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 65), with its preamble, was agreed to, as follows:

H. CON. RES. 65

Whereas Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, will pay an official visit to the United States from February 26 to March 7, 1983;

Whereas the Royal Couple will travel on board the HMY Britannia, visiting several cities on the west coast of the United States, including San Diego, Los Angeles, Palm Springs, Santa Barbara, San Francisco, Sacramento, and Seattle;

Whereas they will visit important United States naval facilities, institutions of higher learning, business and cultural organizations, and hospitals, and will spend a weekend at Yosemite National Park; and

Whereas they will be received by President and Mrs. Reagan at the President's ranch and, in return, will host a dinner for the President and First Lady aboard the HMY Britannia: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That in special recognition to the historical ties of friendship between the peoples of the United States and the United Kingdom, the highly valued political and economic relationship which exists between our two countries, and the cultural bonds which have long enriched our two societies, the Congress hereby extends a warm welcome to Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, on the occasion of their official visit to the United States.

RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, unless there is some Senator seeking recogni-

tion, and I see no Senator seeking recognition, I move in accordance with the order previously entered that the Senate now stand in recess until the hour of 9 a.m. on tomorrow.

The motion was agreed to, and at 5:53 p.m., the Senate recessed until Tuesday, March 1, 1983, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate February 28, 1983:

DEPARTMENT OF STATE

John Davis Lodge, of Connecticut, to be Ambassador Extrordinary and Plenipotentiary of the United States of America to Switzerland.

DEPARTMENT OF EDUCATION

Peter H. Raven, of Missouri, to be a Member of the National Museum Services Board for a term expiring December 6, 1987 (reappointment).

EXTENSIONS OF REMARKS

CHRIST CHURCH, UNITED METHODIST OF TROY, N.Y., CELEBRATES 175TH ANNIVERSARY AND TROY CONFERENCE CELEBRATES 150TH ANNIVERSARY

HON. SAMUEL S. STRATTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. STRATTON. Mr. Speaker, it is my distinguished honor to advise my colleagues of two important events that will be taking place later this year for the Christ Church, United Methodist in Troy, N.Y.

The 150th anniversary of the Troy Annual Conference of the United Methodist Church will take place in Troy on June 2-5. In addition, Christ Church, United Methodist, located in the city of Troy, will celebrate its 175th anniversary during the week of October 18-24.

Both of these milestones will be major observances in Troy's activities in the months ahead.

At this point in the RECORD I include a brief history of Christ Church, United Methodist and extend my best wishes to the conference and the congregation on these important occasions.

CHRIST CHURCH, UNITED METHODIST, TROY, N.Y.

HISTORY

When the village of Troy assumed its name and was incorporated in 1789 there were no churches. Early religious services were held either in a school house located on an open plot of ground between the present lines of Congress, Ferry, Second and Third Streets, or in the ball-chamber of Ashley's Inn on the east side of River Street between Congress and Ferry Streets. Here sermons were read by local citizens. After the Presbyterian meeting-house was built in 1792 on the south-east corner of First and Congress Streets the citizens of Troy usually attended services there until the denominational societies of their own faith organized. By 1793 the Methodists began to meet in their homes. As the group grew in numbers the meetings were held in the Rensselaer County Courthouse.

Although a "Class" had been established by the Rev. Elijah Chichester in 1805 it was not until November 29, 1808 that the Society was incorporated according to law and assumed the name "Methodist Episcopal Church of the village of Troy". Because of the inconvenience of holding meetings at the homes of members or in the Courthouse the trustees purchased for $500, plus annual interest payments of $35 until the payment was completed, lots 734 and 744 (the site of our present Parish House) from Jacob D. Van der Heyden. The conveyance was made on Christmas Day, December 25, 1808.

FIRST MEETING HOUSE—ERECTED 1811

This first meeting-house of the new congregation was not completed until 1811 because of the limited means of the members. The first church was a plain, two-story weather-boarded structure with its south gable facing State Street. The first pews were temporary ones made of rough planks. "When the church was fitted with more suitable furniture the seats were then but plain, unpainted pine benches backed with a narrow board. The pulpit was a plainly-constructed desk, standing on a small platform on which were several chairs. When used at night . . . the meeting-house was lighted with tallow candles in tin sconces hung along the walls of the building. Years afterwards, when doorless pews were put in the church, the benches were placed in the gallery, which had no sittings until then. The sittings on the east side of the church were occupied by the women and girls of the congregation, and those on the west side by the men and boys."

THE BRICK CHURCH—DEDICATED DECEMBER 1, 1827

The religious excitement of Troy plus the effect of several "revivals" greatly increased the membership of the Methodist congregation. The first meeting-house was "crowded above measure". "In the spring of 1827 the erection of a brick building was begun on part of the site of the old meeting-house. The new structure fronting with a gable immediately on State Street, a little east of the alley, was fifty-five feet wide and sixty-six feet long. On December 1, that year, the building was dedicated." At that time the congregation totaled 437 members. The old meeting-house was sold at public auction on February 28, 1827 for $500. The building was moved to the corner of State Street and Fifth Avenue where it was used as a courthouse while a new courthouse was being built. Later it was used as a grocery store until the erection of the present church which was begun in 1867.

In the spring of 1867, the property east of the brick church, extending to Fifth Avenue was purchased. "The corner-stone of the present church was laid on Thursday afternoon, June 25, 1868. . . . The new church, built of blue limestone, was dedicated by Bishop Matthew Simpson, on Thursday morning, March 30, 1871. The attractive edifice has a frontage of seventy-five feet on State Street and a depth of one hundred feet on Fifth Avenue. The auditorium, fifty-nine by seventy feet has 650 sittings and the gallery 250. The tower, nineteen feet square, rises to a height of eighty-five feet; and when completed, with the steeple, the height from the sidewalk to the finial on the spire, will be one hundred and seventy-five feet. The estimated cost of the church, when completed, will be $125,000." The spire was erected later in memory of Mr. and Mrs. William Cluett by their sons, J.W.A. and G.B. Cluett.

"The laying of the corner-stone (of the present Parish House) took place on Tuesday afternoon, May 30, 1882." The dedication of this building, which replaced the brick church was held on Tuesday afternoon, March 29, 1883.

The Methodist Episcopal Church in Troy, later known as the State Street Methodist Episcopal Chruch, mothered eight Methodist congregations throughout the city of Troy. The following is a brief history of those congregations and will suffice to show how some of them returned to make possible the congregation now called Christ Church, United Methodist.

In 1826 a small meeting house on Pawling Avenue, near the head of Winter Street was built by the trustees of the State Street Society for those who wished to hold meetings when the inclement weather or other reasons prevented them from attending State Street Church. This building was replaced in 1857 by a brick structure on the same site (now part of the East Side Hardware Corp.). The present Pawling Avenue United Methodist Church was built on the corner of Pawling Avenue and Woodlawn Court in 1903.

Due to the growth of our city northward, a Committee from State Street Church was appointed on May 23, 1831 to provide a place for preaching in the north part of Troy. The site on the northeast corner of Jacob and North Second Streets was chosen. A brick church, known as North Second Street Methodist Episcopal Church, was built and dedicated August 30, 1835. A new church was built on the same site and was dedicated on December 29, 1854. The name "Fifth Avenue Methodist Episcopal Church" was adopted February 9, 1888 shortly after the name of North Second Street was changed to Fifth Avenue by the city. In 1925 this church merged with State Street under the name of "Fifth Avenue-State Street Methodist Episcopal Church." Until recently the church building was used by the congregation of St. Peter's Armenian Apostolic Church. Currently it is being used by the congregation of the Bethlehem Temple Church.

The African Zion Methodist Episcopal Church was established in 1832 by members from a "Class" connected with the State Street Church. The first church was located on Fifth Avenue north of Liberty Street. The location of the church has changed several times throughout the years. Presently the congregation worships at 189 Fifth Avenue, North Troy, and is known as the Fifth Avenue A.M.E. Zion Church.

"A number of persons, designating themselves members of the Fourth Methodist Episcopal Church in Troy" met on September 24, 1838 and formally organized a society known as Levings Chapel. It was named for the Rev. Noah Levings, D.D., who as a blacksmith boy was converted in the old Methodist Episcopal Church of Troy in 1813, and afterwards was twice its pastor. The society erected a church on Mill Street and eventually changed the name to Levings Church. This church merged with the Green Island Church in 1968 and worships there. Because of structural weaknesses the Levings Church was razed a few years ago.

Desiring to strengthen the cause of Methodism in South Troy, a classleader of the State Street Church opened his home for preaching, prayer-meetings, and a Sunday School in 1844. Shortly thereafter a lot was

secured and a church erected on the northeast corner of Third and Monroe Streets. The building was dedicated on December 25, 1847. The church was discontinued about 1919. The structure has been considerably remodeled and is now used by the congregation of St. Nicholas Ukrainian Orthodox Church.

Trinity Methodist Episcopal Church was formed from a "Class" of Methodists from State Street and North Second Street (Fifth Avenue) Churches who began meeting on Congress Street in 1846 under the leadership of the pastor of the Third Street Church. The first building was a reconstructed wooden blacksmith's shop on the south side of Congress Street at its intersection with Ferry Street. It came to be known as "The Hemlock Church". In 1848, a site on Thirteenth Street, facing Prospect Park was purchased on which a church was built and dedicated on July 12, 1849. The name of the church was changed from "Congress Street" to "Trinity" in 1880. In 1965 the congregation known as Trinity merged with that of Fifth Avenue-State Street and it was at that time that the name Christ Church, Methodist was adopted. The "United" came following the merger of the two denominations, The Methodist Church and the Evangelical United Brethren Church, in 1968. The former Trinity building is now used by the congregation of St. Paul's Missionary Baptist Church.

The Vail Avenue Church was established on March 15, 1852 by a few members of the State Street Church and other residents of the community as the Methodist Episcopal Church in North Troy. In 1867, the church took the name of the Vail Avenue Methodist Episcopal Church and on April 2, 1888 because the street's name was changed to Sixth Avenue the name of the church was changed to "Grace". The cornerstone for a new church was laid August 16, 1888. In 1969 the congregation merged with St. Mark's Church to become The United Methodist Church of Lansingburgh. The congregation of the Apostolic Pentecostal Church now worships in the former Grace Church building.

The First German Methodist Episcopal Church of Troy, was organized on July 25, 1857. On March 25, 1863 a brick church at the corner of State and Union Streets was dedicated. In 1925 this church, too, merged with State Street Church. The Italian congregation of St. Titus Church purchased the building and used it as their place of worship for several years before disbanding. In the late 1960's the building was demolished by the Urban Renewal Agency.

Such has been the growth and spread of Methodism, along with the consolidation of some of her churches, in the city of Troy. The present gothic structure at Fifth Avenue and State Street has gone unchanged for a century. Over the years, renovations have been made within the Parish House especially, and in the undercroft of the church to provide classrooms, offices, and general meeting areas. Shortly after May 1, 1974 the one hundred year old pipe organ will be replaced by a three-manual Allen Digital Computer Organ. Accompanied by this new instrument, Methodists will continue to worship and sing, we trust, for a long, long time just as they have been doing across these many decades since the site was first acquired 165 years ago. This church has had a long and rich history. We ask God to bless her present ministry and to enlist from one generation to the next enthusiastic members to ensure her future.

The quotations and much of the historical data is from "The History of Methodism in Troy, New York" by Joseph Hillman published in 1888.

REFLECTIONS ON THE CHURCH

Not too many churches have had the distinction of ministering continuously from one location for more than sixteen decades. I am the 65th pastor to minister from our present site. The rather large number of former pastors who are still living would indicate to me that many of them came to this church as relatively young men.

While served by so many ministers across the years, this church has also challenged many to enter the pastoral ministry. I know of seven who have entered the ministry from our churches. Four of these men, three of whom are now retired, have given 144 years of accumulative service to churches in the Troy Conference.

Troy Annual Conference was established in 1832 and its first session the following year was held in the "brick church". Since then twelve sessions of our Annual Conference have been held in Troy . . . the last one being in 1953, the year I was ordained an Elder.

Many people have found the church at Fifth and State a friendly place. The merger in 1965 was a happy one and has made for a stronger witness. The keen interest and enthusiasm of so many college students have been both a challenge and an inspiration to me. I have never ceased to marvel at the loyalty of many of our members, some of whom travel considerable distance and pass other churches on the way.

With Troy's rebuilding of the central city, its new bridges and arterials, and our proximity to college campuses, our church is still strategically located for a ministry that should take us into our third century of service and beyond. The community of Christians, a church, will exist as long as her ministry serves the Lord, meets the needs of people, and there are members who take their vows seriously. This church has always been so endowed and I trust she always will be. This pastor shall ever be grateful for having had the privilege of serving for a time this great church.—WILLIAM A. GROSHANS ●

HANDICAPPED DRIVERS COURTESY BILL

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. DOWNEY of New York. Mr. Speaker, I would like to bring to the attention of my colleagues the handicapped drivers courtesy bill I am introducing. As we all are aware, the handicapped and disabled citizens in our Nation face a host of obstacles every day. Fortunately, because of mechanical and medical technological advances, the legislative efforts of this and other bodies, and the sheer courage and determination of our handicapped citizens, many are able to live relatively normal lives, free of the barriers and impediments that once burdened them.

My bill would remove yet another barrier for these citizens. It is not a physical barrier; it is a legal one. In many States, an out-of-State handicapped driver cannot park in in-State handicapped drivers' spaces. Imagine this absurd situation: an out-of-State handicapped driver receives a ticket on his or her special vehicle because he or she parked in a handicapped drivers' space—but was not certified by that State as being handicapped. The ticket costs the driver $50, to say nothing of the time and aggravation caused.

My legislation is not complex: it merely would put into law a simple congenial reciprocal arrangement by the States. That is, out-of-State handicapped drivers are extended the same rights and privileges as handicapped drivers in that State without further certification that they are handicapped. Thus, the handicapped driver is welcomed and respected in every State. What is more, this little courtesy, this small bit of interstate cooperation, costs the State nothing and reaps it great reward: the appreciation of the out-of-State driver who is visiting your home State.

Here, printed below, is the text of the handicapped drivers courtesy bill. I urge, on behalf of the handicapped drivers and travelers of our country, that we pass this legislation.

H.R. 1702

A bill to amend title 23, United States Code, to require the Secretary of Transportation to reduce the apportionments of certain Federal-aid highway funds to any State in which highway motor vehicles displaying a handicapped parking sticker issued by any other State are not allowed to park in the parking spaces in which highway motor vehicles displaying a handicapped parking sticker issued by such State are allowed to park.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following new section:

"§ 158. Handicapped parking privileges

"(a) In any State which allows any highway motor vehicle displaying a handicapped parking sticker issued by such State to park in parking spaces designated for use only by such vehicles, any highway motor vehicle displaying a handicapped parking sticker issued by any other State shall be allowed to park in such parking spaces under the same terms and conditions as apply to highway motor vehicles displaying handicapped parking stickers issued by such State, except that such State shall not require (1) any highway motor vehicle displaying a handicapped parking sticker issued by any other State to display a handicapped parking sticker issued by such State, or (2) the driver of, or a passenger in, such vehicle to be (A) examined for the purpose of determining if such person is handicapped or not, or (B) otherwise certified as handicapped by such State.

"(b) If, in any Federal fiscal year beginning after September 30, 1984, any State violates subsection (a) of this section, the Secretary of Transportation shall reduce the apportionment of Federal-aid highway

funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6), of this title in an aggregate amount of not less than one-half of 1 per centum and not more than 2 per centum of the amount to be apportioned to such State for the second fiscal year beginning after the last day of the fiscal year in which such violation occurred.

"(c) As used in this section, the term 'handicapped parking sticker' means any license plate, parking permit, or any other sticker or symbol issued by any State which indicates that the driver of, or a passenger in, any highway motor vehicle is handicapped.".

(b) The analysis for chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"158. Handicappted parking privileges.".●

AMERICAN LEGION POST 38 ESTABLISHES VETERAN'S SCHOLARSHIP PROGRAM

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mrs. HOLT. Mr. Speaker, recently, American Legion Post 38, in Dundalk, Md., was the subject of a laudatory news article which appeared in the Sun newspaper.

Officers of American Legion Post 38 met with representatives of Dundalk Community College and developed a scholarship program to retrain some of the area's veterans. The program was launched with a 3-hour seminar of stress and unemployment during which 20 to 21 veterans applied and were accepted for scholarships. The program was financed by the legion post and enables the veterans to take six credits, amounting to two courses, during the spring semester.

The actions on the part of legion officers and the community college are worthy of the honor of national recognition and appreciation. It is a privilege to represent a State in which such selfless and concerned individuals reside.

This is the kind of community spirit that made this country the great Nation that it is.●

SUCCESS: LIVINGSTON FARMERS ASSOCIATION

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. COELHO. Mr. Speaker, there is an amazing success story in Merced County, Calif. that I would like to bring to the attention of my colleagues. As told in the following Fresno Bee article, the Livingston Farmers Association has demonstrated that success comes to those who dedicate themselves to that end.

The Livingston Farmers Association is a cooperative of individuals, primarily of Japanese ancestry, who have, through hard work, overcome the economic challenges and cultural discrimination of early California to establish a highly respected farming operation. The association members exemplify the historical benefits which come to the individuals through banding together to operate cooperatively in the agricultural economy. Their reputation as excellent farmers with high quality produce and considerable economic strength should be an inspiration to all Americans, regardless of ancestry, who strive for success.

Mr. Speaker, at this point, I offer the aforementioned article.

JAPANESE-AMERICAN'S AG COOPERATIVE PROVES IMMIGRANTS' SUCCESSES

(By T. J. Burnham)

LIVINGSTON, MERCED CO.—Give to a struggling Japanese commune a home in windseared, near-desert ground; then, when their hope is as fresh as the new green vineyards, wrench them away under eyes of scorn in the piercing winds of war.

But this scenario of the Yamato (Japan) Colony, from its pale onset at Livingston in 1906 through the displacement of World War II Japanese citizens, does not fade in defeat. Instead, the Livingston Farmers Association is today a vision manifest in a thriving 9,000-acre cooperative of 74 small-scale farmers, mostly Japanese. Big on sweet potatoes and almonds, they sell $8 million in crops a year.

Respected as a farm community with some of the finest commodities in the state, the cooperative's evolution has been poignant.

One who remembers is Norman Kishi, a 78-year-old Nisei: a U.S. citizen whose parents immigrated from Japan. As a grassroots member of the colony, Kishi married Tokuto Domoto in 1934 in the first Nisei marriage held in the community.

His father, Tajiro, was one of the less than a dozen original Japanese who wandered to the "wild desert" in search of a homeland. "If they had it to do over, they probably would not have picked the Livingston soil," smiles Kishi. "There is nicer farmland."

It was a place for Japanese who could not be choosy. As socially isolated "aliens" restricted from owning land, they sought a home.

Even in their new home, anti-Japanese sentiments surfaced in the local newspaper, the Livingston Chronicle, by 1919, followed by boycotts and resolutions to exclude "picture brides"—potential wives from Japan who were selected by the colonists from photographs.

The hostility culminated with the erection of billboards on the highway into Livingston reading "No More Japanese Wanted Here," Norman remembers seeing as a 15-year-old.

His father came to California from Japan's Wakayama Prefecture, as did many of the colonists. He and other transient Issei—first-generation U.S. Japanese—sorted fruit in the Vacaville-Winters sheds.

It was when he moved to San Francisco to open a bathhouse that Tajiro Kishi came into contact with Japanese newspaper publisher Kyutaro Abiko. Yamato was Abiko's brainchild: a place for wandering Japanese to settle and begin new lives farming the sandy earth.

In an irregular checkerboard of 40-acre parcels, the dusty colony unrolled over the barren wild ground where Tajiro Kishi brought his wife and two sons, including 2-year-old Norman.

"Father planted table grapes, as did most of the colony," said Norman. "It was a desert when we came. My father was one of the few Japanese in California to own land, and it was purchased sight unseen." Fortunately for many at the colony, they purchased their land before the 1913 Alien Land Law blocked sales of land to Japanese.

What Tajiro and his wife saw when they arrived was little more than depressing desert. A San Francisco Chronicle story described an earlier unsuccessful colony on the site as having been "blown away." Blistering sandstorms and myriad jackrabbits owned the desolation, wrote Kesa Noda in his documentary book of "Yamato Colony 1906-1960."

"At first, they sold their produce independently at San Francisco," said Norman. "But the benefits of getting together to ship to the markets became evident. For one thing, we had a language barrier. We needed an English-speaking merchant."

So the first sangyo kumiai (marketing cooperative) was sparked in 1913, kindling the spirit of working together that was to evolve into today's united association.

The effort put order in the irregular flow of produce from the colony, ending the market flooding that was causing a strain on some growers. According to Noda, the first co-op manager put it to the community this way: "If you hold hashi (chopsticks) individually, you can certainly break them all, but if you put them together, why, you can't break a bunch of hashi!"

The co-op brought new vitality to Yamato. "It was like a desert that bloomed," recalls Livingston Farmers Association president Ken Hamaguchi. "The farmers began to produce and market peaches, and the economic strength of the Livingston cooperative members began to grow."

The Livingston Cooperative Society divided into the Livingston Fruit Growers Association—with Tajiro Kishi as the first president—by 1927, which merged into the Livingston Farmers Association in 1957. Between these quiet events, the interval was shattered by the bursts of Japanese bombs on Pearl Harbor.

World War II ripped the roots of Yamato from the Livingston earth, transplanting the Kishis and others to Colorado, while their neighbors like the Hamaguchis were banished into another desert in Arizona.

In a rushed bid for survival of the co-op colony, Livingston growers established a non-Japanese trusteeship that saved the community, and even reaped savings that awaited the farmers when they returned in 1945.

Deprived of the war's farm-boom profits, the Japanese returned to their fields with a rage for success through diversity. By last year, the co-op reported no less than 15 different crops in their association's program, led by a $2.7 million almond harvest and $2.2 million sweet potato bonanza.

Marketing heavily through the state's largest cooperative processor-handlers, the association's land is planted to grapes, raisins, peaches, nectarines, plums, walnuts, kiwi, persimmons and apricots.

A network of the latest facilities for storage, packing, loading, hulling and hauling serves the community, which shaves input

costs through cooperative service and purchasing strength.

While the community depends on others to market much of its produce, pride is strong in independent enterprise. "We market almonds through the California Almond Growers Exchange," said president Hamaguchi, "but we've developed the hull market ourselves. Our fruit labels are respected for our quality, and we sell our sweet potatoes and yams because our people grow them as well as anyone can."

And the association keeps a close watch on the activity of its co-ops, "We look at each market individually," explains LFA's general manager Rick Kindle. "If direct sales become justified, we may decide to change the way we do some business."

Fresh-product labels like Pride of Livingston and Yamato Colony already have given the co-op a preferred market identity, said Kindle. "More direct marketing may become desirable—particularly in Japan."

Trouble in the economy rippled into the farmers' association in 1982, Kindle acknowledges. But an eager new brood of Sansei, third-generation Japanese-American farmers, is lining up with efficiency ideals.

Removed from the barren bitterness that greeted their predecessors, newcomers like Hamaguchi's nephew, Don Hamaguchi, are stepping into leadership. He is the first Sansei director of the farmers association.

"His ideas are different," smiles the elder Hamaguchi, "but so were ours when we came to turn the desert into a farm."●

COMMUNISTS AND SOCIALISTS PROTEST AGAINST SECRETARY OF INTERIOR JAMES WATT'S POLICIES

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. YOUNG of Alaska. Mr. Speaker, much has been said about Secretary of Interior James Watt and his policies of returning a balance to public land management. For a variety of motives, individuals and groups have consistently leveled charges against those policies that Westerners from working communities support. Recently, while in Columbus, Ohio, to honor Abraham Lincoln and William McKinley, Watt was again treated to a very sophisticated, organized protest, complete with one individual dressed as a chipmunk. Along with the normal list of groups associated with the chlorophyll blood set, he was treated in this instance to a wide range of mainstream Americans concerned with public land issues. Included within this group was a woman's group from the local university, the National Lawyers Guild, and People for Animal Rights. New additions to this growing cadre of loyal Americans fed up with Mr. Watt's policies for the public lands were no other than the Democratic Socialists of America, and the Communist Workers Party, long rumored to be in the forefront of the environmental extremism movement in America. I offer for the Member's information a text from the Columbus Citizen-Journal about the protest:

[From the Columbus Citizen-Journal, Feb. 18, 1983]

JAMES WATT SPEAKS AT PARTY BANQUET

(By Davyd Yost)

Nearly 500 demonstrators marched last night outside the Hyatt-Regency Columbus to protest the policies of U.S. Secretary of the Interior James G. Watt, who spoke inside at a Republican Party banquet.

Chanting slogans like, "Save energy, kill a Watt" and "Self determination for the American Indian nation," the protesters filled the sidewalk on Nationwide Boulevard and spilled around the corner at High Street.

Watt slipped in through a back door, unobserved by the protesters.

The hour-long rally was sponsored by the Ohio chapter of the Sierra Club in cooperation with 10 other organizations.

"We have the least federal lands of any state in the union," said Donn Young, a member of the Sierra Club's state executive committee. "We'd like to preserve what we have left."

In addition to Watt's proposals to open up protected federal lands to mining and drilling, Young said his group is upset with discussion about selling portions of the Wayne National Forest in Southern Ohio and with lax enforcement of strip mining laws.

He noted his group usually fights its political fights in legislatures and in the courts, not with placards and chants.

"But we felt with Mr. Watt, our presence was really needed. We had to be here," he said.

Several demonstrators were in costume as animals, underscoring their view that Watt is unsympathetic to wildlife.

Wayne Cope, who lives near Ohio State University, was dressed as a chipmunk and carried a sign reading "Who Needs Trees?"

"I've been an environmentalist for a long time," he said. "And the Indian affairs stuff really rubs, too."

He said he had handed out 800 pamphlets early yesterday detailing Watt's decisions. Only six people supported the secretary, he said.

Some Republicans participated in the protest.

Dick Cooper, who said he had supported Barry Goldwater for president in 1964 and has voted for "all Republican presidents except one" sported a red-and-white Republican nametag, a three-piece wool suit and a sign that read "Dim Jim Watt."

Cooper said he had been at a Republican fundraiser with Watt at the Palace Theatre shortly before the protest began.

"People gave President Reagan a big vote in 1980," he said. "They voted for a better economy. But they didn't expect what has happened to the environment."

The other organizations that planned the demonstration were: the Central Ohio Safe Energy Committee, Federation for Progress, Progressive Student Alliance, Democratic Socialists of America, People for Animal Rights, Communist Worker's Party, Stonewall Union, National Lawyers Guild, OSU Environmental Law Association and OSU Women's Law Caucus.●

SMALL BUSINESS TAX RELIEF ACT OF 1983

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. SCHULZE. Mr. Speaker, in the last Congress my Small Business Tax Relief Act attracted substantial bipartisan support. Unfortunately the conditions which motivated my introduction of this bill still exist. Therefore, on February 23, 1983, I introduced the Small Business Tax Relief Act of 1983.

Briefly, the seven provisions of my bill would:

First, permit a small businessman to sell his business, reinvest the profit within 24 months in another small business without paying tax, as in the case of an individual's residence;

Second, increase the amounts of property eligible for expensing in the year of purchase;

Third, permit rapid amortization of certain federally required expenditures;

Fourth, liberalize the provisions with respect to small domestic international sales corporations;

Fifth, provide for the optional cash or accrual method of accounting for sole proprietors;

Sixth, require the IRS to refund employers their proportionate share of excess social security payments made on behalf of employees who were employed by two or more employers during the year, and finally my bill would;

Seventh, grant a tax credit of $5 for each document or form which a small business is required to file under Federal law.

The Small Business Tax Relief Act of 1983 is a balanced and multifaceted bill which will assist our small entrepreneurs in a meaningful way. I urge all of my colleagues whose constituencies include small businesses to join me in facilitating the formation and growth of small business by cosponsoring the Small Business Tax Relief Act of 1983.

To give a more detailed explanation of my bill I am providing a description of each provision.

First, gain from a sale sole proprietorship. This "rollover" provision would allow a small businessman who sells his entire business interest and reinvests the entire proceeds in another qualifying small business venture within 24 months to recognize no gain at that time. If the sale occurs after age 55 years, the taxpayer has the option of electing capital gains treatment on the accumulated gain or ordinary income treatment in conjunction with a special 10-year averaging mechanism.

Second, increase the dollar limit on property eligible for expensing under the accelerated cost recovery system. This section of the bill would simply increase the amount which, at the option of the taxpayer, may be claimed as a deduction in the year in which property is placed in service. Current law limits qualifying property to a value of $5,000 in 1982 or 1983, $7,500 in 1984 or 1985, and $10,000 in 1986. The act would increase the amounts eligible as follows: Increase of $10,000 in 1983, $15,000 in 1984 or 1985, and $20,000 in 1986 or thereafter. This provision is designed to benefit the small businessman by allowing him to recoup a greater part of his investment via reduced tax liability. Also, there would be great savings from reduced recordkeeping and accounting.

Third, rapid amortization of certain federally required expenditures. This section provides for the rapid amortization over a 36-month period of federally required expenditures for plant and equipment. The aim of this provision is to give rapid writeoff to businesses forced to comply with Federal laws or regulations such as OSHA, HHS rules for the handicapped, regulations governing pollution control, and so forth. To qualify for rapid amortization, such changes would have to be certified by the particular Federal agency as being in compliance with the law and of a type which does not significantly increase output or capacity. This provision would apply only to existing facilities.

Fourth, removal of certain limitations of deferral in cases of small DISC's. The domestic international sales corporation is an important device for increasing export sales and in so doing, reducing our balance-of-payments deficit and inflation. This provision of my bill changes current law to allow a small DISC having an adjusted taxable income of $1 million or less to be exempt from the base period limitations imposed on large DISC's. As a result of this change, small manufacturers will be encouraged to develop export sales as a result of the tax deferral offered via the small DISC provision.

Fifth, optional cash method of accounting for taxpayers operating as a sole proprietor. This section allows the sole proprietor to choose the method of accounting, either cash or accrual, which will be more beneficial. Small businesses with inventory which are frequently not equipped to utilize the LIFO accounting provisions currently suffer a hidden tax which is brought about by the inflationary increase in the value of that inventory. Under this section of my bill, any appreciation of inventory would not have to be shown until such time as there is a cash sale providing the proceeds with which to pay the tax.

Sixth, refund or credit of employer share of certain excess social security taxes are a source of agitation to most employers, because of the amount of related paperwork. Yet, many employers unknowingly pay a greater amount in social security than is necessary. This occurs when an employee is employed by two or more employers during the year. In this situation there is, generally, an excess employer contribution which is never refunded to the employers. Presently, an employee can claim a credit for excess social security tax withheld. However, there is no similar provision for employers. This provision of my bill would require the IRS to credit or refund to each employer his proportionate share of the overpayment. Qualifying employers would be identified when an employee claimed the credit. Within 90 days, the IRS must credit or refund the appropriate amount to each employer. One of the benefits of this plan is that employers automatically receive the payment without having to complete any complex forms or paperwork.

Seventh, expense of filing Federal forms. This final section of the bill would grant a tax credit of $5 for each form or document which a small business is required to file pursuant to Federal law. The crushing burden of Federal paperwork is well known to every small businessman. The theory behind this provision would help to defray the expense of complying with the requirements it imposes on business.

Tax policy plays an integral part in the success or failure of a new business enterprise. It is significant to note that the Small Business Administration indicates that out of every 10 new businesses, only 5 will be operating within 2 years. In order to insure the viability of our economy, it is essential that Congress take the actions needed to bolster the existing small business community and encourage the creation of new businesses.

I urge my colleagues to join with me in aiding American small business.●

ESTONIAN INDEPENDENCE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. GREEN. Mr. Speaker, on February 24, 1918, the nation of Estonia declared its independence. Today, I would like to commemorate the 65th anniversary of the Declaration of Estonian Independence, and in doing so, reiterate the right of Estonia and all other captive nations to their languages, their cultures, and above all, to self-determination.

Estonia continues to face grave threats from the Soviet Union. Overindustrialization has produced labor shortages which have triggered floods of immigrants. By 1979, only 64.7 percent of the country's population was Estonian. In Tallinn, the Estonian capital, only 51.5 percent of the population is Estonian. When its new harbor is completed, this percentage could fall even further.

Equally frightening are Soviet attacks on the very language and culture which give Estonia its identity. Recently, a Helsinki newspaper printed photocopies of a Soviet order that the Russian language be given perferential status in all government and educational activities in Estonia. Such suppression of a people's language is intolerable, and we in the free West must continue to speak out strongly against Soviet dominance of Estonia.

I ask my colleagues to join me in continued opposition to Soviet oppression of Estonia. We must each reconfirm our nonrecognition of Soviet incorporative actions, and renew our dedication to the dignity, the independence, and the freedom of the nation of Estonia.●

BARD YOUNG: AN OUTSTANDING UNION LEADER

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. FORD of Michigan. Mr. Speaker, during my career in public service spanning more than two decades, I have never known a more dedicated and forward-thinking union leader than Barden Young, director for region 1E of the United Auto Workers. As he completes his career of 41 years of service with the UAW, it is indeed an honor to have my colleagues' attention to pay tribute to a man who has my utmost respect and admiration.

Long before they were a daily phenomena, Bard Young had the foresight to recognize that plant closings and the havoc they would wreak on communities throughout the country were a problem to be addressed by the Congress. He devoted a considerable amount of his personal time and effort in helping then-Senator Walter Mondale and me draft plant closings legislation. His research and diligence remain the core of legislation I introduced in subsequent sessions of Congress.

His astute observations also warned us of the international energy crisis we would face, and the increasing power of big oil and gas corporations. I only wish that more of us had heeded his predictions when there was more potential for controlling what have become runaway prices.

From the very beginning of his union stewardship organizing Wolverine Tube, which would become a unit of Walter Reuther's home local, Bard displayed the courage in leadership which would propel him into an influential role as an international UAW representative in June 1944. He established a firm base in region 1E during his tenure as the administrative assistant to then Codirector Ed Cote. Then in 1962, Bard was elected regional director for 1E and has been re-elected at each subsequent convention. His name is familiar throughout my district and the State of Michigan in labor, political, educational, and governmental circles, from Detroit to Flat Rock, Romulus, Northville, Wayne, Ypsilanti, and Saline.

On a daily basis, Bard oversees some 300 individual contracts, administered through 29 local unions, and provides services to 50,000 UAW members. At the same time, he has devoted considerable time to the Democratic Party, and has served as a delegate to the last four National Democratic Conventions. He is also currently the elected chairman of both the Monroe and Washtenaw area UAW-Community Action Program Councils and vice chairman of the Wayne County UAW-CAP Council.

Bard has been a vital force in many, many peoples' lives—a strong advocate for health and safety in the workplace, a fighter for fair wages, and equitable treatment for all. While he is leaving the UAW in an official capacity, I know I speak on behalf of my constituents, his brothers and sisters in the union movement, and the State of Michigan when I urge him to continue his active role in the UAW and the Democratic Party.●

JAMES J. WARREN COMMEMORATES 25 YEARS AS MEMBER OF THE BOARD OF TRUSTEES OF THE STATE UNIVERSITY OF NEW YORK

HON. SAMUEL S. STRATTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. STRATTON. Mr. Speaker, it is my distinct honor to be able to advise my colleagues that James J. Warren of Albany, N.Y. retired at the end of last year after giving 25 years' service as a member of the board of trustees of the State University of New York.

Mr. Warren was appointed to his position by former Gov. Averell Harriman and served with distinction in dealing with many complex problems that confronted the State University of New York system during the early developmental stages as well as in recent years when the system has become one of the preeminent State university systems in the United States.

He rose to the position of vice president of the board of trustees. Even in the face of this very demanding job, he always found time to take an active part in numerous community interests in the Albany area, while at the same time operating a plumbing business.

James Warren is one of those truly unique individuals who has gone above and beyond the call in serving his community and State for many years. It is my honor to insert in the RECORD at this point two editorials from Albany newspapers commending James Warren, as well as a newsstory detailing the retirement dinner given him in December.

[From the Albany Knickerbocker News, Dec. 14, 1982]

"MR. STATE UNIVERSITY"

Like many Albanians, James Warren has seen the State University of New York grow in achievement and stature in the last 25 years. Unlike his fellow citizens, though, Mr. Warren has been more than a casual observer—he had much to do with that growth because he has served on the system's Board of Trustees for a quarter century.

Tonight, some 500 friends and associates will honor Mr. Warren at a dinner at the Empire State Plaza. Then, at the end of the month, Mr. Warren will officially retire from the board.

Though he is well known in this city both as a businessman and tireless civic worker, Mr. Warren's role as vice chairman of the SUNY trustees has been anything but ceremonial. He has guided the system in such divergent areas as administration, Regents liaison, help for the educationally and culturally disadvantaged, even site selection. He played a role in the selection of the old D&H and Albany Journal buildings as SUNY headquarters, thereby saving two priceless assets of Albany history.

Mr. Warren's efforts for SUNY have earned him a reputation as "Mr. State University," and Richard Gillman, SUNY assistant vice chancellor, believes that "says it all" about this extraordinary man.

But not quite. Some words of tribute and thanks are in order for so long a period of dedication. Tonight is a fitting time for those words.

[From the Albany Times-Union, Dec. 11, 1982]

25 YEARS

James J. Warren, the only Albanian now serving on the State University of New York's Board of Trustees, will retire at the end of this month after 25 years' service to the university.

Appointed by Gov. Harriman in 1957, Mr. Warren's years of service coincided with the university's greatest period of growth. For those years of dedication, he will be honored at a dinner Tuesday, Dec. 14, at the Empire State Plaza Convention Hall.

The honor is well-deserved. We congratulate Mr. Warren and wish him the best of luck.

[From the Albany Times-Union, Dec. 15, 1982]

SUNY MUSTERS 500 TO SALUTE WARREN

James J. Warren claims he just happened to "fit the bill" in 1957 when former Gov. W. Averell Harriman was seeking someone to appoint to the Board of Trustees of the State University. "He wanted a Democrat from upstate who was a Catholic," Warren chuckled Tuesday.

Warren, a plumber who never went to college, will retire as vice president of the board of trustees on Dec. 31, after 25 years. He was honored Tuesday evening for his accomplishments in education at a dinner with 500 students, faculty and staff in the main convention center at the Empire State Plaza.

When Warren joined the board, "It was even difficult to get a chancellor," he said. "Now people are looking for the job."

When he was appointed, the system had only 37,000 students. Today there are 380,000, making it the largest state university system in the country.

Graduated from the Vincentian Institute in 1930, Warren went directly to work in the plumbing and heating business established by his father in 1906.

He became active in the Vincentian athletic program through membership in the school's Men's Association. Soon he was involved in, and eventually president of, such organizations as the Albany Community Chest, the Council of Community Services, the New York State Welfare Conference and the State Association of Community Councils and Community Chests.●

AN EDUCATIONAL MILESTONE: UND'S 100TH BIRTHDAY

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. DORGAN. Mr. Speaker, yesterday the State of North Dakota began celebrating a milestone in its history—the 100th birthday of the University of North Dakota in Grand Forks.

I am honored to be a graduate of UND and am proud of its contributions to the State and Nation.

The University of North Dakota was founded 6 years before North Dakota won statehood. Legislation establishing the university was signed into law by Territorial Gov. Nehemiah Ordway on February 27, 1883. In October, the cornerstone for UND's first building was laid. The next year, the first students showed up on campus—11 the first day and 79 during the first year.

With only three high schools in the northern half of the Dakota Territory, UND's four faculty met after the first day of class and decided that not one of the new students was qualified to attend college.

It took 5 years to turn out the first graduating class. The faculty decided to bring its students up to university level first.

In its first century, the university matriculated more than 132,000 students. Today, its enrollment tops 11,000 students, representing every North Dakota county, every State in the Nation and 44 foreign countries.

The University of North Dakota has evolved into the State's largest and most diversified institution of higher education, offering more than 130 instructional programs at the undergraduate and graduate levels through 11 schools and colleges.

I join other State officials in offering my congratulations to a great institution, the University of North Dakota. Happy 100th birthday, UND.●

A FAREWELL TO BEN GILMAN

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. FISH. Mr. Speaker, in February, the town of Newburgh's Republican Committee held its annual Lincoln Day dinner. The committee honored our good friend and colleague, Congressman BEN GILMAN, as its man of the year. Congressman GILMAN was redistricted out of the Newburgh area, and now I have the honor of representing this historic area of New York. I realize what big shoes I have to fill in following BEN.

I would like to share with my colleagues the tribute appearing in the dinner journal.

Benjamin A. Gilman has been the epitome of a public servant to the people of Orange County and the Mid-Hudson Valley. His energy and determination are legendary; his devotion and dedication are unmatched.

Ben Gilman was initially elected to the House of Representatives of the United States in 1972, and has been reelected to each succeeding Congress. Despite redistricting which caused us in Eastern Orange County to lose his representation, Mr. Gilman was reelected in 1982 over another incumbent who had never lost a Congressional election.

The scope of Mr. Gilman's victory was a tribute to the reputation he has justly earned over the years as a true representative of the people and champion of the underdog.

Those who are concerned about the plight of our POWs and MIAs—those who are concerned about the future of mass transportation in our region—those who are concerned about our senior citizens—those who are concerned about world hunger—those who are concerned about the loss of human justice and dignity throughout the world—those who are concerned about bringing economic development to our region—all of these groups and many others know that they have a special friend in Ben Gilman.

In their four page profile of Ben Gilman on June 19, 1978, People magazine said: "Ben Gilman sees his political life as one long effort to help individuals in distress."

Born in Poughkeepsie, raised in Middletown, and educated by the Middletown public school system, Ben Gilman skillfully represents Orange County because he is truly one of us.

He served in the 19th Bomb Group of the 20th Air Force during World War II, when he earned the Distinguished Flying Cross and Air Medal for flying 35 missions over Japan. A graduate of both the Wharton School of Finance of the University of Pennsylvania, and New York Law School, Ben Gilman was well trained for his career of public service—of helping others.

Ben served as an Assistant Attorney General of New York State prior to his election to the State Assembly in 1966. His distinguished six year tenure in the State Legislature made him the natural choice for Congress in 1972, when he defeated a three-term incumbent of the other party.

Ben's services in Orange County would fill many pages in this booklet; he is past county commander of the VFW, a member of the JWV, the American Legion, the Elks, the Grange, the Local, State, and National Bar Associations, the Hudson-Delaware Boy Scout Council, the ZBT Fraternity, and on and on.

Now that Ben Gilman is beginning his sixth term in Congress, it promises to be his most effective ever. He is now Ranking Minority Member on the House Select Committee on Narcotics Abuse, and is Ranking Minority Member on two Subcommittees of his two primary Committee assignments—the House Foreign Affairs Committee and the House Post Office and Civil Service Committee. As the years have gone by, Mr. Gilman's stature as a national leader has grown, so that now he is respected, admired and loved by his colleagues in Washington as he has been by us in New York.

Unfortunately, we in Eastern Orange County and Southern Ulster County can no longer claim him as our own.

And so tonight we join in bidding Ben Gilman a fond farewell, with the hope that someday, the boundary lines will be redistricted again, so that we will regain his sterling leadership.●

ALLEGRO KIDS—SETTING AN EXAMPLE FOR AMERICA

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. PATTERSON. Mr. Speaker, although America is struggling through these difficult times of high unemployment and limited financial resources, the spirit of sharing with the less fortunate is vibrantly alive in the hearts of many citizens.

In my home district a group of more than 200 young musicians of various ages are sponsoring a "concerthon" in order to raise money for the Muscular Dystrophy Association (MDA). It is refreshing to know that these young people are willing to donate their talents to assist those who are in need.

The Allegro Kids, as they are affectionately known, are students of the Allegro Music Studio in Buena Park, Calif. Their concerthon will feature accordion music ranging from classical to popular rock and roll.

In 1981, the Allegro Kids successfully raised $10,000 for MDA, and this year they hope to surpass that figure through the proceeds collected from the sale of tickets, record albums, other items, and a door-to-door canvassing effort.

Mr. Ed Kearney, coordinator of this humanitarian fundraising event is also the founder and director of the Buena Park Allegro Music Studio. Ed's commitment to music and children is reflected in his studio motto which reads: "All Tomorrows Belong to the Children and the Children Belong to Us All."

It is with great pleasure that I invite my colleagues to join me in recognizing Ed Kearney and the Allegro Kids for their unselfish efforts and outstanding community service. Their work is an inspiration to us all and we hope that the 1983 concerthon is a resounding success.●

AGRICULTURAL COMMISSIONER REX LYNDALL RETIRES

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. COELHO. Mr. Speaker, the history of California's ascendancy to the top spot among the agricultural States of this Nation is replete with stories of individual commitment and dedication of heroic proportions. I would like to bring to the attention of my colleagues a particular gentleman who has dedicated his professional career to public service in California's agricultural heartland. Mr. Rex Lyndall, who retired at the end of 1982, has served for over a quarter of a century as the agricultural commissioner in Merced County, Calif.

His integrity, commitment, and knowledge have made him a tough standard against which other agricultural commissioners will be judged. As the following article from the Merced Sun-Star demonstrates, Rex Lyndall, dean of California agricultural commissioners, deserves our hearty congratulations on the occasion of his retirement. His departure from the day-to-day agricultural operations of Merced County has created a void not easily filled.

Mr. Speaker, at this point I offer the aforementioned article.

OUTGOING AG OFFICIAL LOOKS BACK ON CAREER

(By John Spitler)

Adjusting himself in his new office's comfortable highbacked chair, Rex Lyndall chuckles as he recalls the beginning, how it was when he first broke in as an agricultural commissioner.

That was up north in foggy Del Norte County in 1951.

Lyndall, who retires at the next week, remembers with a smile—and possibly a touch of sentiment—the quaint 10-by-20-foot wooden-framed house that was his office. And how a prisoner from the local jail would come by early each morning and build a fire in the building's little cast iron pot-bellied stove.

How there were no telephones, or biologists, inspectors, clerks, or assistants to direct or fret about.

Just Rex Lyndall.

"I was the only one working for me," says the 23-year Merced County veteran. Indeed. He did all the inspecting, measuring, checking and issuing of permits. "I even did my own typing," Lyndall recalls, grinning.

Today, by contrast, there is no one man department.

Forty-eight full and parttime employees conduct the day-to-day business of the Merced County Agricultural Commissioner's office. Their job descriptions cover the gambit, from clerks and biologists to animal control officers and vertebrate control field men.

And they operate out of spacious 25,000 square foot quarters repleat with a large adjoining classroom. Behind the office is a product testing laboratory, workshop, bait mixing facility, metrology and nematode laboratories and equipment and storage areas. All are part of the new County Agriculture Center in northwestern Merced.

Lyndall says that although his surroundings have changed dramatically in 31 years as an agricultural commissioner and sealer of weights and measures, the basic purpose remains intact.

Except nowadays there is considerably more emphasis on pesticide use enforcement and environmental concerns. "There is emphasis now toward consumer protection," the commissioner says.

"There is a lot of emphasis on contents of packages as well as quality of certain products, including gas."

But agriculture, for its part, has changed a good deal since his coming here, he says. Farming operations have become more centralized, more mechanized, less labor intensive.

"When I first came here," he says, "there was a lot of fruit packing on the farms. It was hard to control quality. At the present time most packing is done at central packing sheds.

"In 1960 there was still a lot of cotton being picked by hand. Tomatoes were all picked by hand. Now, both cannery tomatoes and cotton are all machine picked," Lyndall says.

One of the most interesting evolvements Lyndall has seen in the 20 years he's been here has been the dramatic increase in the use of pesticides by farmers. He says, for example, farmers used to use "weeder" grease in cotton to control the small weeds. Today, for the most part, this chore has been taken over by chemicals.

"There has been the development of exotic products including kiwis and pistachio nuts," the commissioner says. "There was a period of time," he recalls, "for planting citrus here, but because of severe frosts . . . only one small citrus orchard is left in the county."

Lyndall also notes the amazing increase in almond and cotton plantings since his early days in the county. Almonds represented just a few thousand acres in the late '50s. There are nearly 60,000 acres today.

Cotton has done about the same. Peaches, on the other hand, slipped in status from many thousands of acres to just over 4,000 acres countywide today. Row crop vegetable often took their place.

And as the county's farming face changed, so too did its urban centers. Thousands of new residents moved here with Air Force assignments, to retire or to seek their fortunes free from the rigors of the big city.

Admist all this change, the agricultural commissioner's office found itself being unavoidably drawn into an ever larger role as the watchdog between the producing and consuming publics.

Local officials who watched this taking place have appreciated Rex Lyndall's quiet efficiency.

Former Merced County Supervisor Johnnie Ramondini had this to say: "He was dedicated to his department, a real asset to the community . . . and he always worked very closely with the public."

Ramondini says that, unlike many counties, Merced County has had few problems with pesticide poisonings or misuse. "Rex always made sure spraying was done at the proper time. He or his men would go out and check conditions and wouldn't issue a permit if the weather wasn't right. He wouldn't gamble it.

"He ran a very conservative department," Ramondini continues, "but not too conservative." He always kept very efficient people who were up to date and who were knowledgeable in agricultural pesticides.

Lyndall was born in Antioch, but raised and schooled in Hayward. Work experience before beginning as an agricultural commissioner included work with the U.S. Maritime Service, employment with the Alameda County Mosquito Abatement District and as vector control officer for two hospitals in San Leandro.

Lyndall is a member of the Lake Port Masonic Lodge, the Scottish Rite Temple in San Jose and the Rotary and Elks clubs here.

Friends and associates are invited to attend a 2 p.m. Jan. 23 buffet reception and dinner for Lyndall in the Merced Elk's Lodge, 1910 M St. Friend. Those seeking information should call 726-7431.●

PAC MAN GOES TO ASIA

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. HERTEL of Michigan. Mr. Speaker, I bring to the attention of my colleagues an article which appeared in the February 23 edition of the Washington Post. The article reports that Atari, Inc., plans to lay off 1,700 of its workers in California as a result of moving its production to Hong Kong.

I find this announcement to be perplexing in light of all those reports we have been reading about which project a grand scale expansion of high-tech industries to take up the slack—in jobs and production—of our seriously depressed manufacturing sector. The advocates of this scenario espouse the theory that a dying steel industry should be laid to rest in lieu of the onslaught of Pac Man technology.

I represent a district in Michigan which depends upon the vitality of a sound and productive auto and steel industry. These are industries savaged by a major economic downturn and other circumstances which have produced massive unemployment and major distress to those communities dependent upon the economic activities of the manufacturing sector. As these industries have declined, the Atari's of the world have promised high-tech jobs for the massive void in manufacturing.

If we continue to depend on the evolution of the service sector and high-technology industries to employ our jobless workers, we will be sorely disappointed. What is needed is an economic policy which will help us rebuild our basic manufacturing industries, to strengthen our industrial capacity, and to put America's people back to work. We must not be mesmorized into a false sense of security that there is a job waiting around the corner of every computer or that a high-tech society is a panacea.●

INDEXING IS CENTRAL TAX ISSUE OF OUR TIME

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. KEMP. Mr. Speaker, the central tax issue of our time is indexing the personal tax code to protect American workers from automatic, inflation-caused tax increases.

Those who want to keep indexing stand for the idea that individual workers and savers have a right to their earnings, and that any taxation must be by representation. The average American family would be hurt by the repeal of indexing, since 78 percent of the tax increased would fall on those with incomes of less than $50,000 a year, and 86 percent of all small businesses pay individual, not corporate, income tax rates.

I once heard a Democratic Senator say that in all his years in the Senate, he had never once voted for a tax increase—and that was why he opposed indexing, so he would never have to. Those who want to repeal indexing prefer the "midnight tax" to an accountable up-or-down vote. They must logically also stand for more inflation—because you cannot raise revenue unless the Government inflates the currency and devalues the dollar.

I want to recommend to my colleagues the following editorials that appeared in the Finger Lakes Times and the Buffalo Evening News. After reading them, I think you will agree that the only honest way to freeze taxes is to keep indexing.

[From the Finger Lakes Times, Feb. 16, 1983]

THE PLAN TO KILL TAX INDEXING

(By Ernest Conine)

If Paul Revere is still around, it is time to saddle his horse and prop him up for another ride—this time to warn the American people that congressional Democrats are cranking up a campaign to repeal one of the

new genuine tax reforms to be enacted in our lifetimes.

In 1981, Congress passed a law that, in addition to tax breaks for business, provided for a three-stage 25 percent reduction in personal income taxes and a system of so-called tax indexing, to begin in 1985.

If Americans have to give up indexing or the third-stage 10 percent tax cut due next summer, they would be well advised to tell their congressman that they prefer to skip the tax reduction and keep indexing.

Tax indexing is an abstract-sounding phrase used to describe a process under which taxes are automatically adjusted to take account of inflation. That sounds fair enough, and it is.

However, virtually every key Democrat in Congress, including House Speaker Thomas P. O'Neill, Jr. and senior Democrats on the tax-writing committees in both houses, want indexing repealed. And, while President Reagan flatly threatens to veto any such measure, the determination to defend indexing is far from solid among key Republicans on Capitol Hill and even within the administration itself.

Why the compulsion to get rid of indexing now, two years before it would take effect? The answer is obvious to anyone who understands both indexing and the thought processes of politicians.

As things stand without indexing, the progressive tax system works to push people into higher tax brackets when their incomes rise, whether the higher income results in more purchasing power or merely keeps them even with inflation.

The result is that, in times of inflation, tax revenues rise 1.6 times as fast as aggregate personal income. In other words, if prices rise 13 percent and a typical family's income also rises 13 percent, that family's taxes will rise not 13 percent but almost 20 percent.

It follows that the percentage of the gross national product going to the government moves up, too—all without members of Congress having to suffer the political pain of voting for higher taxes.

This inflation dividend is a godsend to members of Congress, and Democrats, especially, are loath to give it up. But, while the revenue-generating propensities of an unindexed tax system make life easier for politicians, the burden of unlegislated tax increases on the average citizen are just as real as when Congress raises taxes openly instead of on the sly.

Growing public comprehension of that fact led to the enactment of the indexing provision of the 1981 tax law. Beginning in 1985, the personal income tax tables will be adjusted in accordance with the rate of inflation the previous year.

If by chance the inflation rate was zero, there would be no adjustment; indexing would not come into play that year. But if the inflation rate was 10 percent, for example, the entry level into each of the tax brackets would be raised 10 percent.

Contrary to what its critics would like you to believe, indexing does not produce tax cuts. Revenues would continue to rise in lock step with inflation and economic growth. But taxes would no longer rise at a disproportionate rate, thrusting taxpayers into higher tax brackets even when their incomes, adjusted for inflation, had not increased at all.

Members of the anti-indexing camp argue that, with the federal budget awash in red ink, the country simply cannot afford indexing. What they really mean, but prefer not to say, is that taxes must be increased, but they want to be spared the necessity of openly voting for the higher taxes.

From the standpoint of holding the federal budget deficit to tolerable proportions, it became obvious months ago that tax cuts provided by the 1981 law were too large.

Rising concern over the huge deficits that were in prospect led to the enactment last year of some partly offsetting tax increases. Even so, the red ink for fiscal 1984 alone is estimated at almost $200 billion, which is well above President Jimmy Carter's four-year total. Unless something is done, the national debt could increase by an explosive trillion dollars by 1988.

Deficits of that magnitude would guarantee a return to high interest rates and, in the opinion of most economists, keep both the American and the world economies in the doldrums for years to come.

Let us face it: Something has to be done about the frightening budget deficits in prospect for the next few years, and that something almost certainly includes tax increases.

Indexing's repeal would, according to the Congressional Budget Office, bring a total of about $90 billion in extra revenues through fiscal 1988. The estimate apparently presumes an inflation rate of a bit under 5 percent.

But Congress does not have to repeal indexing to increase revenues. It need only raise taxes in full view of God and everybody.

Leaving indexing intact even as taxes are being raised seems illogical at first thought, but it is not. Indexing is a sort of truth-in-taxation law; it forces government to be honest with the people by taking the appropriate political responsibility when tax increases are deemed necessary.

Let us also stipulate that, as the California experience is demonstrating, indexing can have an unfortunate effect on revenues when the country is simultaneously experiencing inflation and severe economic recession. Under these circumstances, the cost of providing a given level of government services continues to rise but revenues fail to keep pace.

A case can be made for amending the tax-indexing provisions to allow the president to suspend indexing for a given year by executive order when his economic advisers officially predict that economic growth in that year will be less than, say, 1 percent.

Alternatively, the law could be amended so that indexing would apply only to the extent that inflation exceeded 3 percent or some other threshold level.

But Democratic leaders in Congress are not interested in fine-tuning the tax-indexing provision; they want to kill it.

If the American people are on their toes, it would not be allowed to happen.

[From the Buffalo Evening News, Feb. 14, 1983]

DON'T REPEAL PROTECTION AGAINST "BRACKET CREEP"

The federal tax law passed by Congress and signed by President Reagan in 1981 contained an incisive reform that will protect taxpayers, beginning in 1985, from the pernicious effects of so-called "bracket creep." Unfortunately, however, some influential Democratic leaders in Congress, including Rep. Daniel Rostenkowski, chairman of the principal tax-writing committee in the House, now want to repeal this enlightened reform before it even takes effect.

Bracket creep occurs, of course, when pay raises designed to compensate for inflation provide more dollars to workers, thus pushing them into higher personal income-tax brackets.

The workers then pay Washington more in taxes even though the extra dollars they received in their paychecks did not, because of inflation, actually increase their "real" income. Because of inflation, the added income buys no more. Yet those extra dollars still require steeper tax payments.

The 1981 reform sought by the President and approved by Congress corrects this injustice by indexing the income-tax system to rises in the cost of living.

Those who want to repeal the indexing feature often point to the large federal budget deficits looming in the years ahead. But indexing would not prevent Congress from increasing income tax rates in the future if it decides the government needs to raise additional revenues.

What indexing would do is deny Washington the automatic revenue bonus it now gets from inflation. That is money the government receives without having to vote to raise taxes. Bracket creep conveniently assists legislators who want to spend more public money each year but do not want to vote higher taxes to finance the higher spending.

For the public, however, that offers another reason to keep indexing in the law, not to remove it. Fortunately, many in Washington, including President Reagan and such House leaders as Rep. Barber Conable of Alexander, support indexing. Calling indexing "the most significant part" of the 1981 tax reform, Rep. Conable has pledged to "do everything I can to preserve it."

So should all members of the House and Senate who are concerned about the integrity of the tax system and its impact on taxpayers. Government should not benefit from the same inflation that robs the public—and indexing helps assure that it won't so benefit. If government really needs more money, then elected officials should raise taxes openly and be held accountable for that decision—and indexing promotes such democratic accountability.

Indexing represents a common-man reform. It fairly shields workers and families from tax injustices due to inflation. Without question it should be preserved in the tax law.●

LEARNING ABOUT THE RUSSIANS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to bring the following article from the Cincinnati Post to the attention of my colleages.

GETTING TO KNOW YOU . . .

(By Richard Reeves)

LENINGRAD, U.S.S.R.—The squeeze bottles on the bench of the United States team in the World Junior Hockey Championships early this month were filled not with water but with Russian Pepsi-Cola. It was just another Soviet-American misunderstanding: American stomachs can't tolerate the brownish local water, but when American

coaches wanted the stuff boiled, the Soviets thought they were being deliberately insulted.

So, armed to the teeth, with hockey sticks and hydrogen bombs, the two proud military superpowers continue stumbling into the future—a future each has the capacity to destroy. "Never in human history," said Rep. Paul Simon, D-Ill., who happened to be here during the championships, "has it been so important that two peoples understand each other. And what's happening? "Not much," he said, answering his own question. "And we seem to be the people doing the least about it."

Simon is one of the few members of Congress who seems genuinely concerned about the lapse of U.S.-Soviet cultural exchange agreements and the astonishing decline of Soviet studies in American universities and research institutions. (The concerned members of Congress include Sen. Richard Lugar, R-Ind., Sen. Joseph Biden, D-Del., and Rep. Lee Hamilton, D-Ind.)

Fewer and fewer Americans are learning less and less about the people, the culture, the politics and the principal language of the other superpower. There are extraordinary statistics to show this: There are only 100 or so teachers of Soviet economics working in American universities; there are fewer than 300 advanced (third year or better) Russian-language teachers in the entire United States; the number of Ph.D. theses on Soviet policy is fewer than 10 a year.

On the Soviet side, English is the official second language of a country that has 130 of its own languages spread across 11 time zones. Soviet high school students are required to read American writers from James Fenimore Cooper and Mark Twain to Sinclair Lewis and Tom Wolfe. Speakers at Communist Party functions and editorials in Pravda, the party's newspaper often assume that audiences and readers are regular listeners to the Voice of America and the British Broadcasting Corp.—which they are.

But Americans, official and unofficial, seem determined to become even more ignorant about our great rival for world power. More than 50 American colleges have dropped Russian-language courses during the past three years, while the president of the United States has been speaking and acting as if he is content to have his nation see the Soviet Union as nothing more than a marauding dragon that must be slain.

Actually, the Soviet Union, up close, looks more like a dinosaur than a dragon. The Marxist-Lennist experiment is failing—and that is no secret to the people living in or even running the Soviet empire.

But the fact that it is not heaven does not mean that the Union of Soviet Socialist Republics will collapse of its own ponderous weight. It just doesn't work very well. And the people who run it, starting with Yuri Andropov or whoever will be in charge for the near future, are going to have to try to do something, probably something drastic, about that.

The need to concentrate on structural reform at home—Soviet productivity is not going to be increased any more by putting heroic workers' pictures on factory walls—is one reason that there is no doubt in my mind that Soviet leadership really wants arms control agreements much more than, say, President Reagan does. Another reason is that, despite a 20-year military buildup, the Soviets will inevitably fall behind the United States in the future as weaponry becomes technologically more and more complex. The overall technological gap between the two societies today is wider than it was during the reign of Peter the Great at the beginning of the 18th century—and it will widen every day, in peace and war.

That is not necessarily a comforting thought—for the Soviets, for Americans, for the world.

Do we want to ignore and caricature the Soviets and push them to the wall economically and militarily? Or are our interests best served if the Soviets have the time and the room to get their nation working reasonably well—buying a lot of American products and processes along the way—while both superpowers continue to attempt to find some balance of military terror and security?

I, for one, would rather sell to them than beat them. But it will never be easy establishing a working arrangement. That can only begin with greater knowledge, contacts and exchanges—beginning with efforts like the Lugar-Biden "Soviet studies bill" establishing just a $50 million federal endowment to finance research and analysis.

The interest on the endowment will buy a little knowledge. Understanding, though, can't be bought—only work will over the long term. I said to Dr. Sergey Plekhanov of the Soviets' U.S.A. Institute: "If I were the president of the United States, and I gave you my word that we would never use nuclear weapons first, would you believe me?"

"Such things," he answered, "are never taken on trust."

"No," I said, "Not by us either."●

ENERGY TAX CREDITS HELP LOCAL COMMUNITIES

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. BEREUTER. Mr. Speaker, in recent months, the energy tax credit incentives for development and utilization of alternative energy forms have been under attack. Labeled as wasteful or ineffective, the credits have been a prime target for individuals seeking to close loopholes and raise revenues.

Recently, the announcement of a new waste-to-energy powerplant in Lincoln, Nebr., proved the value of these tax credits. Thanks to these credits and accelerated depreciation provisions of the 1981 Economic Recovery Tax Act, more than 200 temporary construction jobs will be created in the community by this plant. Roughly 20 permanent jobs will be created and the environmental condition of the city will be improved as well.

I encourage my colleagues to read the following article from the Lincoln Star which describes this noteworthy project. Certainly, your communities could reap similar benefits if these credits are continued.

[From the Lincoln Star, Feb. 4, 1983]

PROPOSED POWERPLANT WOULD BURN CITY GARBAGE

(By Gerry Switzer)

Wheels have been set in motion to gain city approval for plans to construct a $20 million waste-to-energy plant at 32nd and Huntington streets.

The proposed plant would generate steam power for the University of Nebraska, double the proposed life of the city's landfill, and create temporary jobs for 200 local construction workers, as well as 18 to 22 permanent jobs.

Energy Complexes Inc., based in Sioux Falls, S.D., next week will submit a request for a special use permit to construct a garbage-burning facility on the property, which otherwise is adequately zoned, an ECI official said Thursday.

In outlining the proposal to members of the Waste Energy Task Force, ECI president Robert Hoff said if approval is obtained, construction would get underway by early summer. Completion of the plant is slated for the fall of 1984.

He said the contractor would be a New Jersey firm which would subcontract locally and use practically all local workers on the project.

Hoff said ECI has acquired an option for purchase of the site from George Abel.

Mayor Helen Boosalis said she has no problem with the location and the proposed plant would tap a source of energy that otherwise would be wasted.

"I think its fine," she said, noting the proposed plant is somewhat smaller than had been discussed earlier, "but it's still a great help to our landfill."

Hoff said over the last three days he and other representatives of his firm have held 14 meetings with city officials, Chamber of Commerce members, bankers, neighborhood groups and garbage collectors.

He said ECI wants all parties to have as much information about the plan as possible before the matter goes to the Planning Commission and City Council.

Hoff said the site would allow the waste-to-energy plant to supply steam to both UNL campuses.

Although no agreement has been drawn, contract negotiations are underway with UNL for selling steam from the plant, he said.

UNL would be the plant's sole customer, Hoff said. If an agreement is not reached with UNL, the plant probably would not be built.

"Without a steam customer, you have nothing," Hoff said.

He said he anticipates no problems in obtaining the right-of-way for pipelines. Negotiations already are underway with Abel for acquisition of an easement on the former railroad track right-of-way from the plant site to 17th Street where the land becomes university-owned property.

ECI already has obtained a pollution permit and ECI officials claim no odor is emitted from the completely enclosed tipping floor and pit area.

"The only difference between this and any other power plant is that you just so happen to use garbage" to generate the power, Hoff said.

The air leaving the plant through the stack will meet or exceed state and federal standards for air quality, ECI officials said.

The concrete structure has been "totally over-designed" in anticipation of more stringent Environmental Protection Agency laws which might be implemented in the future, Hoff said.

Although federal cutbacks have eliminated grants and loans that might have been available to the city through the U.S. Department of Energy, new tax incentives are playing a major role in this proposal.

Hoff said the investment and energy tax credits and the 1982 Economic Recovery Act provision for accelerated depreciation "make the economics of the project work."

"Frankly, if it were not for those," he said, "it could not be done."

A year ago ECI entered into negotiations with the city for a similar plant at 78th and Fletcher on land adjacent to the Archer-Daniels-Midland facility.

After negotiating for nine months with ADM for a contract to supply steam for the soybean processing plant, no agreement was worked out, Hoff said.

Projected to significantly extend the life of the city's landfill, the proposed incineration plant would reduce buried volume by approximately 90 percent, Hoff explained.

Plant operation would not require residents to separate their garbage, as earlier plans before the city had suggested.

According to the ECI proposal, the plant would be designed to process and burn a maximum of 240 tons per day and would have the capability of processing refuse around the clock.

Hoff said steam output would average 500 million pounds annually.

Between 25 and 50 trucks would enter the gates daily, be weighed on a truck scale, and then proceed to the tipping area. They would be backed into one of the eight stalls where the driver would dump his load into the refuse receiving pit.

A clamshell crane would mix and pick up the waste and load it into a hopper which would hydraulically ram-feed it into the rotary combustor where the garbage would be incinerated, Hoff explained.

Heat from the incineration would be collected to create steam in a boiler.

The sterile ash, reduced to 5 to 10 percent of the volume of the refuse which is fed into the combustor, would then be taken to the landfill, Hoff explained.●

CONGRESS MUST ACT TO PROVIDE RELIEF TO NATURAL GAS CONSUMERS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. MAZZOLI. Mr. Speaker, the recession has really hurt my hometown of Louisville and Jefferson County, Ky. Unemployment is over the 10 percent mark and high interest rates continue to squeeze small businesses out of existence. Consumers—especially the elderly on fixed incomes—are hard-pressed to afford the necessities of life: food, shelter, and heat.

In the midst of these tough times, in Louisville and Jefferson County, where over 80 percent of the households use natural gas for heating, gas prices rose a whopping 35.2 percent in 1982. Something has to be done.

To understand this whole matter, we have to go back to 1978 when Congress passed the Natural Gas Policy Act (NGPA). This was one part of a larger plan designed to deal with the shortage of oil and gas in America brought on by the Arab oil embargo of the early 1970's.

The NGPA lifted the controls on prices the producers could charge for certain kinds of "new" gas—mostly that from deeper deposits and hard-to-reach areas. This was done in order to increase the economic incentive and, thus, encourage producers to drill for natural gas.

But the NGPA did not remove price controls of "old" gas—gas already discovered and already flowing through pipelines. This protected consumers from paying high prices for gas already on hand and available.

The Natural Gas Policy Act of 1978 was adopted against a background of severe supply shortages of gas. In the late 1970's there were business and factory shutdowns and school closings because of gas curtailments. We do not have such situations today. So, to that extent, the NGPA has been successful.

But since the gas supplies are now so extensive that we have a glut on the market, I am disappointed and chagrined—as we all are—that the price of natural gas has not gone down. Instead it has gone up sharply.

One of the culprits here appears to be take-or-pay contracts. These contracts provide that gas pipelines must pay producers for the gas they have contracted to purchase whether or not the pipelines have customers for the gas. Take-or-pay contracts have, in many instances, forced pipelines to sell high-priced "new" gas to consumers—raising our gas bills—while leaving cheaper "old" gas in the ground.

To address this problem, I have cosponsored H.R. 4 to allow pipeline companies to ignore take-or-pay clauses up to 50 percent of a contract when there is a surplus of gas.

Another bill I have cosponsored, H.R. 873, requires pipelines to deliver the least-cost mix of old and new gas to the local utilities. It also gives pipelines the authority to refuse to take high-priced gas offered by a producer if lower-priced gas is available.

Other legislation I have cosponsored would give the Federal Energy Regulatory Commission (FERC), which oversees natural gas matters, the authority to deny rate increases requested by public utilities where FERC finds the utility to have made imprudent gas purchase agreements. In other words, my bill makes sure the consumer does not have to pay through the nose because the gas pipeline failed to bargain hard with gas producers to get the lowest price for the gas.

The President, too, has been examining this difficult situation. But he seems to favor a solution which I feel will be worse than the problem. He wants to immediately decontrol all natural gas prices. I have added my name to House Resolution 38, which expresses the sense of the House that no such decontrol should be permitted.

One thing is clear. It is time to take action to provide necessary relief to all gas consumers in Louisville and Jefferson County and the entire Nation.●

GIVE PEACE A CHANCE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an important article by David Carsen entitled "Give Peace a Chance" which recently appeared in the Gannett Westchester Newspaper chain.

David Carsen was an engineer on the Manhattan Project in Oak Ridge, Tenn., from 1943 to 1945, and currently devotes himself to writing about efforts to stop the insane arms race. His is an important voice in the national grassroots disarmament movement which opposes the Reagan administration's drive to expand our arsenals and escalate the arms race.

Mr. Carsen's article makes several important points, two of which I would like to highlight for my colleagues:

First, he was one of a select group of scientists to attend a 1945 meeting at which the concept of total destruction was presented. Physicist Leo Szilard showed that only about 550 first-generation nuclear fission bombs—approximately 15 kiloton—each were necessary to "return the United States and the U.S.S.R. to the stone age." Today there are over 40,000 atomic bombs in the world stockpile, and their yield far exceeds the model used by Dr. Szilard.

Second, in the face of this "monumental lunacy," as Mr. Carsen puts it, we need a new measure of thinking by people of scientific and political stature who are unequivocally dedicated to stopping the arms race. The present arms control negotiators for both superpowers have simply been engaging in "nuclear tango" as our arsenals continue to grow. Indeed I am appalled at President Reagan's nomination of Kenneth Adelman to lead the Arms Control and Disarmament Agency. Mr. Adelman is thoroughly unqualified to direct the Federal agency with primary responsibility for arms control. He is shockingly ignorant of the mechanics of arms control, and has been publicly scornful of disarmament negotiations. That is why I recently circulated a statement expressing concern for Mr. Adelman's nomination. Sixty Members of the House cosigned this statement, which was presented to the Senate Foreign Relations Committee, and will be presented to the full Senate upon its confirmation vote. I am also including in today's RECORD a copy of the letter.

As Mr. Carsen notes in his articles:

The path to peace may take many twists and turns, but all the signposts will read the same; Verifiable nuclear freeze, SALT II with annual reductions; 50 percent reduction in all nuclear arms; and finally, a verifiable arms control relationship. These signposts do not read MX missile; Pershing 2 missile; SS-20 missiles with multiple warheads, ad infinitum, ad nauseam.

I commend this important article to the attention of my colleagues, and congratulate Mr. Carsen for his contribution to the vital debate on arms control.

GIVE PEACE A CHANGE

(By David Carsen)

For two years the world was precariously balanced between two men: A sick old Russian who used tyranny over mind and body as a device for ruling, and a slick old American with a winning smile that continues to belie a meanness of understanding. The recent replacement of the sick one by a master spy will probably drive us closer to war in the pursuit of peace.

Vegetius' maxim "He who would desire peace should prepare for war" has been a failure for 3,000 years. In today's nuclear world it has lost all meaning. Pouring endless billions into nuclear arms creates an unlimited spiral of military growth, but little or no additional defense. Wisdom would dictate following a new maxim: "He who would desire peace should prepare for peace." Wisdom would also dictate that we find this path to peace, because the punishment for refusing to see the common destiny of humanity will be the destruction of each of us in his own separate nation.

To understand the monumental lunacy of the atomic weapons policy being pursued by the ideologues in Washington and Moscow, some history is in order. What makes it even more poignant to me is that it is also personal history.

Several months after the bombing of Hiroshima in August 1945, a meeting was held in New York City to discuss the implications of the new cosmic force that made obsolete toys of all our previous instruments of death. The audience, small and somewhat select, was composed almost entirely of the scientists, engineers and military personnel who helped fashion the first atomic bomb. At this meeting the concept of total destruction was first presented in chilling detail.

The speaker was the physicist Leo Szilard, one of a group of scientists who fled the fascist regimes in Europe, carrying his gift of genius to this country. Using 240 Hiroshima-type bombs of 15-kiloton strength in his model, he showed how the United States could be turned into a radioactive wasteland with most people dead or dying, industrial and population centers charred embers and survivors eugenically harmed. He then did the same thing for the Soviet Union, but he had to use an additional 50 bombs. Give or take a bomb or two, or 50, all that was needed to return the U.S. and the USSR to the stone age was something less than 550 first-generation nuclear fission bombs.

Today, there are more than 40,000 atomic bombs at the ready, almost equally divided between the two groups of antagonists. But even this does not begin to describe the senselessness that has overtaken our peoples and our leaders. Szilard dealt only with "small" 15-kiloton bombs (the equivalent of 15,000 tons of dynamite). Our present stockpiles include large numbers of fusion H-bombs with massive megatonnage (million tons of dynamite). Using a one-megaton figure as the average bomb strength and recognizing that this has 80 times the explosive power of the Hiroshima bomb, one can only question President Reagan's logic when he says he plans to "preserve the values we cherish" by nuclear dismemberment.

There is, however, a real problem when one attempts to deal with the Soviet Union. It is difficult for us, in our democratic society, to trust a government that denies its citizens the most basic human rights, such as freedom of opinion, freedom to exchange information, freedom of movement—or in fact, any freedom that impinges on its hermetically sealed society. Yet, we must assume that even this xenophobic government is not eager to destroy the fruits of all its efforts and bring its people to the brink of extinction.

Here, the critical period in U.S. history is becoming increasingly turbulent. A polarization is setting in. Two groups are actively seeking converts, and each is fearful of the other. One makes the claim that it is arming only for defense. The other says that the nature of nuclear arms is such that the U.S. cannot arm itself without becoming a threat to the USSR and that the USSR cannot arm itself without becoming a threat to the U.S. While the public seems to favor the second group, the president belongs, heart and soul, to the first. Unfortunately, he feels so keenly about his convictions that he has made specious accusations founded more in delusion than in fact.

It would be difficult to assemble a complete roster of the millions of "well-meaning people in the freeze movement that were being manipulated," but the Roman Catholic bishops unquestionably head the list. When did they become agents for the KGB? Is it possible that 200 U.S. congressmen were all being irresponsible or manipulated when they voted for a joint resolution calling for a mutual and verifiable nuclear weapons freeze? If we add the majority of voters in eight states who approved a nuclear freeze concept (more than 25 percent of the national electorate), the nation would seem to be in serious trouble if all the people were dupes, sleepwalking into the future.

Is it conceivable that the nation could survive such incompetence as was displayed by the majority of the chiefs of staff when they registered sincere doubts about the MX missile dense pack mode? How can we interpret Pope John Paul's statement that the "development of arms of war is the scoundrel of our times"? Is he also sleepwalking? Has Robert Runcie, archbishop of Canterbury, joined the godless when he voiced his concern about the feasibility of our policy of nuclear deterrence? Have most of our Nobel laureates lost their patriotism when they consistently warn against the proliferation of nuclear weapons? Are they also being dupes when they urge that we must take risks for peace instead of risks for war?

No, I am afraid that we live in a cosmic world and our president seems unable to understand or cope with it.

Einstein warned us, "We shall require a substantially new manner of thinking if mankind is to survive." The U.S. and the U.S.S.R. need men of scientific and political stature whose hearts and minds are dedicated to establishing a world free of nuclear terror. The present arms control negotiators, on both sides, are singularly free of these qualifications. The best that can be hoped for from them, if there is hope at all, is just another nuclear tango—considerable whirling and twirling and nothing else.

Instead, let us lead the way by selecting people who are capable of a new measure of thinking. In doing so, we would send a message to the U.S.S.R. and to the world that we really mean peace when we say peace. Such a list would include:

George Kennan, former ambassador to U.S.S.R.;

John Kenneth Galbraith of Harvard;

Hans Bethe, physicist, Nobel laureate;

Adm. Noel Gaylor (ret.), former director of National Security Agency;

George Wald, biochemist, Nobel laureate;

Thomas J. Watson, former ambassador to U.S.S.R. and retired chairman of the board of IBM.

Certainly, such a list would be eminently satisfactory to the people of our country, to our NATO allies (whose populations are increasingly fearful of the consequences of our present policies) and possibly—just possibly—to the U.S.S.R. If such a list were presented to the Russians, wouldn't they, at the very least, be placed on notice that their protestations for peace would have a hollow ring if they didn't try to match the peace-directed image of our negotiators?

It would be presumptuous of me to suggest a comparable list of Russians, but if Andrei Sakharov were to be placed at the head of their arms-control negotiators, the Soviet Union would send a message of peace that would be heard round the world. This one man, physicist, Nobel laureate, humanist, dissenter and hero for all peoples would change the Soviet image overnight. If, in addition, Dr. Eugene Chazov, the Russian cochairman of the International Physicians for the Prevention of Nuclear War, was included, the sincerity of their desire for peace would become totally believable.

The path to peace may take many twists and turns, but all the signposts will read the same: Verifiable nuclear freeze; SALT II with annual reductions; 50 percent reduction in all nuclear arms; and finally, a verifiable arms control relationship. These signposts do not read MX missile; Pershing 2 missile; SS-20 missiles with multiple warheads, ad infinitum, ad nauseam.

If these suggestions are not acceptable to the Russian masterspy and to the slick American and their cadres of bureaucrats and apparatchiks, I offer the following for consideration:

There are innumerable building plots still available in Terra Del Fuego, south of 52 degrees latitude. My studies show that the ozone layer in this southernmost tip of South America will not be materially destroyed by the nitric acid that will be released by the nuclear explosions when the unthinkable occurs. For those who have the will and the wealth to carry it through, this could be a way out.

For those, however, who cannot and will not accept such a solution, a much more difficult step will have to be taken. A new manner of thinking will have to prevail. Concern with life after death must be replaced by concern with life before death. You will have to recognize that there are hawks and doves, and that they think differently. You will have to vote as you have never voted before, with care and thought. Remember that you will be voting for yourself and for untold millions who can't. This thoughtfulness may be the only way that you can save you and yours.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., February 14, 1983.

We are deeply concerned with President Reagan's nomination of Kenneth Adelman to head the Arms Control and Disarmament Agency (ACDA). While we clearly recognize that it is the responsibility of the Senate to act on this nomination, we would like to express our serious concerns as members of the House of Representatives.

ACDA is charged with formulating, coordinating, and implementing our nation's arms control policies; researching, preparing and managing U.S. participation in negotiations; and publicly disseminating information on arms control. Since 1961 ACDA has provided six administrations with a balanced view to the Pentagon's assessment of the feasibility of disarmament.

In order to best carry out ACDA's mandate, its director must possess exceptional stature, knowledge, and assertiveness. The individual must be able to master the intricacies of arms control and have the will to provide the administration with a view that might contradict that of the Pentagon. Furthermore, an individual who is a recognized advocate of responsible arms control is vital to meeting the legitimate concerns of millions of Americans and European allies who have joined the grassroots mutual disarmament movement.

We oppose Mr. Adelman's confirmation because he has not demonstrated any of these qualities. On the contrary, he has displayed a shocking ignorance of arms control issues and a disdain for the efforts of the past five presidents:

He has been scornful of the SALT process and of arms control in general. In an article in *The American Spectator*, December 1979, he stated that "We should expect nothing much from the SALT process. . . . It has not saved money for either side, and is unlikely ever to do so; it has not reduced the destructive power of either side, and is unlikely ever to do so; and it has not enhanced strategic stability (quite the contrary), and is unlikely ever to do so". He goes on to say: "That treaties cannot compel nations to reduce arms and embrace peace startles only the naive, historical know-nothings".

Other pronouncements from Mr. Adelman indicate that he fails to recognize the seriousness of the arms control movement in the U.S. and would be unreceptive to grassroots support for arms control. In a summer 1979 *Policy Review* article, he says "The scare technique, repeated long and hard enough, works. It easily penetrates public consciousness and the media. The newspapers, in fact, lap it up, much as they do any mass murder, rape, or assassination".

Mr. Adelman does not seem to accept a fundamental premise upon which our strategic doctrine and arms control policies have rested for 30 years—that a nuclear war is unwinnable and cannot be survived. He has advocated increasing our efforts in the areas of ballistic missile defense (which would require abrogation of the ABM ban) and civil defense. In his article "Beyond MADness" in the summer 1981 issue of POLICY REVIEW, Mr. Adelman stated: "Largely because of the mutual assured destruction (MAD) doctrine, the strategic case for ballistic missile defense has not been considered on its merits for more than a decade. With the fall of MAD will come the correction of this oversight. Proponents of missile and civil defense advocate that the U.S. match the Soviet efforts to acquire the capacity to fight a prolonged nuclear conflict".

Mr. Adelman's views on "limited nuclear war" are particularly disturbing. Also in "Beyond MADness", he says "The U.S. should be prepared (and be seen to be prepared) to put our strategic forces into limited play in limited crisis that may arise in the wider world, such as the Berlin Crisis of 1961 and the Middle East war of 1973. U.S. forces should not be fashioned solely for the most remote crisis of all; that of an all-out U.S./U.S.S.R. nuclear conflict".

In his recent confirmation hearings before the Foreign Relations Committee, Mr. Adelman displayed a shocking incompetency on arms control questions. When asked by Senator Pell if he thought a nuclear war could remain limited, Mr. Adelman replied, "It is an area that I have not gone into . . . I don't have a strong opinion". When asked by Senator Helms if he would support a verifiable agreement with the Soviet Union to eliminate all nuclear weapons, Adelman said: "I have never thought about that in my life". Senator Cranston asked whether the Soviets are violating the terms of SALT II. He responded: "That is not an area I have looked into. It is not an area I am knowledgeable about at all". Senator Cranston pressed him on the question of possible Soviet cheating on SALT II and Mr. Adelman said in effect that one has to know exactly what the treaty requires to answer that question. Asked whether he knows all that, he responded "no".

Mr. Adelman's past performance suggests to us that he is simply unprepared and unqualified to lead the federal agency with primary responsibility for arms control policy.

We are deeply disappointed with the President's nomination, and believe that it reflects the Administration's casual attitude towards arms control as nothing more than a public relations nuisance which requires custodial care by a disarmament neophyte.

We understand that the Administration intends to spend millions of dollars on a public relations campaign to placate the rising tide of European opposition to its policies. We suggest that the Administration would do far better to renew a commitment to arms control, and to prove that commitment by appointing a recognized advocate of mutual disarmament whose expertise in this field is unquestionable. As the New York Times noted in a recent editorial:

"If even at this late hour the Administration is really content with the nominee's modest credentials, then it still does not care enough about arms control or still has not learned enough about how to attain it".

We hope that the Senate will consider these views in its deliberations.

UNITED NATIONS PRAISED BY UNA

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. GREEN. Mr. Speaker, I would like to take this opportunity to share with my colleagues a statement by Mrs. Ruth Bishop, president of the United Nations Association of New York, which appeared in the winter edition of the UNA of New York's News. The statement is an insight full assessment of the importance and value of the United Nations, and it deserves a large audience:

RUTH BISHOP REPORTS

As the new year begins, I, as President of the UNA of New York, NY, would like to share with you my thoughts about the United Nations and our Chapter's relation to it.

I am persuaded that people initially become members of our Chapter because they wish to become identified with the United Nations as well as to show their support of the United Nations. . . .

If my premise that our members want to be identified with the United Nations is right, then it follows that when they are confused or angry at certain actions or reported actions, taken or not taken by the United Nations, they show their displeasure with the United Nations by resigning from UNA-USA. Our Chapter regrets the loss of members who resign—or those who purposely allow their membership to lapse. But, and this is gratifying to us who work daily at strengthening our Chapter, a personal letter—a lengthy letter that expresses our Chapter's regret at the resignation or lapse of membership—frequently results in a renewal of membership. We also stress our belief that the now more frequent public criticism of the United Nations, even when it is voiced by the Secretary General, is preferable to the emotional disappointment of those whose unrealistic expectations of total success in securing worldwide peace often prevent them from realizing that a step-by-step approach to fulfilling the aims of the Charter is essential to establishing lasting peace.

In my opinion, the Security Council, so often criticized, has proved to be a solid structure that has been and is working remarkably well. As long as one superpower can veto the wishes of another superpower, the world has an essential, usable brake on worldwide disaster. Let us recall that it was the United States that insisted upon the veto as the price of our belonging to the United Nations. Without it, the Senate would not have consented to the United States' joining the United Nations. For many years, while the Allies, the permanent members, dominated the Security Council, the United States did not use the veto.

It is only since decolonization occurred, and more than one hundred new nations have been created, that the use of the veto by the United States has become more frequent. The veto, as it was intended to do by the founders of the United Nations, still serves to insure to a large extent that the Big Powers are able to act as a balance to the expressions and votes on resolutions in the General Assembly.

Let us judge the thirty-seven years of development of the United Nations as outlined in the Charter against the millions of years of recorded history; and let us rejoice in its existence, imperfect today but always having the potential—indeed only it has the potential, to create that core of justice, freedom and peace universally desired.

. . . The United Nations is as strong as its member nations permit it to be. Let us inform our President and the State Department of how we feel about the value of the United Nations to the United States, today and in the future.

I would also like to point out that Mrs. Bishop is not alone in her views. Mr. Orville Freeman, Chairman of the Board of Governors of the UNA of the U.S.A., wrote to Mrs. Bishop complimenting her on her statement. I would like to share this letter as well.

February 10, 1983.

DEAR RUTH: I write to compliment you on the winter issue of the UNA of New York News. I thought it was extremely well done.
